## Developing Small/Low-Impact Hydropower Projects

The Federal Energy Regulatory Commission (FERC) is experiencing increased interest from those seeking to develop small/low-impact hydropower projects. This brochure explains how best to obtain Commission authorization to construct and operate these small/low-impact projects while assuring adequate protection of environmental resources. Benefits of developing these projects include:

- Emission-free renewable source of energy
- Low impacts to environmental resources
- Financial incentives to developers under state Renewable Portfolio Standards

### FERC's Role

Under the Federal Power Act, FERC is charged with the authorization and regulation of the nation's non-federal hydropower resources. FERC issues three types of authorizations:

- **License** – Issued for 30- to 50-year terms. Must be renewed. Gives the licensee the power of "eminent domain" to obtain lands or other rights needed to construct, operate, and maintain the hydroelectric project.

- **5-Megawatt (MW) Exemption** – Issued in perpetuity. Must be located at the site of an existing dam or use a natural water feature. Must propose increased capacity. The exemptee must own all lands and facilities other than federal lands to be eligible.

- **Conduit Exemption** – Issued in perpetuity. Must use the potential of a conduit constructed primarily for non-hydropower purpose. The exemptee must own the proposed powerhouse and the lands upon which the powerhouse will be located. A conduit exemption may not use federal lands.

## General Process for License and Exemption Applications

### Getting started
- Contact FERC staff to get advice on the best way to obtain authorization for your project (1-866-914-2849 or smallhydro@ferc.gov)

### Pre-filing consultation and initial project review
- Gather needed information to identify project-related effects
- Send package describing your proposal and environmental effects to Commission staff, all relevant government and tribal agencies, and non-government and public entities
- Meet with all affected agencies and entities to explain your proposal and to request input
- Determine whether and to what degree affected agencies and entities are willing to expedite the consultation process or forego a consultation stage

### Application processing
- Apply for and obtain a state Water Quality Certification or waiver
- Prepare and file a license or exemption application
- Commission staff requests comments on application from all interested agencies and entities
- Commission staff conducts comprehensive project review, including issuing environmental document (not usually required for conduit exemption)
- Commission acts on application

## How FERC May Expedite the Process

- With resource agency cooperation, waive some pre-filing consultation requirements
- Combine scoping of issues with pre-filing consultation
- Combine public noticing requirements
- Shorten comment periods
- Use a single environmental document in lieu of draft and final documents

## Factors that Reduce Time and Cost

- Project at existing dam
- Little change to water flow and use
- Unlikely to: affect threatened and endangered species; or need fish passage
- Applicant owns all lands needed for project construction and operation
- Information on existing environmental resources and project effects readily available
- A complete application that addresses all issues

### Examples of Successfully Expedited Projects

- **Lower Turnbull Drop Project No. 12597 (5.0 MW), Upper Turnbull Drop Project No. 12598 (4.1 MW), Mill Coulee Drops Project No. 12599 (1.05 MW)** - licenses issued (07/28/06) 8 months from filing
- **Corriveau Project No. 12629 (350 kW)** - exemption issued (10/24/06) 10 months from filing
Guide to Developing Small/Low-Impact Hydropower Projects

Guidance on the Internet

To access guidance on small hydropower development:

- Point your browser to www.ferc.gov

- Using the drop down menu from the fifth navy blue tab, Industries, select Hydropower.

- Scroll to the bottom of the page and click on General Information in the lower right hand corner.

- Click on Licensing.
