

WL-11

SIGN:

Danger Due To
Sudden Water
Fluctuation Do Not
Enter This Area

COMMENT:

Good use of signage
placement to guide
public behavior at a
recreation site. Keeps
site looking natural.

RECOMMENDATION:

Coloration does not
indicate level of
possible risk, though it
does blend in with sur-
roundings. Assess risk
and need for alternate
color scheme.

WL-12

SIGN:

Warning Hazardous
Area Water Level Flow
May Change Rapidly
Siren Strobe Indicates
Increased River Flow

COMMENT:

Very clear sign.
Reverse font colors in
trigger word, additional
safety measures in
place and placement of
sign increase
effectiveness.

RECOMMENDATION:

None.
