

OE ENERGY MARKET SNAPSHOT

Northeast States Version – February 2010 Data

- **Special Report**
- **Natural Gas and Fuel Markets**
- **Electricity Markets**

Office of Enforcement
Federal Energy Regulatory Commission
March 2010

Special Report:

Agenda Update

- **Order 720A**
- **Electric Transparency Notice of Inquiry**
- **Credit Notice of Proposed Rulemaking**

Order 720A Promotes Greater Transparency in Gas Markets

- Commission voted to reaffirm and clarify Order No. 720 at January meeting
- Requires most “non-interstate pipelines” that deliver ≥ 50 million MMBtu (Bcf) annually to post daily scheduled flows at receipt and delivery points on a publicly accessible website
 - Postings to occur for receipt and delivery points with design capacity $\geq 15,000$ MMBtu/d
- Exemptions primarily for:
 - 1) Pipelines that deliver < 50 million MMBtu (Bcf) annually
 - 2) Pipelines that deliver more than 95% of natural gas directly to “retail end-users” (primarily LDCs)
 - 3) Pipelines that fall entirely upstream of a processing or treatment plant (primarily gatherers)
 - 4) Storage providers
 - 5) Pipeline owned or operated by end-users
- Requires interstate pipelines to post no-notice service

Electricity Market Transparency NOI

The Commission is seeking comment on whether it should extend the EQR filing requirements to publicly owned utilities, municipal utilities, public utility districts, rural cooperatives, and federal entities in order to improve:

- Ability to monitor power sales for market power and manipulation
- Ex Ante analysis (granting MBR authority)
- Ex Post analysis

Additionally, the Commission is seeking comment on whether FERC should consider other refinements to the existing EQR filing requirements including:

- Reporting the trade date and type of rate;
- Reporting resale of financial transmission rights in secondary markets;
- Standardizing the unit for reporting energy and capacity transactions; and
- Omitting the time zone from the contract section of the EQR.

Comments are due March 30, 2010.

Credit Reforms in Organized Wholesale Electric Markets

The Commission is seeking comment on the following proposals:

- Shorten the settlement cycle to no more than seven calendar days with no more than an additional seven calendar days for final payment;
- Limit unsecured credit to no more than \$50 million per market participant in energy markets and eliminate unsecured credit in Financial Transmission Rights (FTR) markets; Clarify the ability of market administrators to offset amounts owed to market participants against amounts owed by market participants and to manage defaults;
- Establish minimum participation criteria for market participants;
- Specify circumstances in which a market administrator may invoke “material adverse change” to require a market participant to post additional collateral;
- Limit time period allowed for posting additional collateral when additional collateral is requested; and
- Whether the credit reforms should be applied differently to certain market participants depending on their characteristics.

Comments are due March 29, 2010.

Oil, Coal, Natural Gas and Propane Daily Spot Prices

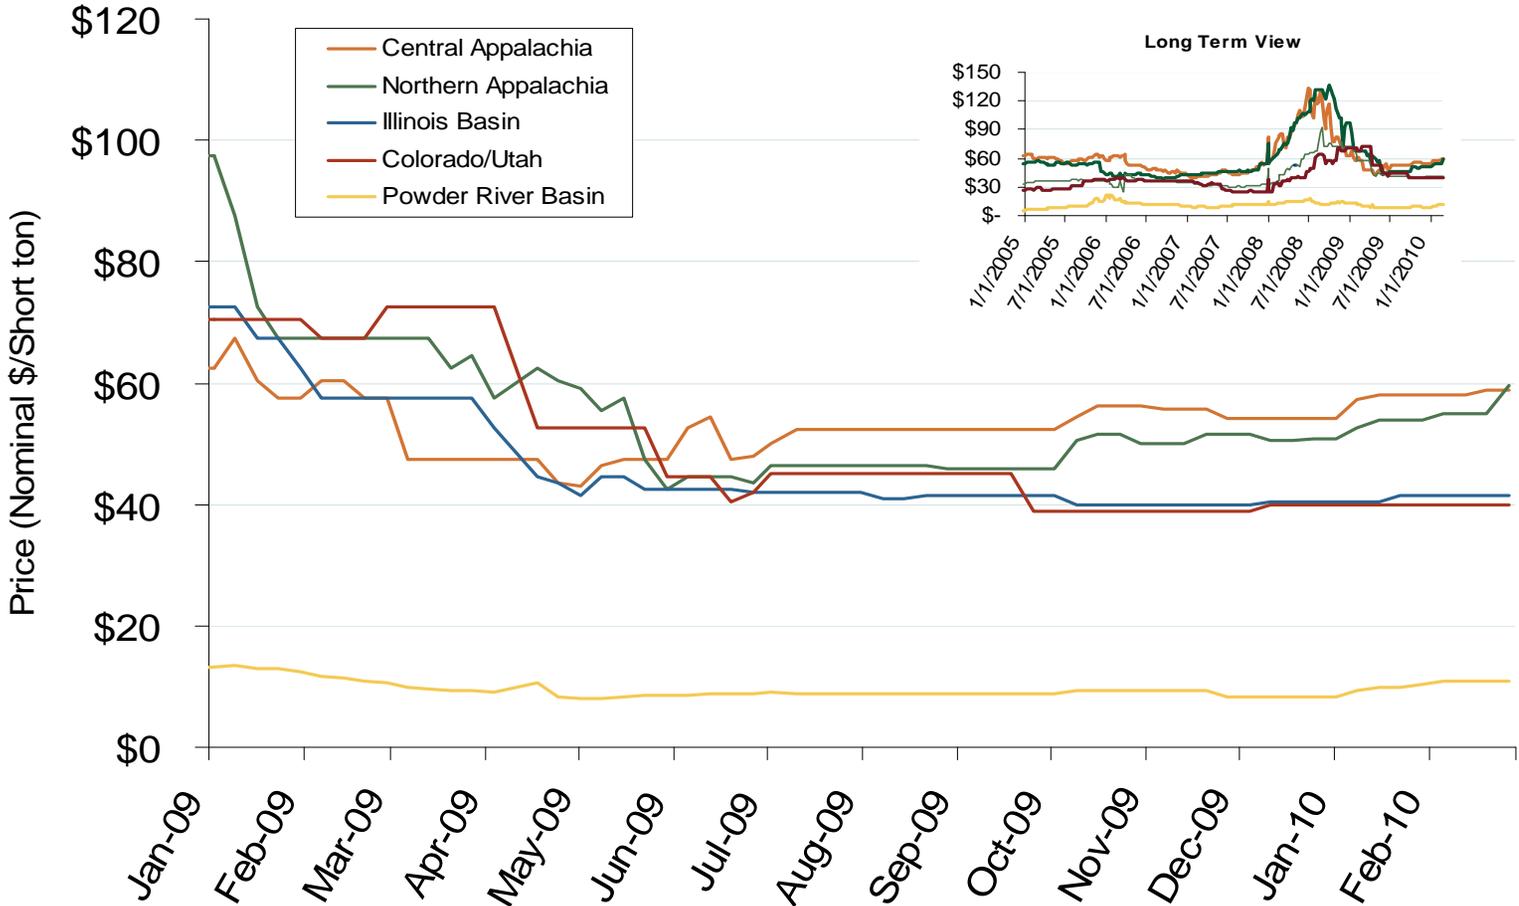

Source: Derived from *ICE* and *Bloomberg* data.

Note: Coal prices are quoted in \$/ton. Conversion factors to \$/MMBtu are based on contract specifications of 12,000 btus/pound for Central Appalachian coal and 8800 btus/pound for Powder River Basin coal.

Updated March 5, 2010

Regional Coal Spot Prices

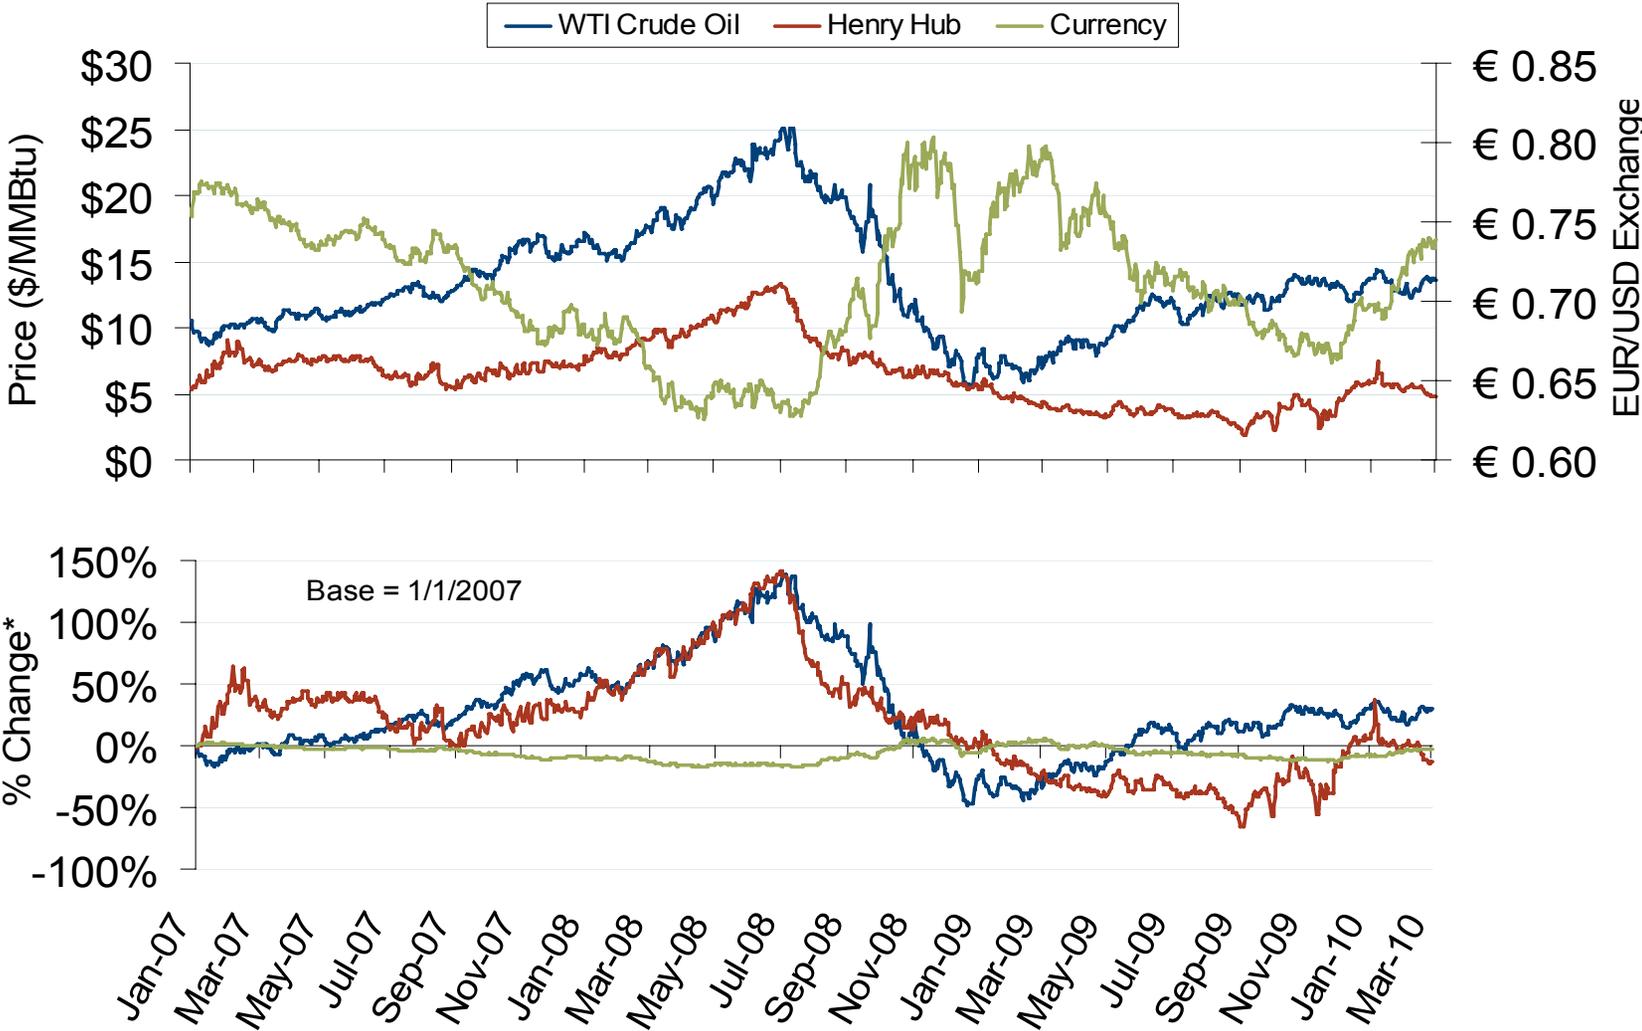

Note: the Central Appalachian (CAPP) coal is priced at Big Sandy. All others are mine mouth prices. Prices do not include transportation costs to a plant, as those can vary widely by contract specifications. Prices exclude incremental cost of emissions allowances.

Gross Value of FTRs Purchased at Annual Auctions

- Majority of ISO-NE and CAISO FTR auction purchases made by top 10 participants
- Low gas prices, decreased demand, and transmission upgrades contribute to significant decline in ISO-NE annual FTR auction
- 2009 MRTU market start encourages market participation in 2010 FTR auctions

Note: Does not include allocated FTRs positions.
