I. EQR Redesign for 3rd Quarter 2013 and Beyond

The new Electric Quarterly Reports (EQR) system provides a technical solution to collect, analyze, and manage the data reported in the EQRs.

The EQR system will allow required Sellers (“Sellers”) to file their EQRs by use of a web interface or by submitting an Extensible Mark-Up Language-formatted (XML) data.

The redesigned system will engage a service-oriented architecture and capitalize on the existing systems in the FERC enterprise specifically. EQR Sellers and their designated Agents will be required to use the FERC’s eRegistration and Company Registration portals.

- The existing eRegistration services are used for authentication and authorization of the individual(s) using the system. Only individuals registered in the FERC eRegistration system are designated to file EQRs on behalf of one or more Seller(s). Information regarding eRegistration is found on the FERC website at <http://www.ferc.gov/docs-filing/eregistration.asp>. Please contact ferconlinesupport@ferc.gov with additional eRegistration questions.
- The existing Company Registration system is used for authorization and authentication of the Companies that do business with FERC, including Sellers and Agents. Sellers will be required to use the Company Registration system to obtain a Company Identifier (if the company does not already have a Company Identifier). A Seller may also designate employees or registered third party individuals or companies to submit EQR filings on its behalf. Information regarding Company Registration is found on the FERC website at <http://www.ferc.gov/docs-filing/company-reg.asp>. Please contact ferconlinesupport@ferc.gov with additional Company Registration questions.

EQR Application Overview

The EQR application is designed to gather and manage information about these four main data elements:

- ID Data
- Contract Data
- Transaction Data
- Index Reporting Data

EQR Filing System Rules

The rules governing the flow of information are contained in the Data Dictionary and validation rules at the following links. Error messages and their cause are listed in Appendix B of this guide.

Data Dictionary: <http://www.ferc.gov/docs-filing/eqr/order770/data-dictionary.pdf>

Validation: <http://www.ferc.gov/docs-filing/eqr/order768/validation-rules.pdf>

Filing for 2nd Quarter 2013 and Earlier

Filings prior to 3rd Quarter, 2013 should follow the steps and processes described in the “Filing for 2nd Quarter 2013 and Earlier” portion of the EQR page at the link below.

II. Getting Started through Web Interface

The EQR system provides a web-based user interface where users can create, edit, update, copy, and delete EQR filings. Filings for 3rd Quarter 2013 and beyond should follow the steps in this Guide as well as any information described in the “Filing for 3rd Quarter 2013 and Beyond” portion of the EQR page.

NOTE: Prior to using the EQR system, a user must be eRegistered and be delegated by a registered Seller company. ¹

Logging In

To access the EQR Web client, a user should:

1. Access the public FERC Web Site at <http://www.ferc.gov> .
2. Click on the **Documents & Filing** menu → **Electric Quarterly Report (EQR)**.
3. Click on the EQR Registration link Icon.

4. The following screen displays the EQR Initial Log-In Screen.

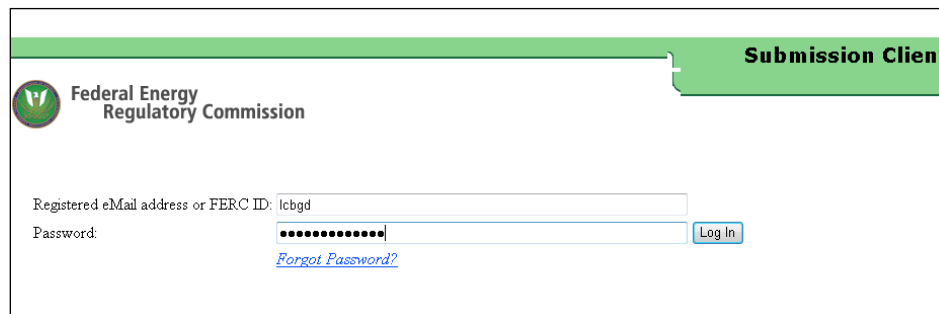

A screenshot of the EQR Initial Log-In Screen. The page has a green header bar with the text "Submission Client" on the right. Below the header is the Federal Energy Regulatory Commission logo and name. The main content area contains a login form with two input fields: "Registered eMail address or FERC ID:" with the value "lcbgd" and "Password:" with a masked password "*****". To the right of the password field is a "Log In" button. Below the password field is a blue link that says "Forgot Password?".

Figure 2 - EQR Initial Log In Screen

5. Enter the email address and password created in the eRegistration system.

¹ Information regarding Company Registration and eRegistration may be found on the FERC website at <http://www.ferc.gov/docs-filing/company-reg.asp> and <http://www.ferc.gov/docs-filing/eregistration.asp>.

6. The Sellers Screen (Figure 3, below) lists the Seller (Data Dictionary Field 2) names that are assigned to the user who logs in.

Figure 3 – Sellers Screen Fields

Filing Period

The filing period will default to the current filing period.

Seller Name (Seller CID)

The Seller is the name of the company that is authorized and required to file as indicated in the Company Registration. The “Seller Names” column displays those companies that have assigned the currently logged-in user as an EQR Seller contact or delegated EQR Agent. The Company Identifier (CID) is a number that is assigned to the Seller during the Company Registration process.

Last Action Date

This column will populate with an appropriate date if there is a filing that has been filed and accepted.

Filer

The Filer list reflects the Sellers and designated Agents registered during the Company Registration Process. In most cases, the Seller is also the Filer, as shown below.

The screenshot shows the 'Electric Quarterly Reports' interface for the Federal Energy Regulatory Commission. It includes a 'Filing Period' dropdown set to 'Q2, Apr-Jun 2012' and a 'Logged in User' field showing 'Linda.Baker@ferc.gov'. Below this is a table titled 'Sellers Who have delegated you to file on their behalf:'. The table has the following columns: Seller Name, Last Action Date, Status, Action, and Filer. Two rows are shown:

Seller Name	Last Action Date	Status	Action	Filer

Figure 4 - Seller Name and Filer Name

NOTE: The user may select another Seller from the Filer drop-down menu if the user has been assigned as an EQR Agent for multiple Sellers in the Company Registration process.

Status

This column displays one of the following:

- **Editable** – This is the status of a previous filing that has been submitted by this seller.
- **Locked** – This is the status of a filing that another user is editing. Please see rules below.
- **Blank** – This is the status if a filing has not been filed by this seller.

Locked Status Rules

It is possible for multiple users at multiple locations to perform edits in the EQR system on the same EQR filing (for the same Seller and for the same Filing Period). However, the following guidelines apply:

- Only one assigned user at a time may edit the same EQR filing in the EQR System for a given Seller and given Filing Period.
- When a user selects a Seller for a filing Action, the system locks the Seller's working data to prevent other users from selecting that same Seller for any filing Action within the same Filing Period.
- As long as the user is actively working on the data, the system will remain locked.
- The user will be automatically logged out if the session is inactive for 20 minutes.
- When a user intentionally logs out, the system will also release the lock on the Seller's working data. The system will save the changes made by that user and will keep the working data available for subsequent users until FERC accepts that filing.
- If a user unintentionally exits the web interface, the working data will be saved for subsequent users.

Entering Data through Actions on Seller Screen

A user must select an Action from the drop-down menu of available options under the “Action” column to create, review, or modify a filing. The following options are available from the drop-down menu:

- **No Action** – This default status indicates that the user has not yet selected any action for the Seller/Filing period.
- **CSV New** – This action allows a user to create a new EQR filing from data that is uploaded in a zip file (containing up to four CSV files). This selection creates Seller’s Identification, Contract Information, and Transactions Information.
- **CSV Replace** – This action will override all or a portion of the information in an existing filing of the selected Seller/Filing Period with the data contained in a replacement CSV file uploaded by the user.
- **Manual New** – This action displays blank data entry screens, allows the user to enter all (or a portion of) the filing information manually. The Seller’s Identification information, the Contract Information, and/or the Transactions Information can be keyed in by the user.
- **Manual Edit** – This action retrieves existing data for the selected Seller/Filing period from the EQR database, displays the data on the screen, and allows the user to update and save the data. The Seller’s Identification Information, the Contract Information, and/or the Transactions Information can be updated manually. This option is only available for non-legacy data (*i.e.*, a Seller must have filed at least one quarter of EQR data in the new system before this option becomes available).
- **Prefill from Prior Filing Period** – This action retrieves existing Seller and Contract information from the previous quarter’s filing, and displays the data on the screen. The user can then update the data and reuse it for the current filing period. This option is only available for non-legacy data (*i.e.*, once a user has made a prior-period filing in the new system).

EQR Filing Steps: “CSV New” Action

If the user selects the CSV New Action, (s)he will perform the following steps:

1. Select the correct **Filing Period** from the drop-down box on the initial Seller’s Screen.

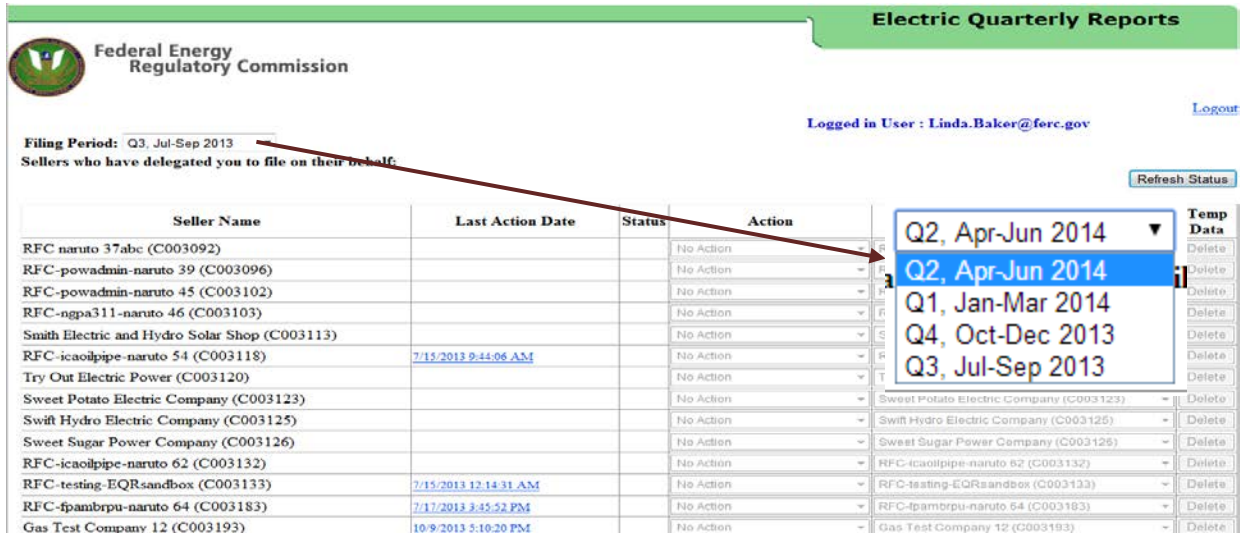

Figure 5 - Initial Seller’s Screen and Fiscal Quarter Drop Down

IMPORTANT: The filing period selected from the drop-down menu must correspond to the filing quarter indicated in the Identification CSV file or the system will not accept the filing.

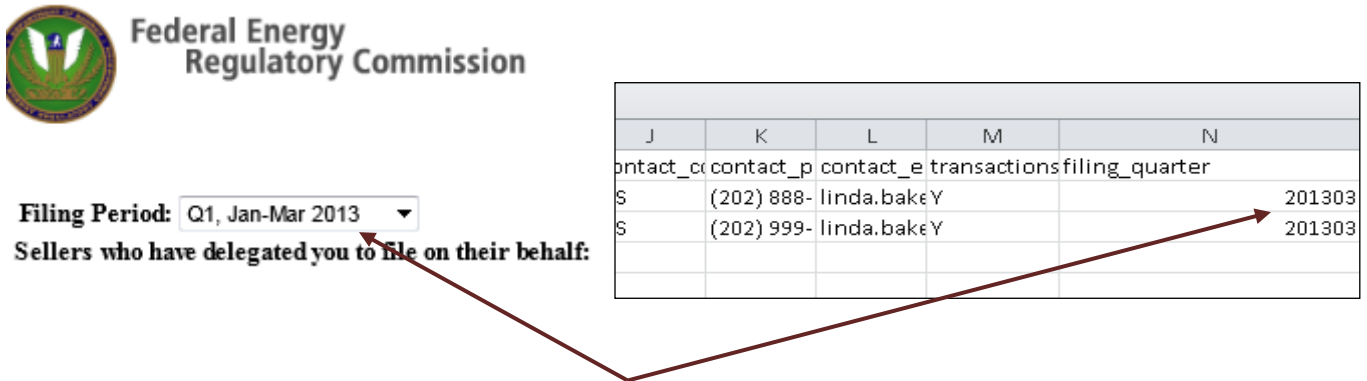

Figure 6 – Filing Period Must Match Filing Quarter Column in CSV File

2. Select **CSV New** from the Action drop-down list.

Figure 7 – Action List

3. Click **Browse** to locate the CSV File to upload in the EQR system.

Figure 8 – File Selection

4. Click **Upload** to upload the CSV Zip file in the EQR System.

If you entered data using CSV new and received a large CSV file notification, please skip to EQR Filing Steps: Uploading Large CSV Files on the next page.

IMPORTANT:

Loading the data, is not the same as filing. Users must proceed to step 5 (“click enabled Seller name, Figure 10 Figure 10 – Zip File loaded and Seller Name enabled) and click on “**submit**” (Figure 11 Figure 11 – Submit Button) to complete an EQR filing.

NOTE: If the uploaded data contain errors, the screen will display error information in one of two ways shown in Figure 9 below. The errors listed in the screen must be corrected before the data can be successfully uploaded. For a list of error messages, please see Appendix B of this guide.

- The file you tried to upload is not recognized as a '.zip' file

Figure 11 – Submit Button

NOTE: Before hitting submit, users are encouraged to proceed to instructions in III. Data Review and Verification in the Web Interface beginning on page 34.

EQR Filing Steps: Uploading Large CSV Files

CSV files over a certain size will prompt notification that the file is too large to be submitted for pre-validation and provide an option to submit the file for Test Only or Direct CSV Submission. This accommodates the system’s process queue management. At any given time, the system may adjust one or more size thresholds in order to optimize queue management. Upon receiving the notification, users can select the option to submit the file for **Test Only** or for **Direct CSV Submission**.

NOTE: The Test Only process does not write to the database so we encourage use of the Test Only process to improve submission response time and queue management. Once testing is completed, users may submit tested files in Direct CSV Submission to complete filing requirements.

1. Select the correct Filing Period from the drop-down box on the initial Seller’s Screen.

EQR Filing Steps: “Prefill from Prior Filing Period” Action

This action retrieves existing Seller’s identification and contract information from the prior quarter’s filing, and displays the data on the screen. The user can then update the data and reuse it for the current filing period.

1. Select the current **Filing Period** from the Filing Period drop-down menu.

NOTE: The Filing Period selection is critical to this action. Users who select “prefill” must be able to retrieve data already stored in the system from a preceding quarter. Prefill works in the current quarter only if there is a **Last Action Date** message displayed for the seller reflecting that there is an earlier quarter’s data.

V. EQR Test Only Option

The Test Only Validation feature allows users to run a file through FERC's data validation screens before submitting data files to FERC for filing and processing. The advantage of using the test-only option is that testing the data first speeds up eventual processing time. It also allows users to receive error messages more quickly.

Users can send data to test it via Manual Entry, CSV upload, or XML upload into the Working Data system. After receiving error messages in the test-only environment, users can edit data in manual edit before submitting the files to be processed.

Once data is available in the Data System, the user can use the "CSV download" button to download the files.

Accessing the Test Only Option

1. Click the **ID Data Tab** or any available tab to view the Test Only Option Triangle as shown in the screen below.

The screenshot shows the 'Filer Contact Details' form for 'Order 768 Power LLC'. At the bottom right, there is a checkbox labeled 'Test Only Option' and a blue triangle icon. A red box highlights this area, and a red arrow points from the caption below to it.

Sending Data for Test Only Validation

The "Submit for Test" button allows the user to submit the data for validation in the test only environment before sending the data to FERC for filing.

Load the CSV File according to the steps listed in this guide.

1. Click the **Submit for Test** button.

The screenshot shows a web form for 'Filer Contact Details'. The form includes fields for Display Name, Email, Name Prefix, First Name, Middle Initial, Last Name, Name Suffix, Title, Street Address, City, State, Zip Code, Country, and Phone. A red box highlights the 'Submit For Test' button at the bottom right of the form. A red arrow points to this button from the right side of the image. Below the form, there are navigation buttons: '<< Back to Select Filing Period page', 'Submit For Test', and 'Download CSV'. A 'Test Only Option' checkbox is also visible at the bottom right.

The **Delete** button is enabled depending on the status of the test filing, described in scenarios 1 – 3 in Figure 89, below.

IMPORTANT: This button can only delete test data using the Test Only Features. If the user has submitted the report as a final filing, the delete button will NOT be enabled. The user must refile using the steps described in this guide.

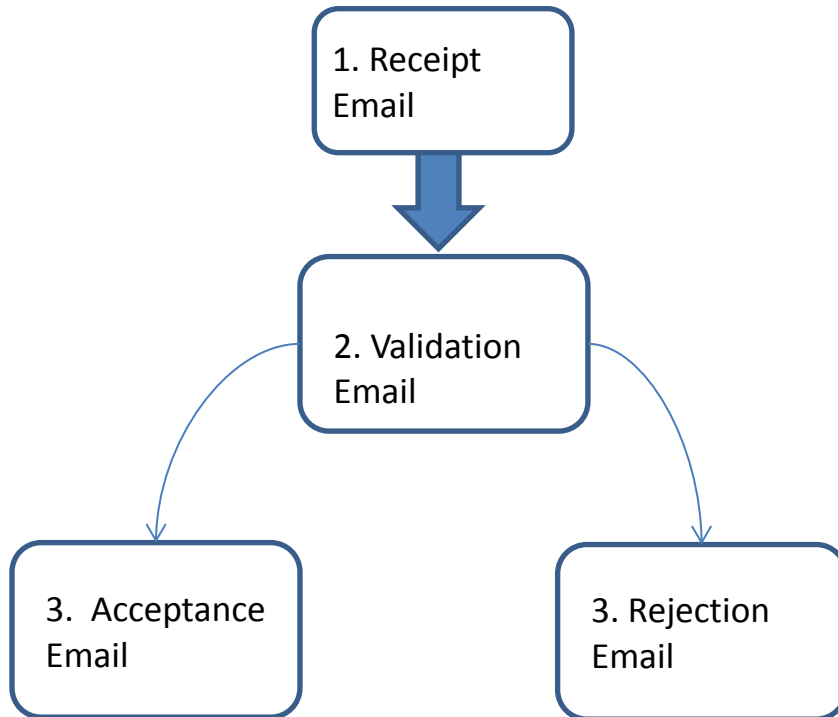

Scenario	Does Working Data Exist?	Does filing exist in EQR database (DB) for same filing period?	Is Delete Button Enabled?	Populate User Interface (UI) from:
1	Yes	No	Yes	Working Data
2	Yes	Yes	Yes	Working Data
3	No	Yes	No	EQR DB

VI. Notifications

There are different emails notifications based on the status of the EQR filing. It is important that the user review the emails for instructions or errors that may require data correction in order for the report to be successfully filed with FERC.

The following diagram displays the three possible email types and the order in which users will receive them. If the filing submitted is for test only, that will be indicated in the email.

FERC Receipt of EQR data

After EQR data is sent to FERC, an automatic email is sent to the user who clicked the “**Submit**” button. Receipt of EQR data by FERC does not mean the EQR file has been accepted as valid by FERC. Figure 90 shows an example of a receipt email.

Figure 90 – Typical Receipt Confirmation

If a large CSV file is sent to FERC, an automatic email is sent to the user. Figure 91 shows an example of a large CSV file receipt email.

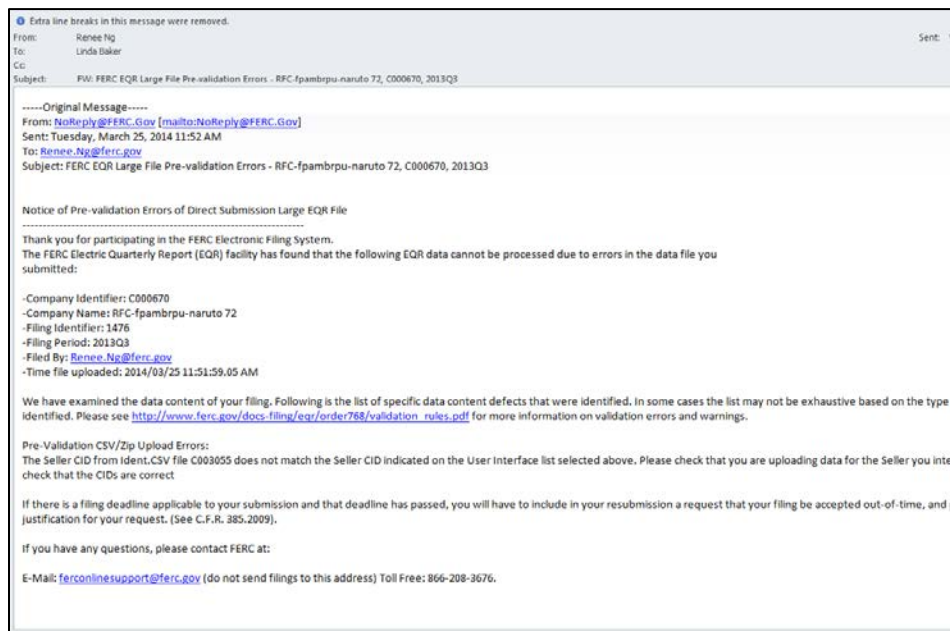

Figure 91 – Large CSV Pre-Validation email

FERC Validation Processing

Once data is sent to FERC, an automatic email is sent to the user when the data enters validation. It does not mean that the EQR has been accepted by FERC. If the data is sent for **Test Only** Validation, the email message will differ slightly.

The email will indicate any initial errors or warnings associated with the file. However, an additional email will signal final results. If the file is rejected, a separate rejection email is sent to the user. The file is not considered accepted until a separate acceptance email is sent.

Notice of EQR Validation Rejection

Thank you for participating in the FERC Electronic Filing System. The FERC Electric Quarterly Report (EQR) facility has found that the following EQR data cannot be processed due to errors in validation:

- Submission ID: {1}
- Company Identifier: <CID>
- Company Name: <Seller Company Name>
- Filing Identifier: 2
- Filing Period: <Filing Period>
- Filed By: {2}
- Time file received: {3}
- Time file began processing: {19}
- Time file ended processing: {8}

We have examined the data content of your filing. Following is the list of specific data content defects that were identified. In some cases the list may not be exhaustive based on the type of defect identified. Please see http://www.ferc.gov/docs-filing/eqr/order768/validation_rules.pdf for more information on Validation errors and warnings.

---Error List--- Severe defects that result in rejection of the filing.

IMPORTANT: If there are no errors and the acceptance email is not received, please contact FERC Online Support at ferconlinesupport@ferc.gov (Telephone: 202-502-6652; Toll-free: 1-866-208-3676) to report the issue.

VII. Uploading an XML File

In Order 770, the Commission discussed the many XML parser programs (commonly referred to as XML editors) available free on-line that can help you to check whether your XML file is consistent with the EQR XML Schema. The editors will check for data formatting errors. If your file contains business logic errors, a validation email will notify you. You can find some of the EQR XML editors @ http://en.wikipedia.org/wiki/Comparison_of_XML_editors

FERC has released a web service for the outside users to submit the zipped EQR XML files to FERC. To send the EQR filing in XML format, there are two options.

Option-1: Direct XML Upload

This webpage is used to upload an EQR XML to the FERC. The EQR XML must be zipped. The direct xml upload page is as follows.

<https://eqronline.ferc.gov/FormsSubmissionWCF.aspx>

1. Enter the user's eRegistered email address and password.

Option-2: Web Service

FERC has released a web service for the users to submit EQL files. The WSDL location for the service is as follows, <https://formsubmissionservice.ferc.gov/>.

The service features two interface methods, Hearbeat() and SubmitFile() and submitFileValidateOnly() is https enabled. The client software can use the above link to access the service and generate a proxy class. The example below is written in c#.

XML Data Validation

For XSD validation, FERC is providing two online documents,

http://eqr.ferc.gov/XSD/XMLModelPublic_DataStructure.xsd

http://eqr.ferc.gov/XSD/XMLModelPublic_DataValue.xsd

For validation, reference only http://eqr.ferc.gov/XSD/XMLModelPublic_DataStructure.xsd from code. This file contains an *xs:include* to the second file,

http://eqr.ferc.gov/XSD/XMLModelPublic_DataValue.xsd, so both are automatically included in the validation.

The XML data should be validated before uploading to FERC. Two XML samples are hyperlinked below:

[File=New](#)

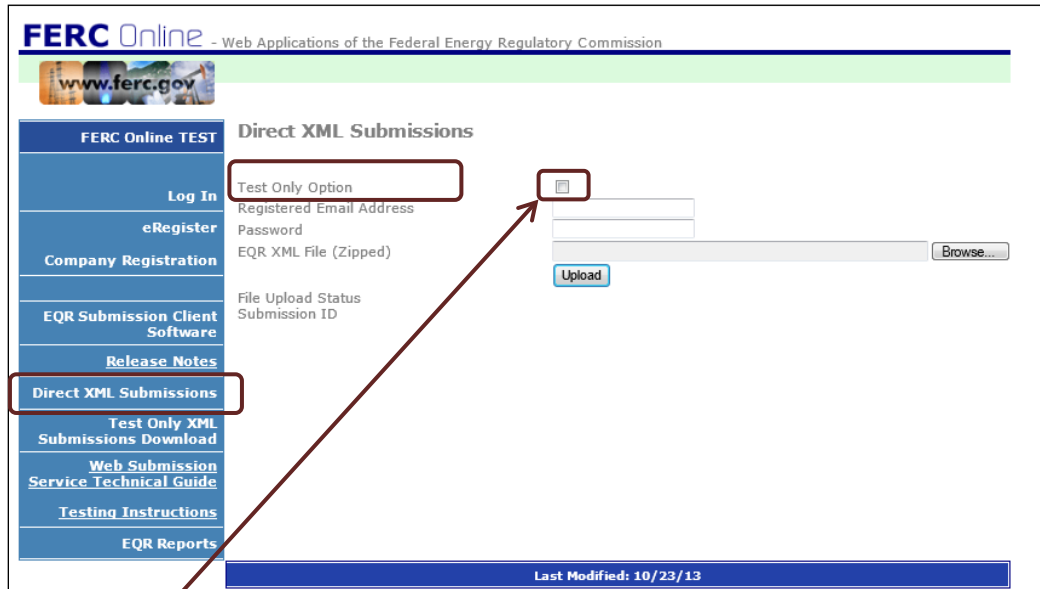

[File=Replace](#)

NOTE: The PORSL and PODSL fields were split into two parts PORSL/PORSLHub, and PODSL/PODSLHub because of business rules that could not be used in XSD without splitting. Specifically, if PODBA=HUB, then PODSL must come from Appendix C, but if PODBA is not HUB, then PODSL can be anything. Likewise, if PORBA=HUB, then PORSL must come from Appendix C, but if PORBA is not HUB, then PORSL can be anything.

In order to accommodate the logic in XSD the fields were split into two. If PODBA=HUB, then set PODSLHub from Appendix C and exclude PODSL from the XML, but if PODBA is not HUB, then set PODSL and exclude PODSLHub from the XML. Likewise if PORBA=HUB, then set PORSLHub from Appendix C and exclude PORSL from the XML, but if PORBA is not HUB then set PORSL and exclude PORSLHub from the XML.

Appendix A – The CSV File

The tabs and information in the following sections will display data contained in the CSV File. The CSV File must be zipped before being uploaded into the EQR System.

The CSV is composed of four individual files. The beginning part of the file name can be different but all four files must end with the following text.

_ident.csv
_contracts.csv
_transactions.csv
_indexpub.csv

The CSV files must be zipped using a MS Windows standard compression tool. The extension name of the uploading file must be **.zip**; for example, the name of the zip file might be **201306_C003118.zip** or **2013_TestEnergyCompany.zip**.

Figure 106 - Example of an Ident file displayed in Excel

Each file contains various fields that contain information on company data, transaction data, contract data, and various types of contact information. For detailed information concerning the fields and information in each file, please refer to the Data Dictionary at the following URL: <http://www.ferc.gov/docs-filing/eqr/order770/data-dictionary.pdf>

IMPORTANT: When opening a CSV file that includes any long date - or - time format number, please use Notepad instead of Excel. Because Excel automatically converts those long numbers into scientific format, users who open CSV files in Excel will need to change them to the general format with no decimals before resaving as a (zipped) CSV file.

Appendix B – Error Messages for CSV Upload and Pre-Validation

NOTE: Message numbers do not indicate any classification or categorization of errors.
