

F. Portages

P-1

SIGN:

Portage, Warning....

COMMENT:

Placement inside gate to portage path ensures user exposure. Combination of warning and interpretive signage increases user attention and increases effectiveness.

RECOMMENDATION:

None.

P-2

SIGN:

Portage Welcome to the Recreation River Whitewater Recreation Area...

COMMENT:

Maps on interpretive/warning signage increase effectiveness by identifying danger areas. Positive message encourages viewer compliance.

RECOMMENDATION:

None.

P-3

SIGN:

Portage Area Here

COMMENT:

Very large font increases effective distance of directional signage. Good to use in wide reservoirs and rivers.

RECOMMENDATION:

None.

P-4

SIGN:

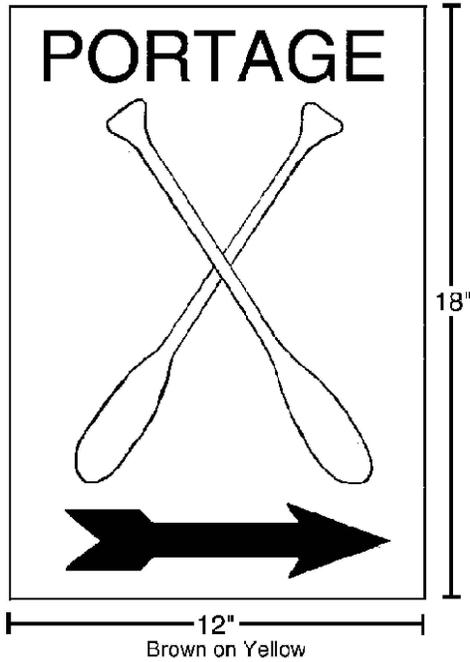

Danger Dam Ahead
Portage Right

COMMENT:

Good use of standard danger heading/color scheme. Placement and font are suitable for the wide river area.

RECOMMENDATION:

None.

P-5

SIGN:

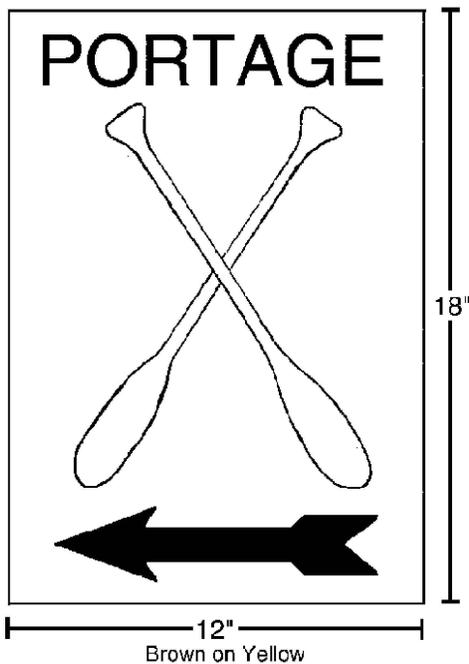

Portage (Arrow to Right)

COMMENT:

This portage graphic is included in the Hydro Users Group (HUG) recommendations on safety signage. Participating dam owners use this and the following two graphics to indicate portage trails/ areas. Standardization increases public recognition.

RECOMMENDATION:

None.

P-6

SIGN:

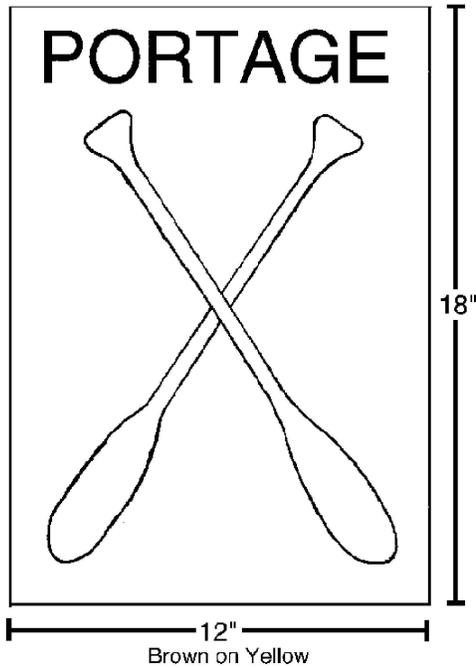

Portage (Arrow to Left)

COMMENT:

This portage graphic is included in the Hydro Users Group (HUG) recommendations on safety signage. Participating dam owners use this graphic to indicate portage areas. Standardization increases public recognition.

RECOMMENDATION:

None.
