

FEDERAL ENERGY REGULATORY COMMISSION  
WASHINGTON, D.C. 20426

June 29, 2006

In Reply Refer To:

Maritimes & Northeast Pipeline, L.L.C.  
Docket No. CP96-810-006  
Presidential Permit

The Honorable Donald H. Rumsfeld  
Secretary of Defense  
Washington, D.C. 20301

Dear Mr. Secretary:

Pursuant to the provisions of Executive Order Nos. 10485 and 12038 of September 1, 1953, and February 3, 1978, respectively, and the Secretary of Energy's Delegation Order No. 00-004.00, effective December 6, 2001, enclosed herewith for your information and consideration is a copy of an application filed by Maritimes & Northeast Pipeline, L.L.C. (Maritimes) with the Federal Energy Regulatory Commission on May 16, 2006 in Docket No. CP96-810-006, *et al.* to amend its existing Natural Gas Act (NGA) section 3 authorization and Presidential Permit issued on July 31, 1998. These existing authorizations allow Maritimes to operate border facilities between Canada and the United States, near Woodland, Maine, to import natural gas into the United States.

In its May 16, 2006 filing, Maritimes proposes to expand its existing pipeline system to facilitate delivery of regasified liquefied natural gas (LNG) from Canada into Northeastern United States markets. Specifically, in Docket No. CP06-335-000, Maritimes requests certification pursuant to section 7(c) of the NGA to construct additional facilities on its system to enable the transportation of the imported volumes of regasified LNG to existing delivery points in Dracut and Beverly, Massachusetts (Phase IV Project). In Docket No. CP96-810-006, Maritimes seeks additional authorization under section 3 of the NGA and under its Presidential Permit to construct and operate additional border crossing facilities to interconnect at the border with Brunswick Pipeline, a Canadian pipeline, to receive the regasified LNG to be imported with the Phase IV Project.

The proposed Phase IV Project facilities subject to NGA section 3 and the Presidential Permit consist of approximately 250 feet of 30-inch diameter pipeline looping adjacent to Maritimes' existing pipeline. Like the existing pipeline, the proposed

looping would be beneath the river bed of the St. Croix River near Woodland, Maine. Maritimes' new pipeline facilities would interconnect with the Brunswick Pipeline, which is to be constructed, owned, and operated by Emera Brunswick Pipeline Company Ltd., a subsidiary of Emera, Inc. to transport regasified LNG from the planned Canaport LNG import terminal in New Brunswick, Canada to Maritimes at the U.S.-Canada border.

Also enclosed for your consideration is a draft of the amended Presidential Permit to be issued to Maritimes if the Commission approves its application. The amended Presidential Permit incorporates terms and conditions you and the Secretary of State have heretofore required in similar cases. Consistent with current Commission policy, Article 9 of the draft amended permit differs from Article 9 of the existing permit. Article 9 is revised to state that the permittee is required to defer to the Commission's finding and requirement regarding which authorized facilities should be removed and which should remain in place, in the event that they are no longer used.

A similar letter, together with a draft of the amended Presidential Permit and a copy of the application, is being sent to the Secretary of State. If the Secretary of State should make an unfavorable recommendation or propose any material change in the draft of the Permit, the Commission will immediately advise you.

The Commission would appreciate receiving your views regarding issuance of the proposed amended Presidential Permit at an early date. Please do not hesitate to contact me at (202) 502-8400, or Erica Yanoff at (202) 502-8708, if you need any further information.

By direction of the Commission.

Magalie R. Salas,  
Secretary

cc: The Honorable Condoleezza Rice

Application of Maritimes & Northeast Pipeline, .L.L.C.  
Draft of Amended Presidential Permit

**DRAFT**

**AMENDED PERMIT AUTHORIZING MARITIMES AND NORTHEAST PIPELINE, L.L.C. (MARITIMES) TO CONSTRUCT, OPERATE, MAINTAIN, AND CONNECT NATURAL GAS FACILITIES AT THE INTERNATIONAL BOUNDARY BETWEEN THE UNITED STATES AND CANADA**

**FEDERAL ENERGY REGULATORY COMMISSION  
Docket No. CP96-810-006**

Maritimes and Northeast Pipeline, L.L.C. (Maritimes), a limited liability company organized under the laws of the State of Delaware, filed on May 16, 2006, in Docket No. CP96-810-006, an application pursuant to Executive Order Nos. 10485 and 12038 and the Secretary of Energy's Delegation Order No. 00-004.00, requesting that the Commission issue an order under section 3 of the NGA and an amended Presidential Permit authorizing Maritimes to construct and operate additional import facilities at the international boundary between the United States and Canada to accommodate the importation into the United States of increased volumes of natural gas which will be regasified liquefied natural gas (LNG) from Canada.

By letter dated 2006, the Secretary of State, and by letter dated 2006, the Secretary of Defense, favorably recommended that this Permit be granted. The Federal Energy Regulatory Commission finds that the issuance of this Permit, allowing the modifications requested by Maritimes, is appropriate and consistent with the public interest.

Pursuant to the provisions of Executive Order Nos. 10485 and 12038, dated September 3, 1953, and February 3, 1978, respectively, the Secretary of Energy's Delegation Order No. 00-004.00 effective December 6, 2001, and the Commission's regulations, permission is granted to Maritimes (Permittee) to construct, operate, maintain, and connect the natural gas facilities described in Article 2 below, upon the terms and conditions of the Permit.

Article 1. It is expressly agreed by the Permittee that the facilities herein described shall be subject to all provisions and requirements of this Permit. This Permit may be modified or revoked by the President of the United States or the Federal Energy Regulatory Commission and may be amended by the Federal Energy Regulatory Commission, upon proper application therefor.

Article 2. The following facilities are subject to this Permit:

Approximately 250 feet of 30-inch diameter high-pressure pipeline, with a maximum capacity of 452,679 Dth per day, extending from the international

boundary between the United States and Canada beneath the St. Croix River near Woodland, Maine, at a depth not less than five (5) feet beneath the river bed, to an interconnection with Maritimes' Canadian pipeline affiliate, Maritimes & Northeast Pipeline Limited Partnership, and associated valving on the United States side of the river.

Approximately 250 feet of 30-inch diameter pipeline looping adjacent to the above-described pipeline, with a maximum capacity of 418,000 Dth per day, extending from the international boundary between the United States and Canada beneath the St. Croix River near Woodland, Maine, at a depth not less than five (5) feet beneath the river bed, to an interconnection with the Brunswick Pipeline in Canada, owned by Emera Brunswick Pipeline Company Ltd., and associated valving on the United States side of the river.

Article 3. The natural gas facilities authorized herein, or which may subsequently be included herein by modification or amendment, may be utilized for the importation of natural gas between the United States and Canada only in the amount, at the rate, and in the manner authorized under section 3 of the Natural Gas Act.

Article 4. The operation and maintenance of the aforesaid facilities shall be subject to the inspection and approval of representatives of the United States. The Permittee shall allow officers and employees of the United States, showing proper credentials, free and unrestricted access to the land occupied by the facilities in the performance of their official duties.

Article 5. If in the future it should appear to the Secretary of the Army that any facilities or operations permitted hereunder cause unreasonable obstruction to the free navigation of any of the navigable waters of the United States, the Permittee may be required, upon notice from the Secretary of the Army, to remove or alter the same so as to render navigation through such waters free and unobstructed.

Article 6. The Permittee shall be liable for all damages occasioned to the property of others by the operation or maintenance of the facilities, and in no event shall the United States be liable therefor. The Permittee shall do everything reasonable within its power to prevent or suppress fires on or near land occupied under this Permit.

Article 7. The Permittee agrees to file with the Commission, under oath and in such detail as the Commission may require, such statements or reports with respect to the natural gas exported, imported, or the facilities described herein, as the Commission may, from time to time, request. Such information may be made available to any federal, state, or local agency requesting such information.

Article 8. Neither this Permit nor the facilities, nor any part thereof, covered by this Permit shall be voluntarily transferred in any manner, but the Permit shall continue in effect temporarily for a reasonable time in the event of the involuntary transfer of the facilities by operation of law (including transfer to receivers, trustees, or purchasers under foreclosure or judicial sale) pending the making of an application for a permanent Permit and decision thereon, provided notice is promptly given in writing to the Commission accompanied by a statement that the facilities authorized by this Permit remain substantially the same as before the involuntary transfer. The Permittee shall maintain the facilities in a condition of repair for the efficient transportation of natural gas and shall make all necessary renewals and replacement.

Article 9. Upon the termination, revocation, or surrender of this Permit, the Commission shall determine which of the authorized facilities shall be removed and which shall remain in place. The facilities authorized shall be removed within such time as the Commission may specify, and at the Permittee's expense. Upon failure of the Permittee to comply with the Commission's direction to remove any authorized facilities, or any portion thereof, the Commission may direct that possession of the same be taken and the facilities be removed at the Permittee's expense, and the Permittee shall have no claim for damages by reason of such possession or removal.

Article 10. The Permittee agrees that when, in the opinion of the President of the United States, evidenced by a written order addressed to it as holder of this Permit, the safety of the United States demands it, the United States shall have the right to enter upon and take possession of any of the facilities, or parts thereof, maintained or operated under this Permit, and all contracts covering the transportation or sale of natural gas by means of said facilities, to retain possession, management, and control thereof for such length of time as may appear to the President to be necessary to accomplish said purposes, and then to restore possession and control to the Permittee; and in the event that the United States shall exercise such right it shall pay the Permittee just and fair compensation for the use of said facilities upon the basis of a reasonable profit in time of peace, and the cost of restoring said facilities to as good condition as existed at the time of taking over thereof, less the reasonable value of any improvements that may be made thereto by the United States and which are valuable and serviceable to the Permittee.

Article 11. This Permit is subject to any action which the Government of the United States may in the future deem expedient or necessary to take in case any part of the aforesaid facilities comes into the control of any foreign government.

Article 12. The Government of the United States shall be entitled to the same or similar privileges as may by law, regulation, agreement, or otherwise, be granted by the Permittee to any foreign government.

By direction of the Commission.

Secretary.

IN TESTIMONY OF ACCEPTANCE of all the provisions, conditions and requirements of this Permit, the Permittee this day of \_\_, 2006 has caused its name to be signed by \_\_, [pursuant to a resolution of its Board of Directors duly adopted] on the \_\_ day of \_\_, 2006, a certified copy of the record of which is attached hereto.
