## CHECKLIST FOR APPLICATIONS FOR PRELIMINARY PERMITS (Filed under 18 C.F.R. §§ 4.32, 4.36 & 4.81)

REQUIREMENT	ADEQUACY (A = adequate D = deficient)	COMMENTS
<u>Section 4.32</u>		
I. Applicant must <u>identify</u> : [(a)(1)]		
Every person, citizen, association of citizens, domestic corporation, municipality or state who has or intends to obtain and maintain proprietary right to the site.		
<ul> <li>II. Applicant must provide <u>names and mailing addresses</u> of entities affected by or whose lands or facilities would be used by the project, including: [(a)(2)]</li> <li>A. Counties in which the project is located.</li> </ul>		
B. Cities, towns, or similar subdivisions of 5,000 or more people within a 15-mile radius of the project dam and cities, towns, or similar subdivisions in which any part of the project, and any federal facilities that would be used by the project, would be located.		
C. Irrigation districts, drainage districts, or similar political subdivisions including federal facilities that would be used or located within the project area.		
D. Every other political subdivision in the project area that would likely be interested in or affected by the application.		
E. All Indian tribes that may be affected by the project.		
III. Applicant must subscribe and verify under oath that the information in the application is truthful. It must be notarized and in the form required by this section. [(a)(4)(i)-(ii)].		
In the alternative, the applicant may provide a statement in substantially the following form: "I declare (or certify, verify, or state) under penalty of perjury that the (following information, information contained herein, etc.) is true and correct. Executed on (date). (Signature)" [see 385.2005(b)(3) and 28 U.S.C. 1746].		
Section 4.36		
IV. If <u>competing application</u> , applicant must provide: [4.36(d)(ii)]		
A. Proof of service on applicant who filed initial application.		
Section 4.81		
V. <u>Initial statement</u> must include: [4.81(a)]		
A. Location of the project, including state, county, nearby town, and body of water.		
B. Applicant name, business address, and telephone number.		
C. Agent name, address, and telephone number.		
D. If the project would be located at an existing dam or other facility, provide the name and address of the dam or facility owner. If federally owned, provide the name of the agency.		
VI. If claiming <u>municipal preference</u> , applicant must:		

A.       Be competent under state law to engage in the power business.         B.       Submit evidence of municipal status with:         1.       Copies of applicable stat/local laws or a municipal charter; or         2.       Other appropriate legal authority.         VII.       Exhibit 1 must include, to the extent possible; [4.81(b)]         A.       Project Features         1.       For each dam and spil/way:         a.       General configuration (type)         b.       Composition         c.       Height         d.       Length         e.       If existing dam, age and condition.         2.       For each genstock:         a.       Length         b.       Diameter         c.       Composition and dimensions         b.       If existing penstock, age and condition.         3.       For each perstock:         a.       Length         b.       Diameter         c.       Composition and dimensions         b.       If existing powerhouse, age and condition.         4.       Description of each tairace or other project structures, existing or proposed.         B.       Reservoits, existing or proposed.         1.       Surface area	REQUIREMENT	ADEQUACY (A = adequate D = deficient)	COMMENTS
B. Submit evidence of numicipal status with:         1. Copies of applicable state/local laws or a minicipal charter; or         2. Other appropriate legal authority.         VII. Exhibit 1 must include, to the extent possible; [4.81(b)]         A. Project Features         1. For each dam and spillway:         a. General configuration (type)         b. Composition         c. Height         d. Length         e. If existing dam, age and condition.         2. For each gam and condition.         2. For each perstock:         a. Length         b. Diameter         c. Composition         d. If existing perstock, age and condition.         3. For each perstock:         a. Length         b. Diameter         c. Composition and dimensions         b. If existing prestock, age and condition.         3. For each powerhouse; age and condition.         4. Description of cach tailneac or other project structures, existing or proposed.         B. Reservoirs, existing or proposed         1. Surface area         2. Storage capacity         3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections<			
automic characterized and condition.           VII. Exhibit 21 must include, to the extent possible: [4.81(b)]           A. Project Features           1. For each dam and spillway:           a. General configuration (type)           b. Composition           c. Height           d. Length           e. If existing dam, age and condition.           2. For each penstock:           a. Length           b. Diameter           c. Composition           d. Length           b. Diameter           c. Composition           d. If existing penstock; age and condition.           3. For each powerhouse:           a. Composition and dimensions           b. If existing penstock, age and condition.           3. For each powerhouse;           a. Composition and dimensions           b. If existing powerhouse, age and condition.           4. Description of each taiTrace or other project structures, existing or proposed.           B. Reservoirs, existing or proposed.           I. Surface area           2. Storage capacity           3. Normal maximum surface elevation           C. Transmission Lines, existing or proposed           1. Number and length           2. Voltage capacity           3. Interconnections			
VII. Exhibit 1 must include, to the extent possible: [4.81(b)]         A. Project Features         I. For each dam and spillway:         a. General configuration (type)         b. Composition         c. Height         d. Length         e. If existing dam, age and condition.         2. For each penstock:         a. Length         b. Diameter         c. Composition         d. H existing penstock:         a. Length         b. Diameter         c. Composition         d. H existing penstock, age and condition.         3. For each powerhouse:         a. Composition and dimensions         b. If existing powerhouse; age and condition.         4. Description of each tailrace or other project structures, existing or proposed.         1. Surface area         2. Storage capacity         3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing or proposed         1. Surface area         2. Voltage capacity         3. Interconnections         4. If existing or proposed         1. Number and length      <	municipal charter; or		
A. Project Features			
1. For each dam and spillway:         a. General configuration (type)         b. Composition         c. Height         d. Length         e. If existing dam, age and condition.         2. For each penstock:         a. Length         b. Diameter         c. Composition         d. If existing penstock, age and condition.         3. For each powerhouse:         a. Composition and dimensions         b. If existing powerhouse, age and condition.         4. Description of each tallrace or other project structures, existing or proposed.         B. Reservoirs, existing or proposed         1. Surface area         2. Storage capacity         3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing or proposed         1. Surface area         2. Total installed capacity         3. Interconnections	VII. <u>Exhibit 1</u> must include, to the extent possible: [4.81(b)]		
a.       General configuration (type)         b.       Composition         c.       Height         d.       Length         e.       If existing dam, age and condition.         2.       For each penstock:         a.       Length         b.       Diameter         c.       Composition         d.       If existing penstock, age and condition.         3.       For each powerhouse:         a.       Composition and dimensions         b.       If existing powerhouse, age and condition.         3.       For each powerhouse:         a.       Composition and dimensions         b.       If existing or proposed.         g.       Storage capacity         d.       Storage capacity         3.       Normal maximum surface elevation         C.       Transmission Lines, existing or proposed         1.       Number and length         2.       Voltage capacity         3.       Interconnections         4.       If existing, age and condition.         2.       Voltage capacity         3.       Interconnections         4.       If existing, age and condition.         D.			
b. Composition         c. Height         d. Length         e. If existing dam, age and condition.         2. For each penstock:         a. Length         b. Diameter         c. Composition         d. I f existing penstock, age and condition.         3. For each powerhouse:         a. Composition and dimensions         b. If existing powerhouse, age and condition.         4. If existing opwerhouse, age and condition.         5. If existing or proposed.         B. Reservoirs, existing or proposed.         I. Surface area         2. Storage capacity         3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         I. Number and length         2. Voltage capacity         3. Interconnections         4. If existing, age and condition.         D. Generation Data, existing or proposed         I. Estimated average annual energy output         2. Total installed capacity         3. Number of turbines and generators	1. For each dam and spillway:		
c. Height	a. General configuration (type)		
d. Length	b. Composition		
e.       If existing dam, age and condition.         2.       For each penstock:         a.       Length         b.       Diameter         c.       Composition         d.       If existing penstock, age and condition.         3.       For each powerhouse:         a.       Composition and dimensions         b.       If existing powerhouse, age and condition.         4.       Description of each tailrace or other project structures, existing or proposed.         B.       Reservoirs, existing or proposed         1.       Surface area         2.       Storage capacity         3.       Normal maximum surface elevation         C.       Transmission Lines, existing or proposed         1.       Number and length         2.       Voltage capacity         3.       Interconnections         4.       If existing, age and condition.         D.       Generation Data, existing or proposed         1.       Estimated average annual energy output         2.       Total installed capacity         3.       Number of turbines and generators	c. Height		
2. For each penstock:	d. Length		
a. Length	e. If existing dam, age and condition.		
b. Diameter         c. Composition         d. If existing penstock, age and condition.         3. For each powerhouse:         a. Composition and dimensions         b. If existing powerhouse, age and condition.         4. Description of each tailrace or other project structures, existing or proposed.         B. Reservoirs, existing or proposed         1. Surface area         2. Storage capacity         3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing, age and condition.         D. Generation Data, existing or proposed         1. Estimated average annual energy output         2. Total installed capacity	2. For each penstock:		
c. Composition         d. If existing penstock, age and condition.         3. For each powerhouse:         a. Composition and dimensions         b. If existing powerhouse, age and condition.         4. Description of each tailrace or other project structures, existing or proposed.         B. Reservoirs, existing or proposed         1. Surface area         2. Storage capacity         3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing, age and condition.         D. Generation Data, existing or proposed         1. Estimated average annual energy output         2. Total installed capacity         3. Number of turbines and generators	a. Length		
d.       If existing penstock, age and condition.         3.       For each powerhouse:         a.       Composition and dimensions         b.       If existing powerhouse, age and condition.         4.       Description of each tailrace or other project structures, existing or proposed.         B.       Reservoirs, existing or proposed         1.       Surface area         2.       Storage capacity         3.       Normal maximum surface elevation         C.       Transmission Lines, existing or proposed         1.       Number and length         2.       Voltage capacity         3.       Interconnections         4.       If existing, age and condition.         D.       Generation Data, existing or proposed         1.       Estimated average annual energy output         2.       Total installed capacity         3.       Number of turbines and generators	b. Diameter		
3. For each powerhouse:	c. Composition		
a. Composition and dimensions         b. If existing powerhouse, age and condition.         4. Description of each tailrace or other project structures, existing or proposed.         B. Reservoirs, existing or proposed         1. Surface area         2. Storage capacity         3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing, age and condition.         D. Generation Data, existing or proposed         1. Estimated average annual energy output         2. Total installed capacity         3. Number of turbines and generators	d. If existing penstock, age and condition.		
b. If existing powerhouse, age and condition.         4. Description of each tailrace or other project structures, existing or proposed.         B. Reservoirs, existing or proposed         1. Surface area         2. Storage capacity         3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing, age and condition.         D. Generation Data, existing or proposed         1. Estimated average annual energy output         2. Total installed capacity         3. Number of turbines and generators	3. For each powerhouse:		
4. Description of each tailrace or other project structures, existing or proposed.         B. Reservoirs, existing or proposed         1. Surface area         2. Storage capacity         3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing, age and condition.         D. Generation Data, existing or proposed         1. Estimated average annual energy output         2. Total installed capacity         3. Number of turbines and generators	a. Composition and dimensions		
structures, existing or proposed.         B. Reservoirs, existing or proposed         1. Surface area         2. Storage capacity         3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing, age and condition.         D. Generation Data, existing or proposed         1. Estimated average annual energy output         2. Total installed capacity         3. Number of turbines and generators	b. If existing powerhouse, age and condition.		
1.       Surface area         2.       Storage capacity         3.       Normal maximum surface elevation         C.       Transmission Lines, existing or proposed         1.       Number and length         2.       Voltage capacity         3.       Interconnections         4.       If existing, age and condition.         D.       Generation Data, existing or proposed         1.       Estimated average annual energy output         2.       Total installed capacity         3.       Number of turbines and generators			
2. Storage capacity	B. Reservoirs, existing or proposed		
3. Normal maximum surface elevation         C. Transmission Lines, existing or proposed         1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing, age and condition.         D. Generation Data, existing or proposed         1. Estimated average annual energy output         2. Total installed capacity         3. Number of turbines and generators	1. Surface area		
C. Transmission Lines, existing or proposed	2. Storage capacity		
1. Number and length         2. Voltage capacity         3. Interconnections         4. If existing, age and condition.         D. Generation Data, existing or proposed         1. Estimated average annual energy output         2. Total installed capacity         3. Number of turbines and generators	3. Normal maximum surface elevation		
2. Voltage capacity       2.         3. Interconnections       2.         4. If existing, age and condition.       2.         D. Generation Data, existing or proposed       2.         1. Estimated average annual energy output       2.         2. Total installed capacity       3.         3. Number of turbines and generators       2.	C. Transmission Lines, existing or proposed		
3. Interconnections	1. Number and length		
4. If existing, age and condition.         D. Generation Data, existing or proposed         1. Estimated average annual energy output         2. Total installed capacity         3. Number of turbines and generators	2. Voltage capacity		
D. Generation Data, existing or proposed       1. Estimated average annual energy output       2. Total installed capacity       3. Number of turbines and generators	3. Interconnections		
1. Estimated average annual energy output         2. Total installed capacity         3. Number of turbines and generators	4. If existing, age and condition.		
2. Total installed capacity       3. Number of turbines and generators	D. Generation Data, existing or proposed		
3. Number of turbines and generators	1. Estimated average annual energy output		
	2. Total installed capacity		
	3. Number of turbines and generators		
4. Turbine rating for each unit	4. Turbine rating for each unit		
5. Generator rating for each unit	5. Generator rating for each unit	-	

REQUIREMENT	ADEQUACY (A = adequate D = deficient)	COMMENTS
6. Hydraulic head	, , , , , , , , , , , , , , , , , , ,	
7. If existing, age and condition of turbines or generators.		
E. List of federal lands within the project boundary, including identification of lands of the U.S. on a completed land description form (FERC Form 587).		
F. Any other information demonstrating the manner in		
which the proposed project would develop, conserve, and utilize in the public interest the water resources of the region.		
VIII.     Exhibit 2 must include:     [4.81(c)]		
A. Study Plan		
-		
feasibility of the proposed project.		
<ol> <li>Description and location of new roads to be built for conducting the studies.</li> </ol>		
B. Study Costs		
1. Estimated cost of studies.		
2. Sources and extent of financing available for studies.		
IX. <u>Exhibit 3</u> must include: [4.81(d)]		
<ul> <li>Map(s) showing the location of the project as a whole, including:</li> </ul>		
1. Streams or other bodies of water		
2. Nearby towns		
3. Permanent monuments		
<ul> <li>B. Map(s) showing the relative locations and physical interrelationships of project features identified in Exhibit 1</li> </ul>		
C. Map(s) showing the proposed project boundary, enclosing:		
<ol> <li>All project features identified in Exhibit 1; if the project is located at an existing federal dam, the federal dam and impoundment must be shown, but may not be included within the project boundary.</li> </ol>
