FERC STAFF BIOS

David Hanobic

david.hanobic@ferc.gov

202.502.8312

David Hanobic serves as the Outreach Coordinator for the Federal Energy Regulatory Commission's (FERC or Commission) Office of Energy Projects, Division of Gas – Environment and Engineering (DG2E). DG2E is responsible for the environmental review of interstate natural gas certificate applications for the construction and operation of facilities under Section 7(c) of the Natural Gas Act (NGA), and applications for import and export authorization under Section 3 of the NGA, including liquefied natural gas (LNG) import facilities. David advises the natural gas industry; federal, state, and local agencies; and other stakeholders on the Commission's Pre-Filing Process and Outreach initiatives. He has managed National Environmental Policy Act document preparation and monitored environmental compliance on numerous pipeline and LNG projects.

David joined the FERC in 2004 as an environmental biologist. David has a Bachelor of Science Degree in Biology from the Lock Haven University of Pennsylvania.

**Gertrude Fernandez-
Johnson**

gertrude.fernandez.johnson@ferc.gov

202.502.6692

Gertrude Johnson is the Compliance Manager for FERC's Office of Energy Projects, DG2E. Gertrude provides oversight of DG2E's post-certificate compliance program and advises stakeholders regarding laws, regulations, and policy affecting natural gas facility construction and compliance techniques.

Gertrude joined the FERC in 2005 as a Mechanical Engineer, specializing in review of air quality, noise, and pipeline safety. She has managed National Environmental Policy Act document preparation and monitored environmental compliance on numerous pipeline and LNG projects. Prior to her employment at the FERC, Gertrude worked as a manufacturing engineer on non-nuclear pipe fabrication at the Newport News Shipbuilding. Gertrude has a Bachelor of Science degree in Mechanical Engineering from Virginia Commonwealth University in Richmond, Virginia.

Christine Allen

christine.allen@ferc.gov

202.502.6847

Christine Allen is an environmental biologist with FERC's Office of Energy Projects, DG2E. Christine joined FERC in 2008. She has directed NEPA document preparation and monitored environmental compliance on numerous natural gas pipeline and LNG projects. Prior to her employment at FERC, she worked as an environmental consultant providing emergency spill response and managing groundwater remediation projects. Christine has a Bachelor of Science in Marine Biology from the University of North Carolina, Wilmington.

PUTTING THE PIECES TOGETHER

FERC STAFF BIOS

S.Xiah Kragie

sheila.kragie@ferc.gov

202.502.8933

S. Xiah Kragie is an environmental engineer working on issues related to air quality, noise, human health, climate change, and pipeline safety with FERC's Office of Energy Projects, DG2E. She manages the preparation of NEPA documents for gas transportation projects and assists in the design spill hazard review of LNG projects.

Prior to joining FERC in 2014, she consulted in environmental litigation, served as a Peace Corps volunteer in Honduras, and worked at the U.S. Centers for Disease Control on exposure assessments. She has undergraduate degrees in Civil Engineering and Economics from University of Maryland, a master's degree in global environmental health from Emory University, and a master's degree in geochemistry from Columbia University in New York. Xiah's name is pronounced Zay-ah.

PUTTING THE PIECES TOGETHER

COURSE INSTRUCTOR BIOS

Larry Brown

larry.brown@erm.com

401.278.4301

Larry Brown is a Senior Partner at ERM specializing in project management of interstate natural gas pipeline projects and preparation of documents necessary to comply with the NEPA and other federal and state regulations. Larry has over 24 years of experience working on FERC-regulated pipeline projects. This experience includes managing, providing senior review, and/or authoring sections of numerous permit applications and more than 20 Federal Energy Regulatory Commission (FERC) Environmental Impact Statements (EIS) and Environmental Assessments (EAs). Larry has also managed environmental field surveys, environmental compliance programs during construction, and conducted environmental inspection and post-construction monitoring.

Tim Drake

tim.drake@erm.com

612.337.3365

Tim Drake is a Technical Director at ERM specializing in routing, construction, restoration, and environmental inspection issues related to linear projects. Tim has extensive experience working with clients to develop and support environmental inspection and compliance programs. He has worked closely with project engineers, construction supervision teams, and agency regulators to develop and implement project plans and techniques to construct through sensitive resource areas including trout streams, wetlands, and national forests. Tim's responsibilities have also included the preparation of wildlife, surface water quality, and wetland sections of the Environmental Reports for FERC 7(c) applications.

Jennifer Lee

jennifer.lee@erm.com

503.525.5152

Jennifer Lee is a Partner at ERM, specializing in the preparation of FERC 7(c) Environmental Report Applications; third-party EISs; and federal, state, and local permits necessary for the construction and operation of natural gas and petroleum pipelines and LNG facilities. She has extensive experience with the FERC Pre-Filing Process, and has worked on behalf of both applicants and regulators on natural gas-related projects. Jennifer also manages feasibility studies and third-party EISs for other linear energy facilities including electric transmission line projects. She has worked on behalf of numerous state and federal agencies, including the FERC, USFS, BLM, and FWS. Her areas of expertise include land use analysis, alternatives analysis, and document preparation.

Joe Holler

joe.holler@erm.com

612.347.7860

Joe Holler is a Senior Project Scientist with ERM based in Minneapolis, Minnesota, USA. He specializes in linear and station natural gas liquids (NGL), liquefied natural gas (LNG), and crude oil project feasibility; environmental field surveys with an emphasis in coordination, logistics, and management; federal, state, and local permitting and agency consultation; and construction plans and environmental inspection.
