

FERC Technical Conference – Communications

February 13, 2013

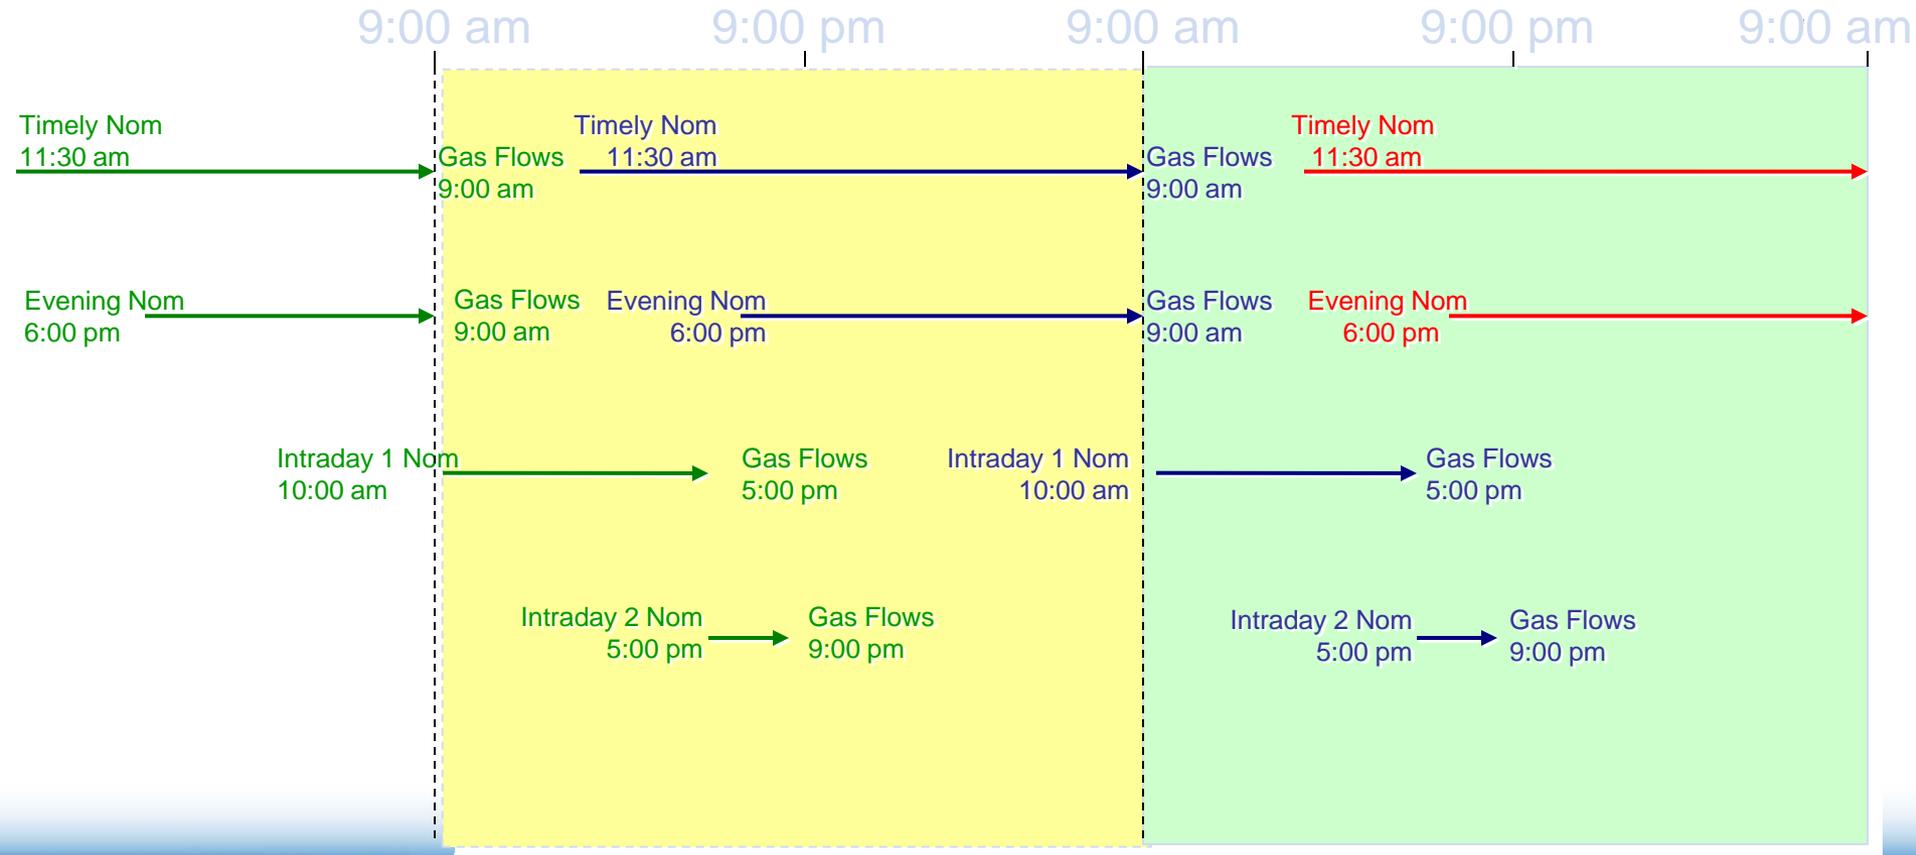

Richard J. Kruse, Vice President, Regulatory

Overlapping Communications for Multiple Days

Gas Day 1

Gas Day 2

Gas Day 3

Four Channels of Communication

- Transactional information with shippers
- Transactional sharing with point operators
- Informational Postings for the general public
- Outreach to regulators and other public stakeholders

Spectra Energy Informational Postings

- Variety of postings that are available to the general public:
 - Critical notices
 - Planned service outages and maintenance
 - Operational Available Capacity (including historical data)
 - Scheduled Quantities for directly connected power plants
 - Non-critical notices that relate to pipeline operations, computer system information, news, and other information
 - Gas quality on all pipelines
 - Pipeline tariffs and regulatory filings
 - A list of Operational Balancing Points

Operational Available Capacity Information

- *Operational Available Capacity (OAC)* information is available for each Spectra Energy Transmission's pipeline system for:
 - Each meter station
 - Each compressor station and capacity restriction location
- Information is published after each scheduling cycle and available to all parties
 - Information is published at the TIMELY cycle and each hour after the TIMELY cycle on Maritimes & Northeast Pipeline, Algonquin Gas Transmission and Texas Eastern

Operational Available Capacity - Meter Capacity
