

## RUSSELL ROBERTSON

Russell Robertson is Senior Manager, Control Systems, Electric System Operations, at the Tennessee Valley Authority.

The Control Systems organization, located in Chattanooga, is responsible for the business and real-time information systems that support transmission operations, balancing authority, reliability coordination, interchange authority among other NERC function areas.

Russell has 27 years experience with TVA. He oversees Electric Systems Operations data architecture and integration of its computer and data systems. He has also served as an Adjunct Professor at both The University of Tennessee at Chattanooga and Chattanooga State Technical Community College.

He holds a Master of Science Degree in Electrical Engineering, with curriculum specialization in power and control systems. He and his wife Kathy have two sons.
