

# OE ENERGY MARKET SNAPSHOT

## Northeast States Version – December 2009 Data

---

- **Special Report**
- **Natural Gas and Fuel Markets**
- **Electricity Markets**

Office of Enforcement  
Federal Energy Regulatory Commission  
January 2010

# Special Report:

## **OE Report, Priorities, Orders, and Transparency**

# **2009 REPORT ON ENFORCEMENT**

**Docket No. AD07-13-02**

**Released December 17, 2009**

Report: <http://www.ferc.gov/legal/staff-reports/12-17-09-enforcement.pdf>

Webcast of Presentation: <http://ccrealserver.gmu.edu/podcasts/ferc121709a-2.mp3>

## Office of Enforcement Priorities

**Enforcement will focus on matters involving:**

- **Fraud and market manipulation;**
- **Serious violations of the reliability standards;**
- **Anticompetitive conduct; and**
- **Conduct that threatens the transparency of regulated markets.**

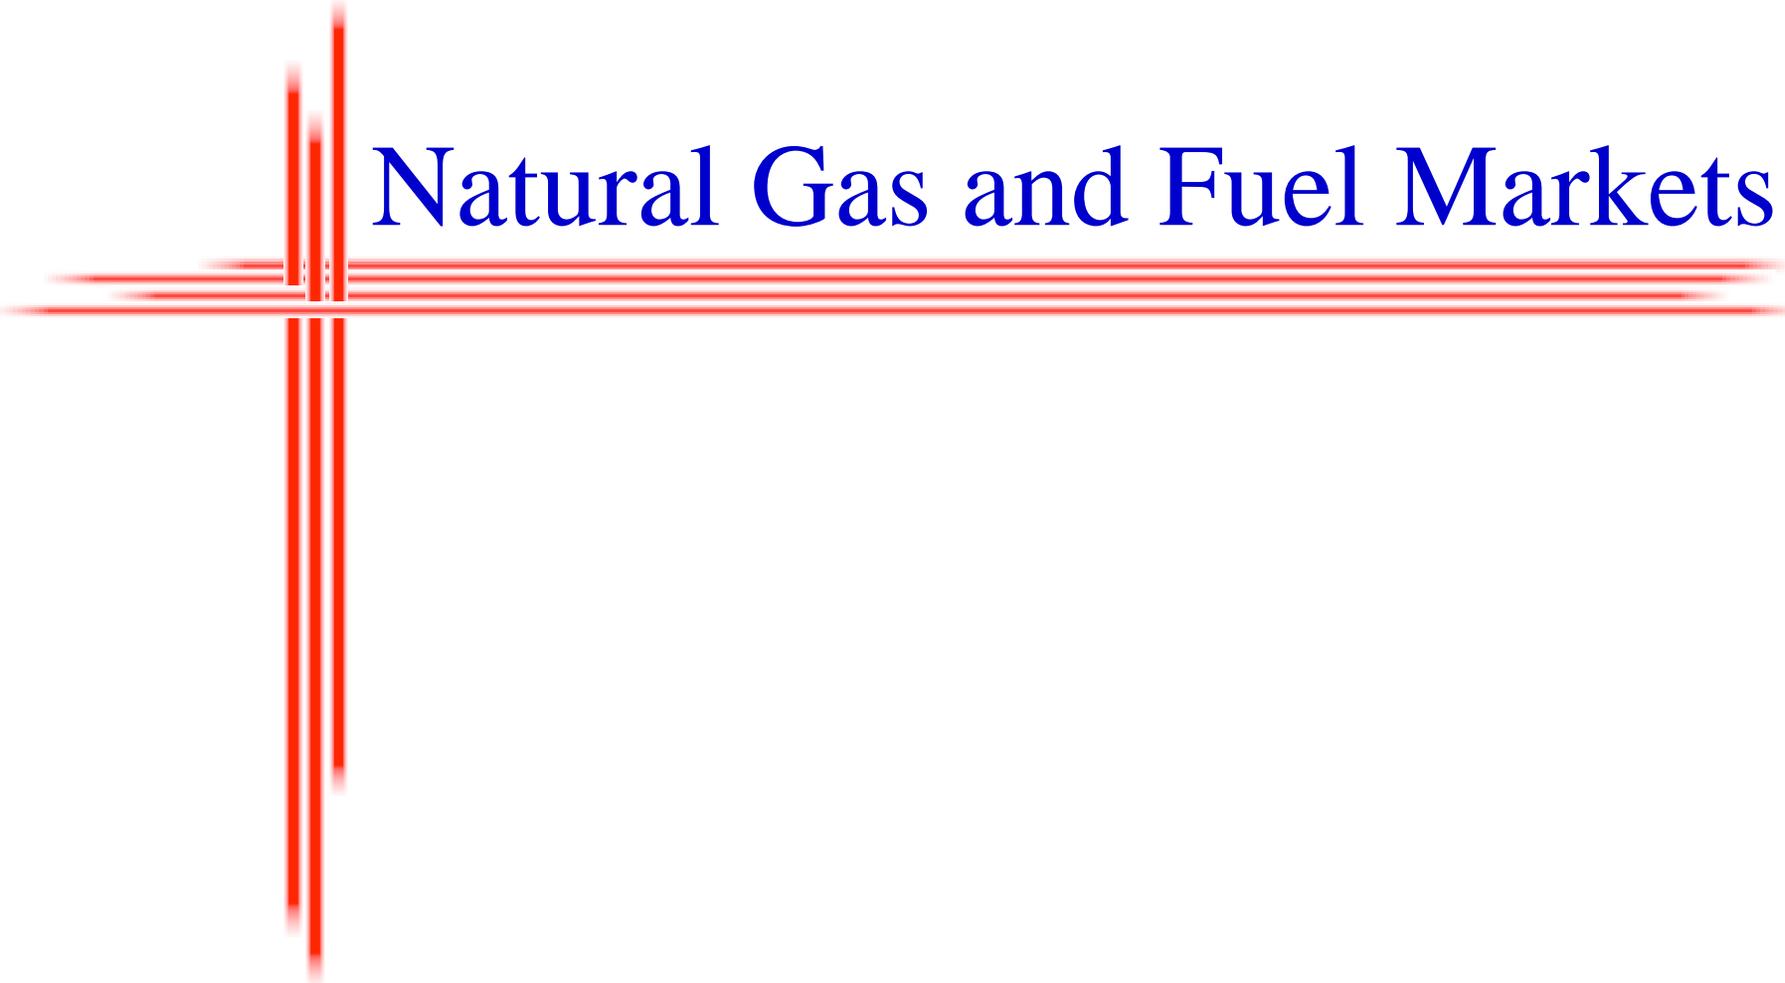

## **FERC Acts to Make Enforcement Process Transparent**

### **Docket Nos: PL10-1-000**

- **FERC formalized a process by which the Office of Enforcement will provide exculpatory evidence to subjects of its investigations and respondents in administrative enforcement proceedings.**

### **Docket Nos: PL10-2-000**

- **FERC authorized the Secretary of the Commission to issue a “Staff’s Preliminary Notice of Violations” after the subject of the investigation has had an opportunity to respond to staff’s preliminary findings letter.**

A decorative graphic consisting of several thick, parallel red lines. A vertical line runs down the left side, and a horizontal line runs across the middle. They intersect to form a cross-like shape. The lines have a slight blur or glow effect.

# Natural Gas and Fuel Markets

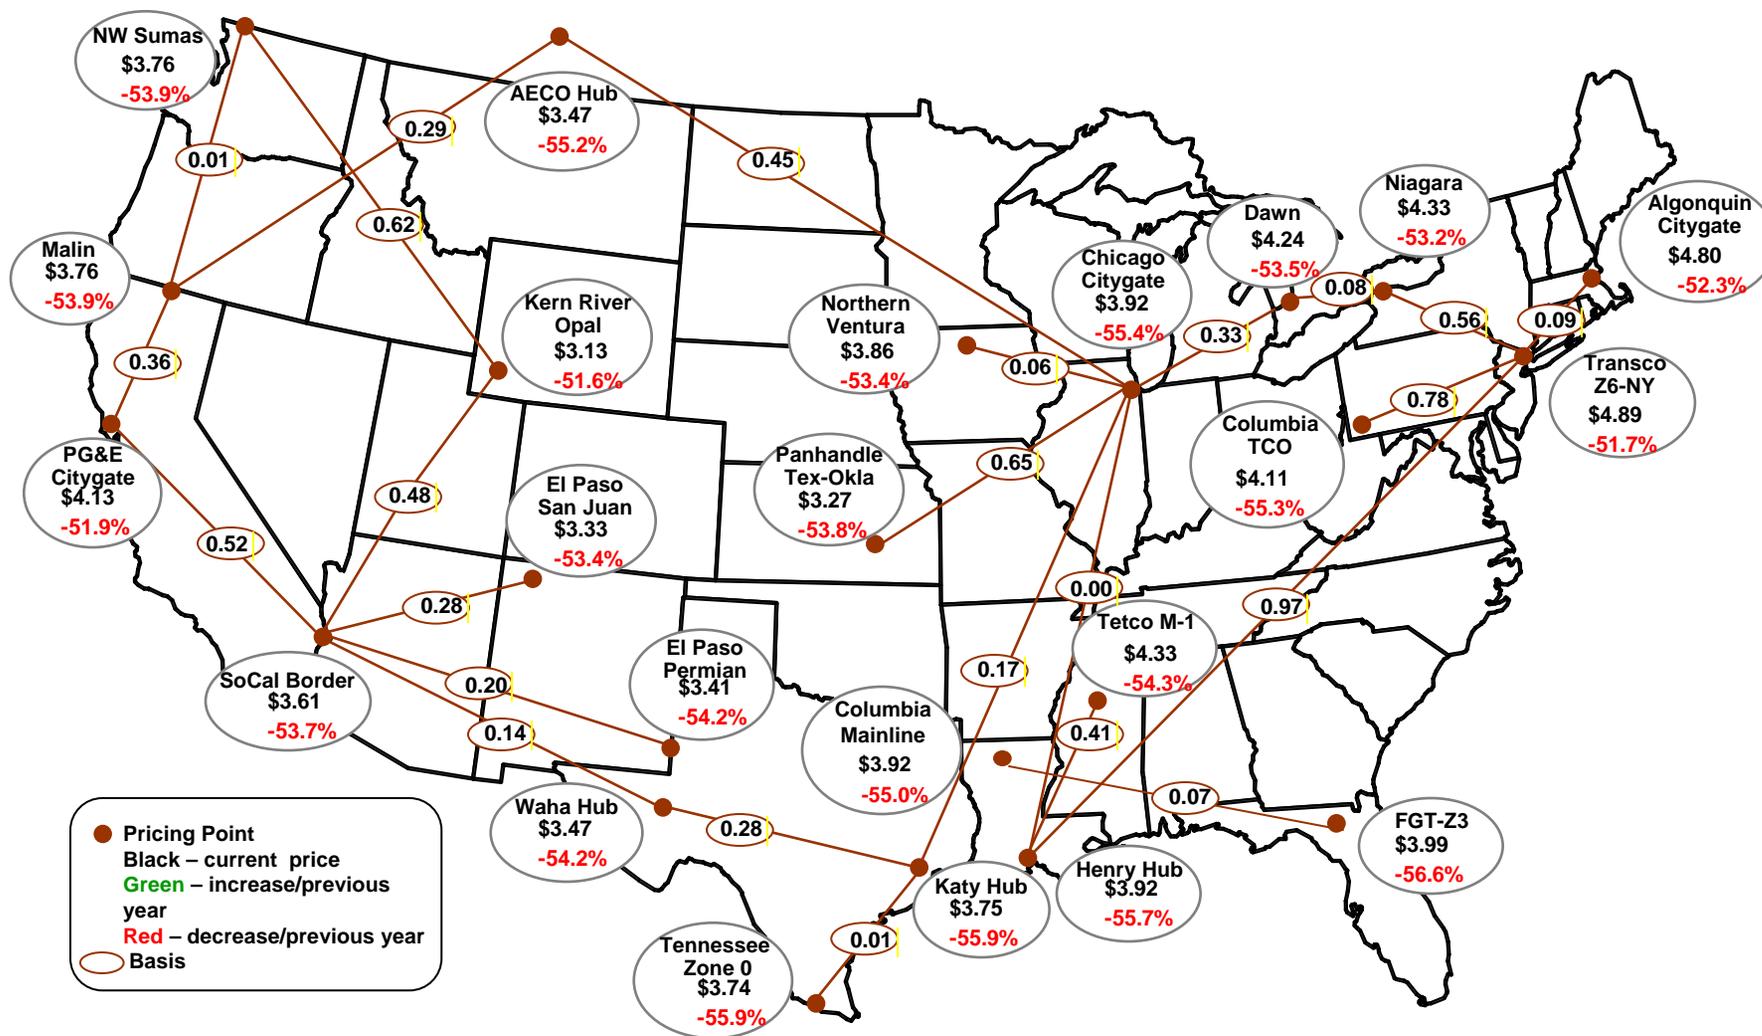

## Natural Gas Market Review for 2009

- Average spot natural gas prices declined 55% dipping to their lowest level in seven years.
- Domestic dry gas production rose 3% despite the dramatic decline in prices and a 45% decline in rigs. Major contributors to domestic gas supply gains were expanding shale development and high-grading; improvements in business practices; use of hedging and persistent high forward prices.
- Growing domestic supplies pushed out gas imports; overall imports fell by 1 Bcfd.
  - Canadian gas imports declined 16% to 6.8 Bcfd.
  - LNG sendout rebounded by 20% to 1.2 Bcfd; LNG imports grew 42% to 500 Bcf.
- Despite the recession, overall average daily gas use was down less than 1% from the previous year to 64.2 Bcfd. Increases in power generation demand almost offset declines in the residential, commercial, industrial sectors. Gas use for power set a record (7 Tcf) even though overall electric demand fell 4%.
- Storage set new records leading EIA to update its estimate of peak working gas capacity to 3.9 Tcf.
- Big gains in infrastructure occurred for the 2nd year in a row. Estimated capacity increases in 2009 were:
  - Pipelines: 22 Bcfd of natural gas intrastate and interstate capacity;
  - Storage: 107 Bcf of incremental working gas capacity;
  - LNG: 5 Bcfd of regasification plus 20 Bcfd of onsite storage.

## Storage Projections Miss EIA Report and Add Price Volatility

Dec 17, 10:30am - EIA Releases Storage Report

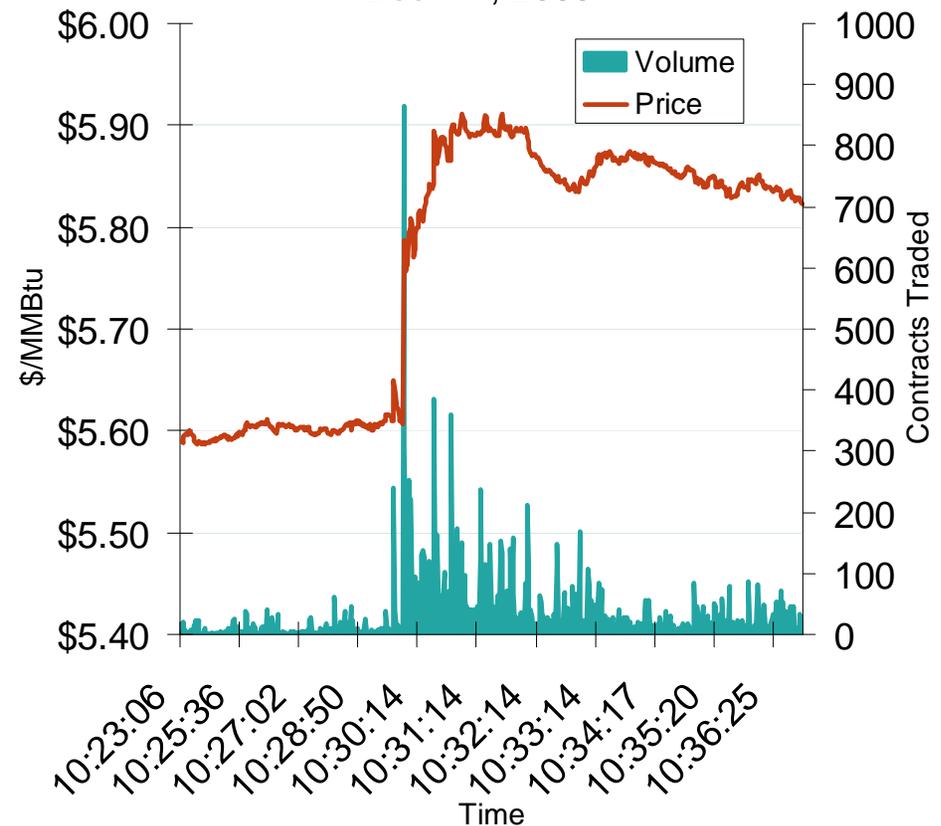

- EIA reports 207 Bcf storage withdrawal for the week ending Dec 11.
- Consensus estimates wide of mark -179 Bcf.
- Prompt futures price jumps \$0.30 in 62 seconds, with high trading volumes.

Possible reasons for greater than expected withdrawal:

- Some estimates based on heating degree days. Impact of record high inventories and cheap gas in storage not adequately assessed.
- Estimates that rely on observing daily flows in and out of storage of the interstate pipeline system unable to see and assess the pull on storage in the intrastate gas market. Intrastate pipelines do not report flows.

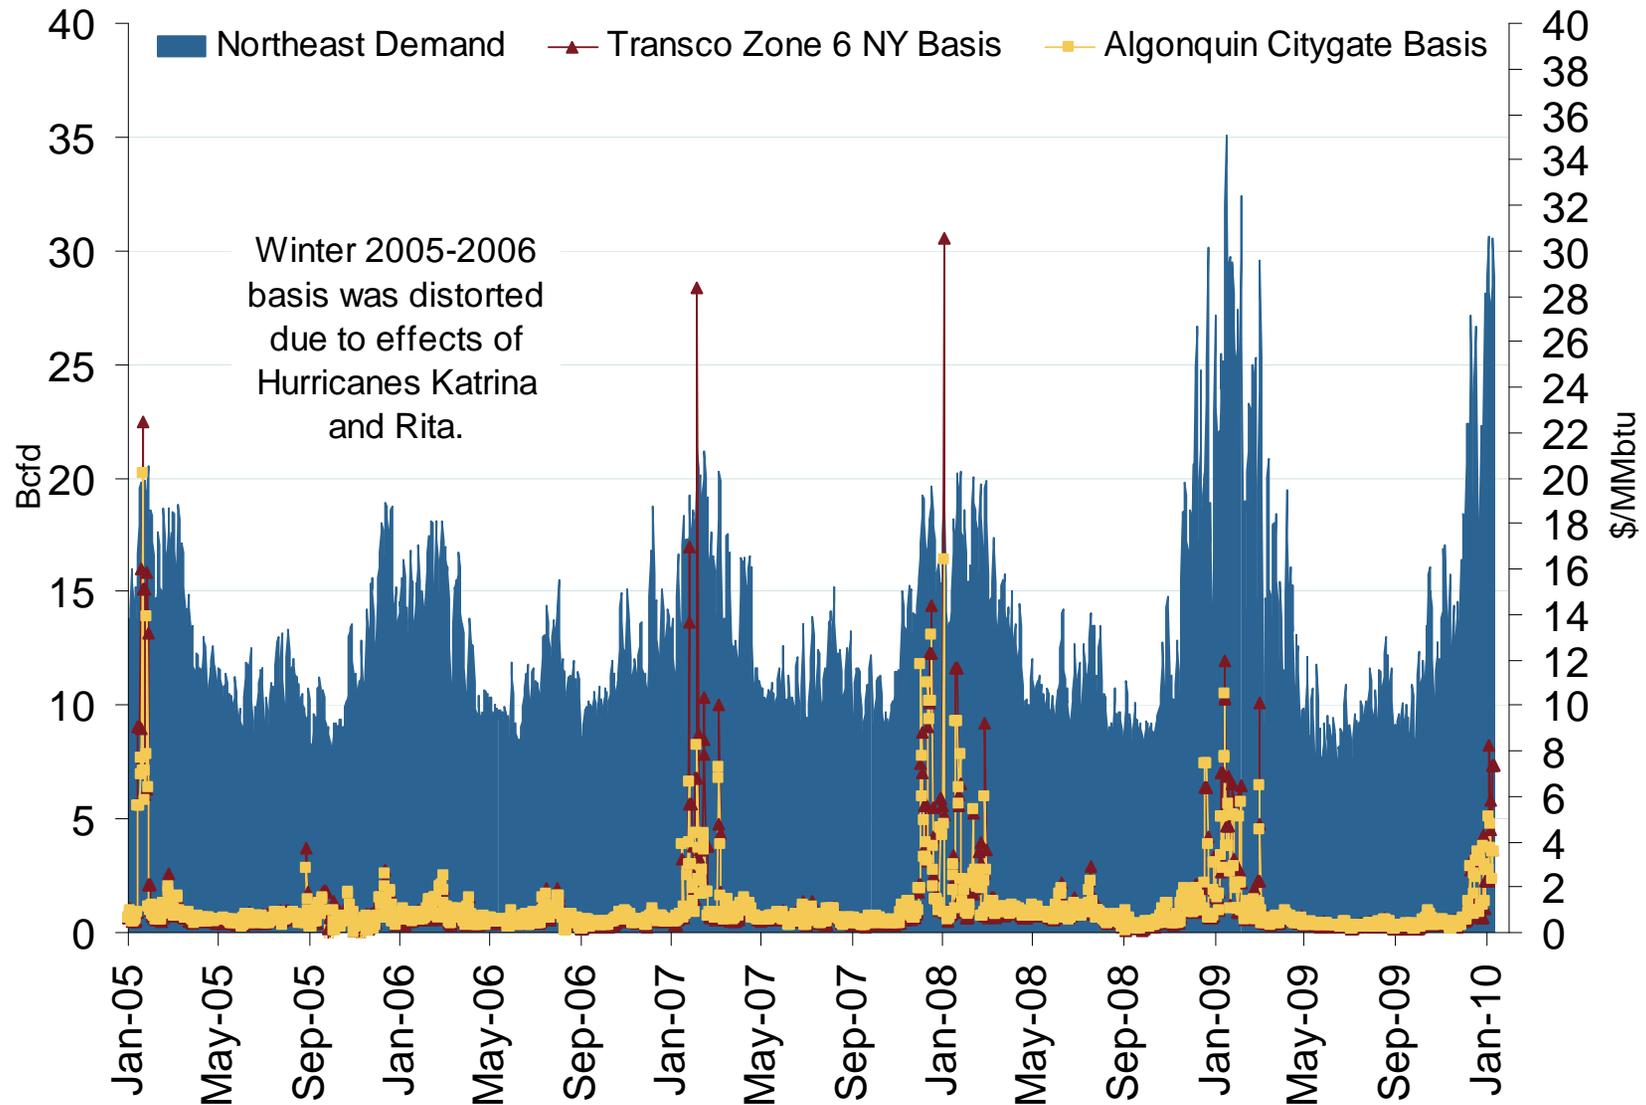

Large estimation errors continued in December resulting in price volatility.

## Emissions Markets: Greenhouse Gas Programs

Federal Energy Regulatory Commission • Market Oversight @ FERC.gov

# Collaborative Greenhouse Gas (GHG) Programs

## Collaborative Regional GHG Programs:

- Three North American groups with goals to lower regional GHG emissions were initiated by state Governors.
- 32 U.S. states, D.C., eight Canadian provinces, and six Mexican states are Participants or Observers.
- Observer jurisdictions do not commit to group GHG reduction goals, but participate in proceedings should they opt to join later. RGGI Observers are not on its Board.

## Western Climate Initiative (WCI):

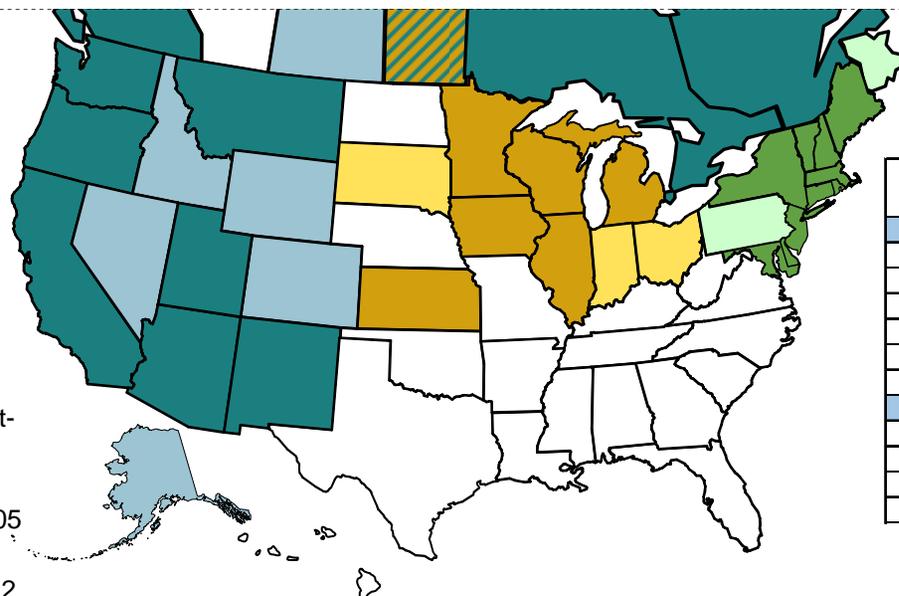

- Created February 2007
- Partners: 7 states, 4 provinces; Observers: 5 states, 1 province
- Announced its design for a market-based, *multi-sector* cap-and-trade program, Sept 2008:
  - 15% CO<sub>2</sub> reduction below 2005 levels by 2020
  - Phase I to take effect Jan 2012

## Midwest Greenhouse Gas Reduction Accord:

- Established November 2007
- Participants: 6 states, 1 province; Observers: 3 states, 1 province
- Preliminary design recommendations issued Dec 2008: 15 - 25% reductions by 2020, 60 - 80% by 2050

## Regional Greenhouse Gas Initiative (RGGI):

- Compliance period began Jan 1, 2009
- Participants: 10 states; Observers: 1 state, D.C., 3 provinces
- Market-based cap-and-trade effort to reduce *power-sector* CO<sub>2</sub> emissions.
- 10% CO<sub>2</sub> reduction by 2018 covers over 200 plants
- One allowance is the right to emit 1 ton of CO<sub>2</sub>
- Annual RGGI cap is 188 million tons

## RGGI Auction Data

Auction Date	Allowances Sold (M)	Clearing Price	Revenue (M)
Allocation Year 2009			
9/25/2008	12.6	\$3.07	\$38.7
12/17/2008	31.5	\$3.38	\$106.5
3/18/2009	31.5	\$3.51	\$110.6
6/17/2009	30.9	\$3.23	\$99.8
9/9/2009	28.4	\$2.19	\$62.2
12/2/2009	28.6	\$2.05	\$58.6
Allocation Year 2012			
3/18/2009	2.2	\$3.05	\$6.7
6/17/2009	2.2	\$2.06	\$4.5
9/9/2009	2.2	\$1.87	\$4.1
12/2/2009	1.6 / 2.2	\$1.86	\$3.0

Updated January 8, 2010

1108

## Collaborative Greenhouse Gas Programs

### National Energy and Environment Update:

- Senator Kerry and Boxer introduced the Senate version of the American Clean Energy and Security act of 2009. Major differences from H.R. 2454 include:
  - More aggressive reductions in emissions 20% below 2005 levels by 2020 using cap-and-trade instead of 17%.
  - Bill is silent on emissions allowances given to industry
  - At least give other Senate committees are expected to contribute to the bill

### RGGI launches offset module:

- Offset projects can now be registered and tracked in the RGGI CO2 Allowance Tracking System (RGGI-COATS).
- Projects must open a RGGI-COATS account and obtain a project ID, register the project in their home state, and then complete the project verification process.

### RGGI Auctions:

- Auction 6 conducted on December 2, 2009 raising \$61.6 million for energy efficiency, renewable energy, and other consumer-benefit programs in participating states.
- Participant states are: CT, DE, ME, MD, MA, NH, NJ, NY, RI, VT.
- RGGI has raised a total of \$494.7 M to date
- RGGI states auctioned all 28.6 M of the offered allowances for the 2009 vintage and 1.6 of the 2.2 M offered for the 2012 vintage.
- This was the first RGGI auction that failed to sell out.
- 2009 allowances cleared at \$2.05 per allowance, down from the \$2.19 price of Auction 5.
- 2012 allowances cleared at \$1.86 per allowance, the minimum floor price set by RGGI.
- Auction 7 is scheduled for March 10, 2010.

### Midwest Greenhouse Gas Regional Accord:

- Signed at Midwestern Governors Association (MGA) Energy Summit to establish GHG reduction targets (Nov 2007):
  - Participants: IA, IL, KS, Manitoba, MI, MN, WI
  - Observers: IN, OH, Ontario, SD
- Preliminary recommendations included GHG reduction ranges and multiple sector cap-and-trade. (Dec 2008)
- **Draft Plan and Recommendations** released by MGA stakeholder advisory group (June 8, 2009):
  - **Reductions** from 2005 levels: 18-20% by 2020; 80% by 2050
  - **Trading** will begin in 2012.
  - **Allowances** would transition from low-cost allocation in early years to 100% auction after 9 years. The plan left allocation distribution decisions to participant jurisdictions.
  - **5 sectors** to be covered by cap-and-trade, in proportion to their emissions share are: electricity generation, industrial combustion, industrial process sources, other fuels serving buildings, and transportation fuels.
  - **Offsets** can count towards 20% of compliance, but will be limited initially to projects within participating jurisdictions or those who've signed MOUs with the Accord. "Offsets must be real, additional, verifiable, and enforceable."

### Western Climate Initiative (WCI):

- Launched at Western Governors' Association meeting to reduce regional GHG collectively, Feb 2007:
  - Partners: AZ, British Columbia, CA, Manitoba, MT, NM, Ontario, OR, Quebec, UT, WA
  - Observers: AK, CO, ID, KS, NV, Saskatchewan, WY
- Initial design released for a market-based, *multi-sector* cap-and-trade program (Sept 2008):
  - Phase I to take effect Jan 2012
  - Phase II to begin 2015; will cover 90% of regional emissions
- Released its [2009 - 2010 Work Plan](#) (Feb 2009), including primary committee tasks.

**Abbreviations:** CO<sub>2</sub> – Carbon dioxide (emissions); DG - distributed generation; DR - demand response; EE - Energy Efficiency; EPA – U.S. Environmental Protection Agency; GHG - Greenhouse Gases; RECs - Renewable Energy Credits; SF<sub>6</sub> – sulfur hexafluoride
