SUPPLEMENTARY INFORMATION:

Title: FERC-732, Electric Rate Schedules and Tariffs: Long-Term Firm Transmission Rights in Organized Electricity Markets

OMB Control No.: 1902-0245

Type of Request: 18 CFR Part 42 provides the reporting requirements of FERC-732 as they pertain to long-term transmission rights. To implement section 1233¹ of the Energy Policy Act of 2005 (EPAAct 2005)², the Commission requires each transmission organization that is a public utility with one or more organized electricity markets to make available long-term firm transmission rights that satisfy each of the Commission's guidelines.

The FERC-732 regulations require that transmission organizations (that are public utilities with one or more organized electricity markets) choose one of two ways to file:

¹ 16 USC 824 et al.

² Added new section 217 (16 USC 824Q) to the Federal Power Act (FPA)

- File tariff sheets making long-term firm transmission rights available that are consistent with each of the guidelines established by FERC
- File an explanation describing how their existing tariffs already provide long-term firm transmission rights that are consistent with the guidelines.

Additionally, the Commission requires each transmission organization to make its transmission planning and expansion procedures and plans available to the public.

FERC-732 enables the Commission to exercise its wholesale electric rate and electric power transmission oversight and enforcement responsibilities in accordance with the FPA, the Department of Energy Organization Act (DOE Act), and EAct 2005.

Type of Respondents: Public utility with one or more organized electricity markets

*Estimate of Annual Burden*³: The Commission estimates the total Public Reporting Burden for this information collection as:

FERC-732, Electric Rate Schedules and Tariffs: Long-Term Firm Transmission Rights in Organized Electricity Markets					
	Number of Respondents⁴ (A)	Number of Responses Per Respondent (B)	Total Number of Responses (A)x(B)=(C)	Average Burden Hours per Response (D)	Estimated Total Annual Burden (C)x(D)
Public utility with one or more organized electricity markets	1	1	1	1,180	1,180

³ The Commission defines burden as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, reference 5 CFR 1320.3.

⁴ No filings were received during the past twelve months.

The total estimated annual cost burden to respondents would be \$84,960 [1,180 hours * \$72.00/hour⁵ = \$84,960].

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Kimberly D. Bose,
Secretary.

⁵ The cost figure is the 2015 FERC average salary plus benefits (\$149,489/year or \$72/hour). FERC staff estimates that industry costs for salary plus benefits are similar to Commission costs.
