FEDERAL ENERGY REGULATORY COMMISSION

Reactive Supply Compensation in Markets Operated by Regional Transmission Organizations and Independent System Operators Docket No. AD16-17-000

NOTICE OF WORKSHOP

(March 17, 2016)

Federal Energy Regulatory Commission (Commission) staff will convene a workshop on June 30, 2016, from 12:00 p.m. (EDT) to 4:00 p.m. (EDT) in the Commission Meeting Room at 888 First Street, NE, Washington, DC 20426. The workshop will be open to the public, and all interested parties are invited to attend and participate. The workshop will be led by Commission staff, and may be attended by one or more Commissioners.

The purpose of the workshop is to discuss compensation for Reactive Supply and Voltage Control (Reactive Supply) within the Independent System Operators (ISOs) and Regional Transmission Organizations (RTOs). Specifically, the workshop will explore the types of costs incurred by generators for providing Reactive Supply capability and service; whether those costs are being recovered solely as compensation for Reactive Supply or whether recovery is also through compensation for other services; and different methods by which generators receive compensation for Reactive Supply (e.g., Commission-approved revenue requirements, market-wide rates, etc.). The workshop will also explore potential adjustments in compensation based on changes in Reactive Supply capability and potential mechanisms to prevent overcompensation for Reactive Supply.

This workshop will be transcribed. Transcripts of the workshop will be immediately available for a fee from Ace-Federal Reporters, Inc. at (202) 347-3700.
