

FERC TECHNICAL CONFERENCE

November 18, 2005

SUMMARY OF COMMENTS OF KEN WILEY

I will be commenting on the following subject matter:

- Discussion on the need for a strong Electric Reliability Organization in order to accomplish the intent of the Energy Policy Act.
- Relationship between the ERO and the Regional Entities, referencing the fact that the Regional Entities are the first line of defense in the preservation of the reliability of the Bulk Power System.
- Compliance and Enforcement programs necessary at the ERO and the Regional Entity levels.
- Relationship between the ERO Reliability Standards and Regional Criteria
- Need for introducing an analysis of reliability risks that a proposed Reliability Standard is attempting to mitigate, and an analysis of the associated costs of implementing the proposed Reliability Standard.
