Central Florida Pipeline LLC is an obligor on an aggregate principal amount of $40 million of senior notes originally issued to a syndicate of eight insurance companies. The senior notes have a fixed annual interest rate of 7.84% with repayments in annual installments of $5 million beginning July 23, 2001. The final payment is due July 23, 2008. Interest is payable semiannually on January 1 and July 23 of each year. In both July 2007 and July 2006, we made an annual repayment of $5.0 million and as of December 31, 2007, Central Florida's outstanding balance under the senior notes was $5.0 million.

Arrow Terminals L.P.

Arrow Terminals L.P. is an obligor on a $5.3 million principal amount of Adjustable Rate Industrial Development Revenue Bonds issued by the Illinois Development Finance Authority. The bonds have a maturity date of January 1, 2010, and interest on these bonds is paid and computed quarterly at the Bond Market Association Municipal Swap Index. The bonds are collateralized by a first mortgage on assets of Arrow's Chicago operations and a third mortgage on assets of Arrow's Pennsylvania operations. As of December 31, 2007, the interest rate was 3.595%. The bonds are also backed by a $5.4 million letter of credit issued by JP Morgan Chase that backs-up the $5.3 million principal amount of the bonds and $0.1 million of interest on the bonds for up to 45 days computed at 12% per annum on the principal amount thereof.

Kinder Morgan Texas Pipeline, L.P. Debt

Kinder Morgan Texas Pipeline, L.P. is the obligor on a series of unsecured senior notes with a fixed annual stated interest rate as of August 1, 2005, of 8.85%. The assumed principal amount, along with interest, is due in monthly installments of approximately $0.7 million. The final payment is due January 2, 2014. As of December 31, 2007, KMTP's outstanding balance under the senior notes was $43.2 million.

Additionally, the unsecured senior notes may be prepaid at any time in amounts of at least $1.0 million and at a price equal to the higher of par value or the present value of the remaining scheduled payments of principal and interest on the portion being prepaid.

Kinder Morgan Liquids Terminals LLC Debt

Kinder Morgan Liquids Terminals LLC is the obligor on $25.0 million of Economic Development Revenue Refunding Bonds issued by the New Jersey Economic Development Authority. These bonds have a maturity date of January 15, 2018. Interest on these bonds is computed on the basis of a year of 365 or 366 days, as applicable, for the actual number of days elapsed during Commercial Paper, Daily or Weekly Rate Periods and on the basis of a 360-day year consisting of twelve 30-day months during a Term Rate Period. As of December 31, 2007, the interest rate was 3.57%. We have an outstanding letter of credit issued by Citibank in the amount of $25.3 million that backs-up the $25.0 million principal amount of the bonds and $0.3 million of interest on the bonds for up to 42 days computed at 12% on a per annum basis on the principal thereof.

Kinder Morgan Operating L.P. "B" Debt

This $23.7 million principal amount of tax-exempt bonds due April 1, 2024 was issued by the Jackson-Union Counties Regional Port District. These bonds bear interest at a weekly floating market rate. As of December 31, 2007, the interest rate on these bonds was 3.33%. Also, as of December 31, 2007, we had an outstanding letter of credit issued by Wachovia in the amount of $24.1 million that backs-up the $23.7 million principal amount of the bonds and $0.4 million of interest on the bonds for up to 55 days computed at 12% per annum on the principal amount thereof.

International Marine Terminals Debt

We own a 66 2/3% interest in International Marine Terminals partnership. The principal assets owned by IMT are dock and wharf facilities financed by the Plaquemines Port, Harbor and Terminal District (Louisiana) $40.0 million Adjustable Rate Annual Tender Port Facilities Revenue Refunding Bonds (International Marine Terminals Project) Series 1984A and 1984B. As of December 31, 2007, the interest rate on these bonds was 3.65%.

On March 15, 2005, these bonds were refunded and the maturity date was extended from March 15, 2006 to March 15, 2025. No other changes were made under the bond provisions. The bonds are backed by two letters of credit issued by KBC Bank N.V. On March 19, 2002, an Amended and Restated Letter of Credit Reimbursement Agreement relating to the letters of credit in the amount of $45.5 million was entered into by IMT and KBC Bank. In connection with that agreement, we agreed to guarantee the obligations of IMT in proportion to our ownership interest. Our obligation is approximately $30.3 million for principal, plus interest and other fees.

Kinder Morgan Operating L.P. "A" Debt

Effective January 1, 2007, we acquired the remaining approximate 50.2% interest in the Cochin pipeline system that we did not already own (see Note 3). As part of our purchase price, two of our subsidiaries issued a long-term note payable to the seller having a fair value of $42.3 million. We valued the debt equal to the present value of amounts to be paid, determined using an annual interest rate of 5.40%. The principal amount of the note, along with interest, is due in five annual installments of $10.0 million beginning March 31, 2008. The final payment is due March 31, 2012. Our subsidiaries Kinder Morgan Operating L.P. "A" and Kinder Morgan Canada Company are the obligors on the note, and as of December 31, 2007, the outstanding balance under the note was $44.6 million.

Maturities of Debt

The scheduled maturities of our outstanding debt, excluding value of interest rate swaps, as of December 31, 2007, are summarized as follows (in millions):

Year	Commitment
2008	$ 610.2
2009	265.8
2010	270.7
2011	715.1
2012	964.3
Thereafter	4,240.0
Total	$ 7,066.1

Contingent Debt

As prescribed by the provisions of Financial Accounting Standards Board Interpretation (FIN) No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others," we disclose certain types of guarantees or indemnifications we have made. These disclosures cover certain types of guarantees included within debt agreements, even if the likelihood of requiring our performance under such guarantee is remote. The following is a description of our contingent debt agreements as of December 31, 2007.

Cortez Pipeline Company Debt

Pursuant to a certain Throughput and Deficiency Agreement, the partners of Cortez Pipeline Company (Kinder Morgan CO_2 Company, L.P. – 50% partner; a subsidiary of Exxon Mobil Corporation – 37% partner; and Cortez Vickers Pipeline Company – 13% partner) are required, on a several, proportional percentage ownership basis, to contribute capital to Cortez Pipeline Company in the event of a cash deficiency. Furthermore, due to our indirect ownership of Cortez Pipeline Company through Kinder Morgan CO_2 Company, L.P., we severally guarantee 50% of the debt of Cortez Capital Corporation, a wholly-owned subsidiary of Cortez Pipeline Company.

As of December 31, 2007, the debt facilities of Cortez Capital Corporation consisted of (i) $64.3 million of Series D notes due May 15, 2013; (ii) a $125 million short-term commercial paper program; and (iii) a $125 million five-year committed revolving credit facility due December 22, 2009 (to support the above-mentioned $125 million commercial paper program). As of December 31, 2007, Cortez Capital Corporation had $93.0 million of commercial paper outstanding with an average interest rate of approximately 5.66%, the average interest rate on the Series D notes was 7.14%, and there were no borrowings under the credit facility.

With respect to Cortez's Series D notes, Shell Oil Company shares our several guaranty obligations jointly and severally; however, we are obligated to indemnify Shell for liabilities it incurs in connection with such guaranty and JP Morgan Chase issued a letter of credit on our behalf in December 2006 in the amount of $37.5 million to secure our indemnification obligations to Shell for 50% of the $75 million in principal amount of Series D notes outstanding as of December 31, 2006.

Red Cedar Gathering Company Debt

Red Cedar Gathering Company was the obligor on $55 million in aggregate principal amount of Senior Notes due October 31, 2010. The Senior Notes were collateralized by a first priority lien on the ownership interests, including our 49% ownership interest, in Red Cedar Gathering Company. The Senior Notes were also guaranteed by us and the other owner of Red Cedar Gathering Company jointly and severally. As of December 31, 2006, $31.4 million in principal amount of notes were outstanding.

In March 2007, Red Cedar refinanced the outstanding balance of its existing Senior Notes through a private placement of $100 million in principal amount of ten year fixed rate notes. As a result of Red Cedar Gathering Company's retirement of the remaining $31.4 million outstanding principal amount of its Senior Notes, we are no longer contingently liable for any Red Cedar Gathering Company debt.

Nassau County, Florida Ocean Highway and Port Authority Debt

We have posted a letter of credit as security for borrowings under Adjustable Demand Revenue Bonds issued by the Nassau County, Florida Ocean Highway and Port Authority. The bonds were issued for the purpose of constructing certain port improvements located in Fernandino Beach, Nassau County, Florida. Our subsidiary, Nassau Terminals LLC is the operator of the marine port facilities.

The bond indenture is for 30 years and allows the bonds to remain outstanding until December 1, 2020. Principal payments on the bonds are made on the first of December each year and corresponding reductions are made to the letter of credit. As of December 31, 2007, this letter of credit had a face amount of $22.5 million.

Rockies Express Pipeline LLC Debt

Pursuant to certain guaranty agreements, all three member owners of West2East Pipeline LLC (which owns all of the member interests in Rockies Express Pipeline LLC) have agreed to guarantee, severally in the same proportion as their percentage ownership of the member interests in West2East Pipeline LLC, borrowings under Rockies Express' (i) $2.0 billion five-year, unsecured revolving credit facility due April 28, 2011; (ii) $2.0 billion commercial paper program; and (iii) $600 million in principal amount of floating rate senior notes due August 20,

2009. The three member owners and their respective ownership interests consist of the following: our subsidiary Kinder Morgan W2E Pipeline LLC – 51%, a subsidiary of Sempra Energy – 25%, and a subsidiary of ConocoPhillips – 24%.

Borrowings under the Rockies Express commercial paper program are primarily used to finance the construction of the Rockies Express interstate natural gas pipeline and to pay related expenses. The credit facility, which can be amended to allow for borrowings up to $2.5 billion, supports borrowings under the commercial paper program, and borrowings under the commercial paper program reduce the borrowings allowed under the credit facility.

On September 20, 2007, Rockies Express issued $600 million in principal amount of senior unsecured floating rate notes. The notes have a maturity date of August 20, 2009, and interest on these notes is paid and computed quarterly on an interest rate of three-month LIBOR plus a spread. Upon issuance of the notes, Rockies Express entered into two floating-to-fixed interest rate swap agreements having a combined notional principal amount of $600 million and a maturity date of August 20, 2009.

In addition to the $600 million in senior notes, as of December 31, 2007, Rockies Express Pipeline LLC had $1,625.4 million of commercial paper outstanding with a weighted average interest rate of approximately 5.50%, and there were no borrowings under its five-year credit facility. Accordingly, as of December 31, 2007, our contingent share of Rockies Express' debt was $1,135.0 million (51% of total borrowings).

Fair Value of Financial Instruments

Fair value as used in SFAS No. 107, "Disclosures About Fair Value of Financial Instruments," represents the amount at which an instrument could be exchanged in a current transaction between willing parties. The estimated fair value of our long-term debt, including its current portion and excluding the value of interest rate swaps, is based upon prevailing interest rates available to us as of December 31, 2007 and December 31, 2006 and is disclosed below (in millions).

	December 31, 2007		December 31, 2006	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Total Debt	$ 7,066.1	$ 7,201.8	$ 5,743.4	$ 5,865.0

10. Pensions and Other Post-Retirement Benefits

Pension and Post-Retirement Benefit Plans

Due to our acquisition of Trans Mountain (see Note 3), Kinder Morgan Canada Inc. and Trans Mountain Pipeline Inc. (as general partner of Trans Mountain Pipeline L.P.) are sponsors of pension plans for eligible Trans Mountain employees. The plans include registered defined benefit pension plans, supplemental unfunded arrangements, which provide pension benefits in excess of statutory limits, and defined contributory plans. We also provide post-retirement benefits other than pensions for retired employees. Our combined net periodic benefit costs for these Trans Mountain pension and post-retirement benefit plans for 2007 and 2006 was approximately $3.2 million and $3.5 million, respectively, recognized ratably over each year. As of December 31, 2007, we estimate our overall net periodic pension and post-retirement benefit costs for these plans for the year 2008 will be approximately $3.1 million, although this estimate could change if there is a significant event, such as a plan amendment or a plan curtailment, which would require a remeasurement of liabilities. We expect to contribute approximately $2.6 million to these benefit plans in 2008.

Additionally, in connection with our acquisition of SFPP, L.P. and Kinder Morgan Bulk Terminals, Inc. in 1998, we acquired certain liabilities for pension and post-retirement benefits. We provide medical and life insurance benefits to current employees, their covered dependents and beneficiaries of SFPP and Kinder Morgan Bulk Terminals. We also provide the same benefits to former salaried employees of SFPP. Additionally, we will continue to fund these costs for those employees currently in the plan during their retirement years. SFPP's post-retirement benefit plan is frozen and no additional participants may join the plan. The noncontributory defined benefit pension plan covering the former employees of Kinder Morgan Bulk Terminals is the Knight Inc. Retirement

Plan. The benefits under this plan are based primarily upon years of service and final average pensionable earnings; however, benefit accruals were frozen as of December 31, 1998.

Our net periodic benefit cost for the SFPP post-retirement benefit plan were credits of $0.2 million in 2007, $0.3 million in 2006, and $0.3 million in 2005. The credits resulted in increases to income, largely due to amortizations of an actuarial gain and a negative prior service cost. As of December 31, 2007, we estimate no overall net periodic post-retirement benefit cost for the SFPP post-retirement benefit plan for the year 2008; however, this estimate could change if a future significant event would require a remeasurement of liabilities. In addition, we expect to contribute approximately $0.4 million to this post-retirement benefit plan in 2008.

On September 29, 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statement Nos. 87, 88, 106 and 132(R)." One of the provisions of this Statement requires an employer with publicly traded equity securities to recognize the overfunded or underfunded status of a defined benefit pension plan or post-retirement benefit plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to provide the required disclosures as of the end of the fiscal year ending after December 15, 2006. Following adoption of SFAS No. 158, entities will report as part of the net benefit liability on their balance sheets amounts that have not yet been recognized as a component of benefit expense (for example, unrecognized prior service costs or credits, net (actuarial) gain or loss, and transition obligation or asset) with a corresponding adjustment to accumulated other comprehensive income.

We adopted SFAS No. 158 on December 31, 2006, and the primary impact on us from adopting this Statement was to require us to fully recognize, in our consolidated balance sheet, both the funded status of our pension and post-retirement benefit plan obligations, and previously unrecognized prior service costs and credits and actuarial gains and losses. As of December 31, 2006, the recorded value of our pension and post-retirement benefit obligations for both the Trans Mountain pension and post-retirement benefit plans and the SFPP post-retirement benefit plan was a combined $28.4 million.

The following table discloses the incremental effect on our consolidated balance sheet of applying SFAS No. 158 on December 31, 2006 (in millions):

	Before Application	Adjustments	After Application
Prepaid benefit cost	$ —	$ —	$ —
Accrued benefit liability	30.3	(1.9)	28.4
Intangible asset	—	—	—
Deferred income tax liability	(6.4)	(1.2)	(7.6)
Minority interest	—	—	—
Accumulated other comprehensive income	—	3.1	3.1

As of December 31, 2007, the recorded value of our pension and post-retirement benefit obligations for these plans was a combined $37.5 million. We consider our overall pension and post-retirement benefit liability exposure to be minimal in relation to the value of our total consolidated assets and net income.

Multiemployer Plans

As a result of acquiring several terminal operations, primarily our acquisition of Kinder Morgan Bulk Terminals, Inc. effective July 1, 1998, we participate in several multi-employer pension plans for the benefit of employees who are union members. We do not administer these plans and contribute to them in accordance with the provisions of negotiated labor contracts. Other benefits include a self-insured health and welfare insurance plan and an employee health plan where employees may contribute for their dependents' health care costs. Amounts charged to expense for these plans were approximately $6.7 million for the year ended December 31, 2007, and $6.3 million for each of the years ended December 31, 2006 and 2005.

Kinder Morgan Savings Plan

The Kinder Morgan Savings Plan is a defined contribution 401(k) plan. The plan permits all full-time employees of Knight, Inc. and KMGP Services Company, Inc. to contribute between 1% and 50% of base compensation, on a pre-tax basis, into participant accounts. In addition to a mandatory contribution equal to 4% of base compensation per year for most plan participants, our general partner may make special discretionary contributions. Certain employees' contributions are based on collective bargaining agreements. The mandatory contributions are made each pay period on behalf of each eligible employee. Participants may direct the investment of their contributions and all employer contributions, including discretionary contributions, into a variety of investments. Plan assets are held and distributed pursuant to a trust agreement. The total amount charged to expense for our Savings Plan was $11.7 million during 2007, $10.2 million during 2006, and $7.9 million during 2005.

Employer contributions for employees vest on the second anniversary of the date of hire. Effective October 1, 2005, for new employees of our Terminals segment, a tiered employer contribution schedule was implemented. This tiered schedule provides for employer contributions of 1% for service less than one year, 2% for service between one and two years, 3% for services between two and five years, and 4% for service of five years or more. All employer contributions for Terminals employees hired after October 1, 2005 vest on the fifth anniversary of the date of hire (effective January 1, 2008, this five year anniversary date for Terminals employees was changed to three years to comply with changes in federal regulations).

At its July 2007 meeting, the compensation committee of the KMR board of directors approved a special contribution of an additional 1% of base pay into the Savings Plan for each eligible employee. Each eligible employee will receive an additional 1% company contribution based on eligible base pay each pay period beginning with the first pay period of August 2007 and continuing through the last pay period of July 2008. The additional 1% contribution does not change or otherwise impact, the annual 4% contribution that eligible employees currently receive and it will vest according to the same vesting schedule described in the preceding paragraph. Since this additional 1% company contribution is discretionary, compensation committee approval will be required annually for each additional contribution. During the first quarter of 2008, excluding the 1% additional contribution described above, we will not make any additional discretionary contributions to individual accounts for 2007.

Additionally, in 2006, an option to make after-tax "Roth" contributions (Roth 401(k) option) to a separate participant account was added to the Savings Plan as an additional benefit to all participants. Unlike traditional 401(k) plans, where participant contributions are made with pre-tax dollars, earnings grow tax-deferred, and the withdrawals are treated as taxable income, Roth 401(k) contributions are made with after-tax dollars, earnings are tax-free, and the withdrawals are tax-free if they occur after both (i) the fifth year of participation in the Roth 401(k) option, and (ii) attainment of age 59 ½, death or disability. The employer contribution will still be considered taxable income at the time of withdrawal.

Cash Balance Retirement Plan

Employees of KMGP Services Company, Inc. and Knight are also eligible to participate in a Cash Balance Retirement Plan. Certain employees continue to accrue benefits through a career-pay formula, "grandfathered" according to age and years of service on December 31, 2000, or collective bargaining arrangements. All other employees accrue benefits through a personal retirement account in the Cash Balance Retirement Plan. Under the plan, we make contributions on behalf of participating employees equal to 3% of eligible compensation every pay period. Interest is credited to the personal retirement accounts at the 30-year U.S. Treasury bond rate, or an approved substitute, in effect each year. Employees become fully vested in the plan after five years, and they may take a lump sum distribution upon termination of employment or retirement.

11. Partners' Capital

Limited Partner Units

As of December 31, 2007 and 2006, our partners' capital consisted of the following limited partner units:

	December 31, 2007	December 31, 2006
Common units	170,220,396	162,816,303
Class B units	5,313,400	5,313,400
i-units	72,432,482	62,301,676
Total limited partner units	247,966,278	230,431,379

The total limited partner units represent our limited partners' interest and an effective 98% economic interest in us, exclusive of our general partner's incentive distribution rights. Our general partner has an effective 2% interest in us, excluding its incentive distribution rights.

As of December 31, 2007, our common unit total consisted of 155,864,661 units held by third parties, 12,631,735 units held by Knight and its consolidated affiliates (excluding our general partner) and 1,724,000 units held by our general partner. As of December 31, 2006, our common unit total consisted of 148,460,568 units held by third parties, 12,631,735 units held by Knight and its consolidated affiliates (excluding our general partner) and 1,724,000 units held by our general partner.

On both December 31, 2007 and December 31, 2006, all of our 5,313,400 Class B units were held entirely by a wholly-owned subsidiary of Knight. The Class B units are similar to our common units except that they are not eligible for trading on the New York Stock Exchange. All of our Class B units were issued to a wholly-owned subsidiary of Knight in December 2000.

On both December 31, 2007 and December 31, 2006, all of our i-units were held entirely by KMR. Our i-units are a separate class of limited partner interests in us and are not publicly traded. In accordance with its limited liability company agreement, KMR's activities are restricted to being a limited partner in us, and to controlling and managing our business and affairs and the business and affairs of our operating limited partnerships and their subsidiaries. Through the combined effect of the provisions in our partnership agreement and the provisions of KMR's limited liability company agreement, the number of outstanding KMR shares and the number of i-units will at all times be equal.

Under the terms of our partnership agreement, we agreed that we will not, except in liquidation, make a distribution on an i-unit other than in additional i-units or a security that has in all material respects the same rights and privileges as our i-units. The number of i-units we distribute to KMR is based upon the amount of cash we distribute to the owners of our common units. When cash is paid to the holders of our common units, we will issue additional i-units to KMR. The fraction of an i-unit paid per i-unit owned by KMR will have a value based on the cash payment on the common unit.

The cash equivalent of distributions of i-units will be treated as if it had actually been distributed for purposes of determining the distributions to our general partner. We will not distribute the cash to the holders of our i-units but will instead retain the cash for use in our business. If additional units are distributed to the holders of our common units, we will issue an equivalent amount of i-units to KMR based on the number of i-units it owns. Based on the preceding, KMR received a distribution of 1,258,778 i-units on November 14, 2007. These additional i-units distributed were based on the $0.88 per unit distributed to our common unitholders on that date. During the year ended December 31, 2007, KMR received distributions of 4,430,806 i-units. These additional i-units distributed were based on the $3.39 per unit distributed to our common unitholders during 2007. During 2006, KMR received distributions of 4,383,303 i-units, based on the $3.23 per unit distributed to our common unitholders during 2006.

Equity Issuances

In August 2006, we issued, in a public offering, 5,750,000 of our common units, including common units sold pursuant to the underwriters' over-allotment option, at a price of $44.80 per unit, less commissions and underwriting expenses. We received net proceeds of approximately $248.0 million for the issuance of these 5,750,000 common units.

On May 17, 2007, KMR issued 5,700,000 of its shares in a public offering at a price of $52.26 per share. The net proceeds from the offering were used by KMR to buy additional i-units from us, and we received net proceeds of $297.9 million for the issuance of 5,700,000 i-units.

On December 5, 2007, we issued, in a public offering, 7,130,000 of our common units, including common units sold pursuant to the underwriters' over-allotment option, at a price of $48.09 per unit, less commissions and underwriting expenses. We received net proceeds of $342.9 million for the issuance of these 7,130,000 common units.

We used the proceeds from each of these three issuances to reduce the borrowings under our commercial paper program. In addition, pursuant to our purchase and sale agreement with Trans-Global Solutions, Inc., we issued 266,813 common units in May 2007 to TGS to settle a purchase price liability related to our acquisition of bulk terminal operations from TGS in April 2005. As agreed between TGS and us, the units were issued equal to a value of $15.0 million.

In addition, on February 12, 2008, we completed an offering of 1,080,000 of our common units at a price of $55.65 per unit in a privately negotiated transaction. We received net proceeds of $60.1 million for the issuance of these 1,080,000 common units, and we used the proceeds to reduce the borrowings under our commercial paper program.

Income Allocation and Declared Distributions

For the purposes of maintaining partner capital accounts, our partnership agreement specifies that items of income and loss shall be allocated among the partners, other than owners of i-units, in accordance with their percentage interests. Normal allocations according to percentage interests are made, however, only after giving effect to any priority income allocations in an amount equal to the incentive distributions that are allocated 100% to our general partner. Incentive distributions are generally defined as all cash distributions paid to our general partner that are in excess of 2% of the aggregate value of cash and i-units being distributed.

Incentive distributions allocated to our general partner are determined by the amount quarterly distributions to unitholders exceed certain specified target levels, according to the provisions of our partnership agreement. For the years ended December 31, 2007, 2006 and 2005, we declared distributions of $3.48, $3.26 and $3.13 per unit, respectively. Under the terms of our partnership agreement, our total distributions to unitholders for 2007, 2006 and 2005 required incentive distributions to our general partner in the amount of $611.9 million, $528.4 million and $473.9 million, respectively. The increased incentive distributions paid for 2007 over 2006, and 2006 over 2005 reflect the increases in amounts distributed per unit as well as the issuance of additional units. Distributions for the fourth quarter of each year are declared and paid during the first quarter of the following year.

Fourth Quarter 2006 Incentive Distribution Waiver

According to the provisions of the Knight Annual Incentive Plan, in order for the executive officers of our general partner and KMR, and for the employees of KMGP Services Company, Inc. and Knight who operate our business to earn a non-equity cash incentive (bonus) for 2006, both we and Knight were required to meet pre-established financial performance targets. The target for us was $3.28 in cash distributions per common unit for 2006. Due to the fact that we did not meet our 2006 budget target, we had no obligation to fund our 2006 bonus plan; however, at its January 17, 2007 board meeting, the board of directors of KMI (now Knight) determined that it was in KMI's long-term interest to fund a partial payout of our bonuses through a reduction in our general partner's incentive distribution.

Accordingly, our general partner, with the approval of the compensation committees and boards of KMI and KMR, waived $20.1 million of its 2006 incentive distribution for the fourth quarter of 2006. The waived amount approximated an amount equal to our actual bonus payout for 2006, which was approximately 75% of our budgeted full bonus payout for 2006 of $26.5 million. Including the effect of this waiver, our distributions to unitholders for

2006 resulted in payments of incentive distributions to our general partner in the amount of $508.3 million. The waiver of $20.1 million of incentive payment in the fourth quarter of 2006 reduced our general partner's equity earnings by $19.9 million.

Fourth Quarter 2007 Incentive Distribution

On January 16, 2008, we declared a cash distribution of $0.92 per unit for the quarterly period ended December 31, 2007. This distribution was paid on February 14, 2008, to unitholders of record as of January 31, 2008. Our common unitholders and Class B unitholders received cash. KMR, our sole i-unitholder, received a distribution in the form of additional i-units based on the $0.92 distribution per common unit. The number of i-units distributed was 1,253,951. For each outstanding i-unit that KMR held, a fraction of an i-unit (0.017312) was issued. The fraction was determined by dividing:

- $0.92, the cash amount distributed per common unit

by

- $53.143, the average of KMR's limited liability shares' closing market prices from January 14-28, 2008, the ten consecutive trading days preceding the date on which the shares began to trade ex-dividend under the rules of the New York Stock Exchange.

This February 14, 2008 distribution included an incentive distribution to our general partner in the amount of $170.3 million. Since this distribution was declared after the end of the quarter, no amount is shown in our December 31, 2007 balance sheet as a distribution payable.

12. Related Party Transactions

General and Administrative Expenses

KMGP Services Company, Inc., a subsidiary of our general partner, provides employees and Kinder Morgan Services LLC, a wholly owned subsidiary of KMR, provides centralized payroll and employee benefits services to (i) us; (ii) our operating partnerships and subsidiaries; (iii) our general partner; and (iv) KMR (collectively, the "Group"). Employees of KMGP Services Company, Inc. are assigned to work for one or more members of the Group. The direct costs of all compensation, benefits expenses, employer taxes and other employer expenses for these employees are allocated and charged by Kinder Morgan Services LLC to the appropriate members of the Group, and the members of the Group reimburse Kinder Morgan Services LLC for their allocated shares of these direct costs. There is no profit or margin charged by Kinder Morgan Services LLC to the members of the Group. The administrative support necessary to implement these payroll and benefits services is provided by the human resource department of Knight, and the related administrative costs are allocated to members of the Group in accordance with existing expense allocation procedures. The effect of these arrangements is that each member of the Group bears the direct compensation and employee benefits costs of its assigned or partially assigned employees, as the case may be, while also bearing its allocable share of administrative costs. Pursuant to our limited partnership agreement, we provide reimbursement for our share of these administrative costs and such reimbursements will be accounted for as described above. Additionally, we reimburse KMR with respect to costs incurred or allocated to KMR in accordance with our limited partnership agreement, the delegation of control agreement among our general partner, KMR, us and others, and KMR's limited liability company agreement.

The named executive officers of our general partner and KMR and other employees that provide management or services to both Knight and the Group are employed by Knight. Additionally, other Knight employees assist in the operation of our Natural Gas Pipeline assets. These Knight employees' expenses are allocated without a profit component between Knight and the appropriate members of the Group.

Additionally, in accordance with SFAS No. 123R, Knight Holdco LLC is required to recognize compensation expense in connection with their Class A-1 and Class B units over the expected life of such units. As a subsidiary of Knight Holdco LLC, we are allocated a portion of this compensation expense, although we have no obligation nor do we expect to pay any of these costs.

Partnership Interests and Distributions

Kinder Morgan G.P., Inc.

Kinder Morgan G.P., Inc. serves as our sole general partner. Pursuant to our partnership agreement, our general partner's interests represent a 1% ownership interest in us, and a direct 1.0101% ownership interest in each of our five operating partnerships. Collectively, our general partner owns an effective 2% interest in our operating partnerships, excluding incentive distributions rights as follows:

- its 1.0101% direct general partner ownership interest (accounted for as minority interest in our consolidated financial statements); and
- its 0.9899% ownership interest indirectly owned via its 1% ownership interest in us.

As of December 31, 2007, our general partner owned 1,724,000 common units, representing approximately 0.70% of our outstanding limited partner units.

Our partnership agreement requires that we distribute 100% of "Available Cash," as defined in our partnership agreement, to our partners within 45 days following the end of each calendar quarter in accordance with their respective percentage interests. Available Cash consists generally of all of our cash receipts, including cash received by our operating partnerships and net reductions in reserves, less cash disbursements and net additions to reserves and amounts payable to the former general partner of SFPP, L.P. in respect of its remaining 0.5% interest in SFPP.

Our general partner is granted discretion by our partnership agreement, which discretion has been delegated to KMR, subject to the approval of our general partner in certain cases, to establish, maintain and adjust reserves for future operating expenses, debt service, maintenance capital expenditures, rate refunds and distributions for the next four quarters. These reserves are not restricted by magnitude, but only by type of future cash requirements with which they can be associated. When KMR determines our quarterly distributions, it considers current and expected reserve needs along with current and expected cash flows to identify the appropriate sustainable distribution level.

Our general partner and owners of our common units and Class B units receive distributions in cash, while KMR, the sole owner of our i-units, receives distributions in additional i-units. We do not distribute cash to i-unit owners but retain the cash for use in our business. However, the cash equivalent of distributions of i-units is treated as if it had actually been distributed for purposes of determining the distributions to our general partner. Each time we make a distribution, the number of i-units owned by KMR and the percentage of our total units owned by KMR increase automatically under the provisions of our partnership agreement.

Available cash is initially distributed 98% to our limited partners and 2% to our general partner. These distribution percentages are modified to provide for incentive distributions to be paid to our general partner in the event that quarterly distributions to unitholders exceed certain specified targets.

Available cash for each quarter is distributed:

- first, 98% to the owners of all classes of units pro rata and 2% to our general partner until the owners of all classes of units have received a total of $0.15125 per unit in cash or equivalent i-units for such quarter;
- second, 85% of any available cash then remaining to the owners of all classes of units pro rata and 15% to our general partner until the owners of all classes of units have received a total of $0.17875 per unit in cash or equivalent i-units for such quarter;
- third, 75% of any available cash then remaining to the owners of all classes of units pro rata and 25% to our general partner until the owners of all classes of units have received a total of $0.23375 per unit in cash or equivalent i-units for such quarter; and

- fourth, 50% of any available cash then remaining to the owners of all classes of units pro rata, to owners of common units and Class B units in cash and to owners of i-units in the equivalent number of i-units, and 50% to our general partner.

For more information on incentive distributions paid to our general partner, see Note 11 "—Income Allocation and Declared Distributions."

Knight Inc.

Knight Inc. remains the sole indirect stockholder of our general partner. Also, as of December 31, 2007, Knight directly owned 8,838,095 common units, indirectly owned 5,313,400 Class B units and 5,517,640 common units through its consolidated affiliates, including our general partner, and owned 10,334,746 KMR shares, representing an indirect ownership interest of 10,334,746 i-units. Together, these units represented approximately 12.1% of our outstanding limited partner units. Including both its general and limited partner interests in us, at the 2007 distribution level, Knight received approximately 49% of all quarterly distributions from us, of which approximately 43% was attributable to its general partner interest and the remaining 6% was attributable to its limited partner interest. The actual level of distributions Knight will receive in the future will vary with the level of distributions to our limited partners determined in accordance with our partnership agreement.

Kinder Morgan Management, LLC

As of December 31, 2007, KMR, our general partner's delegate, remained the sole owner of our 72,432,482 i-units.

Asset Acquisitions and Sales

From time to time in the ordinary course of business, we buy and sell pipeline and related services from Knight and its subsidiaries. Such transactions are conducted in accordance with all applicable laws and regulations and on an arms' length basis consistent with our policies governing such transactions. In conjunction with our acquisition of (i) certain Natural Gas Pipelines assets and partnership interests from Knight in December 1999 and December 2000; and (ii) all of the ownership interest in TransColorado Gas Transmission Company LLC from two wholly-owned subsidiaries of Knight on November 1, 2004, Knight agreed to indemnify us and our general partner with respect to approximately $733.5 million of our debt. Knight would be obligated to perform under this indemnity only if we are unable, and/or our assets were insufficient to satisfy our obligations.

Operations

Natural Gas Pipelines Business Segment

Knight or its subsidiaries operate and maintain for us the assets comprising our Natural Gas Pipelines business segment. Natural Gas Pipeline Company of America, a subsidiary of Knight, operates Trailblazer Pipeline Company LLC's assets under a long-term contract pursuant to which Trailblazer Pipeline Company LLC incurs the costs and expenses related to NGPL's operating and maintaining the assets. Trailblazer Pipeline Company LLC provides the funds for its own capital expenditures. NGPL does not profit from or suffer loss related to its operation of Trailblazer Pipeline Company LLC's assets.

The remaining assets comprising our Natural Gas Pipelines business segment as well as our Cypress Pipeline (and our North System until its sale in October 2007, described in Note 3), which is part of our Products Pipelines business segment, are operated under other agreements between Knight and us. Pursuant to the applicable underlying agreements, we pay Knight either a fixed amount or actual costs incurred as reimbursement for the corporate general and administrative expenses incurred in connection with the operation of these assets. The amounts paid to Knight for corporate general and administrative costs, including amounts related to Trailblazer Pipeline Company LLC, were $1.0 million of fixed costs and $48.1 million of actual costs incurred for 2007, $1.0 million of fixed costs and $37.9 million of actual costs incurred for 2006, and $5.5 million of fixed costs and $24.2 million of actual costs incurred for 2005.

We believe the amounts paid to Knight for the services they provided each year fairly reflect the value of the services performed. However, due to the nature of the allocations, these reimbursements may not exactly match the actual time and overhead spent. We believe the fixed amounts that were agreed upon at the time the contracts were entered into were reasonable estimates of the corporate general and administrative expenses to be incurred by Knight and its subsidiaries in performing such services. We also reimburse Knight and its subsidiaries for operating and maintenance costs and capital expenditures incurred with respect to our assets.

CO_2 Business Segment

Knight or its subsidiaries operate and maintain for us the power plant we constructed at the SACROC oil field unit, located in the Permian Basin area of West Texas. The power plant provides approximately half of SACROC's current electricity needs. Kinder Morgan Power Company, a subsidiary of Knight, operates and maintains the power plant under a five-year contract expiring in June 2010. Pursuant to the contract, Knight incurs the costs and expenses related to operating and maintaining the power plant for the production of electrical energy at the SACROC field. Such costs include supervisory personnel and qualified operating and maintenance personnel in sufficient numbers to accomplish the services provided in accordance with good engineering, operating and maintenance practices. Kinder Morgan Production Company fully reimburses Knight's expenses, including all agreed-upon labor costs, and also pays to Knight an operating fee of $20,000 per month.

In addition, Kinder Morgan Production Company is responsible for processing and directly paying invoices for fuels utilized by the plant. Other materials, including but not limited to lubrication oil, hydraulic oils, chemicals, ammonia and any catalyst are purchased by Knight and invoiced monthly as provided by the contract, if not paid directly by Kinder Morgan Production Company. The amounts paid to Knight in 2007 and 2006 for operating and maintaining the power plant were $3.1 million and $2.9 million, respectively. Furthermore, we believe the amounts paid to Knight for the services they provide each year fairly reflect the value of the services performed.

Risk Management

Certain of our business activities expose us to risks associated with changes in the market price of natural gas, natural gas liquids and crude oil. We also have exposure to interest rate risk as a result of the issuance of our fixed rate debt obligations. Pursuant to our management's approved risk management policy, we use derivative contracts to hedge or reduce our exposure to these risks and protect our profit margins, and we are prohibited from engaging in speculative trading.

Our commodity-related risk management activities are monitored by our risk management committee, which is a separately designated standing committee whose job responsibilities involve operations exposed to commodity market risk and other external risks in the ordinary course of business. Our risk management committee is charged with the review and enforcement of our management's risk management policy. The committee is comprised of 19 executive-level employees of Knight or KMGP Services Company, Inc. whose job responsibilities involve operations exposed to commodity market risk and other external risks in the ordinary course of our businesses. The committee is chaired by our President and is charged with the following three responsibilities: (i) establish and review risk limits consistent with our risk tolerance philosophy; (ii) recommend to the audit committee of our general partner's delegate any changes, modifications, or amendments to our risk management policy; and (iii) address and resolve any other high-level risk management issues.

In addition, as discussed in Note 1, as a result of the going private transaction of Knight, a number of individuals and entities became significant investors in Knight. By virtue of the size of their ownership interest in Knight, two of those investors became "related parties" to us (as that term is defined in authoritative accounting literature): (i) American International Group, Inc. and certain of its affiliates; and (ii) Goldman Sachs Capital Partners and certain of its affiliates. We and/or our affiliates enter into transactions with certain AIG affiliates in the ordinary course of their conducting insurance and insurance-related activities, although no individual transaction is, and all such transactions collectively are not, material to our consolidated financial statements.

We also conduct commodity risk management activities in the ordinary course of implementing our risk management strategies in which the counterparty to certain of our derivative transactions is an affiliate of Goldman Sachs. In conjunction with these activities, we are a party (through one of our subsidiaries engaged in the production of crude oil) to a hedging facility with J. Aron & Company/Goldman Sachs which requires us to provide certain periodic information, but does not require the posting of margin. As a result of changes in the market value of our derivative positions, we have created both amounts receivable from and payable to Goldman Sachs affiliates.

The following table summarizes the fair values of these energy commodity derivative contracts associated with our commodity price risk management activities with related parties and included on our accompanying consolidated balance sheets as of December 31, 2007 (in millions):

Derivatives-net asset/(liability)	
Accrued other current liabilities	$ (239.8)
Other long-term liabilities and deferred credits	$ (386.5)

For more information on our risk management activities see Note 14.

KM Insurance, Ltd.

KM Insurance, Ltd., referred to as KMIL, is a Bermuda insurance company and wholly-owned subsidiary of Knight. KMIL was formed during the second quarter of 2005 as a Class 2 Bermuda insurance company, the sole business of which is to issue policies for Knight and us to secure the deductible portion of our workers compensation, automobile liability, and general liability policies placed in the commercial insurance market. We accrue for the cost of insurance, which is included in the related party general and administrative expenses and which totaled approximately $3.6 million in 2007 and $5.8 million in 2006.

Notes Receivable

Plantation Pipe Line Company

We have a seven-year note receivable bearing interest at the rate of 4.72% per annum from Plantation Pipe Line Company, our 51.17%-owned equity investee. The outstanding note receivable balance was $89.7 million and $93.1 million as of December 31, 2007 and December 31, 2006, respectively. Of these amounts, $2.4 million and $3.4 million were included within "Accounts, notes and interest receivable, net—Related parties" as of December 31, 2007 and December 31, 2006, respectively, and the remainder was included within "Notes receivable—Related parties" at each reporting date.

Knight Inc.

As of December 31, 2007, an affiliate of Knight owed to us a long-term note with a principal amount of $0.6 million, and we included this balance within "Notes receivable—Related parties" on our consolidated balance sheet as of that date. This note currently has no fixed terms of repayment and is denominated in Canadian dollars. As of December 31, 2006, we had an additional note receivable denominated in Canadian dollars from a second affiliate of Knight (and which became an affiliate of ours in 2007), and combined, the two notes had a translated principal amount of $6.5 million. The above amounts represent the translated amounts included in our consolidated financial statements in U.S. dollars.

Additionally, prior to our acquisition of Trans Mountain on April 30, 2007, Knight and certain of its affiliates advanced cash to Trans Mountain. The advances were primarily used by Trans Mountain for capital expansion projects. Knight and its affiliates also funded Trans Mountain's cash book overdrafts (outstanding checks) as of April 30, 2007. Combined, the funding for these items totaled $67.5 million, and we reported this amount within the caption "Changes in components of working capital: Accounts Receivable" in the operating section of our accompanying consolidated statement of cash flows.

Coyote Gas Treating, LLC

Coyote Gas Treating, LLC is a joint venture that was organized in December 1996. It is referred to as Coyote Gulch in this report. The sole asset owned by Coyote Gulch is a 250 million cubic feet per day natural gas treating facility located in La Plata County, Colorado. Prior to the contribution of our ownership interest in Coyote Gulch to

Red Cedar Gathering on September 1, 2006, we were the managing partner and owned a 50% equity interest in Coyote Gulch.

As of January 1, 2006, we had a $17.0 million note receivable from Coyote Gulch. The term of the note was month-to-month. In March 2006, the owners of Coyote Gulch agreed to transfer Coyote Gulch's notes payable to members' equity. Accordingly, we contributed the principal amount of $17.0 million related to our note receivable to our equity investment in Coyote Gulch.

On September 1, 2006, we and the Southern Ute Tribe (owners of the remaining 50% interest in Coyote Gulch) agreed to transfer all of the members' equity in Coyote Gulch to the members' equity of Red Cedar Gathering Company, a joint venture organized in August 1994. Red Cedar owns and operates natural gas gathering, compression and treating facilities in the Ignacio Blanco Field in La Plata County, Colorado, and is owned 49% by us and 51% by the Southern Ute Tribe. Under the terms of a five-year operating lease agreement that became effective January 1, 2002, Red Cedar also operates the gas treating facility owned by Coyote Gulch and is responsible for all operating and maintenance expenses and capital costs.

Accordingly, on September 1, 2006, we and the Southern Ute Tribe contributed the value of our respective 50% ownership interests in Coyote Gulch to Red Cedar, and as a result, Coyote Gulch became a wholly owned subsidiary of Red Cedar. The value of our 50% equity contribution from Coyote Gulch to Red Cedar on September 1, 2006 was $16.7 million, and this amount remains included within "Investments" on our consolidated balance sheet as of December 31, 2007.

Other

Generally, KMR makes all decisions relating to the management and control of our business. Our general partner owns all of KMR's voting securities and is its sole managing member. Knight, through its wholly owned and controlled subsidiary Kinder Morgan (Delaware), Inc., owns all the common stock of our general partner. Certain conflicts of interest could arise as a result of the relationships among KMR, our general partner, Knight and us. The officers of Knight have fiduciary duties to manage Knight, including selection and management of its investments in its subsidiaries and affiliates, in a manner beneficial to themselves. In general, KMR has a fiduciary duty to manage us in a manner beneficial to our unitholders. The partnership agreements for us and our operating partnerships contain provisions that allow KMR to take into account the interests of parties in addition to us in resolving conflicts of interest, thereby limiting its fiduciary duty to our unitholders, as well as provisions that may restrict the remedies available to our unitholders for actions taken that might, without such limitations, constitute breaches of fiduciary duty.

The partnership agreements provide that in the absence of bad faith by KMR, the resolution of a conflict by KMR will not be a breach of any duties. The duty of the officers of Knight may, therefore, come into conflict with the duties of KMR and its directors and officers to our unitholders. The audit committee of KMR's board of directors will, at the request of KMR, review (and is one of the means for resolving) conflicts of interest that may arise between Knight or its subsidiaries, on the one hand, and us, on the other hand.

13. Leases and Commitments

Capital Leases

We acquired certain leases classified as capital leases as part of our acquisition of Kinder Morgan River Terminals LLC in October 2004. We lease our Memphis, Tennessee port facility under an agreement accounted for as a capital lease. The lease is for 24 years and expires in 2017.

Amortization of assets recorded under capital leases is included with depreciation expense. The components of property, plant and equipment recorded under capital leases are as follows (in millions):

	December 31, 2007	December 31, 2006
Leasehold improvements	$ 2.2	$ 2.2
Less: Accumulated amortization	(0.3)	(0.2)
Total	$ 1.9	$ 2.0

Future commitments under capital lease obligations as of December 31, 2007 are as follows (in millions):

Year	Commitment
2008	$ 0.2
2009	0.2
2010	0.2
2011	0.2
2012	0.2
Thereafter	0.6
Subtotal	1.6
Less: Amount representing interest	(0.6)
Present value of minimum capital lease payments	$ 1.0

Operating Leases

Including probable elections to exercise renewal options, the remaining terms on our operating leases range from one to 61 years. Future commitments related to these leases as of December 31, 2007 are as follows (in millions):

Year	Commitment
2008	$ 31.5
2009	22.8
2010	19.5
2011	15.6
2012	12.1
Thereafter	27.6
Total minimum payments	$ 129.1

The largest of these lease commitments, in terms of total obligations payable by December 31, 2008, include commitments supporting: (i) crude oil drilling rig operations for the oil and gas activities of our CO_2 business segment; (ii) marine port terminal operations at our Nassau bulk product terminal, located in Fernandina Beach, Florida; and (iii) natural gas storage in underground salt dome caverns for our Texas intrastate natural gas pipeline group.

We have not reduced our total minimum payments for future minimum sublease rentals aggregating approximately $2.0 million. Total lease and rental expenses were $49.2 million for 2007, $54.2 million for 2006 and $47.3 million for 2005.

Common Unit Option Plan

During 1998, we established a common unit option plan, which provides that key personnel of KMGP Services Company, Inc. and Knight are eligible to receive grants of options to acquire common units. The number of common units authorized under the option plan is 500,000. The option plan terminates in March 2008. The options granted generally have a term of seven years, vest 40% on the first anniversary of the date of grant and 20% on each of the next three anniversaries, and have exercise prices equal to the market price of the common units at the grant date.

As of January 1, 2006, outstanding options to purchase 15,300 common units were held by employees of Knight or KMGP Services Company, Inc. at an average exercise price of $17.82 per unit. Outstanding options to purchase 10,000 common units were held by one of our general partner's three non-employee directors at an average exercise price of $21.44 per unit. All 25,300 outstanding options were fully vested. During 2006, 4,200 options to purchase common units were cancelled or forfeited, and 21,100 options to purchase common units were exercised at an

average price of $19.67 per unit. The common units underlying these options had an average fair market value of $46.43 per unit. Accordingly, as of December 31, 2006 and 2007, there were no outstanding options.

We account for common unit options granted under our common unit option plan according to the provisions of SFAS No. 123R (revised 2004), "Share-Based Payment," which became effective for us January 1, 2006. This Statement amends SFAS No. 123, "Accounting for Stock-Based Compensation," and requires companies to expense the value of employee stock options and similar awards. According to the provisions of SFAS No. 123R, share-based payment awards result in a cost that will be measured at fair value on the awards' grant date, based on the estimated number of awards that are expected to vest. Companies will recognize compensation cost for share-based payment awards as they vest, including the related tax effects, and compensation cost for awards that vest would not be reversed if the awards expire without being exercised.

However, we have not granted common unit options or made any other share-based payment awards since May 2000, and as described above, all outstanding options to purchase our common units were fully vested as of January 1, 2006. Therefore, the adoption of this Statement did not have an effect on our consolidated financial statements due to the fact that we had reached the end of the requisite service period for any compensation cost resulting from share-based payments made under our common unit option plan.

Directors' Unit Appreciation Rights Plan

On April 1, 2003, KMR's compensation committee established our Directors' Unit Appreciation Rights Plan. Pursuant to this plan, each of KMR's three non-employee directors was eligible to receive common unit appreciation rights. Upon the exercise of unit appreciation rights, we will pay, within thirty days of the exercise date, the participant an amount of cash equal to the excess, if any, of the aggregate fair market value of the unit appreciation rights exercised as of the exercise date over the aggregate award price of the rights exercised. The fair market value of one unit appreciation right as of the exercise date will be equal to the closing price of one common unit on the New York Stock Exchange on that date. The award price of one unit appreciation right will be equal to the closing price of one common unit on the New York Stock Exchange on the date of grant. Proceeds, if any, from the exercise of a unit appreciation right granted under the plan will be payable only in cash (that is, no exercise will result in the issuance of additional common units) and will be evidenced by a unit appreciation rights agreement.

All unit appreciation rights granted vest on the six-month anniversary of the date of grant. If a unit appreciation right is not exercised in the ten year period following the date of grant, the unit appreciation right will expire and not be exercisable after the end of such period. In addition, if a participant ceases to serve on the board for any reason prior to the vesting date of a unit appreciation right, such unit appreciation right will immediately expire on the date of cessation of service and may not be exercised.

On April 1, 2003, the date of adoption of the plan, each of KMR's three non-employee directors were granted 7,500 unit appreciation rights. In addition, 10,000 unit appreciation rights were granted to each of KMR's three non-employee directors on January 21, 2004, at the first meeting of the board in 2004. During the first board meeting of 2005, the plan was terminated and replaced by the Kinder Morgan Energy Partners, L.P. Common Unit Compensation Plan for Non-Employee Directors. All unexercised awards made under our Directors' Unit Appreciation Rights Plan remain outstanding.

No unit appreciation rights were exercised during 2006. During 2007, 7,500 unit appreciation rights were exercised by one director at an aggregate fair value of $53.00 per unit. As of December 31, 2007, 45,000 unit appreciation rights had been granted, vested and remained outstanding.

Kinder Morgan Energy Partners, L.P. Common Unit Compensation Plan for Non-Employee Directors

On January 18, 2005, KMR's compensation committee established the Kinder Morgan Energy Partners, L.P. Common Unit Compensation Plan. The plan is administered by KMR's compensation committee and KMR's board has sole discretion to terminate the plan at any time. The primary purpose of this plan was to promote our interests and the interests of our unitholders by aligning the compensation of the non-employee members of the board of directors of KMR with unitholders' interests. Further, since KMR's success is dependent on its operation and management of our business and our resulting performance, the plan is expected to align the compensation of the non-employee members of the board with the interests of KMR's shareholders.

The plan recognizes that the compensation to be paid to each non-employee director is fixed by the KMR board, generally annually, and that the compensation is payable in cash. Pursuant to the plan, in lieu of receiving cash compensation, each non-employee director may elect to receive common units. Each election is made generally at or around the first board meeting in January of each calendar year and is effective for the entire calendar year. A non-employee director may make a new election each calendar year. The total number of common units authorized under this compensation plan is 100,000.

The initial election under this plan for service in 2005 was made effective January 20, 2005. The elections for 2006, 2007 and 2008 were made effective January 17, 2006, January 17, 2007 and January 16, 2008, respectively. Each annual election is evidenced by an agreement, the Common Unit Compensation Agreement, between us and each non-employee director, and this agreement contains the terms and conditions of each award. Pursuant to this agreement, all common units issued under this plan are subject to forfeiture restrictions that expire six months from the date of issuance. Until the forfeiture restrictions lapse, common units issued under the plan may not be sold, assigned, transferred, exchanged, or pledged by a non-employee director. In the event the director's service as a director of KMR is terminated prior to the lapse of the forfeiture restriction either for cause, or voluntary resignation, each director will, for no consideration, forfeit to us all common units to the extent then subject to the forfeiture restrictions. Common units with respect to which forfeiture restrictions have lapsed cease to be subject to any forfeiture restrictions, and we will provide each director a certificate representing the units as to which the forfeiture restrictions have lapsed. In addition, each non-employee director has the right to receive distributions with respect to the common units awarded to him under the plan, to vote such common units and to enjoy all other unitholder rights, including during the period prior to the lapse of the forfeiture restrictions.

The number of common units to be issued to a non-employee director electing to receive the cash compensation in the form of common units will equal the amount of such cash compensation awarded, divided by the closing price of the common units on the New York Stock Exchange on the day the cash compensation is awarded (such price, the fair market value), rounded down to the nearest 50 common units. The common units will be issuable as specified in the Common Unit Compensation Agreement. A non-employee director electing to receive the cash compensation in the form of common units will receive cash equal to the difference between (i) the cash compensation awarded to such non-employee director and (ii) the number of common units to be issued to such non-employee director multiplied by the fair market value of a common unit. This cash payment is payable in four equal installments generally around March 31, June 30, September 30 and December 31 of the calendar year in which such cash compensation is awarded.

On January 18, 2005, the date of adoption of the plan, each of KMR's three non-employee directors was awarded cash compensation of $119,750 for board service during 2005. Effective January 20, 2005, each non-employee director elected to receive compensation of $79,750 in the form of our common units and was issued 1,750 common units pursuant to the plan and its agreements (based on the $45.55 closing market price of our common units on January 18, 2005, as reported on the New York Stock Exchange). Also, consistent with the plan, the remaining $40,000 cash compensation and the $37.50 of cash compensation that did not equate to a whole common unit, based on the January 18, 2005 $45.55 closing price, was paid to each of the non-employee directors as described above. No other compensation was paid to the non-employee directors during 2005.

On January 17, 2006, each of KMR's three non-employee directors was awarded cash compensation of $160,000 for board service during 2006. Effective January 17, 2006, each non-employee director elected to receive compensation of $87,780 in the form of our common units and was issued 1,750 common units pursuant to the plan and its agreements (based on the $50.16 closing market price of our common units on January 17, 2006, as reported on the New York Stock Exchange). The remaining $72,220 cash compensation was paid to each of the non-employee directors as described above. No other compensation was paid to the non-employee directors during 2006.

On January 17, 2007, each of KMR's three non-employee directors was awarded cash compensation of $160,000 for board service during 2007. Effective January 17, 2007, each non-employee director elected to receive certain amounts of compensation in the form of our common units and each were issued common units pursuant to the plan and its agreements (based on the $48.44 closing market price of our common units on January 17, 2007, as reported on the New York Stock Exchange). Mr. Gaylord elected to receive compensation of $95,911.20 in the form of our common units and was issued 1,980 common units; Mr. Waughtal elected to receive compensation of $159,852.00 in the form of our common units and was issued 3,300 common units; and Mr. Hultquist elected to receive compensation of $96,880.00 in the form of our common units and was issued 2,000 common units. All remaining cash compensation ($64,088.80 to Mr. Gaylord; $148.00 to Mr. Waughtal; and $63,120.00 to Mr. Hultquist) was paid to each of the non-employee directors as described above, and no other compensation was paid to the non-employee directors during 2007.

On January 16, 2008, each of KMR's three non-employee directors was awarded cash compensation of $160,000 for board service during 2008; however, during a plan audit it was determined that each director was inadvertently paid an additional dividend in 2007. As a result, each director's cash compensation for service during 2008 was adjusted downward to reflect this error. The correction results in cash compensation awarded for 2008 in the amounts of $158,380.00 for Mr. Hultquist; $158,396.20 for Mr. Gaylord; and $157,327.00 for Mr. Waughtal. Effective January 16, 2008, two of the three non-employee directors elected to receive certain amounts of compensation in the form of our common units and each was issued common units pursuant to the plan and its agreements (based on the $55.81 closing market price of our common units on January 16, 2008, as reported on the New York Stock Exchange). Mr. Gaylord elected to receive compensation of $84,831.20 in the form of our common units and was issued 1,520 common units; and Mr. Waughtal elected to receive compensation of $157,272.58 in the form of our common units and was issued 2,818 common units. All remaining cash compensation ($73,565.00 to Mr. Gaylord; $54.42 to Mr. Waughtal; and $158,380.00 to Mr. Hultquist) will be paid to each of the non-employee directors as described above, and no other compensation will be paid to the non-employee directors during 2008.

14. Risk Management

Certain of our business activities expose us to risks associated with unfavorable changes in the market price of natural gas, natural gas liquids and crude oil. We also have exposure to interest rate risk as a result of the issuance of our debt obligations. Pursuant to our management's approved risk management policy, we use derivative contracts to hedge or reduce our exposure to certain of these risks, and we account for these hedging transactions according to the provisions of SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" and associated amendments, collectively, SFAS No. 133.

Energy Commodity Price Risk Management

We are exposed to risks associated with unfavorable changes in the market price of natural gas, natural gas liquids and crude oil as a result of the forecasted purchase or sale of these products. Specifically, these risks are associated with unfavorable price volatility related to (i) pre-existing or anticipated physical natural gas, natural gas liquids and crude oil sales; (ii) natural gas purchases; and (iii) natural gas system use and storage.

Given our portfolio of businesses as of December 31, 2007, our principal use of energy commodity derivative contracts was to mitigate the risk associated with market movements in the price of energy commodities. The unfavorable price changes are often caused by shifts in the supply and demand for these commodities, as well as their locations. Our energy commodity derivative contracts act as a hedging (offset) mechanism against the volatility of energy commodity prices by allowing us to transfer this price risk to counterparties who are able and willing to bear it.

Hedging effectiveness and ineffectiveness

Pursuant to SFAS No. 133, our energy commodity derivative contracts are designated as cash flow hedges and for cash flow hedges, the portion of the change in the value of derivative contracts that is effective in offsetting undesired changes in expected cash flows (the effective portion) is reported as a component of other comprehensive income (outside current earnings, net income), but only to the extent that they can later offset the undesired changes in expected cash flows during the period in which the hedged cash flows affect earnings. To the contrary, the portion of the change in the value of derivative contracts that is not effective in offsetting undesired changes in expected cash flows (the ineffective portion), as well as any component excluded from the computation of the effectiveness of the derivative contracts, is required to be recognized currently in earnings. Reflecting the portion of changes in the value of derivative contracts that were not effective in offsetting underlying changes in expected cash flows (the ineffective portion of hedges), we recognized a loss of $0.1 million during 2007, a loss of $1.3 million during 2006 and a loss of $0.6 million during 2005, respectively. These recognized losses resulting from hedge ineffectiveness are reported within the captions "Natural gas sales," "Gas purchases and other costs of sales," and "Product sales and other" in our accompanying consolidated statements of income, and for each of the years ended 2007, 2006 and 2005, we did not exclude any component of the derivative contracts' gain or loss from the assessment of hedge effectiveness.

During the years 2007, 2006 and 2005, we reclassified $433.2 million, $428.1 million and $424.0 million, respectively, of "Accumulated other comprehensive loss" into earnings. With the exception of (i) an approximate $0.1 million loss reclassified in the first quarter of 2007; and (ii) a $2.9 million loss resulting from the discontinuance of cash flow hedges related to the sale of our Douglas gathering assets in 2006 (described in Note 3), none of the reclassification of "Accumulated other comprehensive loss" into earnings during 2007, 2006 or 2005 resulted from the discontinuance of cash flow hedges due to a determination that the forecasted transactions would no longer occur by the end of the originally specified time period or within an additional two-month period of time thereafter, but rather resulted from the hedged forecasted transactions actually affecting earnings (for example, when the forecasted sales and purchases actually occurred).

Our consolidated "Accumulated other comprehensive loss" balance was $1,276.6 million as of December 31, 2007 and $866.1 million as of December 31, 2006. These consolidated totals included "Accumulated other comprehensive loss" amounts associated with the commodity price risk management activities of $1,377.2 million as of December 31, 2007 and $838.7 million as of December 31, 2006. Approximately $553.3 million of this total accumulated loss associated with our commodity price risk management activities as of December 31, 2007 is expected to be reclassified into earnings during the next twelve months (when the associated forecasted sales and purchases are also expected to occur).

Fair Value of Energy Commodity Derivative Contracts

The fair values of the energy commodity derivative contracts we use, including commodity futures and options contracts, fixed price swaps, and basis swaps are included in our accompanying consolidated balance sheets within "Other current assets," "Deferred charges and other assets," "Accrued other current liabilities," and "Other long-term liabilities and deferred credits." The following table summarizes the fair values of our energy commodity derivative contracts associated with our commodity price risk management activities and included on our accompanying consolidated balance sheets as of December 31, 2007 and December 31, 2006 (in millions):

	December 31, 2007	**December 31, 2006**
Derivatives-net asset/(liability)		
Other current assets	$ 37.0	$ 91.9
Deferred charges and other assets	4.4	12.7
Accrued other current liabilities	(593.9)	(431.4)
Other long-term liabilities and deferred credits	$ (836.8)	$ (510.2)

As of December 31, 2007, the maximum length of time over which we have hedged our exposure to the variability in future cash flows associated with commodity price risk is through December 2012.

Credit Risks

We have counterparty credit risk as a result of our use of energy commodity derivative contracts. Our over-the-counter swaps and options are contracts we entered into with counterparties outside centralized trading facilities such as a futures, options or stock exchange. These contracts are with a number of parties, all of which had investment grade credit ratings as of December 31, 2007. We both owe money and are owed money under these derivative contracts. While we enter into derivative contracts principally with investment grade counterparties and actively monitor their credit ratings, it is nevertheless possible that from time to time losses will result from counterparty credit risk in the future.

Additionally, in conjunction with the purchase of exchange-traded derivative contracts or when the market value of our derivative contracts with specific counterparties exceeds established limits, we are required to provide collateral to our counterparties, which may include posting letters of credit or placing cash in margin accounts. As of December 31, 2007 and December 31, 2006, we had three outstanding letters of credit totaling $298.0 million and $243.0 million, respectively, in support of our hedging of commodity price risks associated with the sale of natural gas, natural gas liquids and crude oil.

As of December 31, 2007, we had cash margin deposits associated with our commodity contract positions and over-the-counter swap partners totaling $67.9 million, and we reported this amount as "Restricted deposits" in our accompanying consolidated balance sheet as of December 31, 2007. As of December 31, 2006, our counterparties associated with our commodity contract positions and over-the-counter swap agreements had margin deposits with us totaling $2.3 million, and we reported this amount within "Accrued other liabilities" in our accompanying consolidated balance sheet as of December 31, 2006.

Interest Rate Risk Management

In order to maintain a cost effective capital structure, it is our policy to borrow funds using a mix of fixed rate debt and variable rate debt. We use interest rate swap agreements to manage the interest rate risk associated with the fair value of our fixed rate borrowings and to effectively convert a portion of the underlying cash flows related to our long-term fixed rate debt securities into variable rate cash flows in order to achieve our desired mix of fixed and variable rate debt.

Since the fair value of fixed rate debt varies inversely with changes in the market rate of interest, we enter into swap agreements to receive a fixed and pay a variable rate of interest in order to convert the interest expense associated with certain of our senior notes from fixed rates to floating rates, resulting in future cash flows that vary with the market rate of interest. These swaps, therefore, hedge against changes in the fair value of our fixed rate debt that result from market interest rate changes.

As of December 31, 2006, we were a party to interest rate swap agreements with notional principal amounts of $2.1 billion. In the first six months of 2007, we both entered into additional fixed-to-floating interest rate swap agreements having a combined notional principal amount of $500 million and terminated an existing fixed-to-floating interest rate swap agreement having a notional principal amount of $100 million and a maturity date of March 15, 2032. We received $15.0 million from the early termination of this swap agreement, and this amount is being amortized over the remaining term of the original swap period.

On August 15, 2007, two separate fixed-to-floating interest rate swap agreements having a combined notional principal amount of $200 million matured, and as of December 31, 2007, we had a combined notional principal amount of $2.3 billion of fixed-to-floating interest rate swap agreements effectively converting the interest expense associated with certain series of our senior notes from fixed rates to variable rates based on an interest rate of LIBOR plus a spread. The two swap agreements that matured on August 15, 2007 were associated with the $250 million of 5.35% senior notes that also matured on that date. In February 2007, we entered into additional fixed-to-floating interest rate swap agreements having a combined notional principal amount of $600 million. These swap agreements were related to the $600 million of 5.95% senior notes we issued on February 12, 2008, and have a maturity date of February 15, 2018.

All of our interest rate swap agreements have a termination date that corresponds to the maturity date of one of our series of senior notes and, as of December 31, 2007, the maximum length of time over which we have hedged a portion of our exposure to the variability in the value of this debt due to interest rate risk is through January 15, 2038. In addition, certain of our swap agreements contain mutual cash-out provisions that allow us or our counterparties to settle the agreement at certain future dates before maturity based on the then-economic value of the swap agreement.

Hedging effectiveness and ineffectiveness

Our interest rate swap contracts have been designated as fair value hedges and meet the conditions required to assume no ineffectiveness under SFAS No. 133. Therefore, we have accounted for them using the "shortcut" method prescribed by SFAS No. 133 and accordingly, we adjust the carrying value of each swap contract to its fair value each quarter, with an offsetting entry to adjust the carrying value of the debt securities whose fair value is being hedged. We record interest expense equal to the variable rate payments under the swap contracts.

Fair Value of Interest Rate Swap Agreements

The fair values of our interest rate swap agreements are included within "Deferred charges and other assets" and "Other long-term liabilities and deferred credits" in our accompanying consolidated balance sheets. The offsetting entry to adjust the carrying value of the debt securities whose fair value was being hedged is included within "Value of interest rate swaps" on our accompanying consolidated balance sheets, which also includes any unamortized portion of proceeds received from the early termination of interest rate swap agreements. As of December 31, 2007, this unamortized premium totaled $14.2 million, representing the unamortized proceeds we received from the swap agreement we terminated in the first quarter of 2007.

The following table summarizes the net fair value of our interest rate swap agreements associated with our interest rate risk management activities and included on our accompanying consolidated balance sheets as of December 31, 2007 and December 31, 2006 (in millions):

	December 31, 2007	December 31, 2006
Derivatives-net asset/(liability)		
Deferred charges and other assets	$ 138.0	$ 65.2
Other long-term liabilities and deferred credits	—	(22.6)
Net fair value of interest rate swaps	$ 138.0	$ 42.6

Furthermore, we are exposed to credit related losses in the event of nonperformance by counterparties to our interest rate swap agreements, and while we enter into derivative contracts primarily with investment grade counterparties and actively monitor their credit ratings, it is nevertheless possible that from time to time losses will result from counterparty credit risk. As of December 31, 2007, all of our interest rate swap agreements were with counterparties with investment grade credit ratings.

Other

Certain of our business activities expose us to foreign currency fluctuations. However, due to the limited size of this exposure, we do not believe the risks associated with changes in foreign currency will have a material adverse effect on our business, financial position, results of operations or cash flows. As a result, we do not significantly hedge our exposure to fluctuations in foreign currency.

15. Reportable Segments

We divide our operations into five reportable business segments:

- Products Pipelines;
- Natural Gas Pipelines;
- CO_2;
- Terminals; and
- Trans Mountain.

Each segment uses the same accounting policies as those described in the summary of significant accounting policies (see Note 2). We evaluate performance principally based on each segments' earnings before depreciation, depletion and amortization, which excludes general and administrative expenses, third-party debt costs and interest expense, unallocable interest income and income tax expense, and minority interest. Our reportable segments are strategic business units that offer different products and services. Each segment is managed separately because each segment involves different products and marketing strategies.

Our Products Pipelines segment derives its revenues primarily from the transportation and terminaling of refined petroleum products, including gasoline, diesel fuel, jet fuel and natural gas liquids. Our Natural Gas Pipelines segment derives its revenues primarily from the sale, transport, processing, treating, storage and gathering of natural gas. Our CO_2 segment derives its revenues primarily from the production and sale of crude oil from fields in the Permian Basin of West Texas and from the transportation and marketing of carbon dioxide used as a flooding medium for recovering crude oil from mature oil fields. Our Terminals segment derives its revenues primarily from the transloading and storing of refined petroleum products and dry and liquid bulk products, including coal, petroleum coke, cement, alumina, salt and other bulk chemicals. Our Trans Mountain business segment derives its revenues primarily from the transportation of crude oil and refined products from Edmonton, Alberta to marketing terminals and refineries in the Greater Vancouver area and Puget Sound in Washington State.

As discussed in Note 3, due to the sale of our North System, an approximate 1,600-mile interstate common carrier pipeline system whose operating results were included as part of our Products Pipelines business segment, we accounted for the North System business as a discontinued operation. Consistent with the management approach of identifying and reporting discrete financial information on operating segments, we have included the North System's financial results within our Products Pipelines business segment disclosures for all periods presented in this report and, as prescribed by SFAS No. 131, we have reconciled the total of our reportable segment's financial results to our consolidated financial results by separately identifying, in the following pages where applicable, the North System amounts as discontinued operations.

Financial information by segment follows (in millions):

	2007	2006	2005
Revenues

(a) Includes natural gas purchases and other costs of sales, operations and maintenance expenses, fuel and power expenses and taxes, other than income taxes.

(b) 2007 amount represents an expense of $377.1 million attributable to a goodwill impairment charge recognized by Knight, as discussed in Notes 3 and 8.

(c) Includes revenues, earnings from equity investments, allocable interest income, and other, net, less operating expenses, allocable income taxes, other expense (income), depreciation, depletion and amortization, and amortization of excess cost of equity investments.

(d) Includes unallocated interest income and income tax expense, interest and debt expense, general and administrative expenses, and minority interest expense.

(e) Includes revenues, earnings from equity investments, allocable interest income, and other, net, less operating expenses, allocable income taxes, and other expense (income).

(f) Includes sustaining capital expenditures of $152.6 million in 2007 (not including Trans Mountain for periods prior to our acquisition date of April 30, 2007), $125.5 million in 2006 (not including Trans Mountain) and $140.8 million in 2005. Sustaining capital expenditures are defined as capital expenditures which do not increase the capacity of an asset.

(g) Includes cash and cash equivalents, margin and restricted deposits, certain unallocable deferred charges, and risk management assets related to the fair value of interest rate swaps.

We do not attribute interest and debt expense to any of our reportable business segments. For each of the years ended December 31, 2007, 2006 and 2005, we reported (in millions) total consolidated interest expense of $397.1 million, $345.5 million and $268.4 million, respectively.

Our total operating revenues are derived from a wide customer base. For each of the three years ended December 31, 2007, 2006 and 2005, no revenues from transactions with a single external customer amounted to 10% or more of our total consolidated revenues.

Following is geographic information regarding the revenues and long-lived assets of our business segments (in millions):

	2007	2006	2005
Revenues from external customers			
United States	$ 8,986.3	$ 8,889.9	$ 9,715.1
Canada	211.9	139.3	11.8
Mexico and other(a)	19.5	19.5	19.0
Total consol. revenues from external customers	$ 9,217.7	$ 9,048.7	$ 9,745.9
Long-lived assets at December 31(b)			
United States	$ 11,054.3	$ 9,917.2	$ 9,442.8
Canada	1,420.0	766.4	48.2
Mexico and other	89.5	91.4	92.3
Total consolidated long-lived assets	$ 12,563.8	$ 10,775.0	$ 9,583.3

(a) Includes operations in Mexico and the Netherlands.

(b) Long-lived assets exclude (i) goodwill; (ii) other intangibles, net; and (iii) long-term note receivables from related parties.

16. Litigation, Environmental and Other Contingencies

Below is a brief description of our ongoing material legal proceedings, including any material developments that occurred in such proceedings during 2007. This note also contains a description of any material legal proceeding initiated during 2007 in which we are involved.

Federal Energy Regulatory Commission Proceedings

Our SFPP, L.P. and CALNEV Pipe Line LLC subsidiaries are involved in proceedings before the Federal Energy Regulatory Commission. SFPP is the subsidiary limited partnership that owns our Pacific operations. CALNEV Pipe Line LLC and related terminals was acquired from GATX Corporation and is not part of the Pacific Operations. The tariffs and rates charged by SFPP and CALNEV are subject to numerous ongoing proceedings at the Federal Energy Regulatory Commission, referred to in this report as the FERC, including shippers' complaints and protests regarding interstate rates on these pipeline systems. In general, these complaints allege the rates and tariffs charged by SFPP and CALNEV are not just and reasonable.

As to SFPP, the issues involved in these proceedings include, among others: (i) whether certain of our Pacific operations' rates are "grandfathered" under the Energy Policy Act of 1992, referred to in this note as EPAct 1992, and therefore deemed to be just and reasonable; (ii) whether "substantially changed circumstances" have occurred with respect to any grandfathered rates such that those rates could be challenged; (iii) whether indexed rate increases may become effective without investigation; (iv) the capital structure to be used in computing the "starting rate base" of our Pacific operations; (v) the level of income tax allowance we may include in our rates; and (vi) the recovery of civil and regulatory litigation expenses and certain pipeline reconditioning and environmental costs incurred by our Pacific operations.

In May 2005, the FERC issued a statement of general policy stating it will permit pipelines to include in cost of service a tax allowance to reflect actual or potential tax liability on their public utility income attributable to all partnership or limited liability company interests, if the ultimate owner of the interest has an actual or potential income tax liability on such income. Whether a pipeline's owners have such actual or potential income tax liability will be reviewed by the FERC on a case-by-case basis. Although the new policy is generally favorable for pipelines that are organized as pass-through entities, it still entails rate risk due to the case-by-case review requirement. The new tax allowance policy and the FERC's application of that policy to our Pacific operations were appealed to the United States Court of Appeals for the District of Columbia Circuit, referred to in this note as the D.C. Court.

On May 29, 2007, the D.C. Court issued an opinion upholding the FERC's tax allowance policy. Because the extent to which an interstate oil pipeline is entitled to an income tax allowance is subject to a case-by-case review at the FERC, the level of income tax allowance to which SFPP will ultimately be entitled is not certain. The D.C. Court's May 29 decision also upheld the FERC's determination that a rate is no longer subject to grandfathering protection under EPAct 1992 when there has been a substantial change in the overall rate of return of the pipeline, rather than in one cost element. Further, the D.C. Court declined to consider arguments that there were errors in the FERC's method for determining substantial change, finding that the parties had not first raised such allegations with the FERC. On July 13, 2007, SFPP filed a petition for rehearing with the D.C. Court, arguing that SFPP did raise allegations with the FERC respecting these calculation errors. The D.C. Circuit denied rehearing of the May 29, 2007 decision on August 20, 2007, and the decision is now final.

In this note, we refer to SFPP, L.P. as SFPP; CALNEV Pipe Line LLC as Calnev; Chevron Products Company as Chevron; Navajo Refining Company, L.P. as Navajo; ARCO Products Company as ARCO; BP West Coast Products, LLC as BP WCP; Texaco Refining and Marketing Inc. as Texaco; Western Refining Company, L.P. as Western Refining; Mobil Oil Corporation as Mobil; ExxonMobil Oil Corporation as ExxonMobil; Tosco Corporation as Tosco; ConocoPhillips Company as ConocoPhillips; Ultramar Diamond Shamrock Corporation as Ultramar; Valero Energy Corporation as Valero; Valero Marketing and Supply Company as Valero Marketing; and America West Airlines, Inc., Continental Airlines, Inc., Northwest Airlines, Inc., Southwest Airlines Co. and US Airways, Inc., collectively, as the Airline Complainants.

Following is a listing of certain active FERC proceedings pertaining to our Pacific operations:

- FERC Docket No. OR92-8, *et al.*—Complainants/Protestants: Chevron; Navajo; ARCO; BP WCP; Western Refining; ExxonMobil; Tosco; and Texaco (Ultramar is an intervenor)—Defendant: SFPP Consolidated proceeding involving shipper complaints against certain East Line and West Line rates. All five issues (and others) described four paragraphs above are involved in these proceedings. Portions of this proceeding were appealed (and re-appealed) to the D.C. Court and remanded to the FERC. BP WCP, Chevron, and ExxonMobil requested a hearing before the FERC on remanded grandfathering and income tax allowance issues. The FERC issued an Order on Rehearing, Remand, Compliance, and Tariff Filings on December 26, 2007, which denied the requests for a hearing, affirmed the income tax allowance policy and further clarified the implementation of that policy, and required SFPP to file a compliance filing;

- FERC Docket Nos. OR92-8-028, *et al.*—Complainants/Protestants: BP WCP; ExxonMobil; Chevron; ConocoPhillips; and Ultramar—Defendant: SFPP
  Proceeding involving shipper complaints against SFPP's Watson Station rates. A settlement was reached for April 1, 1999 forward; whether SFPP owes reparations for shipments prior to that date is still before the FERC;

- FERC Docket No. OR96-2, *et al.*—Complainants/Protestants: All Shippers except Chevron (which is an intervenor)—Defendant: SFPP Consolidated proceeding involving shipper complaints against all SFPP rates. All five issues (and others) described four paragraphs above are involved in these proceedings. Portions of this proceeding were appealed (and re-appealed) to the D.C. Court and remanded to the FERC. The FERC issued an Order on Rehearing, Remand, Compliance, and Tariff Filings on December 26, 2007, which denied the requests for a hearing, affirmed the income tax allowance policy and further clarified the implementation of that policy, and required SFPP to file a compliance filing;

- FERC Docket Nos. OR02-4 and OR03-5—Complainant/Protestant: Chevron—Defendant: SFPP
  Chevron initiated proceeding to permit Chevron to become complainant in OR96-2. Appealed to the D.C. Court and held in abeyance pending final disposition of the OR96-2 proceedings;

- FERC Docket No. OR04-3—Complainants/Protestants: America West Airlines; Southwest Airlines; Northwest Airlines; and Continental Airlines—Defendant: SFPP
  Complaint alleges that West Line and Watson Station rates are unjust and unreasonable. Watson Station issues severed and consolidated into a proceeding focused only on Watson-related issues. The FERC has set the complaints against the West Line rates for hearing but denied the request to consolidate the dockets with the ongoing proceedings involving SFPP's North and Oregon Line rates;

- FERC Docket Nos. OR03-5, OR05-4 and OR05-5—Complainants/Protestants: BP WCP; ExxonMobil; and ConocoPhillips (other shippers intervened)—Defendant: SFPP
  Complaints allege that SFPP's interstate rates are not just and reasonable. The FERC has set the complaints against the West and East Line rates for hearing, but denied the request to consolidate the dockets with the ongoing proceedings involving SFPP's North and Oregon Line rates;

- FERC Docket No. OR03-5-001—Complainants/Protestants: BP WCP; ExxonMobil; and ConocoPhillips (other shippers intervened)—Defendant: SFPP
  The FERC severed the portions of the complaints in Docket Nos. OR03-5, OR05-4, and OR05-5 regarding SFPP's North and Oregon Line rates into a separate proceeding in Docket No. OR03-5-001, which has been set for hearing;

- FERC Docket No. OR07-1—Complainant/Protestant: Tesoro—Defendant: SFPP
  Complaint alleges that SFPP's North Line rates are not just and reasonable. Complaint held in abeyance pending resolution at the D.C. Court of, among other things, income tax allowance and grandfathering issues. The D.C. Court issued an opinion on these issues on May 29, 2007, upholding the FERC's income tax allowance policy;

- FERC Docket No. OR07-2—Complainant/Protestant: Tesoro—Defendant: SFPP
  Complaint alleges that SFPP's West Line rates are not just and reasonable. Complaint held in abeyance pending resolution at the D.C. Court of, among other things, income tax allowance and grandfathering issues. The D.C. Court issued an opinion on these issues on May 29, 2007, upholding the FERC's income tax allowance policy. A request that the FERC set the complaint for hearing – which SFPP opposed – is pending before the FERC;

- FERC Docket No. OR07-3—Complainants/Protestants: BP WCP; Chevron; ExxonMobil; Tesoro; and Valero Marketing—Defendant: SFPP
  Complaint alleges that SFPP's North Line indexed rate increase was not just and reasonable. The FERC has dismissed the complaint and denied rehearing the dismissal. Petitions for review filed by BP WCP and ExxonMobil at the D.C. Court;

- FERC Docket No. OR07-4—Complainants/Protestants: BP WCP; Chevron; and ExxonMobil—Defendants: SFPP; Kinder Morgan G.P., Inc.; and Knight Inc.
  Complaint alleges that SFPP's rates are not just and reasonable. Complaint held in abeyance pending resolution at the D.C. Court of, among other things, income tax allowance and grandfathering issues. The D.C. Court issued an opinion on these issues on May 29, 2007, upholding the FERC's income tax allowance policy;

- FERC Docket Nos. OR07-5 and OR07-7 (consolidated)—Complainants/Protestants: ExxonMobil and Tesoro—Defendants: Calnev; Kinder Morgan G.P., Inc.; and Knight Inc.
  Complaints allege that none of Calnev's current rates are just or reasonable. In light of the D.C. Court's May 29, 2007 ruling, on July 19, 2007, the FERC, among other things, dismissed with prejudice the complaints against Kinder Morgan GP Inc. and Knight, Inc. and allowed complainants to file amended complaints. ExxonMobil filed a request for rehearing of the dismissal of the complaints against Kinder Morgan GP, Inc. and Knight Inc., which is currently pending before the FERC. The FERC has not acted on the amended complaints;

- FERC Docket No. OR07-6—Complainant/Protestant: ConocoPhillips—Defendant: SFPP
  Complaint alleges that SFPP's North Line indexed rate increase was not just and reasonable. The FERC has dismissed the complaint and denied rehearing of the dismissal. The FERC had consolidated this case with OR07-3 and issued orders that applied to both OR07-3 and OR07-6. Although the FERC orders in these dockets have been appealed by certain of the complainants in OR07-3, they have not been appealed by ConocoPhillips in OR07-6;

- FERC Docket No. OR07-8 (consolidated with Docket No. OR07-11)—Complainant/Protestant: BP WCP—Defendant: SFPP
  Complaint alleges that SFPP's 2005 indexed rate increase was not just and reasonable. On June 6, 2007, the FERC dismissed challenges to SFPP's underlying rate but held in abeyance the portion of the Complaint addressing SFPP's July 1, 2005 index-based rate increases. SFPP requested rehearing on July 6, 2007, which the FERC denied. On February 13, 2008, the FERC set this complaint for hearing, but referred it to settlement negotiations;

- FERC Docket No. OR07-9—Complainant/Protestant: BP WCP—Defendant: SFPP
  Complaint alleges that SFPP's ultra low sulphur diesel (ULSD) recovery fee violates the filed rate doctrine and that, in any event, the recovery fee is unjust and unreasonable. On July 6, 2007, the FERC dismissed the complaint. BP WCP requested rehearing, which the FERC denied. A petition for review was filed by BP WCP. The FERC's motion to dismiss or hold the case in abeyance is pending;

- FERC Docket No. OR07-10—Complainants/Protestants: BP WCP; ConocoPhillips; Valero; and ExxonMobil—Defendant: Calnev
  Calnev filed a petition with the FERC on May 14, 2007, requesting that the FERC issue a declaratory order approving Calnev's proposed rate methodology and granting other relief with respect to a substantial proposed expansion of Calnev's mainline pipeline system. On July 20, 2007, the FERC granted Calnev's petition for declaratory order;

- FERC Docket No. OR07-11 (consolidated with Docket No. OR07-8)—Complainant/Protestant: ExxonMobil—Defendant: SFPP
Complaint alleges that SFPP's 2005 indexed rate increase was not just and reasonable. On February 13, 2008, the FERC set this complaint for hearing, but referred it to settlement negotiations. It is consolidated with the complaint in Docket No. OR07-8;

- FERC Docket No. OR07-14—Complainants/Protestants: BP WCP and Chevron—Defendants: SFPP; Calnev; Operating Limited Partnership "D"; Kinder Morgan Energy Partners, L.P.; Kinder Morgan Management LLC; Kinder Morgan General Partner, Inc.; Knight Inc.; and Knight Holdco, LLC Complaint alleges violations of the Interstate Commerce Act and FERC's cash management regulations, seeks review of the FERC Form 6 annual reports of SFPP and Calnev, and again requests interim refunds and reparations. The FERC dismissed the complaints;

- FERC Docket No. OR07-16—Complainant/Protestant: Tesoro—Defendant: Calnev
Complaint challenges Calnev's 2005, 2006, and 2007 indexing adjustments. The FERC dismissed the complaint. A petition for review was filed by Tesoro. A scheduling order for briefs and oral argument has not yet been issued by the D.C. Court;

- FERC Docket No. OR07-18—Complainants/Protestants: Airline Complainants; Chevron; and Valero Marketing—Defendant: Calnev
Complaint alleges that Calnev's rates are unjust and unreasonable and that none of Calnev's rates are grandfathered under EPAct 1992. In December 2007, the FERC issued an order accepting and holding in abeyance the portion of the complaint against the non-grandfathered portion of Calnev's rates. The order also gave complainants 45 days to amend their complaint against the grandfathered portion of Calnev's rates in light of clarifications provided in the FERC's order;

- FERC Docket No. OR07-19—Complainant/Protestant: ConocoPhillips—Defendant: Calnev
Complaint alleges that Calnev's rates are unjust and unreasonable and that none of Calnev's rates are grandfathered under EPAct 1992. In December 2007, the FERC issued an order accepting and holding in abeyance the portion of the complaint against the non-grandfathered portion of Calnev's rates. The order also gave complainants 45 days to amend their complaint against the grandfathered portion of Calnev's rates in light of clarifications provided in the FERC's order;

- FERC Docket No. OR07-20—Complainant/Protestant: BP WCP—Defendant: SFPP
Complaint alleges that SFPP's 2007 indexed rate increase was not just and reasonable. In December 2007, the FERC dismissed the complaint. Complainant filed a request for rehearing which is currently pending before the FERC. In February 2008, the FERC accepted a joint offer of settlement that dismisses, with prejudice, the East Line index rate portion of the complaint in OR07-20;

- FERC Docket No. OR07-22—Complainant/Protestant: BP WCP—Defendant: Calnev
Complaint alleges that Calnev's rates are unjust and unreasonable and that none of Calnev's rates are grandfathered under EPAct 1992. In December 2007, the FERC issued an order giving complainant 45 days to amend its complaint in light of guidance provided by the FERC;

- FERC Docket No. IS05-230 (North Line rate case)—Complainants/Protestants: Shippers—Defendant: SFPP
SFPP filed to increase North Line rates to reflect increased costs due to installation of new pipe between Concord and Sacramento, California. Various shippers protested. Administrative law judge decision pending before the FERC on exceptions. On August 31, 2007, BP WCP and ExxonMobil filed a motion to reopen the record on the issue of SFPP's appropriate rate of return on equity, which SFPP answered on September 18, 2007. The FERC has yet to issue an order on shipper's motion;

- FERC Docket No. IS05-327—Complainants/Protestants: Shippers—Defendant: SFPP
SFPP filed to increase certain rates on its pipelines pursuant to FERC's indexing methodology. Various shippers protested, but FERC determined that the tariff filings were consistent with its regulations. The D.C. Court dismissed a petition for review, citing a lack of jurisdiction to review a decision by FERC not to order an investigation;

- FERC Docket No. IS06-283 (East Line rate case)—Complainants/Protestants: Shippers—Defendant: SFPP
SFPP filed to increase East Line rates to reflect increased costs due to installation of new pipe between El Paso, Texas and Tucson, Arizona. Various shippers protested. In November 2007, the parties submitted a joint offer of settlement which was certified to the FERC in December 2007. In February 2008, the FERC accepted the joint offer of settlement which, among other things, resolved all protests and complaints related to the East Line Phase I Expansion Tariff;

- FERC Docket No. IS06-296—Complainant/Protestant: ExxonMobil—Defendant: Calnev
Calnev sought to increase its interstate rates pursuant to the FERC's indexing methodology. ExxonMobil filed a protest respecting Calnev's indexing adjustments. This proceeding is currently held in abeyance pending ongoing settlement discussions. Calnev has also filed a motion to dismiss or, to hold the investigation in abeyance, which is pending before the FERC. Calnev and ExxonMobil have reached an agreement in principle to settle this and other dockets;

- FERC Docket No. IS06-356—Complainants/Protestants: Shippers—Defendant: SFPP
SFPP filed to increase certain rates on its pipelines pursuant to FERC's indexing methodology. Various shippers protested, but FERC found the tariff filings consistent with its regulations. FERC has rescinded the index increase for the East Line rates, and SFPP has requested rehearing. The D.C. Court dismissed a petition for review, citing the rehearing request pending before the FERC. On September 20, 2007, the FERC denied SFPP's request for rehearing. In November 2007, all parties submitted a joint offer of settlement. In February 2008, the FERC accepted the joint offer of settlement which, among other things, resolved all protests and complaints related to the East Line 2006 Index Tariff;

- FERC Docket No. IS07-137 (ULSD surcharge)—Complainants/Protestants: Shippers—Defendant: SFPP SFPP filed tariffs to include a per barrel ULSD recovery fee and a surcharge for ULSD-related litigation costs on diesel products. Various shippers protested. Tariffs related to ULSD recovery fee accepted subject to refund and proceeding is being held in abeyance pending resolution of other proceedings involving SFPP. SFPP rescinded the ULSD litigation surcharge in compliance with FERC order. Request for rehearing filed by Chevron and Tesoro. The FERC ultimately denied rehearing in an order issued on November 13, 2007;

- FERC Docket No. IS07-229—Complainants/Protestants: BP WCP and ExxonMobil—Defendant: SFPP SFPP filed to increase certain rates on its pipelines pursuant to FERC's indexing methodology. Two shippers filed protests. The FERC found the tariff filings consistent with its regulations but suspended the increased rates subject to refund pending challenges to SFPP's underlying rates. In November 2007, all parties submitted a joint offer of settlement. In February 2008, the FERC accepted the joint offer of settlement which, among other things, resolved all protests and complaints related to the East Line 2007 Index Tariff;

- FERC Docket No. IS07-234—Complainants/Protestants: BP WCP and ExxonMobil—Defendant: Calnev Calnev filed to increase certain rates on its pipeline pursuant to FERC's indexing methodology. Two shippers protested. The FERC found the tariff filings consistent with its regulations but suspended the increased rates subject to refund pending challenges to SFPP's underlying rates. Calnev and ExxonMobil have reached an agreement in principle to settle this and other dockets;

- FERC Docket No. IS08-28—Complainants/Protestants: ConocoPhillips; Chevron; BP WCP; ExxonMobil; Southwest Airlines; Western; and Valero—Defendant: SFPP
SFPP filed to increase its East Line rates based on costs incurred related to an expansion. Various shippers filed protests, which SFPP answered. The FERC issued an order on November 29, 2007 accepting and suspending the tariff subject to refund. The proceeding is being held in abeyance pursuant to ongoing settlement negotiations; and

- Motions to compel payment of interim damages (various dockets)—Complainants/Protestants: Shippers—Defendants: SFPP; Kinder Morgan G.P., Inc.; and Knight Inc.
Motions seek payment of interim refunds or escrow of funds pending resolution of various complaints and protests involving SFPP. The FERC denied shippers' refund requests in an order issued on December 26, 2007 in Docket Nos. OR92-8, *et al*.

In 2003, we made aggregate payments of $44.9 million for reparations and refunds pursuant to a FERC order related to Docket Nos. OR92-8, *et al*. In December 2005, SFPP received a FERC order in OR92-8 and OR96-2 that directed it to submit compliance filings and revised tariffs. In accordance with the FERC's December 2005 order and its February 2006 order on rehearing, SFPP submitted a compliance filing to the FERC in March 2006, and rate reductions were implemented on May 1, 2006. We estimate the impact of the rate reductions in 2007 was approximately $25 million, and we estimate that the actual, partial year impact on 2006 distributable cash flow was approximately $15.7 million. In addition, in December 2005, we recorded accruals of $105.0 million for expenses attributable to an increase in our reserves related to our rate case liability.

In December 2007, as a follow-up to the March 2006 compliance filing, SFPP received a FERC order that directed us to submit revised compliance filings and revised tariffs. In conjunction with this order, our other FERC and CPUC rate cases, and other unrelated litigation matters, we increased our litigation reserves by $140.0 million in the fourth quarter of 2007. We assume that, with respect to our SFPP litigation reserves, any additional reparations and accrued interest thereon will be paid no earlier than the fourth quarter of 2008. We expect to file the revised compliance filings on February 26, 2008, and to implement new rates on March 1, 2008. We estimate that the impact of the new rates on our 2008 budget will be less than $3.0 million.

In general, if the shippers are successful in proving their claims, they are entitled to reparations or refunds of any excess tariffs or rates paid during the two year period prior to the filing of their complaint, and our Pacific operations may be required to reduce the amount of its tariffs or rates for particular services. These proceedings tend to be protracted, with decisions of the FERC often appealed to the federal courts. Based on our review of these FERC proceedings, we estimate that shippers are seeking approximately $290 million in reparation and refund payments and approximately $45 million in additional annual rate reductions.

California Public Utilities Commission Proceedings

On April 7, 1997, ARCO, Mobil and Texaco filed a complaint against SFPP with the California Public Utilities Commission, referred to in this note as the CPUC. The complaint challenges rates charged by SFPP for intrastate transportation of refined petroleum products through its pipeline system in the state of California and requests prospective rate adjustments.

In October 2002, the CPUC issued a resolution, referred to in this note as the Power Surcharge Resolution, approving a 2001 request by SFPP to raise its California rates to reflect increased power costs. The resolution approving the requested rate increase also required SFPP to submit cost data for 2001, 2002, and 2003, and to assist the CPUC in determining whether SFPP's overall rates for California intrastate transportation services are reasonable. The resolution reserves the right to require refunds, from the date of issuance of the resolution, to the extent the CPUC's analysis of cost data to be submitted by SFPP demonstrates that SFPP's California jurisdictional rates are unreasonable in any fashion.

On December 26, 2006, Tesoro filed a complaint challenging the reasonableness of SFPP's intrastate rates for the three-year period from December 2003 through December 2006 and requesting approximately $8 million in reparations. As a result of previous SFPP rate filings and related protests, the rates that are the subject of the Tesoro complaint are being collected subject to refund.

SFPP also has various, pending ratemaking matters before the CPUC that are unrelated to the above-referenced complaints and the Power Surcharge Resolution. Protests to these rate increase applications have been filed by various shippers. As a consequence of the protests, the related rate increases are being collected subject to refund.

All of the above matters have been consolidated and assigned to a single administrative law judge. At the time of this report, it is unknown when a decision from the CPUC regarding the CPUC complaints and the Power Surcharge Resolution will be received. No schedule has been established for hearing and resolution of the consolidated proceedings other than the 1997 CPUC complaint and the Power Surcharge Resolution. Based on our review of these CPUC proceedings, we estimate that shippers are seeking approximately $100 million in reparation and refund payments and approximately $35 million in annual rate reductions.

Carbon Dioxide Litigation

Shores and First State Bank of Denton Lawsuits

Kinder Morgan CO_2 Company, L.P. (referred to in this note as Kinder Morgan CO_2), Kinder Morgan G.P., Inc., and Cortez Pipeline Company were among the named defendants in Shores, et al. v. Mobil Oil Corp., et al., No. GC-99-01184 (Statutory Probate Court, Denton County, Texas filed December 22, 1999) and First State Bank of Denton, et al. v. Mobil Oil Corp., et al., No. 8552-01 (Statutory Probate Court, Denton County, Texas filed March 29, 2001). These cases were originally filed as class actions on behalf of classes of overriding royalty interest owners (Shores) and royalty interest owners (Bank of Denton) for damages relating to alleged underpayment of royalties on carbon dioxide produced from the McElmo Dome Unit. On February 22, 2005, the trial judge dismissed both cases for lack of jurisdiction. Some of the individual plaintiffs in these cases re-filed their claims in new lawsuits (discussed below).

Armor/Reddy Lawsuit

On May 13, 2004, William Armor filed a case alleging the same claims for underpayment of royalties on carbon dioxide produced from the McElmo Dome Unit against Kinder Morgan CO_2, Kinder Morgan G.P., Inc., and Cortez Pipeline Company among others. *Armor v. Shell Oil Company, et al,* No. 04-03559 (14th Judicial District Court, Dallas County, Texas filed May 13, 2004).

On May 20, 2005, Josephine Orr Reddy and Eastwood Capital, Ltd. filed a case in Dallas state district court alleging the same claims for underpayment of royalties. *Reddy and Eastwood Capital, Ltd. v. Shell Oil Company, et al.*, No. 05-5021 (193rd Judicial District Court, Dallas County, Texas filed May 20, 2005). The defendants included Kinder Morgan CO_2 and Kinder Morgan Energy Partners, L.P. On June 23, 2005, the plaintiff in the Armor lawsuit filed a motion to transfer and consolidate the Reddy lawsuit with the Armor lawsuit. On June 28, 2005, the court in the Armor lawsuit ordered that the Reddy lawsuit be transferred and consolidated into the Armor lawsuit.

Effective March 5, 2007, the parties executed a final settlement agreement which providesfor the dismissal of the lawsuit and the plaintiffs' claims with prejudice to being refiled. On June 12, 2007, the Dallas state district court signed its order dismissing the case and all claims with prejudice.

Gerald O. Bailey et al. v. Shell Oil Co. et al/Southern District of Texas Lawsuit

Kinder Morgan CO_2, Kinder Morgan Energy Partners, L.P. and Cortez Pipeline Company are among the defendants in a proceeding in the federal courts for the southern district of Texas. *Gerald O. Bailey et al. v. Shell Oil Company et al.*, (Civil Action Nos. 05-1029 and 05-1829 in the U.S. District Court for the Southern District of Texas—consolidated by Order dated July 18, 2005). The plaintiffs are asserting claims for the underpayment of royalties on carbon dioxide produced from the McElmo Dome unit. The plaintiffs assert claims for fraud/fraudulent inducement, real estate fraud, negligent misrepresentation, breach of fiduciary and agency duties, breach of contract and covenants, violation of the Colorado Unfair Practices Act, civil theft under Colorado law, conspiracy, unjust enrichment, and open account. Plaintiffs Gerald O. Bailey, Harry Ptasynski, and W.L. Gray & Co. have also asserted claims as private relators under the False Claims Act and for violation of federal and Colorado antitrust laws. The plaintiffs seek actual damages, treble damages, punitive damages, a constructive trust and accounting, and declaratory relief. The defendants have filed motions for summary judgment on all claims. No trial date has been set.

Effective March 5, 2007, all defendants and plaintiffs Bridwell Oil Company, the Alicia Bowdle Trust, and the Estate of Margaret Bridwell Bowdle executed a final settlement agreement which provides for the dismissal of these plaintiffs' claims with prejudice to being refiled. On June 10, 2007, the Houston federal district court entered an order of partial dismissal by which the claims by and against the settling plaintiffs were dismissed with prejudice. The claims asserted by Bailey, Ptasynski, and Gray are not included within the settlement or the order of partial dismissal.

Ptasynski Colorado Federal District Court Lawsuit

On April 7, 2006, Harry Ptasynski, one of the plaintiffs in the Bailey action discussed above, filed suit against Kinder Morgan G.P., Inc. in Colorado federal district court. Harry Ptasynski v. Kinder Morgan G.P., Inc., No. 06-CV-00651 (LTB) (U.S. District Court for the District of Colorado). Ptasynski, who holds an overriding royalty interest at McElmo Dome, asserted claims for civil conspiracy, violation of the Colorado Organized Crime Control Act, violation of Colorado antitrust laws, violation of the Colorado Unfair Practices Act, breach of fiduciary duty and confidential relationship, violation of the Colorado Payment of Proceeds Act, fraudulent concealment, breach of contract and implied duties to market and good faith and fair dealing, and civil theft and conversion. Ptasynski sought actual damages, treble damages, forfeiture, disgorgement, and declaratory and injunctive relief. The Colorado court transferred the case to Houston federal district court, and Ptasynski voluntarily dismissed the case on May 19, 2006. Ptasynski also filed an appeal in the Tenth Circuit seeking to overturn the Colorado court's order transferring the case to Houston federal district court. Harry Ptasynski v. Kinder Morgan G.P., Inc., No. 06-1231 (10th Cir.). Briefing in the appeal was completed on November 27, 2006. On April 4, 2007, the Tenth Circuit Court of Appeals dismissed the appeal as moot in light of Ptasynksi's voluntary dismissal of the case.

Bridwell Oil Company Wichita County Lawsuit

On March 1, 2004, Bridwell Oil Company, one of the named plaintiffs in the above described Bailey action, filed a new matter in which it asserted claims that are virtually identical to the claims it asserted in the Bailey lawsuit. Bridwell Oil Co. v. Shell Oil Co. et al., No. 160,199-B (78th Judicial District Court, Wichita County, Texas filed March 1, 2004). The defendants in this action include, among others, Kinder Morgan CO_2, Kinder Morgan Energy Partners, L.P., and Cortez Pipeline Company. This case was abated pending resolution of the Bailey action discussed above.

Effective March 5, 2007, the parties executed a final settlement agreement which provides for the dismissal of the lawsuit and the plaintiffs' claims with prejudice to being refiled. On June 14, 2007, the Wichita County state district court signed its order dismissing the case and all claims with prejudice.

CO_2 Claims Arbitration

Cortez Pipeline Company and Kinder Morgan CO_2, successor to Shell CO_2 Company, Ltd., were among the named defendants in CO_2 Committee, Inc. v. Shell Oil Co., et al., an arbitration initiated on November 28, 2005. The arbitration arose from a dispute over a class action settlement agreement which became final on July 7, 2003 and disposed of five lawsuits formerly pending in the U.S. District Court, District of Colorado. The plaintiffs in such lawsuits primarily included overriding royalty interest owners, royalty interest owners, and small share working interest owners who alleged underpayment of royalties and other payments on carbon dioxide produced from the McElmo Dome Unit. The settlement imposed certain future obligations on the defendants in the underlying litigation. The plaintiff in the arbitration is an entity that was formed as part of the settlement for the purpose of monitoring compliance with the obligations imposed by the settlement agreement. The plaintiff alleged that, in calculating royalty and other payments, defendants used a transportation expense in excess of what is allowed by the settlement agreement, thereby causing alleged underpayments of approximately $12 million. The plaintiff also alleged that Cortez Pipeline Company should have used certain funds to further reduce its debt, which, in turn, would have allegedly increased the value of royalty and other payments by approximately $0.5 million. Defendants denied that there was any breach of the settlement agreement. On August 7, 2006, the arbitration panel issued its opinion finding that defendants did not breach the settlement agreement. On October 25, 2006, the defendants filed an application to confirm the arbitration decision in New Mexico federal district court. On June 21, 2007, the New Mexico federal district court entered final judgment confirming the August 7, 2006 arbitration decision.

On October 2, 2007, the plaintiff initiated a second arbitration (CO_2 Committee, Inc. v. Shell CO_2 Company, Ltd., aka Kinder Morgan CO_2Company, L.P., et al.) against Cortez Pipeline Company, Kinder Morgan CO_2 and a Mobil entity. The second arbitration asserts claims similar to those asserted in the first arbitration. On October 11, 2007, the defendants filed a Complaint for Declaratory Judgment and Injunctive Relief in federal district court in New Mexico. The Complaint seeks dismissal of the second arbitration on the basis of res judicata. In November 2007, the plaintiff in the arbitration moved to dismiss the defendants' Complaint on the grounds that the issues presented should be decided by a panel in a second arbitration. In December 2007, the defendants in the arbitration filed a motion seeking summary judgment on their Complaint and dismissal of the second arbitration. No hearing date has been set.

MMS Notice of Noncompliance and Civil Penalty

On December 20, 2006, Kinder Morgan CO_2 received a "Notice of Noncompliance and Civil Penalty: Knowing or Willful Submission of False, Inaccurate, or Misleading Information—Kinder Morgan CO_2 Company, L.P., Case No. CP07-001" from the U.S. Department of the Interior, Minerals Management Service. This Notice, and the MMS' position that Kinder Morgan CO_2 has violated certain reporting obligations, relates to a disagreement between the MMS and Kinder Morgan CO_2 concerning the approved transportation allowance to be used in valuing McElmo Dome carbon dioxide for purposes of calculating federal royalties. The Notice of Noncompliance and Civil Penalty assesses a civil penalty of approximately $2.2 million as of December 15, 2006 (based on a penalty of $500.00 per day for each of 17 alleged violations) for Kinder Morgan CO_2's alleged submission of false, inaccurate, or misleading information relating to the transportation allowance, and federal royalties for CO_2 produced at McElmo Dome, during the period from June 2005 through October 2006. The MMS contends that false, inaccurate, or misleading information was submitted in the 17 monthly Form 2014s containing remittance advice reflecting the royalty payments for the referenced period because they reflected Kinder Morgan CO_2's use of the Cortez Pipeline tariff as the transportation allowance. The MMS claims that the Cortez Pipeline tariff is not the proper transportation allowance and that Kinder Morgan CO_2 should have used its "reasonable actual costs" calculated in accordance with certain federal product valuation regulations as amended effective June 1, 2005. The MMS stated that civil penalties will continue to accrue at the same rate until the alleged violations are corrected.

The MMS set a due date of January 20, 2007 for Kinder Morgan CO_2's payment of the approximately $2.2 million in civil penalties, with interest to accrue daily on that amount in the event payment is not made by such date. Kinder Morgan CO_2has not paid the penalty. On January 2, 2007, Kinder Morgan CO_2 submitted a response to the Notice of Noncompliance and Civil Penalty challenging the assessment in the Office of Hearings and Appeals of the Department of the Interior. On February 1, 2007, Kinder Morgan CO_2 filed a petition to stay the accrual of penalties until the dispute is resolved. On February 22, 2007, an administrative law judge of the U.S. Department of the Interior issued an order denying Kinder Morgan CO_2's petition to stay the accrual of penalties. A hearing on the Notice of Noncompliance and Civil Penalty was originally set for December 10, 2007. In November 2007, the MMS and Kinder Morgan CO_2 filed a joint motion to vacate the hearing date and stay the accrual of additional penalties to allow the parties to discuss settlement. In November 2007, the administrative law judge granted the joint motion, stayed accrual of additional penalties for the period from November 6, 2007 to February 18, 2008, and reset the hearing date to March 24, 2008. The parties conducted settlement conferences on February 4, 2008 and February 12, 2008.

Kinder Morgan CO_2 disputes the Notice of Noncompliance and Civil Penalty and believes that it has meritorious defenses. Kinder Morgan CO_2 contends that use of the Cortez pipeline tariff as the transportation allowance for purposes of calculating federal royalties was approved by the MMS in 1984. This approval was later affirmed as open-ended by the Interior Board of Land Appeals in the 1990s. Accordingly, Kinder Morgan CO_2 has stated to the MMS that its use of the Cortez tariff as the approved federal transportation allowance is authorized and proper. Kinder Morgan CO_2 also disputes the allegation that it has knowingly or willfully submitted false, inaccurate, or misleading information to the MMS. Kinder MorganCO_2's use of the Cortez Pipeline tariff as the approved federal transportation allowance has been the subject of extensive discussion between the parties. The MMS was, and is, fully apprised of that fact and of the royalty valuation and payment process followed by Kinder Morgan CO_2 generally.

MMS Order to Report and Pay

On March 20, 2007, Kinder Morgan CO_2 received an "Order to Report and Pay" from the Minerals Management Service. The MMS contends that Kinder Morgan CO*2* has over-reported transportation allowances and underpaid royalties in the amount of approximately $4.6 million for the period from January 1, 2005 through December 31, 2006 as a result of its use of the Cortez pipeline tariff as the transportation allowance in calculating federal royalties. As noted in the discussion of the Notice of Noncompliance and Civil Penalty proceeding, the MMS claims that the Cortez Pipeline tariff is not the proper transportation allowance and that Kinder Morgan CO_2 must use its "reasonable actual costs" calculated in accordance with certain federal product valuation regulations. The MMS set a due date of April 13, 2007 for Kinder Morgan CO_2's payment of the $4.6 million in claimed additional royalties, with possible late payment charges and civil penalties for failure to pay the assessed amount. Kinder Morgan CO_2 has not paid the $4.6 million, and on April 19, 2007, it submitted a notice of appeal and statement of reasons in response to the Order to Report and Pay, challenging the Order and appealing it to the Director of the MMS in accordance with 30 CFR 290.100, et seq. Also on April 19, 2007, Kinder Morgan CO_2 submitted a petition to suspend compliance with the Order to Report and Pay pending the appeal. The MMS granted Kinder Morgan CO_2's petition to suspend, and approved self-bonding on June 12, 2007. Kinder Morgan CO_2 filed a supplemental statement of reasons in support of its appeal of the Order to Report and Pay on June 15, 2007.

In addition to the March 2007 Order to Report and Pay, in April 2007, Kinder Morgan CO_2 received an "Audit Issue Letter" sent by the Colorado Department of Revenue on behalf of the U.S. Department of the Interior. In the letter, the Department of Revenue states that Kinder Morgan CO_2 has over-reported transportation allowances and underpaid royalties (due to the use of the Cortez pipeline tariff as the transportation allowance for purposes of federal royalties) in the amount of $8.5 million for the period from April 2000 through December 2004. Kinder Morgan CO_2 responded to the letter in May 2007, outlining its position why use of the Cortez tariff-based transportation allowance is proper. On August 8, 2007, Kinder Morgan CO_2 received an "Order to Report and Pay Additional Royalties" from the MMS. As alleged in the Colorado Audit Issue Letter, the MMS contends that Kinder Morgan CO_2 has over-reported transportation allowances and underpaid royalties in the amount of approximately $8.5 million for the period from April 2000 through December 2004. The MMS's claims underlying the August 2007 Order to Report and Pay are similar to those at issue in the March 2007 Order to Report and Pay. On September 7, 2007, Kinder Morgan CO_2 submitted a notice of appeal and statement of reasons in response to the August 2007 Order to Report and Pay, challenging the Order and appealing it to the Director of the MMS in accordance with 30 CFR 290.100, et seq. Also on September 7, 2007, Kinder Morgan CO_2 submitted a petition to suspend compliance with the Order to Report and Pay pending the appeal. The MMS granted Kinder Morgan CO_2's petition to suspend, and approved self-bonding on September 11, 2007.

The MMS and Kinder Morgan CO_2 have agreed to stay the March 2007 and August 2007 Order to Report and Pay proceedings to allow the parties to discuss settlement. The parties conducted settlement conferences on February 4, 2008 and February 12, 2008.

Kinder Morgan CO_2 disputes both the March and August 2007 Orders to Report and Pay and the Colorado Department of Revenue Audit Issue Letter, and as noted above, it contends that use of the Cortez pipeline tariff as the transportation allowance for purposes of calculating federal royalties was approved by the MMS in 1984 and was affirmed as open-ended by the Interior Board of Land Appeals in the 1990s. The appeals to the MMS Director of the Orders to Report and Pay do not provide for an oral hearing. No further submission or briefing deadlines have been set.

J. Casper Heimann, Pecos Slope Royalty Trust and Rio Petro LTD, individually and on behalf of all other private royalty and overriding royalty owners in the Bravo Dome Carbon Dioxide Unit, New Mexico similarly situated v. Kinder Morgan CO_2 Company, L.P., No. 04-26-CL (8th Judicial District Court, Union County New Mexico)

This case involves a purported class action against Kinder Morgan CO_2 alleging that it has failed to pay the full royalty and overriding royalty ("royalty interests") on the true and proper settlement value of compressed carbon dioxide produced from the Bravo Dome Unit during the period beginning January 1, 2000. The complaint purports to assert claims for violation of the New Mexico Unfair Practices Act, constructive fraud, breach of contract and of the covenant of good faith and fair dealing, breach of the implied covenant to market, and claims for an accounting, unjust enrichment, and injunctive relief. The purported class is comprised of current and former owners, during the period January 2000 to the present, who have private property royalty interests burdening the oil and gas leases held by the defendant, excluding the Commissioner of Public Lands, the United States of America, and those private royalty interests that are not unitized as part of the Bravo Dome Unit. The plaintiffs allege that they were members of a class previously certified as a class action by the United States District Court for the District of New Mexico in the matter Doris Feerer, et al. v. Amoco Production Company, et al., USDC N.M. Civ. No. 95-0012 (the "Feerer Class Action"). Plaintiffs allege that Kinder Morgan CO_2's method of paying royalty interests is contrary to the settlement of the Feerer Class Action. Kinder Morgan CO_2 filed a motion to compel arbitration of this matter pursuant to the arbitration provisions contained in the Feerer Class Action settlement agreement, which motion was denied. Kinder Morgan CO_2 appealed this decision to the New Mexico Court of Appeals, which affirmed the decision of the trial court. The New Mexico Supreme Court granted further review in October 2006, and after hearing oral argument, the New Mexico Supreme Court quashed its prior order granting review. In August 2007, Kinder Morgan CO_2 filed a petition for writ of certiorari with the United States Supreme Court seeking further review. The Petition was denied in December 2007. The case is now proceeding in the trial court as a certified class action and the case is set for trial in September 2008.

In addition to the matters listed above, audits and administrative inquiries concerning Kinder Morgan CO_2's payments on carbon dioxide produced from the McElmo Dome and Bravo Dome Units are currently ongoing. These audits and inquiries involve federal agencies and the States of Colorado and New Mexico.

Commercial Litigation Matters

Union Pacific Railroad Company Easements

SFPP, L.P. and Union Pacific Railroad Company (the successor to Southern Pacific Transportation Company and referred to in this Note as UPRR) are engaged in a proceeding to determine the extent, if any, to which the rent payable by SFPP for the use of pipeline easements on rights-of-way held by UPRR should be adjusted pursuant to existing contractual arrangements for the ten year period beginning January 1, 2004 (*Union Pacific Railroad Company vs. Santa Fe Pacific Pipelines, Inc., SFPP, L.P., Kinder Morgan Operating L.P. "D", Kinder Morgan G.P., Inc., et al.*, Superior Court of the State of California for the County of Los Angeles, filed July 28, 2004). In February 2007, a trial began to determine the amount payable for easements on UPRR rights-of-way. The trial is ongoing and is expected to conclude in the second quarter of 2008.

SFPP and UPRR are also engaged in multiple disputes over the circumstances under which SFPP must pay for a relocation of its pipeline within the UPRR right of way and the safety standards that govern relocations. SFPP believes that it must pay for relocation of the pipeline only when so required by the railroad's common carrier operations, and in doing so, it need only comply with standards set forth in the federal Pipeline Safety Act in conducting relocations. In July 2006, a trial before a judge regarding the circumstances under which we must pay for relocations concluded, and the judge determined that we must pay for any relocations resulting from any legitimate business purpose of the UPRR. We have appealed this decision. In addition, UPRR contends that it has complete discretion to cause the pipeline to be relocated at SFPP's expense at any time and for any reason, and that SFPP must comply with the more expensive American Railway Engineering and Maintenance-of-Way standards. Each party is seeking declaratory relief with respect to its positions regarding relocations.

It is difficult to quantify the effects of the outcome of these cases on SFPP because SFPP does not know UPRR's plans for projects or other activities that would cause pipeline relocations. Even if SFPP is successful in advancing its positions, significant relocations for which SFPP must nonetheless bear the expense (i.e. for railroad purposes, with the standards in the federal Pipeline Safety Act applying) would have an adverse effect on our financial position and results of operations. These effects would be even greater in the event SFPP is unsuccessful in one or more of these litigations.

United States of America, ex rel., Jack J. Grynberg v. K N Energy (Civil Action No. 97-D-1233, filed in the U.S. District Court, District of Colorado).

This multi-district litigation proceeding involves four lawsuits filed in 1997 against numerous Kinder Morgan companies. These suits were filed pursuant to the federal False Claims Act and allege underpayment of royalties due to mismeasurement of natural gas produced from federal and Indian lands. The complaints are part of a larger series of similar complaints filed by Mr. Grynberg against 77 natural gas pipelines (approximately 330 other defendants) in various courts throughout the country which were consolidated and transferred to the District of Wyoming.

In May 2005, a Special Master appointed in this litigation found that because there was a prior public disclosure of the allegations and that Grynberg was not an original source, the Court lacked subject matter jurisdiction. As a result, the Special Master recommended that the Court dismiss all the Kinder Morgan defendants. In October 2006, the United States District Court for the District of Wyoming upheld the dismissal of each case against the Kinder Morgan defendants on jurisdictional grounds. Grynberg has appealed this Order to the Tenth Circuit Court of Appeals. A procedural schedule has been issued and briefing before the Court of Appeals will be completed in the spring of 2008. The oral argument is expected to take place in September 2008.

Prior to the dismissal order on jurisdictional grounds, the Kinder Morgan defendants filed Motions to Dismiss and for Sanctions alleging that Grynberg filed his Complaint without evidentiary support and for an improper purpose. On January 8, 2007, after the dismissal order, the Kinder Morgan defendants also filed a Motion for Attorney Fees under the False Claim Act. On April 24, 2007 the Court held a hearing on the Motions to Dismiss and for Sanctions and the Requests for Attorney Fees. A decision is still pending on the Motions to Dismiss and for Sanctions and the Requests for Attorney Fees.

Weldon Johnson and Guy Sparks, individually and as Representative of Others Similarly Situated v. Centerpoint Energy, Inc. et. al., No. 04-327-2 (Circuit Court, Miller County Arkansas).

On October 8, 2004, plaintiffs filed the above-captioned matter against numerous defendants including Kinder Morgan Texas Pipeline L.P.; Kinder Morgan Energy Partners, L.P.; Kinder Morgan G.P., Inc.; KM Texas Pipeline, L.P.; Kinder Morgan Texas Pipeline G.P., Inc.; Kinder Morgan Tejas Pipeline G.P., Inc.; Kinder Morgan Tejas Pipeline, L.P.; Gulf Energy Marketing, LLC; Tejas Gas, LLC; and MidCon Corp. (the "Kinder Morgan defendants"). The complaint purports to bring a class action on behalf of those who purchased natural gas from the CenterPoint defendants from October 1, 1994 to the date of class certification.

The complaint alleges that CenterPoint Energy, Inc., by and through its affiliates, has artificially inflated the price charged to residential consumers for natural gas that it allegedly purchased from the non-CenterPoint defendants, including the Kinder Morgan defendants. The complaint further alleges that in exchange for CenterPoint’s purchase of such natural gas at above market prices, the non-CenterPoint defendants, including the Kinder Morgan defendants, sell natural gas to CenterPoint’s non-regulated affiliates at prices substantially below market, which in turn sells such natural gas to commercial and industrial consumers and gas marketers at market price. The complaint purports to assert claims for fraud, unlawful enrichment and civil conspiracy against all of the defendants, and seeks relief in the form of actual, exemplary and punitive damages, interest, and attorneys’ fees. On June 8, 2007, the Arkansas Supreme Court held that the Arkansas Public Service Commission has exclusive jurisdiction over any Arkansas plaintiffs’ claims that consumers were overcharged for gas in Arkansas and mandated that any such claims be dismissed from this lawsuit. On February 14, 2008, the Arkansas Supreme Court clarified its previously issued order and mandated that the trial court dismiss the lawsuit in its entirety. Based on the information available to date and our preliminary investigation, the Kinder Morgan defendants believe that the claims against them are without merit and intend to defend against them vigorously.

Federal Investigation at Cora and Grand Rivers Coal Facilities

On June 22, 2005, we announced that the Federal Bureau of Investigation was conducting an investigation related to our coal terminal facilities located in Rockwood, Illinois and Grand Rivers, Kentucky. The investigation involved certain coal sales from our Cora, Illinois and Grand Rivers, Kentucky coal terminals that occurred from 1997 through 2001. During this time period, we sold excess coal from these two terminals for our own account, generating less than $15 million in total net sales. Excess coal is the weight gain that results from moisture absorption into existing coal during transit or storage and from scale inaccuracies, which are typical in the industry. During the years 1997 through 1999, we collected, and, from 1997 through 2001, we subsequently sold, excess coal for our own account, as we believed we were entitled to do under then-existing customer contracts. We conducted an internal investigation of the allegations and discovered no evidence of wrongdoing or improper activities at these two terminals.

In the fourth quarter of 2007, we reached a civil settlement with the U.S. Attorney’s office for the Southern District of Illinois pursuant to which we paid approximately $25 million, in aggregate, to the Tennessee Valley Authority and other customers of the Cora and Grand Rivers terminals from 1997 through 1999. We made no admission or acknowledgment of improper conduct as part of the settlement, and while we continue to believe that our actions at our terminals were appropriate, we determined that a civil resolution of the matter would be in our best interest. The settlement has been finalized, and we recorded a $25 million increase in expense in the third quarter of 2007 associated with the settlement of this liability.

Queen City Railcar Litigation

On August 28, 2005, a railcar containing the chemical styrene began leaking styrene gas in Cincinnati, Ohio while en route to our Queen City Terminal. The railcar was sent by the Westlake Chemical Corporation from Louisiana, transported by Indiana & Ohio Railway, and consigned to Westlake at its dedicated storage tank at Queen City Terminals, Inc., a subsidiary of Kinder Morgan Bulk Terminals, Inc. The railcar leak resulted in the evacuation of many residents and the alleged temporary closure of several businesses in the Cincinnati area. A class action complaint and a suit filed by the City of Cincinnati arising out of this accident have been settled. However, one member of the settlement class, the Estate of George W. Dameron, opted out of the settlement, and the Adminstratrix of the Dameron Estate filed a wrongful death lawsuit on November 15, 2006 in the Hamilton County Court of Common Pleas, Case No. A0609990. The complaint, which is asserted against each of the defendants involved in the class action suit, alleges that styrene exposure caused the death of Mr. Dameron. Without admitting fault or liability, the parties have reached a settlement in principle of the Dameron suit.

As part of the settlement of the class action claims, the non-Kinder Morgan defendants have agreed to settle remaining claims asserted by businesses and will obtain a release of such claims favoring all defendants, including Kinder Morgan and its affiliates, subject to the retention by all defendants of their claims against each other for contribution and indemnity. Kinder Morgan expects that a claim will be asserted by other defendants against Kinder Morgan seeking contribution or indemnity for any settlements funded exclusively by other defendants, and Kinder Morgan expects to vigorously defend against any such claims.

Leukemia Cluster Litigation

Richard Jernee, et al v. Kinder Morgan Energy Partners, et al, No. CV03-03482 (Second Judicial District Court, State of Nevada, County of Washoe) ("Jernee").

Floyd Sands, et al v. Kinder Morgan Energy Partners, et al, No. CV03-05326 (Second Judicial District Court, State of Nevada, County of Washoe) ("Sands").

On May 30, 2003, plaintiffs, individually and on behalf of Adam Jernee, filed a civil action in the Nevada State trial court against us and several Kinder Morgan related entities and individuals and additional unrelated defendants. Plaintiffs in the Jernee matter claim that defendants negligently and intentionally failed to inspect, repair and replace unidentified segments of their pipeline and facilities, allowing "harmful substances and emissions and gases" to damage "the environment and health of human beings." Plaintiffs claim that "Adam Jernee's death was caused by leukemia that, in turn, is believed to be due to exposure to industrial chemicals and toxins." Plaintiffs purport to assert claims for wrongful death, premises liability, negligence, negligence per se, intentional infliction of emotional distress, negligent infliction of emotional distress, assault and battery, nuisance, fraud, strict liability (ultra hazardous acts), and aiding and abetting, and seek unspecified special, general and punitive damages. On August 28, 2003, a separate group of plaintiffs, represented by the counsel for the plaintiffs in the Jernee matter, individually and on behalf of Stephanie Suzanne Sands, filed a civil action in the Nevada State trial court against the same defendants and alleging the same claims as in the Jernee case with respect to Stephanie Suzanne Sands. The Jernee case has been consolidated for pretrial purposes with the Sands case. In May 2006, the court granted defendants' motions to dismiss as to the counts purporting to assert claims for fraud, but denied defendants' motions to dismiss as to the remaining counts, as well as defendants' motions to strike portions of the complaint. Defendant Kennametal, Inc. has filed a third-party complaint naming the United States and the United States Navy (the "United States") as additional defendants. In response, the United States removed the case to the United States District Court for the District of Nevada and filed a motion to dismiss the third-party complaint. Plaintiff has also filed a motion to dismiss the United States and/or to remand the case back to state court. By order dated September 25, 2007, the United States District Court granted the motion to dismiss the United States from the case and remanded the Jernee and Sands cases back to the Second Judicial District Court, State of Nevada, County of Washoe. The cases will now proceed in the State Court. Based on the information available to date, our own preliminary investigation, and the positive results of investigations conducted by State and Federal agencies, we believe that the remaining claims against us in these matters are without merit and intend to defend against them vigorously.

Pipeline Integrity and Releases

From time to time, our pipelines experience leaks and ruptures. These leaks and ruptures may cause explosions, fire, damage to the environment, damage to property and/or personal injury or death. In connection with these incidents, we may be sued for damages caused by an alleged failure to properly mark the locations of our pipelines and/or to properly maintain our pipelines. Depending upon the facts and circumstances of a particular incident, state and federal regulatory authorities may seek civil and/or criminal fines and penalties.

We believe that we conduct our operations in accordance with applicable law. We seek to cooperate with state and federal regulatory authorities in connection with the clean-up of the environment caused by such leaks and ruptures and with any investigations as to the facts and circumstances surrounding the incidents.

Kleberg County, Texas Gas Pipeline Rupture

On February 12, 2008, Kinder Morgan Texas Pipeline incurred a failure on its 16-inch diameter natural gas pipeline in a remote area in Kleberg County, Texas, which resulted in an explosion and fire. The incident caused some property damage, however no serious physical injuries have been reported to date. Kinder Morgan Texas Pipeline notified appropriate regulatory agencies and is currently investigating the cause of the rupture.

Walnut Creek, California Pipeline Rupture

On November 9, 2004, excavation equipment operated by Mountain Cascade, Inc., a third-party contractor on a water main installation project hired by East Bay Municipal Utility District, struck and ruptured an underground petroleum pipeline owned and operated by SFPP, L.P. in Walnut Creek, California. An explosion occurred immediately following the rupture that resulted in five fatalities and several injuries to employees or contractors of Mountain Cascade. The explosion and fire also caused property damage.

On May 5, 2005, the California Division of Occupational Safety and Health ("CalOSHA") issued two civil citations against us relating to this incident assessing civil fines of approximately $0.1 million based upon our alleged failure to mark the location of the pipeline properly prior to the excavation of the site by the contractor. On June 27, 2005, the Office of the California State Fire Marshal, Pipeline Safety Division, referred to in this report as the CSFM, issued a notice of violation against us which also alleged that we did not properly mark the location of the pipeline in violation of state and federal regulations. The CSFM assessed a proposed civil penalty of $0.5 million. The location of the incident was not our work site, nor did we have any direct involvement in the water main replacement project. We believe that SFPP acted in accordance with applicable law and regulations, and further that according to California law, excavators, such as the contractor on the project, must take the necessary steps (including excavating with hand tools) to confirm the exact location of a pipeline before using any power operated or power driven excavation equipment. Accordingly, we disagree with certain of the findings of CalOSHA and the CSFM, and we have appealed the civil penalties while, at the same time, continuing to work cooperatively with CalOSHA and the CSFM to resolve these matters.

On September 21, 2007, KMGP Services Company, Inc., an affiliate of Knight, entered into a plea agreement and civil settlement with the District Attorney of Contra Costa County pertaining to this accident. Under the terms of the plea agreement, KMGP Services Company, Inc. agreed to plead no contest to six counts of violating the California Labor Code. While initially constituted as felonies under the California Labor Code, the plea agreement contemplates that following the successful completion of an independent audit of our right-of-way protection policies and practices (likely in approximately one year), we may move to reduce the felony counts to misdemeanors. Pursuant to the plea agreement and civil settlement, in October 2007, we paid approximately $15 million.

As a result of the accident, nineteen separate lawsuits were filed. The majority of the cases were personal injury and wrongful death actions that alleged, among other things, that SFPP/Kinder Morgan failed to properly field mark the area where the accident occurred.

Following court ordered mediation, the Kinder Morgan defendants have settled with plaintiffs in all of the wrongful death cases and the personal injury and property damages cases. These settlements have either become final by order of the court or are awaiting court approval. The only civil cases which remain pending at present are: (i) a cross-claim for contribution and indemnity by an engineering company defendant against the Kinder Morgan defendants in which the court has entered summary judgment in favor of the Kinder Morgan defendants; and (ii) a challenge to the court-ordered allocation of settlement proceeds in one of the court-approved wrongful death settlements filed by a nonresident sibling in which the court has also granted summary judgment in favor of the Kinder Morgan defendants. Both of these judgments in favor of the Kinder Morgan defendants are subject to potential appeal.

Additionally, following this accident, we reviewed and when appropriate, revised our pipeline policies and procedures to improve safety. We have undertaken a number of actions to reduce future third-party damage to our pipelines, including adding line riders and locators, retaining third-party expertise, instituting enhanced line location training and education of employees and contractors, and investing in additional state-of-the-art line locating equipment. We have also committed to various procedural requirements pertaining to construction near our pipelines.

Consent Agreement Regarding Cordelia, Oakland and Donner Summit California Releases

On May 21, 2007, we and SFPP entered into a Consent Agreement with various governmental agencies to resolve civil claims relating to the unintentional release of petroleum products during three pipeline incidents in northern California. The releases occurred (i) in the Suisun Marsh area near Cordelia in Solano County, in April 2004; (ii) in Oakland in February 2005; and (iii) near Donner Pass in April 2005. The agreement was reached with the United States Environmental Protection Agency, referred to in this note as the EPA, Department of the Interior, Department of Justice and the National Oceanic and Atmospheric Administration, as well as the State of California Department of Fish and Game, Office of Spill Prevention and Response, and the Regional Water Quality Control Boards for the San Francisco and Lahontan regions. Under the Consent Agreement, we agreed to pay approximately $3.8 million in civil penalties, $1.3 million in natural resource damages and assessment costs and approximately $0.2 million in agency response and future remediation monitoring costs. All of the civil penalties have been reserved for as of September 30, 2007. In addition, we agreed to perform enhancements in our Pacific Operations relative to its spill prevention, response and reporting practices, the majority of which have already been implemented.

The Consent Agreement was filed with the United States District Court for the Eastern District of California on May 29, 2007 and became effective July 26, 2007. We have substantially completed remediation and restoration activities in consultation with the appropriate state and federal regulatory agencies at the location of each release.

EPA Notice of Proposed Debarment

On August 21, 2007, SFPP received a Notice of Proposed Debarment issued by the United States Environmental Protection Agency, referred to in this report as the EPA. Pursuant to the Notice, the Suspension and Debarment Division of the EPA is proposing to debar SFPP from participation in future Federal contracts and assistance activities for a period of three years. The purported basis for the proposed debarment is SFPP’s April, 2005 agreement with the California Attorney General and the District Attorney of Solano County, California to settle misdemeanor charges of the unintentional, non-negligent discharge of diesel fuel, and the failure to provide timely notice of a threatened discharge to appropriate state agencies, in connection with the April 28, 2004 spill of diesel fuel into a marsh near Cordelia, California. SFPP believes that the proposed debarment is factually and legally unwarranted and intends to contest it. In addition, SFPP is currently engaged in discussions with the EPA to attempt to resolve this matter. Based upon our discussions to date, we do not believe that this matter will result in the debarment or suspension of SFPP.

Baker, California

In November 2004, our CALNEV Pipeline experienced a failure from external damage near Baker, California, resulting in a release of gasoline that affected approximately two acres of land in the high desert administered by the U.S. Bureau of Land Management. Remediation has been conducted and continues for product in the soils. All agency requirements have been met and the site will be closed upon completion of the soil remediation. The

California Department of Fish & Game has alleged a small natural resource damage claim that is currently under review. CALNEV expects to work cooperatively with the Department of Fish & Game to resolve this claim.

Henrico County, Virginia

On April 17, 2006, Plantation Pipe Line Company, which transports refined petroleum products across the southeastern United States and which is 51.17% owned and operated by us, experienced a pipeline release of turbine fuel from its 12-inch pipeline. The release occurred in a residential area and impacted adjacent homes, yards and common areas, as well as a nearby stream. The released product did not ignite and there were no deaths or injuries. Plantation estimates the amount of product released to be approximately 553 barrels. Immediately following the release, the pipeline was shut down and emergency remediation activities were initiated. Remediation and monitoring activities are ongoing under the supervision of the EPA, and the Virginia Department of Environmental Quality, referred to in this report as VDEQ. Following settlement negotiations and discussions with VDEQ, Plantation and VDEQ entered into a Special Order on Consent under which Plantation agreed to pay a civil penalty of approximately $0.7 million to VDEQ as well as reimburse VDEQ for less than $0.1 million in expenses and oversight costs to resolve the matter. Plantation satisfied $0.2 million of the civil penalty by completing a supplemental environmental project in the form of a $0.2 million donation to the Henrico County Fire Department for the purchase of hazardous material spill response equipment.

Dublin, California

In June 2006, our SFPP pipeline experienced a leak near Dublin, California, resulting in a release of product that affected a limited area along a recreation path. We have completed remediation activities and have petitioned the California Regional Water Quality Control Board for closure. The cause of the release was outside force damage.

Soda Springs, California

In August 2006, our SFPP pipeline experienced a failure near Soda Springs, California, resulting in a release of product that affected a limited area along Interstate Highway 80. Product impacts were primarily limited to soil in an area between the pipeline and Interstate Highway 80. Remediation and monitoring activities are ongoing under the supervision of the California Department of Fish & Game and Nevada County. The cause of the release was determined to be pinhole corrosion in an unpiggable 2-inch diameter bypass to the mainline valve. The bypass was installed to allow pipeline maintenance activity. The bypass piping was replaced at this location and all other similar designs on the pipeline segment were excavated, evaluated and replaced as necessary to avoid future risk of release. On January 30, 2008, we entered into a settlement agreement with Nevada County and the state of California to resolve any outstanding civil penalties claims related to this release for $75,000.

Rockies Express Pipeline LLC Wyoming Construction Incident

On November 11, 2006, a bulldozer operated by an employee of Associated Pipeline Contractors, Inc, (a third-party contractor to Rockies Express Pipeline LLC, referred to in this Note as REX), struck an existing subsurface natural gas pipeline owned by Wyoming Interstate Company, a subsidiary of El Paso Pipeline Group. The pipeline was ruptured, resulting in an explosion and fire. The incident occurred in a rural area approximately nine miles southwest of Cheyenne, Wyoming. The incident resulted in one fatality (the operator of the bulldozer) and there were no other reported injuries. The cause of the incident is under investigation by the U.S. Department of Transportation Pipeline and Hazardous Materials Safety Administration, referred to in this report as the PHMSA. We are cooperating with this agency. Immediately following the incident, REX and El Paso Pipeline Group reached an agreement on a set of additional enhanced safety protocols designed to prevent the reoccurrence of such an incident.

In September 2007, the family of the deceased bulldozer operator filed a wrongful death action against us, Rockies Express Pipeline LLC and several other parties in the District Court of Harris County, Texas, 189 Judicial District, at case number 2007-57916. The plaintiffs seek unspecified compensatory and exemplary damages plus interest, attorney’s fees and costs of suit. We have asserted contractual claims for complete indemnification for any and all costs arising from this incident, including any costs related to this lawsuit, against third parties and their insurers. The parties are currently engaged in discovery. We do not expect the cost of any settlement or eventual judgment, if any, to be material.

Charlotte, North Carolina

On November 27, 2006, the Plantation Pipeline experienced a release of approximately 4,000 gallons of gasoline from a Plantation Pipe Line Company block valve on a delivery line into a terminal owned by a third party company. Upon discovery of the release, Plantation immediately locked out the delivery of gasoline through that pipe to prevent further releases. Product had flowed onto the surface and into a nearby stream, which is a tributary of Paw Creek, and resulted in loss of fish and other biota. Product recovery and remediation efforts were implemented immediately, including removal of product from the stream. The line was repaired and put back into service within a few days. Remediation efforts are continuing under the direction of the North Carolina Department of Environment and Natural Resources (the "NCDENR"), which issued a Notice of Violation and Recommendation of Enforcement against Plantation on January 8, 2007. Plantation continues to cooperate fully with the NCDENR.

Although Plantation does not believe that penalties are warranted, it is engaging in settlement discussions with the EPA regarding a potential civil penalty for the November 2006 release as part of broader settlement negotiations with the EPA regarding this spill and two other historic releases from Plantation, including a February 2003 release near Hull, Georgia. Plantation has reached an agreement in principle with the Department of Justice and the EPA for all four releases for approximately $0.7 million, plus some additional work to be performed to prevent future releases. The parties are negotiating a consent decree. Although it is not possible to predict the ultimate outcome, we believe, based on our experiences to date, that the ultimate resolution of such items will not have a material adverse impact on our business, financial position, results of operations or cash flows.

In addition, in April 2007, during pipeline maintenance activities near Charlotte, North Carolina, Plantation discovered the presence of historical soil contamination near the pipeline, and reported the presence of impacted soils to the NCDENR. Subsequently, Plantation contacted the owner of the property to request access to the property to investigate the potential contamination. The results of that investigation indicate that there is soil and groundwater contamination which appears to be from an historical turbine fuel release. The groundwater contamination is underneath at least two lots on which there is current construction of single family homes as part of a new residential development. Further investigation and remediation are being conducted under the oversight of the NCDENR. Plantation is working with the owner of the property and the builder of the residential subdivision to address any potential claims that they may bring.

Barstow, California

The United States Department of Navy has alleged that historic releases of methyl tertiary-butyl ether, referred to in this report as MTBE, from CalNev Pipe Line Company’s Barstow terminal has (i) migrated underneath the Navy’s Marine Corps Logistics Base in Barstow; (ii) impacted the Navy’s existing groundwater treatment system for unrelated groundwater contamination not alleged to have been caused by CalNev, and (iii) could affect the MCLB’s water supply system. Although CalNev believes that it has certain meritorious defenses to the Navy’s claims, we are working with the Navy to agree upon an Administrative Settlement Agreement and Order on Consent for CERCLA Removal Action to reimburse the Navy for $0.5 million in past response actions, plus perform other work to ensure protection of the Navy’s existing treatment system and water supply.

Oil Spill Near Westridge Terminal, Burnaby, British Columbia

On July 24, 2007, a third-party contractor installing a sewer line for the City of Burnaby struck a crude oil pipeline segment included within our Trans Mountain pipeline system near its Westridge terminal in Burnaby, BC, resulting in a release of approximately 1,400 barrels of crude oil. The release impacted the surrounding neighborhood, several homes and nearby Burrard Inlet. No injuries were reported. To address the release, we initiated a comprehensive emergency response in collaboration with, among others, the City of Burnaby, the BC Ministry of Environment, the National Energy Board, and the National Transportation Safety Board. Cleanup and environmental remediation is continuing. The incident is currently under investigation by Federal and Provincial agencies. We do not expect this matter to have a material adverse impact on our results of operations or cash flows.

On December 20, 2007 we initiated a lawsuit entitled Trans Mountain Pipeline LP, Trans Mountain Pipeline Inc. and Kinder Morgan Canada Inc. v. The City of Burnaby, et al., Supreme Court of British Columbia, Vancouver Registry No. S078716. The suit alleges that the City of Burnaby and its agents are liable in damages including, but not limited to, all costs and expenses incurred by us as a result of the rupture of the pipeline and subsequent release of crude oil.

Although no assurance can be given, we believe that we have meritorious defenses to all pending pipeline integrity actions set forth in this note and, to the extent an assessment of the matter is possible, if it is probable that a liability has been incurred and the amount of loss can be reasonably estimated, we believe that we have established an adequate reserve to cover potential liability.

Additionally, although it is not possible to predict the ultimate outcomes, we also believe, based on our experiences to date, that the ultimate resolution of these matters will not have a material adverse impact on our business, financial position, results of operations or cash flows. As of December 31, 2007, and December 31, 2006, we have recorded a total reserve for legal fees, transportation rate cases and other litigation liabilities in the amount of $247.9 million and $112.0 million, respectively. The reserve is primarily related to various claims from lawsuits arising from our Pacific operations' pipeline transportation rates, and the contingent amount is based on both the circumstances of probability and reasonability of dollar estimates. We regularly assess the likelihood of adverse outcomes resulting from these claims in order to determine the adequacy of our liability provision.

Environmental Matters

Exxon Mobil Corporation v. GATX Corporation, Kinder Morgan Liquids Terminals, Inc. and ST Services, Inc.

On April 23, 2003, Exxon Mobil Corporation filed a complaint in the Superior Court of New Jersey, Gloucester County. We filed our answer to the complaint on June 27, 2003, in which we denied ExxonMobil's claims and allegations as well as included counterclaims against ExxonMobil. The lawsuit relates to environmental remediation obligations at a Paulsboro, New Jersey liquids terminal owned by ExxonMobil from the mid-1950s through November 1989, by GATX Terminals Corp. from 1989 through September 2000, later owned by ST Services, Inc. Prior to selling the terminal to GATX Terminals, ExxonMobil performed the environmental site assessment of the terminal required prior to sale pursuant to state law. During the site assessment, ExxonMobil discovered items that required remediation and the New Jersey Department of Environmental Protection issued an order that required ExxonMobil to perform various remediation activities to remove hydrocarbon contamination at the terminal. ExxonMobil, we understand, is still remediating the site and has not been removed as a responsible party from the state's cleanup order; however, ExxonMobil claims that the remediation continues because of GATX Terminals' storage of a fuel additive, MTBE, at the terminal during GATX Terminals' ownership of the terminal. When GATX Terminals sold the terminal to ST Services, the parties indemnified one another for certain environmental matters. When GATX Terminals was sold to us, GATX Terminals' indemnification obligations, if any, to ST Services may have passed to us. Consequently, at issue is any indemnification obligation we may owe to ST Services for environmental remediation of MTBE at the terminal. The complaint seeks any and all damages related to remediating MTBE at the terminal, and, according to the New Jersey Spill Compensation and Control Act, treble damages may be available for actual dollars incorrectly spent by the successful party in the lawsuit for remediating MTBE at the terminal. The parties are currently involved in mandatory mediation with respect to the claims set out in the lawsuit.

On June 25, 2007, the New Jersey Department of Environmental Protection, the Commissioner of the New Jersey Department of Environmental Protection and the Administrator of the New Jersey Spill Compensation Fund, referred to collectively as the plaintiffs, filed a complaint against Exxon Mobil Corporation and GATX Terminals Corporation. The complaint was filed in Gloucester County, New Jersey. The plaintiffs have not yet served the complaint on either of the named defendants. The plaintiffs seek the costs and damages that the plaintiffs allegedly have incurred or will incur as a result of the discharge of pollutants and hazardous substances at the Paulsboro, New Jersey facility. The costs and damages that the plaintiffs seek include damages to natural resources. In addition, the plaintiffs seek an order compelling the defendants to perform or fund the assessment and restoration of those natural resource damages that are the result of the defendants' actions. As in the case brought by Exxon Mobil against GATX Terminals Corporation, the issue is whether the plaintiffs' claims are within the scope of the indemnity obligations GATX Terminals and therefore, Kinder Morgan Liquids Terminals, owes to ST Services.

The City of Los Angeles v. Kinder Morgan Energy Partners, L.P.; Kinder Morgan Liquids Terminals LLC; Kinder Morgan Tank Storage Terminals LLC; Continental Oil Company; Chevron Corporation, California Superior Court, County of Los Angeles, Case No. NC041463.

We and some of our subsidiaries are defendants in a lawsuit filed in 2005 alleging claims for environmental cleanup costs and rent at the former Los Angeles Marine Terminal in the Port of Los Angeles. Plaintiff alleges that terminal cleanup costs could approach $18 million; however, Kinder Morgan believes that the clean up costs should be substantially less and that cleanup costs must be apportioned among all the parties to the litigation. Plaintiff also alleges that it is owed approximately $2.8 million in past rent and an unspecified amount for future rent. The judge bifurcated that rent issue from the causes of action related to the cleanup costs and a trial regarding the rent issue was set for October 2007.

Plaintiff and the Kinder Morgan defendants have since agreed to a settlement in principle under which we agreed to pay $3.2 million in satisfaction of all past and future rent obligations. In the fourth quarter of 2007, we finalized the settlement terms, filed with the court for final approval, and paid the $3.2 million in satisfaction of all past and future rent obligations.

Mission Valley Terminal Lawsuit

In August 2007, the City of San Diego, on its own behalf and purporting to act on behalf of the People of the state of California, filed a lawsuit against us and several affiliates seeking injunctive relief and unspecified damages allegedly resulting from hydrocarbon and MTBE impacted soils and groundwater beneath the city's stadium property in San Diego arising from historic operations at the Mission Valley terminal facility. The case was filed in the Superior Court of California, San Diego County, case number 37-2007-00073033-CU-OR-CTL. On September 26, 2007, we removed the case to the United States District Court, Southern District of California, case number 07CV1883WCAB. On October 3, 2007, we filed a Motion to Dismiss all counts of the Complaint, which motion is currently pending. To the extent any claims survive the Motion to Dismiss, we intend to vigorously defend against the claims asserted in the complaint. This site has been, and currently is, under the regulatory oversight and order of the California Regional Water Quality Control Board. We do not expect the cost of any settlement and remediation to be material.

Portland Harbor DOJ/EPA Investigation

The United States Department of Justice and the United States Environmental Protection Agency are continuing to investigate potential criminal charges relating to an alleged instance of improper disposal at sea of potash which allegedly occurred at the request of or with the knowledge of employees or third parties at a bulk terminal facility in Portland, Oregon which we operate. We are fully cooperating with the investigation and are engaged in ongoing discussions with the office of the United States Attorney for the District of Oregon and the Department of Justice in an attempt to resolve this matter.

Louisiana Department of Environmental Quality Settlement

After conducting a voluntary compliance self-audit, in April 2006, we voluntarily disclosed certain findings from the audit related to compliance with environmental regulations and permits at our Harvey and St. Gabriel Terminals to the Louisiana Department of Environmental Quality, referred to in this report as the LDEQ. Following further discussion between the LDEQ and us, in August 2007, the LDEQ issued a Consolidated Compliance Order and Notice of Potential Penalty for each of the two facilities. We and the LDEQ have reached agreement on a proposed settlement agreement under which we agree to finalize certain work, which we have already undertaken to ensure compliance with the environmental regulations at these two facilities, and to pay a penalty of $0.3 million. The proposed settlement agreement is undergoing public comment pursuant to LDEQ regulations, and then will be finalized.

Other Environmental

We are subject to environmental cleanup and enforcement actions from time to time. In particular, the federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) generally imposes joint and several liability for cleanup and enforcement costs on current or predecessor owners and operators of a site, among others, without regard to fault or the legality of the original conduct. Our operations are also subject to federal, state and local laws and regulations relating to protection of the environment. Although we believe our operations are in substantial compliance with applicable environmental law and regulations, risks of additional costs and liabilities are inherent in pipeline, terminal and carbon dioxide field and oil field operations, and there can be no assurance that we will not incur significant costs and liabilities. Moreover, it is possible that other developments, such as increasingly stringent environmental laws, regulations and enforcement policies thereunder, and claims for damages to property or persons resulting from our operations, could result in substantial costs and liabilities to us.

We are currently involved in several governmental proceedings involving air, water and waste violations issued by various governmental authorities related to compliance with environmental regulations. As we receive notices of non-compliance, we negotiate and settle these matters. We do not believe that these violations will have a material adverse affect on our business.

We are also currently involved in several governmental proceedings involving groundwater and soil remediation efforts under administrative orders or related state remediation programs issued by various regulatory authorities related to compliance with environmental regulations associated with our assets. We have established a reserve to address the costs associated with the cleanup.

In addition, we are involved with and have been identified as a potentially responsible party in several federal and state superfund sites. Environmental reserves have been established for those sites where our contribution is probable and reasonably estimable. In addition, we are from time to time involved in civil proceedings relating to damages alleged to have occurred as a result of accidental leaks or spills of refined petroleum products, natural gas liquids, natural gas and carbon dioxide. See "—Pipeline Integrity and Releases" above for additional information with respect to ruptures and leaks from our pipelines.

Although it is not possible to predict the ultimate outcomes, we believe that the resolution of the environmental matters set forth in this note will not have a material adverse effect on our business, financial position, results of operations or cash flows. However, we are not able to reasonably estimate when the eventual settlements of these claims will occur and changing circumstances could cause these matters to have a material adverse impact. As of December 31, 2007, we have accrued an environmental reserve of$92.0 million, and we believe the establishment of this environmental reserve is adequate such that the resolution of pending environmental matters will not have a material adverse impact on our business, cash flows, financial position or results of operations. As of December 31, 2006, our environmental reserve totaled $64.2 million. Additionally, many factors may change in the future affecting our reserve estimates, such as (i) regulatory changes; (ii) groundwater and land use near our sites; and (iii) changes in cleanup technology.

Other

We are a defendant in various lawsuits arising from the day-to-day operations of our businesses. Although no assurance can be given, we believe, based on our experiences to date, that the ultimate resolution of such items will not have a material adverse impact on our business, financial position, results of operations or cash flows.

17. Regulatory Matters

The tariffs we charge for transportation on our interstate common carrier pipelines are subject to rate regulation by the FERC, under the Interstate Commerce Act. The Interstate Commerce Act requires, among other things, that interstate petroleum products pipeline rates be just and reasonable and nondiscriminatory. Pursuant to FERC Order No. 561, effective January 1, 1995, interstate petroleum products pipelines are able to change their rates within prescribed ceiling levels that are tied to an inflation index. FERC Order No. 561-A, affirming and clarifying Order No. 561, expanded the circumstances under which interstate petroleum products pipelines may employ cost-of-service ratemaking in lieu of the indexing methodology, effective January 1, 1995. For each of the years ended December 31, 2007, 2006 and 2005, the application of the indexing methodology did not significantly affect tariff rates on our interstate petroleum products pipelines.

FERC Order No. 2004/690

Since November 2003, the FERC issued Orders No. 2004, 2004-A, 2004-B, 2004-C, and 2004-D, adopting new Standards of Conduct as applied to natural gas pipelines. The primary change from existing regulation was to make such standards applicable to an interstate natural gas pipeline’s interaction with many more affiliates (referred to as "energy affiliates"), including intrastate/Hinshaw natural gas pipelines (in general, a Hinshaw pipeline is a pipeline that receives gas at or within a state boundary, is regulated by an agency of that state, and all the gas it transports is consumed within that state), processors and gatherers and any company involved in natural gas or electric markets (including natural gas marketers) even if they do not ship on the affiliated interstate natural gas pipeline. Local distribution companies were excluded, however, if they do not make sales to customers not physically attached to their system. The Standards of Conduct require, among other things, separate staffing of interstate pipelines and their energy affiliates (but support functions and senior management at the central corporate level may be shared) and strict limitations on communications from an interstate pipeline to an energy affiliate.

Every interstate natural gas pipeline was required to file an Order No. 2004 compliance plan with the FERC, and on July 20, 2006, the FERC accepted our interstate pipelines’ May 19, 2005 compliance filing under Order No. 2004. On November 17, 2006, the United States Court of Appeals for the District of Columbia Circuit, in Docket No. 04-1183, vacated FERC Orders 2004, 2004-A, 2004-B, 2004-C, and 2004-D as applied to natural gas pipelines, and remanded these same orders back to the FERC.

On January 9, 2007, the FERC issued an Interim Rule, effective January 9, 2007, in response to the court’s action. In the Interim Rule, the FERC readopted the Standards of Conduct, but revised or clarified with respect to issues which had been appealed to the court. Specifically, the following changes were made:

- the Standards of Conduct apply only to the relationship between interstate gas transmission pipelines and their marketing affiliates, not their energy affiliates;
- all risk management personnel can be shared;
- the requirement to post discretionary tariff actions was eliminated (but interstate gas pipelines must still maintain a log of discretionary tariff waivers);
- lawyers providing legal advice may be shared employees; and
- new interstate gas transmission pipelines are not subject to the Standards of Conduct until they commence service.

The FERC clarified that all exemptions and waivers issued under Order No. 2004 remain in effect. On January 18, 2007, the FERC issued a notice of proposed rulemaking seeking comments regarding whether or not the Interim Rule should be made permanent for natural gas transmission providers. On March 21, 2007, FERC issued an Order on Clarification and Rehearing of the Interim Rule that granted clarification that the Standards of Conduct only apply to natural gas transmission providers that are affiliated with a marketing or brokering entity that conducts transportation transactions on such gas transmission provider’s pipeline.

Notice of Inquiry – Financial Reporting

On February 15, 2007, the FERC issued a notice of inquiry seeking comment on the need for changes or revisions to the FERC’s reporting requirements contained in the financial forms for gas and oil pipelines and electric utilities. Initial comments were filed by numerous parties on March 27, 2007, and reply comments were filed on April 27, 2007.

On September 20, 2007, the FERC issued for public comment in Docket No. RM07-9 a proposed rule which would revise its financial forms to require that additional information be reported by natural gas companies. The proposed rule would require, among other things, that natural gas companies: (i) submit additional revenue information, including revenue from shipper-supplied gas; (ii) identify the costs associated with affiliate transactions; and (iii) provide additional information on incremental facilities and on discounted and negotiated rates. The FERC proposes an effective date of January 1, 2008, which means that forms reflecting the new requirements for 2008 would be filed in early 2009. Comments on the proposed rule were filed by numerous parties on November 13, 2007.

Notice of Inquiry – Fuel Retention Practices

On September 20, 2007, the FERC issued a Notice of Inquiry seeking comment on whether it should change its current policy and prescribe a uniform method for all interstate gas pipelines to use in recovering fuel gas and gas lost and unaccounted for. The Notice of Inquiry included numerous questions regarding fuel recovery issues and the effects of fixed fuel percentages as compared with tracking provisions. Comments on the Notice of Inquiry were filed by numerous parties on November 30, 2007.

Notice of Proposed Rulemaking – Promotion of a More Efficient Capacity Release Market

On November 15, 2007, the FERC issued a notice of proposed rulemaking in Docket No. RM 08-1-000 regarding proposed modifications to its Part 284 regulations concerning the release of firm capacity by shippers on interstate natural gas pipelines. The FERC proposes to remove, on a permanent basis, the rate ceiling on capacity release transactions of one year or less. Additionally, the FERC proposes to exempt capacity releases made as part of an asset management arrangement from the prohibition on tying and from the bidding requirements of section 284.8. Initial comments were filed by numerous parties on January 25, 2008.

Notice of Proposed Rulemaking – Natural Gas Price Transparency

On April 19, 2007, the FERC issued a notice of proposed rulemaking in Docket Nos. RM07-10-000 and AD06-11-000 regarding price transparency provisions of Section 23 of the Natural Gas Act and the Energy Policy Act. In the notice, the FERC proposed to revise its regulations to (i) require that intrastate pipelines post daily the capacities of, and volumes flowing through, their major receipt and delivery points and mainline segments in order to make available the information to track daily flows of natural gas throughout the United States; and (ii) require that buyers and sellers of more than a de minimis volume of natural gas report annual numbers and volumes of relevant transactions to the FERC in order to make possible an estimate of the size of the physical U.S. natural gas market, assess the importance of the use of index pricing in that market, and determine the size of the fixed-price trading market that produces the information. The FERC believes these revisions to its regulations will facilitate price transparency in markets for the sale or transportation of physical natural gas in interstate commerce. Initial comments were filed on July 11, 2007 and reply comments were filed on August 23, 2007. In addition, the FERC conducted an informal workshop in this proceeding on July 24, 2007, to discuss implementation and other technical issues associated with the proposals set forth in the NOPR.

On December 26, 2007, the FERC issued Order No. 704 in this docket implementing only the annual reporting provisions of the NOPR with minimal changes to the original proposal. The order becomes effective February 4, 2008. The initial report is due May 1, 2009 for calendar year 2008. Subsequent reports are due by May 1 of each year for the previous calendar year. Order 704 will require most, if not all Kinder Morgan natural gas pipelines to report annual volumes of relevant transactions to the FERC.

In addition, on December 21, 2007, the FERC issued a new notice of proposed rulemaking in Docket No. RM08-2-000 regarding the daily posting provisions that were contained in Docket Nos. RM07-10-000 and AD06-11-000. The new NOPR proposes to exempt from the daily posting requirements those non-interstate pipelines that (i) flow less than 10 million MMBtus of natural gas per year, (ii) fall entirely upstream of a processing plant, and (iii) deliver more than ninety-five percent (95%) of the natural gas volumes they flow directly to end-users. However, the new NOPR expands the proposal to require that both interstate and non-exempt non-interstate pipelines post daily the capacities of, volumes scheduled at, and actual volumes flowing through, their major receipt and delivery points and mainline segments. Initial comments are due March 13, 2008 and reply comments are due April 14, 2008. A Technical Conference is scheduled for April 3, 2008.

Notice of Proposed Rulemaking - Rural Onshore Low Stress Hazardous Liquids Pipelines

On September 6, 2006, the PHMSA published a notice of proposed rulemaking (PHMSA 71 FR 52504) that proposed to extend certain threat-focused pipeline safety regulations to rural onshore low-stress hazardous liquid pipelines within a prescribed buffer of previously defined U.S. states. Low-stress hazardous liquid pipelines, except those in populated areas or that cross commercially navigable waterways, have not been subject to the safety regulations in PHMSA 49 CFR Part 195.1. According to the PHMSA, unusually sensitive areas are areas requiring extra protection because of the presence of sole-source drinking water resources, endangered species, or other ecological resources that could be adversely affected by accidents or leaks occurring on hazardous liquid pipelines.

The notice proposed to define a category of "regulated rural onshore low-stress lines" (rural lines operating at or below 20% of specified minimum yield strength, with a diameter of eight and five-eighths inches or greater, located in or within a quarter-mile of a U.S. state) and to require operators of these lines to comply with a threat-focused set of requirements in Part 195 that already apply to other hazardous liquid pipelines. The proposed safety requirements addressed the most common threats—corrosion and third party damage—to the integrity of these rural lines. The proposal intended to provide additional integrity protection, to avoid significant adverse environmental consequences, and to improve public confidence in the safety of unregulated low-stress lines.

Since the new notice is a proposed rulemaking in which the PHMSA will consider initial and reply comments from industry participants, it is not clear what impact the final rule will have on the business of our intrastate and interstate pipeline companies.

Natural Gas Pipeline Expansion Filings

Rockies Express Pipeline-Currently Certificated Facilities

We operate and own a 51% ownership interest in West2East Pipeline LLC, a limited liability company that is the sole owner of Rockies Express Pipeline LLC. ConocoPhillips owns a 24% ownership interest in West2East Pipeline LLC and Sempra Energy holds the remaining 25% interest. When construction of the entire Rockies Express Pipeline project is completed, our ownership interest will be reduced to 50% at which time the capital accounts of West2East Pipeline LLC will be trued up to reflect our 50% economics in the project. According to the provisions of current accounting standards, due to the fact that we will receive 50% of the economics of the Rockies Express project on an ongoing basis, we are not considered the primary beneficiary of West2East Pipeline LLC and thus, we account for our investment under the equity method of accounting.

On August 9, 2005, the FERC approved the application of Rockies Express Pipeline LLC, formerly known as Entrega Gas Pipeline LLC, to construct 327 miles of pipeline facilities in two phases. For phase I (consisting of two pipeline segments), Rockies Express was granted authorization to construct and operate approximately 136 miles of pipeline extending northward from the Meeker Hub, located at the northern end of our TransColorado pipeline system in Rio Blanco County, Colorado, to the Wamsutter Hub in Sweetwater County, Wyoming (segment 1), and then construct approximately 191 miles of pipeline eastward to the Cheyenne Hub in Weld County, Colorado (segment 2). Construction of segments 1 and 2 has been completed, with interim service commencing on segment 1 on February 24, 2006, and full in-service of both segments on February 14, 2007. For phase II, Rockies Express was authorized to construct three compressor stations referred to as the Meeker, Big Hole and Wamsutter compressor stations. The Meeker and Wamsutter stations went into service in January 2008. Construction of the Big Hole compressor station is planned to commence in the second quarter of 2008, in order to meet an expected in-service date of June 30, 2009.

Rockies Express Pipeline-West Project

On April 19, 2007, the FERC issued a final order approving the Rockies Express application for authorization to construct and operate certain facilities comprising its proposed "Rockies Express-West Project." This project is the first planned segment extension of the Rockies Express' currently certificated facilities, and it will be comprised of approximately 713 miles of 42-inch diameter pipeline extending from the Cheyenne Hub to an interconnection with Panhandle Eastern Pipe Line located in Audrain County, Missouri. The segment extension proposes to transport approximately 1.5 billion cubic feet per day of natural gas across the following five states: Wyoming, Colorado, Nebraska, Kansas and Missouri. The project will also include certain improvements to existing Rockies Express facilities located to the west of the Cheyenne Hub. Construction commenced on May 21, 2007, and the project entered interim service to upstream delivery points on January 12, 2008. This project is expected to be fully operational in March 2008.

Rockies Express Pipeline-East Project

On April 30, 2007, Rockies Express filed an application with the FERC requesting a certificate of public convenience and necessity that would authorize construction and operation of the Rockies Express-East Project. The Rockies Express-East Project will be comprised of approximately 639 miles of 42-inch diameter pipeline commencing from the terminus of the Rockies Express-West pipeline to a terminus near the town of Clarington in Monroe County, Ohio and will be capable of transporting approximately 1.8 billion cubic feet per day of natural gas. On September 7, 2007, the FERC issued a Notice of Schedule for Environmental Review for the Rockies Express-East Project, referred to as the posted schedule. Rockies Express has requested that the FERC issue an updated scheduling order to modify the posted schedule for earlier resolution. Without a modification of the posted schedule, Rockies Express has concerns about its ability to complete its project by June 2009. Rockies Express is working closely with the FERC staff and other cooperating agencies to meet a revised schedule that was developed in consultation with the FERC staff at a public meeting convened on September 21, 2007. On November 23, 2007, the FERC issued a draft environmental impact statement for the project, in advance of the posted schedule. Comments on the environmental impact statement were submitted January 14, 2008, also in advance of the posted schedule. While there can be no assurance that the FERC will approve the revised schedule, subject to that approval, the Rockies Express-East Project is expected to begin partial service on December 31, 2008, and to be in full service in June 2009.

TransColorado Pipeline

On April 19, 2007, the FERC issued an order approving TransColorado Gas Transmission Company LLC’s application for authorization to construct and operate certain facilities comprising its proposed "Blanco-Meeker Expansion Project." This project provides for the transportation of up to approximately 250 million cubic feet per day of natural gas from the Blanco Hub area in San Juan County, New Mexico through TransColorado’s existing interstate pipeline for delivery to the Rockies Express Pipeline at an existing point of interconnection located in the Meeker Hub in Rio Blanco County, Colorado. Construction commenced on May 9, 2007, and the project was completed and entered service January 1, 2008.

Kinder Morgan Interstate Gas Transmission Pipeline

On August 6, 2007, KMIGT filed, in FERC Docket CP07-430, for regulatory approval to construct and operate a 41-mile, $29 million natural gas pipeline from the Cheyenne Hub to markets in and around Greeley, Colorado. When completed, the Colorado Lateral will provide firm transportation of up to 55 million cubic feet per day to a local utility under long-term contract. The FERC issued a draft environmental assessment on the project on January 11, 2008, and comments on the project were received February 11, 2008. Public Service Company of Colorado, a competitor to serving markets off the Colorado Lateral, reported that it had filed a complaint before the State of Colorado Public Utilities Commission against Atmos, the anchor shipper on the project. The Colorado Public Utilities Commission has set a hearing for April 8, 2008 on the complaint. Public Service Company of Colorado has requested the FERC delay the issuance of approvals to KMIGT, pending the outcome of the complaint proceeding.

On December 21, 2007, KMIGT filed, in Docket CP 08-44, for approval to expand its system in Nebraska to serve incremental ethanol and industrial load. The application is pending before the FERC until March 10, 2008, at which time the project will be approved if no protests are filed.

Kinder Morgan Louisiana Pipeline

On September 8, 2006, in FERC Docket No. CP06-449-000, we filed an application with the FERC requesting approval to construct and operate our Kinder Morgan Louisiana Pipeline. The natural gas pipeline will extend approximately 135 miles from Cheniere's Sabine Pass liquefied natural gas terminal in Cameron Parish, Louisiana, to various delivery points in Louisiana and will provide interconnects with many other natural gas pipelines, including Natural Gas Pipeline Company of America. The project is supported by fully subscribed capacity and long-term customer commitments with Chevron and Total. The entire project cost is approximately $510 million project and it is expected to be in service by January 1, 2009.

On March 15, 2007, the FERC issued a preliminary determination that the authorizations requested, subject to some minor modifications, will be in the public interest. This order does not consider or evaluate any of the environmental issues in this proceeding. On April 19, 2007, the FERC issued the final Environmental Impact Statement, which addressed the potential environmental effects of the construction and operation of the Kinder Morgan Louisiana Pipeline. The final EIS was prepared to satisfy the requirements of the National Environmental Policy Act. It concluded that approval of the Kinder Morgan Louisiana Pipeline project would have limited adverse environmental impacts. On June 22, 2007, the FERC issued an order granting construction and operation of the project. Kinder Morgan Louisiana Pipeline officially accepted the order on July 10, 2007.

Midcontinent Express Pipeline

On October 9, 2007, in Docket No. CP08-6-000, Midcontinent Express Pipeline LLC filed an application with the FERC requesting a certificate of public convenience and necessity that would authorize construction and operation of the approximate 500-mile Midcontinent Express Pipeline natural gas transmission system. On February 8, 2008, the FERC issued a draft environmental impact statement which stated that the building and operation of the proposed 504-mile Midcontinent Express Pipeline would result in limited adverse environmental impact. A final environmental impact statement must be released before the FERC can issue a certificate authorizing construction. Subject to the receipt of regulatory approvals, construction of the pipeline is expected to commence in August 2008 and be in service during the first quarter of 2009.

The Midcontinent Express Pipeline will create long-haul, firm transportation takeaway capacity either directly or indirectly connected to natural gas producing regions located in Texas, Oklahoma and Arkansas. The pipeline will originate in southeastern Oklahoma and traverse east through Texas, Louisiana, Mississippi, and terminate close to the Alabama border, providing capability to transport natural gas supplies to major pipeline interconnects along the route up to its terminus at Transco's Station 85. The Midcontinent Express Pipeline will have an initial capacity of up to 1.4 billion cubic feet and a total capital cost of approximately $1.3 billion. The pipeline is a 50/50 joint venture between ourselves and Energy Transfer Partners, L.P.

18. Recent Accounting Pronouncements

SFAS No. 123R

On December 16, 2004, the Financial Accounting Standards Board issued SFAS No. 123R (revised 2004), "Share-Based Payment." This Statement amends SFAS No. 123, "Accounting for Stock-Based Compensation," and requires companies to expense the value of employee stock options and similar awards. Significant provisions of SFAS No. 123R include the following: (i) share-based payment awards result in a cost that will be measured at fair value on the awards' grant date, based on the estimated number of awards that are expected to vest (compensation cost for awards that vest would not be reversed if the awards expire without being exercised); (ii) when measuring fair value, companies can choose an option-pricing model that appropriately reflects their specific circumstances and the economics of their transactions; and (iii) companies will recognize compensation cost for share-based payment awards as they vest, including the related tax effects. Upon settlement of share-based payment awards, the tax effects will be recognized in the income statement or additional paid-in capital.

For us, this Statement became effective January 1, 2006. However, we have not granted common unit options or made any other share-based payment awards since May 2000, and as of December 31, 2005, all outstanding options to purchase our common units were fully vested. Therefore, the adoption of this Statement did not have an effect on our consolidated financial statements due to the fact that we have reached the end of the requisite service period for any compensation cost resulting from share-based payments made under our common unit option plan.

SFAS No. 154

On June 1, 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections." This Statement replaces Accounting Principles Board Opinion No. 20, "Accounting Changes" and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements." SFAS No. 154 applies to all voluntary changes in accounting principle, and changes the requirements for accounting for and reporting of a change in accounting principle. SFAS No. 154 requires retrospective application to prior periods' financial statements of a voluntary change in accounting principle unless it is impracticable. In contrast, APB No. 20 previously required that most voluntary changes in accounting principle be recognized by including in net income of the period of the change the cumulative effect of changing to the new accounting principle.

The provisions of this Statement are effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005 (January 1, 2006 for us). The Statement does not change the transition provisions of any existing accounting pronouncements, including those that are in a transition phase as of the effective date of this Statement. Adoption of this Statement did not have any immediate effect on our consolidated financial statements, and we will apply this guidance prospectively.

EITF 04-5

In June 2005, the Emerging Issues Task Force reached a consensus on Issue No. 04-5, or EITF 04-5, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights." EITF 04-5 provides guidance for purposes of assessing whether certain limited partners rights might preclude a general partner from controlling a limited partnership.

For general partners of all new limited partnerships formed, and for existing limited partnerships for which the partnership agreements are modified, the guidance in EITF 04-5 is effective after June 29, 2005. For general partners in all other limited partnerships, the guidance is effective no later than the beginning of the first reporting period in fiscal years beginning after December 15, 2005 (January 1, 2006, for us). The adoption of EITF 04-5 did not have an effect on our consolidated financial statements.

Nonetheless, as a result of EITF 04-5, as of January 1, 2006, our financial statements are consolidated into the consolidated financial statements of Knight. Notwithstanding the consolidation of our financial statements into the consolidated financial statements of Knight pursuant to EITF 04-5, Knight is not liable for, and its assets are not available to satisfy, the obligations of us and/or our subsidiaries and vice versa. Responsibility for payments of obligations reflected in our or Knight's financial statements is a legal determination based on the entity that incurs the liability. The determination of responsibility for payment among entities in our consolidated group of subsidiaries was not impacted by the adoption of EITF 04-5.

SFAS No. 155

On February 16, 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments." This Statement amends SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" and SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities." This Statement allows financial instruments that have embedded derivatives to be accounted for as a whole (eliminating the need to bifurcate the derivative from its host) if the holder elects to account for the whole instrument on a fair value basis. For us, this Statement became effective January 1, 2007. Adoption of this Statement has had no effect on our consolidated financial statements.

SFAS No. 156

On March 17, 2006, the FASB issued SFAS No. 156, "Accounting for Servicing of Financial Assets." This Statement amends SFAS No. 140 and addresses the recognition and measurement of separately recognized servicing assets and liabilities, such as those common with mortgage securitization activities, and provides an approach to simplify efforts to obtain hedge-like (offset) accounting by permitting a servicer that uses derivative financial instruments to offset risks on servicing to report both the derivative financial instrument and related servicing asset or liability by using a consistent measurement attribute—fair value. For us, this Statement became effective January 1, 2007. Adoption of this Statement has had no effect on our consolidated financial statements.

EITF 06-3

On June 28, 2006, the FASB ratified the consensuses reached by the Emerging Issues Task Force on EITF 06-3, "How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That is, Gross versus Net Presentation)." According to the provisions of EITF 06-3: (i) taxes assessed by a governmental authority that are directly imposed on a revenue-producing transaction between a seller and a customer may include, but are not limited to, sales, use, value added, and some excise taxes; and (ii) the presentation of such taxes on either a gross (included in revenues and costs) or a net (excluded from revenues) basis is an accounting policy decision that should be disclosed pursuant to Accounting Principles Board Opinion No. 22 (as amended) "Disclosure of Accounting Policies."

In addition, for any such taxes that are reported on a gross basis, a company should disclose the amounts of those taxes in interim and annual financial statements for each period for which an income statement is presented if those amounts are significant. The disclosure of those taxes can be done on an aggregate basis. EITF 06-3 applies to financial reports for interim and annual reporting periods beginning after December 15, 2006 (January 1, 2007 for us). The adoption of EITF 06-3 had no effect on our consolidated financial statements.

FIN 48

In July 2006, the FASB issued Interpretation (FIN) No. 48, "Accounting for Uncertainty in Income Taxes—an Interpretation of FASB Statement No. 109," which became effective January 1, 2007. FIN 48 addressed the determination of how tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under FIN 48, we must recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based not only on the technical merits of the tax position based on tax law, but also the past administrative practices and precedents of the taxing authority. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate resolution.

Our adoption of FIN No. 48 on January 1, 2007 did not result in a cumulative effect adjustment to "Partners' Capital" on our consolidated balance sheet. A reconciliation of our beginning and ending gross unrecognized tax benefits for 2007 is as follows (in millions):

	2007
Balance at beginning of period	$ 3.2
Additions based on current year tax positions	4.7
Additions based on prior year tax positions	0.1
Reductions based on settlements with taxing authority	—
Reductions due to lapse in statute of limitations	(1.7)
Balance at end of period	$ 6.3

Our continuing practice is to recognize interest and/or penalties related to income tax matters in income tax expense, and as of January 1, 2007, we had $1.1 million of accrued interest and no accrued penalties. As of December 31, 2007 (i) we had $0.6 million of accrued interest and no accrued penalties; (ii) we believe it is reasonably possible that our liability for unrecognized tax benefits will decrease by approximately $1.2 million during the next twelve months; and (iii) we believe approximately $5.4 million of the total $6.3 million of unrecognized tax benefits on our consolidated balance sheet as of December 31, 2007 would affect our effective income tax rate in future periods in the event those unrecognized tax benefits were recognized. In addition, we have U.S. and state tax years open to examination for the periods 2003 through 2007.

SAB 108

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108. This Bulletin requires a "dual approach" for quantifications of errors using both a method that focuses on the income statement impact, including the cumulative effect of prior years' misstatements, and a method that focuses on the period-end balance sheet. For us, SAB No. 108 was effective January 1, 2007. The adoption of this Bulletin did not have a material impact on our consolidated financial statements, and we will apply this guidance prospectively.

SFAS No. 157

On September 15, 2006, the FASB issued SFAS No. 157, "Fair Value Measurements." This Statement establishes a single definition of fair value and a framework for measuring fair value in generally accepted accounting principles that should result in increased consistency and comparability in fair value measurements. SFAS No. 157 also expands disclosures about fair value measurements, improving the quality of information provided to users of financial statements. The provisions of this Statement apply to other accounting pronouncements that require or permit fair value measurements; the Board having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements.

On February 12, 2008, the FASB issued Financial Staff Position FAS 157-2, "Effective Date of FASB Statement No. 157." This Staff Position delays the effective date of SFAS No. 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow the Board and constituents additional time to consider the effect of various implementation issues that have arisen, or that may arise, from the application of SFAS No. 157.

The remainder of SFAS No. 157 was adopted by us effective January 1, 2008. The adoption of this Statement did not have an impact on our balance sheet, statement of income, or statement of cash flows since we already apply its basic concepts in measuring fair values.

SFAS No. 158

On September 29, 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statement Nos. 87, 88, 106 and 132(R)." This Statement requires an employer to: (i) recognize the overfunded or underfunded status of a defined benefit pension plan or postretirement benefit plan (other than a multiemployer plan) as an asset or liability in its statement of financial position; (ii) measure a plan's assets and its obligations that determine its funded status as of the end of the employer's fiscal year (with limited exceptions), and to disclose in the notes to financial statements additional information about certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the gains or losses, prior service costs or credits, and transition assets or obligations; and (iii) recognize changes in the funded status of a plan in the year in which the changes occur through comprehensive income.

Past accounting standards only required an employer to disclose the complete funded status of its plans in the notes to the financial statements. Recognizing the funded status of a company's benefit plans as a net liability or asset on its balance sheet will require an offsetting adjustment to "Accumulated other comprehensive income/loss" in shareholders' equity ("Partners' Capital" for us). SFAS No. 158 does not change how pensions and other postretirement benefits are accounted for and reported in the income statement—companies will continue to follow the existing guidance in previous accounting standards. Accordingly, the amounts to be recognized in "Accumulated other comprehensive income/loss" representing unrecognized gains/losses, prior service costs/credits, and transition assets/obligations will continue to be amortized under the existing guidance. Those amortized amounts will continue to be reported as net periodic benefit cost in the income statement. Prior to SFAS No. 158, those unrecognized amounts were only disclosed in the notes to the financial statements.

According to the provisions of this Statement, an employer with publicly traded equity securities is required to initially recognize the funded status of a defined benefit pension plan or postretirement benefit plan and to provide the required disclosures as of the end of the fiscal year ending after December 15, 2006 (December 31, 2006 for us). For us, the adoption of this part of SFAS No. 158 did not have a material effect on our statement of financial position as of December 31, 2006.

In addition, the requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008 (December 31, 2008 for us). In the year that the measurement date provisions of this Statement are initially applied, a business entity is required to disclose the separate adjustments of retained earnings ("Partners' Capital" for us) and "Accumulated other comprehensive income/loss" from applying this Statement. While earlier application of the recognition of measurement date provisions is allowed, we have opted not to adopt this part of the Statement early. For more information on our pensions and other post-retirement benefit plans, and our disclosures regarding the provisions of this Statement, please see Note 10.

SFAS No. 159

On February 15, 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities." This Statement provides companies with an option to report selected financial assets and liabilities at fair value. The Statement's objective is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. The Statement also establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities.

SFAS No. 159 requires companies to provide additional information that will help investors and other users of financial statements to more easily understand the effect of the company's choice to use fair value on its earnings. It also requires entities to display the fair value of those assets and liabilities for which the company has chosen to use fair value on the face of the balance sheet. The Statement does not eliminate disclosure requirements included in other accounting standards, including requirements for disclosures about fair value measurements included in SFAS No. 157, discussed above, and SFAS No. 107 "Disclosures about Fair Value of Financial Instruments."

This Statement was adopted by us effective January 1, 2008, at which time no financial assets or liabilities, not previously required to be recorded at fair value by other authoritative literature, were designated to be recorded at fair value. As such, the adoption of this Statement did not have any impact on our financial statements.

SFAS 141(R)

On December 4, 2007, the FASB issued SFAS No. 141R (revised 2007), "Business Combinations." Although this statement amends and replaces SFAS No. 141, it retains the fundamental requirements in SFAS No. 141 that (i) the purchase method of accounting be used for all business combinations; and (ii) an acquirer be identified for each business combination. SFAS No. 141R defines the acquirer as the entity that obtains control of one or more businesses in the business combination and establishes the acquisition date as the date that the acquirer achieves control. This Statement applies to all transactions or other events in which an entity (the acquirer) obtains control of one or more businesses (the acquiree), including combinations achieved without the transfer of consideration; however, this Statement does not apply to a combination between entities or businesses under common control.

Significant provisions of SFAS No. 141R concern principles and requirements for how an acquirer (i) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree; (ii) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and (iii) determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination.

This Statement applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008 (January 1, 2009 for us). Early adoption is not permitted. We are currently reviewing the effects of this Statement.

SFAS No. 160

On December 4, 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51." This Statement changes the accounting and reporting for noncontrolling interests in consolidated financial statements. A noncontrolling interest, sometimes referred to as a minority interest, is the portion of equity in a subsidiary not attributable, directly or indirectly, to a parent.

Specifically, SFAS No. 160 establishes accounting and reporting standards that require (i) the ownership interests in subsidiaries held by parties other than the parent be clearly identified, labeled, and presented in the consolidated balance sheet within equity, but separate from the parent's equity; (ii) the equity amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the consolidated income statement (consolidated net income and comprehensive income will be determined without deducting minority interest, however, earnings-per-share information will continue to be calculated on the basis of the net income attributable to the parent's shareholders); and (iii) changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary be accounted for consistently and similarly—as equity transactions.

This Statement is effective for fiscal years, and interim period within those fiscal years, beginning on or after December 15, 2008 (January 1, 2009 for us). Early adoption is not permitted. SFAS No. 160 shall be applied prospectively as of the beginning of the fiscal year in which it is initially applied, except for its presentation and disclosure requirements, which shall be applied retrospectively for all periods presented. We are currently reviewing the effects of this Statement.

19. Quarterly Financial Data (Unaudited)

	Operating Revenues	Operating Income	Income from Continuing Operations	Income from Discontinued Operations	Net Income
			(In millions)		
2007					
First Quarter(a)	$ 2,171.7	$ (75.5)	$ (156.6)	$ 7.1	$ (149.5)
Second Quarter	2,366.4	314.6	227.3	5.4	232.7
Third Quarter	2,230.8	311.4	205.2	8.6	213.8
Fourth Quarter	2,448.8	257.2	140.5	152.8	293.3
2006					
First Quarter	$ 2,413.3	$ 314.0	$ 249.9	$ 3.0	$ 252.9
Second Quarter	2,216.1	317.7	251.0	3.4	254.4
Third Quarter	2,296.8	311.4	227.1	2.4	229.5
Fourth Quarter	2,122.5	348.5	261.8	5.5	267.3

	Income (loss) from Continuing Operations	Income (loss) from Discontinued Operations	Net Income
Basic Limited Partners' income (loss) per Unit:			
2007			
First Quarter(a)	$ (1.27)	$ 0.03	$ (1.24)
Second Quarter	0.34	0.02	0.36
Third Quarter	0.21	0.03	0.24
Fourth Quarter	(0.12)	0.62	0.50
2006			
First Quarter	$ 0.54	$ 0.02	$ 0.56
Second Quarter	0.55	0.01	0.56
Third Quarter	0.41	0.01	0.42
Fourth Quarter	0.62	0.02	0.64
Diluted Limited Partners' income (loss) per Unit:			
2007			
First Quarter(a)	$ (1.27)	$ 0.04	$ (1.23)
Second Quarter	0.34	0.02	0.36
Third Quarter	0.21	0.03	0.24
Fourth Quarter	(0.12)	0.62	0.50
2006			
First Quarter	$ 0.54	$ 0.02	$ 0.56
Second Quarter	0.54	0.02	0.56
Third Quarter	0.41	0.01	0.42
Fourth Quarter	0.62	0.02	0.64

(a) 2007 first quarter includes an expense of $377.1 million attributable to a goodwill impairment charge recognized by Knight, as discussed in Notes 3 and 8.

20. Supplemental Information on Oil and Gas Producing Activities (Unaudited)

The Supplementary Information on Oil and Gas Producing Activities is presented as required by SFAS No. 69, "Disclosures about Oil and Gas Producing Activities." The supplemental information includes capitalized costs related to oil and gas producing activities; costs incurred for the acquisition of oil and gas producing activities, exploration and development activities; and the results of operations from oil and gas producing activities.

Supplemental information is also provided for per unit production costs; oil and gas production and average sales prices; the estimated quantities of proved oil and gas reserves; the standardized measure of discounted future net cash flows associated with proved oil and gas reserves; and a summary of the changes in the standardized measure of discounted future net cash flows associated with proved oil and gas reserves.

Our capitalized costs consisted of the following (in millions):

Capitalized Costs Related to Oil and Gas Producing Activities

	December 31,		
	2007	**2006**	**2005**
Consolidated Companies(a)			
Wells and equipment, facilities and other	$ 1,612.5	$ 1,369.5	$ 1,097.9
Leasehold	348.1	347.4	320.7
Total proved oil and gas properties	1,960.6	1,716.9	1,418.6
Accumulated depreciation and depletion	(725.5)	(470.2)	(303.3)
Net capitalized costs	$ 1,235.1	$ 1,246.7	$ 1,115.3

(a) Amounts relate to Kinder Morgan CO_2 Company, L.P. and its consolidated subsidaries. Includes capitalized asset retirement costs and associated accumulated depreciation. There are no capitalized costs associated with unproved oil and gas properties for the periods reported.

Our costs incurred for property acquisition, exploration and development were as follows (in millions):

Costs Incurred in Exploration, Property Acquisitions and Development

	Year Ended December 31,		
	2007	**2006**	**2005**
Consolidated Companies(a)			
Property Acquisition			
Proved oil and gas properties	$ —	$ 36.6	$ 6.4
Development	244.4	261.8	281.7

(a) Amounts relate to Kinder Morgan CO_2 Company, L.P. and its consolidated subsidaries. There are no capitalized costs associated with unproved oil and gas properties for the periods reported. All capital expenditures were made to develop our proved oil and gas properties and no exploration costs were incurred for the periods reported.

Our results of operations from oil and gas producing activities for each of the years 2007, 2006 and 2005 are shown in the following table (in millions):

Results of Operations for Oil and Gas Producing Activities

	Year Ended December 31,		
	2007	**2006**	**2005**
Consolidated Companies(a)			
Revenues(b)	$ 589.7	$ 524.7	$ 469.1
Expenses:			
Production costs	243.9	208.9	159.6
Other operating expenses(c)	56.9	66.4	59.0
Depreciation, depletion and amortization expenses	258.5	169.4	130.5
Total expenses	559.3	444.7	349.1
Results of operations for oil and gas producing activities	$ 30.4	$ 80.0	$ 120.0

(a) Amounts relate to Kinder Morgan CO_2 Company, L.P. and its consolidated subsidaries.

(b) Revenues include losses attributable to our hedging contracts of $434.2 million, $441.7 million and $374.3 million for the years ended December 31, 2007, 2006 and 2005, respectively.

(c) Consists primarily of carbon dioxide expense.

The table below represents estimates, as of December 31, 2007, of proved crude oil, natural gas liquids and natural gas reserves prepared by Netherland, Sewell and Associates, Inc. (independent oil and gas consultants) of Kinder Morgan CO_2 Company, L.P. and its consolidated subsidiaries' interests in oil and gas properties, all of which are located in the state of Texas. This data has been prepared using constant prices and costs, as discussed in subsequent paragraphs of this document. The estimates of reserves and future revenue in this document conforms to the guidelines of the United States Securities and Exchange Commission.

We believe the geologic and engineering data examined provides reasonable assurance that the proved reserves are recoverable in future years from known reservoirs under existing economic and operating conditions. Estimates of proved reserves are subject to change, either positively or negatively, as additional information becomes available and contractual and economic conditions change.

Proved oil and gas reserves are the estimated quantities of crude oil, natural gas and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, that is, prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not on escalations or declines based upon future conditions. Proved developed reserves are the quantities of crude oil, natural gas liquids and natural gas expected to be recovered through existing investments in wells and field infrastructure under current operating conditions. Proved undeveloped reserves require additional investments in wells and related infrastructure in order to recover the production.

During 2007, we filed estimates of our oil and gas reserves for the year 2006 with the Energy Information Administration of the U. S. Department of Energy on Form EIA-23. The data on Form EIA-23 was presented on a different basis, and included 100% of the oil and gas volumes from our operated properties only, regardless of our net interest. The difference between the oil reserves reported on Form EIA-23 and those reported in this report exceeds 5%.

Reserve Quantity Information

	Consolidated Companies(a)		
	Crude Oil (MBbls)	**NGLs (MBbls)**	**Nat. Gas (MMcf)(b)**
Proved developed and undeveloped reserves:			
As of December 31, 2004	123,731	20,245	1,590
Revisions of previous estimates(c)	9,807	(4,278)	1,608
Improved Recovery(d)	21,715	4,847	242
Production	(13,815)	(1,920)	(1,335)
Purchases of reserves in place	513	89	48
As of December 31, 2005	141,951	18,983	2,153
Revisions of previous estimates(e)	(4,615)	(6,858)	(1,408)
Production	(13,811)	(1,817)	(461)
Purchases of reserves in place	453	25	7
As of December 31, 2006	123,978	10,333	291
Revisions of previous estimates(f)	10,361	2,784	1,077
Production	(12,984)	(2,005)	(290)
As of December 31, 2007	121,355	11,112	1,078
Proved developed reserves:			
As of December 31, 2004	71,307	8,873	1,357
As of December 31, 2005	78,755	9,918	1,650
As of December 31, 2006	69,073	5,877	291
As of December 31, 2007	70,868	5,517	1,078

(a) Amounts relate to Kinder Morgan CO2 Company, L.P. and its consolidated subsidiaries.
(b) Natural gas reserves are computed at 14.65 pounds per square inch absolute and 60 degrees fahrenheit.
(c) Crude oil revisions are based on better than expected recoveries on the SACROC unit carbon dioxide flood project. Natural gas liquids revisions are based on a lower than expected natural gas liquid yield at the SACROC unit carbon dioxide flood project.
(d) Improved recovery is due to significant additional areas of the SACROC unit being added to the future carbon dioxide flood project.
(e) Based on lower than expected recoveries of a section of the SACROC unit carbon dioxide flood project.
(f) Associated with an expansion of the carbon dioxide flood project area of the SACROC unit.

The standardized measure of discounted cash flows and summary of the changes in the standardized measure computation from year-to-year are prepared in accordance with SFAS No. 69. The assumptions that underly the computation of the standardized measure of discounted cash flows may be summarized as follows:

- the standardized measure includes our estimate of proved crude oil, natural gas liquids and natural gas reserves and projected future production volumes based upon year-end economic conditions;
- pricing is applied based upon year-end market prices adjusted for fixed or determinable contracts that are in existence at year-end;
- future development and production costs are determined based upon actual cost at year-end;
- the standardized measure includes projections of future abandonment costs based upon actual costs at year-end; and
- a discount factor of 10% per year is applied annually to the future net cash flows.

Our standardized measure of discounted future net cash flows from proved reserves were as follows (in millions):

Standardized Measure of Discounted Future Net Cash Flows From Proved Oil and Gas Reserves

	As of December 31,		
	2007	**2006**	**2005**
Consolidated Companies(a)			
Future cash inflows from production	$ 12,099.5	$ 7,534.7	$ 9,150.6
Future production costs	(3,536.2)	(2,617.9)	(2,756.6)
Future development costs(b)	(1,919.2)	(1,256.8)	(869.0)
Undiscounted future net cash flows	6,644.1	3,660.0	5,525.0
10% annual discount	(2,565.7)	(1,452.2)	(2,450.0)
Standardized measure of discounted future net cash flows	$ 4,078.4	$ 2,207.8	$ 3,075.0

(a) Amounts relate to Kinder Morgan CO_2 Company, L.P. and its consolidated subsidaries.

(b) Includes abandonment costs.

The following table represents our estimate of changes in the standardized measure of discounted future net cash flows from proved reserves (in millions):

Changes in the Standardized Measure of Discounted Future Net Cash Flows From Proved Oil and Gas Reserves

	2007	**2006**	**2005**
Consolidated Companies(a)			
Present value as of January 1	$ 2,207.8	$ 3,075.0	$ 2,045.0
Changes during the year:			
Revenues less production and other costs(b)	(722.1)	(690.0)	(624.4)
Net changes in prices, production and other costs(b)	2,153.2	(123.0)	1,013.4
Development costs incurred	244.5	261.8	281.7
Net changes in future development costs	(547.8)	(446.0)	(492.3)
Purchases of reserves in place	—	3.2	9.4
Revisions of previous quantity estimates(c)	510.8	(179.5)	51.1
Improved Recovery(d)	—	—	587.5
Accretion of discount	198.1	307.4	204.4
Timing differences and other	33.9	(1.1)	(0.8)
Net change for the year	1,870.6	(867.2)	1,030.0
Present value as of December 31	$ 4,078.4	$ 2,207.8	$ 3,075.0

(a) Amounts relate to Kinder Morgan CO2 Company, L.P. and its consolidated subsidaries.
(b) Excludes the effect of losses attributable to our hedging contracts of $434.2 million, $441.7 million and $374.3 million for the years ended December 31, 2007, 2006 and 2005, respectively.
(c) 2007 revisions are associated with an expansion of the carbon dioxide flood project area for the SACROC unit. 2006 revisions are based on lower than expected recoveries from a section of the SACROC unit carbon dioxide flood project. 2005 revisions are based on better than expected crude oil recoveries on the SACROC unit carbon dioxide flood project, partially offset by a lower than expected natural gas liquids yield at the SACROC unit carbon dioxide flood project.
(d) Improved recovery is due to significant additional areas of the SACROC unit being added to the future carbon dioxide flood project.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

KINDER MORGAN ENERGY PARTNERS, L.P.
(A Delaware Limited Partnership)

By: **KINDER MORGAN G.P., INC.,**
its sole General Partner

By: **KINDER MORGAN MANAGEMENT, LLC,**
the Delegate of Kinder Morgan G.P., Inc.

By: /s/ KIMBERLY A. DANG

Kimberly A. Dang,
Vice President and Chief Financial Officer

Date: February 25, 2008

Pursuant to the requirements of the Securities Exchange Act of 1934, this report has been signed below by the following persons in the capacities and on the dates indicated.

Section 2: EX-4 (EXHIBIT 4.28)

KINDER MORGAN MANAGEMENT, LLC

KINDER MORGAN G.P., INC.

OFFICERS' CERTIFICATE
PURSUANT TO SECTION 301 OF INDENTURE

Each of the undersigned, Kimberly A. Dang and David D. Kinder, the Vice President and Chief Financial Officer and the Vice President and Treasurer, respectively, of (i) Kinder Morgan Management, LLC (the "Company"), a Delaware limited liability company and the delegate of Kinder Morgan G.P., Inc. and (ii) Kinder Morgan G.P., Inc., a Delaware corporation and the general partner of Kinder Morgan Energy Partners, L.P., a Delaware limited partnership (the "Partnership"), on behalf of the Partnership, does hereby establish the terms of a series of senior debt Securities of the Partnership under the Indenture relating to senior debt Securities, dated as of January 31, 2003 (the "Indenture"), between the Partnership and U.S. Bank National Association, as successor trustee to Wachovia Bank, National Association (the "Trustee"), pursuant to resolutions adopted by the Board of Directors of the Company, or a committee thereof, on February 28, 2007, February 4, 2008 and February 5, 2008 and in accordance with Section 301 of the Indenture, as follows:

1. The title of the Securities shall be "5.95% Senior Notes due 2018" (the "Notes");

2. The aggregate principal amount of the Notes which initially may be authenticated and delivered under the Indenture shall be limited to a maximum of $600,000,000, except for Notes authenticated and delivered upon registration of transfer of, or in exchange for, or in lieu of, other Notes pursuant to the terms of the Indenture, and except that any additional principal amount of the Notes may be issued in the future without the consent of Holders of the Notes so long as such additional principal amount of Notes are authenticated as required by the Indenture;

3. The Notes shall be issued on February 12, 2008, and the principal of the Notes shall be payable on February 15, 2018; the Notes will not be entitled to the benefit of a sinking fund;

4. The Notes shall bear interest at the rate of 5.95% per annum, which interest shall accrue from February 12, 2008, or from the most recent Interest Payment Date to which interest has been paid or duly provided for, which dates shall be February 15 and August 15 of each year, and such interest shall be payable semi-annually in arrears on February 15 and August 15 of each year, commencing August 15, 2008, to holders of record at the close of business on the February 1 or August 1, respectively, next preceding each such Interest Payment Date;

5. The principal of, premium, if any, and interest on, the Notes shall be payable at the office or agency of the Partnership maintained for that purpose in the Borough of Manhattan, New York, New York; provided, however, that at the option of the Partnership, payment of interest may be made from such office in the Borough of Manhattan, New York, New York by check mailed to the address of the person entitled thereto as such address shall appear in the Security Register. If at any time there shall be no such office or agency in the Borough of Manhattan, New York, New York, where the Notes may be presented or surrendered for

payment, the Partnership shall forthwith designate and maintain such an office or agency in the Borough of Manhattan, New York, New York, in order that the Notes shall at all times be payable in the Borough of Manhattan, New York, New York. The Partnership hereby initially designates the Corporate Trust Office of the Trustee in the Borough of Manhattan, New York, New York, as one such office or agency;

6. U.S. Bank National Association, successor trustee to Wachovia Bank, National Association, is appointed as the Trustee for the Notes, and U.S. Bank National Association, and any other banking institution hereafter selected by the officers of the Company, on behalf of the Partnership, are appointed agents of the Partnership (a) where the Notes may be presented for registration of transfer or exchange, (b) where notices and demands to or upon the Partnership in respect of the Notes or the Indenture may be made or served and (c) where the Notes may be presented for payment of principal and interest;

7. The Notes will be redeemable, at the Partnership's option, at any time in whole, or from time to time in part, upon not less than 30 and not more than 60 days notice mailed to each Holder of the Notes to be redeemed at the Holder's address appearing in the Security Register, at a price equal to 100% of the principal amount of the Notes to be redeemed plus accrued interest to the Redemption Date, subject to the right of Holders of record on the relevant Record Date to receive interest due on an Interest Payment Date that is on or prior to the Redemption Date, plus a make-whole premium, if any. In no event will the Redemption Price ever be less than 100% of the principal amount of the Notes being redeemed plus accrued interest to the Redemption Date.

The amount of the make-whole premium on any Note, or portion of a Note, to be redeemed will be equal to the excess, if any, of:

(1) the sum of the present values, calculated as of the Redemption Date, of:

- each interest payment that, but for the redemption, would have been payable on the Note, or portion of a Note, being redeemed on each interest payment date occurring after the Redemption Date, excluding any accrued interest for the period prior to the Redemption Date; and

- the principal amount that, but for the redemption, would have been payable at the stated maturity of the Note, or portion of a Note, being redeemed;

over

(2) the principal amount of the Note, or portion of a Note, being redeemed.

The present value of interest and principal payments referred to in clause (1) above will be determined in accordance with generally accepted principles of financial analysis. The present values will be calculated by discounting the amount of each payment of interest or principal from the date that each such payment would have been payable, but for the redemption, to the Redemption Date at a discount rate equal to the Treasury Yield, as defined below, plus 0.40%.

The make-whole premium will be calculated by an independent investment banking institution of national standing appointed by the Partnership. If the Partnership fails to make that appointment at least 30 business days prior to the redemption date, or if the institution so appointed is unwilling or unable to make the calculation, the financial institution named in the Notes will make the calculation. If the financial institution named in the Notes is unwilling or unable to make the calculation, an independent investment banking institution of national standing appointed by the Trustee will make the calculation.

For purposes of determining the make-whole premium, Treasury Yield refers to an annual rate of interest equal to the weekly average yield to maturity of United States Treasury Notes that have a constant maturity that corresponds to the remaining term to maturity of the Notes to be redeemed, calculated to the nearer 1/12 of a year (the "Remaining Term"). The Treasury Yield will be determined as of the third business day immediately preceding the applicable redemption date.

The weekly average yields of United States Treasury Notes will be determined by reference to the most recent statistical release published by the Federal Reserve Bank of New York and designated "H.15(519) Selected Interest Rates" or any successor release (the "H.15 Statistical Release"). If the H.15 Statistical Release sets forth a weekly average yield for United States Treasury Notes having a constant maturity that is the same as the Remaining Term of the Notes to be redeemed, then the Treasury Yield will be equal to that weekly average yield. In all other cases, the Treasury Yield will be calculated by interpolation, on a straight-line basis, between the weekly average yields on the United States Treasury Notes that have a constant maturity closest to and greater than the Remaining Term of the Notes to be redeemed and the United States Treasury Notes that have a constant maturity closest to and less than the Remaining Term, in each case as set forth in the H.15 Statistical Release. Any weekly average yields so calculated by interpolation will be rounded to the nearer 0.01%, with any figure of 0.0050% or more being rounded upward. If weekly average yields for United States Treasury Notes are not available in the H.15 Statistical Release or otherwise, then the Treasury Yield will be calculated by interpolation of comparable rates selected by the independent investment banking institution.

If less than all of the Notes are to be redeemed, the Trustee will select the Notes to be redeemed by a method that the Trustee deems fair and appropriate. The Trustee may select for redemption Notes and portions of Notes in amounts of $1,000 or whole multiples of $1,000.

8. Payment of principal of, and interest on, the Notes shall be without deduction for taxes, assessments or governmental charges paid by Holders of the Notes;

9. The Notes are approved in the form attached hereto as Exhibit A, shall be issued upon original issuance in whole in the form of one or more book-entry Global Securities, and the Depositary shall be The Depository Trust Company; and

10. The Notes shall be entitled to the benefits of the Indenture, including the covenants and agreements of the Partnership set forth therein, except to the extent expressly otherwise provided herein or in the Notes.

Any initially capitalized terms not otherwise defined herein shall have the meanings ascribed to such terms in the Indenture.

IN WITNESS WHEREOF, each of the undersigned has hereunto signed his or her name this 5th day of February, 2008.

KINDER MORGAN ENERGY PARTNERS, L.P. AND SUBSIDIARIES
EXHIBIT 31.1 – CERTIFICATION PURSUANT TO RULE 13A-14(A) OR 15D-14(A) OF THE SECURITIES EXCHANGE ACT OF 1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Richard D. Kinder, certify that:

1. I have reviewed this annual report on Form 10-K of Kinder Morgan Energy Partners, L.P.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c) evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d) disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and
5. The registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent function):
   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and
   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial information.

GLOSSARY OF TERMS

Frequently used abbreviations, acronyms, or terms used in this report:

National Fuel Gas Companies

Company	The Registrant, the Registrant and its subsidiaries or the Registrant's subsidiaries as appropriate in the context of the disclosure
Data-Track	Data-Track Account Services, Inc.
Distribution Corporation	National Fuel Gas Distribution Corporation
Empire	Empire State Pipeline
ESNE	Energy Systems North East, LLC
Highland	Highland Forest Resources, Inc.
Horizon	Horizon Energy Development, Inc.
Horizon LFG	Horizon LFG, Inc.
Horizon Power	Horizon Power, Inc.
Leidy Hub	Leidy Hub, Inc.
Model City	Model City Energy, LLC
National Fuel	National Fuel Gas Company
NFR	National Fuel Resources, Inc.
Registrant	National Fuel Gas Company
SECI	Seneca Energy Canada Inc.
Seneca	Seneca Resources Corporation
Seneca Energy	Seneca Energy II, LLC
Supply Corporation	National Fuel Gas Supply Corporation

Regulatory Agencies

FASB	Financial Accounting Standards Board
FERC	Federal Energy Regulatory Commission
NTSB	National Transportation Safety Board
NYDEC	New York State Department of Environmental Conservation
NYPSC	State of New York Public Service Commission
PaPUC	Pennsylvania Public Utility Commission
SEC	Securities and Exchange Commission

Other

2007 Form 10-K	The Company's Annual Report on Form 10-K for the year ended September 30, 2007
ARB 51	Accounting Research Bulletin No. 51, Consolidated Financial Statements
Bbl	Barrel (of oil)
Bcf	Billion cubic feet (of natural gas)
Board foot	A measure of lumber and/or timber equal to 12 inches in length by 12 inches in width by one inch in thickness.
Btu	British thermal unit; the amount of heat needed to raise the temperature of one pound of water one degree Fahrenheit.
Capital expenditure	Represents additions to property, plant, and equipment, or the amount of money a company spends to buy capital assets or upgrade its existing capital assets.
Cashout revenues	A cash resolution of a gas imbalance whereby a customer pays Supply Corporation for gas the customer receives in excess of amounts delivered into Supply Corporation's system by the customer's shipper.
Degree day	A measure of the coldness of the weather experienced, based on the extent to which the daily average temperature falls below a reference temperature, usually 65 degrees Fahrenheit.
Derivative	A financial instrument or other contract, the terms of which include an underlying variable (a price, interest rate, index rate, exchange rate, or other variable) and a notional amount (number of units, barrels, cubic feet, etc.). The terms also permit for the instrument or contract to be settled net and no initial net investment is required to enter into the financial instrument or contract. Examples include futures contracts, options, no cost collars and swaps.
Dth	Decatherm; one Dth of natural gas has a heating value of 1,000,000 British thermal units, approximately equal to the heating value of 1 Mcf of natural gas.

Table of Contents

GLOSSARY OF TERMS (Cont.)

Exchange Act	Securities Exchange Act of 1934, as amended
Expenditures for long-lived assets	Includes capital expenditures, stock acquisitions and/or investments in partnerships.
FIN	FASB Interpretation Number
FIN 48	FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes - an interpretation of SFAS 109
Firm transportation and/or storage	The transportation and/or storage service that a supplier of such service is obligated by contract to provide and for which the customer is obligated to pay whether or not the service is utilized.
GAAP	Accounting principles generally accepted in the United States of America
Goodwill	An intangible asset representing the difference between the fair value of a company and the price at which a company is purchased.
Hedging	A method of minimizing the impact of price, interest rate, and/or foreign currency exchange rate changes, often times through the use of derivative financial instruments.
Hub	Location where pipelines intersect enabling the trading, transportation, storage, exchange, lending and borrowing of natural gas.
Interruptible transportation and/or storage	The transportation and/or storage service that, in accordance with contractual arrangements, can be interrupted by the supplier of such service, and for which the customer does not pay unless utilized.
LIFO	Last-in, first-out
Mbbl	Thousand barrels (of oil)
Mcf	Thousand cubic feet (of natural gas)
MD&A	Management's Discussion and Analysis of Financial Condition and Results of Operations
MDth	Thousand decatherms (of natural gas)
MMcf	Million cubic feet (of natural gas)
Open Season	A bidding procedure used by pipelines to allocate firm transportation or storage capacity among prospective shippers, in which all bids submitted during a defined time period are evaluated as if they had been submitted simultaneously.
Proved developed reserves	Reserves that can be expected to be recovered through existing wells with existing equipment and operating methods.
Proved undeveloped reserves	Reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required to make these reserves productive.
PRP	Potentially responsible party
Reserves	The unproduced but recoverable oil and/or gas in place in a formation which has been proven by production.
Restructuring	Generally referring to partial "deregulation" of the utility industry by a statutory or regulatory process. Restructuring of federally regulated natural gas pipelines has resulted in the separation (or "unbundling") of gas commodity service from transportation service for wholesale and large-volume retail markets. State restructuring programs attempt to extend the same process to retail mass markets.
SAR	Stock-settled stock appreciation right
SFAS	Statement of Financial Accounting Standards
SFAS 87	Statement of Financial Accounting Standards No. 87, Employers' Accounting for Pensions
SFAS 88	Statement of Financial Accounting Standards No. 88, Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits
SFAS 106	Statement of Financial Accounting Standards No. 106, Employers' Accounting for Postretirement Benefits Other Than Pensions
SFAS 109	Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes

Table of Contents

GLOSSARY OF TERMS (Concl.)

SFAS 115	Statement of Financial Accounting Standards No. 115, Accounting for Certain Investments in Debt and Equity Securities
SFAS 123R	Statement of Financial Accounting Standards No. 123R, Share-Based Payment
SFAS 132R	Statement of Financial Accounting Standards No. 132R, Employers' Disclosures about Pensions and Other Postretirement Benefits
SFAS 133	Statement of Financial Accounting Standards No. 133, Accounting for Derivative Instruments and Hedging Activities
SFAS 141R	Statement of Financial Accounting Standards No. 141R, Business Combinations
SFAS 157	Statement of Financial Accounting Standards No. 157, Fair Value Measurements
SFAS 158	Statement of Financial Accounting Standards No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an Amendment of SFAS 87, 88, 106, and 132R
SFAS 159	Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities — Including an Amendment of SFAS 115
SFAS 160	Statement of Financial Accounting Standards No. 160, Noncontrolling Interests in Consolidated Financial Statements, an Amendment of ARB 51
SFAS 161	Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities, an Amendment of SFAS 133
Stock acquisitions	Investments in corporations.
Unbundled service	A service that has been separated from other services, with rates charged that reflect only the cost of the separated service.
VEBA	Voluntary Employees' Beneficiary Association
WNC	Weather normalization clause; a clause in utility rates which adjusts customer rates to allow a utility to recover its normal operating costs calculated at normal temperatures. If temperatures during the measured period are warmer than normal, customer rates are adjusted upward in order to recover projected operating costs. If temperatures during the measured period are colder than normal, customer rates are adjusted downward so that only the projected operating costs will be recovered.

INDEX

§ The Company has nothing to report under this item.

Reference to the "Company" in this report means the Registrant or the Registrant and its subsidiaries collectively, as appropriate in the context of the disclosure. All references to a certain year in this report are to the Company's fiscal year ended September 30 of that year, unless otherwise noted.

This Form 10-Q contains "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934. Forward-looking statements should be read with the cautionary statements and important factors included in this Form 10-Q at Item 2 — MD&A, under the heading "Safe Harbor for Forward-Looking Statements." Forward-looking statements are all statements other than statements of historical fact, including, without limitation, statements regarding future prospects, plans, performance and capital structure, anticipated capital expenditures, completion of construction projects, projections for pension and other post-retirement benefit obligations, impacts of the adoption of new accounting rules, and possible outcomes of litigation or regulatory proceedings, as well as statements that are identified by the use of the words "anticipates," "estimates," "expects," "forecasts," "intends," "plans," "predicts," "projects," "believes," "seeks," "will," "may," and similar expressions.

Item 1. Financial Statements (Cont.)

National Fuel Gas Company
Notes to Condensed Consolidated Financial Statements
(Unaudited)

Note 1 — Summary of Significant Accounting Policies

Principles of Consolidation. The Company consolidates its majority owned entities. The equity method is used to account for minority owned entities. All significant intercompany balances and transactions are eliminated.

The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Reclassification. Certain prior year amounts have been reclassified to conform with current year presentation.

Earnings for Interim Periods. The Company, in its opinion, has included all adjustments that are necessary for a fair statement of the results of operations for the reported periods. The consolidated financial statements and notes thereto, included herein, should be read in conjunction with the financial statements and notes for the years ended September 30, 2007, 2006 and 2005 that are included in the Company's 2007 Form 10-K. The consolidated financial statements for the year ended September 30, 2008 will be audited by the Company's independent registered public accounting firm after the end of the fiscal year.

The earnings for the nine months ended June 30, 2008 should not be taken as a prediction of earnings for the entire fiscal year ending September 30, 2008. Most of the business of the Utility and Energy Marketing segments is seasonal in nature and is influenced by weather conditions. Due to the seasonal nature of the heating business in the Utility and Energy Marketing segments, earnings during the winter months normally represent a substantial part of the earnings that those segments are expected to achieve for the entire fiscal year. The Company's business segments are discussed more fully in Note 6 – Business Segment Information.

Consolidated Statement of Cash Flows. For purposes of the Consolidated Statement of Cash Flows, the Company considers all highly liquid debt instruments purchased with a maturity of generally three months or less to be cash equivalents. At June 30, 2008, the Company accrued $19.9 million of capital expenditures related to the construction of the Empire Connector project. This amount has been excluded from the Consolidated Statement of Cash Flows at June 30, 2008 since it represents a non-cash investing activity at that date.

Hedging Collateral Deposits. Cash held in margin accounts serves as collateral for open positions on exchange-traded futures contracts, exchange-traded options and over-the-counter swaps and collars.

Cash Held in Escrow. On August 31, 2007, the Company received approximately $232.1 million of proceeds from the sale of SECI, of which $58.0 million was placed in escrow pending receipt of a tax clearance certificate from the Canadian government. The escrow account was a Canadian dollar denominated account. On a U.S. dollar basis, the value of this account was $62.0 million at September 30, 2007. In December 2007, the Canadian government issued the tax clearance certificate, thereby releasing the proceeds from restriction as of December 31, 2007. To hedge against foreign currency exchange risk related to the cash being held in escrow, the Company held a forward contract to sell Canadian dollars. For presentation purposes on the Consolidated Statement of Cash Flows, for the nine months ended June 30, 2008, the Cash Held in Escrow line item within Investing Activities reflects the net proceeds to the Company (received on January 8, 2008) after adjusting for the impact of the foreign currency hedge.

Table of Contents

Item 1. Financial Statements (Cont.)

Gas Stored Underground — Current. In the Utility segment, gas stored underground – current is carried at lower of cost or market, on a LIFO method. Gas stored underground – current normally declines during the first and second quarters of the year and is replenished during the third and fourth quarters. In the Utility segment, the current cost of replacing gas withdrawn from storage is recorded in the Consolidated Statements of Income and a reserve for gas replacement is recorded in the Consolidated Balance Sheets under the caption "Other Accruals and Current Liabilities." Such reserve, which amounted to $77.9 million at June 30, 2008, is reduced to zero by September 30 of each year as the inventory is replenished.

Accumulated Other Comprehensive Income (Loss). The components of Accumulated Other Comprehensive Income (Loss), net of related tax effect, are as follows (in thousands):

	At June 30, 2008	At September 30, 2007
Funded Position of the Pension and Other Post-Retirement Benefit Plans Adjustment	$ (12,482)	$ (12,482)
Cumulative Foreign Currency Translation Adjustment	(155)	(83)
Net Unrealized Loss on Derivative Financial Instruments	(100,095)	(3,886)
Net Unrealized Gain on Securities Available for Sale	6,860	10,248
Accumulated Other Comprehensive Loss	$ (105,872)	$ (6,203)

Earnings Per Common Share. Basic earnings per common share is computed by dividing income available for common stock by the weighted average number of common shares outstanding for the period. Diluted earnings per common share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. For purposes of determining earnings per common share, the only potentially dilutive securities the Company has outstanding are stock options and stock-settled SARs. The diluted weighted average shares outstanding shown on the Consolidated Statements of Income reflects the potential dilution as a result of these stock options and stock-settled SARs as determined using the Treasury Stock Method. Stock options and stock-settled SARs that are antidilutive are excluded from the calculation of diluted earnings per common share. For the quarter and nine months ended June 30, 2008, there were no stock options excluded as being antidilutive. There were 6,593 and 2,190 stock-settled SARs excluded as being antidilutive for the quarter and nine months ended June 30, 2008, respectively. For the quarter and nine months ended June 30, 2007, there were no stock options excluded as being antidilutive. There were 1,817 and 271 stock-settled SARs excluded as being antidilutive for the quarter and nine months ended June 30, 2007, respectively.

Share Repurchases. The Company considers all shares repurchased as cancelled shares restored to the status of authorized but unissued shares, in accordance with New Jersey law. The repurchases are accounted for on the date the share repurchase is settled as an adjustment to common stock (at par value) with the excess repurchase price allocated between paid in capital and retained earnings. Refer to Note 3 – Capitalization for further discussion of the share repurchase program.

Stock-Based Compensation. For the quarter ended June 30, 2008, the Company granted 30,000 performance-based stock-settled SARs having a weighted average exercise price of $58.99 per share. For the nine months ended June 30, 2008, the Company granted 321,000 performance-based stock-settled SARs having a weighted average exercise price of $48.46 per share. The weighted average grant date fair value of these stock-settled SARs was $12.23 per share and $9.06 per share for the quarter and nine months ended June 30, 2008, respectively. The accounting treatment for such stock-settled SARs is the same under SFAS 123R as the accounting for stock options under SFAS 123R. The stock-settled SARs granted for the quarter and nine months ended June 30, 2008 vest and become exercisable annually in one-third increments, provided that a performance condition for diluted earnings per share is met for the prior fiscal year. The weighted average grant date fair value of these stock-settled SARs

Table of Contents

Item 1. Financial Statements (Cont.)

granted during the quarter and nine months ended June 30, 2008 was estimated on the date of grant using the same accounting treatment that is applied for stock options under SFAS 123R, and assumes that the performance conditions specified will be achieved. If such conditions are not met, no compensation expense is recognized and any recognized compensation expense is reversed.

There were no stock options granted during the quarter and nine months ended June 30, 2008. The Company granted 25,000 restricted share awards (non-vested stock as defined in SFAS 123R) during the nine months ended June 30, 2008. The weighted average fair value of such restricted shares was $48.41 per share. There were no restricted share awards granted during the quarter ended June 30, 2008.

New Accounting Pronouncements. In September 2006, the FASB issued SFAS 157, “Fair Value Measurements”. SFAS 157 provides guidance for using fair value to measure assets and liabilities. The pronouncement serves to clarify the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect that fair-value measurements have on earnings. SFAS 157 is to be applied whenever another standard requires or allows assets or liabilities to be measured at fair value. In accordance with FASB Staff Position FAS No. 157-2, SFAS 157 is effective for financial assets and financial liabilities that are recognized or disclosed at fair value on a recurring basis as of the Company’s first quarter of fiscal 2009. The same FASB Staff Position delays the effective date for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value on a recurring basis, until the Company’s first quarter of fiscal 2010. The Company is currently evaluating the impact that the adoption of SFAS 157 will have on its consolidated financial statements.

In September 2006, the FASB also issued SFAS 158, “Employer’s Accounting for Defined Benefit Pension and Other Postretirement Plans” (an amendment of SFAS 87, SFAS 88, SFAS 106, and SFAS 132R). SFAS 158 requires that companies recognize a net liability or asset to report the underfunded or overfunded status of their defined benefit pension and other post-retirement benefit plans on their balance sheets, as well as recognize changes in the funded status of a defined benefit post-retirement plan in the year in which the changes occur through comprehensive income. The pronouncement also specifies that a plan’s assets and obligations that determine its funded status be measured as of the end of the Company’s fiscal year, with limited exceptions. In accordance with SFAS 158, the Company has recognized the funded status of its benefit plans and implemented the disclosure requirements of SFAS 158 at September 30, 2007. The requirement to measure the plan assets and benefit obligations as of the Company’s fiscal year-end date will be adopted by the Company by the end of fiscal 2009. Currently, the Company measures its plan assets and benefit obligations using a June 30th measurement date.

In February 2007, the FASB issued SFAS 159, “The Fair Value Option for Financial Assets and Financial Liabilities — Including an Amendment of SFAS 115.” SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not otherwise required to be measured at fair value under GAAP. A company that elects the fair value option for an eligible item will be required to recognize in current earnings any changes in that item’s fair value in reporting periods subsequent to the date of adoption. SFAS 159 is effective as of the Company’s first quarter of fiscal 2009. The Company is currently evaluating the impact, if any, that the adoption of SFAS 159 will have on its consolidated financial statements.

In December 2007, the FASB issued SFAS 141R, “Business Combinations.” SFAS 141R will significantly change the accounting for business combinations in a number of areas including the treatment of contingent consideration, contingencies, acquisition costs, in process research and development and restructuring costs. In addition, under SFAS 141R, changes in deferred tax asset valuation allowances and acquired income tax uncertainties in a business combination after the measurement period will impact income tax expense. SFAS 141R is effective as of the Company’s first quarter of fiscal 2010.

In December 2007, the FASB issued SFAS 160, “Noncontrolling Interests in Consolidated Financial Statements, an Amendment of ARB 51.” SFAS 160 will change the accounting and reporting for minority interests, which will be recharacterized as noncontrolling interests (NCI) and classified as a

Table of Contents

Item 1. Financial Statements (Cont.)

component of equity. This new consolidation method will significantly change the accounting for transactions with minority interest holders. SFAS 160 is effective as of the Company's first quarter of fiscal 2010. The Company currently does not have any NCI.

In March 2008, the FASB issued SFAS 161, "Disclosures about Derivative Instruments and Hedging Activities, an Amendment of SFAS 133." SFAS 161 requires entities to provide enhanced disclosures related to an entity's derivative instruments and hedging activities in order to enable investors to better understand how derivative instruments and hedging activities impact an entity's financial reporting. The additional disclosures include how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS 133 and its related interpretations, and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. SFAS 161 is effective as of the Company's second quarter of fiscal 2009. The Company is currently evaluating the impact that the adoption of SFAS 161 will have on its disclosures in its notes to its consolidated financial statements.

Note 2 — Income Taxes

The components of federal, state and foreign income taxes included in the Consolidated Statements of Income are as follows (in thousands):

	Nine Months Ended June 30, 2008	Nine Months Ended June 30, 2007
Operating Expenses:		
Current Income Taxes		
Federal	$ 92,384	$ 65,629
State	23,388	19,259
Foreign	90	22
Deferred Income Taxes		
Federal	18,906	18,221
State	8,697	5,270
Foreign	—	3,616
	143,465	112,017

Total Income Taxes	$142,942	$111,494
Presented as Follows:		
Other Income	$ (523)	$ (523)
Income Tax Expense – Continuing Operations	143,465	108,804
Income from Discontinued Operations	—	3,213
Total Income Taxes	$142,942	$111,494

The U.S. and foreign components of income before income taxes are as follows (in thousands):

	Nine Months Ended June 30, 2008	Nine Months Ended June 30, 2007
U.S.	$368,191	$275,196
Foreign	214	16,063
	$368,405	$291,259

Table of Contents

Item 1. Financial Statements (Cont.)

Total income taxes as reported differ from the amounts that were computed by applying the federal income tax rate to income before income taxes. The following is a reconciliation of this difference (in thousands):

	Nine Months Ended June 30, 2008	2007
Income Tax Expense, Computed at Statutory Rate of 35%	$128,942	$101,941
Increase (Reduction) in Taxes Resulting From:		
State Income Taxes	20,855	15,944
Miscellaneous	(6,855)	(6,391)
Total Income Taxes	$142,942	$111,494

Significant components of the Company's deferred tax liabilities and assets are as follows (in thousands):

	At June 30, 2008	At September 30, 2007
Deferred Tax Liabilities:		
Property, Plant and Equipment	$ 669,079	$ 612,648
Other	38,451	61,616
Total Deferred Tax Liabilities	707,530	674,264
Deferred Tax Assets:		
Fair Value of Derivative Instruments and Securities	(65,192)	—
Other	(120,817)	(107,458)
Total Deferred Tax Assets	(186,009)	(107,458)
Total Net Deferred Income Taxes	$ 521,521	$ 566,806
Presented as Follows:		
Net Deferred Tax Asset – Current	$ (84,297)	$ (8,550)
Net Deferred Tax Liability – Non-Current	605,818	575,356
Total Net Deferred Income Taxes	$ 521,521	$ 566,806

Regulatory liabilities representing the reduction of previously recorded deferred income taxes with rate-regulated activities that are expected to be refundable to customers amounted to $14.0 million at both June 30, 2008 and September 30, 2007. Also, regulatory assets representing future amounts collectible from customers, corresponding to additional deferred income taxes not previously recorded because of prior ratemaking practices, amounted to $83.5 million and $84.0 million at June 30, 2008 and September 30, 2007, respectively.

The Company adopted FIN 48 on October 1, 2007. As of the date of adoption, a cumulative effect adjustment was recorded that resulted in a decrease to retained earnings of $0.4 million. Upon adoption, the unrecognized tax benefits were $1.7 million, all of which would impact the effective tax rate (net of federal benefit) if recognized. There has been no change in the balance of unrecognized tax benefits through June 30, 2008 and the Company does not anticipate any significant change in this liability over the next twelve months.

The Company recognizes estimated interest payable relating to income taxes in Other Interest Expense and estimated penalties relating to income taxes in Other Income. The Company has accrued interest of $0.5 million through June 30, 2008 and has not accrued any penalties.

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1302 of 2431

Table of Contents

Item 1. Financial Statements (Cont.)

The Company files U.S. federal and various state income tax returns. The Internal Revenue Service (IRS) is currently conducting an examination of the Company for fiscal 2008 in accordance with the Compliance Assurance Process ("CAP"). The CAP audit employs a real time review of the Company's books and tax records by the IRS that is intended to permit issue resolution prior to the filing of the tax return. The IRS has issued a Full Acceptance Letter for the fiscal 2007 CAP audit, and is in the process of completing the post-filing review of this return. While the federal statute of limitations remains open for fiscal 2005 and later years, IRS examinations for years prior to fiscal 2007 have been completed and the Company believes such years are effectively settled.

For the major states in which the various subsidiary companies operate, the earliest tax year open for examination is as follows:

New York	Fiscal 2002
Pennsylvania	Fiscal 2003
California	Fiscal 2003
Texas	Fiscal 2003

Note 3 — Capitalization

Common Stock. During the nine months ended June 30, 2008, the Company issued 884,644 original issue shares of common stock as a result of stock option exercises and 25,000 original issue shares for restricted stock awards (non-vested stock as defined in SFAS 123R). The Company also issued 7,200 original issue shares of common stock to the eight non-employee directors of the Company who receive compensation under the Company's Retainer Policy for Non-Employee Directors, as partial consideration for the directors' services during the nine months ended June 30, 2008. Holders of stock options or restricted stock will often tender shares of common stock to the Company for payment of option exercise prices and/or applicable withholding taxes. During the nine months ended June 30, 2008, 72,205 shares of common stock were tendered to the Company for such purposes. The Company considers all shares tendered as cancelled shares restored to the status of authorized but unissued shares, in accordance with New Jersey law.

On December 8, 2005, the Company's Board of Directors authorized the Company to implement a share repurchase program, whereby the Company may repurchase outstanding shares of common stock, up to an aggregate amount of 8 million shares in the open market or through privately negotiated transactions. During the nine months ended June 30, 2008, the Company repurchased 2,832,397 shares for $129.6 million under this program, funded with cash provided by operating activities. Since the repurchase program was implemented, the Company has repurchased 6,667,275 shares for $262.8 million.

Shareholder Rights Plan. On February 21, 2008, the Board of Directors of the Company approved amendments to the Company's Amended and Restated Rights Agreement (the "Rights Agreement"). The amendments modify the rights of holders of the Company's Common Stock Purchase Rights (the "Rights"). The principal amendments are an extension of the expiration date of the Rights Agreement from July 31, 2008 to July 31, 2018 and an increase in the exercise price of the Rights from $65 to $150 per full share. The Board also approved amendments to the Rights Agreement (i) to provide that the phrase "then outstanding," when used with reference to a person's beneficial ownership of securities of the Company, means the number of securities then issued and outstanding together with the number of such securities not then actually issued and outstanding which such person would be deemed to own beneficially under the Rights Agreement, including, among other things, certain derivative or synthetic arrangements having characteristics of a long position in the Company's common stock, (ii) to eliminate certain restrictive covenants that would have applied to the Company after the distribution date of the Rights, and (iii) to clarify and update the Rights Agreement in various respects. The Company, on July 11, 2008, entered into an amended and restated Rights Agreement, reflecting the changes described in this paragraph, with the Bank of New York, as Rights Agent, and on July 15, 2008, filed with the SEC copies of that agreement as exhibits to Forms 8-A and Form 8-K.

Item 1. Financial Statements (Cont.)

Long-Term Debt. In April 2008, the Company issued $300.0 million of 6.50% senior, unsecured notes in a private placement exempt from registration under the Securities Act of 1933. The notes have a term of 10 years, with a maturity date in April 2018. The holders of the notes may require the Company to repurchase their notes in the event of a change in control at a price equal to 101% of the principal amount. In addition, the Company is required to either offer to exchange the notes for substantially similar notes as are registered under the Securities Act of 1933 or, in certain circumstances, register the resale of the notes. The Company used $200.0 million of the proceeds to refund $200.0 million of 6.303% medium-term notes that subsequently matured on May 27, 2008.

Note 4 — Commitments and Contingencies

Environmental Matters. The Company is subject to various federal, state and local laws and regulations relating to the protection of the environment. The Company has established procedures for the ongoing evaluation of its operations to identify potential environmental exposures and comply with regulatory policies and procedures. It is the Company's policy to accrue estimated environmental clean-up costs (investigation and remediation) when such amounts can reasonably be estimated and it is probable that the Company will be required to incur such costs.

As disclosed in Note H of the Company's 2007 Form 10-K, the Company received, in 1998 and again in October 1999, notice that the NYDEC believes the Company is responsible for contamination discovered at a former manufactured gas plant site located in New York for which the Company had not been named as a PRP. In February 2007, the NYDEC identified the Company as a PRP for the site and issued a proposed remedial action plan. The NYDEC estimated clean-up costs under its proposed remedy to be $8.9 million if implemented. Although the Company commented to the NYDEC that the proposed remedial action plan contained a number of material errors, omissions and procedural defects, the NYDEC, in a March 2007 Record of Decision, selected the remedy it had previously proposed. In July 2007, the Company appealed the NYDEC's Record of Decision to the New York State Supreme Court, Albany County. The Court dismissed the appeal in January 2008. The Company filed a notice of appeal in February 2008. In July 2008, the Company withdrew its appeal and agreed to the terms of an Order on Consent issued by the NYDEC. Pursuant to the order, the Company will remediate the site consistent with the remedy selected in the NYDEC's Record of Decision. The Company will also reimburse the NYDEC in the amount of approximately $1.5 million for costs incurred in connection with the site from 1998 through May 30, 2007. The Company acknowledged that additional charges related to the site will be billed to the Company at a later date, including costs incurred by the NYDEC after May 30, 2007 and any costs incurred by the New York Department of Health. The Company has not received any estimates of such additional costs. The Company has recorded an estimated minimum liability of $10.4 million associated with this site.

At June 30, 2008, the Company has estimated its remaining clean-up costs related to former manufactured gas plant sites and third party waste disposal sites (including the former manufactured gas plant site discussed above) will be in the range of $13.5 million to $17.2 million. The minimum estimated liability of $13.5 million has been recorded on the Consolidated Balance Sheet at June 30, 2008, including the $10.4 million discussed above. The Company expects to recover its environmental clean-up costs from a combination of rate recovery and deferred insurance proceeds that are currently recorded as a regulatory liability on the Consolidated Balance Sheet.

The Company is currently not aware of any material additional exposure to environmental liabilities. However, changes in environmental regulations or other factors could adversely impact the Company.

Other. The Company is involved in other litigation and regulatory matters arising in the normal course of business. These other matters may include, for example, negligence claims and tax, regulatory or other governmental audits, inspections, investigations and other proceedings. These matters may involve state and federal taxes, safety, compliance with regulations, rate base, cost of service and purchased gas cost issues, among other things. While these normal-course matters could have a material effect on earnings

Table of Contents

Item 1. Financial Statements (Cont.)

and cash flows in the quarterly and annual period in which they are resolved, they are not expected to change materially the Company's present liquidity position, nor to have a material adverse effect on the financial condition of the Company.

Note 5 — Discontinued Operations

On August 31, 2007, the Company, in its Exploration and Production segment, completed the sale of SECI, Seneca's wholly owned subsidiary that operated in Canada. The Company received approximately $232.1 million of proceeds from the sale, of which $58.0 million was placed in escrow pending receipt of a tax clearance certificate from the Canadian government. In December 2007, the Canadian government issued the tax clearance certificate, thereby releasing the proceeds from restriction as of December 31, 2007. The sale resulted in the recognition of a gain of approximately $120.3 million, net of tax, during the fourth quarter of 2007. SECI is engaged in the exploration for, and the development and purchase of, natural gas and oil reserves in the provinces of Alberta, Saskatchewan and British Columbia in Canada. The decision to sell was based on lower than expected returns from the Canadian oil and gas properties combined with difficulty in finding significant new reserves. Seneca will continue its exploration and development activities in Appalachia, the Gulf of Mexico, and California. As a result of the decision to sell SECI, the Company began presenting all SECI operations as discontinued operations during the fourth quarter of 2007.

The following is selected financial information of the discontinued operations for SECI:

(Thousands)	Three Months Ended June 30, 2007	Nine Months Ended June 30, 2007
Operating Revenues	$14,366	$42,004
Operating Expenses	9,915	27,205
Operating Income	4,451	14,799
Interest Income	272	799
Income before Income Taxes	4,723	15,598
Income Tax Expense (Benefit)	(863)	3,213
Income from Discontinued Operations	$ 5,586	$12,385

Note 6 — Business Segment Information

The Company has five reportable segments: Utility, Pipeline and Storage, Exploration and Production, Energy Marketing, and Timber. The division of the Company's operations into the reportable segments is based upon a combination of factors including differences in products and services, regulatory environment and geographic factors.

The data presented in the tables below reflect the reportable segments and reconciliations to consolidated amounts. As stated in the 2007 Form 10-K, the Company evaluates segment performance based on income before discontinued operations, extraordinary items and cumulative effects of changes in accounting (where applicable). When these items are not applicable, the Company evaluates performance based on net income. There have been no changes in the basis of segmentation nor in the basis of measuring segment profit or loss from those used in the Company's 2007 Form 10-K. There have been no material changes in the amount of assets for any operating segment from the amounts disclosed in the 2007 Form 10-K.

Note 7 — Intangible Assets

The components of the Company's intangible assets were as follows (in thousands):

	At June 30, 2008			At September 30, 2007
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Net Carrying Amount
Intangible Assets Subject to Amortization:				
Long-Term Transportation Contracts	$ 8,580	$ (5,791)	$ 2,789	$ 3,591
Long-Term Gas Purchase Contracts	31,864	(7,814)	24,050	25,245
	$40,444	$(13,605)	$26,839	$ 28,836

Aggregate Amortization Expense:	
(Thousands)	
Three Months Ended June 30, 2008	$ 666
Three Months Ended June 30, 2007	$ 666
Nine Months Ended June 30, 2008	$ 1,997
Nine Months Ended June 30, 2007	$ 1,997

The gross carrying amount of intangible assets subject to amortization at June 30, 2008 remained unchanged from September 30, 2007. The only activity with regard to intangible assets subject to amortization was amortization expense as shown in the table above. Amortization expense for the long-term transportation contracts is estimated to be $0.3 million for the remainder of 2008 and $0.5 million for fiscal 2009. Amortization expense for transportation contracts is estimated to be $0.4 million annually for 2010, 2011 and 2012. Amortization expense for the long-term gas purchase contracts is estimated to be $0.4 million for the remainder of 2008 and $1.6 million annually for 2009, 2010, 2011 and 2012.

Note 8 — Retirement Plan and Other Post-Retirement Benefits

Components of Net Periodic Benefit Cost (in thousands):

	Retirement Plan		Other Post-Retirement Benefits	
Three months ended June 30,	2008	2007	2008	2007
Service Cost	$ 3,149	$ 3,225	$ 1,276	$ 1,403

Net Periodic Benefit Cost	$ 4,387	$ 4,761	$ 6,487	$ 8,681

Table of Contents

Item 1. Financial Statements (Cont.)

	Retirement Plan		Other Post-Retirement Benefits	
Nine months ended June 30,	2008	2007	2008	2007
Service Cost	$ 9,448	$ 9,674	$ 3,828	$ 4,210
Interest Cost	33,712	33,263	20,311	20,399
Expected Return on Plan Assets	(41,250)	(38,427)	(25,286)	(20,220)
Amortization of Prior Service Cost	606	661	3	3
Amortization of Transition Amount	—	—	5,346	5,345
Amortization of Losses	8,298	10,146	2,195	6,160
Net Amortization and Deferral for Regulatory Purposes (Including Volumetric Adjustments) (1)	7,597	3,885	20,028	16,453
Net Periodic Benefit Cost	$ 18,411	$ 19,202	$ 26,425	$ 32,350

(1) The Company's policy is to record retirement plan and other post-retirement benefit costs in the Utility segment on a volumetric basis to reflect the fact that the Utility segment experiences higher throughput of natural gas in the winter months and lower throughput of natural gas in the summer months.

Employer Contributions. During the nine months ended June 30, 2008, the Company contributed $3.8 million to its retirement plan and $25.3 million to its VEBA trusts and 401(h) accounts in its other post-retirement benefit plan. In the remainder of 2008, the Company expects to contribute $12.2 million to its retirement plan and $3.8 million to its VEBA trusts and 401(h) accounts in its other post-retirement benefit plan.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

The Company is a diversified energy company and reports its operating results in five reportable business segments. For the quarter ended June 30, 2008 compared to the quarter ended June 30, 2007, the Company has experienced an increase in earnings of $13.1 million, primarily due to higher earnings in the Exploration and Production segment. The Utility segment and the All Other category also contributed to the increase in earnings. These earnings increases discussed above were slightly offset by lower earnings in the Pipeline and Storage and Energy Marketing segments as well as in the Corporate category, combined with a higher loss in the Timber segment. For the nine months ended June 30, 2008 compared to the nine months ended June 30, 2007, the Company experienced an increase in earnings of $45.7 million, due primarily to higher earnings in the Exploration and Production segment. The Utility segment and the All Other category also contributed to the increase in earnings. These earnings increases discussed above were slightly offset by lower earnings in the Pipeline and Storage, Energy Marketing, and Timber segments as well as in the Corporate category. The Company's earnings are discussed further in the Results of Operations section that follows.

From a capital resources and liquidity perspective, the Company spent $284.6 million on capital expenditures during the nine months ended June 30, 2008, with approximately 49% being spent in the Exploration and Production segment, 37% in the Pipeline and Storage segment and 14% in the Utility segment. The amounts spent in the various segments reflect the Company's belief that the Exploration and Production segment and the Pipeline and Storage segment currently provide the best earnings growth opportunities for shareholders. In the Exploration and Production segment, the Company's principal focus continues to be the development of its nearly one million acres in the Appalachian region along with continued exploration and development in the Gulf and West Coast regions. In the Pipeline and Storage segment, the majority of the expenditures were for construction costs of the Empire Connector project. The project is on schedule to be completed by the planned in-service date of November 2008, although the actual in-service date will depend upon the completion of the Millennium Pipeline. This project and other capital expenditures are discussed further in the Capital Resources and Liquidity section that follows.

The Company regularly considers the repurchase of outstanding shares of common stock under a share repurchase program authorized by the Company's Board of Directors. The program authorizes the Company to repurchase up to an aggregate amount of 8 million shares. Through June 30, 2008, the Company had repurchased 6,667,275 shares for $262.8 million under this program, including 2,832,397 shares for $129.6 million during the nine months ended June 30, 2008. These matters are discussed further in the Capital Resources and Liquidity section that follows.

The Company has begun to explore the sale of Horizon LFG, a New York corporation that owns and operates short-distance landfill gas pipeline companies that are engaged in the purchase, sale and transportation of landfill gas in Ohio, Michigan, Kentucky, Missouri, Maryland and Indiana. Horizon LFG is included in the Company's All Other category. The Company is also exploring the sale of Horizon Power's unconsolidated subsidiaries. This includes ESNE, which generates electricity from an 80-megawatt, combined cycle, natural gas-fired power plant in North East, Pennsylvania, as well as Seneca Energy and Model City, which generate and sell electricity using methane gas obtained from landfills owned by outside parties.

CRITICAL ACCOUNTING ESTIMATES

For a complete discussion of critical accounting estimates, refer to "Critical Accounting Estimates" in Item 7 of the Company's 2007 Form 10-K. There have been no subsequent changes to that disclosure.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

RESULTS OF OPERATIONS

Earnings

The Company's earnings were $59.9 million for the quarter ended June 30, 2008 compared to earnings of $46.8 million for the quarter ended June 30, 2007. As previously discussed, the Company has presented its Canadian operations in the Exploration and Production segment (in conjunction with the sale of SECI) as discontinued operations. The Company's earnings from continuing operations were $59.9 million for the quarter ended June 30, 2008 compared to earnings from continuing operations of $41.2 million for the quarter ended June 30, 2007. The increase in earnings from continuing operations of $18.7 million is primarily the result of higher earnings in the Exploration and Production segment. The Utility segment and the All Other category also contributed to the increase in earnings. These earnings increases discussed above were slightly offset by lower earnings in the Pipeline and Storage and Energy Marketing segments, as well as in the Corporate category, combined with a higher loss in the Timber segment.

The Company's earnings were $225.5 million for the nine months ended June 30, 2008 compared to earnings of $179.8 million for the nine months ended June 30, 2007. The Company's earnings from continuing operations were $225.5 million for the nine months ended June 30, 2008 compared to earnings from continuing operations of $167.4 million for the nine months ended June 30, 2007. The increase in earnings from continuing operations of $58.1 million is primarily the result of higher earnings in the Exploration and Production segment. The Utility segment and the All Other category also contributed to the increase in earnings. These earnings increases discussed above were slightly offset by lower earnings in the Pipeline and Storage, Energy Marketing, and Timber segments as well as in the Corporate category.

Additional discussion of earnings in each of the business segments can be found in the business segment information that follows. Note that all amounts used in the earnings discussions are after tax amounts, unless otherwise noted.

2008 Compared with 2007

Operating revenues for the Utility segment increased $7.3 million for the quarter ended June 30, 2008 as compared with the quarter ended June 30, 2007. The increase for the quarter is primarily attributable to a $16.8 million increase in off-system sales revenue (see discussion below) partially offset by a $10.0 million decrease in retail sales revenue. The $10.0 million decrease in retail gas sales revenues was a function of lower throughput volumes, partially offset by the recovery of higher gas costs (subject to certain timing variations, gas costs are recovered dollar for dollar in revenues) coupled with the revenue impact of a rate design change. In December 2007, the NYPSC issued an order providing for an annual rate increase of $1.8 million beginning December 28, 2007. As part of this rate order, a rate design change was adopted that shifts a greater amount of cost recovery into the minimum bill amount,

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

thus spreading the recovery of such costs more evenly throughout the year. This rate design change resulted in lower retail and transportation revenues in the quarter ended March 31, 2008 compared to the quarter ended March 31, 2007. The rate order caused higher retail and transportation revenues in the quarter ended June 30, 2008 compared to the quarter ended June 30, 2007. However, on a year-to-date basis, retail and transportation revenues for the nine months ended June 30, 2008 (exclusive of the impact of higher gas costs) are still lower than the nine months ended June 30, 2007 as a result of the rate design change. It is expected that there will also be an increase in retail and transportation revenue in the fourth quarter of this year compared to the prior year as a result of the rate design change.

Operating revenues for the Utility segment increased $67.3 million for the nine months ended June 30, 2008 as compared with the nine months ended June 30, 2007. This increase largely resulted from a $44.9 million increase in off-system sales revenue (see discussion below) and an $11.3 million increase in retail sales revenue coupled with an $11.0 million increase in transportation revenues. The increase in retail gas sales revenues for the Utility segment was largely a function of higher gas costs (subject to certain timing variations, gas costs are recovered dollar for dollar in revenues) partially offset by the revenue impact of the rate design change discussed above. The increase in transportation revenues was primarily due to a 2.4 Bcf increase in transportation throughput, largely due to the migration of customers from retail sales to transportation service.

As reported in 2006, on November 17, 2006, the U.S. Court of Appeals vacated and remanded the FERC's Order No. 2004 regarding affiliate standards of conduct with respect to natural gas pipelines. The Court's decision became effective on January 5, 2007, and on January 9, 2007, the FERC issued Order No. 690, its Interim Rule, designed to respond to the Court's decision. In Order No. 690, as clarified by the FERC on March 21, 2007, the FERC readopted, on an interim basis, certain provisions that existed prior to the issuance of Order No. 2004 that had made it possible for the Utility segment to engage in certain off-system sales without triggering the adverse consequences that would otherwise arise under the Order No. 2004 standards of conduct. As a result, the Utility segment resumed engaging in off-system sales on non-affiliated pipelines as of May 2007. Total off-system sales revenues for the quarters ended June 30, 2008 and June 30, 2007 amounted to $20.5 million and $3.7 million, respectively. Total off-system sales revenues for the nine months ended June 30, 2008 and June 30, 2007 amounted to $48.6 million and $3.7 million, respectively. Due to profit sharing with retail customers, the margins resulting from off-system sales are minimal and there was not a material impact to margins for the quarters and nine months ended June 30, 2008 and 2007.

The Utility segment's earnings for the quarter ended June 30, 2008 were $7.8 million, an increase of $4.1 million compared to earnings of $3.7 million for the quarter ended June 30, 2007. In the New York jurisdiction, earnings increased by $4.4 million. As a result of the rate design change in the New York jurisdiction, earnings for the third quarter of fiscal 2008 increased by $1.7 million from the third quarter of fiscal 2007. A $1.7 million decrease in operating costs (mostly due to lower post-retirement benefit costs), a non-recurring regulatory adjustment made in 2007 ($0.9 million), and the positive impact of a lower effective tax rate ($0.8 million) also contributed to the overall increase in earnings for the New York jurisdiction. These increases were partly offset by lower usage per account ($1.0 million). In the Pennsylvania jurisdiction, earnings decreased by $0.3 million due primarily to lower usage per account offset in part by lower operating costs and lower interest expense.

The impact of weather variations on earnings in the New York jurisdiction is mitigated by that jurisdiction's weather normalization clause (WNC). The WNC in New York, which covers the eight-month period from October through May, has had a stabilizing effect on earnings for the New York jurisdiction. For the quarter ended June 30, 2008, the WNC preserved earnings of approximately $0.4 million, as weather was warmer than normal for the period. For the quarter ended June 30, 2007, the WNC did not have a significant impact on earnings as the weather was close to normal.

The Utility segment's earnings for the nine months ended June 30, 2008 were $62.2 million; an increase of $7.9 million when compared with earnings of $54.3 million for the nine months ended June 30, 2007. In the New York jurisdiction, earnings increased $5.2 million. Lower operating costs of $4.5 million (mostly due to lower post-retirement benefit costs and lower bad debt expense), the positive impact of non-recurring regulatory adjustments made in 2007 ($0.9 million), the positive impact of a lower effective

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

tax rate ($0.9 million), a routine regulatory adjustment ($0.7 million), lower property taxes ($0.7 million), and higher customer usage per account ($0.3 million) also contributed to the overall increase in earnings for the New York jurisdiction. These increases were partly offset by a $3.1 million decrease in earnings associated with the rate design change discussed above. In the Pennsylvania jurisdiction, earnings increased $2.7 million due primarily to a base rate increase that became effective in January 2007 ($2.6 million), higher usage per account ($0.9 million), and a decrease in operating costs of $1.1 million (mostly due to lower bad debt expense). These increases were partially offset by the negative earnings impact associated with warmer weather ($1.5 million).

For the nine months ended June 30, 2008, the WNC preserved earnings of approximately $2.5 million, as the weather was warmer than normal. For the nine months ended June 30, 2007, the WNC preserved earnings of approximately $2.3 million, as the weather was also warmer than normal.

Pipeline and Storage

2008 Compared with 2007

Operating revenues for the Pipeline and Storage segment increased $1.7 million for the quarter ended June 30, 2008 as compared with the quarter ended June 30, 2007. The increase was primarily due to increased efficiency gas revenues ($1.9 million) reported as part of other revenues in the table above. The majority of this increase was due to higher gas prices in the quarter ended June 30, 2008 as compared with the quarter ended June 30, 2007. Overall, throughput decreased during the quarter ended June 30, 2008 as compared with the quarter ended June 30, 2007. While Supply Corporation's and Empire's transportation volumes decreased during the quarter, volume fluctuations generally do not have a significant impact on revenues as a result of Supply Corporation's straight fixed-variable rate design and Empire's modified fixed-variable rate design.

Operating revenues for the nine months ended June 30, 2008 increased $6.7 million as compared with the nine months ended June 30, 2007. The increase was primarily due to a $3.8 million increase in transportation revenue primarily due to the fact that the Pipeline and Storage segment was able to renew existing contracts at higher rates due to favorable market conditions related to the demand for transportation service associated with storage. In addition, there was a $3.1 million increase in efficiency gas revenues reported as part of other revenues in the table above. This increase was due primarily to higher gas prices in the nine months ended June 30, 2008 as compared with the nine months ended June 30, 2007.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

The Pipeline and Storage segment's earnings for the quarter ended June 30, 2008 were $12.5 million, a decrease of $2.9 million when compared to earnings of $15.4 million for the quarter ended June 30, 2007. The decrease in earnings primarily reflects the earnings impact associated with higher operation and maintenance expenses resulting from the non-recurrence in 2008 of a reversal of a reserve for preliminary survey costs ($4.8 million) related to the Empire Connector project recognized in the quarter ended June 30, 2007. In addition, there was an earnings decrease associated with higher interest expense ($0.8 million). These earnings decreases were partially offset by an increase in the allowance for funds used during construction ($1.0 million), higher efficiency gas revenues ($1.2 million) and the earnings benefit associated with lower income taxes ($0.5 million).

The Pipeline and Storage segment's earnings for the nine months ended June 30, 2008 were $40.9 million, a decrease of $2.1 million when compared to earnings of $43.0 million for the nine months ended June 30, 2007. The main factors contributing to this decrease were higher operation and maintenance expenses ($5.7 million), resulting from the non-recurrence in 2008 of a reversal of a reserve for preliminary survey costs ($4.8 million) related to the Empire Connector project recognized during the quarter ended June 30, 2007. In addition, there was a $1.9 million positive earnings impact during the nine months ended June 30, 2007 associated with the discontinuance of hedge accounting for Empire's interest rate collar that did not recur during the nine months ended June 30, 2008. There was also an earnings decrease associated with higher interest expense ($1.1 million). These earnings decreases were partially offset by an increase in the allowance for funds used during construction ($2.3 million), higher efficiency gas revenues ($2.0 million), and higher transportation and storage revenues ($2.5 million).

2008 Compared with 2007

Operating revenues from continuing operations for the Exploration and Production segment increased $46.1 million for the quarter ended June 30, 2008 as compared with the quarter ended June 30, 2007. Oil production revenue after hedging from continuing operations increased $24.1 million due to a

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

$36.01 per barrel increase in weighted average prices after hedging for continuing operations. Gas production revenue after hedging from continuing operations increased $21.9 million due to an increase in the weighted average price of gas after hedging for continuing operations ($2.19 per Mcf) as well as an increase in gas production of 1,217 MMcf. The Gulf Coast region of this segment was primarily responsible for the increase in natural gas production from continuing operations (702 MMcf). Production from new fields in 2008 (primarily in the High Island area) outpaced declines in production from some existing fields, quarter to quarter. The Appalachian region of this segment also contributed to the increase in natural gas production from continuing operations (527 MMcf), consistent with increased drilling activity in the region.

Operating revenues from continuing operations for the Exploration and Production segment increased $115.1 million for the nine months ended June 30, 2008 as compared with the nine months ended June 30, 2007. Oil production revenue after hedging from continuing operations increased $68.6 million due primarily to a $31.58 per barrel increase in weighted average prices after hedging for continuing operations. Gas production revenue after hedging from continuing operations increased $47.8 million due to an increase in the weighted average price of gas after hedging for continuing operations ($1.66 per Mcf) and an increase in gas production of 2,601 MMcf. The increase in gas production from continuing operations occurred primarily in the Appalachian region (1,540 MMcf), consistent with increased drilling activity in the region. The Gulf Coast region also contributed to the increase in natural gas production from continuing operations (934 MMcf). Production from new fields in 2008 (primarily in the High Island area) outpaced declines in production from some existing fields, period to period, as discussed above.

The Exploration and Production segment's earnings from continuing operations for the quarter ended June 30, 2008 were $39.8 million, an increase of $21.0 million when compared with earnings from continuing operations of $18.8 million for the quarter ended June 30, 2007. Higher crude oil prices, higher natural gas prices and higher natural gas production increased earnings by $17.4 million, $8.3 million and $6.0 million, respectively, while lower crude oil production decreased earnings by $1.8 million. Higher lease operating costs ($4.2 million), higher depletion expense ($3.1 million), higher state income tax expense ($2.5 million) and higher general and administrative and other operating expenses ($1.5 million) also negatively impacted earnings. Lower interest expense of $2.1 million slightly offset these decreases.

The Exploration and Production segment's earnings from continuing operations for the nine months ended June 30, 2008 were $108.4 million, an increase of $55.8 million when compared with earnings from continuing operations of $52.6 million for the nine months ended June 30, 2007. Higher crude oil prices, higher natural gas prices and higher natural gas production increased earnings by $47.7 million, $18.8 million and $12.3 million, respectively, while lower crude oil production decreased earnings by $3.1 million. Higher lease operating costs ($9.0 million), higher depletion expense ($8.9 million), higher state income tax expense ($3.4 million), higher general and administrative and other operating expenses ($3.8 million), and mark-to-market adjustments on derivative financial instruments ($1.3 million) also negatively impacted earnings. Lower interest expense of $4.5 million and higher interest income of $1.6 million slightly offset these decreases.

Energy Marketing

Energy Marketing Operating Revenues

	Three Months Ended June 30,			Nine Months Ended June 30,		
(Thousands)	2008	2007	Increase/ (Decrease)	2008	2007	Increase/ (Decrease)
Natural Gas (after Hedging)	$162,127	$113,351	$ 48,776	$440,123	$359,895	$ 80,228
Other	2	29	(27)	(12)	141	(153)
	$162,129	$113,380	$ 48,749	$440,111	$360,036	$ 80,075

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

Energy Marketing Volumes

	Three Months Ended June 30,			Nine Months Ended June 30,		
	2008	2007	Increase	2008	2007	Increase
Natural Gas — (MMcf)	14,641	13,014	1,627	47,189	44,063	3,126

2008 Compared with 2007

Operating revenues for the Energy Marketing segment increased $48.7 million and $80.1 million, respectively, for the quarter and nine months ended June 30, 2008 as compared with the quarter and nine months ended June 30, 2007. The increase for both the quarter and nine months ended June 30, 2008 is primarily due to higher gas sales revenue due to an increase in the price of natural gas that was recovered through revenues as well as an increase in volumes. The increase in volumes is attributable to an increase in volumes sold to low-margin wholesale customers, as well as an increase in the number of commercial and industrial customers served by the Energy Marketing segment.

Earnings in the Energy Marketing segment decreased $0.8 million and $1.4 million, respectively, for the quarter and nine months ended June 30, 2008 as compared with the quarter and nine months ended June 30, 2007. For the quarter ended June 30, 2008, higher operating costs of $0.8 million, primarily due to an increase in bad debt expense, are responsible for the decrease in earnings. Despite higher operating revenues and volumes, margins did not change significantly because the volume increase is primarily attributable to low-margin customers. For the nine months ended June 30, 2008, higher operating costs of $1.0 million (primarily due to an increase in bad debt expense) coupled with lower margins of $0.5 million are responsible for the decrease in earnings. A major factor in the margin decrease is the non-recurrence of a purchased gas expense adjustment recorded during the quarter ended March 31, 2007. During that quarter, the Energy Marketing segment reversed an accrual for $2.3 million of purchased gas expense due to the resolution of a contingency. The increase in volumes noted above, the profitable sale of certain gas held as inventory, and the marketing flexibility that the Energy Marketing segment derives from its contracts for significant storage capacity partially offset this decrease.

Timber

	7,236	8,434	(1,198)	25,172	24,030	1,142

2008 Compared with 2007

Operating revenues for the Timber segment decreased $3.0 million for the quarter ended June 30, 2008 as compared with the quarter ended June 30, 2007. The decrease can be primarily attributed to a decrease in both log sales and kiln-dried lumber sales of $0.8 million and $1.4 million, respectively. Overall, the Timber segment is currently selling a greater amount of lower priced, low margin species than higher margin species due to poor market conditions and wet weather that hampered harvesting, resulting in a decline in revenues. The decrease in log sales is due to a decline in cherry veneer log sales volumes of 106,000 board feet that can be attributed to the mix of logs being harvested in the current quarter as compared to the quarter ended June 30, 2007. Cherry veneer logs are more valuable and sell at higher prices than other species and have the largest impact on overall log sales revenue. The decrease in kiln-dried lumber sales is due to both a decline in sales volumes of 565,000 board feet as well as a decline in the market price of kiln-dried lumber.

Operating revenues for the Timber segment decreased $2.6 million for the nine months ended June 30, 2008 as compared with the nine months ended June 30, 2007. This decrease is largely due to a decline in kiln-dried lumber sales of $2.1 million. The decrease in kiln-dried lumber sales is due to both a decline in the market price of kiln-dried lumber as well as a decline in kiln-dried lumber sales volumes of 417,000 board feet. Log sales also decreased $0.3 million primarily due to a decline in cherry veneer log sales volumes of 130,000 board feet, partially offset by increases in log sales volumes from lower priced logs. Cherry veneer logs are more valuable and sell at higher prices than other species and have the largest impact on overall log sales revenue.

The Timber segment recorded a loss of $2.1 million for the quarter ended June 30, 2008, a decrease of $1.7 million when compared with a loss of $0.4 million for the quarter ended June 30, 2007. This decrease was the result of lower margins of $1.7 million, largely from lumber and log sales due to the decrease in revenues noted above.

The Timber segment's earnings for the nine months ended June 30, 2008 were $2.2 million, a decrease of $0.9 million when compared with earnings of $3.1 million for the nine months ended June 30, 2007. The decrease was primarily due to an increase in depletion and depreciation expense of $0.6 million due to harvesting more timber from Company owned land than the prior year combined with the addition of a lumber sorter for Highland's sawmill operations that was placed into service in October 2007. Lower margins of $0.1 million also contributed to the decrease in earnings. During the six months ended March 31, 2008, margins were up over the prior year, largely due to favorable weather conditions, resulting in an increase in the harvesting of higher margin species. The change in market and weather conditions in the quarter ended June 30, 2008, as discussed above, eliminated the margin improvements seen during the six months ended March 31, 2008.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

Corporate and All Other

2008 Compared with 2007

Corporate and All Other recorded earnings of $1.3 million for the quarter ended June 30, 2008 compared with earnings of $2.3 million for the quarter ended June 30, 2007. The positive earnings impacts of higher income from unconsolidated subsidiaries ($0.4 million) and lower income tax expense ($0.4 million) were more than offset by higher interest expense ($1.2 million) and higher operating costs ($0.8 million). The increase in operating costs can be attributed to the proxy contest with New Mountain Vantage GP, L.L.C.

For the nine months ended June 30, 2008, Corporate and All Other had earnings of $4.6 million compared with earnings of $5.9 million for the nine months ended June 30, 2007. The positive earnings impacts of higher income from unconsolidated subsidiaries ($1.1 million), lower income tax expense ($0.8 million), lower interest expense ($0.7 million), a gain on the sale of a turbine by Horizon Power ($0.6 million), and slightly higher margins by Horizon LFG ($0.3 million) were more than offset by higher operating costs ($4.5 million) and lower interest income ($0.6 million). The increase in operating costs can be attributed to the proxy contest with New Mountain Vantage GP, L.L.C.

Interest Income

Interest income was $1.7 million higher in the quarter ended June 30, 2008 as compared to the quarter ended June 30, 2007. For the nine months ended June 30, 2008, interest income increased $5.3 million as compared with the nine months ended June 30, 2007. These increases are mainly due to higher interest income (excluding intercompany interest income) in the Exploration and Production segment of $1.1 million and $4.0 million, respectively, for the quarter and nine months ended June 30, 2008 as compared to the quarter and nine months ended June 30, 2007 as a result of the investment of cash proceeds received from the sale of SECI in August 2007.

Interest Expense on Long-Term Debt

Interest on long-term debt increased $1.2 million for the quarter ended June 30, 2008 as compared with the quarter ended June 30, 2007. For the nine months ended June 30, 2008, interest on long-term debt decreased $0.1 million as compared with the nine months ended June 30, 2007. The increase in the quarter ended June 30, 2008 is due to the issuance in April 2008 of a $300 million, 6.5% Note due in April 2018. This increase was offset slightly by the repayment of $200 million of 6.303% medium-term notes that matured on May 27, 2008. The decrease in the nine months ended June 30, 2008 as compared to the nine months ended June 30, 2007 is due to an overall decline in interest on long-term debt as a result of a lower average amount of long-term debt outstanding. The Company repaid $22.8 million of Empire's secured debt in December 2006. It also redeemed $96.3 million of 6.5% unsecured notes in April 2007.

CAPITAL RESOURCES AND LIQUIDITY

The Company's primary sources of cash during the nine-month period ended June 30, 2008 consisted of cash provided by operating activities and proceeds from the issuance of long-term debt. These sources of cash were supplemented by issues of new shares of common stock as a result of stock option exercises. During the nine months ended June 30, 2008, the common stock used to fulfill the requirements of the Company's 401(k) plans and Direct Stock Purchase and Dividend Reinvestment Plan was obtained via open market purchases. During fiscal 2006, the Company began repurchasing outstanding shares of its common stock under a share repurchase program, which is discussed below under Financing Cash Flow.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

Operating Cash Flow

Internally generated cash from operating activities consists of net income available for common stock, adjusted for non-cash expenses, non-cash income and changes in operating assets and liabilities. Non-cash items include depreciation, depletion and amortization, deferred income taxes, and income or loss from unconsolidated subsidiaries net of cash distributions.

Cash provided by operating activities in the Utility and the Pipeline and Storage segments may vary from period to period because of the impact of rate cases. In the Utility segment, over- or under-recovered purchased gas costs and weather may also significantly impact cash flow. The impact of weather on cash flow is tempered in the Utility segment's New York rate jurisdiction by its WNC and in the Pipeline and Storage segment by Supply Corporation's straight fixed-variable rate design.

Because of the seasonal nature of the heating business in the Utility and Energy Marketing segments, revenues in these segments are relatively high during the heating season, primarily the first and second quarters of the fiscal year, and receivable balances historically increase during these periods from the balances receivable at September 30.

The storage gas inventory normally declines during the first and second quarters of the fiscal year and is replenished during the third and fourth quarters. For storage gas inventory accounted for under the LIFO method, the current cost of replacing gas withdrawn from storage is recorded in the Consolidated Statements of Income and a reserve for gas replacement is recorded in the Consolidated Balance Sheets under the caption "Other Accruals and Current Liabilities." Such reserve is reduced as the inventory is replenished.

Cash provided by operating activities in the Exploration and Production segment may vary from period to period as a result of changes in the commodity prices of natural gas and crude oil. The Company uses various derivative financial instruments, including price swap agreements, no cost collars and futures contracts in an attempt to manage this energy commodity price risk.

Net cash provided by operating activities totaled $415.1 million for the nine months ended June 30, 2008, an increase of $10.5 million compared with $404.6 million provided by operating activities for the nine months ended June 30, 2007. The increase is partially due to lower working capital requirements in the Utility segment for the nine months ended June 30, 2008 as compared to the nine months ended June 30, 2007. In the Exploration and Production segment, for the nine months ended June 30, 2008 as compared to the nine months ended June 30, 2007, cash provided by operations increased due to higher commodity prices, partially offset by the decrease in cash provided by operations that resulted from the sale of SECI in August 2007. Offsetting these increases were higher working capital requirements in the Energy Marketing segment.

Investing Cash Flow

Expenditures for Long-Lived Assets

The Company's expenditures for long-lived assets totaled $284.6 million during the nine months ended June 30, 2008. The table below presents these expenditures:

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

Nine Months Ended June 30, 2008 (*in millions of dollars*)

	Total Expenditures for Long-Lived Assets
Utility	$ 38.8
Pipeline and Storage (1)	106.2
Exploration and Production	140.6
Timber	1.2
Corporate and All Other	0.2
Eliminations (2)	(2.4)
	$ 284.6

(1) Amount includes $19.9 million of accrued capital expenditures related to the Empire Connector project. This amount has been excluded from the Consolidated Statement of Cash Flows at June 30, 2008 since it represents a non-cash investing activity at that date.

(2) Represents $2.4 million of capital expenditures included in the Appalachian region of the Exploration and Production segment for the purchase of storage facilities, buildings, and base gas from Supply Corporation during the quarter ended March 31, 2008.

Utility

The majority of the Utility capital expenditures for the nine months ended June 30, 2008 were made for replacement of mains and main extensions, as well as for the replacement of service lines.

Pipeline and Storage

The majority of the Pipeline and Storage capital expenditures for the nine months ended June 30, 2008 were related to the Empire Connector project costs, which is discussed below, as well as for additions, improvements, and replacements to this segment's transmission and gas storage systems.

The Company continues to explore various opportunities to expand its capabilities to transport gas to the East Coast, either through the Supply Corporation or Empire systems or in partnership with others. Construction of the Empire Connector, a pipeline designed to transport up to approximately 250 MDth of natural gas per day that will connect the Empire Pipeline with the Millennium Pipeline, began in September 2007. The Empire Connector is on schedule to be completed by the planned in-service date of November 2008, although the actual in-service date will depend upon the completion of the Millennium Pipeline. Refer to the Rate and Regulatory Matters section that follows for further discussion of this matter. The total cost to the Company of the Empire Connector project is estimated at $180 million, after giving effect to sales tax exemptions worth approximately $3.7 million. As of June 30, 2008, the Company had incurred approximately $107.7 million in costs related to this project. Of this amount, $42.7 million and $88.0 million were incurred during the quarter and nine months ended June 30, 2008, respectively, and $2.1 million and $3.5 million were incurred during the quarter and nine months ended June 30, 2007, respectively. All project costs incurred as of June 30, 2008 have been capitalized as Construction Work in Progress. The Company anticipates financing the remaining cost of this project with cash on hand.

Supply Corporation continues to view its potential Tuscarora Extension project as an important link to Millennium and potential storage development in the Corning, New York area. This new pipeline, which would expand the Supply Corporation system from its Tuscarora storage field to the intersection of the proposed Millennium and Empire Connector pipelines, could be designed initially to transport up to approximately 130 MDth of natural gas per day. It may also provide Supply Corporation with the opportunity to increase the deliverability of the existing Tuscarora storage field. Using the results of a preliminary Open Season, Supply Corporation is also exploring a new project (the West to East project) that would provide for new capacity from the Rockies Express Project, Appalachian production, storage and other points to Leidy and to interconnections with Millennium and Empire at Corning. The West to East project could include the Tuscarora Extension project, or could be a second phase following the development of the Tuscarora Extension project.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

In light of the rapidly growing demand for pipeline capacity to move natural gas from new wells being drilled in Appalachia, Supply Corporation recently initiated a new Open Season for its "Appalachian Lateral," a project designed to complement the West to East project. The Appalachian Lateral is expected to be located through an area where producers are actively drilling and seeking to find access to the market for their newly discovered reserves.

In conjunction with the West to East and Appalachian Lateral projects, Supply Corporation has plans to develop new storage capacity by pursuing expansion of certain of its existing storage facilities. The expansion of these fields, which Supply Corporation hopes to market through one offering at market-based rates, could provide approximately 8.5 Bcf of incremental storage capacity with incremental withdrawal deliverability of up to 121 MDth of natural gas per day, available in 2011. Supply Corporation expects that the availability of this incremental storage capacity will complement the West to East and Appalachian Lateral pipeline projects and help meet the demand for storage created by the prospective increased flow of Rockies and Appalachian gas supply into the western Pennsylvania area, although traditional gas supplies will also be able to take advantage of this incremental storage capacity. An Open Season for this storage capacity is planned to be held later in 2008.

The timeline associated with Supply Corporation's pipeline and storage projects depends on market development. Should the market materialize, the Company anticipates financing the Tuscarora Extension project and/or the storage expansion(s) with cash on hand and/or through the use of the Company's lines of credit. The capital cost of the West to East and Appalachian Lateral projects would amount to at least $700 million, which would be financed by a combination of debt and equity. As of June 30, 2008, there have been no costs incurred by Supply Corporation related to the Tuscarora Extension project, $0.1 million has been spent to study the West to East and Appalachian Lateral projects, and approximately $0.2 million has been spent to study the storage expansion project. Supply Corporation has not yet filed an application with the FERC for the authority to build either pipeline project or the storage expansion(s).

Exploration and Production

The Exploration and Production segment capital expenditures for the nine months ended June 30, 2008 included approximately $46.9 million for the Gulf Coast region, substantially all of which was for the off-shore program in the shallow waters of the Gulf of Mexico, $51.1 million for the West Coast region and $42.6 million for the Appalachian region. The Appalachian region capital expenditures include $2.4 million for the purchase of storage facilities, buildings, and base gas from Supply Corporation, as shown in the table on the previous page. These amounts included approximately $20.7 million spent to develop proved undeveloped reserves.

Timber

The majority of the Timber segment capital expenditures for the nine months ended June 30, 2008 were for construction of a lumber sorter for Highland's sawmill operations that was placed into service in October 2007 as well as for purchases of equipment for Highland's sawmill and kiln operations.

All Other

In March 2008, Horizon Power sold a gas-powered turbine that it had planned to use in the development of a co-generation plant. Horizon Power received proceeds of $5.3 million and recorded a pre-tax gain of $0.9 million associated with the sale.

The Company continuously evaluates capital expenditures and investments in corporations, partnerships, and other business entities. The amounts are subject to modification for opportunities such as the acquisition of attractive oil and gas properties, timber or natural gas storage facilities and the expansion of transmission line capacities. While the majority of capital expenditures in the Utility segment are necessitated by the continued need for replacement and upgrading of mains and service lines, the magnitude of future capital expenditures or other investments in the Company's other business segments depends, to a large degree, upon market conditions.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

Financing Cash Flow

The Company did not have any outstanding short-term notes payable to banks or commercial paper at June 30, 2008. However, the Company continues to consider short-term debt (consisting of short-term notes payable to banks and commercial paper) an important source of cash for temporarily financing capital expenditures and investments in corporations and/or partnerships, gas-in-storage inventory, unrecovered purchased gas costs, margin calls on derivative financial instruments, exploration and development expenditures, repurchases of stock, and other working capital needs. Fluctuations in these items can have a significant impact on the amount and timing of short-term debt. As for bank loans, the Company maintains a number of individual uncommitted or discretionary lines of credit with certain financial institutions for general corporate purposes. Borrowings under these lines of credit are made at competitive market rates. These credit lines, which aggregate to $430.0 million, are revocable at the option of the financial institutions and are reviewed on an annual basis. The Company anticipates that these lines of credit will continue to be renewed, or replaced by similar lines. The total amount available to be issued under the Company's commercial paper program is $300.0 million. The commercial paper program is backed by a syndicated committed credit facility which totals $300.0 million and extends through September 30, 2010.

Under the Company's committed credit facility, the Company has agreed that its debt to capitalization ratio will not exceed .65 at the last day of any fiscal quarter through September 30, 2010. At June 30, 2008, the Company's debt to capitalization ratio (as calculated under the facility) was .41. The constraints specified in the committed credit facility would permit an additional $1.84 billion in short-term and/or long-term debt to be outstanding (further limited by the indenture covenants discussed below) before the Company's debt to capitalization ratio would exceed .65. If a downgrade in any of the Company's credit ratings were to occur, access to the commercial paper markets might not be possible. However, the Company expects that it could borrow under its uncommitted bank lines of credit or rely upon other liquidity sources, including cash provided by operations.

Under the Company's existing indenture covenants, at June 30, 2008, the Company would have been permitted to issue up to a maximum of $1.2 billion in additional long-term unsecured indebtedness at then-current market interest rates in addition to being able to issue new indebtedness to replace maturing debt. The Company's present liquidity position is believed to be adequate to satisfy known demands.

The Company's 1974 indenture pursuant to which $199.0 million (or 18%) of the Company's long-term debt (as of June 30, 2008) was issued contains a cross-default provision whereby the failure by the Company to perform certain obligations under other borrowing arrangements could trigger an obligation to repay the debt outstanding under the indenture. In particular, a repayment obligation could be triggered if the Company fails to (i) pay any scheduled principal or interest on any debt under any other indenture or agreement, or (ii) perform any other term in any other such indenture or agreement, and the effect of the failure causes, or would permit the holders of the debt to cause, the debt under such indenture or agreement to become due prior to its stated maturity, unless cured or waived.

The Company's $300.0 million committed credit facility also contains a cross-default provision whereby the failure by the Company or its significant subsidiaries to make payments under other borrowing arrangements, or the occurrence of certain events affecting those other borrowing arrangements, could trigger an obligation to repay any amounts outstanding under the committed credit facility. In particular, a repayment obligation could be triggered if (i) the Company or any of its significant subsidiaries fail to make a payment when due of any principal or interest on any other indebtedness aggregating $20.0 million or more, or (ii) an event occurs that causes, or would permit the holders of any other indebtedness aggregating $20.0 million or more to cause, such indebtedness to become due prior to its stated maturity. As of June 30, 2008, the Company had no debt outstanding under the committed credit facility.

In April 2008, the Company issued $300.0 million of 6.50% senior, unsecured notes in a private placement exempt from registration under the Securities Act of 1933. The notes have a term of 10 years, with a maturity date in April 2018. The holders of the notes may require the Company to repurchase their notes in the event of a change in control at a price equal to 101% of the principal amount. In addition, the

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

Company is required to either offer to exchange the notes for substantially similar notes as are registered under the Securities Act of 1933 or, in certain circumstances, register the resale of the notes. The Company used $200.0 million of the proceeds to refund $200.0 million of 6.303% medium-term notes that subsequently matured on May 27, 2008.

On December 8, 2005, the Company's Board of Directors authorized the Company to implement a share repurchase program, whereby the Company may repurchase outstanding shares of common stock, up to an aggregate amount of 8 million shares in the open market or through privately negotiated transactions. As of June 30, 2008, the Company has repurchased 6,667,275 shares for $262.8 million under this program, including 439,722 and 2,832,397 shares for $20.7 million and $129.6 million, respectively, during the quarter and nine months ended June 30, 2008. These share repurchases were funded with cash provided by operating activities and/or through the use of the Company's lines of credit. In the future, it is expected that this share repurchase program will continue to be funded with cash provided by operating activities and/or through the use of the Company's lines of credit. It is anticipated that open market repurchases will continue from time to time depending on market conditions.

The Company may issue debt or equity securities in a public offering or a private placement from time to time. The amounts and timing of the issuance and sale of debt or equity securities will depend on market conditions, indenture requirements, regulatory authorizations and the capital requirements of the Company.

OFF-BALANCE SHEET ARRANGEMENTS

The Company has entered into certain off-balance sheet financing arrangements. These financing arrangements are primarily operating and capital leases. The Company's consolidated subsidiaries have operating leases, the majority of which are with the Utility and the Pipeline and Storage segments, having a remaining lease commitment of approximately $30.7 million. These leases have been entered into for the use of buildings, vehicles, construction tools, meters, computer equipment and other items and are accounted for as operating leases. The Company's unconsolidated subsidiaries, which are accounted for under the equity method, have capital leases of electric generating equipment having a remaining lease commitment of approximately $3.9 million. The Company has guaranteed 50% or $2.0 million of these capital lease commitments.

OTHER MATTERS

In addition to the legal proceedings disclosed in Part II, Item 1 of this report, the Company is involved in other litigation and regulatory matters arising in the normal course of business. These other matters may include, for example, negligence claims and tax, regulatory or other governmental audits, inspections, investigations or other proceedings. These matters may involve state and federal taxes, safety, compliance with regulations, rate base, cost of service and purchased gas cost issues, among other things. While these normal-course matters could have a material effect on earnings and cash flows in the quarterly and annual period in which they are resolved, they are not expected to change materially the Company's present liquidity position, nor are they expected to have a material adverse effect on the financial condition of the Company.

Market Risk Sensitive Instruments

For a complete discussion of market risk sensitive instruments, refer to "Market Risk Sensitive Instruments" in Item 7 of the Company's 2007 Form 10-K. There have been no subsequent material changes to the Company's exposure to market risk sensitive instruments.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

Rate and Regulatory Matters

Utility Operation

Base rate adjustments in both the New York and Pennsylvania rate jurisdictions do not reflect the recovery of purchased gas costs. Such costs are recovered through operation of the purchased gas adjustment clauses of the appropriate regulatory authorities.

New York Jurisdiction

On January 29, 2007, Distribution Corporation commenced a rate case by filing proposed tariff amendments and supporting testimony requesting approval to increase its annual revenues by $52.0 million. Following standard procedure, the NYPSC suspended the proposed tariff amendments to enable its staff and intervenors to conduct a routine investigation and hold hearings. Distribution Corporation explained in the filing that its request for rate relief was necessitated by decreased revenues resulting from customer conservation efforts and increased customer uncollectibles, among other things. The rate filing also included a proposal for an efficiency and conservation initiative with a revenue decoupling mechanism designed to render the Company indifferent to throughput reductions resulting from conservation. On September 20, 2007, the NYPSC issued an order approving, with modifications, Distribution Corporation's conservation program for implementation on an accelerated basis. Associated ratemaking issues, however, were reserved for consideration in the rate case.

On December 21, 2007, the NYPSC issued a rate order providing for an annual rate increase of $1.8 million, together with a monthly bill surcharge that would collect up to $10.8 million to recover expenses for implementation of the conservation program. The rate increase and bill surcharge became effective December 28, 2007. The rate order further provided for a return on equity of 9.1%. The rate order also adopted Distribution Corporation's proposed revenue decoupling mechanism. The revenue decoupling mechanism, like others, "decouples" revenues from throughput by enabling the Company to collect from small volume customers its allowed margin on average weather normalized usage per customer. The effect of the revenue decoupling mechanism is to render the Company financially indifferent to throughput decreases resulting from conservation. The Company surcharges or credits any difference from the average weather normalized usage per customer account. The surcharge or credit is calculated to recover total margin for the most recent twelve-month period ending December 31, and applied to customer bills annually, beginning March 1st.

On April 18, 2008, Distribution Corporation filed an appeal with Supreme Court, Albany County, seeking review of the rate order. The appeal contends that portions of the rate order should be invalidated because they fail to meet the applicable legal standard for agency decisions. Among the issues challenged by the Company are the reasonableness of the NYPSC's disallowance of expense items, including health care costs, and the methodology used for calculating rate of return, which the appeal contends understated the Company's cost of equity. The Company cannot predict the outcome of the appeal at this time.

Pennsylvania Jurisdiction

On June 1, 2006, Distribution Corporation filed proposed tariff amendments with PaPUC to increase annual revenues by $25.9 million to cover increases in the cost of service to be effective July 30, 2006. The rate request was filed to address increased costs associated with Distribution Corporation's ongoing construction program as well as increases in operating costs, particularly uncollectible accounts. Following standard regulatory procedure, the PaPUC issued an order on July 20, 2006 instituting a rate proceeding and suspending the proposed tariff amendments until March 2, 2007. On October 2, 2006, the parties, including Distribution Corporation, Staff of the PaPUC and intervenors, executed an agreement (Settlement) proposing to settle all issues in the rate proceeding. The Settlement includes an increase in annual revenues of $14.3 million to non-gas revenues, an agreement not to file a rate case until January 28, 2008 at the earliest and an early implementation date. The Settlement was approved by the PaPUC at its meeting on November 30, 2006, and the new rates became effective January 1, 2007.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

On June 8, 2006, the NTSB issued safety recommendations to Distribution Corporation, the PaPUC and certain other parties as a result of an investigation of a natural gas explosion that occurred on Distribution Corporation's system in Dubois, Pennsylvania in August 2004. The explosion destroyed a residence, resulting in the death of two people who lived there, and damaged a number of other houses in the immediate vicinity. Without admitting liability, Distribution Corporation settled all significant third-party claims against it related to the explosion.

The NTSB's safety recommendations to Distribution Corporation involved revisions to its butt-fusion procedures for joining plastic pipe, and revisions to its procedures for qualifying personnel who perform plastic fusions. Although not required by law to do so, Distribution Corporation implemented those recommendations. In December 2006, the NTSB classified its recommendations as "closed" after determining that Distribution Corporation took acceptable action with respect to the recommendations.

The NTSB's recommendation to the PaPUC was to require an analysis of the integrity of butt-fusion joints in Distribution Corporation's system and replacement of those joints that are determined to have unacceptable characteristics. Distribution Corporation has worked cooperatively with the Staff of the PaPUC to permit the PaPUC to undertake the analysis recommended by the NTSB.

In late November 2007, Distribution Corporation reached a tentative settlement with the Law Bureau Prosecutory Staff of the PaPUC (the "Law Bureau") regarding the explosion and the PaPUC's subsequent investigation. The Law Bureau and Distribution Corporation jointly submitted the terms of the settlement to the PaPUC for approval. The PaPUC issued the Settlement Agreement for public comment with a comment period ending April 3, 2008. While no comments were filed, the Chairman of the PaPUC recommended that, pursuant to revised provisions of the Settlement Agreement, Distribution Corporation should, without admitting liability, make a $100,000 payment to an assistance fund for payment-troubled customers and make an additional $50,000 payment to fund safety-related activities. The PaPUC adopted the Chairman's recommendation unanimously at its public meeting held on May 1, 2008, and a tentative final order was issued on May 21, 2008. Distribution Corporation accepted the proposed Settlement Agreement. No other comments were filed, and by its terms the tentative order approving the Settlement Agreement became final on June 5, 2008 without further action by the PaPUC. On June 19, 2008, Distribution Corporation fulfilled the last condition for closing the proceeding by providing notice to the Secretary of the PaPUC that the $100,000 payment to the assistance fund had been made. Distribution Corporation is working with the Staff of the PaPUC to determine how the additional $50,000 in safety-related funding will be spent.

Pipeline and Storage

Supply Corporation currently does not have a rate case on file with the FERC. A rate settlement approved by the FERC on February 9, 2007 requires Supply Corporation to make a general rate filing to be effective December 1, 2011, and bars Supply Corporation from making a general rate filing before then, with some exceptions specified in the settlement.

Empire currently does not have a rate case on file with the NYPSC. Among the issues resolved in connection with Empire's FERC application to build the Empire Connector are the rates and terms of service that will become applicable to all of Empire's business, effective upon Empire constructing and placing its new facilities into service (currently expected for November 2008). At that time, Empire will become an interstate pipeline subject to FERC regulation. The order described in the following paragraph requires Empire to make a filing at the FERC within three years after the in-service date justifying Empire's existing recourse rates or proposing alternative rates.

On December 21, 2006, the FERC issued an order granting a Certificate of Public Convenience and Necessity authorizing the construction and operation of the Empire Connector and various other related pipeline projects by other unaffiliated companies. The Empire Certificate contains various environmental and other conditions. Empire accepted that Certificate and received additional environmental permits from the U.S. Army Corps of Engineers and state environmental agencies. Empire also received, from all six upstate New York counties in which it will build the Empire Connector

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

project, final approval of sales tax exemptions and temporary partial property tax abatements. In June 2007, Empire signed a firm transportation service agreement with KeySpan Gas East Corporation, under which Empire is obligated to provide transportation service that will require construction of this project. Construction began in September 2007 and is on schedule to be completed by the planned in-service date of November 2008, although the actual in-service date will depend upon the completion of the Millennium Pipeline.

Environmental Matters

The Company is subject to various federal, state and local laws and regulations relating to the protection of the environment. The Company has established procedures for the ongoing evaluation of its operations to identify potential environmental exposures and comply with regulatory policies and procedures. It is the Company's policy to accrue estimated environmental clean-up costs (investigation and remediation) when such amounts can reasonably be estimated and it is probable that the Company will be required to incur such costs.

The Company received, in 1998 and again in October 1999, notice that the NYDEC believes the Company is responsible for contamination discovered at a former manufactured gas plant site located in New York for which the Company had not been named as a PRP. In February 2007, the NYDEC identified the Company as a PRP for the site and issued a proposed remedial action plan. The NYDEC estimated clean-up costs under its proposed remedy to be $8.9 million if implemented. Although the Company commented to the NYDEC that the proposed remedial action plan contained a number of material errors, omissions and procedural defects, the NYDEC, in a March 2007 Record of Decision, selected the remedy it had previously proposed. In July 2007, the Company appealed the NYDEC's Record of Decision to the New York State Supreme Court, Albany County. The Court dismissed the appeal in January 2008. The Company filed a notice of appeal in February 2008. In July 2008, the Company withdrew its appeal and agreed to the terms of an Order on Consent issued by the NYDEC. Pursuant to the order, the Company will remediate the site consistent with the remedy selected in the NYDEC's Record of Decision. The Company will also reimburse the NYDEC in the amount of approximately $1.5 million for costs incurred in connection with the site from 1998 through May 30, 2007. The Company acknowledged that additional charges related to the site will be billed to the Company at a later date, including costs incurred by the NYDEC after May 30, 2007 and any costs incurred by the New York Department of Health. The Company has not received any estimates of such additional costs. The Company has recorded an estimated minimum liability of $10.4 million associated with this site.

At June 30, 2008, the Company has estimated its remaining clean-up costs related to former manufactured gas plant sites and third party waste disposal sites (including the former manufactured gas plant site discussed above) will be in the range of $13.5 million to $17.2 million. The minimum estimated liability of $13.5 million has been recorded on the Consolidated Balance Sheet at June 30, 2008, including the $10.4 million discussed above. The Company expects to recover its environmental clean-up costs from a combination of rate recovery and deferred insurance proceeds that are currently recorded as a regulatory liability on the Consolidated Balance Sheet.

The Company is currently not aware of any material additional exposure to environmental liabilities. However, changes in environmental regulations or other factors could adversely impact the Company.

New Accounting Pronouncements

In September 2006, the FASB issued SFAS 157. SFAS 157 provides guidance for using fair value to measure assets and liabilities. The pronouncement serves to clarify the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect that fair-value measurements have on earnings. SFAS 157 is to be applied whenever another standard requires or allows assets or liabilities to be measured at fair value. In accordance with FASB Staff Position FAS No. 157-2, SFAS 157 is effective for financial assets and financial liabilities that are recognized or disclosed at fair value on a recurring basis as of the Company's first quarter of fiscal 2009. The same FASB Staff Position delays the effective date for nonfinancial assets and nonfinancial liabilities, except for

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

items that are recognized or disclosed at fair value on a recurring basis, until the Company's first quarter of fiscal 2010. The Company is currently evaluating the impact that the adoption of SFAS 157 will have on its consolidated financial statements.

In September 2006, the FASB also issued SFAS 158, (an amendment of SFAS 87, SFAS 88, SFAS 106, and SFAS 132R). SFAS 158 requires that companies recognize a net liability or asset to report the underfunded or overfunded status of their defined benefit pension and other post-retirement benefit plans on their balance sheets, as well as recognize changes in the funded status of a defined benefit post-retirement plan in the year in which the changes occur through comprehensive income. The pronouncement also specifies that a plan's assets and obligations that determine its funded status be measured as of the end of the Company's fiscal year, with limited exceptions. In accordance with SFAS 158, the Company has recognized the funded status of its benefit plans and implemented the disclosure requirements of SFAS 158 at September 30, 2007. The requirement to measure the plan assets and benefit obligations as of the Company's fiscal year-end date will be adopted by the Company by the end of fiscal 2009. Currently, the Company measures its plan assets and benefit obligations using a June 30th measurement date.

In February 2007, the FASB issued SFAS 159. SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not otherwise required to be measured at fair value under GAAP. A company that elects the fair value option for an eligible item will be required to recognize in current earnings any changes in that item's fair value in reporting periods subsequent to the date of adoption. SFAS 159 is effective as of the Company's first quarter of fiscal 2009. The Company is currently evaluating the impact, if any, that the adoption of SFAS 159 will have on its consolidated financial statements.

In December 2007, the FASB issued SFAS 141R. SFAS 141R will significantly change the accounting for business combinations in a number of areas including the treatment of contingent consideration, contingencies, acquisition costs, in process research and development and restructuring costs. In addition, under SFAS 141R, changes in deferred tax asset valuation allowances and acquired income tax uncertainties in a business combination after the measurement period will impact income tax expense. SFAS 141R is effective as of the Company's first quarter of fiscal 2010.

In December 2007, the FASB issued SFAS 160. SFAS 160 will change the accounting and reporting for minority interests, which will be recharacterized as noncontrolling interests (NCI) and classified as a component of equity. This new consolidation method will significantly change the accounting for transactions with minority interest holders. SFAS 160 is effective as of the Company's first quarter of fiscal 2010. The Company currently does not have any NCI.

In March 2008, the FASB issued SFAS 161. SFAS 161 requires entities to provide enhanced disclosures related to an entity's derivative instruments and hedging activities in order to enable investors to better understand how derivative instruments and hedging activities impact an entity's financial reporting. The additional disclosures include how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS 133 and its related interpretations, and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. SFAS 161 is effective as of the Company's second quarter of fiscal 2009. The Company is currently evaluating the impact that the adoption of SFAS 161 will have on its disclosures in its notes to its consolidated financial statements.

Safe Harbor for Forward-Looking Statements

The Company is including the following cautionary statement in this Form 10-Q to make applicable and take advantage of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 for any forward-looking statements made by, or on behalf of, the Company. Forward-looking statements include statements concerning plans, objectives, goals, projections, strategies, future events or performance, and underlying assumptions and other statements which are other than statements of historical facts. From time to time, the Company may publish or otherwise make available forward-looking statements of this nature. All such subsequent forward-looking statements, whether written or oral and

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Cont.)

whether made by or on behalf of the Company, are also expressly qualified by these cautionary statements. Certain statements contained in this report, including, without limitation, statements regarding future prospects, plans, performance and capital structure, anticipated capital expenditures, completion of construction projects, projections for pension and other post-retirement benefit obligations, impacts of the adoption of new accounting rules, and possible outcomes of litigation or regulatory proceedings, as well as statements that are identified by the use of the words "anticipates," "estimates," "expects," "forecasts," "intends," "plans," "predicts," "projects," "believes," "seeks," "will," "may," and similar expressions, are "forward-looking" statements as defined in the Private Securities Litigation Reform Act of 1995 and accordingly involve risks and uncertainties which could cause actual results or outcomes to differ materially from those expressed in the forward-looking statements. The forward-looking statements contained herein are based on various assumptions, many of which are based, in turn, upon further assumptions. The Company's expectations, beliefs and projections are expressed in good faith and are believed by the Company to have a reasonable basis, including, without limitation, management's examination of historical operating trends, data contained in the Company's records and other data available from third parties, but there can be no assurance that management's expectations, beliefs or projections will result or be achieved or accomplished. In addition to other factors and matters discussed elsewhere herein, the following are important factors that, in the view of the Company, could cause actual results to differ materially from those discussed in the forward-looking statements:

1. Changes in economic conditions, including economic disruptions caused by terrorist activities, acts of war or major accidents, and downturns in economic activity including national or regional recessions;
2. Changes in demographic patterns and weather conditions, including the occurrence of severe weather such as hurricanes;
3. Changes in the availability and/or price of natural gas or oil and the effect of such changes on the accounting treatment of derivative financial instruments or the valuation of the Company's natural gas and oil reserves;
4. Uncertainty of oil and gas reserve estimates;
5. Ability to successfully identify, drill for and produce economically viable natural gas and oil reserves, including shortages, delays or unavailability of equipment and services required in drilling operations;
6. Significant changes from expectations in the Company's actual production levels for natural gas or oil;
7. Changes in the availability and/or price of derivative financial instruments;
8. Changes in the price differentials between various types of oil;
9. Inability to obtain new customers or retain existing ones;
10. Significant changes in competitive factors affecting the Company;
11. Changes in laws and regulations to which the Company is subject, including changes in tax, environmental, safety and employment laws and regulations;
12. Governmental/regulatory actions, initiatives and proceedings, including those involving acquisitions, financings, rate cases (which address, among other things, allowed rates of return, rate design and retained gas), affiliate relationships, industry structure, franchise renewal, and environmental/safety requirements;
13. Unanticipated impacts of restructuring initiatives in the natural gas and electric industries;
14. Significant changes from expectations in actual capital expenditures and operating expenses and unanticipated project delays or changes in project costs or plans;

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Concl.)

15. The nature and projected profitability of pending and potential projects and other investments, and the ability to obtain necessary governmental approvals and permits;

16. Occurrences affecting the Company's ability to obtain funds from operations, from borrowings under our credit lines or other credit facilities or from issuances of other short-term notes or debt or equity securities to finance needed capital expenditures and other investments, including any downgrades in the Company's credit ratings;

17. Ability to successfully identify and finance acquisitions or other investments and ability to operate and integrate existing and any subsequently acquired business or properties;

18. Impairments under the SEC's full cost ceiling test for natural gas and oil reserves;

19. Changes in the market price of timber and the impact such changes might have on the types and quantity of timber harvested by the Company;

20. Significant changes in tax rates or policies or in rates of inflation or interest;

21. Significant changes in the Company's relationship with its employees or contractors and the potential adverse effects if labor disputes, grievances or shortages were to occur;

22. Changes in accounting principles or the application of such principles to the Company;

23. The cost and effects of legal and administrative claims against the Company;

24. Changes in actuarial assumptions and the return on assets with respect to the Company's retirement plan and post-retirement benefit plans;

25. Increasing health care costs and the resulting effect on health insurance premiums and on the obligation to provide post-retirement benefits; or

26. Increasing costs of insurance, changes in coverage and the ability to obtain insurance.

The Company disclaims any obligation to update any forward-looking statements to reflect events or circumstances after the date hereof.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Refer to the "Market Risk Sensitive Instruments" section in Item 2 — MD&A.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The term "disclosure controls and procedures" is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. These rules refer to the controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. The Company's management, including the Chief Executive Officer and Principal Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, the Company's Chief Executive Officer and Principal Financial Officer concluded that the Company's disclosure controls and procedures were effective as of June 30, 2008.

Table of Contents

Item 4. Controls and Procedures (Concl.)

Changes in Internal Controls Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the quarter ended June 30, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

On June 8, 2006, the NTSB issued safety recommendations to Distribution Corporation, the PaPUC and certain others as a result of its investigation of a natural gas explosion that occurred on Distribution Corporation's system in Dubois, Pennsylvania in August 2004. For a discussion of this matter, refer to Part II, Item 7 — MD&A of this report under the heading "Other Matters — Rate and Regulatory Matters."

For a discussion of various environmental and other matters, refer to Part I, Item 1 at Note 4 — Commitments and Contingencies, and Part I, Item 2 — MD&A of this report under the heading "Other Matters — Environmental Matters."

In addition to the matters referenced above, the Company is involved in other litigation and regulatory matters arising in the normal course of business. These other matters may include, for example, negligence claims and tax, regulatory or other governmental audits, inspections, investigations or other proceedings. These matters may involve state and federal taxes, safety, compliance with regulations, rate base, cost of service, and purchased gas cost issues, among other things. While these normal-course matters could have a material effect on earnings and cash flows in the quarterly and annual period in which they are resolved, they are not expected to change materially the Company's present liquidity position, nor to have a material adverse effect on the financial condition of the Company.

Item 1A. Risk Factors

The risk factors in Item 1A of the Company's 2007 Form 10-K, as amended by Item 1A of the Company's Form 10-Q for the quarter ended March 31, 2008, have not materially changed other than as set forth below. The risk factor presented below supersedes the risk factor having the same caption in the 2007 Form 10-K and should otherwise be read in conjunction with all of the risk factors disclosed in the 2007 Form 10-K and the March 31, 2008 Form 10-Q.

National Fuel may be adversely affected by economic conditions.

Periods of slowed economic activity generally result in decreased energy consumption, particularly by industrial and large commercial companies. As a consequence, national or regional recessions or other downturns in economic activity could adversely affect National Fuel's revenues and cash flows or restrict its future growth. Economic conditions in National Fuel's utility service territories and energy marketing territories also impact its collections of accounts receivable. Customers of National Fuel's Utility and Energy Marketing segments may have particular trouble paying their bills during periods of declining economic activity and high commodity prices, potentially resulting in increased bad debt expense and reduced earnings.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On April 1, 2008, the Company issued a total of 2,400 unregistered shares of Company common stock to the eight non-employee directors of the Company who receive compensation under the Company's Retainer Policy for Non-Employee Directors, 300 shares to each such director. All of these unregistered shares were issued as partial consideration for the directors' services during the quarter ended June 30, 2008. These transactions were exempt from registration by Section 4(2) of the Securities Act of 1933 as transactions not involving a public offering.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds (Concl.)

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased(a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Share Repurchase Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under Share Repurchase Plans or Programs (b)
Apr. 1 - 30, 2008	446,666	$ 46.99	439,722	1,332,725
May 1 - 31, 2008	32,337	$ 57.99	—	1,332,725
June 1 - 30, 2008	9,686	$ 58.43	—	1,332,725
Total	488,689	$ 47.94	439,722	1,332,725

(a) Represents (i) shares of common stock of the Company purchased on the open market with Company "matching contributions" for the accounts of participants in the Company's 401(k) plans, and (ii) shares of common stock of the Company tendered to the Company by holders of stock options or shares of restricted stock for the payment of option exercise prices or applicable withholding taxes, and (iii) shares of common stock of the Company purchased on the open market pursuant to the Company's publicly announced share repurchase program. Shares purchased other than through a publicly announced share repurchase program totaled 6,944 in April 2008, 32,337 in May 2008 and 9,686 in June 2008 (a three month total of 48,967). Of those shares, 19,363 were purchased for the Company's 401(k) plans and 29,604 were purchased as a result of shares tendered to the Company by holders of stock options or shares of restricted stock.

(b) On December 8, 2005, the Company's Board of Directors authorized the repurchase of up to eight million shares of the Company's common stock. Repurchases may be made from time to time in the open market or through private transactions.

Bbl Barrel (of oil)

Bcf Billion cubic feet (of natural gas)

Bcfe (or Mcfe) — represents Bcf (or Mcf) Equivalent The total heat value (Btu) of natural gas and oil expressed as a volume of natural gas. National Fuel uses a conversion formula of 1 barrel of oil = 6 Mcf of natural gas.

Board foot A measure of lumber and/or timber equal to 12 inches in length by 12 inches in width by one inch in thickness.

Btu British thermal unit; the amount of heat needed to raise the temperature of one pound of water one degree Fahrenheit.

Capital expenditure Represents additions to property, plant, and equipment, or the amount of money a company spends to buy capital assets or upgrade its existing capital assets.

Cashout revenues A cash resolution of a gas imbalance whereby a customer pays Supply Corporation for gas the customer receives in excess of amounts delivered into Supply Corporation's system by the customer's shipper.

CTA Cumulative Foreign Currency Translation Adjustment

Degree day A measure of the coldness of the weather experienced, based on the extent to which the daily average temperature falls below a reference temperature, usually 65 degrees Fahrenheit.

Derivative A financial instrument or other contract, the terms of which include an underlying variable (a price, interest rate, index rate, exchange rate, or other variable) and a notional amount (number of units, barrels, cubic feet, etc.). The terms also permit for the instrument or contract to be settled net, and no initial net investment is required to enter into the financial instrument or contract. Examples include futures contracts, options, no cost collars and swaps.

Development costs Costs incurred to obtain access to proved reserves and to provide facilities for extracting, treating, gathering and storing the oil and gas.

Development well A well drilled to a known producing formation in a previously discovered field.

Dth Decatherm; one Dth of natural gas has a heating value of 1,000,000 British thermal units, approximately equal to the heating value of 1 Mcf of natural gas.

Exchange Act Securities Exchange Act of 1934, as amended

Expenditures for long-lived assets Includes capital expenditures, stock acquisitions and/or investments in partnerships.

Exploitation Development of a field, including the location, drilling, completion and equipment of wells necessary to produce the commercially recoverable oil and gas in the field.

Exploration costs Costs incurred in identifying areas that may warrant examination, as well as costs incurred in examining specific areas, including drilling exploratory wells.

Exploratory well A well drilled in unproven or semi-proven territory for the purpose of ascertaining the presence underground of a commercial hydrocarbon deposit.

FIN FASB Interpretation Number

FIN 47 FASB Interpretation No. 47, Accounting for Conditional Asset Retirement Obligations — an Interpretation of SFAS 143.

FIN 48 FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes — an Interpretation of SFAS 109.

Firm transportation and/or storage The transportation and/or storage service that a supplier of such service is obligated by contract to provide and for which the customer is obligated to pay whether or not the service is utilized.

GAAP Accounting principles generally accepted in the United States of America

Goodwill An intangible asset representing the difference between the fair value of a company and the price at which a company is purchased.

Grid The layout of the electrical transmission system or a synchronized transmission network.

Heavy oil A type of crude petroleum that usually is not economically recoverable in its natural state without being heated or diluted.

Hedging A method of minimizing the impact of price, interest rate, and/or foreign currency exchange rate changes, often times through the use of derivative financial instruments.

Hub Location where pipelines intersect enabling the trading, transportation, storage, exchange, lending and borrowing of natural gas.

Interruptible transportation and/or storage The transportation and/or storage service that, in accordance with contractual arrangements, can be interrupted by the supplier of such service, and for which the customer does not pay unless utilized.

LIBOR London Interbank Offered Rate

LIFO Last-in, first-out

Mbbl Thousand barrels (of oil)

Mcf Thousand cubic feet (of natural gas)

MD&A Management's Discussion and Analysis of Financial Condition and Results of Operations

MDth Thousand decatherms (of natural gas)

MMcf Million cubic feet (of natural gas)

MMcfe Million cubic feet equivalent

NYMEX New York Mercantile Exchange. An exchange which maintains a futures market for crude oil and natural gas.

Order 636 An order issued by FERC entitled "Pipeline Service Obligations and Revisions to Regulations Governing Self-Implementing Transportation Under Part 284 of the Commission's Regulations."

Proved developed reserves Reserves that can be expected to be recovered through existing wells with existing equipment and operating methods.

Proved undeveloped reserves Reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required to make these reserves productive.

PRP Potentially responsible party

PUHCA 1935 Public Utility Holding Company Act of 1935

PUHCA 2005 Public Utility Holding Company Act of 2005

Reserves The unproduced but recoverable oil and/or gas in place in a formation which has been proven by production.

Restructuring Generally referring to partial "deregulation" of the utility industry by statutory or regulatory process. Restructuring of federally regulated natural gas pipelines resulted in the separation (or "unbundled") of gas commodity service from transportation service for wholesale and large- volume retail markets. State restructuring programs attempt to extend the same process to retail mass markets.

SFAS 159 Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities — Including an Amendment of SFAS 115

Spot gas purchases The purchase of natural gas on a short-term basis.

Stock acquisitions Investments in corporations.

Unbundled service A service that has been separated from other services, with rates charged that reflect only the cost of the separated service.

VEBA Voluntary Employees' Beneficiary Association

WNC Weather normalization clause; a clause in utility rates which adjusts customer rates to allow a utility to recover its normal operating costs calculated at normal temperatures. If temperatures during the measured period are warmer than normal, customer rates are adjusted upward in order to recover projected operating costs. If temperatures during the measured period are colder than normal, customer rates are adjusted downward so that only the projected operating costs will be recovered.

This Form 10-K contains "forward-looking statements" as defined by the Private Securities Litigation Reform Act of 1995. Forward-looking statements should be read with the cautionary statements included in this Form 10-K at Item 7, MD&A, under the heading "Safe Harbor for Forward-Looking Statements." Forward-looking statements are all statements other than statements of historical fact, including, without limitation, statements regarding future prospects, plans, performance and capital structure, anticipated capital expenditures, completion of construction projects, projections for pension and other post-retirement benefit obligations, impacts of the adoption of new accounting rules, and possible outcomes of litigation or regulatory proceedings, as well as statements that are identified by the use of the words "anticipates," "estimates," "expects," "forecasts," "intends," "plans," "predicts," "projects," "believes," "seeks," "will," and "may" and similar expressions.

PART I

Item 1 *Business*

The Company and its Subsidiaries

National Fuel Gas Company (the Registrant), incorporated in 1902, is a holding company organized under the laws of the State of New Jersey. Except as otherwise indicated below, the Registrant owns directly or indirectly all of the outstanding securities of its subsidiaries. Reference to "the Company" in this report means the Registrant, the Registrant and its subsidiaries or the Registrant's subsidiaries as appropriate in the context of the disclosure. Also, all references to a certain year in this report relate to the Company's fiscal year ended September 30 of that year unless otherwise noted.

The Company is a diversified energy company consisting of five reportable business segments.

1. The Utility segment operations are carried out by National Fuel Gas Distribution Corporation (Distribution Corporation), a New York corporation. Distribution Corporation sells natural gas or provides natural gas transportation services to approximately 725,000 customers through a local distribution system located in western New York and northwestern Pennsylvania. The principal metropolitan areas served by Distribution Corporation include Buffalo, Niagara Falls and Jamestown, New York and Erie and Sharon, Pennsylvania.

2. The Pipeline and Storage segment operations are carried out by National Fuel Gas Supply Corporation (Supply Corporation), a Pennsylvania corporation, and Empire State Pipeline (Empire), a New York joint venture between two wholly owned subsidiaries of the Company. Supply Corporation provides interstate natural gas transportation and storage services for affiliated and nonaffiliated companies through (i) an integrated gas pipeline system extending from southwestern Pennsylvania to the New York-Canadian border at the Niagara River and eastward to Ellisburg and Leidy, Pennsylvania, and (ii) 28 underground natural gas storage fields owned and operated by Supply Corporation as well as four other underground natural gas storage fields owned and operated jointly with various other interstate gas pipeline companies. Supply Corporation is in the process of shutting down one of its smallest storage fields, which accounts for less than one percent of its marketable storage capacity. Empire, an intrastate pipeline company acquired by the Company in February 2003, transports natural gas for Distribution Corporation and for other utilities, large industrial customers and power producers in New York State. Empire owns a 157-mile pipeline that extends from the United States/Canadian border at the Niagara River near Buffalo, New York to near Syracuse, New York. Empire is constructing the Empire Connector project, which consists of a compressor station and a 78-mile pipeline extension from near Rochester, New York to an interconnection near Corning, New York with the unaffiliated Millennium Pipeline, which is also under construction. The Millennium Pipeline is expected to serve the New York City area upon its completion. Upon completion of the Empire and Millennium construction projects, which is currently expected to occur in November 2008, the Company expects that Empire will become an interstate pipeline company and will merge into Empire Pipeline, Inc. as described below.

3. The Exploration and Production segment operations are carried out by Seneca Resources Corporation (Seneca), a Pennsylvania corporation. Seneca is engaged in the exploration for, and the development and purchase of, natural gas and oil reserves in California, in the Appalachian region of the United States, in Wyoming, and in the Gulf Coast region of Texas, Louisiana, and Alabama, including offshore areas in federal waters and some state waters.

Table of Contents

In 2007, Seneca sold its subsidiary, Seneca Energy Canada Inc. (SECI), which conducted Exploration and Production operations in the provinces of Alberta, Saskatchewan and British Columbia in Canada. At September 30, 2007, the Company had U.S. reserves of 47,586 Mbbl of oil and 205,389 MMcf of natural gas.

4. The Energy Marketing segment operations are carried out by National Fuel Resources, Inc. (NFR), a New York corporation, which markets natural gas to industrial, commercial, public authority and residential end-users in western and central New York and northwestern Pennsylvania, offering competitively priced energy and energy management services for its customers.

5. The Timber segment operations are carried out by Highland Forest Resources, Inc. (Highland), a New York corporation, and by a division of Seneca known as its Northeast Division. This segment markets timber from its New York and Pennsylvania land holdings, owns two sawmill operations in northwestern Pennsylvania and processes timber consisting primarily of high quality hardwoods. At September 30, 2007, the Company owned 103,700 acres of timber property and managed an additional 3,105 acres of timber rights.

Financial information about each of the Company's business segments can be found in Item 7, MD&A and also in Item 8 at Note J — Business Segment Information.

The Company's other direct wholly owned subsidiaries are not included in any of the five reportable business segments and consist of the following:

- Horizon Energy Development, Inc. (Horizon), a New York corporation formed to engage in foreign and domestic energy projects through investments as a sole or substantial owner in various business entities. These entities include Horizon's wholly owned subsidiary, Horizon Energy Holdings, Inc., a New York corporation, which owns 100% of Horizon Energy Development B.V. (Horizon B.V.). Horizon B.V. is a Dutch company that is in the process of winding up or selling certain power development projects in Europe;
- Horizon LFG, Inc. (Horizon LFG), a New York corporation engaged through subsidiaries in the purchase, sale and transportation of landfill gas in Ohio, Michigan, Kentucky, Missouri, Maryland and Indiana. Horizon LFG and one of its wholly owned subsidiaries own all of the partnership interests in Toro Partners, LP (Toro), a limited partnership which owns and operates short-distance landfill gas pipeline companies. The Company acquired Toro in June 2003;
- Leidy Hub, Inc. (Leidy Hub), a New York corporation formed to provide various natural gas hub services to customers in the eastern United States;
- Data-Track Account Services, Inc. (Data-Track), a New York corporation formed to provide collection services principally for the Company's subsidiaries;
- Horizon Power, Inc. (Horizon Power), a New York corporation which is an "exempt wholesale generator" under PUHCA 2005 and is developing or operating mid-range independent power production facilities and landfill gas electric generation facilities; and
- Empire Pipeline, Inc., a New York corporation formed in 2005 to be the surviving corporation of a planned future merger with Empire, which is expected to occur after construction of the Empire Connector project (described below under the heading "Rates and Regulation" and under Item 7, MD&A under the headings "Investing Cash Flow" and "Rate and Regulatory Matters").

No single customer, or group of customers under common control, accounted for more than 10% of the Company's consolidated revenues in 2007.

Rates and Regulation

The Registrant is a holding company as defined under PUHCA 2005. PUHCA 2005 repealed PUHCA 1935, to which the Company was formerly subject, and granted the FERC and state public utility commissions access to certain books and records of companies in holding company systems. Pursuant to the FERC's regulations under PUHCA 2005, the Company and its subsidiaries are exempt from the FERC's books and records regulations under PUHCA 2005.

Table of Contents

The Utility segment's rates, services and other matters are regulated by the NYPSC with respect to services provided within New York and by the PaPUC with respect to services provided within Pennsylvania. For additional discussion of the Utility segment's rates and regulation, see Item 7, MD&A under the heading "Rate and Regulatory Matters" and Item 8 at Note C-Regulatory Matters.

The Pipeline and Storage segment's rates, services and other matters are currently regulated by the FERC with respect to Supply Corporation and by the NYPSC with respect to Empire. The FERC has authorized Empire to construct and operate additional facilities (the Empire Connector project) and to become a FERC-regulated interstate pipeline company upon placement of those facilities into service, which is currently expected to occur in November 2008. For additional discussion of the Pipeline and Storage segment's rates and regulation, see Item 7, MD&A under the heading "Rate and Regulatory Matters" and Item 8 at Note C-Regulatory Matters. For further discussion of the Empire Connector project, refer to Item 7, MD&A under the headings "Investing Cash Flow" and "Rate and Regulatory Matters."

The discussion under Item 8 at Note C-Regulatory Matters includes a description of the regulatory assets and liabilities reflected on the Company's Consolidated Balance Sheets in accordance with applicable accounting standards. To the extent that the criteria set forth in such accounting standards are not met by the operations of the Utility segment or the Pipeline and Storage segment, as the case may be, the related regulatory assets and liabilities would be eliminated from the Company's Consolidated Balance Sheets and such accounting treatment would be discontinued.

In addition, the Company and its subsidiaries are subject to the same federal, state and local (including foreign) regulations on various subjects, including environmental matters, to which other companies doing similar business in the same locations are subject.

The Utility Segment

The Utility segment contributed approximately 25.2% of the Company's 2007 income from continuing operations and 15.1% of the Company's 2007 net income available for common stock.

Additional discussion of the Utility segment appears below in this Item 1 under the headings "Sources and Availability of Raw Materials," "Competition: The Utility Segment" and "Seasonality," in Item 7, MD&A and in Item 8, Financial Statements and Supplementary Data.

The Pipeline and Storage Segment

The Pipeline and Storage segment contributed approximately 28.0% of the Company's 2007 income from continuing operations and 16.7% of the Company's 2007 net income available for common stock.

Supply Corporation has service agreements for all of its firm storage capacity, which totals approximately 68,408 MDth. The Utility segment has contracted for 27,865 MDth or 40.7% of the total firm storage capacity, and the Energy Marketing segment accounts for another 3,888 MDth or 5.7% of the total firm storage capacity. Nonaffiliated customers have contracted for the remaining 36,655 MDth or 53.6% of the total firm storage capacity. A majority of Supply Corporation's storage and transportation services is performed under contracts that allow Supply Corporation or the shipper to terminate the contract upon six or twelve months' notice effective at the end of the contract term. The contracts also typically include "evergreen" language designed to allow the contracts to extend year-to-year at the end of the primary term. At the beginning of 2008, 66.9% of Supply Corporation's total firm storage capacity was committed under contracts that, subject to 2007 shipper or Supply Corporation notifications, could have been terminated effective in 2008. Supply Corporation received one termination notice in 2007, for a 1.5 Bcf storage contract. Termination of that contract will be effective March 31, 2008, and Supply Corporation expects to remarket that capacity for service commencing April 1, 2008, at maximum tariff rates. The strong demand for market-area storage enabled Supply Corporation to eliminate its remaining storage service rate discounts in 2007. Supply Corporation anticipates that, effective April 1, 2008, all of its storage services will be contracted at the maximum tariff rates.

Supply Corporation's firm transportation capacity is not a fixed quantity, due to the diverse weblike nature of its pipeline system, and is subject to change as the market identifies different transportation paths and receipt/delivery

Table of Contents

point combinations. Supply Corporation currently has firm transportation service agreements for approximately 2,001 MDth per day (contracted transportation capacity). The Utility segment accounts for approximately 1,093 MDth per day or 54.6% of contracted transportation capacity, and the Energy Marketing and Exploration and Production segments represent another 100 MDth per day or 5.0% of contracted transportation capacity. The remaining 808 MDth or 40.4% of contracted transportation capacity is subject to firm contracts with nonaffiliated customers.

At the beginning of 2008, 58.0% of Supply Corporation's contracted transportation capacity was committed under affiliate contracts that were scheduled to expire in 2008 or, subject to 2007 shipper or Supply Corporation notifications, could have been terminated effective in 2008. Based on contract expirations and termination notices received in 2007 for 2008 termination, and taking into account any known contract additions, contracted transportation capacity with affiliates is expected to decrease 2.5% in 2008. Similarly, 24.3% of contracted transportation capacity was committed under unaffiliated shipper contracts that were scheduled to expire in 2008 or, subject to 2007 shipper or Supply Corporation notifications, could have been terminated effective in 2008. Based on contract expirations and termination notices received in 2007 for 2008 termination, and taking into account any known contract additions, contracted transportation capacity with unaffiliated shippers is expected to increase 2.1% in 2008. Supply Corporation previously has been successful in marketing and obtaining executed contracts for available transportation capacity (at discounted rates when necessary), and expects this success to continue.

Empire has service agreements for the 2007-2008 winter period for all of its firm transportation capacity, which totals approximately 565 MDth per day. Empire provides service under both annual contracts (service 12 months per year; contract term one or more years) and seasonal contracts (service during winter or summer only; contract term one or more partial years). Approximately 90.8% of Empire's firm contracted capacity is under multi-year annual contracts that expire after 2008. Approximately 2.7% of Empire's firm contracted capacity is under multi-year seasonal contracts that expire after 2008. The remaining capacity, which represents 6.5% of Empire's firm contracted capacity, is under single season or annual contracts which will expire before the end of 2008. Empire expects that all of this expiring capacity will be re-contracted under seasonal and/or annual arrangements for future contracting periods. The Utility segment accounts for approximately 7.7% of Empire's firm contracted capacity, and the Energy Marketing segment accounts for approximately 2.0% of Empire's firm contracted capacity, with the remaining 90.3% of Empire's firm contracted transportation capacity subject to contracts with nonaffiliated customers.

Additional discussion of the Pipeline and Storage segment appears below under the headings "Sources and Availability of Raw Materials," "Competition: The Pipeline and Storage Segment" and "Seasonality," in Item 7, MD&A and in Item 8, Financial Statements and Supplementary Data.

The Exploration and Production Segment

The Exploration and Production segment contributed approximately 37.1% of the Company's 2007 income from continuing operations and 62.4% of the Company's 2007 net income available for common stock.

Additional discussion of the Exploration and Production segment appears below under the headings "Discontinued Operations," "Sources and Availability of Raw Materials" and "Competition: The Exploration and Production Segment," in Item 7, MD&A and in Item 8, Financial Statements and Supplementary Data.

The Energy Marketing Segment

The Energy Marketing segment contributed approximately 3.8% of the Company's 2007 income from continuing operations and 2.3% of the Company's 2007 net income available for common stock.

Additional discussion of the Energy Marketing segment appears below under the headings "Sources and Availability of Raw Materials," "Competition: The Energy Marketing Segment" and "Seasonality," in Item 7, MD&A and in Item 8, Financial Statements and Supplementary Data.

Table of Contents

The Timber Segment

The Timber segment contributed approximately 1.9% of the Company's 2007 income from continuing operations and 1.1% of the Company's 2007 net income available for common stock.

Additional discussion of the Timber segment appears below under the headings "Sources and Availability of Raw Materials," "Competition: The Timber Segment" and "Seasonality," in Item 7, MD&A and in Item 8, Financial Statements and Supplementary Data.

All Other Category and Corporate Operations

The All Other category and Corporate operations contributed approximately 4.0% of the Company's 2007 income from continuing operations and 2.4% of the Company's 2007 net income available for common stock.

Additional discussion of the All Other category and Corporate operations appears below in Item 7, MD&A and in Item 8, Financial Statements and Supplementary Data.

Discontinued Operations

In August 2007, Seneca sold all of the issued and outstanding shares of SECI. SECI's operations are presented in the Company's financial statements as discontinued operations.

In July 2005, Horizon B.V. sold its entire 85.16% interest in United Energy, a.s. (U.E.), a district heating and electric generation business in the Czech Republic. United Energy's operations are presented in the Company's financial statements as discontinued operations.

Additional discussion of the Company's discontinued operations appears in Item 7, MD&A and in Item 8, Financial Statements and Supplementary Data.

Sources and Availability of Raw Materials

Natural gas is the principal raw material for the Utility segment. In 2007, the Utility segment purchased 79.6 Bcf of gas for core market demand. Gas purchased from producers and suppliers in the southwestern United States and Canada under firm contracts (seasonal and longer) accounted for 85% of these purchases. Purchases of gas on the spot market (contracts for one month or less) accounted for 15% of the Utility segment's 2007 purchases. Purchases from Chevron Natural Gas (21%), ConocoPhillips Company (15%) and Total Gas & Power North America Inc. (14%) accounted for 50% of the Utility's 2007 gas purchases. No other producer or supplier provided the Utility segment with more than 10% of its gas requirements in 2007.

Supply Corporation transports and stores gas owned by its customers, whose gas originates in the southwestern, mid-continent and Appalachian regions of the United States as well as in Canada. Empire transports gas owned by its customers, whose gas originates in the southwestern and mid-continent regions of the United States as well as in Canada. Additional discussion of proposed pipeline projects appears below under "Competition: The Pipeline and Storage Segment" and in Item 7, MD&A.

The Exploration and Production segment seeks to discover and produce raw materials (natural gas, oil and hydrocarbon liquids) as further described in this report in Item 7, MD&A and Item 8 at Note J-Business Segment Information and Note O-Supplementary Information for Oil and Gas Producing Activities.

With respect to the Timber segment, Highland requires an adequate supply of timber to process in its sawmill and kiln operations. Forty-nine percent of the timber processed during 2007 in Highland's sawmill operations came from land owned by the Company's subsidiaries, and 51% came from outside sources. Timber cut for gas well drilling locations, access roads, and pipelines constituted an increasing portion of Highland's timber supply, both from land owned by the Company's subsidiaries and from outside sources. In addition, Highland purchased approximately 6.5 million board feet of green lumber to augment lumber supply for its kiln operations.

The Energy Marketing segment depends on an adequate supply of natural gas to deliver to its customers. In 2007, this segment purchased 53 Bcf of natural gas, of which 51 Bcf served core market demands. The remaining

Table of Contents

2 Bcf largely represents gas used in operations. The gas purchased by the Energy Marketing segment originates in either the Appalachian or mid-continent regions of the United States or in Canada.

Competition

Competition in the natural gas industry exists among providers of natural gas, as well as between natural gas and other sources of energy. The natural gas industry has gone through various stages of regulation. Apart from environmental and state utility commission regulation, the natural gas industry has experienced considerable deregulation. This has enhanced the competitive position of natural gas relative to other energy sources, such as fuel oil or electricity, since some of the historical regulatory impediments to adding customers and responding to market forces have been removed. In addition, management believes that the environmental advantages of natural gas have enhanced its competitive position relative to other fuels.

The electric industry has been moving toward a more competitive environment as a result of changes in federal law in 1992 and initiatives undertaken by the FERC and various states. It remains unclear what the impact of any further restructuring in response to legislation or other events may be.

The Company competes on the basis of price, service and reliability, product performance and other factors. Sources and providers of energy, other than those described under this "Competition" heading, do not compete with the Company to any significant extent.

Competition: The Utility Segment

The changes precipitated by the FERC's restructuring of the natural gas industry in Order No. 636, which was issued in 1992, continue to reshape the roles of the gas utility industry and the state regulatory commissions. In both New York and Pennsylvania, Distribution Corporation has retained substantial numbers of residential and small commercial customers as sales customers. However, for many years almost all the industrial and a substantial number of commercial customers have purchased their gas supplies from marketers and utilized Distribution Corporation's gas transportation services. Regulators in both New York and Pennsylvania have adopted retail competition programs for natural gas supply purchases by the remaining utility sales customers. To date, the Utility segment's traditional distribution function remains largely unchanged; however, in New York, the Utility segment has instituted a number of programs to accommodate more widespread customer choice. In Pennsylvania, the PaPUC issued a report in October 2005 that concluded "effective competition" does not exist in the retail natural gas supply market statewide. In 2006, the PaPUC reconvened a stakeholder group to explore ways to increase the participation of retail customers in choice programs. A decision by the PaPUC on retail competition matters remains pending.

Competition for large-volume customers continues with local producers or pipeline companies attempting to sell or transport gas directly to end-users located within the Utility segment's service territories without use of the utility's facilities (i.e., bypass). In addition, competition continues with fuel oil suppliers and may increase with electric utilities making retail energy sales.

The Utility segment competes in its most vulnerable markets (the large commercial and industrial markets) by offering unbundled, flexible services. The Utility segment continues to develop or promote new sources and uses of natural gas or new services, rates and contracts. The Utility segment also emphasizes and provides high quality service to its customers.

Competition: The Pipeline and Storage Segment

Supply Corporation competes for market growth in the natural gas market with other pipeline companies transporting gas in the northeast United States and with other companies providing gas storage services. Supply Corporation has some unique characteristics which enhance its competitive position. Its facilities are located adjacent to Canada and the northeastern United States and provide part of the link between gas-consuming regions of the eastern United States and gas-producing regions of Canada and the southwestern, southern and other continental regions of the United States. This location offers the opportunity for increased transportation and storage services in the future.

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1346 of 2431

Table of Contents

Empire competes for market growth in the natural gas market with other pipeline companies transporting gas in the northeast United States and upstate New York in particular. Empire is well situated to provide transportation from Canadian sourced gas, and its facilities are readily expandable. These characteristics provide Empire the opportunity to compete for an increased share of the gas transportation markets. As noted above, Empire is constructing the Empire Connector project, which will expand its natural gas pipeline and enable Empire to serve new markets in New York and elsewhere in the Northeast. For further discussion of this project, refer to Item 7, MD&A under the headings "Investing Cash Flow" and "Rate and Regulatory Matters."

Competition: The Exploration and Production Segment

The Exploration and Production segment competes with other oil and natural gas producers and marketers with respect to sales of oil and natural gas. The Exploration and Production segment also competes, by competitive bidding and otherwise, with other oil and natural gas producers with respect to exploration and development prospects.

To compete in this environment, Seneca originates and acts as operator on certain of its prospects, seeks to minimize the risk of exploratory efforts through partnership-type arrangements, utilizes technology for both exploratory studies and drilling operations, and seeks market niches based on size, operating expertise and financial criteria.

Competition: The Energy Marketing Segment

The Energy Marketing segment competes with other marketers of natural gas and with other providers of energy management services. Competition in this area is well developed with regard to price and services from local, regional and, more recently, national marketers.

Competition: The Timber Segment

With respect to the Timber segment, Highland competes with other sawmill operations and with other suppliers of timber, logs and lumber. These competitors may be local, regional, national or international in scope. This competition, however, is primarily limited to those entities which either process or supply high quality hardwoods species such as cherry, oak and maple as veneer logs, saw logs, export logs or lumber ultimately used in the production of high-end furniture, cabinetry and flooring. The Timber segment sells its products in domestic and international markets.

Seasonality

Variations in weather conditions can materially affect the volume of gas delivered by the Utility segment, as virtually all of its residential and commercial customers use gas for space heating. The effect that this has on Utility segment margins in New York is mitigated by a WNC, which covers the eight-month period from October through May. Weather that is more than 2.2% warmer than normal results in a surcharge being added to customers' current bills, while weather that is more than 2.2% colder than normal results in a refund being credited to customers' current bills.

Volumes transported and stored by Supply Corporation may vary materially depending on weather, without materially affecting its revenues. Supply Corporation's allowed rates are based on a straight fixed-variable rate design which allows recovery of fixed costs in fixed monthly reservation charges. Variable charges based on volumes are designed to recover only the variable costs associated with actual transportation or storage of gas.

Volumes transported by Empire may vary materially depending on weather, which can have a moderate effect on its revenues. Empire's allowed rates currently are based on a modified fixed-variable rate design, which allows recovery of most fixed costs in fixed monthly reservation charges. Variable charges based on volumes are designed to recover variable costs associated with actual transportation of gas, to recover return on equity, and to recover income taxes. When Empire becomes a FERC-regulated interstate pipeline company (which is currently expected to occur in November 2008), Empire's allowed rates, like Supply Corporation's, will be based on a straight fixed-variable design. Under that rate design, weather-related variations in transportation volumes will not materially affect revenues.

Variations in weather conditions materially affect the volume of gas consumed by customers of the Energy Marketing segment. Volume variations have a corresponding impact on revenues within this segment.

The activities of the Timber segment vary on a seasonal basis and are subject to weather constraints. Traditionally, the timber harvesting season occurs when timber growth is dormant and runs from approximately September to March. The operations conducted in the summer months typically focus on pulpwood and on thinning lower-grade or lower value trees from timber stands to encourage the growth of higher-grade or higher value trees.

Capital Expenditures

A discussion of capital expenditures by business segment is included in Item 7, MD&A under the heading "Investing Cash Flow."

Environmental Matters

A discussion of material environmental matters involving the Company is included in Item 7, MD&A under the heading "Environmental Matters" and in Item 8, Note H — Commitments and Contingencies.

Miscellaneous

The Company and its wholly owned or majority-owned subsidiaries had a total of 1,952 full-time employees at September 30, 2007. Excluding the 23 employees the Company had in its Canadian operations at SECI, this is a decrease of approximately one percent from the 1,970 employees in the Company's U.S. operations at September 30, 2006.

Agreements covering employees in collective bargaining units in New York are scheduled to expire in February 2008. The Company has reached new agreements with the local leadership of those collective bargaining units, and the members of each collective bargaining unit have either approved their respective new agreement or are scheduled to vote on their respective new agreement in December 2007. The new agreements provide for an effective date of February 2008 and an expiration date of February 2013. Certain agreements covering employees in collective bargaining units in Pennsylvania are scheduled to expire in April 2009, and other agreements covering employees in collective bargaining units in Pennsylvania are scheduled to expire in May 2009.

The Utility segment has numerous municipal franchises under which it uses public roads and certain other rights-of-way and public property for the location of facilities. When necessary, the Utility segment renews such franchises.

The Company makes its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, available free of charge on the Company's internet website, www.nationalfuelgas.com, as soon as reasonably practicable after they are electronically filed with or furnished to the SEC. The information available at the Company's internet website is not part of this Form 10-K or any other report filed with or furnished to the SEC.

Table of Contents

Executive Officers of the Company as of November 15, 2007 (except as otherwise noted)(1)

Name and Age (as of November 15, 2007)	Current Company Positions and Other Material Business Experience During Past Five Years
Philip C. Ackerman (63)	Chairman of the Board of Directors since January 2002; Chief Executive Officer since October 2001; and President of Horizon since September 1995. Mr. Ackerman has served as a Director of the Company since March 1994, and previously served as President of the Company from July 1999 through January 2006.
David F. Smith (54)	President of the Company since February 2006; Chief Operating Officer of the Company since February 2006; President of Supply Corporation since April 2005; President of Empire since April 2005. Mr. Smith previously served as Vice President of the Company from April 2005 through January 2006; President of Distribution Corporation from July 1999 to April 2005; and Senior Vice President of Supply Corporation from July 2000 to April 2005.
Ronald J. Tanski (55)	Treasurer and Principal Financial Officer of the Company since April 2004; President of Distribution Corporation since February 2006; Treasurer of Distribution Corporation since April 2004; Treasurer of Horizon since February 1997. Mr. Tanski previously served as Controller of the Company from February 2003 through March 2004; Senior Vice President of Distribution Corporation from July 2001 through January 2006; and Controller of Distribution Corporation from February 1997 through March 2004.
Matthew D. Cabell (49)	President of Seneca since December 2006. Prior to joining Seneca, Mr. Cabell served as Executive Vice President and General Manager of Marubeni Oil & Gas (USA) Inc., an exploration and production company, from June 2003 to December 2006. From January 2002 to June 2003, Mr. Cabell served as a consultant assisting oil companies in upstream acquisition and divestment transactions as well as Gulf of Mexico entry strategy, first as an independent consultant and then as Vice President of Randall & Dewey, Inc., a major oil and gas transaction advisory firm. Mr. Cabell's prior employers are not subsidiaries or affiliates of the Company.
Karen M. Camiolo (48)	Controller and Principal Accounting Officer of the Company since April 2004; Controller of Distribution Corporation and Supply Corporation since April 2004; and Chief Auditor of the Company from July 1994 through March 2004.
Anna Marie Cellino (54)	Secretary of the Company since October 1995; Secretary of Distribution Corporation since September 1999; Senior Vice President of Distribution Corporation since July 2001.
Paula M. Ciprich (47)	General Counsel of the Company since January 2005; Assistant Secretary of Distribution Corporation since February 1997.
Donna L. DeCarolis (48)	Vice President Business Development of the Company since October 2007. Ms. DeCarolis previously served as President of NFR from January 2005 to October 2007; Secretary of NFR from March 2002 to October 2007; and Vice President of NFR from May 2001 to January 2005.
John R. Pustulka (55)	Senior Vice President of Supply Corporation since July 2001.
James D. Ramsdell (52)	Senior Vice President of Distribution Corporation since July 2001.

(1) The executive officers serve at the pleasure of the Board of Directors. The information provided relates to the Company and its principal subsidiaries. Many of the executive officers also have served or currently serve as officers or directors of other subsidiaries of the Company.

Table of Contents

Item 1A ***Risk Factors***

As a holding company, National Fuel depends on its operating subsidiaries to meet its financial obligations.

National Fuel is a holding company with no significant assets other than the stock of its operating subsidiaries. In order to meet its financial needs, National Fuel relies exclusively on repayments of principal and interest on intercompany loans made by National Fuel to its operating subsidiaries and income from dividends and other cash flow from the subsidiaries. Such operating subsidiaries may not generate sufficient net income to pay upstream dividends or generate sufficient cash flow to make payments of principal or interest on such intercompany loans.

National Fuel is dependent on bank credit facilities and continued access to capital markets to successfully execute its operating strategies.

In addition to its longer term debt that is issued to the public under its indentures, National Fuel relies upon shorter term bank borrowings and commercial paper to finance a portion of its operations. National Fuel is dependent on these capital sources to provide capital to its subsidiaries to allow them to acquire, maintain and develop their properties. The availability and cost of these credit sources is cyclical and these capital sources may not remain available to National Fuel or National Fuel may not be able to obtain money at a reasonable cost in the future. National Fuel's ability to borrow under its credit facilities and commercial paper agreements depends on National Fuel's compliance with its obligations under the facilities and agreements. In addition, all of National Fuel's short-term bank loans are in the form of floating rate debt or debt that may have rates fixed for very short periods of time. At present, National Fuel has no active interest rate hedges in place to protect against interest rate fluctuations on short-term bank debt. In addition, the interest rates on National Fuel's short-term bank loans and the ability of National Fuel to issue commercial paper are affected by its debt credit ratings published by Standard & Poor's Ratings Service, Moody's Investors Service and Fitch Ratings Service. A ratings downgrade could increase the interest cost of this debt and decrease future availability of money from banks, commercial paper purchasers and other sources. National Fuel believes it is important to maintain investment grade credit ratings to conduct its business.

National Fuel's credit ratings may not reflect all the risks of an investment in its securities.

National Fuel's credit ratings are an independent assessment of its ability to pay its obligations. Consequently, real or anticipated changes in the Company's credit ratings will generally affect the market value of the specific debt instruments that are rated, as well as the market value of the Company's common stock. National Fuel's credit ratings, however, may not reflect the potential impact on the value of its common stock of risks related to structural, market or other factors discussed in this Form 10-K.

National Fuel's need to comply with comprehensive, complex, and sometimes unpredictable government regulations may increase its costs and limit its revenue growth, which may result in reduced earnings.

While National Fuel generally refers to its Utility segment and its Pipeline and Storage segment as its "regulated segments," there are many governmental regulations that have an impact on almost every aspect of National Fuel's businesses. Existing statutes and regulations may be revised or reinterpreted and new laws and regulations may be adopted or become applicable to the Company, which may affect its business in ways that the Company cannot predict.

In its Utility segment, the operations of Distribution Corporation are subject to the jurisdiction of the NYPSC and the PaPUC. The NYPSC and the PaPUC, among other things, approve the rates that Distribution Corporation may charge to its utility customers. Those approved rates also impact the returns that Distribution Corporation may earn on the assets that are dedicated to those operations. If Distribution Corporation is required in a rate proceeding to reduce the rates it charges its utility customers, or if Distribution Corporation is unable to obtain approval for rate increases from these regulators, particularly when necessary to cover increased costs (including costs that may be incurred in connection with governmental investigations or

Table of Contents

proceedings or mandated infrastructure inspection, maintenance or replacement programs), earnings may decrease.

In addition to their historical methods of utility regulation, both the PaPUC and NYPSC have sought to establish competitive markets in which customers may purchase supplies of gas from marketers, rather than from utility companies. In June 1999, the Governor of Pennsylvania signed into law the Natural Gas Choice and Competition Act. The Act revised the Public Utility Code relating to the restructuring of the natural gas industry, to permit consumer choice of natural gas suppliers. The early programs instituted to comply with the Act have not resulted in significant change, and many residential customers currently continue to purchase natural gas from the utility companies. In October 2005, the PaPUC concluded that "effective competition" does not exist in the retail natural gas supply market statewide. The PaPUC has reconvened a stakeholder group to explore ways to increase the participation of retail customers in choice programs. In New York, in August 2004, the NYPSC issued its Statement of Policy on Further Steps Toward Competition in Retail Energy Markets. This policy statement has a similar goal of encouraging customer choice of alternative natural gas providers. In 2005, the NYPSC stepped up its efforts to encourage customer choice at the retail residential level, and customer choice activities increased in Distribution Corporation's New York service territory. In April 2007, the NYPSC, noting that the retail energy marketplace in New York is established and continuing to expand, commenced a review to determine if existing programs initially designed to promote competition had outlived their usefulness and whether the cost of programs currently funded by utility rate payers should be shifted to market competitors. Increased retail choice activities, to the extent they occur, may increase Distribution Corporation's cost of doing business, put an additional portion of its business at regulatory risk, and create uncertainty for the future, all of which may make it more difficult to manage Distribution Corporation's business profitably.

In its Pipeline and Storage segment, National Fuel is subject to the jurisdiction of the FERC with respect to Supply Corporation, and to the jurisdiction of the NYPSC with respect to Empire. (The FERC has authorized Empire to construct and operate additional facilities (the Empire Connector project). When Empire completes construction and commences operations of the Empire Connector, Empire will at that time become a FERC-regulated pipeline company.) The FERC and the NYPSC, among other things, approve the rates that Supply Corporation and Empire, respectively, may charge to their natural gas transportation and/or storage customers. Those approved rates also impact the returns that Supply Corporation and Empire may earn on the assets that are dedicated to those operations. State commissions can also petition the FERC to investigate whether Supply Corporation's rates are still just and reasonable, and if not, to reduce those rates prospectively. If Supply Corporation or Empire is required in a rate proceeding to reduce the rates it charges its natural gas transportation and/or storage customers, or if Supply Corporation or Empire is unable to obtain approval for rate increases, particularly when necessary to cover increased costs, Supply Corporation's or Empire's earnings may decrease.

National Fuel's liquidity, and in certain circumstances, its earnings, could be adversely affected by the cost of purchasing natural gas during periods in which natural gas prices are rising significantly.

Tariff rate schedules in each of the Utility segment's service territories contain purchased gas adjustment clauses which permit Distribution Corporation to file with state regulators for rate adjustments to recover increases in the cost of purchased gas. Assuming those rate adjustments are granted, increases in the cost of purchased gas have no direct impact on profit margins. Nevertheless, increases in the cost of purchased gas affect cash flows and can therefore impact the amount or availability of National Fuel's capital resources. National Fuel has issued commercial paper and used short-term borrowings in the past to temporarily finance storage inventories and purchased gas costs, and although National Fuel expects to do so in the future, it may not be able to access the markets for such borrowings at attractive interest rates or at all. Distribution Corporation is required to file an accounting reconciliation with the regulators in each of the Utility segment's service territories regarding the costs of purchased gas. Due to the nature of the regulatory process, there is a risk of a disallowance of full recovery of these costs during any period in which there has been a substantial upward spike in these costs. Any material disallowance of purchased gas costs could have a material adverse effect on cash flow and earnings. In addition, even when Distribution Corporation is allowed full recovery of these purchased gas costs, during periods when natural gas prices are significantly higher than historical levels, customers may

Table of Contents

have trouble paying the resulting higher bills, and Distribution Corporation's bad debt expenses may increase and ultimately reduce earnings.

Uncertain economic conditions may affect National Fuel's ability to finance capital expenditures and to refinance maturing debt.

National Fuel's ability to finance capital expenditures and to refinance maturing debt will depend upon general economic conditions in the capital markets. The direction in which interest rates may move is uncertain. Declining interest rates have generally been believed to be favorable to utilities, while rising interest rates are generally believed to be unfavorable, because of the levels of debt that utilities may have outstanding. In addition, National Fuel's authorized rate of return in its regulated businesses is based upon certain assumptions regarding interest rates. If interest rates are lower than assumed rates, National Fuel's authorized rate of return could be reduced. If interest rates are higher than assumed rates, National Fuel's ability to earn its authorized rate of return may be adversely impacted.

Decreased oil and natural gas prices could adversely affect revenues, cash flows and profitability.

National Fuel's exploration and production operations are materially dependent on prices received for its oil and natural gas production. Both short-term and long-term price trends affect the economics of exploring for, developing, producing, gathering and processing oil and natural gas. Oil and natural gas prices can be volatile and can be affected by: weather conditions, including natural disasters; the supply and price of foreign oil and natural gas; the level of consumer product demand; national and worldwide economic conditions, including economic disruptions caused by terrorist activities, acts of war or major accidents; political conditions in foreign countries; the price and availability of alternative fuels; the proximity to, and availability of capacity on transportation facilities; regional levels of supply and demand; energy conservation measures; and government regulations, such as regulation of natural gas transportation, royalties, and price controls. National Fuel sells most of its oil and natural gas at current market prices rather than through fixed-price contracts, although as discussed below, National Fuel frequently hedges the price of a significant portion of its future production in the financial markets. The prices National Fuel receives depend upon factors beyond National Fuel's control, including the factors affecting price mentioned above. National Fuel believes that any prolonged reduction in oil and natural gas prices would restrict its ability to continue the level of exploration and production activity National Fuel otherwise would pursue, which could have a material adverse effect on its revenues, cash flows and results of operations.

National Fuel has significant transactions involving price hedging of its oil and natural gas production as well as its fixed price purchase and sale commitments.

In order to protect itself to some extent against unusual price volatility and to lock in fixed pricing on oil and natural gas production for certain periods of time, National Fuel periodically enters into commodity price derivatives contracts (hedging arrangements) with respect to a portion of its expected production. These contracts may at any time cover as much as approximately 80% of National Fuel's expected energy production during the upcoming 12-month period. These contracts reduce exposure to subsequent price drops but can also limit National Fuel's ability to benefit from increases in commodity prices. In addition, the Energy Marketing segment enters into certain hedging arrangements, primarily with respect to its fixed price purchase and sales commitments and its volumes of gas stored underground. National Fuel's Pipeline and Storage segment enters into hedging arrangements with respect to certain sales of efficiency gas, and the All Other category has hedging arrangements in place with respect to certain volumes of landfill gas committed for sale.

Under the applicable accounting rules, the Company's hedging arrangements are subject to quarterly effectiveness tests. Inherent within those effectiveness tests are assumptions concerning the long-term price differential between different types of crude oil, assumptions concerning the difference between published natural gas price indexes established by pipelines in which hedged natural gas production is delivered and the reference price established in the hedging arrangements, assumptions regarding the levels of production that will be achieved and, with regard to fixed price commitments, assumptions regarding the creditworthiness of certain customers and their forecasted consumption of natural gas. Depending on market conditions for natural

Table of Contents

gas and crude oil and the levels of production actually achieved, it is possible that certain of those assumptions may change in the future, and, depending on the magnitude of any such changes, it is possible that a portion of the Company's hedges may no longer be considered highly effective. In that case, gains or losses from the ineffective derivative financial instruments would be marked-to-market on the income statement without regard to an underlying physical transaction. Gains would occur to the extent that hedge prices exceed market prices, and losses would occur to the extent that market prices exceed hedge prices.

Use of energy commodity price hedges also exposes National Fuel to the risk of non-performance by a contract counterparty. These parties might not be able to perform their obligations under the hedge arrangements.

It is National Fuel's policy that the use of commodity derivatives contracts comply with various restrictions in effect in respective business segments. For example, in the Exploration and Production segment, commodity derivatives contracts must be confined to the price hedging of existing and forecast production, and in the Energy Marketing segment, commodity derivatives with respect to fixed price purchase and sales commitments must be matched against commitments reasonably certain to be fulfilled. Similar restrictions apply in the Pipeline and Storage segment and the All Other category. National Fuel maintains a system of internal controls to monitor compliance with its policy. However, unauthorized speculative trades, if they were to occur, could expose National Fuel to substantial losses to cover positions in its derivatives contracts. In addition, in the event the Company's actual production of oil and natural gas falls short of hedged forecast production, the Company may incur substantial losses to cover its hedges.

You should not place undue reliance on reserve information because such information represents estimates.

This Form 10-K contains estimates of National Fuel's proved oil and natural gas reserves and the future net cash flows from those reserves that were prepared by National Fuel's petroleum engineers and audited by independent petroleum engineers. Petroleum engineers consider many factors and make assumptions in estimating National Fuel's oil and natural gas reserves and future net cash flows. These factors include: historical production from the area compared with production from other producing areas; the assumed effect of governmental regulation; and assumptions concerning oil and natural gas prices, production and development costs, severance and excise taxes, and capital expenditures. Lower oil and natural gas prices generally cause estimates of proved reserves to be lower. Estimates of reserves and expected future cash flows prepared by different engineers, or by the same engineers at different times, may differ substantially. Ultimately, actual production, revenues and expenditures relating to National Fuel's reserves will vary from any estimates, and these variations may be material. Accordingly, the accuracy of National Fuel's reserve estimates is a function of the quality of available data and of engineering and geological interpretation and judgment.

If conditions remain constant, then National Fuel is reasonably certain that its reserve estimates represent economically recoverable oil and natural gas reserves and future net cash flows. If conditions change in the future, then subsequent reserve estimates may be revised accordingly. You should not assume that the present value of future net cash flows from National Fuel's proved reserves is the current market value of National Fuel's estimated oil and natural gas reserves. In accordance with SEC requirements, National Fuel bases the estimated discounted future net cash flows from its proved reserves on prices and costs as of the date of the estimate. Actual future prices and costs may differ materially from those used in the net present value estimate. Any significant price changes will have a material effect on the present value of National Fuel's reserves.

Petroleum engineering is a subjective process of estimating underground accumulations of natural gas and other hydrocarbons that cannot be measured in an exact manner. The process of estimating oil and natural gas reserves is complex. The process involves significant decisions and assumptions in the evaluation of available geological, geophysical, engineering and economic data for each reservoir. Future economic and operating conditions are uncertain, and changes in those conditions could cause a revision to National Fuel's future reserve estimates. Estimates of economically recoverable oil and natural gas reserves and of future net cash flows depend upon a number of variable factors and assumptions, including historical production from the area compared with production from other comparable producing areas, and the assumed effects of regulations by

Table of Contents

governmental agencies. Because all reserve estimates are to some degree subjective, each of the following items may differ materially from those assumed in estimating reserves: the quantities of oil and natural gas that are ultimately recovered, the timing of the recovery of oil and natural gas reserves, the production and operating costs incurred, the amount and timing of future development and abandonment expenditures, and the price received for the production.

The amount and timing of actual future oil and natural gas production and the cost of drilling are difficult to predict and may vary significantly from reserves and production estimates, which may reduce National Fuel's earnings.

There are many risks in developing oil and natural gas, including numerous uncertainties inherent in estimating quantities of proved oil and natural gas reserves and in projecting future rates of production and timing of development expenditures. The future success of National Fuel's Exploration and Production segment depends on its ability to develop additional oil and natural gas reserves that are economically recoverable, and its failure to do so may reduce National Fuel's earnings. The total and timing of actual future production may vary significantly from reserves and production estimates. National Fuel's drilling of development wells can involve significant risks, including those related to timing, success rates, and cost overruns, and these risks can be affected by lease and rig availability, geology, and other factors. Drilling for oil and natural gas can be unprofitable, not only from dry wells, but from productive wells that do not produce sufficient revenues to return a profit. Also, title problems, weather conditions, governmental requirements, and shortages or delays in the delivery of equipment and services can delay drilling operations or result in their cancellation. The cost of drilling, completing, and operating wells is often uncertain, and new wells may not be productive or National Fuel may not recover all or any portion of its investment. Without continued successful exploitation or acquisition activities, National Fuel's reserves and revenues will decline as a result of its current reserves being depleted by production. National Fuel cannot assure you that it will be able to find or acquire additional reserves at acceptable costs.

Financial accounting requirements regarding exploration and production activities may affect National Fuel's profitability.

National Fuel accounts for its exploration and production activities under the full cost method of accounting. Each quarter, on a country-by-country basis, National Fuel must compare the level of its unamortized investment in oil and natural gas properties to the present value of the future net revenue projected to be recovered from those properties according to methods prescribed by the SEC. In determining present value, the Company uses quarter-end spot prices for oil and natural gas (as adjusted for hedging). If, at the end of any quarter, the amount of the unamortized investment exceeds the net present value of the projected future cash flows, such investment may be considered to be "impaired," and the full cost accounting rules require that the investment must be written down to the calculated net present value. Such an instance would require National Fuel to recognize an immediate expense in that quarter, and its earnings would be reduced. National Fuel's Exploration and Production segment last recorded an impairment charge under the full cost method of accounting in 2006. Because of the variability in National Fuel's investment in oil and natural gas properties and the volatile nature of commodity prices, National Fuel cannot predict when in the future it may again be affected by such an impairment calculation.

Environmental regulation significantly affects National Fuel's business.

National Fuel's business operations are subject to federal, state, and local laws and regulations relating to environmental protection. These laws and regulations concern the generation, storage, transportation, disposal or discharge of contaminants into the environment and the general protection of public health, natural resources, wildlife and the environment. Costs of compliance and liabilities could negatively affect National Fuel's results of operations, financial condition and cash flows. In addition, compliance with environmental laws and regulations could require unexpected capital expenditures at National Fuel's facilities. Because the costs of complying with environmental regulations are significant, additional regulation could negatively affect National Fuel's business. Although National Fuel cannot predict the impact of the interpretation or enforcement

Table of Contents

of EPA standards or other federal, state and local regulations, National Fuel's costs could increase if environmental laws and regulations become more strict.

The nature of National Fuel's operations presents inherent risks of loss that could adversely affect its results of operations, financial condition and cash flows.

National Fuel's operations in its various segments are subject to inherent hazards and risks such as: fires; natural disasters; explosions; geological formations with abnormal pressures; blowouts during well drilling; collapses of wellbore casing or other tubulars; pipeline ruptures; spills; and other hazards and risks that may cause personal injury, death, property damage, environmental damage or business interruption losses. Additionally, National Fuel's facilities, machinery, and equipment may be subject to sabotage. Any of these events could cause a loss of hydrocarbons, environmental pollution, claims for personal injury, death, property damage or business interruption, or governmental investigations, recommendations, claims, fines or penalties. As protection against operational hazards, National Fuel maintains insurance coverage against some, but not all, potential losses. In addition, many of the agreements that National Fuel executes with contractors provide for the division of responsibilities between the contractor and National Fuel, and National Fuel seeks to obtain an indemnification from the contractor for certain of these risks. National Fuel is not always able, however, to secure written agreements with its contractors that contain indemnification, and sometimes National Fuel is required to indemnify others.

Insurance or indemnification agreements when obtained may not adequately protect National Fuel against liability from all of the consequences of the hazards described above. The occurrence of an event not fully insured or indemnified against, the imposition of fines, penalties or mandated programs by governmental authorities, the failure of a contractor to meet its indemnification obligations, or the failure of an insurance company to pay valid claims could result in substantial losses to National Fuel. In addition, insurance may not be available, or if available may not be adequate, to cover any or all of these risks. It is also possible that insurance premiums or other costs may rise significantly in the future, so as to make such insurance prohibitively expensive.

Due to the significant cost of insurance coverage for named windstorms in the Gulf of Mexico, National Fuel determined that it was not economical to purchase insurance to fully cover its exposures related to such storms. It is possible that named windstorms in the Gulf of Mexico could have a material adverse effect on National Fuel's results of operations, financial condition and cash flows.

Hazards and risks faced by National Fuel, and insurance and indemnification obtained or provided by National Fuel, may subject National Fuel to litigation or administrative proceedings from time to time. Such litigation or proceedings could result in substantial monetary judgments, fines or penalties against National Fuel or be resolved on unfavorable terms, the result of which could have a material adverse effect on National Fuel's results of operations, financial condition and cash flows.

National Fuel may be adversely affected by economic conditions.

Periods of slowed economic activity generally result in decreased energy consumption, particularly by industrial and large commercial companies. As a consequence, national or regional recessions or other downturns in economic activity could adversely affect National Fuel's revenues and cash flows or restrict its future growth. Economic conditions in National Fuel's utility service territories also impact its collections of accounts receivable.

Item 2 *Properties*

General Information on Facilities

The net investment of the Company in property, plant and equipment was $2.9 billion at September 30, 2007. Approximately 62% of this investment was in the Utility and Pipeline and Storage segments, which are primarily located in western and central New York and northwestern Pennsylvania. The Exploration and Production segment, which has the next largest investment in net property, plant and equipment (34%), is primarily located in California, in the Appalachian region of the United States, in Wyoming, and in the Gulf Coast region of Texas, Louisiana, and Alabama. The remaining net investment in property, plant and equipment consisted of the Timber segment (3%) which is located primarily in northwestern Pennsylvania, and All Other and Corporate operations (1%). During the past five years, the Company has made additions to property, plant and equipment in order to expand and improve transmission and distribution facilities for both retail and transportation customers. Net property, plant and equipment has increased $33.7 million, or 1.2%, since 2002. During 2007, the Company sold SECI, Seneca's wholly owned subsidiary that operated in Canada. The net property, plant and equipment of SECI at the date of sale was $107.7 million. In addition, during 2005, the Company sold its majority interest in U.E., a district heating and electric generation business in the Czech Republic. The net property, plant and equipment of U.E. at the date of sale was $223.9 million.

The Utility segment had a net investment in property, plant and equipment of $1.1 billion at September 30, 2007. The net investment in its gas distribution network (including 14,813 miles of distribution pipeline) and its service connections to customers represent approximately 53% and 33%, respectively, of the Utility segment's net investment in property, plant and equipment at September 30, 2007.

The Pipeline and Storage segment had a net investment of $681.9 million in property, plant and equipment at September 30, 2007. Transmission pipeline represents 33% of this segment's total net investment and includes 2,495 miles of pipeline required to move large volumes of gas throughout its service area. Storage facilities represent 24% of this segment's total net investment and consist of 32 storage fields, four of which are jointly owned and operated with certain pipeline suppliers, and 441 miles of pipeline. Net investment in storage facilities includes $89.8 million of gas stored underground-noncurrent, representing the cost of the gas required to maintain pressure levels for normal operating purposes as well as gas maintained for system balancing and other purposes, including that needed for no-notice transportation service. The Pipeline and Storage segment has 28 compressor stations with 75,404 installed compressor horsepower that represent 14% of this segment's total net investment in property, plant and equipment.

The Exploration and Production segment had a net investment in property, plant and equipment of $982.7 million at September 30, 2007.

The Timber segment had a net investment in property, plant and equipment of $89.9 million at September 30, 2007. Located primarily in northwestern Pennsylvania, the net investment includes two sawmills, 103,700 acres of land and timber, and 3,105 acres of timber rights.

The Utility and Pipeline and Storage segments' facilities provided the capacity to meet the Company's 2007 peak day sendout, including transportation service, of 1,743 MMcf, which occurred on February 5, 2007. Withdrawals from storage of 779.3 MMcf provided approximately 44.7% of the requirements on that day.

Company maps are included in exhibit 99.2 of this Form 10-K and are incorporated herein by reference.

Exploration and Production Activities

The Company is engaged in the exploration for, and the development and purchase of, natural gas and oil reserves in California, in the Appalachian region of the United States, in Wyoming, and in the Gulf Coast region of Texas, Louisiana, and Alabama. Also, Exploration and Production operations were conducted in the provinces of Alberta, Saskatchewan and British Columbia in Canada, until the sale of these properties on August 31, 2007. Further discussion of the sale of the Canadian oil and gas properties is included in Item 8, Note-I-Discontinued Operations. Further discussion of oil and gas producing activities is included in Item 8, Note O-Supplementary Information for Oil and Gas Producing Activities. Note O sets forth proved developed

Table of Contents

and undeveloped reserve information for Seneca. Seneca's proved developed and undeveloped natural gas reserves decreased from 233 Bcf at September 30, 2006 to 205 Bcf at September 30, 2007. This decrease is attributed primarily to the sale of the Canadian gas properties (40.1 Bcf) and production of 26.3 Bcf. These decreases were partially offset by extensions and discoveries of 34.6 Bcf, primarily in the Appalachian region (29.7 Bcf). Seneca's proved developed and undeveloped oil reserves decreased from 58,018 Mbbl at September 30, 2006 to 47,586 Mbbl at September 30, 2007. This decrease is attributed to revisions of previous estimates (5,963 Mbbl), primarily occurring in California, production (3,450 Mbbl) and the sale of the Canadian oil properties (1,458 Mbbl). Seneca's proved developed and undeveloped natural gas reserves decreased from 238 Bcf at September 30, 2005 to 233 Bcf at September 30, 2006. This decrease is attributed primarily to production and downward reserve revisions related primarily to the Canadian properties. These decreases were partially offset by extensions and discoveries. The downward reserve revisions were largely a function of a significant decrease in gas prices during the fourth quarter of 2006. Seneca's proved developed and undeveloped oil reserves decreased from 60,257 Mbbl at September 30, 2005 to 58,018 Mbbl at September 30, 2006. This decrease is attributed mostly to production.

Seneca's oil and gas reserves reported in Item 8 at Note O as of September 30, 2007 were estimated by Seneca's geologists and engineers and were audited by independent petroleum engineers from Netherland, Sewell & Associates, Inc. Seneca reports its oil and gas reserve information on an annual basis to the Energy Information Administration (EIA), a statistical agency of the U.S. Department of Energy. The oil and gas reserve information reported to the EIA showed 211 Bcf and 59,246 Mbbl of gas and oil reserves, respectively, which differs from the reserve information summarized in Item 8 at Note O. The reasons for this difference are as follows: (a) reserves are reported to the EIA on a calendar year basis, while reserves disclosed in Item 8 at Note O are shown on a fiscal year basis; (b) reserves reported to the EIA include only properties operated by Seneca, while reserves disclosed in Item 8 at Note O included both Seneca operated properties and non-operated properties in which Seneca has an interest; and (c) reserves are reported to the EIA on a gross basis verses the reserves disclosed in Item 8 at Note O, which are reported on a net revenue interest basis.

The following is a summary of certain oil and gas information taken from Seneca's records. All monetary amounts are expressed in U.S. dollars.

Production

	For The Year Ended September 30		
	2007	2006	2005
United States			
Gulf Coast Region			
Average Sales Price per Mcf of Gas	$ 6.58	$ 8.01	$ 7.05
Average Sales Price per Barrel of Oil	$ 63.04	$ 64.10	$ 49.78
Average Sales Price per Mcf of Gas (after hedging)	$ 6.87	$ 5.89	$ 6.01
Average Sales Price per Barrel of Oil (after hedging)	$ 64.09	$ 47.46	$ 35.03

Item 3 ***Legal Proceedings***

In an action instituted in the New York State Supreme Court, Kings County on February 18, 2003 against Distribution Corporation and Paul J. Hissin, an unaffiliated third party, plaintiff Donna Fordham-Coleman, as administratrix of the estate of Velma Arlene Fordham, alleges that Distribution Corporation's failure to initiate natural gas service, despite an attempt to do so, at an apartment leased to the plaintiff's decedent, Velma Arlene Fordham, caused the decedent's death in February 2001. The plaintiff sought damages for wrongful death and pain and suffering, plus punitive damages. Distribution Corporation denied plaintiff's material allegations, asserted seven affirmative defenses and asserted a cross-claim against the co-defendant. Distribution Corporation believes, and has vigorously asserted, that plaintiff's allegations lack merit. The court changed venue of the action to New York State Supreme Court, Erie County. Trial was scheduled to begin October 15, 2007. However, the parties resolved the action.

On June 8, 2006, the NTSB issued safety recommendations to Distribution Corporation, the PaPUC and certain others as a result of its investigation of a natural gas explosion that occurred on Distribution Corporation's system in Dubois, Pennsylvania in August 2004. For a discussion of this matter, refer to Part II, Item 7 — MD&A of this report under the heading "Other Matters — Rate and Regulatory Matters."

On November 8, 2007, Distribution Corporation filed a complaint with the PaPUC requesting that the PaPUC commence an investigation to determine whether New Mountain Vantage GP, L.L.C. (New Mountain), and others acting in concert with it, have violated Pennsylvania law by acquiring control of Distribution Corporation without the prior approval of the PaPUC. In the event the PaPUC finds that New Mountain and others acting in concert with it have not yet acquired control of Distribution Corporation, Distribution Corporation petitioned the PaPUC for an order requiring New Mountain to show cause why it should not be required to apply for and receive a certificate of public convenience prior to acquiring control of Distribution Corporation, and requiring that the certificate of public convenience be obtained prior to any vote of stockholders of the Company which could result in the acquisition of control over Distribution Corporation. According to a November 6, 2007 filing with the SEC, New Mountain and certain other holders acknowledging acting with New Mountain as part of a group for purposes of the federal securities laws collectively own 9.7% of the outstanding shares of the Company. Distribution Corporation alleges in its filing with the PaPUC that New Mountain and others acting in concert with it have acquired or are seeking to acquire control of the Company, which results or would result in the acquisition of indirect control over Distribution Corporation. On November 21, 2007, New Mountain filed preliminary objections to Distribution Corporation's complaint and petition and requested that the PaPUC rule on the preliminary objections at its December 20, 2007 public meeting. In addition, two agencies of the Commonwealth of Pennsylvania, the Office of Consumer Advocate and the Office of Small Business Advocate, petitioned the PaPUC to intervene in the proceeding, and the Office of Small Business Advocate requested evidentiary hearings. Distribution Corporation anticipates that its response to New Mountain's preliminary objections will request that the PaPUC, at its December 20, 2007 public meeting, initiate an investigation by issuing an order for New Mountain to show cause why it should not be required to apply for and receive a certificate of public convenience prior to acquiring control of Distribution Corporation.

The resolution of the Fordham-Coleman action described above will not have a material effect on the consolidated financial condition, results of operations, or cash flow of the Company. The Company believes, based on the information presently known, that the ultimate resolution of the matters before the PaPUC

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1360 of 2431

Table of Contents

described above will not be material to the consolidated financial condition, results of operations, or cash flow of the Company. No assurances can be given, however, as to the ultimate outcomes of those matters, and it is possible that the outcomes could be material to the consolidated financial condition, results of operations or cash flow of the Company.

For a discussion of various environmental and other matters, refer to Part II, Item 7, MD&A and Item 8 at Note H — Commitments and Contingencies.

In addition to the matters disclosed above, the Company is involved in other litigation and regulatory matters arising in the normal course of business. These other matters may include, for example, negligence claims and tax, regulatory or other governmental audits, inspections, investigations or other proceedings. These matters may involve state and federal taxes, safety, compliance with regulations, rate base, cost of service, and purchased gas cost issues, among other things. While these normal-course matters could have a material effect on earnings and cash flows in the quarterly and annual period in which they are resolved, they are not expected to change materially the Company's present liquidity position, nor to have a material adverse effect on the financial condition of the Company.

Item 4 *Submission of Matters to a Vote of Security Holders*

No matter was submitted to a vote of security holders during the quarter ended September 30, 2007.

PART II

Item 5 *Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

Information regarding the market for the Company's common equity and related stockholder matters appears under Item 12 at Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters, Item 8 at Note E-Capitalization and Short-Term Borrowings and Note N-Market for Common Stock and Related Shareholder Matters (unaudited).

On July 2, 2007, the Company issued a total of 2,400 unregistered shares of Company common stock to the eight non-employee directors of the Company serving on the Board of Directors, 300 shares to each such director. All of these unregistered shares were issued as partial consideration for such directors' services during the quarter ended September 30, 2007, pursuant to the Company's Retainer Policy for Non-Employee Directors. These transactions were exempt from registration under Section 4(2) of the Securities Act of 1933, as transactions not involving a public offering.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased(a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Share Repurchase Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under Share Repurchase Plans or Programs(b)
July 1-31, 2007	7,317	$ 44.75	—	4,278,122
Aug. 1-31, 2007	124,254	$ 41.93	113,000	4,165,122
Sept. 1-30, 2007	22,622	$ 44.97	—	4,165,122

(a) Represents (i) shares of common stock of the Company purchased on the open market with Company "matching contributions" for the accounts of participants in the Company's 401(k) plans, (ii) shares of common stock of the Company tendered to the Company by holders of stock options or shares of restricted stock for the payment of option exercise prices or applicable withholding taxes, and (iii) shares of common

Page 1360

Table of Contents

stock of the Company purchased on the open market pursuant to the Company's publicly announced share repurchase program. Shares purchased other than through a publicly announced share repurchase program totaled 7,317 in July 2007, 11,254 in August 2007 and 22,622 in September 2007 (a three-month total of 41,193). Of those shares, 23,498 were purchased for the Company's 401(k) plans and 17,695 were purchased as a result of shares tendered to the Company by holders of stock options or shares of restricted stock.

(b) On December 8, 2005, the Company's Board of Directors authorized the repurchase of up to eight million shares of the Company's common stock. Repurchases may be made from time to time in the open market or through private transactions.

Item 7 ***Management's Discussion and Analysis of Financial Condition and Results of Operations***

OVERVIEW

The Company is a diversified energy company consisting of five reportable business segments. Refer to Item 1, Business, for a more detailed description of each of the segments. This Item 7, MD&A, provides information concerning:

1. The critical accounting estimates of the Company;
2. Changes in revenues and earnings of the Company under the heading, "Results of Operations;"
3. Operating, investing and financing cash flows under the heading "Capital Resources and Liquidity;"
4. Off-Balance Sheet Arrangements;
5. Contractual Obligations; and
6. Other Matters, including: (a) 2007 and 2008 funding to the Company's defined benefit retirement plan and post-retirement benefit plan, (b) realizability of deferred tax assets, (c) disclosures and tables concerning market risk sensitive instruments, (d) rate and regulatory matters in the Company's New York, Pennsylvania and FERC regulated jurisdictions, (e) environmental matters, and (f) new accounting pronouncements.

The information in MD&A should be read in conjunction with the Company's financial statements in Item 8 of this report.

The event that had the most significant earnings impact in 2007, and the main reason for the significant earnings increase over 2006, was the Company's sale of SECI, Seneca's wholly owned subsidiary that operated in Canada. SECI was engaged in the exploration for, and the development and purchase of, natural gas and oil reserves in the provinces of Alberta, Saskatchewan and British Columbia in Canada. This sale resulted in a $120.3 million gain, net of tax. The decision to sell SECI was based on lower than expected returns from the Canadian oil and gas properties combined with difficulty in finding significant new reserves. As a result of the decision to sell SECI, the Company began presenting all SECI operations as discontinued operations in September 2007. Also contributing to the increase in earnings over 2006 was the non-recurrence of impairment charges of $68.6 million related to the Exploration and Production segment's Canadian oil and gas assets recognized during 2006 under the full cost method of accounting, which is discussed below under Critical Accounting Estimates. Seneca intends to continue its exploration and development activities in the Gulf of Mexico, in California and in Appalachia, subject to regular re-evaluation of its efforts and opportunities in each region.

The Company spent $247.6 million on capital expenditures related to continuing operations during 2007, with approximately 59% being spent in the Exploration and Production segment. This was in line with the Company's expectations. As mentioned above, Seneca will continue its exploration and development activities in Appalachia, in California and in the Gulf of Mexico. In Appalachia, drilling will be accelerated. Seneca intends to commence drilling of 280 wells for shallow tight sand targets in fiscal 2008, a 20% increase over the 233 such wells drilled in 2007. In addition, Seneca anticipates continued drilling in the deeper Marcellus Shale formation in Appalachia with its joint venture partner, EOG Resources, Inc. Seneca expects that as many as eighteen Marcellus Shale wells will be drilled on its acreage in 2008, ten of which are expected to be horizontal wells. In the Gulf of Mexico, Seneca's strategy will be to follow a focused drilling plan in the specific areas where the Company has expertise and past success.

The Company took a significant step forward this year regarding the Empire Connector project. In June 2007, Empire signed a firm transportation service agreement with KeySpan Gas East Corporation, thereby obligating Empire to provide transportation service that will require construction of the Empire Connector project. Construction of the Empire Connector began in September 2007 and 20 miles will be completed by December 2007. The Company expects to complete the project by November 1, 2008. The total cost to the Company of the Empire Connector project is estimated at $177 million, after giving effect to sales tax

Table of Contents

exemptions. The Company expects the expansion of the Pipeline and Storage segment to remain a major strategic priority. Supply Corporation has verified that there is substantial market interest in transporting gas produced in the Rocky Mountain area to the Northeast. In order to serve this anticipated demand, Supply Corporation has proposed a new 324-mile pipeline that would commence at Clarington, Ohio, the proposed terminus of the Rockies Express pipeline, and extend to the Millennium Pipeline under construction at Corning, New York. From Corning, Rocky Mountain gas will be able to get to the New York City area and to New England. The proposed pipeline would be designed to move approximately 550 to 750 MDth of gas per day, as well as accommodate volumes from local production areas. These projects are discussed further in the Capital Resources and Liquidity and Rates and Regulatory Matters sections that follow.

The Company is currently evaluating the appropriateness of establishing a Master Limited Partnership (MLP) for its pipeline and storage assets, and another MLP for certain of its exploration and production assets. If this evaluation determined that the MLP structure is sound and in the shareholders' interest, the Company would pursue the MLP structure for the appropriate Company assets. Potential impediments to establishing MLPs include: (a) the low tax basis of our pipeline and storage assets, which substantially mitigates the tax advantages of an MLP structure; (b) the highly integrated operations of the Company's Pipeline and Storage and Utility business segments; and (c) the sustainability of an exploration and production MLP given the natural decline curve of production from all oil and gas properties. As a result, new long-lived reserves must be constantly added to an exploration and production MLP in order to sustain the MLP's cash distributions. Acquisitions of long-lived reserves could be very costly given the significant premiums that are currently being paid for long-lived reserves.

The Company also began repurchasing outstanding shares of common stock during fiscal 2006 under a share repurchase program authorized by the Company's Board of Directors. The program authorizes the Company to repurchase up to an aggregate amount of 8 million shares. Through September 30, 2007, the Company had repurchased 3,834,878 shares for $133.2 million under this program, including 1,308,328 shares for $48.1 million during the year ended September 30, 2007. These matters are discussed further in the Capital Resources and Liquidity section that follows.

On January 29, 2007, the Company commenced a rate case in the New York jurisdiction of the Utility segment by filing proposed tariff amendments and supporting testimony requesting approval to increase its annual revenues by $52.0 million annually. The Company explained in the filing that its request for rate relief is necessitated by decreased revenues resulting from customer conservation efforts and increased customer uncollectibles, among other things. The rate filing also includes a proposal for an aggressive efficiency and conservation initiative with a revenue decoupling mechanism designed to render the Company indifferent to throughput reductions resulting from conservation. In September 2007, the NYPSC issued an order approving the Company's conservation program, and the administrative law judge assigned to the proceeding issued a recommended decision, which recommends a rate increase designed to provide additional annual revenues of $2.5 million as well as a bill surcharge that would collect up to $10.8 million to recover expenses arising from the conservation program. The recommended decision also recommends approval of the unopposed revenue decoupling mechanism. The NYPSC is not bound to accept the recommended decision. This matter is discussed more fully in the Rate and Regulatory Matters section that follows.

CRITICAL ACCOUNTING ESTIMATES

The Company has prepared its consolidated financial statements in conformity with GAAP. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. In the event estimates or assumptions prove to be different from actual results, adjustments are made in subsequent periods to reflect more current information. The following is a summary of the Company's most critical accounting estimates, which are defined as those estimates whereby judgments or uncertainties could affect the application of accounting policies and materially different amounts could be reported under different conditions or using different assumptions. For a complete discussion of the

Table of Contents

Company's significant accounting policies, refer to Item 8 at Note A — Summary of Significant Accounting Policies.

Oil and Gas Exploration and Development Costs. In the Company's Exploration and Production segment, oil and gas property acquisition, exploration and development costs are capitalized under the full cost method of accounting. Under this accounting methodology, all costs associated with property acquisition, exploration and development activities are capitalized, including internal costs directly identified with acquisition, exploration and development activities. The internal costs that are capitalized do not include any costs related to production, general corporate overhead, or similar activities. The Company does not recognize any gain or loss on the sale or other disposition of oil and gas properties unless the gain or loss would significantly alter the relationship between capitalized costs and proved reserves of oil and gas attributable to a cost center.

The Company believes that determining the amount of the Company's proved reserves is a critical accounting estimate. Proved reserves are estimated quantities of reserves that, based on geologic and engineering data, appear with reasonable certainty to be producible under existing economic and operating conditions. Such estimates of proved reserves are inherently imprecise and may be subject to substantial revisions as a result of numerous factors including, but not limited to, additional development activity, evolving production history and continual reassessment of the viability of production under varying economic conditions. The estimates involved in determining proved reserves are critical accounting estimates because they serve as the basis over which capitalized costs are depleted under the full cost method of accounting (on a units-of-production basis). Unproved properties are excluded from the depletion calculation until proved reserves are found or it is determined that the unproved properties are impaired. All costs related to unproved properties are reviewed quarterly to determine if impairment has occurred. The amount of any impairment is transferred to the pool of capitalized costs being amortized.

In addition to depletion under the units-of-production method, proved reserves are a major component in the SEC full cost ceiling test. The full cost ceiling test is an impairment test prescribed by SEC Regulation S-X Rule 4-10. The ceiling test , which is performed each quarter, determines a limit, or ceiling, on a country-by-country basis on the amount of property acquisition, exploration and development costs that can be capitalized. The ceiling under this test represents (a) the present value of estimated future net cash flows, excluding future cash outflows associated with settling asset retirement obligations that have been accrued on the balance sheet, using a discount factor of 10%, which is computed by applying current market prices of oil and gas (as adjusted for hedging) to estimated future production of proved oil and gas reserves as of the date of the latest balance sheet, less estimated future expenditures, plus (b) the cost of unevaluated properties not being depleted, less (c) income tax effects related to the differences between the book and tax basis of the properties. The estimates of future production and future expenditures are based on internal budgets that reflect planned production from current wells and expenditures necessary to sustain such future production. The amount of the ceiling can fluctuate significantly from period to period because of additions or subtractions to proved reserves and significant fluctuations in oil and gas prices. The ceiling is then compared to the capitalized cost of oil and gas properties less accumulated depletion and related deferred income taxes. If the capitalized costs of oil and gas properties less accumulated depletion and related deferred taxes exceeds the ceiling at the end of any fiscal quarter, a non-cash impairment must be recorded to write down the book value of the reserves to their present value. This non-cash impairment cannot be reversed at a later date if the ceiling increases. It should also be noted that a non-cash impairment to write down the book value of the reserves to their present value in any given period causes a reduction in future depletion expense. Because of the decline in the price of natural gas during the third and fourth quarters of 2006, the book value of the Company's Canadian oil and gas properties exceeded the ceiling at both June 30, 2006 and September 30, 2006. Consequently, SECI recorded impairment charges of $62.4 million ($39.5 million after-tax) in the third quarter of 2006 and $42.3 million ($29.1 million after-tax) in the fourth quarter of 2006. These impairment charges are now included in the loss from discontinued operations for 2006 due to the sale of SECI during 2007.

It is difficult to predict what factors could lead to future impairments under the SEC's full cost ceiling test. As discussed above, fluctuations or subtractions to proved reserves and significant fluctuations in oil and gas prices have an impact on the amount of the ceiling at any point in time.

Table of Contents

Upon the adoption of SFAS 143 on October 1, 2002, the Company recorded an asset retirement obligation representing plugging and abandonment costs associated with the Exploration and Production segment's crude oil and natural gas wells and capitalized such costs in property, plant and equipment (i.e. the full cost pool). Prior to the adoption of SFAS 143, plugging and abandonment costs were accounted for solely through the Company's units-of-production depletion calculation. An estimate of such costs was added to the depletion base, which also included capitalized costs in the full cost pool and estimated future expenditures to be incurred in developing proved reserves. With the adoption of SFAS 143, plugging and abandonment costs are already included in capitalized costs and the units-of-production depletion calculation has been modified to exclude from the depletion base any estimate of future plugging and abandonment costs that are already recorded in the full cost pool.

Prior to the adoption of SFAS 143, in calculating the full cost ceiling, the Company reduced the future net cash flows from proved oil and gas reserves by the estimated plugging and abandonment costs. Such future net cash flows would then be compared to capitalized costs in the full cost pool, with any excess capitalized costs being expensed. With the adoption of SFAS 143, since the full cost pool now includes an amount associated with plugging and abandoning the wells, the calculation of the full cost ceiling has been changed so that future net cash flows from proved oil and gas reserves are no longer reduced by the estimated plugging and abandonment costs.

Regulation. The Company is subject to regulation by certain state and federal authorities. The Company, in its Utility and Pipeline and Storage segments, has accounting policies which conform to SFAS 71, and which are in accordance with the accounting requirements and ratemaking practices of the regulatory authorities. The application of these accounting policies allows the Company to defer expenses and income on the balance sheet as regulatory assets and liabilities when it is probable that those expenses and income will be allowed in the ratesetting process in a period different from the period in which they would have been reflected in the income statement by an unregulated company. These deferred regulatory assets and liabilities are then flowed through the income statement in the period in which the same amounts are reflected in rates. Management's assessment of the probability of recovery or pass through of regulatory assets and liabilities requires judgment and interpretation of laws and regulatory commission orders. If, for any reason, the Company ceases to meet the criteria for application of regulatory accounting treatment for all or part of its operations, the regulatory assets and liabilities related to those portions ceasing to meet such criteria would be eliminated from the balance sheet and included in the income statement for the period in which the discontinuance of regulatory accounting treatment occurs. Such amounts would be classified as an extraordinary item. For further discussion of the Company's regulatory assets and liabilities, refer to Item 8 at Note C — Regulatory Matters.

Accounting for Derivative Financial Instruments. The Company, in its Exploration and Production segment, Energy Marketing segment, Pipeline and Storage segment and All Other category, uses a variety of derivative financial instruments to manage a portion of the market risk associated with fluctuations in the price of natural gas and crude oil. These instruments are categorized as price swap agreements, no cost collars and futures contracts. The Company, in its Pipeline and Storage segment, previously used an interest rate collar to limit interest rate fluctuations on certain variable rate debt. In accordance with the provisions of SFAS 133, the Company accounted for these instruments as effective cash flow hedges or fair value hedges. In 2007, the Company discontinued hedge accounting for the interest rate collar, which resulted in a gain being recognized. Gains or losses associated with the derivative financial instruments are matched with gains or losses resulting from the underlying physical transaction that is being hedged. To the extent that the derivative financial instruments would ever be deemed to be ineffective based on the effectiveness testing, mark-to-market gains or losses from the derivative financial instruments would be recognized in the income statement without regard to an underlying physical transaction. As discussed below, the Company was required to discontinue hedge accounting for a portion of its derivative financial instruments in the Exploration and Production segment, resulting in a charge to earnings in 2005.

The Company uses both exchange-traded and non exchange-traded derivative financial instruments. The fair values of the non exchange-traded derivative financial instruments are based on valuations determined by the counterparties. Refer to the "Market Risk Sensitive Instruments" section below for further discussion of the Company's derivative financial instruments.

Table of Contents

Pension and Other Post-Retirement Benefits. The amounts reported in the Company's financial statements related to its pension and other post-retirement benefits are determined on an actuarial basis, which uses many assumptions in the calculation of such amounts. These assumptions include the discount rate, the expected return on plan assets, the rate of compensation increase and, for other post-retirement benefits, the expected annual rate of increase in per capita cost of covered medical and prescription benefits. The discount rate used by the Company is equal to the Moody's Aa Long-Term Corporate Bond index, rounded to the nearest 25 basis points. The duration of the securities underlying that index (approximately 13 years) reasonably matches the expected timing of anticipated future benefit payments (approximately 12 years). The Company also utilizes a yield curve model to determine the discount rate. The yield curve is a spot rate yield curve that provides a zero-coupon interest rate for each year into the future. Each year's anticipated benefit payments are discounted at the associated spot interest rate back to the measurement date. The discount rate is then determined based on the spot interest rate that results in the same present value when applied to the same anticipated benefit payments. The expected return on plan assets assumption used by the Company reflects the anticipated long-term rate of return on the plan's current and future assets. The Company utilizes historical investment data, projected capital market conditions, and the plan's target asset class and investment manager allocations to set the assumption regarding the expected return on plan assets. Changes in actuarial assumptions and actuarial experience could have a material impact on the amount of pension and post-retirement benefit costs and funding requirements experienced by the Company. However, the Company expects to recover substantially all of its net periodic pension and other post-retirement benefit costs attributable to employees in its Utility and Pipeline and Storage segments in accordance with the applicable regulatory commission authorization. For financial reporting purposes, the difference between the amounts of pension cost and post-retirement benefit cost recoverable in rates and the amounts of such costs as determined under applicable accounting principles is recorded as either a regulatory asset or liability, as appropriate, as discussed above under "Regulation." Pension and post-retirement benefit costs for the Utility and Pipeline and Storage segments represented 93% and 94%, respectively, of the Company's total pension and post-retirement benefit costs as determined under SFAS 87 and SFAS 106 for the years ended September 30, 2007 and 2006.

Changes in actuarial assumptions and actuarial experience could also have an impact on the benefit obligation and the funded status related to the Company's pension and post-retirement benefit plans and could impact the Company's equity. For example, while the discount rate used to determine benefit obligations did not change from 2006 to 2007, the discount rate was changed from 5.0% in 2005 to 6.25% in 2006. The change in the discount rate from 2005 to 2006 reduced the pension plan projected benefit obligation by $113.1 million and the accumulated post-retirement benefit obligation by $77.5 million. Other examples include actual versus expected return on plan assets, which has an impact on the funded status of the plans, and actual versus expected benefit payments, which has an impact on the pension plan projected benefit obligations and the accumulated post-retirement benefit obligation for the Post-Retirement Plan. For 2007, actual versus expected return on plan assets resulted in an increase to the funded status of the Retirement Plan and the Post-Retirement Plan of $68.4 million and $38.6 million, respectively. The actual versus expected benefit payments for 2007 caused a decrease of $1.3 million and $1.8 million to the projected benefit obligation and accumulated post-retirement benefit obligation, respectively. In calculating the projected benefit obligation for the Retirement Plan and the accumulated post-retirement obligation for the Post-Retirement Plan, the actuary takes into account the average remaining service life of active participants. The average remaining service life of active participants is 9 years for both the Retirement Plan and the Post-Retirement Plan. For further discussion of the Company's pension and other post-retirement benefits, refer to Other Matters in this Item 7, which includes a discussion of funding for the current year and the adoption of SFAS 158, and to Item 8 at Note G — Retirement Plan and Other Post Retirement Benefits.

Table of Contents

RESULTS OF OPERATIONS

EARNINGS

2007 Compared with 2006

The Company's earnings were $337.5 million in 2007 compared with earnings of $138.1 million in 2006. As previously discussed, the Company has presented its Canadian operations in the Exploration and Production segment (in conjunction with the sale of SECI) as discontinued operations. The Company's earnings from continuing operations were $201.7 million in 2007 compared with $184.6 million in 2006. The Company's earnings from discontinued operations were $135.8 million in 2007 compared with a loss of $46.5 million in 2006. The increase in earnings from continuing operations of $17.1 million is primarily the result of higher earnings in the Exploration and Production, Utility, Pipeline and Storage, and Energy Marketing segments and the Corporate and All Other categories, slightly offset by lower earnings in the Timber segment, as shown in the table below. The increase in earnings from discontinued operations primarily resulted from the gain on the sale of SECI recognized in 2007 as well as the non-recurrence of $68.6 million of impairment charges recognized in 2006 related to the Exploration and Production segment's Canadian oil and gas assets. In the discussion that follows, note that all amounts used in the earnings discussions are after-tax amounts, unless otherwise noted. Earnings from continuing operations and discontinued operations were impacted by several events in 2007 and 2006, including:

2007 Events

- A $120.3 million gain on the sale of SECI, which was completed in August 2007. This amount is included in earnings from discontinued operations;
- A $4.8 million benefit to earnings in the Pipeline and Storage segment due to the reversal of a reserve established for all costs incurred related to the Empire Connector project recognized during June 2007;
- A $1.9 million benefit to earnings in the Pipeline and Storage segment associated with the discontinuance of hedge accounting for Empire's interest rate collar; and
- A $2.3 million benefit to earnings in the Energy Marketing segment related to the resolution of a purchased gas contingency.

2006 Events

- $68.6 million of impairment charges related to the Exploration and Production segment's Canadian oil and gas assets under the full cost method of accounting using natural gas pricing at June 30, 2006 and September 30, 2006;
- An $11.2 million benefit to earnings in the Exploration and Production segment ($6.1 million in continuing operations and $5.1 million in discontinued operations) related to income tax adjustments recognized during 2006; and
- A $2.6 million benefit to earnings in the Utility segment related to the correction of Distribution Corporation's calculation of the symmetrical sharing component of New York's gas adjustment rate.

2006 Compared with 2005

The Company's earnings were $138.1 million in 2006 compared with earnings of $189.5 million in 2005. As previously discussed, the Company has presented its Canadian operations in the Exploration and Production segment (in conjunction with the sale of SECI) as well as for its Czech Republic operations (in conjunction with the sale of U.E.) as discontinued operations. The Company's earnings from continuing operations were $184.6 million in 2006 compared with $138.4 million in 2005. The Company recorded a loss from discontinued operations of $46.5 million in 2006 compared with earnings from discontinued operations of $51.1 million in 2005. The increase in earnings from continuing operations of $46.2 million is primarily the result of higher earnings in the Exploration and Production, Utility, Energy Marketing, and Timber segments, combined with

Table of Contents

higher earnings in the All Other category and a lower loss in the Corporate category. These were offset somewhat by lower earnings in the Pipeline and Storage segment, as shown in the table below. The loss from discontinued operations in 2006 compared to earnings from discontinued operations in 2005 reflects the recognition of $68.6 million of impairment charges in 2006 related to the Exploration and Production segment's Canadian oil and gas assets as well as the non-recurrence of the gain on the sale of U.E. recognized in 2005. Earnings from continuing operations and discontinued operations were impacted by several events discussed above and the following 2005 events:

2005 Events

- A $25.8 million gain on the sale of U.E., which was completed in July 2005. This amount is included in earnings from discontinued operations;
- A $2.6 million gain in the Pipeline and Storage segment associated with a FERC approved sale of base gas;
- A $3.9 million gain in the Pipeline and Storage segment associated with insurance proceeds received in prior years for which a contingency was resolved during 2005;
- A $3.3 million loss related to certain derivative financial instruments that no longer qualified as effective hedges;
- A $2.7 million impairment in the value of the Company's 50% investment in ESNE (recorded in the All Other category), a limited liability company that owns an 80-megawatt, combined cycle, natural gas-fired power plant in the town of North East, Pennsylvania; and
- A $1.8 million impairment of a gas-powered turbine in the All Other category that the Company had planned to use in the development of a co-generation plant.

Additional discussion of earnings in each of the business segments can be found in the business segment information that follows.

Earnings (Loss) by Segment

	Year Ended September 30

2007 Compared with 2006

Operating revenues for the Utility segment decreased $160.0 million in 2007 compared with 2006. This decrease largely resulted from a $180.4 million decrease in retail gas sales revenues. This decrease was primarily offset by a $10.0 million increase in transportation revenues and a $9.8 million increase in off-system sales revenues.

Table of Contents

The decrease in retail gas sales revenues for the Utility segment was largely a function of the recovery of lower gas costs (gas costs are recovered dollar for dollar in revenues), which more than offset the revenue impact of higher retail sales volumes, as shown in the table above. See further discussion of purchased gas below under the heading "Purchased Gas." This decrease was offset slightly by a base rate increase in the Pennsylvania jurisdiction, effective January 2007, which increased operating revenues by $8.5 million for 2007. The increase is included within both retail and transportation revenues in the table above.

The increase in transportation revenues was primarily due to a 4.3 Bcf increase in transportation throughput, largely due to the migration of retail sales customers to transportation service. The corresponding $10.0 million increase in transportation revenues would have been greater if not for a $3.9 million out-of-period adjustment recorded in the first quarter of 2006 to correct Distribution Corporation's calculation of the symmetrical sharing component of New York's gas adjustment rate.

As reported in 2006, on November 17, 2006 the U.S. Court of Appeals vacated and remanded FERC's Order No. 2004, its latest affiliate standards of conduct, with respect to natural gas pipelines. The court's decision became effective on January 5, 2007, and on January 9, 2007, FERC issued Order No. 690, its Interim Rule, designed to respond to the court's decision. In Order No. 690, as clarified by FERC on March 21, 2007, the FERC readopted, on an interim basis, certain provisions that existed prior to the issuance of Order No. 2004 that had made it possible for the Utility to engage in certain off-system sales without triggering the adverse consequences that would otherwise arise under the standards of conduct. As such, the Utility resumed engaging in off-system sales on non-affiliated pipelines as of May 2007, resulting in total off-system sales revenues of $9.8 million for 2007. Due to profit sharing with retail customers, the margins resulting from off-system sales are minimal and there was not a material impact to margins in 2007.

2006 Compared with 2005

Operating revenues for the Utility segment increased $163.7 million in 2006 compared with 2005. This increase largely resulted from a $146.5 million increase in retail gas sales revenues. Transportation revenues and other revenues also increased by $8.9 million and $8.3 million, respectively.

The increase in retail gas sales revenues for the Utility segment was largely a function of the recovery of higher gas costs (gas costs are recovered dollar for dollar in revenues), which more than offset the revenue impact of lower retail sales volumes, as shown in the table above. See further discussion of purchased gas below under the heading "Purchased Gas." Warmer weather, as shown in the table above, and greater conservation by customers due to higher natural gas commodity prices, were the principal reasons for the decrease in retail sales volumes.

The increase in transportation revenues was primarily due to a $5.9 million increase in the New York jurisdiction's calculation of the symmetrical sharing component of the gas adjustment rate. The symmetrical sharing component is a mechanism included in Distribution Corporation's New York rate agreement that shares with customers 90% of the difference between actual revenues received from large volume customers and the level of revenues that were projected to be received during the rate year. Of the $5.9 million increase, $3.9 million was due to an out-of-period adjustment recorded in fiscal year 2006 when it was determined that certain credits that had been included in the calculation should have been removed during the implementation of a previous rate case. The adjustment related to fiscal years 2002 through 2005.

The impact of the August 2005 New York rate agreement was to increase operating revenues by $19.1 million (of which $12.4 million was an increase to other operating revenues). This increase consisted of a base rate increase, the implementation of a merchant function charge, the elimination of certain bill credits, and the elimination of the gross receipts tax surcharge. The rate agreement also allowed Distribution Corporation to continue to utilize certain refunds from upstream pipeline companies and certain other credits (referred to as the "cost mitigation reserve") to offset certain specific expense items. In 2005, Distribution Corporation utilized $7.8 million of the cost mitigation reserve, which increased other operating revenues, to recover previous under-collections of pension and post-retirement expenses. The impact of that increase in other operating revenues was offset by an equal amount of operation and maintenance expense (thus there was no earnings impact). Distribution Corporation did not record any entries involving the cost mitigation reserve

Table of Contents

in 2006. Other operating revenues were also impacted by two out-of-period regulatory adjustments recorded during 2005. The first adjustment related to the final settlement with the Staff of the NYPSC of the earnings sharing liability for the 2001 to 2003 time period. As a result of that settlement, the New York rate jurisdiction recorded additional earnings sharing expense (as an offset to other operating revenues) of $0.9 million. The second adjustment related to a regulatory liability recorded for previous over-collections of New York State gross receipts tax. In preparing for the implementation of the rate agreement in New York, the Company determined that it needed to adjust that regulatory liability by $3.1 million (of which $1.0 million was recorded as a reduction of other operating revenues and $2.1 million was recorded as additional interest expense) related to fiscal years 2004 and prior. These adjustments did not recur in 2006.

In the Pennsylvania jurisdiction, the impact of the base rate increase, which became effective in mid-April 2005, was to increase operating revenues by $7.5 million. This increase is included within both retail and transportation revenues in the table above.

Purchased Gas

The cost of purchased gas is the Company's single largest operating expense. Annual variations in purchased gas costs are attributed directly to changes in gas sales volumes, the price of gas purchased and the operation of purchased gas adjustment clauses.

Currently, Distribution Corporation has contracted for long-term firm transportation capacity with Supply Corporation and six other upstream pipeline companies, for long-term gas supplies with a combination of producers and marketers, and for storage service with Supply Corporation and three nonaffiliated companies. In addition, Distribution Corporation satisfies a portion of its gas requirements through spot market purchases. Changes in wellhead prices have a direct impact on the cost of purchased gas. Distribution Corporation's average cost of purchased gas, including the cost of transportation and storage, was $10.04 per Mcf in 2007, a decrease of 17% from the average cost of $12.07 per Mcf in 2006. The average cost of purchased gas in 2006 was 31% higher than the average cost of $9.19 per Mcf in 2005. Additional discussion of the Utility segment's gas purchases appears under the heading "Sources and Availability of Raw Materials" in Item 1.

Earnings

2007 Compared with 2006

The Utility segment's earnings in 2007 were $50.9 million, an increase of $1.1 million when compared with earnings of $49.8 million in 2006.

In the New York jurisdiction, earnings decreased by $6.2 million. This was primarily due to lower interest income ($4.5 million). The New York division's current rate agreement with the NYPSC allows the Company to accrue interest on a pension-related regulatory asset. The amount of interest that can be accrued is reduced as the funded status of the pension plan improves. The fair market value of the pension plan assets exceeded the accumulated benefit obligation at September 30, 2007 resulting in a significant reduction in the interest accrual on this regulatory asset. The out-of-period symmetrical sharing adjustment discussed above ($2.6 million), higher bad debt and other operating costs ($0.8 million), higher property taxes ($0.6 million) and higher interest expense ($0.5 million) also contributed to this decrease. The positive impact associated with a lower effective tax rate ($1.9 million) and increased usage per account ($1.9 million) partially offset the overall decrease.

In the Pennsylvania jurisdiction, earnings increased by $7.3 million. This was primarily due to a base rate increase ($5.5 million) that became effective January 2007, colder weather ($2.5 million), and the positive impact associated with a lower effective tax rate ($1.1 million). Higher intercompany and other interest expense ($0.8 million), coupled with a decrease in normalized usage ($0.3 million), partially offset these increases.

The impact of weather on the Utility segment's New York rate jurisdiction is tempered by a WNC. The WNC, which covers the eight-month period from October through May, has had a stabilizing effect on earnings for the New York rate jurisdiction. In addition, in periods of colder than normal weather, the WNC benefits the

Table of Contents

Utility segment's New York customers. In 2007 and 2006, the WNC preserved earnings of approximately $2.3 million and $6.2 million, respectively, as the weather was warmer than normal.

2006 Compared with 2005

The Utility segment's earnings in 2006 were $49.8 million, an increase of $10.6 million when compared with earnings of $39.2 million in 2005.

In the New York jurisdiction, earnings increased by $9.2 million, primarily due to the positive impact of the rate agreement in this jurisdiction that became effective August 2005 ($13.7 million). In addition, the increase in the New York jurisdiction's calculation of the symmetrical sharing component of the gas adjustment rate, including the out-of-period adjustment discussed above, contributed $3.9 million to earnings. Two out-of-period regulatory adjustments recorded during fiscal year 2005 that did not recur during 2006, as discussed above, also contributed an additional $2.6 million to earnings. The first adjustment, related to the final settlement with the Staff of the NYPSC of the earnings sharing liability for the fiscal 2001 through 2003 time period, increased earnings in fiscal 2006 by $0.6 million. The second adjustment, related to a regulatory liability recorded for previous over-collections of New York State gross receipts tax, increased earnings in fiscal 2006 by $2.0 million. The increase in earnings due to the New York rate agreement, the symmetrical sharing component of the gas adjustment rate, and the two out-of-period regulatory adjustments recorded in 2005, was partially offset by a decline in margin associated with lower weather-normalized usage by customers ($2.3 million), higher operation expenses ($2.5 million), higher interest expense ($2.7 million), and a higher effective income tax rate ($3.2 million). The higher effective income tax rate is due to positive tax adjustments recorded in 2005 that did not recur in 2006. The increase in operation expenses consisted primarily of higher pension expense offset by lower bad debt expense.

In the Pennsylvania jurisdiction, earnings increased by $1.4 million, due to the positive impact of the rate case settlement in this jurisdiction that became effective April 2005 ($4.9 million), and lower operation expenses ($1.8 million). The decrease in operation expenses consisted primarily of lower bad debt expense offset partially by higher pension expense. These increases to earnings were partially offset by the impact of warmer than normal weather in Pennsylvania ($3.0 million), lower weather-normalized usage by customer ($0.6 million), higher interest expense ($0.8 million), and a higher effective tax rate ($1.3 million).

The decrease in bad debt expense reflects the fact that in the fourth quarter of 2005, the New York and Pennsylvania jurisdictions increased the allowance for uncollectible accounts to reflect the increase in final billed account balances and the increased aging of outstanding active receivables heading into the heating season. A similar adjustment was not required in 2006.

In 2006, the WNC preserved earnings of approximately $6.2 million because it was warmer than normal in the New York service territory. In 2005, the WNC did not have a significant impact on earnings.

	356,088	374,988	372,379

2007 Compared with 2006

Operating revenues for the Pipeline and Storage segment decreased $2.4 million in 2007 as compared with 2006, which was due mostly to a decrease in other revenues ($2.3 million). The decrease in other revenues is primarily due to a $4.2 million decrease in efficiency gas revenues. This decrease was due to the Company's recent settlement with the FERC, which decreased efficiency gas retainage allowances. Offsetting this decrease, there was a $1.4 million increase in other revenues attributable to the lease termination fee adjustment in 2006 (an intercompany transaction) for the Company's former headquarters, which did not recur in 2007. While Supply Corporation's transportation volumes decreased during the year, volume fluctuations generally do not have a significant impact on revenues as a result of Supply Corporation's straight-fixed variable rate design.

2006 Compared with 2005

Operating revenues for the Pipeline and Storage segment decreased $1.5 million in 2006 as compared with 2005. This decrease consisted of a $4.5 million decrease in other revenues offset by a $1.8 million increase in firm and interruptible transportation revenues and a $1.2 million increase in firm and interruptible storage service revenues. The decrease in other revenues is primarily due to a $2.6 million decrease in efficiency gas revenues due to lower natural gas prices, a $0.7 million decrease in cashout revenues, and a $1.4 million decrease in revenue attributable to a lease termination fee adjustment (an intercompany transaction) for the Company's former headquarters. Cashout revenues are completely offset by purchased gas expense. The increase in firm and interruptible transportation revenues is due to additional contracts with customers and the renewal of contracts at higher rates, both of which reflect the increased demand for transportation services due to market conditions resulting from the effects of hurricane damage to production and pipeline infrastructure in the Gulf of Mexico during the fall of 2005. While Supply Corporation's transportation volumes increased during the year, volume fluctuations generally do not have a significant impact on revenues as a result of Supply

Table of Contents

Corporation's straight fixed-variable rate design. The increase in storage revenues reflects the renewal of storage contracts at higher rates.

Earnings

2007 Compared with 2006

The Pipeline and Storage segment's earnings in 2007 were $56.4 million, an increase of $0.8 million when compared with earnings of $55.6 million in 2006. The main factor contributing to this increase was the reversal of a reserve for preliminary survey costs ($4.8 million) related to the Empire Connector project. Based on the signing of a service agreement with KeySpan Gas East Corporation during the quarter ended June 30, 2007, management determined that it was probable that the project would go forward and that such preliminary survey costs were properly capitalizable in accordance with the FERC's Uniform System of Accounts and SFAS 71. In addition, there was a $2.5 million increase in earnings associated with the decrease in depreciation expense as a result of the most recent settlement with the FERC, which reduced depreciation rates. There was also a $1.9 million positive earnings impact associated with the discontinuance of hedge accounting for Empire's interest rate collar. On December 8, 2006, Empire repaid $22.8 million of secured debt. The interest costs of this secured debt were hedged by the interest rate collar. Since the hedged transaction was settled and there will be no future cash flows associated with the secured debt, the unrealized gain in accumulated other comprehensive income associated with the interest rate collar was reclassified to the income statement. These earnings increases were offset by higher interest expense ($3.2 million), lower efficiency gas revenues ($2.7 million), a $1.5 million increase in operating costs (primarily post-retirement benefit costs), and the earnings decrease associated with a higher effective tax rate ($0.9 million).

2006 Compared with 2005

The Pipeline and Storage segment's earnings in 2006 were $55.6 million, a decrease of $4.9 million when compared with earnings of $60.5 million in 2005. The decrease reflects the non-recurrence of two events, a $2.6 million gain on a FERC approved sale of base gas in 2005 and a $3.9 million gain associated with insurance proceeds received in prior years for which a contingency was resolved in 2005. Both of these items were recorded in Other Income. It also reflects the earnings impact associated with lower efficiency gas revenues ($1.7 million) and higher operation expenses ($0.6 million). These earnings decreases were offset by the positive earnings impact of higher transportation and storage revenues ($2.0 million), lower depreciation due to the non-recurrence of a write-down of the Company's former corporate office in 2005 ($0.9 million), and the earnings benefit associated with a lower effective tax rate ($1.7 million).

EXPLORATION AND PRODUCTION

Revenues

Exploration and Production Operating Revenues

	Year Ended September 30		
	2007	2006	2005
		(Thousands)	
Gas (after Hedging) from Continuing Operations	$ 143,785	$ 126,969	$ 132,528

(2) Includes low gravity oil which generally sells for a lower price.

[Table of Contents](#)

2007 Compared with 2006

Operating revenues from continuing operations for the Exploration and Production segment increased $49.1 million in 2007 as compared with 2006. Oil production revenue after hedging increased $33.3 million due primarily to an $11.42 per barrel increase in weighted average prices after hedging, which more than offset a slight decrease in oil production of 92,000 barrels. Gas production revenue after hedging increased $16.8 million in 2007 as compared with 2006. An increase in gas production of 1,742 MMcf and an increase in weighted average prices after hedging of $0.23 per Mcf both contributed to the increase. The increase in gas production occurred primarily in the Gulf Coast region (1,246 MMcf). During the quarter ended December 31, 2005, Seneca experienced significant production delays due largely to the impact of hurricane damage to pipeline infrastructure in the Gulf of Mexico. Seneca had substantially all of its pre-hurricane Gulf of Mexico production back on line at the beginning of fiscal 2007. Production also increased in this segment's Appalachian region (447 MMcf), primarily due to increased drilling in this region during 2007, as highlighted in Item 2 under "Exploration and Production Activities."

Refer to further discussion of derivative financial instruments in the "Market Risk Sensitive Instruments" section that follows. Refer to the tables above for production and price information.

2006 Compared with 2005

Operating revenues from continuing operations for the Exploration and Production segment increased $44.2 million in 2006 as compared with 2005. Oil production revenue after hedging increased $39.4 million due primarily to higher weighted average prices after hedging ($13.67 per barrel). This increase was offset slightly by a decrease in production (233,000 barrels). Gas production revenue after hedging decreased $5.6 million. A decrease in gas production (3,072 MMcf) more than offset an increase in the weighted average price of gas after hedging ($0.76 per Mcf). The decrease in gas production occurred primarily in the Gulf Coast (a 3,358 MMcf decline), which is partly attributable to the fall 2005 hurricane damage and partly attributable to the expected decline rates for the Company's production in the region. Other revenues increased $6.5 million largely due to the non-recurrence of a $5.1 million mark-to-market adjustment, recorded in 2005, for losses on certain derivative financial instruments that no longer qualified as effective hedges due to the anticipated delays in oil and gas production volumes caused by Hurricane Rita.

Refer to further discussion of derivative financial instruments in the "Market Risk Sensitive Instruments" section that follows. Refer to the tables above for production and price information.

Earnings

2007 Compared with 2006

The Exploration and Production segment's earnings from continuing operations for 2007 were $74.9 million, an increase of $7.4 million when compared with earnings from continuing operations of $67.5 million for 2006. Higher crude oil prices, higher natural gas production and higher natural gas prices increased earnings by $24.1 million, $7.9 million and $3.0 million, respectively. These increases were partly offset by the non-recurrence of $6.1 million of tax benefits recognized during 2006, discussed below, as well as by higher depletion expense and higher lease operating expense of $7.2 million and $4.6 million, respectively. Slightly lower crude oil production and higher general and administrative expenses also decreased earnings by $2.4 million and $0.6 million, respectively. Earnings were also negatively impacted by a higher effective tax rate ($6.3 million).

2006 Compared with 2005

The Exploration and Production segment's earnings from continuing operations in 2006 were $67.5 million, an increase of $31.9 million when compared with earnings from continuing operations of $35.6 million in 2005. The increase is primarily the result of higher oil and gas prices, which increased earnings by $29.6 million and $8.9 million, respectively. Also, the non-recurrence of the 2005 mark-to-market adjustment discussed under Revenues above, contributed $3.3 million to earnings and strong cash flow provided higher interest

Table of Contents

income ($2.2 million). In the third quarter of 2006, a $6.1 million benefit to earnings related to income taxes was recognized. The Company reversed a valuation allowance ($2.9 million) associated with the capital loss carryforward that resulted from the 2003 sale of certain of Seneca's oil properties, and also recognized a tax benefit of $3.2 million related to the favorable resolution of certain open tax issues. Partly offsetting these increases, lower gas and oil production decreased earnings by $12.5 million and $4.0 million, respectively. Further contributing to the decrease were higher general and administrative and other operating costs ($2.0 million) and higher lease operating expenses ($1.9 million). The increase in lease operating expenses was primarily in the West Coast region due to higher steaming costs associated with heavy crude oil production in the California Midway-Sunset and North Lost Hills fields. The higher steaming costs were due to an increase in the price for natural gas purchased in the field and used in the steaming operations, primarily in the second quarter of fiscal 2006, compared to the second quarter of fiscal 2005.

ENERGY MARKETING

Revenues

Energy Marketing Operating Revenues

	Year Ended September 30		
	2007	2006 (Thousands)	2005
Natural Gas (after Hedging)	$ 413,405	$ 496,769	$ 329,560
Other	207	300	154
	$ 413,612	$ 497,069	$ 329,714

Energy Marketing Volumes

	Year Ended September 30		
	2007	2006	2005
Natural Gas — (MMcf)	50,775	45,270	40,683

2007 Compared with 2006

Operating revenues for the Energy Marketing segment decreased $83.5 million in 2007 as compared with 2006. The decrease primarily reflects lower gas sales revenue due to a decrease in natural gas commodity prices for the period that were recovered through revenues, offset in part by an increase in throughput. The increase in throughput was due to the addition of certain large, low-margin commercial and industrial customers, an increase in sales to wholesale customers, and colder weather.

2006 Compared with 2005

Operating revenues for the Energy Marketing segment increased $167.4 million in 2006 as compared with 2005. The increase primarily reflects higher natural gas commodity prices that were recovered through revenues, and, to a lesser extent, an increase in throughput. The increase in throughput was due to the addition of certain large commercial and industrial customers, which more than offset any decrease in throughput due to warmer weather and greater conservation by customers due to higher natural gas prices.

Earnings

2007 Compared with 2006

The Energy Marketing segment's earnings in 2007 were $7.7 million, an increase of $1.9 million when compared with earnings of $5.8 million in 2006. Higher margins of $2.3 million are responsible for the increase in earnings. The increase in margin is mainly the result of a $2.3 million reversal of an accrual for purchased gas expense related to the resolution of a contingency during 2007. While throughput increased, as noted above, much of this increase in volume is related to sales to low margin customers.

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1379 of 2431

Table of Contents

2006 Compared with 2005

The Energy Marketing segment's earnings in 2006 were $5.8 million, an increase of $0.7 million when compared with earnings of $5.1 million in 2005. Despite warmer weather and greater conservation by customers, gross margin increased due to a number of factors, including higher volumes and the marketing flexibility associated with stored gas. The Energy Marketing segment's contracts for significant storage and transportation volumes provided operational flexibility resulting in increased sales throughput and earnings. The increase in gross margin more than offset an increase in operation expense.

TIMBER

Revenues

Timber Operating Revenues

	Year Ended September 30		
	2007	2006 (Thousands)	2005
Log Sales	$ 21,927	$ 23,077	$ 22,478
Green Lumber Sales	5,097	7,123	7,296
Kiln-dried Lumber Sales	27,908	32,809	29,651
Other	3,965	2,020	1,861
	$ 58,897	$ 65,029	$ 61,286

Timber Board Feet

	Year Ended September 30		
	2007	2006 (Thousands)	2005
Log Sales	8,660	9,527	7,601
Green Lumber Sales	9,358	10,454	10,489
Kiln-dried Lumber Sales	14,778	16,862	15,491
	32,796	36,843	33,581

2007 Compared with 2006

Operating revenues for the Timber segment decreased $6.1 million in 2007 as compared with 2006. This decrease is attributed to unfavorable weather conditions primarily during the fall of 2006 and the spring of 2007 that greatly limited the harvesting of logs. These conditions consisted of warm, wet weather that made it difficult to bring logging trucks into the forests. Weather conditions were significantly more favorable throughout fiscal 2006. These unfavorable conditions for harvesting resulted in a decline in log sales of $1.2 million or 867,000 board feet. There was also a decline in both green lumber and kiln-dried lumber sales of $2.0 million and $4.9 million, respectively, primarily because there were fewer logs available for processing. Declines in market prices for the cherry and maple species also contributed to the decrease in green lumber and kiln-dried lumber sales. Additionally, the processing of a greater amount of lumber species other than cherry (due to the mix of species on the areas being harvested) contributed to the decline in kiln-dried lumber sales since lumber species other than cherry are sold at a lower price than kiln-dried cherry lumber. With the addition of two new kilns placed into service in June 2007 that allow for greater processing capacity, the Company plans to continue to focus on increasing cherry kiln-dried lumber sales since cherry kiln-dried lumber commands a higher price in the overall mix of lumber. Offsetting the decreases discussed above, other revenues increased $1.9 million largely due to the sale of 3.1 million board feet of timber rights ($1.6 million).

Table of Contents

2006 Compared with 2005

Operating revenues for the Timber segment increased $3.7 million in 2006 as compared with 2005. This increase is attributed to an increase in kiln-dried lumber sales of $3.2 million primarily due to an increase in kiln-dried cherry lumber sales volumes of 2.0 million board feet. Other kiln-dried lumber sales volumes decreased by 0.6 million board feet, but there was little impact to revenues. The addition of two new kilns in February 2005 allowed for greater processing capacity in 2006 as compared to 2005 since the kilns were in operation for all of 2006. Higher log sales revenue of $0.6 million also contributed to the increase in revenues. An increase in cherry export log sales as a result of greater market demand and an increase in saw log sales were the primary factors contributing to the increase. Offsetting these increases was a decline in cherry veneer log sales due to lower volumes of cherry veneer logs harvested because of unfavorable weather conditions.

Earnings

2007 Compared with 2006

The Timber segment earnings in 2007 were $3.7 million, a decrease of $2.0 million when compared with earnings of $5.7 million in 2006. The decrease was primarily due to lower margins from lumber and log sales ($2.5 million) as a result of the decline in revenues noted above, as well as higher general and administrative expenses of $0.3 million. Partially offsetting this decrease was a decline in depletion expense of $1.2 million. The decrease in depletion expense reflects the cutting of more low cost or no cost basis timber from Company owned land as well as the overall decrease in logs harvested.

2006 Compared with 2005

The Timber segment earnings in 2006 were $5.7 million, an increase of $0.7 million when compared with earnings of $5.0 million in 2005. Higher margins from kiln-dried lumber sales and cherry export log sales accounted for the earnings increase.

ALL OTHER AND CORPORATE OPERATIONS

All Other and Corporate Operations primarily includes the operations of Horizon LFG, Horizon Power, former International segment activity other than the activity from the Czech Republic operations, and corporate operations. Horizon LFG owns and operates short-distance landfill gas pipeline companies. Horizon Power's activity primarily consists of equity method investments in Seneca Energy, Model City and ESNE. Horizon Power has a 50% ownership interest in each of these entities. The income from these equity method investments is reported as Income from Unconsolidated Subsidiaries on the Consolidated Statements of Income. Seneca Energy and Model City generate and sell electricity using methane gas obtained from landfills owned by outside parties. ESNE generates electricity from an 80-megawatt, combined cycle, natural gas-fired power plant in North East, Pennsylvania. Horizon Power also owns a gas-powered turbine and other assets which it had planned to use in the development of a co-generation plant. The Company is in the process of selling these assets. The former International segment activity primarily consists of project development activities in Italy and Bulgaria.

Earnings

2007 Compared with 2006

All Other and Corporate operations had earnings of $8.1 million in 2007, an increase of $7.9 million compared with earnings of $0.2 million for 2006. This improvement was largely due to an increase in interest income of $4.1 million (primarily intercompany interest). In the All Other category, Horizon LFG's earnings benefited from higher margins of $1.0 million in 2007 as compared to 2006, and Horizon Power's income from unconsolidated subsidiaries increased $0.9 million, also contributing to the increase in earnings. The Corporate and All Other categories also had an earnings benefit associated with a lower effective tax rate ($2.0 million).

Table of Contents

2006 Compared with 2005

All Other and Corporate operations experienced income of $0.2 million in 2006, which was $7.1 million greater than a loss of $6.9 million in 2005. The increase is due primarily to the non-recurrence of $4.5 million of impairment charges recorded in 2005. During 2005, Horizon Power recorded a $2.7 million impairment in the value of its 50% investment in ESNE. Management determined that there was a decline in the fair market value of ESNE that was other than temporary in nature given continuing high commodity prices for natural gas and the negative impact these prices had on operations. The Company also recorded a $1.8 million impairment of the gas-powered turbine mentioned above. This impairment was based on a review of current market prices for similar turbines. Also contributing to the increase were higher interest income ($4.7 million) during 2006, resulting primarily from the investment of proceeds from the sale of U.E. in July 2005, combined with higher average interest rates in 2006 versus 2005. These increases were partially offset by higher operating expenses ($1.3 million) and lower margins on landfill gas sales ($0.5 million).

INTEREST INCOME

Interest income was $7.9 million lower in 2007 as compared to 2006. As discussed in the Utility earnings section above, the main reason for this decrease was lower interest income of $7.4 million on a pension-related regulatory asset in accordance with the 2005 New York rate agreement. The New York division's 2005 rate agreement with the NYPSC allows the Company to accrue interest on a pension-related regulatory asset. The amount of the interest that can be accrued is reduced as the funded status of the pension plan improves. The fair market value of the pension plan assets exceeded the accumulated benefit obligation at September 30, 2007 resulting in a significant reduction in the interest accrual related to this regulatory asset in 2007.

Interest income was $3.2 million higher in 2006 as compared to 2005. As discussed in the earnings discussion by segment above, the main reasons for this increase were strong cash flow from operations, the investment of proceeds from the sale of U.E. in July 2005 and higher average annual interest rates. Additionally, interest income on a pension-related regulatory asset in accordance with the New York rate agreement increased by $0.5 million.

OTHER INCOME

Other income was $2.1 million higher in 2007 as compared to 2006. The increase is attributed to a death benefit gain on life insurance proceeds of $1.9 million recognized in the Corporate category.

Other income was $9.9 million lower in 2006 as compared to 2005. As discussed in the earnings discussion by segment above, the main reasons for this decrease included non-recurring gains recorded during 2005 in the Pipeline and Storage segment related to the sale of base gas ($2.6 million), and the disposition of insurance proceeds ($3.9 million) received in prior years for which a contingency was resolved.

INTEREST CHARGES

Although most of the variances in Interest Charges are discussed in the earnings discussion by segment above, the following is a summary on a consolidated basis:

Interest on long-term debt decreased $4.2 million in 2007 and $0.6 million in 2006. The decrease in 2007 was primarily the result of a lower average amount of long-term debt outstanding. In addition, the Company recognized a $1.9 million benefit to interest expense as a result of the discontinuance of hedge accounting for Empire's interest rate collar, as discussed above under Pipeline and Storage. The underlying long-term debt associated with this interest rate collar was repaid in December 2006 and the unrealized gain recorded in accumulated other comprehensive income associated with the interest rate collar was reclassified to interest expense during the quarter ended December 31, 2006.

Other interest charges were $0.1 million higher in 2007 and $3.1 million lower in 2006. The decrease in 2006 resulted primarily from the non-recurrence of $2.1 million of interest expense recorded by the Utility segment in 2005 and a lower average amount of short-term debt outstanding during 2006. The $2.1 million of interest expense recorded in 2005 related to an adjustment to a regulatory liability for previous over-collections of New York State gross receipts tax.

Table of Contents

CAPITAL RESOURCES AND LIQUIDITY

The primary sources and uses of cash during the last three years are summarized in the following condensed statement of cash flows:

Sources (Uses) of Cash

	Year Ended September 30		
	2007	2006 (Millions)	2005
Provided by Operating Activities	$ 394.2	$ 471.4	$ 317.3
Capital Expenditures	(276.7)	(294.2)	(219.5)
Investment in Partnership	(3.3)	—	—
Net Proceeds from Sale of Foreign Subsidiaries	232.1	—	111.6
Cash Held in Escrow	(58.2)	—	—
Net Proceeds from Sale of Oil and Gas Producing Properties	5.1	—	1.4
Other Investing Activities	(0.8)	(3.2)	3.2
Change in Short-Term Debt	—	—	(115.4)
Reduction of Long-Term Debt	(119.6)	(9.8)	(13.3)
Issuance of Common Stock	17.5	23.3	20.3
Dividends Paid on Common Stock	(100.6)	(98.2)	(94.1)
Dividends Paid to Minority Interest	—	—	(12.7)
Excess Tax Benefits Associated with Stock- Based Compensation Awards	13.7	6.5	—
Shares Repurchased under Repurchase Plan	(48.1)	(85.2)	—
Effect of Exchange Rates on Cash	(0.1)	1.4	1.3
Net Increase in Cash and Temporary Cash Investments	$ 55.2	$ 12.0	$ 0.1

OPERATING CASH FLOW

Internally generated cash from operating activities consists of net income available for common stock, adjusted for non-cash expenses, non-cash income and changes in operating assets and liabilities. Non-cash items include depreciation, depletion and amortization, impairment of oil and gas producing properties, impairment of investment in partnership, deferred income taxes, income or loss from unconsolidated subsidiaries net of cash distributions, minority interest in foreign subsidiaries and gain on sale of discontinued operations.

Cash provided by operating activities in the Utility and Pipeline and Storage segments may vary substantially from year to year because of the impact of rate cases. In the Utility segment, supplier refunds, over- or under-recovered purchased gas costs and weather may also significantly impact cash flow. The impact of weather on cash flow is tempered in the Utility segment's New York rate jurisdiction by its WNC and in the Pipeline and Storage segment by Supply Corporation's straight fixed-variable rate design.

Cash provided by operating activities in the Exploration and Production segment may vary from period to period as a result of changes in the commodity prices of natural gas and crude oil. The Company uses various derivative financial instruments, including price swap agreements, no cost collars and futures contracts in an attempt to manage this energy commodity price risk.

Net cash provided by operating activities totaled $394.2 million in 2007, a decrease of $77.2 million compared with the $471.4 million provided by operating activities in 2006. Higher working capital requirements in the Exploration and Production, Utility, and Pipeline and Storage segments were partially offset by lower working capital requirements in the Energy Marketing segment.

Table of Contents

INVESTING CASH FLOW

Expenditures for Long-Lived Assets

The Company's expenditures for long-lived assets associated with continuing operations totaled $250.9 million in 2007. The table below presents these expenditures:

	Year Ended September 30, 2007		
	Capital Expenditures	Investment in Partnership (Millions)	Total Expenditures For Long-Lived Assets
Utility	$ 54.2	$ —	$ 54.2
Pipeline and Storage	43.2	—	43.2
Exploration and Production	146.7	—	146.7
Timber	3.7	—	3.7
All Other and Corporate	(0.2)	3.3	3.1
Total Expenditures from Continuing Operations(1)	$ 247.6	$ 3.3	$ 250.9

(1) Excludes expenditures for long-lived assets associated with discontinued operations of $29.1 million.

Utility

The majority of the Utility capital expenditures were made for replacement of mains and main extensions, as well as for the replacement of service lines.

Pipeline and Storage

The majority of the Pipeline and Storage segment's capital expenditures were made for additions, improvements and replacements to this segment's transmission and gas storage systems. It also reflects $15.5 million of costs related to the Empire Connector project that were added to Construction Work in Progress during 2007. The Empire Connector project is discussed below under Estimated Capital Expenditures.

Exploration and Production

The Exploration and Production segment's capital expenditures were primarily well drilling and completion expenditures and included approximately $66.2 million for the Gulf Coast region ($65.7 million for the off-shore program in the Gulf of Mexico), $41.4 million for the West Coast region and $39.1 million for the Appalachian region. The significant amount spent in the Gulf Coast region is related to high commodity prices, which has improved the economics of investment in the area, plus projected royalty relief. These amounts included approximately $30.3 million spent to develop proved undeveloped reserves.

Timber

The majority of the Timber segment capital expenditures were for the construction of two new kilns that were placed into service during the quarter ended June 30, 2007, as well as construction of a lumber sorter for Highland's sawmill operations, which was placed into service in October 2007.

All Other and Corporate

The majority of the All Other and Corporate category expenditures for long-lived assets consisted of a $3.3 million capital contribution to Seneca Energy by Horizon Power, $1.65 million in each of the first and second quarters of fiscal 2007. Seneca Energy generates and sells electricity using methane gas obtained from landfills owned by outside parties. Seneca Energy is in the process of expanding its generating capacity from 11.2 megawatts to 17.6 megawatts. Horizon Power has funded its capital contributions with short-term borrowings.

Table of Contents

Estimated Capital Expenditures

The Company's estimated capital expenditures for the next three years are:

	Year Ended September 30		
	2008	2009	2010
		(Millions)	
Utility	$ 59.0	$ 57.0	$ 56.0
Pipeline and Storage	152.0	96.0	40.0
Exploration and Production(1)	154.0	146.0	143.0
Timber	1.0	—	—
	$ 366.0	$ 299.0	$ 239.0

(1) Includes estimated expenditures for the years ended September 30, 2008, 2009 and 2010 of approximately $33 million, $36 million and $27 million, respectively, to develop proved undeveloped reserves.

Estimated capital expenditures for the Utility segment in 2008 will be concentrated in the areas of main and service line improvements and replacements and, to a lesser extent, the purchase of new equipment.

Estimated capital expenditures for the Pipeline and Storage segment in 2008 includes $122.9 million for the Empire Connector project as discussed below. Other capital expenditures will be concentrated in the replacement of transmission and storage lines, reconditioning of storage wells and improvements of compressor stations.

The Company continues to explore various opportunities to expand its capabilities to transport gas to the East Coast, either through the Supply Corporation or Empire systems or in partnership with others. In October 2005, Empire filed an application with the FERC for the authority to build and operate the Empire Connector project to expand its natural gas pipeline operations to serve new markets in New York and elsewhere in the Northeast by extending the Empire Pipeline. The application also asked that Empire's existing business and facilities be brought under FERC jurisdiction, and that the FERC approve rates for Empire's existing and proposed services. The Empire Connector will provide an upstream supply link for the Millennium Pipeline, which began construction in June 2007, and will transport Canadian and other natural gas supplies to downstream customers. The Empire Connector is designed to move up to approximately 250 MDth of natural gas per day. On December 21, 2006, the FERC issued an order granting a Certificate of Public Convenience and Necessity authorizing the construction and operation of the Empire Connector and various other related pipeline projects by other unaffiliated companies, which has been accepted by Empire and the other applicants. In June 2007, Empire and KeySpan Gas East Corporation (KeySpan) executed a binding firm transportation service agreement for 150.75 MDth per day, obligating Empire to provide transportation service that will require construction of the Empire Connector project. Construction of the Empire Connector began in September 2007 and the planned in-service date is November 2008. Refer to the Rate and Regulatory Matters section that follows for further discussion of this matter. The forecasted expenditures for this project over the next two years are as follows: $122.9 million in 2008 and $34.4 million in 2009. These expenditures are included as Pipeline and Storage estimated capital expenditures in the table above. The total cost to the Company of the Empire Connector project is estimated at $177 million, after giving effect to sales tax exemptions worth approximately $3.7 million. The Company anticipates financing this project with cash on hand and/or through the use of the Company's lines of credit. As of September 30, 2007, the Company had incurred approximately $19.7 million in costs related to this project. Of this amount, $13.7 million, $2.0 million and $3.4 million were incurred during the years ended September 30, 2007, 2006 and 2005, respectively. During the quarter ended June 30, 2007, the Company reversed the reserve established for these costs, as discussed above under Results of Operations, following the execution of the KeySpan service agreement. As of September 30, 2007, all of the costs incurred to date related to this project have been capitalized as either Construction Work in Progress ($15.5 million) or Materials and Supplies Inventory ($4.2 million), as per the accounting guidance in the FERC's Uniform System of Accounts and SFAS 71.

Table of Contents

Supply Corporation continues to view its potential Tuscarora Extension project as an important link to Millennium and potential storage development in the Corning, New York area. This new pipeline, which would expand the Supply Corporation system from its Tuscarora storage field to the intersection of the proposed Millennium and Empire Connector pipelines, could be designed initially to transport up to approximately 130 MDth of natural gas per day. It may also provide Supply Corporation with the opportunity to increase the deliverability of the existing Tuscarora storage field. Supply Corporation is also developing a project to meet the results of an "Open Season" seeking customers for new capacity from the Rockies Express Project, Appalachian production, storage and other points to Leidy and to interconnections with Millennium and Empire at Corning. This new project (the "West to East Project") could include the Tuscarora Extension, or could be a second phase following the development of that project. The timeline of both of these projects depends on market development, and should the market mature, the Company anticipates financing the Tuscarora Extension with cash on hand and/or through the use of the Company's lines of credit. The capital cost of the West to East project could amount to $700 million, which would be financed by a combination of debt and equity. There have been no costs incurred by the Company related to either project as of September 30, 2007, and the forecasted expenditures for the Tuscarora Extension Project over the next three years are as follows: $0 in 2008, $34.0 million in 2009, and $15.0 million in 2010. These expenditures are included as Pipeline and Storage estimated capital expenditures in the table above. The Company has not yet forecast any expenditures for the West to East Project. The Company has not yet filed an application with the FERC for the authority to build either project.

Estimated capital expenditures in 2008 for the Exploration and Production segment include approximately $50.0 million for the Gulf Coast region ($48.0 million on the off-shore program in the Gulf of Mexico), $46.0 million for the West Coast region and $58.0 million for the Appalachian region.

Estimated capital expenditures in 2008 in the Timber segment will be concentrated on the purchase of new equipment, vehicles and improvements to facilities for this segment's lumber yard, sawmill and kiln operations.

The Company continuously evaluates capital expenditures and investments in corporations, partnerships and other business entities. The amounts are subject to modification for opportunities such as the acquisition of attractive oil and gas properties, timber or natural gas storage facilities and the expansion of natural gas transmission line capacities. While the majority of capital expenditures in the Utility segment are necessitated by the continued need for replacement and upgrading of mains and service lines, the magnitude of future capital expenditures or other investments in the Company's other business segments depends, to a large degree, upon market conditions.

FINANCING CASH FLOW

The Company did not have any outstanding short-term notes payable to banks or commercial paper at September 30, 2007. However, the Company continues to consider short-term debt (consisting of short-term notes payable to banks and commercial paper) an important source of cash for temporarily financing capital expenditures and investments in corporations and/or partnerships, gas-in-storage inventory, unrecovered purchased gas costs, margin calls on derivative financial instruments, exploration and development expenditures, repurchases of stock, and other working capital needs. Fluctuations in these items can have a significant impact on the amount and timing of short-term debt. As for bank loans, the Company maintains a number of individual uncommitted or discretionary lines of credit with certain financial institutions for general corporate purposes. Borrowings under these lines of credit are made at competitive market rates. These credit lines, which aggregate to $455.0 million, are revocable at the option of the financial institutions and are reviewed on an annual basis. The Company anticipates that these lines of credit will continue to be renewed, or replaced by similar lines. The total amount available to be issued under the Company's commercial paper program is $300.0 million. The commercial paper program is backed by a syndicated committed credit facility totaling $300.0 million that extends through September 30, 2010.

Under the Company's committed credit facility, the Company has agreed that its debt to capitalization ratio will not exceed .65 at the last day of any fiscal quarter from September 30, 2005 through September 30, 2010. At September 30, 2007, the Company's debt to capitalization ratio (as calculated under the facility) was .38. The constraints specified in the committed credit facility would permit an additional $2.02 billion in short-term

Table of Contents

and/or long-term debt to be outstanding (further limited by the indenture covenants discussed below) before the Company's debt to capitalization ratio would exceed .65. If a downgrade in any of the Company's credit ratings were to occur, access to the commercial paper markets might not be possible. However, the Company expects that it could borrow under its uncommitted bank lines of credit or rely upon other liquidity sources, including cash provided by operations.

Under the Company's existing indenture covenants, at September 30, 2007, the Company would have been permitted to issue up to a maximum of $1.4 billion in additional long-term unsecured indebtedness at then current market interest rates in addition to being able to issue new indebtedness to replace maturing debt. The Company's present liquidity position is believed to be adequate to satisfy known demands.

The Company's 1974 indenture, pursuant to which $399.0 million (or 40%) of the Company's long-term debt (as of September 30, 2007) was issued, contains a cross-default provision whereby the failure by the Company to perform certain obligations under other borrowing arrangements could trigger an obligation to repay the debt outstanding under the indenture. In particular, a repayment obligation could be triggered if the Company fails (i) to pay any scheduled principal or interest on any debt under any other indenture or agreement or (ii) to perform any other term in any other such indenture or agreement, and the effect of the failure causes, or would permit the holders of the debt to cause, the debt under such indenture or agreement to become due prior to its stated maturity, unless cured or waived.

The Company's $300.0 million committed credit facility also contains a cross-default provision whereby the failure by the Company or its significant subsidiaries to make payments under other borrowing arrangements, or the occurrence of certain events affecting those other borrowing arrangements, could trigger an obligation to repay any amounts outstanding under the committed credit facility. In particular, a repayment obligation could be triggered if (i) the Company or any of its significant subsidiaries fail to make a payment when due of any principal or interest on any other indebtedness aggregating $20.0 million or more or (ii) an event occurs that causes, or would permit the holders of any other indebtedness aggregating $20.0 million or more to cause, such indebtedness to become due prior to its stated maturity. As of September 30, 2007, the Company had no debt outstanding under the committed credit facility.

The Company's embedded cost of long-term debt was 6.4% at both September 30, 2007 and September 30, 2006. Refer to "Interest Rate Risk" in this Item for a more detailed breakdown of the Company's embedded cost of long-term debt.

The Company has an effective registration statement on file with the SEC under which it has available capacity to issue an additional $550.0 million of debt and equity securities under the Securities Act of 1933. The Company may sell all or a portion of these securities if warranted by market conditions and the Company's capital requirements. Any offer and sale of these securities will be made only by means of a prospectus meeting the requirements of the Securities Act of 1933 and the rules and regulations thereunder.

The amounts and timing of the issuance and sale of debt or equity securities will depend on market conditions, indenture requirements, regulatory authorizations and the capital requirements of the Company.

On April 30, 2007, the Company redeemed $96.3 million of 6.5% unsecured notes, plus accrued interest. These notes were redeemable by the Company at par at any time after September 15, 2006. On December 8, 2006, the Company repaid $22.8 million of Empire's secured debt. Such amount was classified as Current Portion of Long-Term Debt on the Company's Consolidated Balance Sheet at September 30, 2006.

On December 8, 2005, the Company's Board of Directors authorized the Company to implement a share repurchase program, whereby the Company may repurchase outstanding shares of common stock, up to an aggregate amount of 8 million shares in the open market or through privately negotiated transactions. As of September 30, 2007, the Company has repurchased 3,834,878 shares for $133.2 million under this program, including 1,308,328 shares for $48.1 million during fiscal 2007. These share repurchases were funded with cash provided by operating activities and/or through the use of the Company's lines of credit. In the future, it is expected that this share repurchase program will continue to be funded with cash provided by operating activities and/or through the use of the Company's lines of credit. It is expected that open market repurchases will continue from time to time depending on market conditions.

Table of Contents

OFF-BALANCE SHEET ARRANGEMENTS

The Company has entered into certain off-balance sheet financing arrangements. These financing arrangements are primarily operating and capital leases. The Company's consolidated subsidiaries have operating leases, the majority of which are with the Utility and the Pipeline and Storage segments, having a remaining lease commitment of approximately $35.5 million. These leases have been entered into for the use of buildings, vehicles, construction tools, meters and other items and are accounted for as operating leases. The Company's unconsolidated subsidiaries, which are accounted for under the equity method, have capital leases of electric generating equipment having a remaining lease commitment of approximately $4.8 million. The Company has guaranteed 50%, or $2.4 million, of these capital lease commitments.

CONTRACTUAL OBLIGATIONS

The following table summarizes the Company's expected future contractual cash obligations as of September 30, 2007, and the twelve-month periods over which they occur:

	Payments by Expected Maturity Dates						
	2008	2009	2010	2011	2012	Thereafter	Total
				(Millions)			
Long-Term Debt, including interest expense(1)	$ 259.8	$ 148.4	$ 45.5	$ 232.7	$ 171.8	$ 439.3	$ 1,297.5
Operating Lease Obligations	$ 6.7	$ 5.8	$ 4.4	$ 2.9	$ 2.6	$ 13.1	$ 35.5
Capital Lease Obligations	$ 0.9	$ 0.5	$ 0.4	$ 0.4	$ 0.2	$ —	$ 2.4
Purchase Obligations:							
Gas Purchase Contracts(2)	$ 718.1	$ 67.2	$ 7.1	$ 2.8	$ 2.8	$ 16.2	$ 814.2
Transportation and Storage Contracts	$ 48.4	$ 47.3	$ 43.7	$ 19.3	$ 6.0	$ 7.1	$ 171.8
Empire Connector Project Obligations(3)	$ 118.3	$ 0.6	$ —	$ —	$ —	$ —	$ 118.9
Other	$ 20.5	$ 9.6	$ 6.0	$ 4.2	$ 3.7	$ 14.2	$ 58.2

(1) Refer to Note E — Capitalization and Short-Term Borrowings, as well as the table under Interest Rate Risk in the Market Risk Sensitive Instruments section below, for the amounts excluding interest expense.

(2) Gas prices are variable based on the NYMEX prices adjusted for basis.

(3) The Empire Connector is scheduled to be placed in service by November 2008, at an estimated cost of $177 million. The Company has only committed itself to $118.9 million for the project at September 30, 2007.

The Company has made certain other guarantees on behalf of its subsidiaries. The guarantees relate primarily to: (i) obligations under derivative financial instruments, which are included on the consolidated balance sheet in accordance with SFAS 133 (see Item 7, MD&A under the heading "Critical Accounting Estimates — Accounting for Derivative Financial Instruments"); (ii) NFR obligations to purchase gas or to purchase gas transportation/storage services where the amounts due on those obligations each month are included on the consolidated balance sheet as a current liability; and (iii) other obligations which are reflected on the consolidated balance sheet. The Company believes that the likelihood it would be required to make payments under the guarantees is remote, and therefore has not included them in the table above.

OTHER MATTERS

In addition to the legal proceedings disclosed in Item 3 of this report, the Company is involved in other litigation and regulatory matters arising in the normal course of business. These other matters may include, for example, negligence claims and tax, regulatory or other governmental audits, inspections, investigations or other proceedings. These matters may involve state and federal taxes, safety, compliance with regulations, rate base, cost of service and purchased gas cost issues, among other things. While these normal-course matters could have a material effect on earnings and cash flows in the period in which they are resolved, they are not

Table of Contents

expected to change materially the Company's present liquidity position, nor to have a material adverse effect on the financial condition of the Company.

The Company has a tax-qualified, noncontributory defined-benefit retirement plan (Retirement Plan) that covers approximately 73% of the Company's employees. The Company has been making contributions to the Retirement Plan over the last several years and anticipates that it will continue making contributions to the Retirement Plan. During 2007, the Company contributed $24.9 million to the Retirement Plan. The Company anticipates that the annual contribution to the Retirement Plan in 2008 will be in the range of $15.0 million to $20.0 million. The Company expects that all subsidiaries having domestic employees covered by the Retirement Plan will make contributions to the Retirement Plan. The funding of such contributions will come from amounts collected in rates in the Utility and Pipeline and Storage segments or through short-term borrowings or through cash from operations.

The Company provides health care and life insurance benefits for a majority of its retired employees under a post-retirement benefit plan (Post-Retirement Plan). The Company has been making contributions to the Post-Retirement Plan over the last several years and anticipates that it will continue making contributions to the Post-Retirement Plan. During 2007, the Company contributed $42.3 million to the Post-Retirement Plan. The Company anticipates that the annual contribution to the Post-Retirement Plan in 2008 will be in the range of $25.0 million to $35.0 million. The funding of such contributions will come from amounts collected in rates in the Utility and Pipeline and Storage segments.

A capital loss carryover which existed at September 30, 2006, was fully utilized in 2007 in connection with the gain recognized on the sale of SECI.

MARKET RISK SENSITIVE INSTRUMENTS

Energy Commodity Price Risk

The Company, in its Exploration and Production segment, Energy Marketing segment, Pipeline and Storage segment, and All Other category, uses various derivative financial instruments (derivatives), including price swap agreements, no cost collars and futures contracts, as part of the Company's overall energy commodity price risk management strategy. Under this strategy, the Company manages a portion of the market risk associated with fluctuations in the price of natural gas and crude oil, thereby attempting to provide more stability to operating results. The Company has operating procedures in place that are administered by experienced management to monitor compliance with the Company's risk management policies. The derivatives are not held for trading purposes. The fair value of these derivatives, as shown below, represents the amount that the Company would receive from or pay to the respective counterparties at September 30, 2007 to terminate the derivatives. However, the tables below and the fair value that is disclosed do not consider the physical side of the natural gas and crude oil transactions that are related to the financial instruments.

The following tables disclose natural gas and crude oil price swap information by expected maturity dates for agreements in which the Company receives a fixed price in exchange for paying a variable price as quoted in various national natural gas publications or on the NYMEX. Notional amounts (quantities) are used to calculate the contractual payments to be exchanged under the contract. The weighted average variable prices represent the weighted average settlement prices by expected maturity date as of September 30, 2007. At September 30, 2007, the Company had not entered into any natural gas or crude oil price swap agreements extending beyond 2009.

Natural Gas Price Swap Agreements

	Expected Maturity Dates		
	2008	**2009**	**Total**
Notional Quantities (Equivalent Bcf)	12.2	1.0	13.2
Weighted Average Fixed Rate (per Mcf)	$ 8.15	$ 8.82	$ 8.20
Weighted Average Variable Rate (per Mcf)	$ 7.77	$ 9.08	$ 7.86

Table of Contents

Crude Oil Price Swap Agreements

	Expected Maturity Dates 2008	2009	Total
Notional Quantities (Equivalent bbls)	1,305,000	180,000	1,485,000
Weighted Average Fixed Rate (per bbl)	$ 57.72	$ 54.70	$ 57.35
Weighted Average Variable Rate (per bbl)	$ 78.69	$ 74.31	$ 78.16

At September 30, 2007, the Company would have received from its respective counterparties an aggregate of approximately $2.8 million to terminate the natural gas price swap agreements outstanding at that date. The Company would have had to pay an aggregate of approximately $11.2 million to its counterparties to terminate the crude oil price swap agreements outstanding at September 30, 2007.

At September 30, 2006, the Company had natural gas price swap agreements covering 7.4 Bcf at a weighted average fixed rate of $7.24 per Mcf. The Company also had crude oil price swap agreements covering 900,000 bbls at a weighted average fixed rate of $37.13 per bbl. The increase in natural gas price swap agreements from September 2006 to September 2007 is largely attributable to management's decision to utilize fewer collars and more swaps. This decision was as a result of market conditions being less conducive to using collars than they were in the prior year. The increase in crude oil price swap agreements is primarily due to an increased availability of counterparties willing to enter into new swap agreements with terms that match the delivery points of its West Coast crude oil production.

The following table discloses the notional quantities, the weighted average ceiling price and the weighted average floor price for the no cost collars used by the Company to manage natural gas price risk. The no cost collars provide for the Company to receive monthly payments from (or make payments to) other parties when a variable price falls below an established floor price (the Company receives payment from the counterparty) or exceeds an established ceiling price (the Company pays the counterparty). At September 30, 2007, the Company had not entered into any natural gas or crude oil no cost collars extending beyond 2008.

No Cost Collars

	Expected Maturity Date 2008
Natural Gas	
Notional Quantities (Equivalent Bcf)	1.4
Weighted Average Ceiling Price (per Mcf)	$ 16.45
Weighted Average Floor Price (per Mcf)	$ 8.83

At September 30, 2007, the Company would have received an aggregate of approximately $1.9 million to terminate the natural gas no cost collars outstanding at that date.

At September 30, 2006, the Company had natural gas no cost collars covering 7.1 Bcf at a weighted average floor price of $8.26 per Mcf and a weighted average ceiling price of $17.25 per Mcf. The Company also had crude oil no cost collars covering 180,000 bbls at a weighted average floor price of $70.00 per bbl and a weighted average ceiling price of $77.00 per bbl at September 30, 2006. The decrease in natural gas collars from September 2006 to September 2007 is due to management's decision to utilize fewer collars and more swaps. This is due to the market conditions discussed in the Swap Agreements section.

Table of Contents

The following table discloses the net contract volumes purchased (sold), weighted average contract prices and weighted average settlement prices by expected maturity date for futures contracts used to manage natural gas price risk. At September 30, 2007, the Company held no futures contracts with maturity dates extending beyond 2012.

Futures Contracts

	Expected Maturity Dates					
	2008	2009	2010	2011	2012	Total
Net Contract Volumes Purchased (Sold) (Equivalent Bcf)	2.9	(0.1)	—	—(1)	—(1)	2.8
Weighted Average Contract Price (per Mcf)	$ 9.08	$ 9.50	NA	$ 6.99	$ 8.68	$ 9.11
Weighted Average Settlement Price (per Mcf)	$ 8.94	$ 9.13	NA	$ 6.31	$ 9.00	$ 8.96

(1) The Energy Marketing segment has purchased 4 and 6 futures contracts (1 contract = 2,500 Dth) for 2011 and 2012, respectively.

At September 30, 2007, the Company would have received $2.2 million to terminate these futures contracts.

At September 30, 2006, the Company had futures contracts covering 7.0 Bcf (net long position) at a weighted average contract price of $9.67 per Mcf.

The decrease in net long positions at September 30, 2007 as compared to September 30, 2006 is attributed to fewer customers entering into fixed price sales commitments at September 30, 2007 as compared to September 30, 2006. Management believes this is due to the lack of a significant decrease in natural gas prices at the end of 2007 as compared to 2006, sufficient natural gas in storage throughout the United States, and forecasts for a mild winter. As a result, the Energy Marketing segment had purchased fewer futures contracts as of September 30, 2007 as compared to September 30, 2006 to hedge against a lower number of fixed price sales commitments.

The Company may be exposed to credit risk on some of the derivatives disclosed above. Credit risk relates to the risk of loss that the Company would incur as a result of nonperformance by counterparties pursuant to the terms of their contractual obligations. To mitigate such credit risk, management performs a credit check and then, on an ongoing basis, monitors counterparty credit exposure. Management has obtained guarantees from many of the parent companies of the respective counterparties to its derivatives. At September 30, 2007, the Company used nine counterparties for its over-the-counter derivatives. At September 30, 2007, no individual counterparty represented greater than 32% of total credit risk (measured as volumes hedged by an individual counterparty as a percentage of the Company's total volumes hedged). All of the counterparties (or the parent of the counterparty) were rated as investment grade entities at September 30, 2007.

Exchange Rate Risk

The Exploration and Production segment's investment in Canada was valued in Canadian dollars, and, as such, this investment was subject to currency exchange risk when the Canadian dollars are translated into U.S. dollars. This exchange rate risk to the Company's investment in Canada resulted in increases or decreases to the CTA, a component of Accumulated Other Comprehensive Income (Loss) on the Consolidated Balance Sheets. When the foreign currency increased in value in relation to the U.S. dollar, there was a positive adjustment to CTA. When the foreign currency decreased in value in relation to the U.S. dollar, there was a negative adjustment to CTA. In August 2007, the Exploration and Production segment's investment in Canada was sold, eliminating the Company's major foreign operations. Of the $232.1 million in net proceeds received, $58.0 million was placed in escrow (denominated in Canadian dollars) pending receipt of a tax clearance certificate from the Canadian government. To hedge against foreign currency exchange risk, the Company entered into a $58.0 million forward contract to sell Canadian dollars. At September 30, 2007, due to the increase in the strength of the Canadian dollar versus the U.S. dollar, the Company had a $2.7 million derivative

Table of Contents

liability related to the collar. The Company records gains or losses associated with this forward contract directly to the income statement.

Interest Rate Risk

On December 8, 2006, the Company repaid $22.8 million of Empire's secured debt. The interest costs of this secured debt were hedged by an interest rate collar. Since the hedged transaction was settled and there will be no future cash flows associated with the secured debt, hedge accounting for the interest rate collar was discontinued and the unrealized gain in accumulated other comprehensive income associated with the interest rate collar was reclassified to the Consolidated Statement of Income.

The following table presents the principal cash repayments and related weighted average interest rates by expected maturity date for the Company's long-term fixed rate debt as well as the other long-term debt of certain of the Company's subsidiaries. The interest rates for the variable rate debt are based on those in effect at September 30, 2007:

	Principal Amounts by Expected Maturity Dates						
	2008	2009	2010	2011	2012	Thereafter	Total
	(Dollars in millions)						
Long-Term Fixed Rate Debt	$ 200.0(1)	$ 100.0	$ —	$ 200.0	$ 150.0	$ 349.0	$ 999.0
Weighted Average Interest Rate Paid	6.3%	6.0%	—	7.5%	6.7%	5.9%	6.4%
Fair Value = $1,024.4							

(1) These notes have been classified as Current Portion of Long-Term Debt on the Company's Consolidated Balance Sheet.

RATE AND REGULATORY MATTERS

Utility Operation

Base rate adjustments in both the New York and Pennsylvania jurisdictions do not reflect the recovery of purchased gas costs. Such costs are recovered through operation of the purchased gas adjustment clauses of the appropriate regulatory authorities.

New York Jurisdiction

On August 27, 2004, Distribution Corporation commenced a rate case by filing proposed tariff amendments and supporting testimony requesting approval to increase its annual revenues beginning October 1, 2004. Various parties opposed the filing. On April 15, 2005, Distribution Corporation, the parties and others executed an agreement settling all outstanding issues. In an order issued July 22, 2005, the NYPSC approved the April 15, 2005 rate agreement, substantially as filed, for an effective date of August 1, 2005. The rate agreement provided for a rate increase of $21 million by means of the elimination of bill credits ($5.8 million) and an increase in base rates ($15.2 million). For the two-year term of the agreement and until new rates should go into effect, the return on equity level above which earnings must be shared with rate payers is 11.5%.

On January 29, 2007, Distribution Corporation commenced a rate case by filing proposed tariff amendments and supporting testimony requesting approval to increase its annual revenues by $52.0 million. Following standard procedure, the NYPSC suspended the proposed tariff amendments to enable its staff and intervenors to conduct a routine investigation and hold hearings. Distribution Corporation explained in the filing that its request for rate relief is necessitated by decreased revenues resulting from customer conservation efforts and increased customer uncollectibles, among other things. The rate filing also includes a proposal for an aggressive efficiency and conservation initiative with a revenue decoupling mechanism designed to render the Company indifferent to throughput reductions resulting from conservation. On September 20, 2007, the NYPSC issued an order approving, with modifications, the Company's conservation program for implementation on an accelerated basis. Associated ratemaking issues, however, were reserved for consideration in the rate case. On September 28, 2007, an administrative law judge assigned to the proceeding issued a

Table of Contents

recommended decision (RD) based on a review and analysis of the evidence presented in the case. The RD recommends a rate increase designed to provide additional annual revenues of $2.5 million, together with a bill surcharge that would collect up to $10.8 million to recover expenses arising from the conservation program. The recommended cost of equity, subject to updates, is 9.4%. The RD also recommends approval of the unopposed revenue decoupling mechanism. The NYPSC is not bound to accept the RD, and may accept, reject or modify the Company's filing. Assuming standard procedure, rates would become effective in late December 2007. The outcome of the proceeding cannot be ascertained at this time.

Pennsylvania Jurisdiction

On June 1, 2006, Distribution Corporation filed proposed tariff amendments with PaPUC to increase annual revenues by $25.9 million to cover increases in the cost of service to be effective July 30, 2006. The rate request was filed to address increased costs associated with Distribution Corporation's ongoing construction program as well as increases in operating costs, particularly uncollectible accounts. Following standard regulatory procedure, the PaPUC issued an order on July 20, 2006 instituting a rate proceeding and suspending the proposed tariff amendments until March 2, 2007. On October 2, 2006, the parties, including Distribution Corporation, Staff of the PaPUC and intervenors, executed an agreement (Settlement) proposing to settle all issues in the rate proceeding. The Settlement includes an increase in annual revenues of $14.3 million to non-gas revenues, an agreement not to file a rate case until January 28, 2008 at the earliest and an early implementation date. The Settlement was approved by the PaPUC at its meeting on November 30, 2006, and the new rates became effective January 1, 2007.

On June 8, 2006, the NTSB issued safety recommendations to Distribution Corporation, the PaPUC and certain other parties as a result of an investigation of a natural gas explosion that occurred on Distribution Corporation's system in Dubois, Pennsylvania in August 2004. The explosion destroyed a residence, resulting in the death of two people who lived there, and damaged a number of other houses in the immediate vicinity. Without admitting liability, Distribution Corporation settled all significant third-party claims against it related to the explosion.

The NTSB's safety recommendations to Distribution Corporation involved revisions to its butt-fusion procedures for joining plastic pipe, and revisions to its procedures for qualifying personnel who perform plastic fusions. Although not required by law to do so, Distribution Corporation implemented those recommendations. In December 2006, the NTSB classified its recommendations as "closed" after determining that Distribution Corporation took acceptable action with respect to the recommendations.

The NTSB's recommendation to the PaPUC was to require an analysis of the integrity of butt-fusion joints in Distribution Corporation's system and replacement of those joints that are determined to have unacceptable characteristics. Distribution Corporation has worked cooperatively with the Staff of the PaPUC to permit the PaPUC to undertake the analysis recommended by the NTSB.

In late November 2007, Distribution Corporation reached a Settlement Agreement with the Law Bureau Prosecutory Staff of the PaPUC (the "Law Bureau") regarding the explosion and the PaPUC's subsequent investigation. The Law Bureau and Distribution Corporation will jointly submit this Settlement Agreement to the PaPUC for approval. In the Settlement Agreement, Distribution Corporation agrees, without admitting liability, to pay a $50,000 fine and to fund an additional $30,000 of safety-related activities. Distribution Corporation also agrees to make various improvements to its butt-fusion procedures and to implement a program to review existing butt-fusions.

Pipeline and Storage

Supply Corporation currently does not have a rate case on file with the FERC. The rate settlement approved by the FERC on February 9, 2007 requires Supply Corporation to make a general rate filing to be effective December 1, 2011, and bars Supply Corporation from making a general rate filing before then, with some exceptions specified in the settlement.

Table of Contents

Empire currently does not have a rate case on file with the NYPSC. Among the issues resolved in connection with Empire's FERC application to build the Empire Connector are the rates and terms of service that will become applicable to all of Empire's business, effective upon Empire constructing and placing its new facilities into service (currently expected for November 2008). At that time, Empire will become an interstate pipeline subject to FERC regulation. The order described in the following paragraph requires Empire to make a filing at FERC within three years after the in-service date justifying Empire's existing recourse rates or proposing alternative rates.

The FERC issued on December 21, 2006 an order granting a Certificate of Public Convenience and Necessity authorizing the construction and operation of the Empire Connector and various other related pipeline projects by other unaffiliated companies. The Empire Certificate contains various environmental and other conditions. Empire has accepted that Certificate. Additional environmental permits from the U.S. Army Corps of Engineers and state environmental agencies have been received. Empire has also received, from all six upstate New York counties in which it would build the Empire Connector project, final approval of sales tax exemptions and temporary partial property tax abatements necessary to enable the Empire Connector to generate a fair return. In June 2007, Empire signed a firm transportation service agreement with KeySpan Gas East Corporation, under which Empire is obligated to provide transportation service that will require construction of this project. Construction began in September 2007 and is planned to be complete by November 1, 2008.

ENVIRONMENTAL MATTERS

The Company is subject to various federal, state and local laws and regulations relating to the protection of the environment. The Company has established procedures for the ongoing evaluation of its operations to identify potential environmental exposures and comply with regulatory policies and procedures. It is the Company's policy to accrue estimated environmental clean-up costs (investigation and remediation) when such amounts can reasonably be estimated and it is probable that the Company will be required to incur such costs. At September 30, 2007, the Company has estimated its remaining clean-up costs related to former manufactured gas plant sites and third party waste disposal sites will be in the range of $12.1 million to $15.8 million. The minimum estimated liability of $12.1 million has been recorded on the Consolidated Balance Sheet at September 30, 2007. The Company expects to recover its environmental clean-up costs from a combination of rate recovery and insurance proceeds. Other than discussed in Note H (referred to below), the Company is currently not aware of any material additional exposure to environmental liabilities. However, adverse changes in environmental regulations or other factors could impact the Company.

For further discussion refer to Item 8 at Note H — Commitments and Contingencies under the heading "Environmental Matters."

NEW ACCOUNTING PRONOUNCEMENTS

In June 2006, the FASB issued FIN 48. FIN 48 clarifies the accounting for income taxes by prescribing a minimum probability threshold that a tax position must meet before a financial statement benefit is recognized. The minimum threshold is defined in FIN 48 as a tax position that is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation processes, based on the technical merits of the position. If a tax benefit meets this threshold, it is measured and recognized based on an analysis of the cumulative probability of the tax benefit being ultimately sustained. The cumulative effect of applying FIN 48 at adoption, if any, is reported as an adjustment to opening retained earnings for the year of adoption. FIN 48 is effective for the first quarter of the Company's 2008 fiscal year and it is expected that this pronouncement will not have a material effect on the Company's consolidated financial statements.

In September 2006, the FASB issued SFAS 157. SFAS 157 provides guidance for using fair value to measure assets and liabilities. The pronouncement serves to clarify the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect that fair-value measurements have on earnings. The Company is currently evaluating the impact that the adoption of SFAS 157 will have on its consolidated financial statements. SFAS 157 is to be applied whenever another standard requires or allows assets

Table of Contents

or liabilities to be measured at fair value. The pronouncement will be effective as of the Company's first quarter of fiscal 2009. The Company is currently evaluating the impact that the adoption of SFAS 157 will have on its consolidated financial statements.

In September 2006, the FASB issued SFAS 158, an amendment of SFAS 87, SFAS 88, SFAS 106, and SFAS 132R. SFAS 158 requires that companies recognize a net liability or asset to report the underfunded or overfunded status of their defined benefit pension and other post-retirement benefit plans on their balance sheets, as well as recognize changes in the funded status of a defined benefit post-retirement plan in the year in which the changes occur through comprehensive income. The pronouncement also specifies that a plan's assets and obligations that determine its funded status be measured as of the end of Company's fiscal year, with limited exceptions. Under SFAS 158, certain previously unrecognized actuarial gains and losses and previously unrecognized prior service costs for both the pension and other post-retirement benefit plans as well as a previously unrecognized transition obligation for the other post-retirement benefit plan are required to be recognized. These amounts were not required to be recorded on the Company's Consolidated Balance Sheet before the adoption of SFAS 158, but were instead amortized over a period of time. In accordance with SFAS 158, the Company has recognized the funded status of its benefit plans and implemented the disclosure requirements of SFAS 158 at September 30, 2007. The requirement to measure the plan assets and benefit obligations as of the Company's fiscal year-end date will be adopted by the Company by the end of fiscal 2009. Currently, the Company measures its plan assets and benefit obligations using a June 30th measurement date. At September 30, 2007, in order to recognize the funded status of its pension and post-retirement benefit plans in accordance with SFAS 158, the Company recorded additional liabilities or reduced assets by a cumulative amount of $78.7 million ($71.1 million net of deferred tax benefits recognized for the portion recorded as an increase to Accumulated Other Comprehensive Loss). Of the $71.1 million recognized, $61.9 million was recorded as an increase to Other Regulatory Assets in the Company's Utility and Pipeline and Storage segments, $12.5 million (net of deferred tax benefits of $7.6 million) was recorded as an increase to Accumulated Other Comprehensive Loss, and $3.3 million was recorded as an increase to Other Regulatory Liabilities in the Company's Utility segment. The Company has recorded amounts to Other Regulatory Assets or Other Regulatory Liabilities in the Utility and Pipeline and Storage segments in accordance with the provisions of SFAS 71. The Company, in those segments, has certain regulatory commission authorizations, which allow the Company to defer as a regulatory asset or liability the difference between pension and post-retirement benefit costs as calculated in accordance with SFAS 87 and SFAS 106 and what is collected in rates. Refer to Item 8 at Note G — Retirement Plan and Other Post-Retirement Benefits for further disclosures regarding the impact of SFAS 158 on the Company's consolidated financial statements.

In February 2007, the FASB issued SFAS 159. SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not otherwise required to be measured at fair value under GAAP. A company that elects the fair value option for an eligible item will be required to recognize in current earnings any changes in that item's fair value in reporting periods subsequent to the date of adoption. SFAS 159 will be effective as of the Company's first quarter of fiscal 2009. The Company is currently evaluating the impact, if any, that the adoption of SFAS 159 will have on its consolidated financial statements.

EFFECTS OF INFLATION

Although the rate of inflation has been relatively low over the past few years, the Company's operations remain sensitive to increases in the rate of inflation because of its capital spending and the regulated nature of a significant portion of its business.

SAFE HARBOR FOR FORWARD-LOOKING STATEMENTS

The Company is including the following cautionary statement in this Form 10-K to make applicable and take advantage of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 for any forward-looking statements made by, or on behalf of, the Company. Forward-looking statements include statements concerning plans, objectives, goals, projections, strategies, future events or performance, and underlying assumptions and other statements which are other than statements of historical facts. From time to time, the Company may publish or otherwise make available forward-looking statements of this nature. All such

Table of Contents

subsequent forward-looking statements, whether written or oral and whether made by or on behalf of the Company, are also expressly qualified by these cautionary statements. Certain statements contained in this report, including, without limitation, statements regarding future prospects, plans, performance and capital structure, anticipated capital expenditures, completion of construction projects, projections for pension and other post-retirement benefit obligations, impacts of the adoption of new accounting rules, and possible outcomes of litigation or regulatory proceedings, as well as statements that are identified by the use of the words "anticipates," "estimates," "expects," "forecasts," "intends," "plans," "predicts," "projects," "believes," "seeks," "will" and "may" and similar expressions, are "forward-looking" statements as defined in the Private Securities Litigation Reform Act of 1995 and accordingly involve risks and uncertainties which could cause actual results or outcomes to differ materially from those expressed in the forward-looking statements. The forward-looking statements contained herein are based on various assumptions, many of which are based, in turn, upon further assumptions. The Company's expectations, beliefs and projections are expressed in good faith and are believed by the Company to have a reasonable basis, including, without limitation, management's examination of historical operating trends, data contained in the Company's records and other data available from third parties, but there can be no assurance that management's expectations, beliefs or projections will result or be achieved or accomplished. In addition to other factors and matters discussed elsewhere herein, the following are important factors that, in the view of the Company, could cause actual results to differ materially from those discussed in the forward-looking statements:

1. Changes in economic conditions, including economic disruptions caused by terrorist activities, acts of war or major accidents;
2. Changes in demographic patterns and weather conditions, including the occurrence of severe weather such as hurricanes;
3. Changes in the availability and/or price of natural gas or oil and the effect of such changes on the accounting treatment of derivative financial instruments or the valuation of the Company's natural gas and oil reserves;
4. Uncertainty of oil and gas reserve estimates;
5. Ability to successfully identify, drill for and produce economically viable natural gas and oil reserves;
6. Significant changes from expectations in the Company's actual production levels for natural gas or oil;
7. Changes in the availability and/or price of derivative financial instruments;
8. Changes in the price differentials between various types of oil;
9. Inability to obtain new customers or retain existing ones;
10. Significant changes in competitive factors affecting the Company;
11. Changes in laws and regulations to which the Company is subject, including changes in tax, environmental, safety and employment laws and regulations;
12. Governmental/regulatory actions, initiatives and proceedings, including those involving acquisitions, financings, rate cases (which address, among other things, allowed rates of return, rate design and retained gas), affiliate relationships, industry structure, franchise renewal, and environmental/safety requirements;
13. Unanticipated impacts of restructuring initiatives in the natural gas and electric industries;
14. Significant changes from expectations in actual capital expenditures and operating expenses and unanticipated project delays or changes in project costs or plans;
15. The nature and projected profitability of pending and potential projects and other investments, and the ability to obtain necessary governmental approvals and permits;
16. Occurrences affecting the Company's ability to obtain funds from operations, from borrowings under our credit lines or other credit facilities or from issuances of other short-term notes or debt or equity securities to finance needed capital expenditures and other investments, including any downgrades in the Company's credit ratings;
17. Ability to successfully identify and finance acquisitions or other investments and ability to operate and integrate existing and any subsequently acquired business or properties;

Table of Contents

18. Impairments under the SEC's full cost ceiling test for natural gas and oil reserves;
19. Significant changes in tax rates or policies or in rates of inflation or interest;
20. Significant changes in the Company's relationship with its employees or contractors and the potential adverse effects if labor disputes, grievances or shortages were to occur;
21. Changes in accounting principles or the application of such principles to the Company;
22. The cost and effects of legal and administrative claims against the Company;
23. Changes in actuarial assumptions and the return on assets with respect to the Company's retirement plan and post-retirement benefit plans;
24. Increasing health care costs and the resulting effect on health insurance premiums and on the obligation to provide post-retirement benefits; or
25. Increasing costs of insurance, changes in coverage and the ability to obtain insurance.

The Company disclaims any obligation to update any forward-looking statements to reflect events or circumstances after the date hereof.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of National Fuel Gas Company:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of National Fuel Gas Company and its subsidiaries at September 30, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2007 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2007, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in "Management's Report on Internal Control Over Financial Reporting" appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note A — Summary of Significant Accounting Policies

Principles of Consolidation

The Company consolidates its majority owned entities. The equity method is used to account for minority owned entities. All significant intercompany balances and transactions are eliminated. The Company uses proportionate consolidation when accounting for drilling arrangements related to oil and gas producing properties accounted for under the full cost method of accounting.

The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Reclassification

Certain prior year amounts have been reclassified to conform with current year presentation.

Regulation

The Company is subject to regulation by certain state and federal authorities. The Company has accounting policies which conform to GAAP, as applied to regulated enterprises, and are in accordance with the accounting requirements and ratemaking practices of the regulatory authorities. Reference is made to Note C — Regulatory Matters for further discussion.

Revenues

The Company's Utility segment records revenue as bills are rendered, except that service supplied but not billed is reported as unbilled utility revenue and is included in operating revenues for the year in which service is furnished.

The Company's Energy Marketing segment records revenue as bills are rendered for service supplied on a calendar month basis.

The Company's Pipeline and Storage segment records revenue for natural gas transportation and storage services. Revenue from reservation charges on firm contracted capacity is recognized through equal monthly charges over the contract period regardless of the amount of gas that is transported or stored. Commodity charges on firm contracted capacity and interruptible contracts are recognized as revenue when physical deliveries of natural gas are made at the agreed upon delivery point or when gas is injected or withdrawn from the storage field. The point of delivery into the pipeline or injection or withdrawal from storage is the point at which ownership and risk of loss transfers to the buyer of such transportation and storage services.

The Company's Timber segment records revenue on lumber and log sales as products are shipped, which is the point at which ownership and risk of loss transfers to the buyer of lumber products or logs.

The Company's Exploration and Production segment records revenue based on entitlement, which means that revenue is recorded based on the actual amount of gas or oil that is delivered to a pipeline and the Company's ownership interest in the producing well. If a production imbalance occurs between what was supposed to be delivered to a pipeline and what was actually produced and delivered, the Company accrues the difference as an imbalance.

Allowance for Uncollectible Accounts

The allowance for uncollectible accounts is the Company's best estimate of the amount of probable credit losses in the existing accounts receivable. The allowance is determined based on historical experience, the age

Table of Contents

and other specific information about customer accounts. Account balances are charged off against the allowance twelve months after the account is final billed or when it is anticipated that the receivable will not be recovered.

Regulatory Mechanisms

The Company's rate schedules in the Utility segment contain clauses that permit adjustment of revenues to reflect price changes from the cost of purchased gas included in base rates. Differences between amounts currently recoverable and actual adjustment clause revenues, as well as other price changes and pipeline and storage company refunds not yet includable in adjustment clause rates, are deferred and accounted for as either unrecovered purchased gas costs or amounts payable to customers. Such amounts are generally recovered from (or passed back to) customers during the following fiscal year.

Estimated refund liabilities to ratepayers represent management's current estimate of such refunds. Reference is made to Note C — Regulatory Matters for further discussion.

The impact of weather on revenues in the Utility segment's New York rate jurisdiction is tempered by a WNC, which covers the eight-month period from October through May. The WNC is designed to adjust the rates of retail customers to reflect the impact of deviations from normal weather. Weather that is more than 2.2% warmer than normal results in a surcharge being added to customers' current bills, while weather that is more than 2.2% colder than normal results in a refund being credited to customers' current bills. Since the Utility segment's Pennsylvania rate jurisdiction does not have a WNC, weather variations have a direct impact on the Pennsylvania rate jurisdiction's revenues.

In the Pipeline and Storage segment, the allowed rates that Supply Corporation bills its customers are based on a straight fixed-variable rate design, which allows recovery of all fixed costs in fixed monthly reservation charges. The allowed rates that Empire bills its customers are based on a modified-fixed variable rate design, which allows recovery of most fixed costs in fixed monthly reservation charges. To distinguish between the two rate designs, the modified fixed-variable rate design recovers return on equity and income taxes through variable charges whereas straight fixed-variable recovers all fixed costs, including return on equity and income taxes, through its monthly reservation charge. Because of the difference in rate design, changes in throughput due to weather variations do not have a significant impact on Supply Corporation's revenues but may have a significant impact on Empire's revenues.

Property, Plant and Equipment

The principal assets of the Utility and Pipeline and Storage segments, consisting primarily of gas plant in service, are recorded at the historical cost when originally devoted to service in the regulated businesses, as required by regulatory authorities.

In the Company's Exploration and Production segment, oil and gas property acquisition, exploration and development costs are capitalized under the full cost method of accounting. Under this methodology, all costs associated with property acquisition, exploration and development activities are capitalized, including internal costs directly identified with acquisition, exploration and development activities. The internal costs that are capitalized do not include any costs related to production, general corporate overhead, or similar activities. The Company does not recognize any gain or loss on the sale or other disposition of oil and gas properties unless the gain or loss would significantly alter the relationship between capitalized costs and proved reserves of oil and gas attributable to a cost center.

Capitalized costs include costs related to unproved properties, which are excluded from amortization until proved reserves are found or it is determined that the unproved properties are impaired. All costs related to unproved properties are reviewed quarterly to determine if impairment has occurred. The amount of any impairment is transferred to the pool of capitalized costs being amortized.

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Capitalized costs are subject to the SEC full cost ceiling test. The ceiling test, which is performed each quarter, determines a limit, or ceiling, on a country-by-country basis on the amount of property acquisition, exploration and development costs that can be capitalized. The ceiling under this test represents (a) the present value of estimated future net cash flows, excluding future cash outflows associated with settling asset retirement obligations that have been accrued on the balance sheet, using a discount factor of 10%, which is computed by applying current market prices of oil and gas (as adjusted for hedging) to estimated future production of proved oil and gas reserves as of the date of the latest balance sheet, less estimated future expenditures, plus (b) the cost of unevaluated properties not being depleted, less (c) income tax effects related to the differences between the book and tax basis of the properties. If capitalized costs, net of accumulated depreciation, depletion and amortization and related deferred income taxes, exceed the ceiling at the end of any quarter, a permanent impairment is required to be charged to earnings in that quarter. In adjusting estimated future net cash flows for hedging under the ceiling test at September 30, 2007, 2006, and 2005, estimated future net cash flows were increased by $2.2 million, increased by $4.7 million, and decreased by $175.3 million, respectively. The Company's capitalized costs exceeded the full cost ceiling for the Company's Canadian properties at June 30, 2006 and September 30, 2006. As such, the Company recognized pre-tax impairments of $62.4 million at June 30, 2006 and $42.3 million at September 30, 2006. These impairment charges are included in loss from discontinued operations for 2006 due to the sale of SECI during 2007.

Maintenance and repairs of property and replacements of minor items of property are charged directly to maintenance expense. The original cost of the regulated subsidiaries' property, plant and equipment retired, and the cost of removal less salvage, are charged to accumulated depreciation.

Depreciation, Depletion and Amortization

For oil and gas properties, depreciation, depletion and amortization is computed based on quantities produced in relation to proved reserves using the units of production method. The cost of unproved oil and gas properties is excluded from this computation. For timber properties, depletion, determined on a property by property basis, is charged to operations based on the actual amount of timber cut in relation to the total amount of recoverable timber. For all other property, plant and equipment, depreciation, depletion and amortization is computed using the straight-line method in amounts sufficient to recover costs over the estimated service lives of property in service. The following is a summary of depreciable plant by segment:

	As of September 30	
	2007	2006
	(Thousands)	
Utility	$ 1,539,808	$ 1,493,991
Pipeline and Storage	976,316	962,831
Exploration and Production(1)	1,577,745	1,899,777
Energy Marketing	1,199	1,123
Timber	119,237	116,281
All Other and Corporate	32,806	33,338
	$ 4,247,111	$ 4,507,341

(1) Fiscal 2006 includes the depreciable plant of SECI discontinued operations of $469,810.

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Average depreciation, depletion and amortization rates are as follows:

	Year Ended September 30		
	2007	2006	2005
Utility	2.8%	2.8%	2.8%
Pipeline and Storage	3.5%	4.0%	4.1%
Exploration and Production, per Mcfe(1)	$ 1.94	$ 2.00	$ 1.74
Energy Marketing	2.8%	4.8%	7.6%
Timber	4.0%	5.6%	6.2%
All Other and Corporate	4.6%	4.1%	4.3%

(1) Amounts include depletion of oil and gas producing properties as well as depreciation of fixed assets. As disclosed in Note O — Supplementary Information for Oil and Gas Producing Properties, depletion of oil and gas producing properties amounted to $1.92, $1.98 and $1.72 per Mcfe of production in 2007, 2006 and 2005, respectively. Depletion of oil and gas producing properties in the United States amounted to $1.97, $1.74 and $1.58 per Mcfe of production in 2007, 2006 and 2005, respectively. Depletion of oil and gas producing properties in Canada amounted to $1.67, $2.95 and $2.36 per Mcfe of production in 2007, 2006 and 2005, respectively.

Goodwill

The Company has recognized goodwill of $5.5 million as of September 30, 2007 and 2006 on its consolidated balance sheet related to the Company's acquisition of Empire in 2003. The Company accounts for goodwill in accordance with SFAS 142, which requires the Company to test goodwill for impairment annually. At September 30, 2007 and 2006, the fair value of Empire was greater than its book value. As such, the goodwill was considered not impaired.

Financial Instruments

Unrealized gains or losses from the Company's investments in an equity mutual fund and the stock of an insurance company (securities available for sale) are recorded as a component of accumulated other comprehensive income (loss). Reference is made to Note F — Financial Instruments for further discussion.

The Company uses a variety of derivative financial instruments to manage a portion of the market risk associated with fluctuations in the price of natural gas and crude oil. These instruments include price swap agreements, no cost collars and futures contracts. The Company accounts for these instruments as either cash flow hedges or fair value hedges. In both cases, the fair value of the instrument is recognized on the Consolidated Balance Sheets as either an asset or a liability labeled fair value of derivative financial instruments. Fair value represents the amount the Company would receive or pay to terminate these instruments.

For effective cash flow hedges, the offset to the asset or liability that is recorded is a gain or loss recorded in accumulated other comprehensive income (loss) on the Consolidated Balance Sheets. The gain or loss recorded in accumulated other comprehensive income (loss) remains there until the hedged transaction occurs, at which point the gains or losses are reclassified to operating revenues, purchased gas expense or interest expense on the Consolidated Statements of Income. Any ineffectiveness associated with the cash flow hedges is recorded in the Consolidated Statements of Income. In December 2006, the Company repaid $22.8 million of Empire's secured debt. The interest costs of this secured debt were hedged by an interest rate collar. Since the hedged transaction was settled and there will be no future cash flows associated with the secured debt, hedge accounting for the interest rate collar was discontinued and the unrealized gain of $1.9 million in accumulated other comprehensive income associated with the interest rate collar was reclassified to the Consolidated Statement of Income. The Company did not experience any material ineffectiveness with regard to its cash flow hedges during 2006.

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

At September 30, 2005, it was determined that certain derivative financial instruments no longer qualified as effective cash flow hedges due to anticipated delays in oil and gas production volumes caused by Hurricane Rita. These volumes were originally forecast to be produced in the first quarter of 2006. As such, at September 30, 2005, the Company reclassified $5.1 million in accumulated losses on such derivative financial instruments from accumulated other comprehensive income (loss) on the Consolidated Balance Sheet to other revenues on the Consolidated Statement of Income. For fair value hedges, the offset to the asset or liability that is recorded is a gain or loss recorded to operating revenues or purchased gas expense on the Consolidated Statements of Income. However, in the case of fair value hedges, the Company also records an asset or liability on the Consolidated Balance Sheets representing the change in fair value of the asset or firm commitment that is being hedged (see Other Current Assets section in this footnote). The offset to this asset or liability is a gain or loss recorded to operating revenues or purchased gas expense on the Consolidated Statements of Income as well. If the fair value hedge is effective, the gain or loss from the derivative financial instrument is offset by the gain or loss that arises from the change in fair value of the asset or firm commitment that is being hedged. The Company did not experience any material ineffectiveness with regard to its fair value hedges during 2007, 2006 or 2005.

Accumulated Other Comprehensive Income (Loss)

The components of Accumulated Other Comprehensive Income (Loss) are as follows:

	Year Ended September 30	
	2007	2006
	(Thousands)	
Funded Position of the Pension and Other Post-Retirement Benefit Plans Adjustment	$ (12,482)(1)	$ —
Cumulative Foreign Currency Translation Adjustment	(83)	34,701
Net Unrealized Loss on Derivative Financial Instruments	(3,886)	(11,510)
Net Unrealized Gain on Securities Available for Sale	10,248	7,225
Accumulated Other Comprehensive Income (Loss)	$ (6,203)	$ 30,416

(1) In accordance with the transition recognition provisions of SFAS 158, the adjustment to recognize the funded positions of the Pension and Other Post-retirement Benefit Plans are shown as an adjustment to the ending balance of accumulated other comprehensive income (loss). The adjustment is not shown as other comprehensive income (loss) in the Consolidated Statements of Comprehensive Income.

At September 30, 2007, it is estimated that of the $3.9 million net unrealized loss on derivative financial instruments shown in the table above, $2.4 million will be reclassified into the Consolidated Statement of Income during 2008. The remaining unrealized loss on derivative financial instruments of $1.5 million will be reclassified into the Consolidated Statement of Income in subsequent years. As disclosed in Note F — Financial Instruments, the Company's derivative financial instruments extend out to 2012.

Gas Stored Underground — Current

In the Utility segment, gas stored underground — current in the amount of $33.0 million is carried at lower of cost or market, on a LIFO method. Based upon the average price of spot market gas purchased in September 2007, including transportation costs, the current cost of replacing this inventory of gas stored underground — current exceeded the amount stated on a LIFO basis by approximately $129.3 million at September 30, 2007. All other gas stored underground — current, which is in the Energy Marketing segment, is carried at lower of cost or market on an average cost method.

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Purchased Timber Rights

In the Timber segment, the Company purchases the right to harvest timber from land owned by other parties. These rights, which extend from several months to several years, are purchased to ensure a consistent supply of timber for the Company's sawmill and kiln operations. The historical value of timber rights expected to be harvested during the following year are included in Materials and Supplies on the Consolidated Balance Sheets while the historical value of timber rights expected to be harvested beyond one year are included in Other Assets on the Consolidated Balance Sheets. The components of the Company's purchased timber rights are as follows:

	Year Ended September 30	
	2007	2006
	(Thousands)	
Materials and Supplies	$ 8,925	$ 13,174
Other Assets	5,641	3,218
	$ 14,566	$ 16,392

Unamortized Debt Expense

Costs associated with the issuance of debt by the Company are deferred and amortized over the lives of the related debt. Costs associated with the reacquisition of debt related to rate-regulated subsidiaries are deferred and amortized over the remaining life of the issue or the life of the replacement debt in order to match regulatory treatment.

Foreign Currency Translation

The functional currency for the Company's foreign operations is the local currency of the country where the operations are located. Asset and liability accounts are translated at the rate of exchange on the balance sheet date. Revenues and expenses are translated at the average exchange rate during the period. Foreign currency translation adjustments are recorded as a component of accumulated other comprehensive income (loss). With the sale of SECI on August 31, 2007, the Company has eliminated its major foreign operation. While the Company is in the process of winding up or selling certain power development projects in Europe, the investment in such projects is not significant and the Company does not expect to have any significant foreign currency translation adjustments in the future.

Income Taxes

The Company and its domestic subsidiaries file a consolidated federal income tax return. Investment tax credit, prior to its repeal in 1986, was deferred and is being amortized over the estimated useful lives of the related property, as required by regulatory authorities having jurisdiction.

Consolidated Statements of Cash Flows

For purposes of the Consolidated Statements of Cash Flows, the Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

Hedging Collateral Account

Cash held in margin accounts serves as collateral for open positions on exchange-traded futures contracts, exchange-traded options and over-the-counter swaps and collars.

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Cash Held in Escrow

On August 31, 2007, the Company received approximately $232.1 million of proceeds from the sale of SECI, of which $58.0 million was placed in escrow pending receipt of a tax clearance certificate from the Canadian government. The escrow account is a Canadian dollar denominated account. On a U.S. dollar basis, the value of this account was $62.0 million at September 30, 2007.

Other Current Assets

Other Current Assets consist of prepayments in the amounts of $14.1 million and $12.0 million at September 30, 2007 and 2006, respectively, prepaid property and other taxes of $14.1 million and $13.7 million at September 30, 2007 and 2006, respectively, federal income taxes receivable in the amounts of $8.7 million and $7.5 million at September 30, 2007 and 2006, respectively, state income taxes receivable in the amounts of zero and $7.4 million at September 30, 2007 and 2006, respectively, and fair values of firm commitments in the amounts of $8.2 million and $23.1 million at September 30, 2007 and 2006, respectively.

Earnings Per Common Share

Basic earnings per common share is computed by dividing income available for common stock by the weighted average number of common shares outstanding for the period. Diluted earnings per common share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. The only potentially dilutive securities the Company has outstanding are stock options and stock-settled SARs. The diluted weighted average shares outstanding shown on the Consolidated Statements of Income reflects the potential dilution as a result of these stock options and stock-settled SARs as determined using the Treasury Stock Method. Stock options and stock-settled SARs that are antidilutive are excluded from the calculation of diluted earnings per common share. For 2007, no stock options or stock-settled SARs were excluded as being antidilutive. For 2006, 119,241 stock options were excluded as being antidilutive. There were no stock-settled SARs excluded as being antidilutive for 2006. There were no stock options or stock-settled SARs excluded as being antidilutive for 2005.

Share Repurchases

The Company considers all shares repurchased as cancelled shares restored to the status of authorized but unissued shares, in accordance with New Jersey law. The repurchases are accounted for on the date the share repurchase is settled as an adjustment to common stock (at par value) with the excess repurchase price allocated between paid in capital and retained earnings. Refer to Note E — Capitalization and Short-Term Borrowings for further discussion of the share repurchase program.

Stock-Based Compensation

The Company has various stock option and stock award plans which provide or provided for the issuance of one or more of the following to key employees: incentive stock options, nonqualified stock options, stock-settled SARs, restricted stock, performance units or performance shares. Stock options and stock-settled SARs under all plans have exercise prices equal to the average market price of Company common stock on the date of grant, and generally no stock option or stock-settled SAR is exercisable less than one year or more than ten years after the date of each grant. Restricted stock is subject to restrictions on vesting and transferability. Restricted stock awards entitle the participants to full dividend and voting rights. Certificates for shares of restricted stock awarded under the Company’s stock option and stock award plans are held by the Company during the periods in which the restrictions on vesting are effective. Restrictions on restricted stock awards generally lapse ratably over a period of not more than ten years after the date of each grant.

Table of Contents

Prior to October 1, 2005, the Company accounted for its stock-based compensation under the recognition and measurement principles of APB 25 and related interpretations. Under that method, no compensation expense was recognized for options granted under the Company's stock option and stock award plans. The Company did record, in accordance with APB 25, compensation expense for the market value of restricted stock on the date of the award over the periods during which the vesting restrictions existed.

Effective October 1, 2005, the Company adopted SFAS 123R, which requires the measurement and recognition of compensation cost at fair value for all share-based payments, including stock options and stock-settled SARs. The Company has chosen to use the modified version of prospective application, as allowed by SFAS 123R. Using the modified prospective application, the Company recorded compensation cost for the portion of awards granted prior to October 1, 2005 for which the requisite service had not been rendered and recognized such compensation cost as the requisite service was rendered on or after October 1, 2005. Such compensation expense is based on the grant-date fair value of the awards as calculated for the Company's disclosure using a Binomial option-pricing model under SFAS 123. Any new awards, modifications to awards, repurchases of awards, or cancellations of awards subsequent to September 30, 2005 will follow the provisions of SFAS 123R, with compensation expense being calculated using the Black-Scholes-Merton closed form model. The Company has chosen the Black-Scholes-Merton closed form model since it is easier to administer than the Binomial option-pricing model. Furthermore, since the Company does not have complex stock-based compensation awards, it does not believe that compensation expense would be materially different under either model. There were 448,000, 317,000 and 700,000 stock options granted during the years ended September 30, 2007, 2006 and 2005, respectively. The Company granted 50,000 stock-settled SARs during the year ended September 30, 2007. There were no stock-settled SARs granted during the years ended September 30, 2006 and 2005. The accounting treatment for such stock-settled SARs is the same under SFAS 123R as the accounting for stock options under SFAS 123R. The Company also granted 25,000 and 16,000 restricted share awards (non-vested stock as defined by SFAS 123R) during the years ended September 30, 2007 and 2006, respectively. There were no restricted share awards granted during the year ended September 30, 2005. Stock-based compensation expense for the years ended September 30, 2007, 2006 and 2005 was approximately $3,727,000, $1,705,000, and $517,000, respectively. Stock-based compensation expense is included in operation and maintenance expense on the Consolidated Statement of Income. The total income tax benefit related to stock-based compensation expense during the years ended September 30, 2007, 2006 and 2005 was approximately $1,488,000, $653,000 and $206,000, respectively. There were no capitalized stock-based compensation costs during the years ended September 30, 2007 and 2006.

Prior to the adoption of SFAS 123R, the Company followed the nominal vesting period approach under the disclosure requirements of SFAS 123 for determining the vesting period for awards with retirement-eligible provisions, which recognized stock-based compensation expense over the nominal vesting period. As a result of the adoption of SFAS 123R, the Company currently applies the non-substantive vesting period approach for determining the vesting period of such awards. Under this approach, the retention of the award is not contingent on providing subsequent service and the vesting period would begin at the grant date and end at the retirement-eligible date. For the year ended September 30, 2007, the amount of compensation expense recognized by the Company using the non-substantive vesting approach was $280,000 ($182,000 net of tax) less than if the nominal vesting period approach had been used. For the year ended September 30, 2006, the Company recognized an additional $442,000 ($288,000 net of tax) of stock-based compensation expense by applying the non-substantive vesting approach as opposed to the nominal vesting period approach. For the year ended September 30, 2005, stock-based compensation expense would have been $4,282,000 ($2,752,000 net of tax) for pro forma recognition purposes had the non-substantive vesting period approach been used. Pro forma stock-based compensation expense following the nominal vesting period approach is shown in the table below.

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The following table illustrates the effect on net income and earnings per share of the Company had the Company applied the fair value recognition provisions of SFAS 123 relating to stock-based employee compensation for the year ended September 30, 2005:

	Year Ended September 30, 2005 (Thousands, except per share amounts)
Net Income, Available for Common Stock, As Reported	$ 189,488
Add: Stock-Based Employee Compensation Expense Included in Reported Net Income, Net of Tax(1)	336
Deduct: Total Stock-Based Employee Compensation Expense Determined Under Fair Value Based Methods for all Awards, Net of Related Tax Effects	(2,782)
Pro Forma Net Income Available for Common Stock	$ 187,042
Earnings Per Common Share:	
Basic — As Reported	$ 2.27
Basic — Pro Forma	$ 2.24
Diluted — As Reported	$ 2.23
Diluted — Pro Forma	$ 2.20

(1) Stock-based compensation expense in 2005 represented compensation expense related to restricted stock awards. The pre-tax expense was $517,000 for the year ended September 30, 2005.

Stock Options

The total intrinsic value of stock options exercised during the years ended September 30, 2007, 2006 and 2005 totaled approximately $38.7 million, $30.9 million, and $19.8 million, respectively. For 2007, 2006 and 2005, the amount of cash received by the Company from the exercise of such stock options was approximately $26.0 million, $30.1 million, and $24.8 million, respectively.

The Company realizes tax benefits related to the exercise of stock options on a calendar year basis as opposed to a fiscal year basis. As such, for stock options exercised during the quarters ended December 31, 2006, 2005, and 2004, the Company realized a tax benefit of $3.2 million, $0.9 million, and $1.1 million, respectively. For stock options exercised during the period of January 1, 2007 through September 30, 2007, the Company will realize a tax benefit of approximately $12.0 million in the quarter ended December 31, 2007. For stock options exercised during the period of January 1, 2006 through September 30, 2006, the Company realized a tax benefit of approximately $11.4 million in the quarter ended December 31, 2006. For stock options exercised during the period of January 1, 2005 through September 30, 2005, the Company realized a tax benefit of approximately $6.3 million in the quarter ended December 31, 2005. The weighted average grant date fair value of options granted in 2007, 2006 and 2005 is $7.27 per share, $6.68 per share, and $4.59 per share, respectively. For the years ended September 30, 2007, 2006 and 2005, 327,501, 89,665 and 1,375,105 stock options became fully vested, respectively. The total fair value of these stock options was approximately $2.1 million, $0.4 million and $6.2 million, respectively, for the years ended September 30, 2007, 2006 and 2005. As of September 30, 2007, unrecognized compensation expense related to stock options totaled approximately $0.9 million, which will be recognized over a weighted average period of 10.6 months. For a summary of transactions during 2007 involving option shares for all plans, refer to Note E — Capitalization and Short-Term Borrowings.

The fair value of options at the date of grant was estimated using a Binomial option-pricing model for options granted prior to October 1, 2005 and the Black-Scholes-Merton closed form model for options granted

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

after September 30, 2005. The following weighted average assumptions were used in estimating the fair value of options at the date of grant:

	Year Ended September 30		
	2007	2006	2005
Risk Free Interest Rate	4.46%	5.08%	4.46%
Expected Life (Years)	7.0	7.0	7.0
Expected Volatility	17.73%	17.71%	17.76%
Expected Dividend Yield (Quarterly)	0.76%	0.83%	1.00%

The risk-free interest rate is based on the yield of a Treasury Note with a remaining term commensurate with the expected term of the option. The expected life and expected volatility are based on historical experience.

For grants prior to October 1, 2005, the Company used a forfeiture rate of 13.6% for calculating stock-based compensation expense related to stock options and this rate is based on the Company's historical experience of forfeitures on unvested stock option grants. For grants during the years ended September 30, 2007 and 2006, it was assumed that there would be no forfeitures, based on the vesting term and the number of grantees.

Stock-settled SARs

There were no stock-settled SARs exercised during the years ended September 30, 2007, 2006 and 2005 as none of the stock-settled SARs granted have vested. The weighted average grant date fair value of stock-settled SARs granted in 2007 is $7.81 per share. There were no stock-settled SARs granted during 2006 or 2005. For the years ended September 30, 2007, 2006 and 2005, there were no stock-settled SARs that became fully vested. As of September 30, 2007, unrecognized compensation expense related to stock-settled SARs totaled approximately $0.3 million, which will be recognized over a weighted average period of 1.4 years. For a summary of transactions during 2007 involving stock-settled SARs for all plans, refer to Note E — Capitalization and Short-Term Borrowings.

The fair value of stock-settled SARs at the date of grant was estimated using the Black-Scholes-Merton closed form model. The following weighted average assumptions were used in estimating the fair value of options at the date of grant:

	Year Ended September 30, 2007
Risk Free Interest Rate	4.53%
Expected Life (Years)	7.0
Expected Volatility	17.55%
Expected Dividend Yield (Quarterly)	0.73%

The risk-free interest rate is based on the yield of a Treasury Note with a remaining term commensurate with the expected term of the option. The expected life and expected volatility are based on historical experience.

For grants during the year ended September 30, 2007, it was assumed that there would be no forfeitures, based on the vesting term and the number of grantees.

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Restricted Share Awards

The weighted average fair value of restricted share awards granted in 2007 and 2006 is $40.18 per share and $34.94 per share, respectively. There were no restricted share awards granted during 2005. As of September 30, 2007, unrecognized compensation expense related to restricted share awards totaled approximately $1.0 million, which will be recognized over a weighted average period of 1.7 years. For a summary of transactions during 2007 involving restricted share awards, refer to Note E — Capitalization and Short-Term Borrowings.

During 2006, a modification was made to a restricted share award involving one employee. The modification accelerated the vesting date of 4,000 shares from December 7, 2006 to July 1, 2006. The incremental compensation expense, totaling approximately $32,000, was included with the total stock-based compensation expense for the year ended September 30, 2006.

New Accounting Pronouncements

In June 2006, the FASB issued FIN 48, "Accounting for Uncertainty in Income Taxes." FIN 48 clarifies the accounting for income taxes by prescribing a minimum probability threshold that a tax position must meet before a financial statement benefit is recognized. The minimum threshold is defined in FIN 48 as a tax position that is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation processes, based on the technical merits of the position. If a tax benefit meets this threshold, it is measured and recognized based on an analysis of the cumulative probability of the tax benefit being ultimately sustained. The cumulative effect of applying FIN 48 at adoption, if any, is reported as an adjustment to opening retained earnings for the year of adoption. FIN 48 is effective for the first quarter of the Company's 2008 fiscal year and it is expected that this pronouncement will not have a material effect on the Company's consolidated financial statements.

In September 2006, the FASB issued SFAS 157, "Fair Value Measurements." SFAS 157 provides guidance for using fair value to measure assets and liabilities. The pronouncement serves to clarify the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect that fair-value measurements have on earnings. SFAS 157 is to be applied whenever another standard requires or allows assets or liabilities to be measured at fair value. The pronouncement is effective as of the Company's first quarter of fiscal 2009. The Company is currently evaluating the impact that the adoption of SFAS 157 will have on its consolidated financial statements.

In September 2006, the FASB also issued SFAS 158, "Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans" (an amendment of SFAS 87, SFAS 88, SFAS 106, and SFAS 132R). SFAS 158 requires that companies recognize a net liability or asset to report the underfunded or overfunded status of their defined benefit pension and other post-retirement benefit plans on their balance sheets, as well as recognize changes in the funded status of a defined benefit post-retirement plan in the year in which the changes occur through comprehensive income. The pronouncement also specifies that a plan's assets and obligations that determine its funded status be measured as of the end of the Company's fiscal year, with limited exceptions. In accordance with SFAS 158, the Company has recognized the funded status of its benefit plans and implemented the disclosure requirements of SFAS 158 at September 30, 2007. The requirement to measure the plan assets and benefit obligations as of the Company's fiscal year-end date will be adopted by the Company by the end of fiscal 2009. Currently, the Company measures its plan assets and benefit obligations using a June 30th measurement date. At September 30, 2007, in order to recognize the funded status of its pension and post-retirement benefit plans in accordance with SFAS 158, the Company recorded additional liabilities or reduced assets by a cumulative amount of $78.7 million ($71.1 million net of deferred tax benefits recognized for the portion recorded as an increase to Accumulated Other Comprehensive Loss). Of the $71.1 million recognized, $61.9 million was recorded as an increase to Other Regulatory Assets in the Company's Utility and Pipeline and Storage segments, $12.5 million (net of deferred tax benefits of $7.6 million) was recorded as an increase to Accumulated Other Comprehensive Loss, and $3.3 million was recorded as an increase to Other Regulatory

Table of Contents

Liabilities in the Company's Utility segment. The Company has recorded amounts to Other Regulatory Assets or Other Regulatory Liabilities in the Utility and Pipeline and Storage segments in accordance with the provisions of SFAS 71. The Company, in those segments, has certain regulatory commission authorizations, which allow the Company to defer as a regulatory asset or liability the difference between pension and post-retirement benefit costs as calculated in accordance with SFAS 87 and SFAS 106 and what is collected in rates. Refer to Note G — Retirement Plan and Other Post-Retirement Benefits for further disclosures regarding the impact of SFAS 158 on the Company's consolidated financial statements.

In February 2007, the FASB issued SFAS 159, "The Fair Value Option for Financial Assets and Financial Liabilities — Including an Amendment of SFAS 115." SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not otherwise required to be measured at fair value under GAAP. A company that elects the fair value option for an eligible item will be required to recognize in current earnings any changes in that item's fair value in reporting periods subsequent to the date of adoption. SFAS 159 is effective as of the Company's first quarter of fiscal 2009. The Company is currently evaluating the impact, if any, that the adoption of SFAS 159 will have on its consolidated financial statements.

Note B — Asset Retirement Obligations

The Company accounts for asset retirement obligations in accordance with the provisions of SFAS 143. SFAS 143 requires entities to record the fair value of a liability for an asset retirement obligation in the period in which it is incurred. When the liability is initially recorded, the entity capitalizes the estimated cost of retiring the asset as part of the carrying amount of the related long-lived asset. Over time, the liability is adjusted to its present value each period and the capitalized cost is depreciated over the useful life of the related asset.

As previously disclosed, the Company follows the full cost method of accounting for its exploration and production costs. Upon the adoption of SFAS 143 on October 1, 2002, the Company recorded an asset retirement obligation representing plugging and abandonment costs associated with the Exploration and Production segment's crude oil and natural gas wells and capitalized such costs in property, plant and equipment (i.e. the full cost pool). Prior to the adoption of SFAS 143, plugging and abandonment costs were accounted for solely through the Company's units-of-production depletion calculation. An estimate of such costs was added to the depletion base, which also included capitalized costs in the full cost pool and estimated future expenditures to be incurred in developing proved reserves. With the adoption of SFAS 143, plugging and abandonment costs are already included in capitalized costs and the units-of-production depletion calculation has been modified to exclude from the depletion base any estimate of future plugging and abandonment costs that are already recorded in the full cost pool.

The full cost method of accounting provides a limit to the amount of costs that can be capitalized in the full cost pool. This limit is referred to as the full cost ceiling. Prior to the adoption of SFAS 143, in calculating the full cost ceiling, the Company reduced the future net cash flows from proved oil and gas reserves by the estimated plugging and abandonment costs. Such future net cash flows would then be compared to capitalized costs in the full cost pool, with any excess capitalized costs being expensed. With the adoption of SFAS 143, since the full cost pool now includes an amount associated with plugging and abandoning the wells, the calculation of the full cost ceiling has been changed so that future net cash flows from proved oil and gas reserves are no longer reduced by the estimated plugging and abandonment costs.

On September 30, 2006, the Company adopted FIN 47, an interpretation of SFAS 143. FIN 47 provides clarification of the term "conditional asset retirement obligation" as used in SFAS 143, defined as a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the Company. Under this standard, if the fair value of a conditional asset retirement obligation can be reasonably estimated, a company must record a liability and a corresponding asset for the conditional asset retirement obligation representing the present value of that obligation at the date the obligation was incurred. FIN 47 also serves to clarify when a company

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

would have sufficient information to reasonably estimate the fair value of a conditional asset retirement obligation.

Upon the adoption of FIN 47, the Company recorded future asset retirement obligations associated with the plugging and abandonment of natural gas storage wells in the Pipeline and Storage segment and the removal of asbestos and asbestos-containing material in various facilities in the Utility and Pipeline and Storage segments. The Company also identified asset retirement obligations for certain costs connected with the retirement of distribution mains and services pipeline systems in the Utility segment and with the transmission mains and other components in the pipeline systems in the Pipeline and Storage segment. These retirement costs within the distribution and transmission systems are primarily for the capping and purging of pipe, which are generally abandoned in place when retired, as well as for the clean-up of PCB contamination associated with the removal of certain pipe.

As a result of the implementation of FIN 47 as of September 30, 2006, the Company recorded additional asset retirement obligations of $23.2 million and corresponding long-lived plant assets, net of accumulated depreciation, of $3.5 million. These assets will be depreciated over their respective remaining depreciable life. The remaining $19.7 million represents the cumulative accretion and depreciation of the asset retirement obligations that would have been recognized if this interpretation had been in effect at the inception of the obligations. Of this amount, the Company recorded an increase to regulatory assets of $9.0 million and a reduction to cost of removal regulatory liability of $10.7 million. The cost of removal regulatory liability represents amounts collected from customers through depreciation expense in the Company’s Utility and Pipeline and Storage segments. These removal costs are not a legal retirement obligation in accordance with SFAS 143. Rather, they represent a regulatory liability. However, SFAS 143 requires that such costs of removal be reclassified from accumulated depreciation to other regulatory liabilities. At September 30, 2007 and 2006, the costs of removal reclassified to other regulatory liabilities amounted to $91.2 million and $85.1 million, respectively.

A reconciliation of the Company’s asset retirement obligation calculated in accordance with SFAS 143 is shown below ($000s):

	Year Ended September 30		
	2007	2006	2005
		(Thousands)	
Balance at Beginning of Year	$ 77,392	$ 41,411	$ 32,292
Additions — Adoption of FIN 47	—	23,234	—
Liabilities Incurred and Revisions of Estimates	(932)	11,244	8,343
Liabilities Settled	(6,108)	(1,303)	(1,938)
Accretion Expense	5,394	2,671	2,448
Exchange Rate Impact	193	135	266
Balance at End of Year	$ 75,939	$ 77,392	$ 41,411

Pursuant to FIN 47, the financial statements for periods prior to September 30, 2006 have not been restated. If FIN 47 had been in effect, the Company would have recorded additional asset retirement obligations of $21.9 million at October 1, 2005.

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Note C — Regulatory Matters

Regulatory Assets and Liabilities

The Company has recorded the following regulatory assets and liabilities:

	At September 30	
	2007	2006
	(Thousands)	
Regulatory Assets(1):		
Pension and Post-Retirement Benefit Costs(2) (Note G)	$ 98,787	$ 47,368
Recoverable Future Taxes (Note D)	83,954	79,511
Environmental Site Remediation Costs(2) (Note H)	20,738	12,937
Unrecovered Purchased Gas Costs (See Regulatory Mechanisms in Note A)	14,769	12,970
Unamortized Debt Expense (Note A)	8,470	8,399
Asset Retirement Obligations(2) (Note B)	8,315	9,018
Recoverable Worker Compensation Expense(2)	4,445	3,691
Other(2)	5,292	3,903
Total Regulatory Assets	244,770	177,797
Regulatory Liabilities:		
Cost of Removal Regulatory Liability (Note B)	91,226	85,076
New York Rate Settlements(3)	27,964	40,881
Pension and Post-Retirement Benefit Costs(3) (Note G)	21,676	13,063
Tax Benefit on Medicare Part D Subsidy(3)	19,147	13,791
Taxes Refundable to Customers (Note D)	14,026	10,426
Amounts Payable to Customers (See Regulatory Mechanisms in Note A)	10,409	23,935
Deferred Insurance Proceeds(3)	7,422	7,516
Other(3)	450	205
Total Regulatory Liabilities	192,320	194,893
Net Regulatory Position	$ 52,450	$ (17,096)

(1) The Company recovers the cost of its regulatory assets but, with the exception of Unrecovered Purchased Gas Costs, does not earn a return on them.

(2) Included in Other Regulatory Assets on the Consolidated Balance Sheets.

(3) Included in Other Regulatory Liabilities on the Consolidated Balance Sheets.

If for any reason the Company ceases to meet the criteria for application of regulatory accounting treatment for all or part of its operations, the regulatory assets and liabilities related to those portions ceasing to meet such criteria would be eliminated from the balance sheet and included in income of the period in which the discontinuance of regulatory accounting treatment occurs. Such amounts would be classified as an extraordinary item.

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

New York Rate Settlements

With respect to utility services provided in New York, the Company has entered into rate settlements approved by the NYPSC. The rate settlements have given rise to several significant liabilities, which are described as follows:

Gross Receipts Tax Over-Collections — In accordance with NYPSC policies, Distribution Corporation deferred the difference between the revenues it collects under a New York State gross receipts tax surcharge and its actual New York State income tax expense. Distribution Corporation's cumulative gross receipts tax revenues exceeded its New York State income tax expense, resulting in a regulatory liability at September 30, 2007 and 2006 of $6.7 million and $19.8 million, respectively. Under the terms of its 2005 rate agreement, Distribution Corporation has been passing back that regulatory liability to rate payers since August 1, 2005. Further, the gross receipts tax surcharge that gave rise to the regulatory liability was eliminated from Distribution Corporation's tariff (New York State income taxes are now recovered as a component of base rates).

Cost Mitigation Reserve ("CMR") — The CMR is a regulatory liability that can be used to offset certain expense items specified in Distribution Corporation's rate settlements. The source of the CMR is principally the accumulation of certain refunds from upstream pipeline companies. During 2005, under the terms of the 2005 rate agreement, Distribution Corporation transferred the remaining balance in a generic restructuring reserve (which had been established in a prior rate settlement) and the balances it had accumulated under various earnings sharing mechanisms to the CMR. The balance in the CMR at September 30, 2007 and 2006 amounted to $7.4 million and $7.6 million, respectively.

Other — The 2005 agreement also established a reserve to fund area development projects. The balance in the area development projects reserve at September 30, 2007 and 2006 amounted to $3.6 million and $3.9 million, respectively (Distribution Corporation established the reserve at September 30, 2005 by transferring $3.8 million from the CMR discussed above). Various other regulatory liabilities have also been created through the New York rate settlements and amounted to $10.3 million and $9.6 million at September 30, 2007 and 2006, respectively.

Tax Benefit on Medicare Part D Subsidy

The Company has established a regulatory liability for the tax benefit it will receive under the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (the Act). The Act provides a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D. In the Company's Utility and Pipeline and Storage segments, the ratepayer funds the Company's post-retirement benefit plans. As such, any tax benefit received under the Act must be flowed-through to the ratepayer. Refer to Note G — Retirement Plan and Other Post-Retirement Benefits for further discussion of the Act and its impact on the Company.

Deferred Insurance Proceeds

In 2006, the Company, in its Utility and Pipeline and Storage segments, received $7.5 million in environmental insurance settlement proceeds. Such proceeds have been deferred as a regulatory liability to be applied against any future environmental claims that may be incurred. The proceeds have been classified as a regulatory liability in recognition of the fact that ratepayers funded the premiums on the former insurance policies. Deferred insurance proceeds amounted to $7.4 million at September 30, 2007.

Recoverable Worker Compensation Expense

The Company has established a liability in its Utility segment in accordance with the provisions of SFAS 112 for future worker compensation liabilities. Such amounts have been deferred as a regulatory asset because the Company is allowed to recover worker compensation expense in rates.

Note D — Income Taxes

The components of federal, state and foreign income taxes included in the Consolidated Statements of Income are as follows:

	Year Ended September 30		
	2007	2006	2005
		(Thousands)	
Current Income Taxes —			
Federal	$ 99,608	$ 65,593	$ 45,571
State	21,700	13,511	14,413
Foreign	22	2,212	4,104
Deferred Income Taxes —			
Federal	39,340	19,111	27,412
State	10,751	9,024	2,280
Foreign	2,756	(33,365)	10,120
	174,177	76,086	103,900
Deferred Investment Tax Credit	(697)	(697)	(697)
Total Income Taxes	$ 173,480	$ 75,389	$ 103,203
Presented as Follows:			
Other Income	$ (697)	$ (697)	$ (697)
Income Tax Expense — Continuing Operations	131,813	108,245	85,621
Discontinued Operations —			
Income From Operations	2,792	(32,159)	16,667
Gain on Disposal	39,572	—	1,612
Total Income Taxes	$ 173,480	$ 75,389	$ 103,203

The U.S. and foreign components of income (loss) before income taxes are as follows:

	Year Ended September 30		
	2007	2006	2005
		(Thousands)	
U.S.	$ 496,074	$ 293,887	$ 223,113
Foreign	14,861	(80,407)	69,578
	$ 510,935	$ 213,480	$ 292,691

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Total income taxes as reported differ from the amounts that were computed by applying the federal income tax rate to income before income taxes. The following is a reconciliation of this difference:

	Year Ended September 30		
	2007	2006	2005
		(Thousands)	
Income Tax Expense, Computed at U.S. Federal Statutory Rate of 35%	$ 178,827	$ 74,718	$ 102,442
Increase in Taxes Resulting from:			
State Income Taxes	21,093	14,648	10,850
Foreign Tax Differential	(20,980)	(3,718)	(4,845)
Reversal of Capital Loss Valuation Allowance	—	(2,877)	—
Miscellaneous	(5,460)	(7,382)	(5,244)
Total Income Taxes	$ 173,480	$ 75,389	$ 103,203

The foreign tax differential amount shown above for 2007 includes tax effects relating to the gain on disposition of a foreign subsidiary. Also, the foreign tax differential amount shown above for 2006 includes a $5.1 million deferred tax benefit relating to additional future tax deductions forecasted in Canada and the amount for 2005 includes tax effects relating to the disposition of a foreign subsidiary. The miscellaneous amount shown above for 2006 includes a net reversal of $3.2 million relating to a tax contingency reserve.

Significant components of the Company's deferred tax liabilities and assets are as follows:

	At September 30	
	2007	2006
	(Thousands)	
Deferred Tax Liabilities:		
Property, Plant and Equipment	$ 612,648	$ 569,677

Balance at September 30, 2007	83,461	$ 83,461	$ 569,085	$ 983,776(3)	$ (6,203)

(1) Paid in Capital includes tax benefits of $13.7 million, $6.5 million and $3.7 million for September 30, 2007, 2006 and 2005, respectively, associated with the exercise of stock options.

(2) As of October 1, 2005, Paid in Capital includes compensation costs associated with stock option, stock-settled SARs and/or restricted stock awards, in accordance with SFAS 123R. The expense is included within Net Income Available For Common Stock, net of tax benefits.

(3) The availability of consolidated earnings reinvested in the business for dividends payable in cash is limited under terms of the indentures covering long-term debt. At September 30, 2007, $880.6 million of accumulated earnings was free of such limitations.

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Common Stock

The Company has various plans which allow shareholders, employees and others to purchase shares of the Company common stock. The National Fuel Gas Company Direct Stock Purchase and Dividend Reinvestment Plan allows shareholders to reinvest cash dividends and make cash investments in the Company's common stock and provides investors the opportunity to acquire shares of the Company common stock without the payment of any brokerage commissions in connection with such acquisitions. The 401(k) Plans allow employees the opportunity to invest in the Company common stock, in addition to a variety of other investment alternatives. Generally, at the discretion of the Company, shares purchased under these plans are either original issue shares purchased directly from the Company or shares purchased on the open market by an independent agent.

During 2007, the Company issued 2,070,613 original issue shares of common stock as a result of stock option exercises and 25,000 original issue shares for restricted stock awards (non-vested stock as defined in SFAS 123R). Holders of stock options or restricted stock will often tender shares of common stock to the Company for payment of option exercise prices and/or applicable withholding taxes. During 2007, 731,793 shares of common stock were tendered to the Company for such purposes. The Company considers all shares tendered as cancelled shares restored to the status of authorized but unissued shares, in accordance with New Jersey law. There were also 6,000 restricted stock award shares forfeited during 2007.

The Company also has a Director Stock Program under which it issues shares of the Company common stock to its non-employee directors as partial consideration for their services as directors. Under this program, the Company issued 9,146 original issue shares of common stock to the non-employee directors of the Company during 2007.

On December 8, 2005, the Company's Board of Directors authorized the Company to implement a share repurchase program, whereby the Company may repurchase outstanding shares of common stock, up to an aggregate amount of 8 million shares in the open market or through privately negotiated transactions. During 2007, the Company repurchased 1,308,328 shares for $48.1 million under this program, funded with cash provided by operating activities and/or through the use of the Company's lines of credit. Since the repurchase program was implemented, the Company has repurchased 3,834,878 shares for $133.2 million.

Shareholder Rights Plan

In 1996, the Company's Board of Directors adopted a shareholder rights plan (Plan). The Plan has been amended three times since it was adopted and is now embodied in an Amended and Restated Rights Agreement effective September 1, 2007, which is an Exhibit to this Annual Report and Form 10-K.

The holders of the Company's common stock have one right (Right) for each of their shares. Each Right, which will initially be evidenced by the Company's common stock certificates representing the outstanding shares of common stock, entitles the holder to purchase one-half of one share of common stock at a purchase price of $65.00 per share, being $32.50 per half share, subject to adjustment (Purchase Price).

The Rights become exercisable upon the occurrence of a distribution date. At any time following a distribution date, each holder of a Right may exercise its right to receive common stock (or, under certain circumstances, other property of the Company) having a value equal to two times the Purchase Price of the Right then in effect. However, the Rights are subject to redemption or exchange by the Company prior to their exercise as described below.

A distribution date would occur upon the earlier of (i) ten days after the public announcement that a person or group has acquired, or obtained the right to acquire, beneficial ownership of the Company's common stock or other voting stock having 10% or more of the total voting power of the Company's common stock and other voting stock and (ii) ten days after the commencement or announcement by a person or group of an intention to

Table of Contents

make a tender or exchange offer that would result in that person acquiring, or obtaining the right to acquire, beneficial ownership of the Company's common stock or other voting stock having 10% or more of the total voting power of the Company's common stock and other voting stock.

In certain situations after a person or group has acquired beneficial ownership of 10% or more of the total voting power of the Company's stock as described above, each holder of a Right will have the right to exercise its Rights to receive common stock of the acquiring company having a value equal to two times the Purchase Price of the Right then in effect. These situations would arise if the Company is acquired in a merger or other business combination or if 50% or more of the Company's assets or earning power are sold or transferred.

At any time prior to the end of the business day on the tenth day following the announcement that a person or group has acquired, or obtained the right to acquire, beneficial ownership of 10% or more of the total voting power of the Company, the Company may redeem the Rights in whole, but not in part, at a price of $0.005 per Right, payable in cash or stock. A decision to redeem the Rights requires the vote of 75% of the Company's full Board of Directors. Also, at any time following the announcement that a person or group has acquired, or obtained the right to acquire, beneficial ownership of 10% or more of the total voting power of the Company, 75% of the Company's full Board of Directors may vote to exchange the Rights, in whole or in part, at an exchange rate of one share of common stock, or other property deemed to have the same value, per Right, subject to certain adjustments.

After a distribution date, Rights that are owned by an acquiring person will be null and void. Upon exercise of the Rights, the Company may need additional regulatory approvals to satisfy the requirements of the Rights Agreement. The Rights will expire on July 31, 2008, unless earlier than that date, they are exchanged or redeemed or the Plan is amended to extend the expiration date.

The Rights have anti-takeover effects because they will cause substantial dilution of the common stock if a person attempts to acquire the Company on terms not approved by the Board of Directors.

Stock Option and Stock Award Plans

The Company has various stock option and stock award plans which provide or provided for the issuance of one or more of the following to key employees: incentive stock options, nonqualified stock options, stock-settled SARs, restricted stock, performance units or performance shares. Stock options and stock-settled SARs under all plans have exercise prices equal to the average market price of Company common stock on the date of grant, and generally no option or stock-settled SAR is exercisable less than one year or more than ten years after the date of each grant.

$37.09-$41.20	50,000	9.5	$ 41.20	—	—

Restricted Share Awards

Restricted stock is subject to restrictions on vesting and transferability. Restricted stock awards entitle the participants to full dividend and voting rights. The market value of restricted stock on the date of the award is recorded as compensation expense over the vesting period. Certificates for shares of restricted stock awarded under the Company's stock option and stock award plans are held by the Company during the periods in which the restrictions on vesting are effective.

Transactions involving restricted shares for all plans are summarized as follows:

	Number of Restricted Share Awards	Weighted Average Fair Value per Award
Restricted Share Awards Outstanding at September 30, 2006	42,328	$ 28.44
Granted in 2007	25,000	$ 40.18
Vested in 2007	(25,000)	$ 24.50
Forfeited in 2007	(6,000)	$ 34.94
Restricted Share Awards Outstanding at September 30, 2007	36,328	$ 38.16

Vesting restrictions for the outstanding shares of non-vested restricted stock at September 30, 2007 will lapse as follows: 2008 — 2,500 shares; 2009 — 2,500 shares; 2010 — 28,828 shares; and 2011 — 2,500 shares.

Redeemable Preferred Stock

As of September 30, 2007, there were 10,000,000 shares of $1 par value Preferred Stock authorized but unissued.

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Long-Term Debt

The outstanding long-term debt is as follows:

	At September 30 2007	At September 30 2006
	(Thousands)	
Medium-Term Notes(1):		
6.0% to 7.50% due May 2008 to June 2025	$ 749,000	$ 749,000
Notes(1):		
5.25% to 6.5% due March 2013 to September 2022(2)	250,000	346,665
	999,000	1,095,665
Other Notes:		
Secured(3)	—	22,766
Unsecured	24	169
Total Long-Term Debt	999,024	1,118,600
Less Current Portion	200,024	22,925
	$ 799,000	$ 1,095,675

(1) These medium-term notes and notes are unsecured.

(2) At September 30, 2006, $96,665,000 of the 6.5% unsecured notes were redeemable at par at any time after September 15, 2006. On April 30, 2007, the Company redeemed these notes for $96.3 million, plus accrued interest.

(3) On December 8, 2006, the Company repaid these notes for $22.8 million. As such, the notes were classified as Current Portion of Long-Term Debt on the Company's Consolidated Balance Sheet at September 30, 2006. These notes constituted "project financing" that was secured by the various project documentation and natural gas transportation contracts related to the Empire State Pipeline. The interest rate on these notes was a variable rate based on LIBOR.

As of September 30, 2007, the aggregate principal amounts of long-term debt maturing during the next five years and thereafter are as follows: $200.0 million in 2008, $100.0 million in 2009, zero in 2010, $200.0 million in 2011, $150.0 million in 2012, and $349.0 million thereafter.

Short-Term Borrowings

The Company historically has obtained short-term funds either through bank loans or the issuance of commercial paper. As for the former, the Company maintains a number of individual uncommitted or discretionary lines of credit with certain financial institutions for general corporate purposes. Borrowings under these lines of credit are made at competitive market rates. These credit lines, which aggregate to $455.0 million, are revocable at the option of the financial institutions and are reviewed on an annual basis. The Company anticipates that these lines of credit will continue to be renewed, or replaced by similar lines. The total amount available to be issued under the Company's commercial paper program is $300.0 million. The commercial paper program is backed by a syndicated committed credit facility totaling $300.0 million that extends through September 30, 2010.

At September 30, 2007 and 2006, the Company had no outstanding short-term notes payable to banks or commercial paper.

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1426 of 2431

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Debt Restrictions

Under the Company's committed credit facility, the Company has agreed that its debt to capitalization ratio will not exceed .65 at the last day of any fiscal quarter from September 30, 2005 through September 30, 2010. At September 30, 2007, the Company's debt to capitalization ratio (as calculated under the facility) was .38. The constraints specified in the committed credit facility would permit an additional $2.02 billion in short-term and/or long-term debt to be outstanding (further limited by the indenture covenants discussed below) before the Company's debt to capitalization ratio would exceed .65. If a downgrade in any of the Company's credit ratings were to occur, access to the commercial paper markets might not be possible. However, the Company expects that it could borrow under its uncommitted bank lines of credit or rely upon other liquidity sources, including cash provided by operations.

Under the Company's existing indenture covenants, at September 30, 2007, the Company would have been permitted to issue up to a maximum of $1.4 billion in additional long-term unsecured indebtedness at then current market interest rates in addition to being able to issue new indebtedness to replace maturing debt.

The Company's 1974 indenture pursuant to which $399.0 million (or 40%) of the Company's long-term debt (as of September 30, 2007) was issued contains a cross-default provision whereby the failure by the Company to perform certain obligations under other borrowing arrangements could trigger an obligation to repay the debt outstanding under the indenture. In particular, a repayment obligation could be triggered if the Company fails (i) to pay any scheduled principal or interest or any debt under any other indenture or agreement or (ii) to perform any other term in any other such indenture or agreement, and the effect of the failure causes, or would permit the holders of the debt to cause, the debt under such indenture or agreement to become due prior to its stated maturity, unless cured or waived.

The Company's $300.0 million committed credit facility also contains a cross-default provision whereby the failure by the Company or its significant subsidiaries to make payments under other borrowing arrangements, or the occurrence of certain events affecting those other borrowing arrangements, could trigger an obligation to repay any amounts outstanding under the committed credit facility. In particular, a repayment obligation could be triggered if (i) the Company or any of its significant subsidiaries fail to make a payment when due of any principal or interest on any other indebtedness aggregating $20.0 million or more or (ii) an event occurs that causes, or would permit the holders of any other indebtedness aggregating $20.0 million or more to cause, such indebtedness to become due prior to its stated maturity. As of September 30, 2007, the Company had no debt outstanding under the committed credit facility.

Note F — Financial Instruments

Fair Values

The fair market value of the Company's long-term debt is estimated based on quoted market prices of similar issues having the same remaining maturities, redemption terms and credit ratings. Based on these criteria, the fair market value of long-term debt, including current portion, was as follows:

	At September 30			
	2007 Carrying Amount	2007 Fair Value	2006 Carrying Amount	2006 Fair Value
	(Thousands)			
Long-Term Debt	$ 999,024	$ 1,024,417	$ 1,118,600	$ 1,148,089

The fair value amounts are not intended to reflect principal amounts that the Company will ultimately be required to pay.

Temporary cash investments, notes payable to banks and commercial paper are stated at cost, which approximates their fair value due to the short-term maturities of those financial instruments. Investments in life insurance are stated at their cash surrender values as discussed below. Investments in an equity mutual fund and the stock of an insurance company (marketable equity securities), as discussed below, are stated at fair value based on quoted market prices.

Other Investments

Other investments includes cash surrender values of insurance contracts and marketable equity securities. The cash surrender values of the insurance contracts amounted to $54.7 million and $62.5 million at September 30, 2007 and 2006, respectively. The fair value of the equity mutual fund was $14.7 million and $12.9 million at September 30, 2007 and 2006, respectively. The gross unrealized gain on this equity mutual fund was $2.2 million and $1.0 million at September 30, 2007 and 2006, respectively. During 2005, the Company sold all of its interest in one equity mutual fund for $8.5 million and reinvested the proceeds in another equity mutual fund. The Company recognized a gain of $0.7 million on the sale of the equity mutual fund. The fair value of the stock of an insurance company was $16.3 million and $12.7 million at September 30, 2007 and 2006, respectively. The gross unrealized gain on this stock was $13.8 million and $10.3 million at September 30, 2007 and 2006, respectively. The insurance contracts and marketable equity securities are primarily informal funding mechanisms for various benefit obligations the Company has to certain employees.

Derivative Financial Instruments

The Company uses a variety of derivative financial instruments to manage a portion of the market risk associated with the fluctuations in the price of natural gas and crude oil. These instruments include price swap agreements, no cost collars and futures contracts.

Under the price swap agreements, the Company receives monthly payments from (or makes payments to) other parties based upon the difference between a fixed price and a variable price as specified by the agreement. The variable price is either a crude oil or natural gas price quoted on the NYMEX or a quoted natural gas price in various national natural gas publications. The majority of these derivative financial instruments are accounted for as cash flow hedges and are used to lock in a price for the anticipated sale of natural gas and crude oil production in the Exploration and Production segment and the All Other category. The Energy Marketing segment accounts for these derivative financial instruments as fair value hedges and uses them to hedge against falling prices, a risk to which they are exposed on their fixed price gas purchase commitments. The Energy Marketing segment also uses these derivative financial instruments to hedge against rising prices, a risk to which they are exposed on their fixed price sales commitments. At September 30, 2007, the Company had natural gas price swap agreements covering a notional amount of 13.2 Bcf extending through 2009 at a weighted average fixed rate of $8.20 per Mcf. Of this amount, 0.5 Bcf is accounted for as fair value hedges at a weighted average fixed rate of $6.94 per Mcf. The remaining 12.7 Bcf are accounted for as cash flow hedges at a weighted average fixed rate of $8.24 per Mcf. At September 30, 2007, the Company would have received a net $2.8 million to terminate the price swap agreements. The Company also had crude oil price swap agreements covering a notional amount of 1,485,000 bbls extending through 2009 at a weighted average fixed rate of $57.35 per bbl. At September 30, 2007, the Company would have had to pay a net $11.2 million to terminate the price swap agreements.

Under the no cost collars, the Company receives monthly payments from (or makes payments to) other parties when a variable price falls below an established floor price (the Company receives payment from the counterparty) or exceeds an established ceiling price (the Company pays the counterparty). The variable price is either a crude oil price quoted on the NYMEX or a quoted natural gas price in various national natural gas publications. These derivative financial instruments are accounted for as cash flow hedges and are used to lock in a price range for the anticipated sale of natural gas and crude oil production in the Exploration and Production segment. At September 30, 2007, the Company had no cost collars on natural gas covering a notional amount of 1.4 Bcf extending through 2008 with a weighted average floor price of $8.83 per Mcf and a weighted average ceiling price of $16.45 per Mcf. At September 30, 2007, the Company would have received $1.9 million to terminate the no cost collars.

At September 30, 2007, the Company had long (purchased) futures contracts covering 8.7 Bcf of gas extending through 2012 at a weighted average contract price of $8.72 per Mcf. They are accounted for as fair value hedges and are used by the Company's Energy Marketing segment to hedge against rising prices, a risk to which this segment is exposed due to the fixed price gas sales commitments that it enters into with residential, commercial and industrial customers. The Company would have had to pay $6.0 million to terminate these futures contracts at September 30, 2007.

At September 30, 2007, the Company had short (sold) futures contracts covering 5.9 Bcf of gas extending through 2009 at a weighted average contract price of $9.67 per Mcf. Of this amount, 3.9 Bcf is accounted for as cash flow hedges as these contracts relate to the anticipated sale of natural gas by the Energy Marketing segment. The remaining 2.0 Bcf is accounted for as fair value hedges used to hedge against falling prices on their fixed price gas purchasing commitments and hedge against decreases in natural gas prices associated with the eventual sale of gas in storage. The Company would have received $8.2 million to terminate these futures contracts at September 30, 2007.

The Company may be exposed to credit risk on some of the derivative financial instruments discussed above. Credit risk relates to the risk of loss that the Company would incur as a result of nonperformance by counterparties pursuant to the terms of their contractual obligations. To mitigate such credit risk, management performs a credit check, and then on an ongoing basis monitors counterparty credit exposure. Management has obtained guarantees from many of the parent companies of the respective counterparties to its derivative financial instruments. At September 30, 2007, the Company used nine counterparties for its over the counter derivative financial instruments. At September 30, 2007, no individual counterparty represented greater than 32% of total credit risk (measured as volumes hedged by an individual counterparty as a percentage of the Company's total volumes hedged). All of the counterparties (or the parent of the counterparty) were rated as investment grade entities at September 30, 2007.

In August 2007, the Exploration and Production segment's investment in Canada was sold. Of the $232.1 million in net proceeds received, $58.0 million was placed in escrow (denominated in Canadian dollars) pending receipt of a tax clearance certificate from the Canadian government. To hedge against foreign currency exchange risk, the Company entered into a $58.0 million forward contract to sell Canadian dollars. At September 30, 2007, due to the increase in the strength of the Canadian dollar versus the U.S. dollar, the Company had a $2.7 million derivative liability related to the collar. The Company records gains or losses associated with this forward contract directly to the income statement.

Note G — Retirement Plan and Other Post-Retirement Benefits

The Company has a tax-qualified, noncontributory, defined-benefit retirement plan (Retirement Plan) that covers approximately 73% of the employees of the Company. The Company provides health care and life insurance benefits for a majority of its retired employees under a post-retirement benefit plan (Post-Retirement Plan).

The Company's policy is to fund the Retirement Plan with at least an amount necessary to satisfy the minimum funding requirements of applicable laws and regulations and not more than the maximum amount deductible for federal income tax purposes. The Company has established VEBA trusts for its Post-Retirement Plan. Contributions to the VEBA trusts are tax deductible, subject to limitations contained in the Internal Revenue Code and regulations and are made to fund employees' post-retirement health care and life insurance benefits, as well as benefits as they are paid to current retirees. In addition, the Company has established 401(h) accounts for its Post-Retirement Plan. They are separate accounts within the Retirement Plan used to pay retiree medical benefits for the associated participants in the Retirement Plan. Contributions are tax-deductible when

made, subject to limitations contained in the Internal Revenue Code and regulations. Retirement Plan and Post-Retirement Plan assets primarily consist of equity and fixed income investments or units in commingled funds or money market funds.

The expected returns on plan assets of the Retirement Plan and Post-Retirement Plan are applied to the market-related value of plan assets of the respective plans. The market-related values of the Retirement Plan and Post-Retirement Plan assets are equal to market value as of the measurement date.

Reconciliations of the Benefit Obligations, Plan Assets and Funded Status, as well as the components of Net Periodic Benefit Cost and the Weighted Average Assumptions of the Retirement Plan and Post-Retirement Plan are shown in the tables below. The date used to measure the Benefit Obligations, Plan Assets and Funded Status is June 30, 2007, 2006 and 2005, respectively.

	Retirement Plan			Other Post-Retirement Benefits		
	Year Ended September 30			Year Ended September 30		
	2007	2006	2005	2007	2006	2005

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The Net Periodic Benefit Cost in the table above includes the effects of regulation. The Company recovers pension and post-retirement benefit costs in its Utility and Pipeline and Storage segments in accordance with the applicable regulatory commission authorizations. Certain of those commission authorizations established tracking mechanisms which allow the Company to record the difference between the amount of pension and post-retirement benefit costs recoverable in rates and the amounts of such costs as determined under SFAS 87 and SFAS 106 as either a regulatory asset or liability, as appropriate. Any activity under the tracking mechanisms (including the amortization of pension and post-retirement regulatory assets) is reflected in the Net Amortization and Deferral for Regulatory Purposes line item above.

In September 2006, the FASB issued SFAS 158, an amendment of SFAS 87, SFAS 88, SFAS 106, and SFAS 132R. SFAS 158 requires that companies recognize a net liability or asset to report the underfunded or overfunded status of their defined benefit pension and other post-retirement benefit plans on their balance sheets, as well as recognize changes in the funded status of a defined benefit post-retirement plan in the year in which the changes occur through comprehensive income. The pronouncement also specifies that a plan's assets and obligations that determine its funded status be measured as of the end of Company's fiscal year, with limited exceptions. Under SFAS 158, certain previously unrecognized actuarial gains and losses and previously unrecognized prior service costs for both the pension and other post-retirement benefit plans as well as a previously unrecognized transition obligation for the other post-retirement benefit plan are required to be recognized. These amounts were not required to be recorded on the Company's Consolidated Balance Sheet before the adoption of SFAS 158, but were instead amortized over a period of time. In accordance with SFAS 158, the Company has recognized the funded status of its benefit plans and implemented the disclosure requirements of SFAS 158 at September 30, 2007. The requirement to measure the plan assets and benefit obligations as of the Company's fiscal year-end date will be adopted by the Company by the end of fiscal 2009. Currently, the Company measures its plan assets and benefit obligations using a June 30th measurement date. The incremental effects of adopting the provisions of SFAS 158 on the Company's Consolidated Balance Sheet at September 30, 2007 are presented in the table below:

	Before Application of SFAS 158(1)	Consolidated SFAS 158 Impact	After Application of SFAS 158
		(Thousands)	
Qualified Retirement Plan			
Reduction in Prepaid Pension and Post-Retirement Benefit Costs	$ 51,612	$ (28,987)	$ 22,625
Increase in Other Regulatory Assets Related to SFAS 158	$ —	$ 17,731	$ 17,731
Reduction in Accumulated Other Comprehensive Income	$ —	$ 7,008	$ 7,008
Reduction in Deferred Income Taxes (under Deferred Credits)	$ —	$ 4,248	$ 4,248

Increase in Other Deferred Credits	$ (30,115)	$ (13,721)	$ (43,836)
Total Consolidated			
Reduction in Prepaid Pension and Post-Retirement Benefit Costs	$ 77,679	$ (16,673)	$ 61,006
Increase in Other Regulatory Assets Related to SFAS 158	$ —	$ 61,907	$ 61,907
Increase in Other Regulatory Liabilities Related to SFAS 158	$ —	$ (3,247)	$ (3,247)
Reduction in Accumulated Other Comprehensive Income	$ —	$ 12,482	$ 12,482
Reduction in Deferred Income Taxes (under Deferred Credits)	$ —	$ 7,569	$ 7,569
Increase in Post-Retirement Liabilities	$ (22,238)	$ (48,317)	$ (70,555)
Increase in Other Deferred Credits	$ (30,115)	$ (13,721)	$ (43,836)

(1) Amounts represent balances before applying the effects of the adoption of SFAS 158, but after giving effect to any necessary adjustments as a result of recognizing an additional minimum pension liability. At September 30, 2007, there was no additional minimum pension liability adjustment since the fair value of the plan assets exceeded the accumulated benefit obligation.

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The amounts recognized in accumulated other comprehensive loss, regulatory assets, and regulatory liabilities in fiscal 2007, as well as the amounts expected to be recognized in net periodic benefit cost in fiscal 2008 are presented in the table below:

	Retirement Plan	Other Post-Retirement Benefits (Thousands)	Non-Qualified Benefit Plan
Amounts Recognized In Accumulated Other Comprehensive Loss, Regulatory Assets and Regulatory Liabilities(1)			
Net Actuarial Gain/(Loss)	$ (22,684)	$ 6,768	$ (13,605)
Transition Obligation	—	(42,763)	—
Prior Service Cost	(6,303)	(8)	(116)
Net Amount Recognized	$ (28,987)	$ (36,003)	$ (13,721)
Amounts Expected to be Recognized in Net Periodic Benefit Cost in the Next Fiscal Year(1)			
Net Actuarial Gain/(Loss)	$ (11,064)	$ (2,927)	$ (1,218)
Transition Obligation	—	(7,127)	—
Prior Service Cost	(808)	(4)	(106)
Net Amount Expected to be Recognized	$ (11,872)	$ (10,058)	$ (1,324)

(1) Amounts presented are shown before recognizing deferred taxes.

In accordance with the provisions of SFAS 87, the Company recorded an additional minimum pension liability at September 30, 2005 representing the excess of the accumulated benefit obligation over the fair value of plan assets plus accrued amounts previously recorded. An intangible asset, as shown in the table above, offset the additional liability to the extent of previously Unrecognized Prior Service Cost. The amount in excess of Unrecognized Prior Service Cost was recorded net of the related tax benefit as accumulated other comprehensive loss. At September 30, 2006, the Company reversed the additional minimum pension liability, intangible asset and accumulated other comprehensive loss recorded in prior years since the fair value of the plan assets exceeded the accumulated benefit obligation at September 30, 2006. The pre-tax amounts of the change in accumulated other comprehensive (income) loss related to the additional minimum pension liability adjustment at September 30, 2006 and 2005 are shown in the table above. At September 30, 2007, prior to recognizing the impact of adopting SFAS 158, there was no additional minimum pension liability adjustment recorded since the fair value of the plan assets exceeded the accumulated benefit obligation. The projected benefit obligation, accumulated benefit obligation and fair value of assets for the Retirement Plan were as follows:

	2007	2006	2005
Projected Benefit Obligation	$ 742,519	$ 732,207	$ 825,204
Accumulated Benefit Obligation	$ 672,340	$ 660,026	$ 733,565
Fair Value of Plan Assets	$ 765,144	$ 664,520	$ 616,462

In 2007, other actuarial experience decreased the projected benefit obligation for the Retirement Plan by $3.0 million. There was no change to the discount rate used to estimate the projected benefit obligation for the Retirement Plan during 2007. The effect of the discount rate change for the Retirement Plan in 2006 was to decrease the projected benefit obligation of the Retirement Plan by $113.1 million. The discount rate change for the Retirement Plan in 2005 caused the projected benefit obligation to increase by $113.0 million.

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The Company made cash contributions totaling $24.9 million to the Retirement Plan during the year ended September 30, 2007. The Company expects that the annual contribution to the Retirement Plan in 2008 will be in the range of $15.0 million to $20.0 million. The following benefit payments, which reflect expected future service, are expected to be paid during the next five years and the five years thereafter: $46.7 million in 2008; $47.8 million in 2009; $49.0 million in 2010; $50.1 million in 2011; $51.3 million in 2012; and $283.3 million in the five years thereafter.

The Retirement Plan covers certain domestic employees hired before July 1, 2003. Employees hired after June 30, 2003 are eligible for a Retirement Savings Account benefit provided under the Company's defined contribution Tax-Deferred Savings Plans. Costs associated with the Retirement Savings Account benefit have been $0.4 million through September 30, 2007 (with $0.2 million and $0.1 million of costs occurring in 2007 and 2006, respectively). Costs associated with the Company's contributions to the Tax-Deferred Savings Plans were $4.1 million, $4.1 million, and $4.2 million for the years ended September 30, 2007, 2006 and 2005, respectively.

In addition to the Retirement Plan discussed above, the Company also has a Non Qualified benefit plan that covers a group of management employees designated by the Chief Executive Officer of the Company. This plan provides for defined benefit payments upon retirement of the management employee, or to the spouse upon death of the management employee. The net periodic benefit cost associated with this plan was $5.5 million, $5.4 million and $4.3 million in 2007, 2006 and 2005, respectively. For 2007, accumulated other comprehensive loss (pre-tax) of $8.0 million was recognized attributable to the adoption of SFAS 158. There were no amounts recognized in other comprehensive income (loss) attributable to the recognition of an additional minimum liability for 2006 and 2005. The accumulated benefit obligation for this plan was $28.8 million and $26.5 million at September 30, 2007 and 2006, respectively. The projected benefit obligation for the plan was $43.8 million and $44.5 million at September 30, 2007 and 2006, respectively. The actuarial valuations for this plan were determined based on a discount rate of 6.25%, 6.25% and 5.0% as of September 30, 2007, 2006 and 2005, respectively; a rate of compensation increase of 10.0% as of September 30, 2007, 2006 and 2005; and an expected long-term rate of return on plan assets of 8.25% at September 30, 2007, 2006 and 2005.

There was no change to the discount rate used to estimate the other post-retirement benefit obligation during 2007. Effective July 1, 2007, the Medicare Part B reimbursement trend, prescription drug trend and medical trend assumptions were changed. The effect of these assumption changes was to increase the other post-retirement benefit obligation by $8.6 million. Other actuarial experience decreased the other post-retirement benefit obligation in 2007 by $23.0 million.

The effect of the discount rate change in 2006 was to decrease the other post-retirement benefit obligation by $77.5 million. Effective July 1, 2006, the Medicare Part B reimbursement trend, prescription drug trend and medical trend assumptions were changed. The effect of these assumption changes was to decrease the other post-retirement benefit obligation by $1.7 million. A change in the disability assumption decreased the other post-retirement benefit obligation by $1.4 million. Other actuarial experience decreased the other post-retirement benefit obligation in 2006 by $34.4 million.

The effect of the discount rate change in 2005 was to increase the other post-retirement benefit obligation by $78.2 million. Effective July 1, 2005, the Medicare Part B reimbursement trend, prescription drug trend and medical trend assumptions were changed. The effect of these assumption changes was to increase the other post-retirement benefit obligation by $21.7 million. Also effective July 1, 2005, the percent of active female participants who are assumed to be married at retirement was changed. The effect of this assumption change was to decrease the other post-retirement benefit obligation by $6.9 million. Other actuarial experience increased the other post-retirement benefit obligation in 2005 by $17.9 million.

On December 8, 2003, the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (the Act) was signed into law. This Act introduced a prescription drug benefit under Medicare (Medicare Part D), as

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D. In accordance with FASB Staff Position FAS 106-2, "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003", since the Company is assumed to continue to provide a prescription drug benefit to retirees in the point of service and indemnity plans that is at least actuarially equivalent to Medicare Part D, the impact of the Act was reflected as of December 8, 2003.

The estimated gross benefit payments and gross amount of subsidy receipts are as follows:

	Benefit Payments	Subsidy Receipts
First Year	$ 23,990,000	$ (1,522,000)
Second Year	$ 25,973,000	$ (1,745,000)
Third Year	$ 28,007,000	$ (1,954,000)
Fourth Year	$ 29,917,000	$ (2,154,000)
Fifth Year	$ 31,406,000	$ (2,401,000)
Next Five Years	$ 176,333,000	$ (15,391,000)

In 2005, the Company began making separate estimates of the annual rate of increase in the per capita cost of covered medical care benefits for Pre and Post age 65 participants. The rate of increase for Pre age 65 participants was assumed to be 10.0% while the rate of increase for Post age 65 participants was assumed to be 7.5%. In 2006, the rate of increase for Pre age 65 participants was 9.0% and was assumed to gradually decline to 5.0% by the year 2014. The rate of increase for the Post age 65 participants was 7.0% in 2006 and was assumed to gradually decline to 5.0% by the year 2014. In 2007, the rate of increase for Pre age 65 participants was 8.0% and was assumed to gradually decline to 5.0% by the year 2014. The rate of increase for the Post age 65 participants was 6.67% in 2007 and was assumed to gradually decline to 5.0% by the year 2014. The annual rate of increase in the per capita cost of covered prescription drug benefits was assumed to be 12.5% for 2005, 11.0% for 2006, 10.0% for 2007, and gradually decline to 5.0% by the year 2014 and remain level thereafter. The annual rate of increase in the per capita Medicare Part B Reimbursement was assumed to be 6.0% for 2005, 5.25% for 2006, and 7.0% for 2007. The annual rate of increase for the Medicare Part B Reimbursement is expected to gradually decline to 5.0% by the year 2016.

The health care cost trend rate assumptions used to calculate the per capita cost of covered medical care benefits have a significant effect on the amounts reported. If the health care cost trend rates were increased by 1% in each year, the Other Post-Retirement Benefit Obligation as of October 1, 2007 would increase by $55.6 million. This 1% change would also have increased the aggregate of the service and interest cost components of net periodic post-retirement benefit cost for 2007 by $4.9 million. If the health care cost trend rates were decreased by 1% in each year, the Other Post-Retirement Benefit Obligation as of October 1, 2007 would decrease by $46.6 million. This 1% change would also have decreased the aggregate of the service and interest cost components of net periodic post-retirement benefit cost for 2007 by $4.0 million.

The Company made cash contributions including payments made directly to participants totaling $42.3 million to the Post-Retirement Plan during the year ended September 30, 2007. The Company expects that the annual contribution to the Post-Retirement Plan in 2008 will be in the range of $25.0 million to $35.0 million.

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The Company's Retirement Plan weighted average asset allocations at September 30, 2007, 2006 and 2005 by asset category are as follows:

Asset Category	Target Allocation 2008	Percentage of Plan Assets at September 30 2007	2006	2005
Equity Securities	60-75%	70%	67%	63%
Fixed Income Securities	20-35%	24%	26%	28%
Other	0-15%	6%	7%	9%
Total		100%	100%	100%

The Company's Post-Retirement Plan weighted average asset allocations at September 30, 2007, 2006 and 2005 by asset category are as follows:

Asset Category	Target Allocation 2008	Percentage of Plan Assets at September 30 2007	2006	2005
Equity Securities	85-100%	95%	95%	92%
Fixed Income Securities	0-15%	1%	1%	2%
Other	0-15%	4%	4%	6%
Total		100%	100%	100%

The Company's assumption regarding the expected long-term rate of return on plan assets is 8.25%. The return assumption reflects the anticipated long-term rate of return on the plan's current and future assets. The Company utilizes historical investment data, projected capital market conditions, and the plan's target asset class and investment manager allocations to set the assumption regarding the expected return on plan assets.

The long-term investment objective of the Retirement Plan trust and the Post-Retirement Plan VEBA trusts is to achieve the target total return in accordance with the Company's risk tolerance. Assets are diversified utilizing a mix of equities, fixed income and other securities (including real estate). Risk tolerance is established through consideration of plan liabilities, plan funded status and corporate financial condition.

Investment managers are retained to manage separate pools of assets. Comparative market and peer group performance of individual managers and the total fund are monitored on a regular basis, and reviewed by the Company's Retirement Committee on at least a quarterly basis.

The discount rate which is used to present value the future benefit payment obligations of the Retirement Plan, the Non-Qualified benefit plan, and the Post-Retirement Plan is 6.25% as of September 30, 2007. This rate is equal to the Moody's Aa Long-Term Corporate Bond index, rounded to the nearest 25 basis points. The duration of the securities underlying that index (approximately 13 years) reasonably matches the expected timing of anticipated future benefit payments (approximately 12 years). The Company also utilizes a yield curve model to determine the discount rate. The yield curve is a spot rate yield curve that provides a zero-coupon interest rate for each year into the future. Each year's anticipated benefit payments are discounted at the associated spot interest rate back to the measurement date. The discount rate is then determined based on the spot interest rate that results in the same present value when applied to the same anticipated benefit payments.

Note H — Commitments and Contingencies

Environmental Matters

The Company is subject to various federal, state and local laws and regulations relating to the protection of the environment. The Company has established procedures for the ongoing evaluation of its operations, to identify potential environmental exposures and to comply with regulatory policies and procedures.

It is the Company's policy to accrue estimated environmental clean-up costs (investigation and remediation) when such amounts can reasonably be estimated and it is probable that the Company will be required to incur such costs. At September 30, 2007, the Company has estimated its remaining clean-up costs related to former manufactured gas plant sites and third party waste disposal sites will be in the range of $12.1 million to $15.8 million. The minimum estimated liability of $12.1 million has been recorded on the Consolidated Balance Sheet at September 30, 2007. The Company expects to recover its environmental clean-up costs from a combination of rate recovery and insurance proceeds (refer to Note C — Regulatory Matters for further discussion of the insurance proceeds). Other than as discussed below, the Company is currently not aware of any material exposure to environmental liabilities. However, adverse changes in environmental regulations, new information or other factors could impact the Company.

(i) Former Manufactured Gas Plant Sites

The Company has incurred or is incurring clean-up costs at four former manufactured gas plant sites in New York and Pennsylvania. The Company continues to be responsible for future ongoing maintenance at one site. At a second site, remediation is complete and long-term maintenance and monitoring activities are ongoing. A third site, which allegedly contains, among other things, manufactured gas plant waste, is in the investigation stage.

At a fourth former manufactured gas plant site, the Company received, in 1998 and again in October 1999, notice that the NYDEC believes the Company is responsible for contamination discovered at the site located in New York for which the Company had not been named as a PRP. In February 2007, the NYDEC identified the Company as a PRP for the site and issued a proposed remedial action plan. The NYDEC estimated clean-up costs under its proposed remedy to be $8.9 million if implemented. Although the Company commented to the NYDEC that the proposed remedial action plan contained a number of material errors, omissions and procedural defects, the NYDEC, in a March 2007 Record of Decision, selected the remedy it had previously proposed. In July 2007, the Company appealed the NYDEC's Record of Decision to the New York State Supreme Court, Albany County. The Company believes that a negotiated resolution with the NYDEC regarding the site remains possible.

(ii) Third Party Waste Disposal Sites

The Company was identified by the NYDEC or the EPA as one of a number of companies considered to be PRPs with respect to two waste disposal sites in New York which were operated by unrelated third parties. The PRPs were alleged to have contributed to the materials that may have been collected at such waste disposal sites by the site operators. The remediation was completed at one site, with costs subject to an ongoing final reallocation process among five PRPs. At a second waste disposal site, settlement was reached in the amount of $9.3 million to be allocated among five PRPs. In September 2007, the reallocation process was concluded with respect to both of these sites whereby the Company was released from any future liability related to these sites, and was allocated a refund of approximately $0.5 million as a result of the conclusion of the cost reallocation process.

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

(iii) Other

In June 2007, the NYDEC notified the Company, as well as a number of other companies, of their liability with respect to a remedial account at a waste disposal site in New York. The notification identified the Company as one of approximately 400 other companies considered to be PRPs related to this site and requested that the remedy the NYDEC proposed in a Record of Decision issued in March 2006 be performed. The estimated clean-up costs under the remedy selected by the NYDEC are estimated to be approximately $13.0 million if implemented. The Company is in the process of organizing a group with the other PRPs and negotiating an Order on Consent with the NYDEC to perform the remedy. The Company has not been able to reasonably estimate the probability or extent of its share of potential liability at this site.

Other

The Company, in its Utility segment, Energy Marketing segment, and All Other category, has entered into contractual commitments in the ordinary course of business, including commitments to purchase gas, transportation, and storage service to meet customer gas supply needs. Substantially all of these contracts expire within the next five years. The future gas purchase, transportation and storage contract commitments during the next five years and thereafter are as follows: $766.5 million in 2008, $114.5 million in 2009, $50.8 million in 2010, $22.1 million in 2011, $8.8 million in 2012, and $23.3 million thereafter. In the Utility segment, these costs are subject to state commission review, and are being recovered in customer rates. Management believes that, to the extent any stranded pipeline costs are generated by the unbundling of services in the Utility segment's service territory, such costs will be recoverable from customers.

The Company has entered into leases for the use of buildings, vehicles, construction tools, meters, computer equipment and other items. These leases are accounted for as operating leases. The future lease commitments during the next five years and thereafter are as follows: $6.7 million in 2008, $5.8 million in 2009, $4.4 million in 2010, $2.9 million in 2011, $2.6 million in 2012, and $13.1 million thereafter.

The Company has entered into several contractual commitments associated with the construction of the Empire Connector project, including the pipeline construction itself and construction of a compressor station, as well as other contractual commitments for engineering and consulting services. The Empire Connector is scheduled to go in service by November 2008. As of September 30, 2007, the future contractual commitments related to the construction of the Empire Connector during the next two years are as follows: $118.3 million in 2008 and $0.6 million in 2009.

The Company is involved in other litigation arising in the normal course of business. In addition to the regulatory matters discussed in Note C — Regulatory Matters, the Company is involved in other regulatory matters arising in the normal course of business. These other litigation and regulatory matters may include, for example, negligence claims and tax, regulatory or other governmental audits, inspections, investigations and other proceedings. These matters may involve state and federal taxes, safety, compliance with regulations, rate base, cost of service and purchased gas cost issues, among other things. While these normal-course matters could have a material effect on earnings and cash flows in the period in which they are resolved, they are not expected to change materially the Company's present liquidity position, nor to have a material adverse effect on the financial condition of the Company.

Note I — Discontinued Operations

On August 31, 2007, the Company completed the sale of SECI, Seneca's wholly owned subsidiary that operated in Canada, to NAL Oil & Gas Trust. The Company received approximately $232.1 million of proceeds from the sale, of which $58.0 million was placed in escrow pending receipt of a tax clearance certificate from the Canadian government. The sale resulted in the recognition of a gain of approximately $120.3 million, net of tax, during the fourth quarter of 2007. SECI is engaged in the exploration for, and the development and purchase of,

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

natural gas and oil reserves in the provinces of Alberta, Saskatchewan and British Columbia in Canada. The decision to sell was based on lower than expected returns from the Canadian oil and gas properties combined with difficulty in finding significant new reserves. Seneca will continue its exploration and development activities in the Gulf of Mexico, in California and in Appalachia. As a result of the decision to sell SECI, the Company began presenting all SECI operations as discontinued operations during the fourth quarter of 2007.

The following is selected financial information of the discontinued operations for SECI:

	Year Ended September 30		
	2007	2006	2005
		(Thousands)	
Operating Revenues	$ 50,495	$ 71,984	$ 62,775
Operating Expenses	33,306	151,532	40,600

Gain on Disposal, Net of Taxes of $39,572	120,301	—	—
Income (Loss) from Discontinued Operations	$ 135,780	$ (46,523)	$ 15,078

On July 18, 2005, the Company completed the sale of its entire 85.16% interest in U.E., a district heating and electric generation business in the Bohemia region of the Czech Republic, to Czech Energy Holdings, a.s. for sales proceeds of approximately $116.3 million. The sale resulted in the recognition of a gain of approximately $25.8 million, net of tax, at September 30, 2005. Market conditions during 2005, including the increasing value of the Czech currency as compared to the U.S. dollar, caused the value of the assets of U.E. to increase, providing an opportunity to sell the U.E. operations at a profit for the Company. As a result of the decision to sell its majority interest in U.E., the Company began presenting the Czech Republic operations, which are primarily comprised of U.E., as discontinued operations in June 2005. U.E. was the major component of the Company's International segment. With this change in presentation, the Company discontinued all reporting for an International segment.

Income from Discontinued Operations	10,199
Gain on Disposal, Net of Taxes of $1,612	25,774
Income from Discontinued Operations	$ 35,973

Note J — Business Segment Information

The Company has five reportable segments: Utility, Pipeline and Storage, Exploration and Production, Energy Marketing, and Timber. The breakdown of the Company's operations into reportable segments is based upon a combination of factors including differences in products and services, regulatory environment and geographic factors.

The Utility segment operations are regulated by the NYPSC and the PaPUC and are carried out by Distribution Corporation. Distribution Corporation sells natural gas to retail customers and provides natural gas transportation services in western New York and northwestern Pennsylvania.

The Pipeline and Storage segment operations are regulated. The FERC regulates the operations of Supply Corporation and the NYPSC regulates the operations of Empire. Supply Corporation transports and stores natural gas for utilities (including Distribution Corporation), natural gas marketers (including NFR) and pipeline companies in the northeastern United States markets. Empire transports natural gas from the United States/Canadian border near Buffalo, New York into Central New York just north of Syracuse, New York. Empire transports gas to major industrial companies, utilities (including Distribution Corporation) and power producers.

The Exploration and Production segment, through Seneca, is engaged in exploration for, and development and purchase of, natural gas and oil reserves in California, in the Appalachian region of the United States, and in the Gulf Coast region of Texas, Louisiana and Alabama. Seneca's production is, for the most part, sold to purchasers located in the vicinity of its wells. As disclosed in Note I — Discontinued Operations, on August 31, 2007, Seneca completed the sale of SECI, its wholly owned subsidiary operating in Canada, for a gain of approximately $120.3 million, net of tax, during the fourth quarter of 2007. As a result of the sale, SECI's operations have been reported as discontinued operations and previous period segment information has been restated to reflect this change.

The Energy Marketing segment is comprised of NFR's operations. NFR markets natural gas to industrial, commercial, public authority and residential end-users in western and central New York and northwestern Pennsylvania, offering competitively priced energy and energy management services for its customers.

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The Timber segment's operations are carried out by the Northeast division of Seneca and by Highland. This segment has timber holdings (primarily high quality hardwoods) in the northeastern United States and sawmills and kilns in Pennsylvania.

The data presented in the tables below reflect the reportable segments and reconciliations to consolidated amounts. The accounting policies of the segments are the same as those described in Note A — Summary of Significant Accounting Policies. Sales of products or services between segments are billed at regulated rates or at market rates, as applicable. The Company evaluates segment performance based on income before discontinued operations, extraordinary items and cumulative effects of changes in accounting (when applicable). When these items are not applicable, the Company evaluates performance based on net income.

As disclosed in Note I — Discontinued Operations, the Company completed the sale of its majority interest in U.E., a district heating and electric generation business in the Czech Republic, on July 18, 2005. As a result of the sale of its majority interest in U.E., the Company discontinued all reporting for an International segment. All Czech Republic operations have been reported as discontinued operations. Any remaining international activity has been included in corporate operations.

United States	$ 3,334,274	$ 3,181,769	$ 2,978,680
Assets of Discontinued Operations	—	97,234	171,196
	$ 3,334,274	$ 3,279,003	$ 3,149,876

(1) Revenue is based upon the country in which the sale originates. This table excludes revenues from Canadian discontinued operations of $50,495, $71,984 and $62,775 for September 30, 2007, 2006 and 2005, respectively.

Note K — Investments in Unconsolidated Subsidiaries

The Company's unconsolidated subsidiaries consist of equity method investments in Seneca Energy, Model City and ESNE. The Company has 50% interests in each of these entities. Seneca Energy and Model City generate and sell electricity using methane gas obtained from landfills owned by outside parties. ESNE generates electricity from an 80-megawatt, combined cycle, natural gas-fired power plant in North East, Pennsylvania. ESNE sells its electricity into the New York power grid.

During 2007, Horizon Power made capital contributions of $3.3 million to Seneca Energy. Seneca Energy is in the process of expanding its generating capacity from 11.2 megawatts to 17.6 megawatts.

In September 2005, the Company recorded an impairment of $4.2 million of its equity investment in ESNE due to a decline in the fair market value of ESNE. This impairment was recorded in accordance with APB 18.

A summary of the Company's investments in unconsolidated subsidiaries at September 30, 2007 and 2006 is as follows:

	At September 30 2007	2006
	(Thousands)	
ESNE	$ 4,652	$ 4,486
Seneca Energy	12,033	5,366
Model City	1,571	1,738
	$ 18,256	$ 11,590

Note L — Intangible Assets

As a result of the Empire and Toro acquisitions, the Company acquired certain intangible assets during 2003. In the case of the Empire acquisition, the intangible assets represent the fair value of various long-term transportation contracts with Empire's customers. In the case of the Toro acquisition, the intangible assets

Table of Contents

NATIONAL FUEL GAS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

represent the fair value of various long-term gas purchase contracts with the various landfills. These intangible assets are being amortized over the lives of the transportation and gas purchase contracts with no residual value at the end of the amortization period. The weighted-average amortization period for the gross carrying amount of the transportation contracts is 8 years. The weighted-average amortization period for the gross carrying amount of the gas purchase contracts is 20 years. Details of these intangible assets are as follows (in thousands):

	At September 30, 2007			At September 30, 2006
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Net Carrying Amount
Intangible Assets Subject to Amortization:				
Long-Term Transportation Contracts	$ 8,580	$ (4,989)	$ 3,591	$ 4,660
Long-Term Gas Purchase Contracts	31,864	(6,619)	25,245	26,838
	$ 40,444	$ (11,608)	$ 28,836	$ 31,498
Aggregate Amortization Expense:				
For the Year Ended September 30, 2007	$ 2,662			
For the Year Ended September 30, 2006	$ 2,662			
For the Year Ended September 30, 2005	$ 2,662			

The gross carrying amount of intangible assets subject to amortization at September 30, 2007 remained unchanged from September 30, 2006. The only activity with regard to intangible assets subject to amortization was amortization expense as shown on the table above. Amortization expense for the long-term transportation contracts is estimated to be $1.1 million in 2008, $0.5 million in 2009, and $0.4 million in 2010, 2011 and 2012. Amortization expense for the long-term gas purchase contracts is estimated to be $1.6 million annually for 2008, 2009, 2010, 2011 and 2012.

Note M — Quarterly Financial Data (unaudited)

In the opinion of management, the following quarterly information includes all adjustments necessary for a fair statement of the results of operations for such periods. Per common share amounts are calculated using the weighted average number of shares outstanding during each quarter. The total of all quarters may differ from the per common share amounts shown on the Consolidated Statements of Income. Those per common share amounts are based on the weighted average number of shares outstanding for the entire fiscal year. Because of the seasonal nature of the Company's heating business, there are substantial variations in operations reported on a quarterly basis.

(1) Includes a $120.3 million gain on the sale of SECI.

(2) Includes $4.8 million of income associated with the reversal of reserve for preliminary project costs associated with the Empire Connector project.

(3) Includes a $2.3 million of income associated with the reversal of a purchased gas expense accrual related to the resolution of a contingency.

(4) Includes a $1.9 million positive earnings impact associated with the discontinuance of hedge accounting on an interest rate collar.

(5) Includes expense of $29.1 million related to the impairment of oil and gas producing properties.

(6) Includes expense of $39.5 million related to the impairment of oil and gas producing properties.

(7) Includes income of $6.1 million related to income tax adjustments.

(8) Includes income of $5.1 million related to income tax adjustments.

(9) Includes income of $2.6 million related to a regulatory adjustment.

Note N — Market for Common Stock and Related Shareholder Matters (unaudited)

At September 30, 2007, there were 16,989 registered shareholders of Company common stock. The common stock is listed and traded on the New York Stock Exchange. Information related to restrictions on the payment of dividends can be found in Note E — Capitalization and Short-Term Borrowings. The quarterly price

ranges (based on intra-day prices) and quarterly dividends declared for the fiscal years ended September 30, 2007 and 2006, are shown below:

Quarter Ended	Price Range High	Price Range Low	Dividends Declared
2007			
9/30/2007	$ 47.00	$ 40.95	$ .31
6/30/2007	$ 47.87	$ 42.75	$ .31
3/31/2007	$ 43.79	$ 36.94	$ .30
12/31/2006	$ 40.21	$ 35.02	$ .30
2006			
9/30/2006	$ 39.16	$ 34.95	$ .30
6/30/2006	$ 36.75	$ 31.33	$ .30
3/31/2006	$ 35.43	$ 30.60	$ .29
12/31/2005	$ 35.27	$ 29.25	$ .29

Note O — Supplementary Information for Oil and Gas Producing Activities (unaudited)

The following supplementary information is presented in accordance with SFAS 69, "Disclosures about Oil and Gas Producing Activities," and related SEC accounting rules. All monetary amounts are expressed in U.S. dollars.

Capitalized Costs Relating to Oil and Gas Producing Activities

	At September 30 2007	At September 30 2006
	(Thousands)	
Proved Properties(1)	$ 1,583,956	$ 1,884,049
Unproved Properties	20,005	41,930
	1,603,961	1,925,979
Less — Accumulated Depreciation, Depletion and Amortization	627,073	929,921
	$ 976,888	$ 996,058

(1) Includes asset retirement costs of $40.9 million and $42.2 million at September 30, 2007 and 2006, respectively.

Costs related to unproved properties are excluded from amortization until proved reserves are found or it is determined that the unproved properties are impaired. All costs related to unproved properties are reviewed quarterly to determine if impairment has occurred. The amount of any impairment is transferred to the pool of capitalized costs being amortized. Following is a summary of costs excluded from amortization at September 30, 2007:

	Total as of September 30, 2007	Year Costs Incurred 2007	2006	2005	Prior
	(Thousands)				
Acquisition Costs	$20,005	$5,957	$12,485	$1,099	$464

Reserve Quantity Information

The Company's proved oil and gas reserves are located in the United States. The estimated quantities of proved reserves disclosed in the table below are based upon estimates by qualified Company geologists and engineers and are audited by independent petroleum engineers. Such estimates are inherently imprecise and may be subject to substantial revisions as a result of numerous factors including, but not limited to, additional development activity, evolving production history and continual reassessment of the viability of production under varying economic conditions.

Standardized Measure of Discounted Future Net Cash Flows Relating to Proved Oil and Gas Reserves

The Company cautions that the following presentation of the standardized measure of discounted future net cash flows is intended to be neither a measure of the fair market value of the Company's oil and gas properties, nor an estimate of the present value of actual future cash flows to be obtained as a result of their development and production. It is based upon subjective estimates of proved reserves only and attributes no value to categories of reserves other than proved reserves, such as probable or possible reserves, or to unproved acreage. Furthermore, it is based on year-end prices and costs adjusted only for existing contractual changes, and it assumes an arbitrary discount rate of 10%. Thus, it gives no effect to future price and cost changes certain to occur under widely fluctuating political and economic conditions.

The standardized measure is intended instead to provide a means for comparing the value of the Company's proved reserves at a given time with those of other oil- and gas-producing companies than is provided by a simple comparison of raw proved reserve quantities.

Item 9 ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure***

None

Item 9A ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures

The term "disclosure controls and procedures" is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. These rules refer to the controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. The Company's management, including the Chief Executive Officer and Principal Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, the Company's Chief Executive Officer and Principal Financial Officer concluded that the Company's disclosure controls and procedures were effective as of September 30, 2007.

Management's Report on Internal Control over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of September 30, 2007. In making this assessment, management used the framework and criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control — Integrated Framework*. Based on this assessment, management concluded that the Company maintained effective internal control over financial reporting as of September 30, 2007.

PricewaterhouseCoopers LLP, the independent registered public accounting firm that audited the Company's consolidated financial statements included in this Annual Report on Form 10-K, has issued a report on the effectiveness of the Company's internal control over financial reporting as of September 30, 2007. The report appears in Part II, Item 8 of this Annual Report on Form 10-K.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the quarter ended September 30, 2007 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B ***Other Information***

PART III

Item 10 ***Directors, Executive Officers and Corporate Governance***

The information required by this item concerning the directors of the Company and corporate governance is omitted pursuant to Instruction G of Form 10-K since the Company's definitive Proxy Statement for its 2008

Table of Contents

Annual Meeting of Stockholders will be filed with the SEC not later than 120 days after September 30, 2007. The information concerning directors is set forth in the definitive Proxy Statement under the headings entitled "Nominees for Election as Directors for Three-Year Terms to Expire in 2011," "Directors Whose Terms Expire in 2010," "Directors Whose Terms Expire in 2009," and "Section 16(a) Beneficial Ownership Reporting Compliance" and is incorporated herein by reference. The information concerning corporate governance is set forth in the definitive Proxy Statement under the heading entitled "Meetings of the Board of Directors and Standing Committees" and is incorporated herein by reference. Information concerning the Company's executive officers can be found in Part I, Item 1, of this report.

The Company has adopted a Code of Business Conduct and Ethics that applies to the Company's directors, officers and employees and has posted such Code of Business Conduct and Ethics on the Company's website, www.nationalfuelgas.com, together with certain other corporate governance documents. Copies of the Company's Code of Business Conduct and Ethics, charters of important committees, and Corporate Governance Guidelines will be made available free of charge upon written request to Investor Relations, National Fuel Gas Company, 6363 Main Street, Williamsville, New York 14221.

The Company intends to satisfy the disclosure requirement under Item 5.05 of Form 8-K regarding an amendment to, or a waiver from, a provision of its code of ethics that applies to the Company's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, and that relates to any element of the code of ethics definition enumerated in paragraph (b) of Item 406 of the SEC's Regulation S-K, by posting such information on its website, www.nationalfuelgas.com.

Item 11 *Executive Compensation*

The information required by this item is omitted pursuant to Instruction G of Form 10-K since the Company's definitive Proxy Statement for its 2008 Annual Meeting of Stockholders will be filed with the SEC not later than 120 days after September 30, 2007. The information concerning executive compensation is set forth in the definitive Proxy Statement under the headings "Executive Compensation" and "Compensation Committee Interlocks and Insider Participation" and, excepting the "Report of the Compensation Committee," is incorporated herein by reference.

Item 12 *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

Equity Compensation Plan Information

The information required by this item is omitted pursuant to Instruction G of Form 10-K since the Company's definitive Proxy Statement for its 2008 Annual Meeting of Stockholders will be filed with the SEC not later than 120 days after September 30, 2007. The equity compensation plan information is set forth in the definitive Proxy Statement under the heading "Equity Compensation Plan Information" and is incorporated herein by reference.

Security Ownership and Changes in Control

(a) Security Ownership of Certain Beneficial Owners

The information required by this item is omitted pursuant to Instruction G of Form 10-K since the Company's definitive Proxy Statement for its 2008 Annual Meeting of Stockholders will be filed with the SEC not later than 120 days after September 30, 2007. The information concerning security ownership of certain beneficial owners is set forth in the definitive Proxy Statement under the heading "Security Ownership of Certain Beneficial Owners and Management" and is incorporated herein by reference.

(b) Security Ownership of Management

The information required by this item is omitted pursuant to Instruction G of Form 10-K since the Company's definitive Proxy Statement for its 2008 Annual Meeting of Stockholders will be filed with the SEC not later than 120 days after September 30, 2007. The information concerning security ownership of

ONEOK PARTNERS, L.P.
QUARTERLY REPORT ON FORM 10-Q

As used in this Quarterly Report on Form 10-Q, "we," "our," "us" or the "Partnership" refers to ONEOK Partners, L.P. and its subsidiary, ONEOK Partners Intermediate Limited Partnership and its subsidiaries, unless the context indicates otherwise.

The statements in this Quarterly Report on Form 10-Q that are not historical information, including statements concerning plans and objectives of management for future operations, economic performance or related assumptions, are forward-looking statements. Forward-looking statements may include words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "should," "goal," "forecast," "could," "may," "continue," "might," "potential," "scheduled" and other words and terms of similar meaning. Although we believe that our expectations regarding future events are based on reasonable assumptions, we can give no assurance that our goals will be achieved. Important factors that could cause actual results to differ materially from those in the forward-looking statements are described under Part I, Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations, "Forward-Looking Statements" and Part II, Item 1A, "Risk Factors" in this Quarterly Report on Form 10-Q and under Part I, Item 1A, "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2007.

Table of Contents

GLOSSARY

The abbreviations, acronyms and industry terminology used in this Quarterly Report on Form 10-Q are defined as follows:

AFUDC	Allowance for funds used during construction
ARB	Accounting Research Bulletin
Bbl	Barrels, 1 barrel is equivalent to 42 United States gallons
Bbl/d	Barrels per day
BBtu/d	Billion British thermal units per day
Btu	British thermal units, a measure of the amount of heat required to raise the temperature of one pound of water one degree Fahrenheit
Bushton Plant	Bushton Gas Processing Plant
EITF	Emerging Issues Task Force
Exchange Act	Securities Exchange Act of 1934, as amended
FASB	Financial Accounting Standards Board
FERC	Federal Energy Regulatory Commission
FIN	FASB Interpretation
Fort Union Gas Gathering	Fort Union Gas Gathering, L.L.C.
GAAP	Generally Accepted Accounting Principles in the United States
Guardian Pipeline	Guardian Pipeline, L.L.C.
Heartland	Heartland Pipeline Company
KCC	Kansas Corporation Commission
KDHE	Kansas Department of Health and Environment
LIBOR	London Interbank Offered Rate
MBbl	Thousand barrels
MBbl/d	Thousand barrels per day
Midwestern Gas Transmission	Midwestern Gas Transmission Company
MMBtu	Million British thermal units
MMBtu/d	Million British thermal units per day
MMcf/d	Million cubic feet per day
Moody’s	Moody’s Investors Service, Inc.
NBP Services	NBP Services, LLC, a subsidiary of ONEOK
NGL(s)	Natural gas liquid(s)
Northern Border Pipeline	Northern Border Pipeline Company
NYMEX	New York Mercantile Exchange
OBPI	ONEOK Bushton Processing Inc.
OCC	Oklahoma Corporation Commission
OkTex Pipeline	OkTex Pipeline Company, L.L.C.
ONEOK	ONEOK, Inc.
ONEOK Partners GP	ONEOK Partners GP, L.L.C., a wholly owned subsidiary of ONEOK, Inc. and our sole general partner
OPIS	Oil Price Information Service
Overland Pass Pipeline Company	Overland Pass Pipeline Company LLC
Partnership Agreement	Third Amended and Restated Agreement of Limited Partnership of ONEOK Partners, L.P., as amended
S&P	Standard & Poor’s Rating Group
SEC	Securities and Exchange Commission
Statement	Statement of Financial Accounting Standards

AVAILABLE INFORMATION

You can access financial and other information, including news releases, webcasts and presentations, environmental safety and health information, and corporate governance information at our website at www.oneokpartners.com. We also make available on our website copies of our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, amendments to those reports filed or furnished to the SEC pursuant to Section 13(a) or 15(d) of the Exchange Act and reports of holdings of our securities filed by our officers and directors under Section 16 of the Exchange Act as soon as reasonably practicable after filing such material electronically or otherwise furnishing it to the SEC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

A. SUMMARY OF ACCOUNTING POLICIES

Our accompanying unaudited consolidated financial statements have been prepared in accordance with GAAP and reflect all adjustments that, in our opinion, are necessary for a fair presentation of the results for the interim periods presented. All such adjustments are of a normal recurring nature. These unaudited consolidated financial statements should be read in conjunction with our audited consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2007.

Our accounting policies are consistent with those disclosed in Note A of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2007.

Critical Accounting Policies

Impairment of Goodwill and Intangible Assets - We apply the provisions of Statement 142, "Goodwill and Other Intangible Assets," and perform our annual impairment test on July 1. There were no impairment charges resulting from our July 1, 2008, impairment testing, and no events indicating an impairment have occurred subsequent to that date.

Significant Accounting Policies

Property, Plant and Equipment - The following table sets forth our property, plant and equipment, by segment, for the periods presented.

	September 30, 2008	December 31, 2007
	(Thousands of dollars)	
Non-Regulated		
Natural Gas Gathering and Processing	**$ 1,328,693**	$ 1,227,475
Natural Gas Pipelines	**166,889**	162,390
Natural Gas Liquids Gathering and Fractionation	**851,476**	672,047
Other	**50,401**	50,482
Regulated		
Natural Gas Pipelines	**1,361,142**	1,184,112
Natural Gas Liquids Pipelines	**1,685,440**	1,139,865
Property, plant and equipment	**5,444,041**	4,436,371
Accumulated depreciation and amortization	**849,699**	776,185
Net property, plant and equipment	**$ 4,594,342**	$ 3,660,186

At September 30, 2008, and December 31, 2007, property, plant and equipment on our Consolidated Balance Sheets included construction work in process of $1.4 billion and $0.9 billion, respectively, that had not yet been put in service and therefore was not being depreciated.

Other

Fair Value Measurements - In September 2006, the FASB issued Statement 157, "Fair Value Measurements," which establishes a framework for measuring fair value and requires additional disclosures about fair value measurements. Beginning January 1, 2008, we partially applied Statement 157 as allowed by FASB Staff Position (FSP) 157-2, "Effective Date of FASB Statement No. 157," which delayed the effective date of Statement 157 for nonrecurring fair value measurements associated with our nonfinancial assets and liabilities. As of January 1, 2008, we applied the provisions of Statement 157 to our recurring fair value measurements, and the impact was not material. See Note C for disclosures of fair value measurements for our financial instruments. Under FSP 157-2, we will be required to apply Statement 157 to our nonrecurring fair value measurements associated with our nonfinancial assets and liabilities beginning January 1, 2009. We are currently reviewing the impact of Statement 157 to our nonrecurring fair value measurements associated with our nonfinancial assets and liabilities, as well as the potential impact on our consolidated financial statements. FSP 157-3, "Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active," which clarified the

Table of Contents

application of Statement 157 in inactive markets, was issued in October 2008 and was effective for our September 30, 2008, consolidated financial statements. FSP 157-3 did not have a material impact on our consolidated financial statements.

In February 2007, the FASB issued Statement 159, "The Fair Value Option for Financial Assets and Financial Liabilities," which allows companies to elect to measure specified financial assets and liabilities, firm commitments, and nonfinancial warranty and insurance contracts at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings each reporting period. At January 1, 2008, we did not elect the fair value option under Statement 159, and therefore there was no impact on our consolidated financial statements.

Master Netting Arrangements - In April 2007, the FASB issued Staff Position No. FIN 39-1, "Amendment of FASB Interpretation No. 39," which requires entities that offset the fair value amounts recognized for derivative receivables and payables to also offset the fair value amounts recognized for the right to reclaim cash collateral with the same counterparty under a master netting agreement. We applied the provisions of FIN 39-1 to our consolidated financial statements beginning January 1, 2008, and the impact was not material. At September 30, 2008, we had no cash collateral held or posted under our master netting arrangement.

Business Combinations - In December 2007, the FASB issued Statement 141R, "Business Combinations," which will require most identifiable assets, liabilities, noncontrolling interest (previously referred to as minority interest) and goodwill acquired in a business combination to be recorded at fair value. Statement 141R is effective for our year beginning January 1, 2009, and will be applied prospectively. Because the provisions of Statement 141R are applied prospectively, our 2009 and subsequent consolidated financial statements will not be impacted unless we complete a business combination.

Noncontrolling Interests - In December 2007, the FASB issued Statement 160, "Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51," which requires noncontrolling interest (previously referred to as minority interest) to be reported as a component of equity. Statement 160 is effective for our year beginning January 1, 2009, and will require retroactive adoption of the presentation and disclosure requirements for existing minority interests. Based upon our initial review of Statement 160, we do not expect the provisions of Statement 160 to have a material impact on our consolidated financial statements; however, certain financial statement presentation changes and additional required disclosures will be applicable to us.

Derivative Instruments and Hedging Activities Disclosure - In March 2008, the FASB issued Statement 161, "Disclosures about Derivative Instruments and Hedging Activities - an amendment to FASB Statement No. 133," which requires enhanced disclosures about how derivative and hedging activities affect our financial position, financial performance and cash flows. Statement 161 is effective for our year beginning January 1, 2009, and will be applied prospectively.

Net Income Per Unit - The FASB ratified EITF 07-4, "Application of the Two-Class Method under FASB Statement No. 128 to Master Limited Partnerships," in March 2008. EITF 07-4 results in the allocation of undistributed current-period earnings to the unitholders using the two-class method in periods in which earnings exceed distributions. When distributions to participating securities exceed current-period earnings, the excess distributions generate an undistributed loss that would be allocated back to the equity interests based on the contractual terms of the partnership agreement. EITF 07-4 is effective for our year beginning January 1, 2009, and requires retrospective application. We are currently reviewing the impact of EITF 07-4 to our net income per unit computations.

Reclassifications - Certain amounts in our consolidated financial statements have been reclassified to conform to the 2008 presentation. These reclassifications did not impact previously reported net income or partners' equity.

B. ACQUISITION

In October 2007, we completed the acquisition of an interstate natural gas liquids and refined petroleum products pipeline system and related assets from a subsidiary of Kinder Morgan Energy Partners, L.P. for approximately $300 million, before working capital adjustments. The system extends from Bushton and Conway, Kansas, to Chicago, Illinois, and transports, stores and delivers a full range of NGL and refined petroleum products. The FERC-regulated system spans 1,624 miles and has a capacity to transport up to 134 MBbl/d. The transaction also included approximately 978 MBbl of owned storage capacity, eight NGL terminals and a 50 percent ownership of Heartland. ConocoPhillips owns the other 50 percent of Heartland and is the managing partner of the Heartland joint venture, which consists primarily of three refined petroleum products terminals and connecting pipelines. Our investment in Heartland is accounted for under the equity method of accounting. Financing for this transaction came from a portion of the proceeds of our September 2007 issuance of $600 million 6.85 percent Senior Notes due 2037. The working capital settlement was finalized in April 2008, with no material adjustments.

Table of Contents

C. FAIR VALUE MEASUREMENTS

As discussed in Note A, we applied the provisions of Statement 157 as of January 1, 2008, to our recurring fair value measurements.

Determining Fair Value - Statement 157 defines fair value as the price that would be received to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. We use the income approach to determine the fair value of our derivative assets and liabilities and consider the markets in which the transactions are executed. While many of the contracts in our portfolio are executed in liquid markets where price transparency exists, some contracts are executed in markets for which market prices may exist but the market may be relatively inactive. This results in limited price transparency that requires management's judgment and assumptions to estimate fair values. For certain transactions, we utilize modeling techniques using NYMEX-settled pricing data and historical correlations of NGL product prices to crude oil. We validate our valuation inputs with third-party information and settlement prices from other sources, where available. In addition, as prescribed by the income approach, we compute the fair value of our derivative portfolio by discounting the projected future cash flows from our derivative assets and liabilities to present value. The interest rate yields used to calculate the present value discount factors are derived from LIBOR, Eurodollar futures and Treasury swaps. The projected cash flows are then multiplied by the appropriate discount factors to determine the present value or fair value of our derivative instruments. Finally, we consider the credit risk of our counterparties with whom our derivative assets and liabilities are executed. Although we use our best estimates to determine the fair value of the derivative contracts we have executed, the ultimate market prices realized could differ from our estimates, and the differences could be significant.

Fair Value Hierarchy - Statement 157 establishes the fair value hierarchy that prioritizes inputs to valuation techniques based on observable and unobservable data and categorizes the inputs into three levels, with the highest priority given to Level 1 and the lowest priority given to Level 3. The levels are described below.

- Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2 - Significant observable pricing inputs other than quoted prices included within Level 1 that are either directly or indirectly observable as of the reporting date. Essentially, this represents inputs that are derived principally from or corroborated by observable market data.
- Level 3 - Generally unobservable inputs, which are developed based on the best information available and may include our own internal data.

Determining the appropriate classification of our fair value measurements within the fair value hierarchy requires management's judgment regarding the degree to which market data is observable or corroborated by observable market data. During the third quarter of 2008, we revised our categorization of fair value measurements for non-exchange traded derivative contracts from Level 1 to Level 2, as discussed below.

The following table sets forth our recurring fair value measurements for the period indicated.

	September 30, 2008			
	Level 1	**Level 2**	**Level 3**	**Total**
	(Thousands of dollars)			
Derivatives				
Assets	**$ —**	**$10,648**	**$15,065**	**$25,713**

For derivatives for which fair value is determined based on multiple inputs, Statement 157 requires that the measurement for an individual derivative be categorized within a single level, based on the lowest level input that is significant to the fair value measurement in its entirety.

When our fair value measurements that are based on NYMEX-settled prices are associated with exchange-traded instruments, we classify those derivatives as Level 1. These measurements may include futures for natural gas and crude oil which are valued based on unadjusted quoted prices in active markets. Our Level 2 fair value measurements are based on NYMEX-settled prices which are utilized to determine the fair value of certain non-exchange traded financial instruments, including natural gas and crude oil swaps. For our Level 3 inputs, we utilize modeling techniques using NYMEX-settled pricing data and historical correlations of NGL product prices to crude oil.

Table of Contents

The following tables set forth a reconciliation of our Level 3 fair value measurements for the periods indicated.

	Derivative Assets (Liabilities)
	(Thousands of dollars)
Net liabilities at June 30, 2008	$ (37,704)
Total realized/unrealized gains (losses):	
Included in earnings (a)	**(3,407)**
Included in other comprehensive income (loss)	**56,176**
Transfers in and/or out of Level 3	**-**
Net assets at September 30, 2008	**$ 15,065**
Total gains (losses) for the three-month period included in earnings attributable to the change in unrealized gain (loss) relating to assets and liabilities still held as of September 30, 2008 (a)	**$ (3,422)**

(a) - Reported in revenues in our Consolidated Statements of Income.

	Derivative Assets (Liabilities)
	(Thousands of dollars)
Net liabilities at January 1, 2008	$ (16,400)
Total realized/unrealized gains (losses):	
Included in earnings (a)	**(2,434)**
Included in other comprehensive income (loss)	**33,899**
Transfers in and/or out of Level 3	**-**
Net assets at September 30, 2008	**$ 15,065**
Total gains (losses) for the nine-month period included in earnings attributable to the change in unrealized gain (loss) relating to assets and liabilities still held as of September 30, 2008 (a)	**$ (3,422)**

(a) - Reported in revenues in our Consolidated Statements of Income.

D. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

We utilize financial instruments to reduce our market risk exposure to interest rate and commodity price fluctuations and to achieve more predictable cash flows. We follow established policies and procedures to assess risk and approve, monitor and report our financial instrument activities. We do not use these instruments for trading purposes.

Cash Flow Hedges - Our Natural Gas Gathering and Processing segment primarily utilizes NYMEX-based futures, collars and over-the-counter swaps, which are designated as cash flow hedges, to hedge our exposure to volatility in the price of natural gas, NGLs and condensate. At September 30, 2008, our Consolidated Balance Sheet reflected an unrealized gain of $29.3 million in accumulated other comprehensive income (loss), with a corresponding offset in derivative financial instrument assets and liabilities, all of which will be recognized over the next 15 months. If prices remain at current levels, we will recognize $22.5 million in gains over the next 12 months, and we will recognize gains of $6.8 million thereafter. Net gains and losses related to the ineffective portion of our hedges are reclassified out of accumulated other comprehensive income (loss) to revenues in the period the ineffectiveness occurs. Ineffectiveness related to our cash flow hedges was not material for the three and nine months ended September 30, 2008 and 2007. In the event that it becomes probable that a forecasted transaction will not occur, we would discontinue cash flow hedge treatment, which would affect earnings. There were no gains or losses during the three and nine months ended September 30, 2008 and 2007, due to the discontinuance of cash flow hedge treatment.

Table of Contents

Fair Value Hedges - In prior years, we terminated various interest-rate swap agreements. The net savings from the termination of these swaps is being recognized in interest expense over the terms of the debt instruments originally hedged. Interest expense savings for the nine months ended September 30, 2008, from amortization of terminated swaps was $2.8 million, and the remaining amortization of terminated swaps will be recognized over the following periods.

	(Millions of dollars)
Remainder of 2008	$ 0.9
2009	3.7
2010	3.7
2011	0.9

At September 30, 2008, none of the interest on our fixed-rate debt was swapped to floating using interest rate swaps.

E. OTHER COMPREHENSIVE INCOME (LOSS)

The table below shows other comprehensive income (loss) for the periods indicated.

	Three Months Ended September 30,		**Nine Months Ended September 30,**	
	2008	**2007**	**2008**	**2007**
	(Thousands of dollars)			
Unrealized gains (losses) on derivatives	**$ 66,661**	$ (1,361)	**$ 13,496**	$ (8,089)
Less: Realized losses recognized in net income	**(14,202)**	-	**(31,067)**	-
Other comprehensive income (loss)	**$ 80,863**	$ (1,361)	**$ 44,563**	$ (8,089)

The table below shows the balance in accumulated other comprehensive income (loss) for the period indicated.

	Unrealized Gains (Losses) on Derivatives
	(Thousands of dollars)
December 31, 2007	$ (18,141)
Other comprehensive income (loss)	**44,563**
September 30, 2008	**$ 26,422**

F. PARTNERS' EQUITY

ONEOK and its affiliates own all of the Class B units, 5,900,000 common units and the entire 2 percent general partner interest in us, which together constituted a 47.7 percent equity interest in us at September 30, 2008.

In March 2008, we completed a public offering of 2.5 million common units at $58.10 per common unit, generating net proceeds of approximately $140.4 million after deducting underwriting discounts but before offering expenses. In addition, we sold 5.4 million common units to ONEOK in a private placement, generating proceeds of approximately $303.2 million. In conjunction with the public offering of common units and the private placement, ONEOK Partners GP contributed $9.4 million in order to maintain its 2 percent general partner interest in us.

In April 2008, we sold an additional 128,873 common units at $58.10 per common unit to the underwriters of the public offering upon the partial exercise of their option to purchase additional common units to cover over-allotments. We received net proceeds of approximately $7.2 million from the sale of the common units after deducting underwriting discounts but before offering expenses. In conjunction with the partial exercise by the underwriters, ONEOK Partners GP contributed $0.2 million in order to maintain its 2 percent general partner interest in us.

We used a portion of the proceeds from the sale of common units and the general partner contributions to repay borrowings under our revolving credit agreement (Partnership Credit Agreement).

The following summarizes our quarterly cash distribution activity for 2008.

- In January 2008, we declared a cash distribution of $1.025 per unit for the fourth quarter of 2007. The distribution was paid on February 14, 2008, to unitholders of record on January 31, 2008.

Table of Contents

- In April 2008, we declared a cash distribution of $1.04 per unit for the first quarter of 2008. The distribution was paid on May 15, 2008, to unitholders of record as of April 30, 2008.
- In July 2008, we declared a cash distribution of $1.06 per unit for the second quarter of 2008. The distribution was paid on August 14, 2008, to unitholders of record as of July 31, 2008.
- In October 2008, we declared a cash distribution of $1.08 per unit ($4.32 per unit on an annualized basis) for the third quarter of 2008. The distribution will be paid on November 14, 2008, to unitholders of record as of October 31, 2008.

Our general partner's percentage interest in quarterly distributions increases after certain specified target levels are met. For additional information, see "Cash Distribution Policy" under Part II, Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities, in our Annual Report on Form 10-K for the year ended December 31, 2007.

G. CREDIT FACILITIES

Our Partnership Credit Agreement contains typical covenants as discussed in Note F of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2007. At September 30, 2008, we were in compliance with all covenants.

At September 30, 2008, we had $280 million in borrowings outstanding and $720 million of credit available under the Partnership Credit Agreement.

In October 2008, we borrowed $590 million under our Partnership Credit Agreement. With this borrowing, we had $870 million outstanding and $130 million available under our Partnership Credit Agreement at October 31, 2008.

We have a $15 million Senior Unsecured Letter of Credit Facility and Reimbursement Agreement with Wells Fargo Bank, N.A., of which $12 million is currently being used, and an agreement with Royal Bank of Canada, pursuant to which a $12 million letter of credit was issued. Both agreements are used to support various permits required by the KDHE for our ongoing business in Kansas.

H. COMMITMENTS AND CONTINGENCIES

As a result of an internal review of a transaction that was brought to the attention of one of our affiliates by a third party, we conducted an internal review of transactions that may have violated FERC natural gas capacity release rules or related rules and determined that there were transactions that should have been disclosed to the FERC. We notified the FERC of this review and filed a report with the FERC regarding these transactions in March 2008. We are cooperating fully with the FERC and have taken steps to ensure that current and future transactions comply with applicable FERC regulations. We are unable to predict the outcome of any FERC action in this matter. At this time, we do not believe that penalties associated with potential violations will have a material impact on our results of operations, financial position or liquidity.

I. SEGMENTS

Segment Descriptions - Our operations are divided into strategic business segments based on similarities in economic characteristics, products and services, types of customers, methods of distribution and regulatory environment, as follows:

- our Natural Gas Gathering and Processing segment primarily gathers and processes unprocessed natural gas;
- our Natural Gas Pipelines segment primarily operates regulated interstate and intrastate natural gas transmission pipelines and natural gas storage facilities;
- our Natural Gas Liquids Gathering and Fractionation segment primarily gathers, treats and fractionates NGLs and stores and markets NGL products; and
- our Natural Gas Liquids Pipelines segment primarily operates FERC-regulated interstate natural gas liquids gathering and distribution pipelines.

Accounting Policies - The accounting policies of the segments are the same as those described in Note A and Note J of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2007. Intersegment and affiliate sales are recorded on the same basis as sales to unaffiliated customers. Our Natural Gas Gathering and Processing segment sells natural gas to ONEOK and its subsidiaries. A portion of our Natural Gas Pipelines segment's revenues are from subsidiaries of ONEOK that utilize transportation and storage services. Corporate overhead costs relating to a reportable segment have been allocated for the purpose of calculating operating income.

Table of Contents

Customers - For the three months ended September 30, 2008 and 2007, we had no single external customer from which we received 10 percent or more of our consolidated revenues. We had one customer, Dow Hydrocarbons and Resources L.L.C., from which we received $686.3 million, or approximately 11 percent of our consolidated revenues, for the nine months ended September 30, 2008. All of these revenues were received by our Natural Gas Liquids Gathering and Fractionation segment. For the nine months ended September 30, 2007, we had no single external customer from which we received 10 percent or more of our consolidated revenues.

Operating Segment Information - The following tables set forth certain selected financial information for our operating segments for the periods indicated. Amounts in prior periods have been restated to conform to our current presentation.

Three Months Ended September 30, 2008	**Natural Gas Gathering and Processing**	**Natural Gas Pipelines (a)**	**Natural Gas Liquids Gathering and Fractionation**	**Natural Gas Liquids Pipelines (b)**	**Other and Eliminations**	**Total**
			(Thousands of dollars)			
Sales to unaffiliated customers	**$ 129,305**	**$ 55,528**	**$ 1,836,627**	**$ 10,838**	**$ 47**	**$2,032,345**

Other	**1,900**	99	**5,467**	3,872
Equity earnings from investments	**$ 29,412**	$ 22,162	**$ 74,805**	$ 64,975

Unconsolidated Affiliates Financial Information - Summarized combined financial information of our unconsolidated affiliates is presented below.

	Three Months Ended September 30,		Nine Months Ended September 30,	
(Unaudited)	**2008**	**2007**	**2008**	**2007**
	(Thousands of dollars)			
Income Statement				
Revenues	**$ 98,298**	$ 102,417	**$ 304,733**	$ 291,304
Operating expenses	**44,382**	42,817	**132,927**	125,522
Net income	**64,217**	47,571	**153,965**	131,054
Distributions paid to us	**$ 30,466**	$ 20,078	**$ 91,093**	$ 77,144

K. NET INCOME PER UNIT

Net income per unit is computed by dividing net income, after deducting the general partner's allocation, by the weighted average number of outstanding limited partner units. The general partner owns the entire 2 percent interest in us and also owns incentive distribution rights that provide for an increasing proportion of cash distributions from the partnership as the distributions made to limited partners increase above specified levels. For purposes of our calculation of net income per unit, net income is generally allocated to the general partner as follows: (i) an amount based upon the 2 percent general partner interest in net income and (ii) the amount of the general partner's incentive distribution rights based on the total cash distributions declared for the period. The amount of incentive distribution allocated to our general partner totaled $20.3 million and $55.7 million for the three and nine months ended September 30, 2008, respectively. Distributions paid to our general partner and shown on our Consolidated Statement of Changes in Partners' Equity and Comprehensive Income of $56.2 million included $49.5 million in incentive distributions paid to our general partner during the first nine months of 2008. Gains resulting from interim capital transactions, as defined in our Partnership Agreement, are generally not subject to distribution; however, our Partnership Agreement provides that if such distributions were made, the incentive distribution rights would not apply. Accordingly, the gain (loss) on sale of assets for the three and nine months ended September 30, 2008 and 2007 had no impact on the incentive distribution rights.

L. RELATED-PARTY TRANSACTIONS

Intersegment and affiliate sales are recorded on the same basis as sales to unaffiliated customers. Our Natural Gas Gathering and Processing segment sells natural gas to ONEOK and its subsidiaries. A portion of our Natural Gas Pipelines segment's revenues are from ONEOK and its subsidiaries that utilize natural gas transportation and storage services.

We have certain contractual rights to the Bushton Plant that is leased by OBPI. Our Processing and Services Agreement with ONEOK and OBPI sets out the terms by which OBPI provides services at the Bushton Plant through 2012. We have contracted for all of the capacity of the Bushton Plant from OBPI. In exchange, we pay OBPI for all direct costs and expenses of the Bushton Plant, including reimbursement of a portion of OBPI's obligations under equipment leases covering the Bushton Plant.

Table of Contents

Under the Services Agreement with ONEOK, ONEOK Partners GP and NBP Services, our operations and the operations of ONEOK and its affiliates can combine or share certain common services in order to operate more efficiently and cost effectively. Under the Services Agreement, ONEOK provides to us at least the type and amount of services that it provides to its affiliates, including those services required to be provided pursuant to our Partnership Agreement. ONEOK Partners GP operates our interstate natural gas pipeline assets according to each pipeline's operating agreement. ONEOK Partners GP may purchase services from ONEOK and its affiliates pursuant to the terms of the Services Agreement. ONEOK Partners GP has no employees and utilizes the services of ONEOK and ONEOK Services Company to fulfill its responsibilities.

ONEOK and its affiliates provide a variety of services to us under the Services Agreement, including cash management and financial services, employee benefits provided through ONEOK's benefit plans, administrative services, insurance and office space leased in ONEOK's headquarters building and other field locations. Where costs are specifically incurred on behalf of one of our affiliates, the costs are billed directly to us by ONEOK. In other situations, the costs may be allocated to us through a variety of methods, depending upon the nature of the expense and activities. For example, a service that applies equally to all employees is allocated based upon the number of employees. However, an expense benefiting the consolidated company but having no direct basis for allocation is allocated by the modified Distrigas method, a method using a combination of ratios that include gross plant and investment, earnings before interest and taxes and payroll expense. All costs directly charged or allocated to us are included in our Consolidated Statements of Income.

An affiliate of ONEOK enters into some of the commodity derivative contracts at the direction of and on behalf of our Natural Gas Gathering and Processing segment. See Note D for a discussion of our derivative instruments and hedging activities.

The following table sets forth the transactions with related parties for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	**2007**	**2008**	**2007**
	(Thousands of dollars)			
Revenues	**$ 208,762**	$ 170,576	**$ 596,419**	$ 491,706
Administrative and general expenses	**$ 53,154**	$ 36,771	**$ 143,387**	$ 121,981

In addition, concurrent with our sale of common units to the public, we sold 5.4 million common units to ONEOK in March 2008 in a private placement, generating proceeds of approximately $303.2 million. ONEOK Partners GP also made additional general partner contributions to us in March and April 2008. See Note F for additional information.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our unaudited consolidated financial statements and the Notes to Consolidated Financial Statements in this Quarterly Report on Form 10-Q, as well as our Annual Report on Form 10-K for the year ended December 31, 2007.

EXECUTIVE SUMMARY

The following discussion highlights some of our achievements and significant issues affecting us for the periods presented. Please refer to the "Liquidity and Capital Resources," "Capital Projects," and "Financial Results and Operating Information" sections of Management's Discussion and Analysis of Financial Condition and Results of Operations and our Consolidated Financial Statements for additional information.

In March 2008, we completed a public offering of 2.5 million common units at $58.10 per common unit, generating net proceeds of approximately $140.4 million after deducting underwriting discounts but before offering expenses. In addition, we sold 5.4 million common units to ONEOK in a private placement, generating proceeds of approximately $303.2 million. In conjunction with the public offering of common units and the private placement, ONEOK Partners GP contributed $9.4 million in order to maintain its 2 percent general partner interest in us.

In April 2008, we sold an additional 128,873 common units at $58.10 per common unit to the underwriters of the public offering upon the partial exercise of their option to purchase additional common units to cover over-allotments. We received net proceeds of approximately $7.2 million from the sale of the common units after deducting underwriting discounts but before offering expenses. In conjunction with the partial exercise by the underwriters, ONEOK Partners GP contributed $0.2 million in order to maintain its 2 percent general partner interest in us. As a result of these transactions, ONEOK now holds an aggregate 47.7 percent equity interest in us.

We used a portion of the proceeds from the sale of common units and the general partner contributions to repay borrowings under our revolving credit agreement (Partnership Credit Agreement).

In October 2008, we declared an increase in our cash distribution to $1.08 per unit ($4.32 per unit on an annualized basis), an increase of approximately 7 percent over the $1.01 per unit declared in October 2007.

Partial operations began in October 2008 on the Overland Pass Pipeline. In September 2008, the Woodford Shale natural gas liquids pipeline extension was placed into service, and the final phase of the Fort Union Gas Gathering expansion project was placed into service in July 2008. In January 2008, Midwestern Gas Transmission, our subsidiary, placed its eastern extension pipeline into service.

Net income per unit increased to $1.97 for the three months ended September 30, 2008, compared with $0.98 for the same period in 2007. For the nine-month period, net income per unit increased to $4.93 from $2.94 for the same period last year. The increase in net income per unit for the three- and nine-month periods is primarily due to the following:

- wider NGL product price differentials, increased NGL gathering and fractionation volumes and certain operational measurement gains, primarily at NGL storage caverns, in our Natural Gas Liquids Gathering and Fractionation segment,
- higher realized commodity prices, higher volumes sold and processed, and improved contractual terms in our Natural Gas Gathering and Processing segment,
- increased transportation and storage margins as a result of the impact of higher natural gas prices on retained fuel and new and renegotiated storage contracts in our Natural Gas Pipelines segment, and
- incremental operating income in our Natural Gas Liquids Pipelines segment from the assets acquired from Kinder Morgan Energy Partners, LP (Kinder Morgan) in October 2007.

During September 2008, our Natural Gas Gathering and Processing segment, Natural Gas Liquids Gathering and Fractionation segment, and Natural Gas Liquids Pipelines segment experienced disruptions related to Hurricane Ike. Without these disruptions, we estimate net margin would have been approximately $7.8 million higher.

Table of Contents

SIGNIFICANT ACQUISITION

In October 2007, we completed the acquisition of an interstate natural gas liquids and refined petroleum products pipeline system and related assets from a subsidiary of Kinder Morgan for approximately $300 million, before working capital adjustments. The system extends from Bushton and Conway, Kansas, to Chicago, Illinois, and transports, stores and delivers a full range of NGL and refined petroleum products. The FERC-regulated system spans 1,624 miles and has a capacity to transport up to 134 MBbl/d. The transaction also included approximately 978 MBbl of owned storage capacity, eight NGL terminals and a 50 percent ownership of Heartland. ConocoPhillips owns the other 50 percent of Heartland and is the managing partner of the Heartland joint venture, which consists primarily of three refined petroleum products terminals and connecting pipelines. Our investment in Heartland is accounted for under the equity method of accounting. Financing for this transaction came from a portion of the proceeds of our September 2007 issuance of $600 million 6.85 percent Senior Notes due 2037. The working capital settlement was finalized in April 2008, with no material adjustments. These assets are included in our Natural Gas Liquids Pipelines segment.

CAPITAL PROJECTS

Woodford Shale Natural Gas Liquids Pipeline Extension - The 78-mile natural gas liquids gathering pipeline connecting two natural gas processing plants, operated by Devon Energy Corporation and Antero Resources Corporation, was placed into service in September 2008. The final project cost is estimated to be $36 million, excluding AFUDC. These two plants are expected to have the capacity to produce approximately 25 MBbl/d of unfractionated NGLs. The natural gas liquids production is gathered by our existing Mid-Continent natural gas liquids gathering pipelines. Upon completion of the Arbuckle Pipeline project, the Woodford Shale natural gas liquids production is expected to be transported through the Arbuckle Pipeline to our Mont Belvieu, Texas, fractionation facility. This project is in our Natural Gas Liquids Gathering and Fractionation segment.

Overland Pass Pipeline Company - In May 2006, we entered into an agreement with a subsidiary of The Williams Companies, Inc. (Williams) to form a joint venture called Overland Pass Pipeline Company. Overland Pass Pipeline Company is building a 760-mile natural gas liquids pipeline from Opal, Wyoming, to the Mid-Continent natural gas liquids market center in Conway, Kansas. The Overland Pass Pipeline is designed to transport approximately 110 MBbl/d of unfractionated NGLs and can be increased to approximately 255 MBbl/d with additional pump facilities. During 2006, we paid $11.6 million to Williams for the acquisition of our interest in the joint venture and for reimbursement of initial capital expenditures. As the 99 percent owner of the joint venture, we are managing the construction project, advancing all costs associated with construction and operating the pipeline. Within two years of the pipeline becoming fully operational, Williams will have the option to increase its ownership up to 50 percent by reimbursing us for certain costs in accordance with the joint venture’s operating agreement. If Williams exercises its option to increase its ownership to the full 50 percent, Williams would have the option to become operator. Partial operations began in October 2008, with Williams’ Echo Springs plant beginning to deliver 30 MBbl/d of unfractionated NGLs into the pipeline. The remaining portion of the pipeline from Opal, Wyoming, to Echo Springs, Wyoming, is substantially complete and scheduled for startup in the fourth quarter of 2008.

As part of a long-term agreement, Williams dedicated its NGL production of approximately 60 MBbl/d from two of its natural gas processing plants in Wyoming to the Overland Pass Pipeline. We will provide downstream fractionation, storage and transportation services to Williams. We have also reached agreements with certain producers for supply commitments of up to an additional 80 MBbl/d, and we are negotiating agreements with other producers for supply commitments that could add an additional 60 MBbl/d of supply to this pipeline within the next three to five years. The pipeline project is currently estimated to cost in the range of $575 million to $590 million, excluding AFUDC, which remains unchanged from the previous quarter. Since our initial estimate of $433 million in early 2006, there has been a significant increase in the demand for pipeline construction-related services, which has led to higher construction labor and equipment rates. Additionally, compliance with federal restrictions on construction in wildlife sensitive areas increased costs and resulted in construction delays that further impacted costs due to winter construction.

We are also investing in the range of $230 million to $240 million, excluding AFUDC, which remains unchanged from the previous quarter, to expand our existing fractionation and storage capabilities and the capacity of our natural gas liquids distribution pipelines. Since our initial estimate of $216 million, these expansion projects have experienced cost increases related to further design enhancements adding 30 MBbl/d of fractionation capacity, increased construction labor rates, increased material costs and increased costs resulting from heavy spring rainfall. Part of this expansion will increase the fractionation capacity from 80 MBbl/d to 150 MBbl/d. Phase I of the fractionator upgrade was completed in August 2008, placed in service and is capable of fractionating up to 80 MBbl/d. Phase II is expected to begin operation in the fourth quarter of 2008. Additionally, portions of our natural gas liquids distribution pipeline upgrades were completed in the second

Table of Contents

and third quarters of 2008. Overland Pass Pipeline Company is included in our Natural Gas Liquids Pipelines segment, while the associated expansions are included in our Natural Gas Liquids Gathering and Fractionation segment and our Natural Gas Liquids Pipelines segment.

Piceance Lateral Pipeline - In March 2007, we announced that Overland Pass Pipeline Company also plans to construct a 150-mile lateral pipeline with capacity to transport as much as 100 MBbl/d of unfractionated NGLs from the Piceance Basin in Colorado to the Overland Pass Pipeline. Williams announced that it intends to construct a new natural gas processing plant in the Piceance Basin and will dedicate its NGL production from that plant and an existing plant to be transported by the lateral pipeline, totaling approximately 30 MBbl/d. We continue to negotiate with other producers for supply commitments. In October 2008, this project received the approval of various state and federal regulatory authorities allowing construction to commence. Construction began during the fourth quarter of 2008 and is expected to be completed during the third quarter of 2009. The completion date has been revised from the second quarter of 2009 to the third quarter of 2009 due to a delay in the approval of our construction permit from the federal Bureau of Land Management. The project is currently estimated to cost in the range of $110 million to $140 million, excluding AFUDC, which remains unchanged from the previous quarter. This project is in our Natural Gas Liquids Pipelines segment.

D-J Basin Lateral Pipeline - In September 2008, we announced plans to construct a 125-mile natural gas liquids lateral pipeline from the Denver-Julesburg Basin in northeastern Colorado to the Overland Pass Pipeline with capacity to transport as much as 55 MBbl/d of unfractionated NGLs. The project is currently estimated to cost in the range of $70 million to $80 million, excluding AFUDC. We have supply commitments for up to 33 MBbl/d of unfractionated NGLs with potential for an additional 10 MBbl/d of supply from new drilling and plant upgrades in the next two years. The pipeline is currently under construction and projected to be partially in service during the fourth quarter of 2008 and fully completed during the first quarter of 2009. This project is in our Natural Gas Liquids Pipelines segment.

Arbuckle Natural Gas Liquids Pipeline - In March 2007, we announced plans to build the 440-mile Arbuckle Pipeline, a natural gas liquids pipeline from southern Oklahoma through northern Texas and continuing on to the Texas Gulf Coast. Current estimated costs are in the range of $340 million to $360 million, excluding AFUDC, which remains unchanged from the previous quarter. Negotiations with pipeline contractors have recently been completed, and the resulting construction labor rates have increased our project costs from our original estimate of $260 million. We have also experienced higher than originally expected acquisition costs for pipeline easements, particularly in the Barnett Shale area, along with increased costs for materials. The Arbuckle Pipeline will have the capacity to transport 160 MBbl/d of unfractionated NGLs, expandable to 210 MBbl/d with additional pump facilities, and will connect our existing Mid-Continent infrastructure with our fractionation facility in Mont Belvieu, Texas, and other Gulf Coast region fractionators. We have supply commitments from producers for 65 MBbl/d and indications of interest with other producers that could add an additional 145 MBbl/d of supply within the next three to five years. These additional supply commitments are in various stages of negotiation. Construction permits from various federal, state and local regulatory bodies have been received. Construction began in the third quarter of 2008 and is expected to be completed in the first quarter of 2009. This project is in our Natural Gas Liquids Pipelines segment.

Williston Basin Gas Processing Plant Expansion - In March 2007, we announced the expansion of our Grasslands natural gas processing facility in North Dakota, currently estimated to cost in the range of $40 million to $45 million, excluding AFUDC, which remains unchanged from the previous quarter. Our estimated project costs increased from $30 million primarily as a result of higher contract labor and equipment costs. The Grasslands facility is our largest natural gas processing plant in the Williston Basin. The expansion increases processing capacity to approximately 100 MMcf/d from its current capacity of 63 MMcf/d and increases fractionation capacity to approximately 12 MBbl/d from 8 MBbl/d. The expansion project is expected to be online in the fourth quarter of 2008. This project is in our Natural Gas Gathering and Processing segment.

Fort Union Gas Gathering Expansion - In January 2007, Fort Union Gas Gathering announced plans to double its existing gathering pipeline capacity by adding 148 miles of new gathering lines, resulting in approximately 649 MMcf/d of additional capacity in the Powder River basin of Wyoming. The expansion occurred in two phases and is currently expected to cost in the range of $120 million to $130 million, excluding AFUDC, which was primarily financed within the Fort Union Gas Gathering partnership. Any cost overruns are covered through escalation clauses to preserve the original economics of the project. Phase I, with more than 200 MMcf/d capacity, was placed in service during the fourth quarter of 2007. Phase II, with approximately 450 MMcf/d capacity, was completed in July 2008. The additional capacity has been fully subscribed for 10 years. We own approximately 37 percent of Fort Union Gas Gathering. This investment is in our Natural Gas Gathering and Processing segment and is accounted for under the equity method of accounting.

Table of Contents

Guardian Pipeline Expansion and Extension - In December 2007, Guardian Pipeline received and accepted the certificate of public convenience and necessity issued by the FERC for its expansion and extension project. The certificate authorizes us to construct, install and operate approximately 119 miles of a 20-inch and 30-inch natural gas transportation pipeline with a capacity to transport 537 MMcf/d of natural gas north from Ixonia, Wisconsin, to the Green Bay, Wisconsin, area. The project is supported by 15-year shipper commitments with We Energies and Wisconsin Public Service Corporation, and the capacity has been fully subscribed. The project is currently estimated to cost in the range of $277 million to $305 million, excluding AFUDC, which remains unchanged from the previous quarter. Our estimated project costs increased from our initial estimate of $241 million in 2006, which excluded AFUDC, primarily due to weather delays, construction in environmentally sensitive areas, rocky terrain and escalating costs associated with crop damage and condemnation costs. We received the notice to proceed from the FERC in May 2008. The pipeline is currently projected to be in service in the fourth quarter of 2008. This project is in our Natural Gas Pipelines segment.

IMPACT OF NEW ACCOUNTING STANDARDS

Information about the impact of the following new accounting standards is included in Note A of the Notes to Consolidated Financial Statements in this Quarterly Report on Form 10-Q:

- Statement 157, “Fair Value Measurements,” and related FASB Staff Position (FSP) 157-2, “Effective Date of FASB Statement No. 157,” and FSP 157-3, “Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active,”
- Statement 159, “The Fair Value Option for Financial Assets and Financial Liabilities,”
- FASB Staff Position No. FIN 39-1, “Amendment of FASB Interpretation No. 39,”
- Statement 141R, “Business Combinations,”
- Statement 160, “Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51,”
- Statement 161, “Disclosures about Derivative Instruments and Hedging Activities - an amendment to FASB Statement No. 133,” and
- EITF 07-4, “Application of the Two-Class Method under FASB Statement No. 128 to Master Limited Partnerships.”

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of our consolidated financial statements and related disclosures in accordance with GAAP requires us to make estimates and assumptions with respect to values or conditions that cannot be known with certainty that affect the reported amount of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements. These estimates and assumptions also affect the reported amounts of revenues and expenses during the reporting period. Although we believe these estimates and assumptions are reasonable, actual results could differ from our estimates.

Information about our critical accounting estimates is included below and under Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, “Critical Accounting Policies and Estimates,” in our Annual Report on Form 10-K for the year ended December 31, 2007.

Impairment of Goodwill and Intangible Assets - We apply the provisions of Statement 142, “Goodwill and Other Intangible Assets,” and perform our annual impairment test on July 1. There were no impairment charges resulting from our July 1, 2008, impairment testing, and no events indicating an impairment have occurred subsequent to that date.

Table of Contents

FINANCIAL RESULTS AND OPERATING INFORMATION

Consolidated Operations

Selected Financial Results - The following table sets forth certain selected consolidated financial results for the periods indicated.

Financial Results	Three Months Ended September 30, 2008	Three Months Ended September 30, 2007	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
	(Thousands of dollars)			
Revenues	**$2,241,107**	$1,410,257	**$6,444,034**	$3,954,245
Cost of sales and fuel	**1,915,707**	1,196,373	**5,569,176**	3,317,421
Net margin	**325,400**	213,884	**874,858**	636,824
Operating costs	**97,488**	80,079	**272,728**	237,383
Depreciation and amortization	**30,408**	28,800	**90,383**	84,326
Gain (loss) on sale of assets	**22**	111	**50**	1,935
Operating income	**$ 197,526**	$ 105,116	**$ 511,797**	$ 317,050
Equity earnings from investments	**$ 29,412**	$ 22,162	**$ 74,805**	$ 64,975
Allowance for equity funds used during construction	**$ 15,616**	$ 3,691	**$ 35,788**	$ 6,686
Other income (expense)	**$ (4,794)**	$ 780	**$ (4,227)**	$ 4,234
Interest expense	**$ (34,447)**	$ (33,510)	**$ (107,681)**	$ (99,313)

Operating Results - Net margin increased for the three and nine months ended September 30, 2008, compared with the same periods last year, primarily due to the following:

- wider NGL product price differentials, increased NGL gathering and fractionation volumes and certain operational measurement gains, primarily at NGL storage caverns, in our Natural Gas Liquids Gathering and Fractionation segment,
- higher realized commodity prices, higher volumes sold and processed, and improved contractual terms in our Natural Gas Gathering and Processing segment,
- incremental net margin in our Natural Gas Liquids Pipelines segment from the assets acquired from Kinder Morgan in October 2007, and
- increased transportation and storage margins as a result of the impact of higher natural gas prices on retained fuel and new and renegotiated storage contracts in our Natural Gas Pipelines segment.

Operating costs increased for the three and nine months ended September 30, 2008, compared with the same periods last year, primarily due to incremental operating expenses associated with the assets acquired from Kinder Morgan and higher employee-related costs. Operating costs also increased due to costs associated with the startup of our newly expanded Bushton fractionator.

Depreciation and amortization increased for the three and nine months ended September 30, 2008, compared with the same periods last year, primarily due to depreciation expense associated with our completed capital projects and the assets acquired from Kinder Morgan.

Equity earnings from investments increased for the three and nine months ended September 30, 2008, compared with the same periods last year, primarily due to a gain on the sale of Bison Pipeline LLC by Northern Border Pipeline and higher gathering revenues in our various investments, partially offset by reduced throughput on Northern Border Pipeline. We own a 50 percent equity interest in Northern Border Pipeline.

Allowance for equity funds used during construction increased for the three and nine months ended September 30, 2008, compared with the same periods last year, due to increased spending for our capital projects, which are discussed beginning on page 21.

Other income (expense) fluctuated for the three and nine months ended September 30, 2008, compared with the same periods last year, primarily due to investment gains (losses).

Additional information regarding our results of operations is provided in the following discussion of operating results for each of our segments.

Table of Contents

Natural Gas Gathering and Processing

Overview - Our Natural Gas Gathering and Processing segment's operations include gathering of natural gas production from crude oil and natural gas wells. We gather unprocessed natural gas in the Mid-Continent region, which includes the Anadarko Basin of Oklahoma and the Hugoton and Central Kansas Uplift Basins of Kansas. We also gather unprocessed natural gas in two producing basins in the Rocky Mountain region: the Williston Basin, which spans portions of Montana, North Dakota and the Canadian province of Saskatchewan, and the Powder River Basin of Wyoming.

Through gathering systems, unprocessed natural gas volumes are aggregated for removal of water vapor, solids and other contaminants and to extract NGLs in order to provide marketable natural gas, commonly referred to as residue gas. When the NGLs are separated from the unprocessed natural gas at the processing plants, the NGLs are generally in the form of a mixed, unfractionated NGL stream. This unfractionated NGL stream is generally shipped to fractionators, where by applying heat and pressure, the unfractionated NGL stream is separated into marketable purity products, such as ethane/propane mix, propane, iso-butane, normal butane and natural gasoline (collectively, NGL products). Revenues for this segment are primarily derived from percent-of-proceeds (POP), fee and keep-whole contracts. Under a POP contract, we retain a portion of sales proceeds from the commodity sales for our services. With a fee-based contract, we charge a fee for our services, and with the keep-whole contract, we retain the NGLs as our fee for service and return to the producer an equivalent quantity of residue gas containing the same amount of Btus as the unprocessed natural gas that was delivered to us. Our natural gas and NGL products are sold to affiliates and a diverse customer base.

Selected Financial Results and Operating Information - The following tables set forth certain selected financial results and operating information for our Natural Gas Gathering and Processing segment for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
Financial Results	**2008**	**2007**	**2008**	**2007**
	(Thousands of dollars)

Operating Results - Net margin increased $24.1 million for the three months ended September 30, 2008, compared with the same period last year, primarily due to the following:

- an increase of $18.3 million due to higher realized commodity prices,
- an increase of $3.4 million due to improved contractual terms, and
- an increase of $2.3 million due to higher volumes sold and processed.

Net margin increased $87.4 million for the nine months ended September 30, 2008, compared with the same period last year, primarily due to the following:

- an increase of $66.2 million due to higher realized commodity prices,
- an increase of $11.5 million due to higher volumes sold and processed, and
- an increase of $9.7 million due to improved contractual terms.

During September 2008, the disruption in the Gulf Coast area related to Hurricane Ike limited our ability to process and deliver natural gas and NGL volumes from our Mid-Continent processing plants. Without this volume reduction, we estimate net margin would have been approximately $1.8 million higher.

Operating costs increased $3.8 million for the three months ended September 30, 2008, compared with the same period last year, primarily due to increased employee-related costs and increased costs for chemicals and maintenance parts, partially offset by decreased equipment lease costs associated with the Bushton Plant.

Operating costs increased $5.1 million for the nine months ended September 30, 2008, compared with the same period last year, primarily due to increased employee-related costs, increased costs for chemicals and maintenance parts, and a favorable legal settlement received in June 2007, which reduced legal costs for the nine months ended September 30, 2007. These increases were partially offset by decreased equipment lease costs in 2008 associated with the Bushton Plant.

Depreciation and amortization increased $1.3 million and $2.9 million for the three- and nine-month periods in 2008, respectively, primarily as a result of depreciation expense associated with our completed capital projects.

The increase in equity earnings from investments for the three- and nine-month periods is driven primarily by higher gathering revenues in our various investments.

The increase in capital expenditures for the three and nine months ended September 30, 2008, compared with the same periods last year, is driven primarily by our increased growth activities, primarily in the Rocky Mountain region.

Our Natural Gas Gathering and Processing segment is exposed to commodity price risk, primarily from NGLs, as a result of our contractual obligations for services provided. A small percentage of our services, based on volume, is provided through keep-whole arrangements. See discussion regarding our commodity price risk beginning on page 38 under “Commodity Price Risk” in Item 3, Quantitative and Qualitative Disclosures about Market Risk.

Table of Contents

Natural Gas Pipelines

Overview - Our Natural Gas Pipelines segment primarily operates regulated natural gas transmission pipelines, natural gas storage facilities, and non-processable natural gas gathering facilities. We also provide interstate natural gas transportation and storage service in accordance with Section 311(a) of the Natural Gas Policy Act.

Our interstate natural gas pipeline assets transport natural gas through FERC-regulated interstate natural gas pipelines in Montana, North Dakota, South Dakota, Minnesota, Wisconsin, Iowa, Illinois, Indiana, Kentucky, Tennessee, Oklahoma, Texas and New Mexico. Our interstate pipelines include Midwestern Gas Transmission, Guardian Pipeline, Viking Gas Transmission Company, OkTex Pipeline and a 50 percent equity interest in Northern Border Pipeline.

Our intrastate natural gas pipeline assets in Oklahoma have access to the major natural gas producing areas and transport natural gas throughout the state. We also have access to the major natural gas producing area in south central Kansas. In Texas, our intrastate natural gas pipelines are connected to the major natural gas producing areas in the Texas panhandle and the Permian Basin, and transport natural gas to the Waha Hub, where other pipelines may be accessed for transportation east to the Houston Ship Channel market, north into the Mid-Continent market and west to the California market.

We own or lease storage capacity in underground natural gas storage facilities in Oklahoma, Kansas and Texas.

Our transportation contracts for our regulated natural gas activities are based upon rates stated in our tariffs. Tariffs specify the maximum rates customers can be charged, which can be discounted to meet competition if necessary, and the general terms and conditions for pipeline transportation service, which are established at FERC or appropriate state jurisdictional agency proceedings known as rate cases. In Texas and Kansas, natural gas storage service is a fee business that may be regulated by the state in which the facility operates and by the FERC for certain types of services. In Oklahoma, natural gas gathering and natural gas storage operations are not subject to rate regulation and have market-based rate authority from the FERC for certain types of services.

Selected Financial Results and Operating Information - The following tables set forth certain selected financial results and operating information for our Natural Gas Pipelines segment for the periods indicated.

Financial Results	Three Months Ended September 30, 2008	Three Months Ended September 30, 2007	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
	(Thousands of dollars)			
Transportation revenues	**$ 59,190**	$ 54,845	**$184,454**	$169,426
Storage revenues	**17,054**	13,579	**49,324**	40,984
Gas sales and other revenues	**10,446**	4,940	**32,880**	9,315

(a) - Includes volumes for consolidated entities only.

Table of Contents

Operating Results - Net margin increased $5.5 million for the three months ended September 30, 2008, compared with the same period last year, primarily due to:

- an increase of $3.4 million due to higher natural gas transportation margins, primarily as a result of the impact of higher natural gas prices on retained fuel, and
- an increase of $1.1 million due to increased operational natural gas inventory sales.

Net margin increased $16.5 million for the nine months ended September 30, 2008, compared with the same period last year, primarily due to:

- an increase of $8.5 million due to higher natural gas transportation margins, primarily as a result of the impact of higher natural gas prices on retained fuel,
- an increase of $4.7 million due to higher natural gas storage margins, primarily related to new and renegotiated natural gas storage contracts and the higher natural gas price impact on retained fuel, and
- an increase of $3.0 million due to increased operational natural gas inventory sales.

Operating costs decreased $2.1 million for the nine months ended September 30, 2008, compared with the same period last year, primarily due to decreased general taxes and lower general operating costs.

Depreciation and amortization increased for the three- and nine-month periods, primarily as a result of depreciation expense associated with our completed capital projects.

Equity earnings from investments increased $3.7 million and $4.1 million for the three- and nine-month periods in 2008, respectively, primarily due to an $8.3 million gain on the sale of Bison Pipeline LLC by Northern Border Pipeline, partially offset by reduced throughput on Northern Border Pipeline. We own a 50 percent equity interest in Northern Border Pipeline.

The increase in allowance for equity funds used during construction and capital expenditures for the three and nine months ended September 30, 2008, compared with the same periods last year, is driven primarily by increased spending for our capital projects, which are discussed beginning on page 21.

Natural Gas Liquids Gathering and Fractionation

Overview - Our Natural Gas Liquids Gathering and Fractionation segment primarily gathers, treats and fractionates NGLs produced by natural gas processing plants located in Oklahoma, Kansas, the Texas panhandle and the Texas Gulf Coast, and stores and markets NGL products. We purchase NGLs and condensate from third parties as well as our Natural Gas Gathering and Processing segment. We connect the NGL production basins in Oklahoma, Kansas and the Texas panhandle with the key natural gas liquids market centers in Conway, Kansas, and Mont Belvieu, Texas.

Most natural gas produced at the wellhead contains a mixture of NGL components, such as ethane, propane, iso-butane, normal butane and natural gasoline. Natural gas processing plants remove the NGLs from the natural gas stream to realize the higher economic value of the NGLs and to meet natural gas pipeline quality specifications, which limit NGLs in the natural gas stream due to liquid and Btu content. The NGLs that are separated from the natural gas stream at the natural gas processing plants remain in a mixed, unfractionated form until they are gathered, primarily by pipeline, and delivered to our fractionators. A fractionator, by applying heat and pressure, separates the unfractionated NGL stream into marketable purity products, such as ethane/propane mix, propane, iso-butane, normal butane and natural gasoline (collectively, NGL products). These NGL products are then stored and/or distributed to our customers, such as petrochemical plants, heating fuel users and refineries.

Revenues for this segment are primarily derived from exchange services, optimization, isomerization and storage.

- Our exchange services business collects fees to gather, fractionate and treat unfractionated NGLs, thereby converting them into NGL products that are stored and shipped to a market center or customer-designated location.
- Our optimization business utilizes our assets, contract portfolio and market knowledge to capture locational and seasonal price differentials. We move NGL products between Conway, Kansas, and Mont Belvieu, Texas, in order to capture the locational price differentials between the two market centers. Our NGL storage facilities are also utilized to capture seasonal price variances.
- Our isomerization business captures the price differential when normal butane is converted into the more valuable iso-butane at an isomerization unit in Conway, Kansas. Iso-butane is used in the refining industry to upgrade the octane of motor gasoline.
- Our storage business collects fees to store NGLs at our Mid-Continent and Mont Belvieu, Texas, facilities.

Table of Contents

Selected Financial Results and Operating Information - The following tables set forth certain selected financial results and operating information for our Natural Gas Liquids Gathering and Fractionation segment for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
Financial Results	**2008**	**2007**	**2008**	**2007**
	(Thousands of dollars)			
NGL and condensate sales	**$1,759,141**	$1,054,759	**$5,037,563**	$2,851,363
Storage and fractionation revenues	**84,181**	65,338	**251,383**	197,301
Cost of sales and fuel	**1,724,692**	1,071,270	**5,033,452**	2,893,369
Net margin	**118,630**	48,827	**255,494**	155,295
Operating costs	**22,954**	17,787	**61,575**	49,387
Depreciation and amortization	**5,901**	6,439	**17,188**	17,525
Gain (loss) on sale of assets	**13**	27	**31**	31
Operating income	**$ 89,788**	$ 24,628	**$ 176,762**	$ 88,414

	Three Months Ended September 30,		Nine Months Ended September 30,	
Operating Information	**2008**	**2007**	**2008**	**2007**
NGLs gathered *(MBbl/d)*	**243**	232	**249**	222
NGL sales *(MBbl/d)*	**273**	223	**275**	221
NGLs fractionated *(MBbl/d)*	**375**	370	**379**	346
Conway-to-Mont Belvieu OPIS average price differential Ethane *($/gallon)*	**$ 0.24**	$ 0.05	**$ 0.15**	$ 0.05
Capital expenditures *(Thousands of dollars)*	**$ 52,558**	$ 20,645	**$ 137,177**	$ 43,234

Operating Results - Net margin increased $69.8 million for the three months ended September 30, 2008, compared with the same period last year, primarily due to the following:

- an increase of $43.7 million due to significantly wider product price differentials between Conway, Kansas, and Mont Belvieu, Texas,
- an increase of $13.3 million from certain operational measurement gains, primarily at NGL storage caverns,
- an increase of $12.5 million due to higher exchange margins, primarily driven by increased gathering and fractionation volumes, and
- an increase of $3.3 million due to higher isomerization volumes and wider iso-butane-to-normal butane price differentials.

Net margin increased $100.2 million for the nine months ended September 30, 2008, compared with the same period last year, primarily due to the following:

- an increase of $59.3 million due to wider product price differentials between Conway, Kansas, and Mont Belvieu, Texas,
- an increase of $31.8 million due to higher exchange margins, primarily driven by increased gathering and fractionation volumes,
- an increase of $11.4 million from certain operational measurement gains, primarily at NGL storage caverns, and
- an increase of $2.5 million due to higher storage margins in our Mid-Continent storage business.

During September 2008, Hurricane Ike caused disruptions to our gathering and fractionation operations in the Mid-Continent and Gulf Coast regions. Without this disruption, we estimate net margin would have been approximately $3.8 million higher.

Operating costs increased $5.2 million and $12.2 million, respectively, for the three- and nine-month periods, primarily due to increased lease costs for the Bushton facility, increased costs associated with the startup of our newly expanded Bushton fractionator, increased employee-related costs and increased operating expenses at our fractionators due to increased utilization.

As noted in the "Operating Information" table above, product price differentials were significantly higher in 2008 than 2007. We began experiencing lower price differentials beginning in October 2008. However, the price differentials we are currently experiencing have remained above the three-year average Conway-to-Mont Belvieu price differential for ethane of $0.05 per gallon.

Table of Contents

The increase in capital expenditures for the three and nine months ended September 30, 2008, compared with the same periods last year, is driven primarily by our capital projects, which are discussed beginning on page 21.

Natural Gas Liquids Pipelines

Overview - Our Natural Gas Liquids Pipelines segment primarily operates FERC-regulated natural gas liquids gathering and distribution pipelines and associated above- and below-ground storage facilities. Our natural gas liquids gathering pipelines deliver unfractionated NGLs gathered in Oklahoma, Kansas, the Texas panhandle and the Rocky Mountain region to our Natural Gas Liquids Gathering and Fractionation segment's Mid-Continent fractionation facilities. Our natural gas liquids distribution pipelines deliver NGL products to the natural gas liquids market hubs in Conway, Kansas, and Mont Belvieu, Texas. Through our acquisition of the natural gas liquids assets from Kinder Morgan, we acquired terminal and storage facilities, as well as natural gas liquids and refined petroleum products pipelines that connect our Mid-Continent assets with Midwest markets, including Chicago, Illinois. Our natural gas liquids gathering and distribution pipelines operate in Oklahoma, Kansas, Nebraska, Missouri, Iowa, Illinois, Indiana, Texas, Wyoming and Colorado. We have terminal and storage facilities in Missouri, Nebraska, Iowa and Illinois.

Revenues for this segment are primarily derived from transporting product under our FERC-regulated tariffs. Tariffs specify the rates we can charge our customers and the general terms and conditions for NGL transportation service on our pipelines. Our tariffs include specifications regarding the receipt and delivery of NGLs at points along the pipeline systems. We generally charge tariff rates under a FERC-approved indexing methodology, which allows charging rates up to a prescribed ceiling that changes annually based on the year-to-year change in the Producer Price Index for finished goods. The FERC also permits interstate natural gas liquids pipelines to support rates by using a cost-of-service methodology, competitive market price or an agreement with a pipeline's non-affiliated shipper.

Selected Financial Results and Operating Information - The following tables set forth certain selected financial results and operating information for our Natural Gas Liquids Pipelines segment for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
Financial Results	**2008**	**2007**	**2008**	**2007**
	(Thousands of dollars)

Table of Contents

Operating Results - Net margin increased $11.8 million for the three months ended September 30, 2008, compared with the same period last year, primarily due to an increase of $12.0 million in incremental margin from the assets acquired from Kinder Morgan in October 2007.

Net margin increased $36.5 million for the nine months ended September 30, 2008, compared with the same period last year, primarily due to the following:

- an increase of $34.0 million in incremental margin from the assets acquired from Kinder Morgan in October 2007 and
- an increase of $2.5 million due to increased throughput from new supply connections and increased production volumes from existing supply connections to our natural gas liquids gathering pipelines.

During September 2008, the disruption in the Gulf Coast area related to Hurricane Ike reduced transportation and gathering volumes on our pipeline assets between the Mid-Continent fractionation facilities and the natural gas liquids market hubs of Conway, Kansas, and Mont Belvieu, Texas. Without this volume reduction, we estimate net margin would have been approximately $2.2 million higher.

Operating costs increased $9.3 million for the three months ended September 30, 2008, compared with the same period last year, primarily due to $7.3 million in incremental operating expenses associated with the assets acquired from Kinder Morgan, as well as higher employee-related costs and costs associated with the startup of Overland Pass Pipeline operations.

Operating costs increased $25.6 million for the nine months ended September 30, 2008, compared with the same period last year, primarily due to $20.6 million in incremental operating expenses associated with the assets acquired from Kinder Morgan, as well as higher employee-related costs, outside services, and costs associated with the startup of Overland Pass Pipeline operations.

Depreciation and amortization increased $2.2 million for the nine months ended September 30, 2008, primarily due to the assets acquired from Kinder Morgan.

Equity earnings from investments increased $1.2 million for the nine months ended September 30, 2008, compared with the same period last year, primarily due to equity earnings from our investment in Heartland, which we acquired from Kinder Morgan in October 2007.

The increase in allowance for equity funds used during construction and capital expenditures for the three and nine months ended September 30, 2008, compared with the same periods last year, is driven primarily by our growth activities. See discussion of our capital projects beginning on page 21.

Other

In the second quarter of 2008, we started the decommissioning of the Black Mesa Pipeline, Inc. The affected land owners have been informed of this decision. We do not expect the decommissioning to have a material impact on our consolidated financial statements.

Contingencies

Legal Proceedings - We are a party to various litigation matters and claims that are in the normal course of our operations. While the results of litigation and claims cannot be predicted with certainty, we believe the final outcome of such matters will not have a material adverse effect on our consolidated results of operations, financial position or liquidity.

FERC Matter - As a result of an internal review of a transaction that was brought to the attention of one of our affiliates by a third party, we conducted an internal review of transactions that may have violated FERC natural gas capacity release rules or related rules and determined that there were transactions that should have been disclosed to the FERC. We notified the FERC of this review and filed a report with the FERC regarding these transactions in March 2008. We are cooperating fully with the FERC and have taken steps to ensure that current and future transactions comply with applicable FERC regulations. We are unable to predict the outcome of any FERC action in this matter. At this time, we do not believe that penalties associated with potential violations will have a material impact on our results of operations, financial position or liquidity.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

General - Our principal sources of liquidity include cash generated from operating activities, bank credit facilities, debt issuances and the sale of common units. We fund our operating expenses, debt service and cash distributions to our limited partners and general partner primarily with operating cash flow. We have no material guarantees of debt or other similar commitments to unaffiliated parties.

Part of our growth strategy is to expand our existing businesses and strategically acquire related businesses that strengthen and complement our existing assets. Capital resources for acquisitions and maintenance and growth expenditures may be funded by a variety of sources, including those listed above as our principal sources of liquidity. Beginning in 2007 and continuing in 2008, the capital markets have been impacted by macroeconomic, liquidity, credit and other recessionary concerns. During this period, we have continued to have access to our Partnership Credit Agreement to fund our short-term liquidity needs. In 2008, we issued common units and received additional contributions from our general partner. See discussion below under “Equity Issuance.” We also issued $600 million of long-term debt in September 2007. Our ability to continue to access capital markets for debt and equity financing under reasonable terms depends on our financial condition, credit ratings and market conditions. We anticipate that our existing capital resources, ability to obtain financing and cash flow generated from future operations will enable us to maintain our current level of operations and our planned operations, including capital expenditures, for the remainder of 2008 and into 2009.

During the nine months ended September 30, 2008 and 2007, our capital expenditures were financed through operating cash flows and short- and long-term debt. For the nine months ended September 30, 2008, our capital expenditures were also financed through the issuance of common units. Capital expenditures for the first nine months of 2008 were $860.2 million, compared with $408.4 million for the same period in 2007, exclusive of acquisitions. The increase in capital expenditures for 2008, compared with 2007, is driven primarily by our capital projects, which are discussed beginning on page 21.

Financing - Financing is provided through available cash, our Partnership Credit Agreement, the issuance of common units or long-term debt. Other options to obtain financing include, but are not limited to, issuance of convertible debt securities, asset securitization and sale/leaseback of facilities.

The total amount of short-term borrowings authorized by our general partner’s Board of Directors is $1.5 billion. At September 30, 2008, we had $280 million of borrowings outstanding and $720 million available under our Partnership Credit Agreement and available cash and cash equivalents of approximately $15.8 million. As of September 30, 2008, we could have issued $1.4 billion of additional short- and long-term debt under the most restrictive provisions contained in our Partnership Credit Agreement.

We have a $15 million Senior Unsecured Letter of Credit Facility and Reimbursement Agreement with Wells Fargo Bank, N.A., of which $12 million is currently being used, and an agreement with Royal Bank of Canada, pursuant to which a $12 million letter of credit was issued. Both agreements are used to support various permits required by the KDHE for our ongoing business in Kansas.

Our Partnership Credit Agreement contains typical covenants as discussed in Note F of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2007. At September 30, 2008, we were in compliance with all covenants.

During the third and fourth quarters of 2008, the capital markets have been significantly impacted by a financial credit crisis. Because of these market conditions and to ensure we would have access to the capital required to fund our growth projects and working capital needs, we borrowed $590 million under our Partnership Credit Agreement in October 2008. With this borrowing, we had $870 million outstanding and $130 million available under our Partnership Credit Agreement at October 31, 2008. On that date, we also had approximately $396 million in available cash and cash equivalents. We will utilize these funds and remaining borrowing capacity, as well as operating cash flow, to fund our growth projects and working capital requirements for the remainder of 2008 and into 2009. The average interest rate on our short-term debt outstanding at October 31, 2008, was 4.22 percent, compared with a weighted average of 3.24 percent for the first nine months of 2008. Based on the forward LIBOR curve, we expect the interest rate on our short-term borrowings to increase in 2009, compared with 2008.

Equity Issuance - In March 2008, we completed a public offering of 2.5 million common units at $58.10 per common unit, generating net proceeds of approximately $140.4 million after deducting underwriting discounts but before offering expenses. In addition, we sold 5.4 million common units to ONEOK in a private placement, generating proceeds of approximately $303.2 million. In conjunction with the public offering of common units and the private placement, ONEOK Partners GP contributed $9.4 million in order to maintain its 2 percent general partner interest in us.

Table of Contents

In April 2008, we sold an additional 128,873 common units at $58.10 per common unit to the underwriters of the public offering upon the partial exercise of their option to purchase additional common units to cover over-allotments. We received net proceeds of approximately $7.2 million from the sale of the common units after deducting underwriting discounts but before offering expenses. In conjunction with the partial exercise by the underwriters, ONEOK Partners GP contributed $0.2 million in order to maintain its 2 percent general partner interest in us. As a result of these transactions, ONEOK now holds an aggregate 47.7 percent equity interest in us.

We used a portion of the proceeds from the sale of common units and the general partner contributions to repay borrowings under our Partnership Credit Agreement.

Capitalization Structure - The following table sets forth our capitalization structure for the periods indicated.

	September 30, 2008	December 31, 2007
Long-term Debt	**48%**	54%
Equity	**52%**	46%
Debt (including notes payable)	**50%**	55%
Equity	**50%**	45%

Credit Ratings - Our investment grade credit ratings as of September 30, 2008, are shown in the table below.

Rating Agency	Rating	Outlook
Moody’s	Baa2	Stable
S&P	BBB	Stable

Our credit ratings may be affected by a material change in our financial ratios or a material event affecting our business. The most common criteria for assessment of our credit ratings are the debt-to-EBITDA (earnings before interest, taxes, depreciation and amortization) ratio, interest coverage, business risk profile and liquidity. If our credit ratings were downgraded, the interest rates on our Partnership Credit Agreement borrowings would increase, resulting in an increase in our cost to borrow funds. An adverse rating change alone is not a default under our Partnership Credit Agreement.

Our $250 million and $225 million senior notes, due 2010 and 2011, respectively, contain provisions that require us to offer to repurchase the senior notes at par value if our Moody’s or S&P credit rating falls below investment grade (Baa3 for Moody’s or BBB- for S&P) and the investment grade rating is not reinstated within a period of 40 days. Further, the indentures governing our senior notes due 2010 and 2011 include an event of default upon acceleration of other indebtedness of $25 million or more and the indentures governing our senior notes due 2012, 2016, 2036 and 2037 include an event of default upon the acceleration of other indebtedness of $100 million or more that would be triggered by such an offer to repurchase. Such an event of default would entitle the trustee or the holders of 25 percent in aggregate principal amount of the outstanding senior notes due 2010, 2011, 2012, 2016, 2036 and 2037 to declare those notes immediately due and payable in full. We may not have sufficient cash on hand to repurchase and repay any accelerated senior notes, which may cause us to borrow money under our credit facilities or seek alternative financing sources to finance the repurchases and repayment. We could also face difficulties accessing capital or our borrowing costs could increase, impacting our ability to obtain financing for acquisitions or capital expenditures, to refinance indebtedness and to fulfill our debt obligations. A decline in our credit rating below investment grade may also require us to provide security to our counterparties in the form of cash, letters of credit or other negotiable instruments.

Other than the note repurchase obligations described above, we have determined that we do not have significant exposure to rating triggers in various other contracts and equipment leases. Rating triggers are defined as provisions that would create an automatic default or acceleration of indebtedness based on a change in our credit rating.

In the normal course of business, our counterparties provide us with secured and unsecured credit. In the event of a downgrade in our credit rating or a significant change in our counterparties’ evaluation of our credit worthiness, we could be asked to provide additional collateral.

Capital Expenditures - We classify expenditures that are expected to generate additional revenues or significant operating efficiencies as growth capital expenditures. Any remaining capital expenditures are classified as maintenance capital expenditures.

Table of Contents

The following table summarizes our 2008 projected growth and maintenance capital expenditures, excluding AFUDC.

2008 Projected Capital Expenditures	Growth	Maintenance	Total
	(Millions of dollars)		
Natural Gas Gathering and Processing	$ 128	$ 22	$ 150
Natural Gas Pipelines	224	21	245
Natural Gas Liquids Gathering and Fractionation	143	29	172
Natural Gas Liquids Pipelines	735	12	747
Total projected capital expenditures	$ 1,230	$ 84	$1,314

Additional information about our growth capital expenditures is included under “Capital Projects” beginning on page 21. Financing for our capital expenditures may include any, or a combination, of the following: cash from operations, borrowings under our Partnership Credit Agreement, and debt or equity offerings.

Investment in Northern Border Pipeline - Northern Border Pipeline anticipates an equity contribution of approximately $85 million will be required of its partners in 2009, of which our share will be approximately $43 million for our 50 percent equity interest.

Cash Distributions - We distribute 100 percent of our available cash, which generally consists of all cash receipts less adjustments for cash disbursements and net change to reserves, to our general and limited partners. Our income is allocated to our general partner and limited partners according to their partnership percentages of 2 percent and 98 percent, respectively. The effect of any incremental income allocations for incentive distributions to our general partner is calculated after the income allocation for the general partner’s partnership interest and before the income allocation to the limited partners.

The following table sets forth the distribution payments, including our general partner’s incentive distribution interests, for the periods indicated.

	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
	(Thousands of dollars)	
Common unitholders	**$ 161,852**	$ 137,801
Class B unitholder	**114,045**	108,387
General Partner	**56,193**	39,810

The following summarizes our quarterly cash distribution activity for 2008.

- In January 2008, we increased our cash distribution to $1.025 per unit for the fourth quarter of 2007. The distribution was paid on February 14, 2008, to unitholders of record on January 31, 2008.
- In April 2008, we increased our cash distribution to $1.04 per unit for the first quarter of 2008. The distribution was paid on May 15, 2008, to unitholders of record as of April 30, 2008.
- In July 2008, we increased our cash distribution to $1.06 per unit for the second quarter of 2008. The distribution was paid on August 14, 2008, to unitholders of record as of July 31, 2008.
- In October 2008, we increased our cash distribution to $1.08 per unit ($4.32 per unit on an annualized basis) for the third quarter of 2008. The distribution will be paid on November 14, 2008, to unitholders of record as of October 31, 2008.

Our general partner’s percentage interest in quarterly distributions increases after certain specified target levels are met. For additional information, see “Cash Distribution Policy” under Part II, Item 5, Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities, in our Annual Report on Form 10-K for the year ended December 31, 2007.

Commodity Prices - We are subject to commodity price volatility. Significant fluctuations in commodity prices may impact our overall liquidity due to the impact commodity price changes have on our cash flows from operating activities, including the impact on working capital for NGLs held in storage, margin requirements and certain energy-related receivables. We believe that our available credit and cash and cash equivalents are adequate to meet liquidity requirements associated with commodity price volatility. See discussion beginning on page 38 under “Commodity Price Risk” in Item 3, Quantitative and Qualitative Disclosures about Market Risk, for information on our hedging activities.

Table of Contents

ENVIRONMENTAL AND SAFETY MATTERS

Environmental Liabilities - We are subject to multiple environmental, historical and wildlife preservation laws and regulations affecting many aspects of our present and future operations. Regulated activities include those involving air emissions, storm water and wastewater discharges, handling and disposal of solid and hazardous wastes, hazardous materials transportation, and pipeline and facility construction. These laws and regulations require us to obtain and comply with a wide variety of environmental clearances, registrations, licenses, permits and other approvals. Failure to comply with these laws, regulations, permits and licenses may expose us to fines, penalties and/or interruptions in our operations that could be material to our results of operations. If an accidental leak or spill of hazardous substances or petroleum products occurs from our lines or facilities, in the process of transporting natural gas, NGLs, or refined products, or at any facility that we own, operate or otherwise use, we could be held jointly and severally liable for all resulting liabilities, including investigation and clean-up costs, which could materially affect our results of operations and cash flows. In addition, emission controls required under the federal Clean Air Act and other similar federal and state laws could require unexpected capital expenditures at our facilities. We cannot assure that existing environmental regulations will not be revised or that new regulations will not be adopted or become applicable to us. Revised or additional regulations that result in increased compliance costs or additional operating restrictions, particularly if those costs are not fully recoverable from customers, could have a material adverse effect on our business, financial condition and results of operations.

Our expenditures for environmental evaluation, mitigation and remediation to date have not been significant in relation to our results of operations, and there were no material effects upon earnings during the nine months ended September 30, 2008 or 2007, related to compliance with environmental regulations.

Pipeline Safety - We are subject to United States Department of Transportation regulations, including integrity management regulations. The Pipeline Safety Improvement Act requires pipeline companies to perform integrity assessments on pipeline segments that pass through densely populated areas or near specifically designated high consequence areas. To our knowledge, we are in compliance with all material requirements associated with the various pipeline safety regulations.

Air and Water Emissions - The federal Clean Air Act, the federal Clean Water Act and analogous state laws impose restrictions and controls regarding the discharge of pollutants into the air and water in the United States. Under the Clean Air Act, a federally enforceable operating permit is required for sources of significant air emissions. We may be required to incur certain capital expenditures for air pollution-control equipment in connection with obtaining or maintaining permits and approvals for sources of air emissions. The Clean Water Act imposes substantial potential liability for the removal and remediation of pollutants discharged to waters of the United States. To our knowledge, we are in compliance with all material requirements associated with the various regulations.

Chemical Site Security - The United States Department of Homeland Security (Homeland Security) released an interim rule in April 2007 that requires companies to provide reports on sites where certain chemicals, including many hydrocarbon products, are stored. After having received these reports, Homeland Security is identifying which sites are required to implement minimum security measures. Homeland Security is in the initial stages of implementing this rule, and the full extent to which the rule will require us to undertake additional expenditures for site security is uncertain at this point.

Climate Change - Our environmental and climate change strategy focuses on taking steps to minimize the impact of our operations on the environment. These strategies include: (i) developing and maintaining an accurate greenhouse gas emissions inventory, (ii) improving the efficiency of our various pipeline and gas processing facilities, (iii) following developing technologies for emission control, (iv) following developing technologies to capture carbon dioxide to keep it from reaching the atmosphere, and (v) analyzing options for future energy investment.

Currently, operating entities within our Partnership participate in the Processing and Transmission sectors of the United States Environmental Protection Agency's Natural Gas STAR Program to voluntarily reduce methane emissions. In addition, we continue to focus on maintaining low rates of lost and unaccounted for gas through expanded implementation of best practices to limit the release of methane during pipeline and facility maintenance and operations.

Table of Contents

CASH FLOW ANALYSIS

Operating Cash Flows - We use the indirect method to prepare our Consolidated Statements of Cash Flows. Under this method, we reconcile net income to cash flows provided by operating activities by adjusting net income for those items that impact net income but may not result in actual cash receipts or payments during the period. These reconciling items include depreciation and amortization, allowance for equity funds used during construction, gain on sale of assets, minority interests in income of consolidated subsidiaries, and undistributed earnings from equity investments in excess of distributions received.

Operating cash flows increased by $42.2 million for the nine months ended September 30, 2008, compared with the same period in 2007. The increase in our operating cash flow is primarily attributable to higher net income, adjusted for the non-cash items as discussed above. This increase was offset by a reduction in cash from changes in working capital. For more information on our results of operations, see “Financial Results and Operating Information” within Item 2.

Investing Cash Flows - Cash used in investing activities was $854.5 million for the nine months ended September 30, 2008, compared with $409.9 million for the same period in 2007. The increased use of cash was primarily due to increased capital expenditures related to our capital projects.

Financing Cash Flows - Cash provided by financing activities was $298.4 million for the nine months ended September 30, 2008, compared with $656.8 million for the same period in 2007.

During 2008, our concurrent public offering and private placement of common units generated proceeds of $450.2 million. In addition, ONEOK Partners GP contributed $9.5 million in order to maintain its 2 percent general partner interest in us. We used a portion of the proceeds and general partner contributions to repay borrowings under our revolving credit agreement.

Net borrowings totaled $180.0 million for the nine months ended September 30, 2008, compared with $359.0 million for the same period in 2007. Borrowings for both periods were primarily used to fund our ongoing capital projects. Net borrowings in 2008 include repayments, which were made with a portion of the proceeds provided by the public offering and private placement discussed above.

Cash distributions to our general and limited partners for 2008 were $332.1 million, compared with $286.0 million in the same period in 2007, an increase of $46.1 million. This increase was primarily due to the additional units outstanding during 2008, as a result of the concurrent public offering and private placement in March and April 2008, as well as cash distributions of $3.125 per unit for the nine months ended September 30, 2008, compared with $2.97 per unit paid in the same period in 2007.

During the third quarter of 2007, we completed an underwritten public offering of senior notes totaling $598 million in net proceeds, before offering expenses. This debt issuance, net of discounts, was used to repay borrowings under our revolving credit agreement in the fourth quarter of 2007 and finance the $300 million acquisition of assets, before working capital adjustments, from a subsidiary of Kinder Morgan in October 2007.

FORWARD-LOOKING STATEMENTS

Some of the statements contained and incorporated in this Quarterly Report on Form 10-Q are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities and Exchange Act of 1934, as amended. The forward-looking statements relate to our anticipated financial performance, management’s plans and objectives for our future operations, our business prospects, the outcome of regulatory and legal proceedings, market conditions and other matters. We make these forward-looking statements in reliance on the safe harbor protections provided under the Private Securities Litigation Reform Act of 1995. The following discussion is intended to identify important factors that could cause future outcomes to differ materially from those set forth in the forward-looking statements.

Forward-looking statements include the items identified in the preceding paragraph, the information concerning possible or assumed future results of our operations and other statements contained or incorporated in this Quarterly Report on Form 10-Q identified by words such as “anticipate,” “estimate,” “expect,” “project,” “intend,” “plan,” “believe,” “should,” “goal,” “forecast,” “could,” “may,” “continue,” “might,” “potential,” “scheduled” and other words and terms of similar meaning.

Table of Contents

You should not place undue reliance on forward-looking statements. Known and unknown risks, uncertainties and other factors may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by forward-looking statements. Those factors may affect our operations, markets, products, services and prices. In addition to any assumptions and other factors referred to specifically in connection with the forward-looking statements, factors that could cause our actual results to differ materially from those contemplated in any forward-looking statement include, among others, the following:

- the effects of weather and other natural phenomena on our operations, demand for our services and energy prices;
- competition from other United States and Canadian energy suppliers and transporters as well as alternative forms of energy;
- the capital intensive nature of our businesses;
- the profitability of assets or businesses acquired by us;
- risks of marketing, trading and hedging activities, including the risks of changes in energy prices or the financial condition of our counterparties;
- the uncertainty of estimates, including accruals and costs of environmental remediation;
- the timing and extent of changes in energy commodity prices;
- the effects of changes in governmental policies and regulatory actions, including changes with respect to income and other taxes, environmental compliance, climate change initiatives, authorized rates or recovery of gas and gas transportation costs;
- the impact on drilling and production by factors beyond our control, including the demand for natural gas and refinery-grade crude oil; producers' desire and ability to obtain necessary permits; reserve performance; and capacity constraints on the pipelines that transport crude oil, natural gas and NGLs from producing areas and our facilities;
- changes in demand for the use of natural gas because of market conditions caused by concerns about global warming;
- the impact of unforeseen changes in interest rates, equity markets, inflation rates, economic recession and other external factors over which we have no control;
- actions by rating agencies concerning the credit ratings of us or our general partner;
- the results of administrative proceedings and litigation, regulatory actions and receipt of expected clearances involving the OCC, KCC, Texas regulatory authorities or any other local, state or federal regulatory body, including the FERC;
- our ability to access capital at competitive rates or on terms acceptable to us;
- risks associated with adequate supply to our gathering, processing, fractionation and pipeline facilities, including production declines that outpace new drilling;
- the risk that material weaknesses or significant deficiencies in our internal control over financial reporting could emerge or that minor problems could become significant;
- the impact and outcome of pending and future litigation;
- the ability to market pipeline capacity on favorable terms, including the effects of:
  - future demand for and prices of natural gas and NGLs;
  - competitive conditions in the overall energy market;
  - availability of supplies of Canadian and United States natural gas; and
  - availability of additional storage capacity;
- performance of contractual obligations by our customers, service providers, contractors and shippers;
- the timely receipt of approval by applicable governmental entities for construction and operation of our pipeline and other projects and required regulatory clearances;
- our ability to acquire all necessary rights-of-way permits and consents in a timely manner, to promptly obtain all necessary materials and supplies required for construction, and to construct gathering, processing, storage, fractionation and transportation facilities without labor or contractor problems;
- the mechanical integrity of facilities operated;
- demand for our services in the proximity of our facilities;
- our ability to control operating costs;
- acts of nature, sabotage, terrorism or other similar acts that cause damage to our facilities or our suppliers' or shippers' facilities;
- economic climate and growth in the geographic areas in which we do business;
- the risk of a significant slowdown in growth or decline in the U.S. economy or the risk of delay in growth recovery in the U.S. economy, including increasing liquidity risks in U.S. credit markets;
- the impact of recently issued and future accounting pronouncements and other changes in accounting policies;

Table of Contents

- the possibility of future terrorist attacks or the possibility or occurrence of an outbreak of, or changes in, hostilities or changes in the political conditions in the Middle East and elsewhere;
- the risk of increased costs for insurance premiums, security or other items as a consequence of terrorist attacks;
- risks associated with pending or possible acquisitions and dispositions, including our ability to finance or integrate any such acquisitions and any regulatory delay or conditions imposed by regulatory bodies in connection with any such acquisitions and dispositions;
- the impact of unsold pipeline capacity being greater or less than expected;
- the ability to recover operating costs and amounts equivalent to income taxes, costs of property, plant and equipment and regulatory assets in our state and FERC-regulated rates;
- the composition and quality of the natural gas and NGLs we gather and process in our plants and transport on our pipelines;
- the efficiency of our plants in processing natural gas and extracting and fractionating NGLs;
- the impact of potential impairment charges;
- the risk inherent in the use of information systems in our respective businesses, implementation of new software and hardware, and the impact on the timeliness of information for financial reporting;
- our ability to control construction costs and completion schedules of our pipelines and other projects; and
- the risk factors listed in the reports we have filed and may file with the SEC, which are incorporated by reference.

These factors are not necessarily all of the important factors that could cause actual results to differ materially from those expressed in any of our forward-looking statements. Other factors could also have material adverse effects on our future results. These and other risks are described in greater detail in Part I, Item 1A, Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2007. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these factors. Other than as required under securities laws, we undertake no obligation to update publicly any forward-looking statement whether as a result of new information, subsequent events or change in circumstances, expectations or otherwise.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our quantitative and qualitative disclosures about market risk are consistent with those discussed in Part II, Item 7A, Quantitative and Qualitative Disclosures About Market Risk in our Annual Report on Form 10-K for the year ended December 31, 2007, except that beginning January 1, 2008, we determine the fair value of our derivative instruments in accordance with Statement 157. See Notes A and C of the Notes to Consolidated Financial Statements in this Quarterly Report on Form 10-Q for further discussion of Statement 157.

INTEREST RATE RISK

General - We are subject to the risk of interest rate fluctuation in the normal course of business. We manage interest rate risk through the use of fixed-rate debt, floating-rate debt and, at times, interest-rate swaps. At September 30, 2008, the interest rate on all of our long-term debt was fixed.

Fair Value Hedges - See Note D of the Notes to Consolidated Financial Statements in this Quarterly Report on Form 10-Q for discussion of interest-rate swaps and interest expense savings from terminated swaps.

Total interest expense savings from amortization of terminated swaps for 2008 will be $3.7 million, compared with total net swap savings of $2.5 million in 2007.

COMMODITY PRICE RISK

In our Natural Gas Gathering and Processing segment, we are exposed to commodity price risk, primarily NGLs, as a result of receiving commodities in exchange for our services. To a lesser extent, exposures arise from the relative price differential between NGLs and natural gas, or the gross processing spread, with respect to our keep-whole processing contracts. We are also exposed to the risk of price fluctuations and the cost of intervening transportation at various market locations. We use commodity fixed-price physical forwards and derivative contracts, including NYMEX-based futures and over-the-counter swaps, to minimize earnings volatility related to natural gas, NGL and condensate price fluctuations.

We reduce our gross processing spread exposure through a combination of physical and financial hedges. We utilize a portion of our percent-of-proceeds equity natural gas as an offset, or natural hedge, to an equivalent portion of our

Table of Contents

keep-whole shrink requirements. This has the effect of converting our gross processing spread risk to NGL commodity price risk, and we then use financial instruments to hedge the sale of NGLs.

The following tables set forth our Natural Gas Gathering and Processing segment's hedging information for the remainder of 2008 and for the year ending December 31, 2009.

	Three Months Ending December 31, 2008		
	Volumes Hedged	**Average Price**	**Percentage Hedged**
NGLs *(Bbl/d)* (a)	8,496	$ 1.30 / gallon	64%
Condensate *(Bbl/d)* (a)	773	$ 2.14 / gallon	53%
Total liquid sales *(Bbl/d)*	9,269	$ 1.37 / gallon	63%
Natural gas *(MMBtu/d)* (a)	5,000	$ 9.61 / MMBtu	56%

(a) - Hedged with fixed-price swaps.

	Year Ending December 31, 2009		
	Volumes Hedged	**Average Price**	**Percentage Hedged**
NGLs *(Bbl/d)* (a)	2,185	$2.08 / gallon	19%
Condensate *(Bbl/d)* (a)	666	$3.23 / gallon	30%
Total liquid sales *(Bbl/d)*	2,851	$2.35 / gallon	21%

(a) - Hedged with fixed-price swaps.

Our commodity price risk is estimated as a hypothetical change in the price of NGLs, crude oil and natural gas at September 30, 2008, excluding the effects of hedging and assuming normal operating conditions. Our condensate sales are based on the price of crude oil. We estimate the following:

- a $0.01 per gallon increase in the composite price of NGLs would increase annual net margin by approximately $1.5 million,
- a $1.00 per barrel increase in the price of crude oil would increase annual net margin by approximately $0.9 million, and
- a $0.10 per MMBtu increase in the price of natural gas would increase annual net margin by approximately $0.4 million.

The above estimates of commodity price risk do not include any effects on demand for our services that might be caused by, or arise in conjunction with, price changes. For example, a change in the gross processing spread may cause a change in the amount of ethane extracted from the natural gas stream, impacting gathering and processing margins, NGL exchange revenues, natural gas deliveries, and NGL volumes shipped and fractionated.

In our Natural Gas Liquids Gathering and Fractionation segment, we are exposed to commodity price risk primarily as a result of NGLs in storage, the relative values of the various NGL products to each other, the relative value of NGLs to natural gas and the relative value of NGL purchases at one location and sales at another location, known as basis risk. We have not entered into any hedges with respect to our NGL marketing activities.

In our Natural Gas Pipelines segment, we are exposed to commodity price risk because our intrastate and interstate natural gas pipelines collect natural gas from our customers for operations or as part of our fee for services provided. When the amount of natural gas consumed in operations by these pipelines differs from the amount provided by our customers, our pipelines must buy or sell natural gas, or store or use natural gas from inventory, which exposes us to commodity price risk. At September 30, 2008, there were no hedges in place with respect to natural gas price risk from our intrastate and interstate pipeline operations.

See Note D of the Notes to Consolidated Financial Statements in this Quarterly Report on Form 10-Q for more information on our hedging activities.

Table of Contents

COUNTERPARTY CREDIT RISK

We assess the credit worthiness of our counterparties on an on-going basis and require security, including prepayments and other forms of cash collateral, when appropriate.

ITEM 4. CONTROLS AND PROCEDURES

Quarterly Evaluation of Disclosure Controls and Procedures - As of the end of the period covered by this report, the Chief Executive Officer (Principal Executive Officer) and the Chief Financial Officer (Principal Financial Officer) of ONEOK Partners GP, our general partner, evaluated the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to management of ONEOK Partners GP, including the officers of ONEOK Partners GP who are the equivalent of our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Based on their evaluation, they concluded that as of September 30, 2008, our disclosure controls and procedures were effective in ensuring that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms.

Changes in Internal Control Over Financial Reporting - We have made no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act) during the third quarter ended September 30, 2008, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Additional information about our legal proceedings is included under Part I, Item 3, Legal Proceedings, in our Annual Report on Form 10-K for the year ended December 31, 2007.

Mont Belvieu Emissions, Texas Commission on Environmental Quality - We are in discussions with Texas Commission on Environmental Quality (TCEQ) staff regarding air emissions from a heat exchanger at our Mont Belvieu fractionator, which may have exceeded the emissions allowed under our air permit. We discovered the emissions in May 2008. The TCEQ has not issued a notice of enforcement relating to the emissions under this permit. Although no assurances can be given, we do not believe that any penalties associated with any alleged violations will have a material adverse effect on our financial position, results of operations, or net cash flows.

ITEM 1A. RISK FACTORS

Our investors should consider the risks set forth in Part I, Item 1A, Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2007, that could affect us and our business. These risk factors have not materially changed, except as set forth below. Although we have tried to discuss key factors, our investors need to be aware that other risks may prove to be important in the future. New risks may emerge at any time and we cannot predict such risks or estimate the extent to which they may affect our financial performance. Investors should carefully consider the discussion of risks and the other information included or incorporated by reference in this Quarterly Report on Form 10-Q, including “Forward-Looking Statements,” which are included in Part I, Item 2, Management’s Discussion and Analysis of Financial Condition and Results of Operations.

RISK FACTORS INHERENT IN OUR BUSINESS

We are subject to physical and financial risks associated with climate change.

There is a growing belief that emissions of greenhouse gases may be linked to global climate change. Climate change creates physical and financial risk. Our customers’ energy needs vary with weather conditions, primarily temperature and humidity. For residential customers, heating and cooling represent their largest energy use. To the extent weather conditions are affected by climate change, customers’ energy use could increase or decrease depending on the duration and magnitude of the changes. Increased energy use due to weather changes may require us to invest in more pipeline and other infrastructure to serve increased demand. A decrease in energy use due to weather changes may affect our financial condition, through decreased revenues. Extreme weather conditions in general require more system backup, adding to costs, and can contribute

Table of Contents

to increased system stresses, including service interruptions. Weather conditions outside of our service territory could also have an impact on our revenues. Severe weather impacts our service territories primarily through hurricanes, thunderstorms, tornadoes and snow or ice storms. To the extent the frequency of extreme weather events increases, this could increase our cost of providing service. We may not recover all costs related to mitigating these physical risks. To the extent financial markets view climate change and emissions of greenhouse gases as a financial risk, this could negatively affect our ability to access capital markets or cause us to receive less favorable terms and conditions in future financings.

We may be subject to legislative and regulatory responses to climate change, with which compliance could be difficult and costly.

Legislative and regulatory responses related to climate change create financial risk. Increased public awareness and concern may result in more state, regional and/or federal requirements to reduce or mitigate the emission of greenhouse gases. Numerous states have announced or adopted programs to stabilize and reduce greenhouse gases and federal legislation has been introduced in both houses of the United States Congress. Our pipeline and gas processing facilities will potentially be subject to regulation under climate change policies introduced at either the state or federal level within the next few years. We may not recover all costs related to complying with climate change regulatory requirements imposed on us. If our regulators do not allow us to recover all or a part of the cost of capital investment or operating and maintenance costs incurred to comply with the mandates, it could have a material adverse effect on our results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not Applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not Applicable.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not Applicable.

ITEM 5. OTHER INFORMATION

Not Applicable.

ITEM 6. EXHIBITS

The following exhibits are filed as part of this Quarterly Report on Form 10-Q:

Exhibit No.	Exhibit Description
31.1	Certification of John W. Gibson pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of Curtis L. Dinan pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification of John W. Gibson pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (furnished only pursuant to Rule 13a-14(b)).
32.2	Certification of Curtis L. Dinan pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (furnished only pursuant to Rule 13a-14(b)).

Section 2: EX-31.1 (SECTION 302 CERTIFICATION OF JOHN W. GIBSON)

Exhibit 31.1

Certification

I, John W. Gibson, certify that:

I have reviewed this quarterly report on Form 10-Q of ONEOK Partners, L.P.;

Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

The registrant’s other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

The registrant’s other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and
b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

GLOSSARY

The abbreviations, acronyms, industry terminology and certain other terms used in this Annual Report on Form 10-K are defined as follows:

AFUDC	Allowance for funds used during construction
APB Opinion	Accounting Principles Board Opinion
ARB	Accounting Research Bulletin
Bbl	Barrels, 1 barrel is equivalent to 42 United States gallons
Bbl/d	Barrels per day
BBtu/d	Billion British thermal units per day
Bcf	Billion cubic feet
Bcf/d	Billion cubic feet per day
Bighorn Gas Gathering	Bighorn Gas Gathering, L.L.C.
Black Mesa	Black Mesa Pipeline, Inc.
Btu	British thermal units, a measure of the amount of heat required to raise the temperature of one pound of water one degree Fahrenheit
Bushton Plant	Bushton Gas Processing Plant
EITF	Emerging Issues Task Force
EPA	United States Environmental Protection Agency
Exchange Act	Securities Exchange Act of 1934, as amended
FASB	Financial Accounting Standards Board
FERC	Federal Energy Regulatory Commission
FIN	FASB Interpretation
Fort Union Gas Gathering	Fort Union Gas Gathering, L.L.C.
GAAP	Generally Accepted Accounting Principles in the United States
Guardian Pipeline	Guardian Pipeline, L.L.C.
Heartland	Heartland Pipeline Company
Intermediate Partnership	ONEOK Partners Intermediate Limited Partnership, formerly known as Northern Border Intermediate Limited Partnership, a wholly owned subsidiary of ONEOK Partners, L.P.
IRS	Internal Revenue Service
KCC	Kansas Corporation Commission
KDHE	Kansas Department of Health and Environment
LIBOR	London Interbank Offered Rate
Lost Creek Gathering Company	Lost Creek Gathering Company, L.L.C
MBbl	Thousand barrels
MBbl/d	Thousand barrels per day
Midwestern Gas Transmission	Midwestern Gas Transmission Company
MMBtu	Million British thermal units
MMBtu/d	Million British thermal units per day
MMcf	Million cubic feet
MMcf/d	Million cubic feet per day
Moody’s	Moody’s Investors Service, Inc.
NBP Services	NBP Services, LLC, a subsidiary of ONEOK
NGL(s)	Natural gas liquid(s)
Northern Border Pipeline	Northern Border Pipeline Company
NYMEX	New York Mercantile Exchange
NYSE	New York Stock Exchange
OBPI	ONEOK Bushton Processing Inc.
OCC	Oklahoma Corporation Commission
OkTex Pipeline	OkTex Pipeline Company, L.L.C.
ONEOK	ONEOK, Inc.
ONEOK NB	ONEOK NB Company, formerly known as Northwest Border Pipeline Company, a wholly owned subsidiary of ONEOK, Inc.
ONEOK Partners GP	ONEOK Partners GP, L.L.C., formerly known as Northern Plains Natural Gas Company, LLC, a wholly owned subsidiary of ONEOK, Inc. and our sole general partner
Overland Pass Pipeline Company	Overland Pass Pipeline Company LLC
Partnership Agreement	Third Amended and Restated Agreement of Limited Partnership of ONEOK Partners, L.P.

Table of Contents

POP	Percent of Proceeds
RRC	Texas Railroad Commission
S&P	Standard & Poor's Rating Group
SEC	Securities and Exchange Commission
Statement	Statement of Financial Accounting Standards
TC PipeLines	TC PipeLines Intermediate Limited Partnership, a subsidiary of TC PipeLines, LP
TransCanada	TransCanada Corporation
Viking Gas Transmission	Viking Gas Transmission Company

The statements in this Annual Report on Form 10-K that are not historical information, including statements concerning plans and objectives of management for future operations, economic performance or related assumptions, are forward-looking statements. Forward-looking statements may include words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "should," "goal," "forecast" and other words and terms of similar meaning. Although we believe that our expectations regarding future events are based on reasonable assumptions, we can give no assurance that our goals will be achieved. Important factors that could cause actual results to differ materially from those in the forward-looking statements are described under Part I, Item 1A, Risk Factors, and Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation—Forward-Looking Statements in this Annual Report on Form 10-K for the year ended December 31, 2007.

Table of Contents

PART I

ITEM 1. BUSINESS

GENERAL

ONEOK Partners, L.P. is a publicly traded Delaware limited partnership that was formed in 1993. Our common units are listed on the NYSE under the trading symbol "OKS." We own and manage natural gas gathering, processing, storage and interstate and intrastate pipeline assets and natural gas liquids gathering and distribution pipelines, storage and fractionators, connecting much of the natural gas and NGL supply in the Mid-Continent and Gulf Coast regions with key market centers in Conway, Kansas, Mont Belvieu, Texas, and Chicago, Illinois. We also own a 50 percent equity interest in a leading transporter of natural gas imported from Canada into the United States.

DESCRIPTION OF BUSINESS SEGMENTS

In July 2007, we announced a series of organizational changes that led to the realignment of our previous business segments. Our financial results are now reported in these four segments: (i) Natural Gas Gathering and Processing, which remains unchanged, (ii) Natural Gas Pipelines, which is comprised of our former interstate natural gas pipelines segment and the natural gas assets of our former pipelines and storage segment, (iii) Natural Gas Liquids Gathering and Fractionation, which remains unchanged, and (iv) Natural Gas Liquids Pipelines, which is comprised of the natural gas liquids assets of our former pipelines and storage segment. Prior periods have been restated to reflect these segment changes. The change reflects the increasing scale of the natural gas liquids business, which has grown significantly since 2006. Our natural gas liquids business is expanding as we integrate the assets acquired in October 2007 from a subsidiary of Kinder Morgan Energy Partners, L.P. (Kinder Morgan) into our Natural Gas Liquids Pipelines segment and complete our other internal growth projects.

Our operations are divided into these strategic business segments based on similarities in economic characteristics, products and services, types of customers, methods of distribution and regulatory environment, as follows:

- our Natural Gas Gathering and Processing segment primarily gathers and processes raw natural gas;
- our Natural Gas Pipelines segment primarily operates regulated interstate and intrastate natural gas transmission pipelines and natural gas storage facilities;
- our Natural Gas Liquids Gathering and Fractionation segment primarily gathers, treats and fractionates NGLs and stores and markets NGL products; and
- our Natural Gas Liquids Pipelines segment primarily operates our FERC-regulated interstate natural gas liquids gathering and distribution pipelines.

For financial and statistical information regarding our business segments, see Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operation. See Note J of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for a discussion of sales to unaffiliated customers, operating income and total assets by business segment.

Partnership Structure

We are managed under the direction of the Board of Directors of our sole general partner, ONEOK Partners GP, which consists of six members. Three of our Board members qualify as independent under the listing standards of the NYSE and also serve as the Audit Committee of ONEOK Partners GP. ONEOK Partners GP is a wholly owned subsidiary of ONEOK. ONEOK owns a 45.7 percent aggregate equity interest in us.

Business Strategy

Our primary business objectives are to generate cash flow sufficient to pay quarterly cash distributions to our unitholders and to increase our quarterly cash distributions over time. Our ability to maintain and grow our distributions to unitholders depends on the growth of our existing businesses and strategic acquisitions. We focus on safe, environmentally sound and compliant operations for our employees, contractors, customers and the public.

Our strategy is to expand and acquire assets in the United States related to gathering, processing, fractionating, storing and marketing natural gas and NGLs that will utilize our core competencies, minimize commodity price risk and provide long-

Table of Contents

term, sustainable and stable cash flows. We finance our acquisitions and capital expenditures with a mix of operating cash flows, debt and equity.

In April 2006, we acquired certain companies comprising ONEOK's former gathering and processing, natural gas liquids, and pipeline and storage segments, collectively referred to as the "ONEOK Energy Assets" from ONEOK, the parent company of our general partner, in a series of transactions, collectively referred to as the "ONEOK Transactions," which are described in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation under "Significant Acquisitions and Divestitures." These assets complemented our core competencies related to energy services and diversified our portfolio of assets. The assets we acquired from ONEOK enabled us to enter into energy-related businesses in the well-established Mid-Continent region and key natural gas liquids markets in Kansas and Texas. In addition, our expanded asset portfolio positions us for future organic growth projects, which we believe currently offer the most attractive growth opportunities for us.

SIGNIFICANT DEVELOPMENTS IN 2007 AND EARLY 2008

In February 2008, we announced plans to construct a 78-mile natural gas liquids gathering pipeline to connect two natural gas processing plants in the Woodford Shale area in southeast Oklahoma at a cost of approximately $25 million, excluding AFUDC. The project is currently scheduled for completion in the second quarter of 2008. These two plants are expected to produce approximately 25 MBbl/d of unfractionated NGLs. Until the Arbuckle Pipeline project is completed, the natural gas liquids production will be transported by our existing Mid-Continent natural gas liquids pipelines. Upon completion of the Arbuckle Pipeline project, the Woodford Shale natural gas liquids production is expected to be transported to our Mont Belvieu, Texas, fractionation facility.

In October 2007, we completed the acquisition of an interstate natural gas liquids and refined petroleum products pipeline system and related assets from a subsidiary of Kinder Morgan for approximately $300 million, before working capital adjustments. The system extends from Bushton and Conway, Kansas, to Chicago, Illinois, and transports, stores and delivers a full range of NGL and refined products. The FERC-regulated system spans 1,627 miles and has a capacity to transport up to 134 MBbl/d. The transaction includes approximately 978 MBbl of owned storage capacity, eight NGL terminals and a 50 percent ownership of Heartland.

In September 2007, we completed an underwritten public debt offering of $600 million to finance the assets acquired from Kinder Morgan and to repay outstanding debt under the 2007 Partnership Credit Agreement, which was incurred to fund our internal growth capital projects.

During 2007, we began construction on the Overland Pass Pipeline Company joint-venture project with a subsidiary of The Williams Companies, Inc. (Williams). Overland Pass Pipeline Company is building a 760-mile natural gas liquids pipeline from Opal, Wyoming, to the Mid-Continent natural gas liquids market center in Conway, Kansas. The pipeline is designed to transport approximately 110 MBbl/d of unfractionated NGLs, which can be increased to approximately 150 MBbl/d with additional pump facilities. This project has received the required approvals of various state and federal regulatory authorities, and we are constructing the pipeline with start-up currently scheduled for the second quarter of 2008.

In March 2007, we announced that Overland Pass Pipeline Company also plans to construct a 150-mile lateral pipeline with capacity to transport as much as 100 MBbl/d of unfractionated NGLs from the Piceance Basin in Colorado to the Overland Pass Pipeline. Williams announced that it intends to construct a new natural gas processing plant in the Piceance Basin and will dedicate its NGL production from that plant and an existing plant to be transported by the lateral pipeline. This project requires the approval of various state and federal regulatory authorities. Assuming Overland Pass Pipeline Company obtains the required state and federal regulatory approvals, construction of this lateral pipeline is currently expected to begin in late 2008 and be completed during the second quarter of 2009.

In March 2007, we announced plans to build the 440-mile Arbuckle Pipeline, a natural gas liquids pipeline from southern Oklahoma through northern Texas and continuing on to the Texas Gulf Coast. The Arbuckle Pipeline will have the capacity to transport 160 MBbl/d of unfractionated natural gas liquids and will connect our existing Mid-Continent infrastructure with our fractionation facility in Mont Belvieu, Texas, and other Gulf Coast region fractionators. Construction of the pipeline will require permits from various federal, state and local regulatory bodies. Construction is currently expected to begin in mid-2008 and will be completed by early 2009.

In March 2007, we announced the expansion of our Grasslands natural gas processing facility in North Dakota. The Grasslands facility is our largest natural gas processing plant in the Williston Basin. The expansion increases processing capacity to approximately 100 MMcf/d from its current capacity of 63 MMcf/d and increases fractionation capacity to

Table of Contents

approximately 12 MBbl/d from 8 MBbl/d. The expansion project is expected to come on-line in phases, with the final phase currently expected to be on-line in the third quarter of 2008.

In January 2007, Fort Union Gas Gathering announced that it will double its existing gathering pipeline capacity by adding 148 miles of new gathering lines and approximately 649 MMcf/d of additional capacity in the Powder River basin of Wyoming. The expansion will occur in two phases. Phase 1 was placed in service during the fourth quarter of 2007. Phase 2 is currently expected to be in service during the second quarter of 2008. We own approximately 37 percent of Fort Union Gas Gathering.

NARRATIVE DESCRIPTION OF BUSINESS

Natural Gas Gathering and Processing

Business Strategy - We focus on safe, environmentally sound and compliant operations for our employees, contractors, customers and the public. We pursue growth through additional well connections, system expansions and strategic acquisitions. We seek to restructure expiring contracts to mitigate commodity exposure. We also seek to provide reliable, efficient and consistent operations through optimization of our natural gas gathering and processing operations while managing costs.

Segment Description - Our former gathering and processing segment is now called our Natural Gas Gathering and Processing segment. As part of the ONEOK Transactions described in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation under "Significant Acquisitions and Divestitures," we acquired all of ONEOK's natural gas gathering and processing assets and combined them with our legacy gathering and processing segment assets in April 2006.

Our operations include gathering of natural gas production from oil and natural gas wells. We gather raw natural gas in the Mid-Continent region, which includes the Anadarko Basin of Oklahoma and the Hugoton and Central Kansas Uplift Basins of Kansas. We also gather raw natural gas in three producing basins in the Rocky Mountain region: (i) the Williston Basin, which spans portions of Montana, North Dakota and the Canadian province of Saskatchewan, (ii) the Powder River Basin of Wyoming and (iii) the Wind River Basin of Wyoming.

Through gathering systems, raw natural gas volumes are aggregated for removal of water vapor, solids and other contaminants and to extract NGLs in order to provide marketable natural gas, commonly referred to as residue gas. When the liquids are separated from the raw natural gas at the processing plants, the liquids are in the form of a mixed, unfractionated NGL stream. This unfractionated NGL stream is generally shipped to fractionators, where by applying heat and pressure, the unfractionated NGL stream is separated into marketable purity products, such as ethane/propane mix, propane, iso-butane, normal butane and natural gasoline (collectively, NGL products). These NGL products can then be stored, transported and marketed to a diverse customer base.

Our Natural Gas Gathering and Processing segment gathers and processes raw natural gas. We generally gather and process gas under the following types of contracts.

- Percent of Proceeds (POP) - Under a POP contract, we retain a percentage of the NGLs and/or a percentage of the residue gas as payment for gathering, compressing and processing the producer's raw natural gas. The producer may take its share of the NGLs and residue gas in kind or receive its share of proceeds from our sale of the commodities. POP contracts expose us to both natural gas and NGL commodity price risk, but economically align us with the producer because we both benefit from higher commodity prices. There are a variety of factors that directly affect our POP margins, including:
    - the percentages of products retained that represent our equity NGL, condensate and residue gas sales volumes,
    - transportation and fractionation costs incurred on the NGLs, and
    - the natural gas, crude oil and NGL prices received for our retained products.
- Fee - Under a fee contract, we are paid a fee for the services provided on a basis such as Btus gathered, compressed and/or processed. The wellhead volume and fees received for the services provided are the main components of the margin for this type of contract. The producer may take its NGLs and residue gas in kind or receive its proceeds from our sale of the commodities. This type of contract primarily exposes us to volumetric risk with minimal commodity price risk, as a result of fuel costs and the value of the retained fuel. Our POP and keep-whole contracts also typically include fee provisions.
- Keep-Whole - Under a keep-whole processing contract, we extract NGLs from the raw natural gas and return to the producer volumes of residue gas containing the same amount of Btus as the raw natural gas that was delivered to us.

Table of Contents

We retain the NGLs as our fee for processing. Accordingly, we must purchase and return to the producer sufficient volumes of residue gas to replace the Btus that were removed as NGLs through the gathering and processing operation, commonly referred to as "shrink." Under index-based purchase agreements, we purchase raw natural gas at the wellhead to replace the natural gas that we consume in processing, and we typically bear the full cost of the plant fuel and shrink, with the excess residue gas being sold monthly at index-based prices. By using this contract type, the producer is kept whole on a Btu basis. This type of contract exposes us to the keep-whole spread, or gross processing spread, which is the relative difference in the economic value between NGLs and natural gas on a Btu basis. The main factors that affect our keep-whole margins include:

- shrink,
- plant fuel consumed,
- transportation and fractionation costs incurred on the NGLs,
- gross processing spread, and
- the natural gas, crude oil and NGL prices received for products sold.

Excluding any gain on sale of assets, operating income from our Natural Gas Gathering and Processing segment was 42 percent, 46 percent and 17 percent of our consolidated operating income in 2007, 2006 and 2005, respectively. Operating revenue of this segment is derived primarily from POP and fee contracts. We use derivative instruments to mitigate our sensitivity to fluctuations in the price of natural gas, condensate and NGLs. Our Natural Gas Gathering and Processing segment had no single external customer from which it received 10 percent or more of consolidated revenues. Intersegment sales accounted for 35 percent of our Natural Gas Gathering and Processing segment's revenues in 2007 and 2006. Our Natural Gas Gathering and Processing segment had no intersegment sales in 2005. A portion of our revenues are from ONEOK and its affiliates.

Market Conditions and Seasonality - Supply - Natural gas supply is affected by rig availability, operating capability and producer drilling activity, which is sensitive to commodity prices, geological success, available capital and regulatory control. Relatively high natural gas and crude oil prices, as well as favorable long-term projections of U.S. demand, continued to drive increased drilling in 2007 in the Mid-Continent and Rocky Mountain regions, which are our primary supply regions.

In the Mid-Continent region, the gathering and processing assets we acquired in the Anadarko Basin of Oklahoma and the Hugoton and Central Kansas Uplift Basins of Kansas are well established. However, we anticipate continuing volumetric declines in certain fields that supply our gathering and processing operations. Additionally, there is excess processing capacity, particularly in the Hugoton production region, which includes the Bushton Plant. Partly as a result of the Bushton Plant's inability to recover certain NGLs, such as ethane, the plant was at an economic disadvantage to the region's other cryogenic plants, and it was temporarily idled on January 1, 2007. See discussion on page 26.

In the Williston Basin, we connected more wells in 2007 than in prior years as a result of increased drilling activity. Transportation and refining capacity constraints for crude oil continue to only moderately impact natural gas production in the Williston Basin. Further development of the Big George coals, located in the center of the Powder River Basin, resulted in greater volumes during 2007, compared with 2006, for our wholly owned assets and joint-venture interests in Bighorn Gas Gathering and Fort Union Gas Gathering.

Demand - Demand for gathering and processing services is typically aligned with the supply of natural gas, which generally flows from a producing area at a relatively steady but gradually declining pace over time unless new reserves are added. Our plant operations can be adjusted to respond to market conditions, such as demand for ethane. By changing, within limits, the temperature and pressure at which raw natural gas is processed, we can produce more of the specific commodity that has the most favorable price or price spread.

Commodity Prices - Crude oil, natural gas and NGL prices are volatile due to market conditions. Storage injection and withdrawal rates, as well as available storage capacity, can also have an impact on commodity prices. We are exposed to market risk associated with adverse changes in commodity prices. Our primary exposures arise from the sale of natural gas, NGLs and condensate with respect to our processing contracts. To a lesser extent, we are exposed to the relative price differential between NGLs and natural gas, the risk of price fluctuations and the cost of intervening transportation at various market locations, and the demand for our products by the petrochemical industry and others.

Seasonality - Some of this segment's products are subject to weather-related seasonal demand. Cold temperatures typically increase demand for natural gas and propane, which are used to heat homes and businesses. Warm temperatures typically drive demand for natural gas used for gas-fired electric generation used to cool residential and commercial properties. Demand for iso-butane and natural gasoline, which are primarily used by the refining industry as blending stocks for motor

Table of Contents

fuel, may also be subject to some variability when automotive travel is higher. During periods of peak demand for a certain commodity, prices for that product typically increase, which influences processing decisions.

Competition - The gathering and processing business remains relatively fragmented despite significant consolidation in the industry. We compete for natural gas supplies with major integrated exploration and production companies, pipeline companies and their affiliated marketing companies, national and local natural gas gatherers and processors, and marketers in the Mid-Continent and Rocky Mountain regions.

Due to the unprecedented strength of the energy commodity market over the past two years, gathering and processing rates have become increasingly competitive. As a result, we may not be successful in obtaining new natural gas supplies to offset declines and may lose some existing supplies to competitors. We are responding to these industry conditions by making capital investments to improve plant processing flexibility and reduce operating costs, evaluating consolidation opportunities to maximize earnings, selling assets in non-core operating areas and renegotiating unprofitable contracts. Contracts covering approximately 84 percent of our volumes under keep-whole contracts contain language that effectively converts these contracts into fee contracts when the keep-whole spread is negative.

Government Regulation - The FERC has traditionally maintained that a processing plant is not a facility for the transportation or sale for resale of natural gas in interstate commerce and, therefore, is not subject to jurisdiction under the Natural Gas Act. Although the FERC has made no specific declaration as to the jurisdictional status of our natural gas processing operations or facilities, our natural gas processing plants are primarily involved in removing NGLs and, therefore, we believe, are exempt from FERC jurisdiction. The Natural Gas Act also exempts natural gas gathering facilities from the jurisdiction of the FERC. Interstate transmission facilities remain subject to FERC jurisdiction. The FERC has historically distinguished between these two types of facilities, either interstate or intrastate, on a fact-specific basis. We believe our gathering facilities and operations meet the criteria used by the FERC for non-jurisdictional gathering facility status. We can transport residue gas from our plants to interstate pipelines in accordance with Section 311(a) of the Natural Gas Policy Act.

Oklahoma and Kansas also have statutes regulating, to various degrees, the gathering of natural gas in those states. In each state, regulation is applied on a case-by-case basis if a complaint is filed against the gatherer with the appropriate state regulatory agency.

Natural Gas Pipelines

Business Strategy - We focus on safe, environmentally sound and compliant operations for our employees, contractors, customers and the public. We seek to maintain a competitive cost structure and increase throughput and growth of our existing natural gas pipelines and storage assets through extensions and expansions supported by long-term transportation and reservation contracts.

Segment Description - Our Natural Gas Pipelines segment is comprised of our previous interstate natural gas pipelines segment and the natural gas assets of our previous pipelines and storage segment. This segment primarily operates regulated natural gas transmission pipelines, natural gas storage facilities, and non-processable natural gas gathering facilities. We also provide interstate natural gas transportation and storage service in accordance with Section 311(a) of the Natural Gas Policy Act.

Our interstate natural gas pipeline assets transport natural gas through FERC-regulated interstate natural gas pipelines in Montana, North Dakota, South Dakota, Minnesota, Wisconsin, Illinois, Indiana, Kentucky, Tennessee, Oklahoma, Texas and New Mexico. Our interstate pipelines include Midwestern Gas Transmission, Guardian Pipeline, Viking Gas Transmission, OkTex Pipeline and a 50 percent interest in Northern Border Pipeline.

Our intrastate natural gas pipeline assets in Oklahoma have access to the major natural gas producing areas and transport natural gas throughout the state. We also have access to the major natural gas producing area in south central Kansas. In Texas, our intrastate natural gas pipelines are connected to the major natural gas producing areas in the Texas panhandle and the Permian Basin, and transport natural gas to the Waha Hub, where other pipelines may be accessed for transportation east to the Houston Ship Channel market, north into the Mid-Continent market and west to the California market.

We own or reserve storage capacity in underground natural gas storage facilities in Oklahoma, Kansas and Texas.

Our transportation contracts for our regulated natural gas activities are based upon rates stated in our tariffs. Tariffs specify the maximum rates customers can be charged, which can be discounted to meet competition if necessary, and the general terms and conditions for pipeline transportation service, which are established at FERC or appropriate state jurisdictional

Table of Contents

agency proceedings known as rate cases. In Texas and Kansas, natural gas storage service is a fee business that may be regulated by the state in which the facility operates and by the FERC for certain types of services. In Oklahoma, natural gas gathering and natural gas storage operations are not subject to rate regulation and have market-based rate authority from the FERC for certain types of services.

Our Natural Gas Pipelines segment's revenues are typically derived from fee services from the following types of contracts.

- Firm Service - Customers can reserve a fixed quantity of pipeline or storage capacity for the term of their contract. Under this type of contract, the customer pays a fixed fee for a specified quantity regardless of their actual usage. The customer then typically pays incremental fees, known as commodity charges, that are based upon the actual volume of natural gas they transport or store and/or we may retain a specified volume of natural gas in-kind for fuel. Under the firm service contract, the customer is generally guaranteed access to the capacity they reserve.
- Interruptible Service - Customers with interruptible service transportation and storage agreements may utilize available capacity after firm service requests are satisfied or on an as-available basis. Interruptible service customers are typically assessed fees, such as a commodity charge, based on their actual usage and/or we may retain a specified volume of natural gas in-kind for fuel. Under the interruptible service contract, the customer is not guaranteed use of our pipelines and storage facilities unless excess capacity is available.

Excluding any gain on sale of assets, operating income from our Natural Gas Pipelines segment was 25 percent, 31 percent and 83 percent of our consolidated operating income in 2007, 2006 and 2005, respectively. Our Natural Gas Pipelines segment had no single external customer from which it received 10 percent or more of consolidated revenues. Intersegment sales accounted for less than 1 percent of our Natural Gas Pipelines segment's revenues in 2007 and 2006, respectively. Our Natural Gas Pipelines segment had no intersegment sales in 2005. A portion of our revenue is derived from services provided to ONEOK and its affiliates.

Market Conditions and Seasonality - Supply - The supply of natural gas for Viking Gas Transmission and Northern Border Pipeline originates in Canada. Significant factors that can impact the supply of Canadian natural gas transported by our pipelines are the Canadian natural gas available for export, Canadian storage capacity and demand for Canadian natural gas in other U.S. consumer markets. The supply of natural gas to our Guardian, Midwestern and Mid-Continent pipelines and storage assets currently depends on the pace of natural gas drilling activity by producers and the decline rate of existing production in the major natural gas production areas in the Mid-Continent region, including the Anadarko Basin, Hugoton Basin, Central Kansas Uplift Basin and Permian Basin. United States natural gas drilling rig counts increased in 2007 compared with 2006. The natural gas supply from the Gulf Coast also supports our Mid-Continent and upper Midwest pipeline facilities. This supply source is primarily dependent on offshore Gulf Coast production and, to a lesser degree, imports of liquefied natural gas.

Demand - Demand for pipeline transportation service and natural gas storage is directly related to demand for natural gas in the markets that the natural gas pipelines and storage facilities serve, and is affected by weather, the economy, and natural gas and NGL price volatility. The effect of weather on our natural gas pipelines operations is discussed below under "Seasonality." The strength of the economy directly impacts manufacturing and industrial companies that rely on natural gas. Commodity price volatility can influence customers' decisions related to the production of natural gas versus NGLs and natural gas storage injection and withdrawal activity.

Commodity Prices - We are exposed to market risk when existing contracts expire and are subject to renegotiation with customers that have competitive alternatives and analyze the market price spread or basis differential between receipt and delivery points along the pipeline to determine their expected gross margin. The anticipated margin and its variability are important determinants of the transportation rate customers are willing to pay. Natural gas storage revenue is impacted by the differential between forward pricing of natural gas physical contracts and the price of natural gas on the spot market. Our fuel costs and the value of the retained fuel in-kind are also impacted by adverse changes in the commodity price of natural gas.

Seasonality - Demand for natural gas is seasonal. Weather conditions throughout the United States can significantly impact regional natural gas supply and demand. High temperatures can increase demand for gas-fired electric generation to cool residential and commercial properties. Low precipitation levels can impact the demand for natural gas that is used to fuel irrigation activity in the Mid-Continent region. Cold temperatures can lead to greater demand for our transportation services due to increased demand for natural gas.

To the extent that pipeline capacity is contracted under firm service transportation agreements, revenue, which is generated primarily from demand charges, is not significantly impacted by seasonal throughput variations. However, when transportation agreements expire, seasonal demand can impact re-contracting of firm service transportation capacity.

Table of Contents

Natural gas storage is necessary to balance the relatively steady natural gas supply with the seasonal demand of residential, commercial and electric power generation users. The majority of our storage capacity is contracted under term agreements. A small portion of our storage capacity is retained for operational purposes and seasonal market activity.

Competition - Our Natural Gas Pipelines segment competes with other pipeline companies and other storage facilities for natural gas. Competition among pipelines and natural gas storage facilities is based primarily on fees for service and proximity to natural gas supply areas and markets. Competition for natural gas transportation services continues to increase as the FERC and state regulatory bodies continue to encourage more competition in the natural gas markets.

Government Regulation - Our interstate natural gas pipelines are regulated under the Natural Gas Act and Natural Gas Policy Act, which give the FERC jurisdiction to regulate virtually all aspects of this business segment, such as transportation of natural gas, rates and charges for services, construction of new facilities, depreciation and amortization policies, acquisition and disposition of facilities, and initiation and discontinuation of services.

Likewise, our intrastate natural gas pipelines in Oklahoma, Kansas and Texas are regulated by the OCC, KCC and RRC, respectively. While we have flexibility in establishing natural gas transportation rates with customers, there is a maximum rate that we can charge our customers in Oklahoma and Kansas.

Natural Gas Liquids Gathering and Fractionation

Business Strategy - We focus on safe, environmentally sound and compliant operations for our employees, contractors, customers and the public. We seek to maximize our value by increasing facility utilization and efficiently managing the operating costs of our natural gas liquids assets, which consist of facilities that gather, fractionate and treat NGLs and store NGL purity products in the Mid-Continent and Gulf Coast regions.

Segment Description - Our former natural gas liquids segment is now called our Natural Gas Liquids Gathering and Fractionation segment. As part of the ONEOK Transactions described in Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operation under "Significant Acquisitions and Divestitures," in April 2006, we acquired all of ONEOK’s natural gas liquids assets and created a new segment that consisted solely of these newly acquired natural gas liquids assets.

Our Natural Gas Liquids Gathering and Fractionation segment primarily gathers, treats and fractionates NGLs produced by natural gas processing plants located in Oklahoma, Kansas, the Texas panhandle and the Texas Gulf Coast, and stores and markets NGL products. We connect the NGL production basins in Oklahoma, Kansas and the Texas panhandle with the key natural gas liquids market centers in Conway, Kansas, and Mont Belvieu, Texas.

Most natural gas produced at the wellhead contains a mixture of NGL components such as ethane, propane, iso-butane, normal butane and natural gasoline. Natural gas processing plants remove the NGLs from the natural gas stream to realize the higher economic value of the NGLs and to meet natural gas pipeline quality specifications, which limit NGLs in the natural gas stream by liquid and Btu content. The NGLs that are separated from the natural gas stream at the natural gas processing plants remain in a mixed, unfractionated form until they are gathered, primarily by pipeline, and delivered to our fractionators. A fractionator, by applying heat and pressure, separates the unfractionated NGL stream into marketable purity products, such as ethane/propane mix, propane, iso-butane, normal butane and natural gasoline (collectively, NGL products). These NGL products are then stored and/or distributed to our customers, such as petrochemical plants, heating fuel users and motor gasoline manufacturers.

Operating revenue of this segment is derived primarily from exchange services, optimization, isomerization and storage.

- Our exchange services business collects fees to gather, fractionate and treat unfractionated NGLs thereby converting them into NGL products that are stored and shipped to a market center or customer-designated location.
- Our optimization business utilizes our asset base, contract portfolio and market knowledge to capture locational and seasonal price spreads. We move NGL products between Conway, Kansas, and Mont Belvieu, Texas, in order to capture the locational price spreads between the two market centers. Our NGL storage facilities in the Mid-Continent and Gulf Coast regions are used to capture seasonal price variances.
- Our isomerization business captures the price spread when normal butane is converted into the more valuable iso-butane at an isomerization unit in Conway, Kansas. Iso-butane is used in the refining industry to upgrade the octane of motor gasoline.
- Our storage business collects fees to store NGLs in Conway, Kansas, and Mont Belvieu, Texas.

Table of Contents

Excluding any gain on sale of assets, operating income from our Natural Gas Liquids Gathering and Fractionation segment was 25 percent and 22 percent of our consolidated operating income in 2007 and 2006, respectively. We did not have a Natural Gas Liquids Gathering and Fractionation segment prior to 2006. Our Natural Gas Liquids Gathering and Fractionation segment had no single external customer from which it received 10 percent or more of consolidated revenues. Intersegment sales accounted for less than one percent of our Natural Gas Liquids Gathering and Fractionation segment's revenues in 2007 and 2006, respectively.

Market Conditions and Seasonality - Supply - Supply for our Natural Gas Liquids Gathering and Fractionation segment depends on the pace of crude oil and natural gas drilling activity by producers, the decline rate of existing production, and the liquids content of the natural gas that is produced and processed. Our Mont Belvieu fractionation operation receives NGLs from a variety of processors and pipelines located in the Gulf Coast, west and central Texas, and the Rocky Mountain regions.

Our NGL gathering pipelines are also affected by operational or market-driven changes that impact the output of natural gas processing plants to which they are connected. The differential between the composite price of NGL products and the price of natural gas, particularly the differential between the price of ethane and the price of natural gas, may influence processing plant output. Typically, the forward price of ethane compared with the forward price of natural gas provides minimal or no processing spread. However, when the physical transactions occur, the price of ethane to natural gas has historically provided a positive processing spread. During 2007, ethane values remained above those of natural gas on a relative price basis, which resulted in ethane recovery from processing plants that deliver to our natural gas liquids gathering pipelines.

Demand - Demand for NGLs and the ability of natural gas processors to successfully and economically sustain their operations impacts the volume of unfractionated NGLs produced by processing plants, thereby affecting the demand for natural gas liquids gathering and fractionation services. Natural gas and propane are subject to weather-related seasonal demand. Other products are affected by economic conditions and the demand associated with the various industries that utilize the commodity, such as iso-butane and natural gasoline, which are used by the refining industry as blending stocks for motor fuel, ethane, and an ethane/propane mix. This ethane/propane mix is used by the petrochemical industry to produce chemical products, such as plastic, rubber and synthetic fiber.

Commodity Prices - In recent years, crude oil, natural gas and NGL prices have been volatile due to market conditions. We are exposed to market risk associated with adverse changes in the price of NGLs, the basis differential between the Mid-Continent and Gulf Coast regions, and the relative price differential between natural gas, NGLs and individual NGL products, which impact our NGL purchases, sales, exchange and storage revenue. When natural gas prices are higher relative to NGL prices, NGL production may decline, which could negatively impact our exchange services revenue. When the basis differential between the Mid-Continent and Gulf Coast regions is narrow, optimization opportunity and margins may decline. NGL storage revenue may be impacted by price volatility and forward pricing of NGL physical contracts versus the price of NGLs on the spot market.

Seasonality - Some NGL products produced by our natural gas liquids facilities are subject to weather-related seasonal demand, such as propane, which is primarily used to heat residential properties during the winter heating season. Demand for iso-butane and natural gasoline, which are primarily used by the refining industry as blending stocks for motor fuel, may also be subject to some variability when automotive travel is higher.

Competition - We compete with other fractionators, storage providers and gatherers for natural gas liquids supplies in the Rocky Mountain, Mid-Continent and Gulf Coast regions. We are making capital investments to access new supplies, increase gathering and fractionation capacity, increase storage capabilities and reduce operating costs so that we may compete more effectively.

Government Regulations - Revenues generated by our pipelines in both Oklahoma and Kansas are not regulated by the FERC or those states' respective corporation commissions.

Natural Gas Liquids Pipelines

Business Strategy - We focus on safe, environmentally sound and compliant operations for our employees, contractors, customers and the public. We seek to increase throughput and continue to provide cost-effective transportation for NGLs between the Mid-Continent, the Gulf Coast and the Midwest markets near Chicago, Illinois. We pursue growth of our interstate natural gas liquids pipelines by making capital investments to expand our access to new supplies and increase our pipeline capacity.

Table of Contents

Segment Description - Our Natural Gas Liquids Pipelines segment is comprised of the natural gas liquids assets of our previous pipelines and storage segment, and our natural gas liquids and refined petroleum products pipeline systems and related assets acquired from Kinder Morgan in October 2007. This segment operates FERC-regulated natural gas liquids gathering and distribution pipelines and associated above- and below-ground storage facilities. Our natural gas liquids gathering pipelines deliver unfractionated NGLs gathered in Oklahoma, Kansas and the Texas panhandle to our Mid-Continent fractionation facilities in Medford, Oklahoma. Our natural gas liquids distribution pipelines deliver NGL products to the natural gas liquids market hubs in Conway, Kansas, and Mont Belvieu, Texas. Through our acquisition of the natural gas liquids assets from Kinder Morgan, we acquired terminal and storage facilities as well as natural gas liquids and refined petroleum products pipelines that connect our Mid-Continent assets with the Midwest markets near Chicago, Illinois. Our natural gas liquids gathering and distribution pipelines operate in Oklahoma, Kansas, Nebraska, Missouri, Iowa, Illinois and Texas. We have terminal and storage facilities in Missouri, Nebraska, Iowa and Illinois.

Operating revenue for this segment is primarily derived from transporting product under our FERC-regulated tariffs. Tariffs specify the rates we can charge our customers and the general terms and conditions for NGL transportation service on our pipelines. Our tariffs include specifications regarding the receipt and delivery of NGLs at points along the pipeline systems. We generally charge tariff rates under a FERC-approved indexing methodology, which allows charging rates up to a prescribed ceiling that changes annually based on the year-to-year change in the Producer Price Index for finished goods. The FERC also permits interstate natural gas liquids pipelines to support rates by using a cost-of-service methodology, competitive market price or an agreement with a pipeline's non-affiliated shipper.

Our storage services are offered through a combination of market-based rates and FERC-regulated tariffs and are generally used for operational purposes and to store our customers' NGL products. Under some of our FERC-regulated tariffs, customers are allotted earned storage capacity based upon their utilization of transport services. When a customer exceeds its earned storage capacity, we charge the customer an excess storage fee. In some of our product storage agreements, we may charge customers storage reservation fees to reserve a specific storage capacity or we may charge customers based on the quantity of capacity utilized.

Excluding any gain on sale of assets, operating income from our Natural Gas Liquids Pipelines segment was 9 percent and 7 percent of our consolidated operating income in 2007 and 2006, respectively. We did not have a Natural Gas Liquids Pipelines segment prior to 2006. Our Natural Gas Liquids Pipelines segment had no single external customer from which it received 10 percent or more of consolidated revenues. Intersegment sales accounted for 83 percent and 100 percent of our Natural Gas Liquids Pipelines segment's revenues in 2007 and 2006, respectively.

Market Conditions and Seasonality - Supply - The supply for our Natural Gas Liquids Pipelines segment depends on the pace of crude oil and natural gas drilling activity by producers, the decline rate of existing production, and the liquids content of the natural gas that is produced and processed. Our unfractionated NGLs are primarily gathered from natural gas processing plants in Oklahoma, Kansas and the Texas panhandle. The supply of NGLs gathered are affected by operational or market-driven changes that impact the output of natural gas processing plants to which we are connected. The differential between the composite price of NGL products and the price of natural gas, particularly the differential between the price of ethane and the price of natural gas, may influence processing plant output. Typically, the forward price of ethane compared with the forward price of natural gas provides minimal or no processing spread. However, as the prices settle, the price of ethane to natural gas has historically provided a positive processing spread. During 2007, ethane prices remained above natural gas prices on a relative basis.

Demand - Demand for NGLs and the ability of natural gas processors to successfully and economically sustain their operations impacts the volume of unfractionated NGLs produced by processing plants, which affects the demand for our NGL gathering and distribution services. Propane is subject to weather-related seasonal demand. Other products are affected by economic conditions and the demand associated with the various industries that utilize the commodity, such as butanes and natural gasoline, which are used by the refining industry as blending stocks for motor fuel. Ethane/propane mix is used by the petrochemical industry to produce chemical products, such as plastic, rubber and synthetic fiber.

Commodity Prices - In recent years, crude oil, natural gas and NGL prices have been volatile due to market conditions. We are exposed to market risk associated with adverse changes in the price of NGLs, the basis differential between the Mid-Continent, Chicago, Illinois, and Gulf Coast regions, and the relative price differential between natural gas, unfractionated NGLs and individual NGL products, which impact the distribution of NGL products. When natural gas prices are higher relative to NGL prices, NGL production may decline, which could negatively impact the revenues of our gathering and distribution activities. When the basis differential between the Mid-Continent, Chicago, Illinois, and the Gulf Coast regions are narrow, NGL shipments may decline, resulting in a reduction of transportation revenues.

Table of Contents

Seasonality - Some NGLs gathered and distributed by our natural gas liquids pipeline facilities are subject to weather-related seasonal demand, such as propane, which is primarily used to heat residential properties during the winter heating season and for agricultural purposes such as grain drying in the fall. Demand for normal butane, iso-butane and natural gasoline, which are primarily used by the refining industry as blending stocks for motor fuel, may also be subject to some variability when automotive travel is higher.

Competition - Our Natural Gas Liquids Pipelines segment competes with other pipeline companies and other storage facilities for NGLs. Competition among pipeline companies and NGL storage facilities is based primarily on fees for service and proximity to natural gas liquids supply areas and markets.

Government Regulation - Our interstate natural gas liquids pipelines are regulated by the FERC, which regulates virtually all aspects of this business segment, such as transportation of NGLs and refined products, rates and charges for services, depreciation and amortization policies, and initiation and discontinuation of services. The KCC regulates intrastate transportation of NGLs and refined products in Kansas.

Other

Segment Description - Our Other segment includes Black Mesa, which is a pipeline designed to transport crushed coal suspended in water along 273 miles of pipeline that originates at a coal mine in Kayenta, Arizona, and terminates at the Mohave Generating Station (Mohave) in Laughlin, Nevada. The coal slurry pipeline was the sole source of fuel for Mohave and was fully contracted to Peabody Western Coal until December 31, 2005. The water used by the coal slurry pipeline was supplied from an aquifer in the Navajo Nation and Hopi Tribe joint-use area until December 31, 2005.

On December 31, 2005, Black Mesa’s transportation contract with the coal supplier of Mohave expired, and our coal slurry pipeline operations were shut down. In June 2006, Southern California Edison Company (SCE) completed a comprehensive study of the water source, coal supply and transportation issues, and announced that it would no longer pursue the resumption of plant operations. In February 2007, another Mohave co-owner, Salt River Project, announced it was ending its efforts to return the plant to service. We plan to either divest the Black Mesa pipeline or commence decommissioning of the pipeline during 2008.

ENVIRONMENTAL AND SAFETY MATTERS

Information about our environmental matters is included in Note H of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

Pipeline Safety - We are subject to United States Department of Transportation integrity management regulations. The Pipeline Safety Improvement Act requires pipeline companies to perform integrity assessments on segments of a pipeline that pass through densely populated areas or near specifically identified sites that are designated as high consequence areas. To our knowledge, we are substantially in compliance with all material requirements associated with the various regulations.

Air and Water Emissions - The federal Clean Air Act and Clean Water Act and analogous state laws impose restrictions and controls regarding the discharge of pollutants into the air and water in the United States. Under the Clean Air Act, a federal operating permit is required for sources of significant air emissions. We may be required to incur certain capital expenditures for air pollution-control equipment in connection with obtaining or maintaining permits and approvals for sources of air emissions. The Clean Water Act imposes substantial potential liability for the removal and remediation of pollutants discharged in United States water.

Superfund - The Comprehensive Environmental Response, Compensation and Liability Act, also known as CERCLA or Superfund, imposes liability, without regard to fault or the legality of the original act, on certain classes of persons who contributed to the release of a hazardous substance into the environment. These persons include the owner or operator of a facility where the release occurred and companies that disposed or arranged for the disposal of the hazardous substances found at the facility. Under CERCLA, these persons may be liable for the costs of cleaning up the hazardous substances released into the environment, damages to natural resources and the costs of certain health studies.

Chemical Site Security - The United States Department of Homeland Security (Homeland Security) released an interim rule in April 2007 that requires companies to provide reports on sites where certain chemicals, including many hydrocarbon products, are stored. After receiving these reports, Homeland Security will identify which sites are required to implement security measures. Homeland Security is in the initial stages of implementing this rule, and the extent to which the rule will require us to undertake additional expenditures for site security is uncertain at this point.

Table of Contents

Climate Change - Our environmental and climate change strategy focuses on taking steps to minimize the impact of our operations on the environment. These strategies include: (i) maintaining an accurate greenhouse gas emissions inventory, (ii) improving the efficiency of our various pipeline and gas processing facilities, (iii) following developing technologies for emission control, (iv) following developing technologies to capture carbon dioxide to keep it from reaching the atmosphere, and (v) analyzing options for future energy investment.

Currently, operating entities within our Partnership participate in the gathering and processing sector and the transmission sector of the EPA's Natural Gas STAR Program to voluntarily reduce methane emissions. In addition, we continue to focus on reducing methane loss through expanded implementation of best practices across our operations and analyzing options for additional emission reductions, including (i) closing older facilities and routing products to more efficient facilities, (ii) self-imposing permit limits at facilities where operationally feasible, (iii) utilizing electric motors on select compressor applications, and (iv) utilizing methods to limit the release of methane gas during pipeline maintenance and operations.

EMPLOYEES

We do not directly employ any of the persons responsible for managing, operating or providing us with services related to our day-to-day business affairs. We have a service agreement with ONEOK, ONEOK Partners GP and NBP Services (the Services Agreement) under which our operations and the operations of ONEOK and its affiliates can combine or share certain common services in order to operate more efficiently and cost effectively. Under the Services Agreement, ONEOK provides us an equivalent type and amount of services that it provides to its other affiliates, including those services required to be provided pursuant to our Partnership Agreement. ONEOK Partners GP operates our interstate natural gas pipeline assets according to each pipeline's operating agreement. ONEOK Partners GP may purchase services from ONEOK and its affiliates pursuant to the terms of the Services Agreement. As of January 31, 2008, we utilized the services of 1,136 full-time employees in addition to the other resources provided by ONEOK and its affiliates.

AVAILABLE INFORMATION

You can access financial and other information at our website at www.oneokpartners.com. We make available on our website, free of charge, copies of our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, amendments to those reports filed or furnished to the SEC pursuant to Section 13(a) or 15(d) of the Exchange Act and reports of holdings of our securities filed by our officers and directors under Section 16 of the Exchange Act as soon as reasonably practicable after filing such material electronically or otherwise furnishing it to the SEC. Copies of our Code of Business Conduct, Governance Guidelines, Accounting and Financial Reporting Code of Ethics, Partnership Agreement and the written charter of our Audit Committee are also available on our website, and we will make available, free of charge, copies of these documents upon request.

ITEM 1A. RISK FACTORS

Our investors should consider the following risks that could affect us and our business. Although we have tried to discuss key factors, our investors need to be aware that other risks may prove to be important in the future. New risks may emerge at any time, and we cannot predict such risks or estimate the extent to which they may affect our financial performance. Investors should carefully consider the following discussion of risks and the other information included or incorporated by reference in this Annual Report on Form 10-K, including "Forward-Looking Statements," which are included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation.

RISKS INHERENT IN OUR BUSINESS

The volatility of natural gas, crude oil and NGL prices could adversely affect our cash flow.

A significant portion of our revenues are derived from the sale of commodities received as payment for our natural gas gathering and processing services, for transportation and storage of natural gas and NGLs, and for the fractionation of NGLs. As a result, we are sensitive to commodity price fluctuations. Commodity prices have been and are likely to continue to be volatile in the future. High commodity prices and large commodity price spreads may not continue and could drop precipitously in a short period of time. Our commodity prices are subject to wide fluctuations in response to a variety of factors beyond our control, including the following:

- relatively minor changes in the supply of, and demand for, domestic and foreign energy;
- market uncertainty;
- the availability and cost of transportation capacity;

Table of Contents

- the level of consumer product demand;
- geopolitical conditions impacting supply and demand for natural gas and crude oil;
- weather conditions;
- domestic and foreign governmental regulations and taxes;
- the price and availability of alternative fuels;
- speculation in the commodity futures markets;
- overall domestic and global economic conditions;
- the price of natural gas, crude oil, NGL and liquefied natural gas imports; and
- the effect of worldwide energy conservation measures.

These external factors and the volatile nature of the energy markets make it difficult to reliably estimate future prices of commodities and the impact commodity price fluctuations have on our customers and their need for our services. As commodity prices decline, we are paid less for our commodities, thereby reducing our cash flow. In addition, production and related volumes could also decline.

We do not fully hedge against price changes in commodities. This could result in decreased revenues, increased costs and lower margins, adversely affecting our results of operations.

Our businesses are exposed to market risk and the impact of market fluctuations in natural gas, NGLs and crude oil prices. Market risk refers to the risk of loss arising from adverse changes in commodity energy prices. Our primary exposure arises from commodity prices with respect to our processing agreements, the difference between NGL and natural gas prices with respect to our natural gas and NGL transportation, fractionation and exchange agreements, and the differential between the individual NGL products and NGLs in storage utilized by our natural gas liquids operations. To manage the risk from market fluctuations in natural gas, NGL and condensate prices, we use commodity derivative instruments such as futures contracts, swaps and options. However, we do not fully hedge against commodity price changes, and we therefore retain some exposure to market risk. Accordingly, any adverse changes to commodity prices could result in decreased revenue and increased costs.

Our use of financial instruments to hedge market risk may result in reduced income.

We utilize financial instruments to mitigate our exposure to interest rate and commodity price fluctuations. Hedging instruments that are used to reduce our exposure to interest rate fluctuations could expose us to risk of financial loss where we have contracted for variable-rate swap instruments to hedge fixed-rate instruments and the variable rate exceeds the fixed rate. In addition, these hedging arrangements may limit the benefit we would otherwise receive if we have contracted for fixed-rate swap agreements to hedge variable-rate instruments and the variable rate falls below the fixed rate. Hedging arrangements that are used to reduce our exposure to commodity price fluctuations may limit the benefit we would otherwise receive if market prices for natural gas and NGLs exceed the stated price in the hedge instrument for these commodities.

Growing our business by constructing new pipelines and new processing and treating facilities or making modifications to our existing facilities subjects us to construction risks and risks that adequate natural gas or NGL supplies will not be available upon completion of the facilities.

One of the ways we intend to grow our business is through the construction of new pipelines and new gathering, processing, storage and fractionation facilities and through modifications to our existing pipelines and existing gathering, processing, storage and fractionation facilities. The construction and modification of pipelines and gathering, processing, storage and fractionation facilities requires the expenditure of significant amounts of capital, which may exceed our estimates, and involves numerous regulatory, environmental, political and legal uncertainties. Construction projects in our industry may increase demand on labor and material which may in turn impact our costs and schedule. If we undertake these projects, we may not be able to complete them on schedule or at the budgeted cost. Additionally, our revenues may not increase immediately upon the expenditure of funds on a particular project. For instance, if we build a new pipeline, the construction will occur over an extended period of time, and we will not receive any material increases in revenues until after completion of the project. We may have only limited natural gas or NGL supplies committed to these facilities prior to their construction. Additionally, we may construct facilities to capture anticipated future growth in production in a region in which anticipated production growth does not materialize. We may also rely on estimates of proved reserves in our decision to construct new pipelines and facilities, which may prove to be inaccurate because there are numerous uncertainties inherent in estimating quantities of proved reserves. As a result, new facilities may not be able to attract enough natural gas or NGLs to achieve our expected investment return, which could adversely affect our results of operations and financial condition.

Table of Contents

Our inability to execute growth and development projects and acquire new assets could reduce cash distributions to our unitholders.

Our primary business objectives are to generate cash flow sufficient to pay quarterly cash distributions to our unitholders and to increase our quarterly cash distributions over time. Our ability to maintain and grow our distributions to unitholders depends on the growth of our existing businesses and strategic acquisitions. Accordingly, if we are unable to implement business development opportunities and finance such activities on economically acceptable terms, our future growth will be limited, which could adversely impact our results of operations.

Our operations are subject to operational hazards and unforeseen interruptions, which could adversely affect our business and for which we may not be adequately insured.

Our operations are subject to all of the risks and hazards typically associated with the operation of natural gas and natural gas liquids gathering and transportation pipelines, storage facilities, and processing and fractionation plants. Operating risks include, but are not limited to, leaks, pipeline ruptures, the breakdown or failure of equipment or processes, and the performance of facilities below expected levels of capacity and efficiency. Other operational hazards and unforeseen interruptions include adverse weather conditions, accidents, the collision of equipment with our pipeline facilities (for example, this may occur if a third party were to perform excavation or construction work near our facilities), and catastrophic events such as explosions, fires, earthquakes, floods or other similar events beyond our control. It is also possible that our infrastructure facilities could be direct targets or indirect casualties of an act of terrorism. A casualty occurrence might result in injury or loss of life, extensive property damage or environmental damage. Liabilities incurred, and interruptions to the operation of our pipeline caused by such an event, could reduce revenues generated by us and increase expenses, thereby impairing our ability to meet our obligations. Insurance proceeds may not be adequate to cover all liabilities or expenses incurred or revenues lost.

If the level of drilling and production in the Mid-Continent, Rocky Mountain and Gulf Coast regions substantially declines, our volumes and revenues could decline.

Our ability to maintain or expand our businesses depends largely on the level of drilling and production in the Mid-Continent, Rocky Mountain and Gulf Coast regions. Drilling and production are impacted by factors beyond our control, including:

- demand for natural gas and refinery-grade crude oil;
- producers' desire and ability to obtain necessary permits in a timely and economic manner;
- natural gas field characteristics and production performance;
- surface access and infrastructure issues; and
- capacity constraints on natural gas, crude oil and natural gas liquids pipelines from the producing areas and our facilities.

In addition, drilling and production are impacted by environmental regulations governing water discharge. If the level of drilling and production in any of these regions substantially declines, our volumes and revenue could be reduced.

If production from the Western Canada Sedimentary Basin remains flat or declines and demand for natural gas from the Western Canada Sedimentary Basin is greater in market areas other than the Midwestern United States, demand for our interstate transportation services could significantly decrease.

We depend on natural gas supply from the Western Canada Sedimentary Basin because our interstate pipelines primarily transport Canadian natural gas from the Western Canada Sedimentary Basin to the Midwestern U.S. market area. If demand for natural gas increases in Canada or other markets not served by our pipelines and production remains flat or declines, demand for transportation service on our interstate natural gas pipelines could decrease significantly, which could adversely impact our results of operations.

Pipeline integrity programs and repairs may impose significant costs and liabilities.

In December 2003, the United States Department of Transportation issued a final rule requiring pipeline operators to develop integrity management programs for intrastate and interstate natural gas and natural gas liquids pipelines located near high consequence areas, where a leak or rupture could do the most harm. The final rule requires operators to perform ongoing assessments of pipeline integrity; identify and characterize applicable threats to pipeline segments that could impact a high consequence area; improve data collection, integration and analysis; repair and remediate the pipeline as necessary; and implement preventive and mitigating actions. The final rule incorporates the requirements of the Pipeline Safety Improvement Act of 2002 and became effective in January 2004. The results of these testing programs could cause us to

Table of Contents

incur significant capital and operating expenditures to make repairs or take remediation, preventive or mitigating actions that are determined to be necessary.

Our business is subject to increased regulatory oversight and potential penalties.

The natural gas industry historically has been heavily regulated; therefore, there is no assurance that a more stringent regulatory approach will not be pursued by the FERC and U.S. Congress, especially in light of previous market power abuse by certain companies engaged in interstate commerce. In response to this issue, the U.S. Congress, in the Energy Policy Act of 2005 (EPACT), developed requirements intended to ensure that the energy market is not impacted by the exercise of market power or manipulative conduct. The FERC then adopted the Market Manipulation Rules to implement the authority granted under EPACT. These rules are intended to prohibit fraud and manipulation and are subject to broad interpretation. EPACT also gave the FERC increased penalty authority for violations.

Our regulated natural gas pipelines' transportation rates are subject to review and possible adjustment by federal and state regulators.

Our regulated pipelines are subject to extensive regulation by the FERC and state regulatory agencies, which regulate most aspects of our pipeline business, including our transportation rates. Under the Natural Gas Act, interstate transportation rates must be just and reasonable and not unduly discriminatory. Under Northern Border Pipeline's 2006 rate case settlement, there is a three-year moratorium preventing Northern Border Pipeline from filing rate cases and the participants from challenging Northern Border Pipeline's rates, and a requirement that Northern Border Pipeline file a rate case within six years.

Our regulated pipeline companies have recorded certain assets that may not be recoverable from our customers.

Accounting policies for FERC-regulated companies permit certain assets that result from the regulated ratemaking process to be recorded on our balance sheet that could not be recorded under GAAP for nonregulated entities. We consider factors such as regulatory changes and the impact of competition to determine the probability of future recovery of these assets. If we determine future recovery is no longer probable, we would be required to write off the regulatory assets at that time.

Our operations are subject to federal and state laws and regulations relating to the protection of the environment, which may expose us to significant costs and liabilities.

The risk of incurring substantial environmental costs and liabilities is inherent in our business. Our operations are subject to extensive federal, state and local laws and regulations governing the discharge of materials into, or otherwise relating to the protection of, the environment. Examples of these laws include:

- the federal Clean Air Act and analogous state laws that impose obligations related to air emissions;
- the federal Clean Water Act and analogous state laws that regulate discharge of wastewaters from our facilities to state and federal waters;
- the federal Comprehensive Environmental Response, Compensation and Liability Act and analogous state laws that regulate the cleanup of hazardous substances that may have been released at properties currently or previously owned or operated by us or locations to which we have sent waste for disposal; and
- the federal Resource Conservation and Recovery Act and analogous state laws that impose requirements for the handling and discharge of solid and hazardous waste from our facilities.

Various governmental authorities, including the United States EPA, have the power to enforce compliance with these laws and regulations and the permits issued under them. Violators are subject to administrative, civil and criminal penalties, including civil fines, injunctions or both. Joint and several, strict liability may be incurred without regard to fault under the Comprehensive Environmental Response, Compensation and Liability Act, Resource Conservation and Recovery Act and analogous state laws for the remediation of contaminated areas.

There is an inherent risk of incurring environmental costs and liabilities in our business due to our handling of the products we gather, transport and process, air emissions related to our operations, historical industry operations and waste disposal practices, some of which may be material. Private parties, including the owners of properties through which our pipeline systems pass, may have the right to pursue legal actions to enforce compliance as well as to seek damages for non-compliance with environmental laws and regulations or for personal injury or property damage arising from our operations. Some sites we operate are located near current or former third-party hydrocarbon storage and processing operations, and there is a risk that contamination has migrated from those sites to ours. In addition, increasingly strict laws, regulations and enforcement policies could significantly increase our compliance costs and the cost of any remediation that may become

Table of Contents

necessary, some of which may be material. Additional information is included under Item 1, Business under "Environmental and Safety Matters" and in Note H of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

Our insurance may not cover all environmental risks and costs or may not provide sufficient coverage in the event an environmental claim is made against us. Our business may be adversely affected by increased costs due to stricter pollution control requirements or liabilities resulting from non-compliance with required operating or other regulatory permits. New environmental regulations might also adversely affect our products and activities, and federal and state agencies could impose additional safety requirements, all of which could materially affect our profitability.

In the competition for customers, we may have significant levels of uncontracted or discounted transportation capacity on our natural gas and natural gas liquids pipelines.

Our natural gas and natural gas liquids pipelines compete with other pipelines for natural gas and natural gas liquids supplies delivered to the markets we serve. As a result of competition, we may have significant levels of uncontracted or discounted capacity on our pipelines, which could adversely impact our results of operations.

We are exposed to the credit risk of our customers, and our credit risk management may not be adequate to protect against such risk.

We are subject to the risk of loss resulting from nonpayment and/or nonperformance by our customers. Our customers are predominantly producers, NGL end users and marketers that may experience deterioration of their financial condition as a result of changing market conditions or financial difficulties that could impact their credit worthiness or ability to pay us for our services. We assess the credit worthiness of our customers and obtain security as we deem appropriate. If we fail to adequately assess the credit worthiness of existing or future customers, unanticipated deterioration in their credit worthiness and any resulting nonpayment and/or nonperformance could adversely impact our results of operations. In addition, if any of our customers file for bankruptcy protection, our results of operations may be negatively impacted.

RISKS INHERENT IN AN INVESTMENT IN US

The issuance of Class B units to ONEOK in connection with the acquisition of the ONEOK Energy Assets diluted our then current unitholders' ownership interests.

In connection with the acquisition of the ONEOK Energy Assets, we issued approximately 36.5 million Class B limited partner units to ONEOK. The issuance of the Class B units decreased our then current common unitholders' proportionate ownership interest in us. The Class B units are eligible to convert into common units on a one-for-one basis at ONEOK's option due to approval of such conversion by our common unitholders at a special meeting of common unitholders held in March 2007.

In addition, ONEOK may, from time to time, sell all or a portion of its common units. Sales of substantial amounts of its common units, or the anticipation of such sales, could lower the market price of our common units and may make it more difficult for us to sell our equity securities in the future at a time and price that we deem appropriate.

ONEOK could withdraw the waiver of its right to receive, on its Class B units, 110 percent of the distributions paid with respect to our common units.

At a special meeting of the holders of our common units, adjourned to May 10, 2007, the proposed amendments to our Partnership Agreement were not approved by the required two-thirds affirmative vote of our outstanding units, excluding the common units and Class B limited partner units held by ONEOK and its affiliates. As a result, effective April 7, 2007, ONEOK, as the sole holder of our Class B limited partner units, became entitled to receive increased quarterly distributions on its Class B units equal to 110 percent of the distributions paid with respect to our common units.

On June 21, 2007, ONEOK waived its right to receive the increased quarterly distributions on the Class B units for the period of April 7, 2007, through December 31, 2007, and continuing thereafter until ONEOK gives us no less than 90 days advance notice that it has withdrawn its waiver. ONEOK could withdraw such waiver and begin receiving such increased distributions, effective with respect to any distribution on the Class B units declared or paid on or after 90 days following delivery of the notice.

Table of Contents

If our unitholders vote to remove ONEOK or its affiliates as our general partner, quarterly distributions and distributions payable to ONEOK upon liquidation of the Class B units would increase.

Since the proposed amendments to our Partnership Agreement were not approved by the requisite number of our common unitholders, if our common unitholders vote at any time to remove ONEOK or its affiliates as our general partner, quarterly distributions payable on the Class B limited partner units would increase to 123.5 percent of the distributions payable with respect to the common units, and distributions payable upon liquidation of the Class B limited partner units would increase to 123.5 percent of the distributions payable with respect to the common units.

We do not operate all of our assets nor do we directly employ any of the persons responsible for providing us with administrative, operating and management services. This reliance on others to operate our assets and to provide other services could adversely affect our business and operating results.

We rely on ONEOK, ONEOK Services Company and ONEOK Partners GP to provide us with administrative, operating and management services. We have a limited ability to control our operations and the associated costs of such operations. The success of these operations depends on a number of factors that are outside our control, including the competence and financial resources of the provider. ONEOK, ONEOK Services Company and ONEOK Partners GP may outsource some or all of these services to third parties, and a failure to perform by these third-party providers could lead to delays in or interruptions of these services. Should ONEOK, ONEOK Services Company and ONEOK Partners GP not perform their respective contractual obligations, we may have to contract elsewhere for these services, which may cost more than we are currently paying. In addition, we may not be able to obtain the same level or kind of service or retain or receive the services in a timely manner, which may impact our ability to perform under our contracts and negatively affect our business and operating results. Our reliance on ONEOK, ONEOK Services Company, and ONEOK Partners GP and the third-party providers with which they contract, together with our limited ability to control certain costs, could harm our business and results of operations.

The Board of Directors of our general partner, our general partner and its affiliates have conflicts of interest and limited fiduciary duties, which may permit them to favor their own interests.

ONEOK owns 100 percent of our general partner interest and a 43.7 percent limited partner interest in us. Although ONEOK, through the Board of Directors of our general partner, has a fiduciary duty to manage us in a manner beneficial to us and our unitholders, the Board of Directors of ONEOK has a fiduciary duty to manage our general partner in a manner beneficial to ONEOK. One member of the Board of Directors of our general partner is also a member of ONEOK's Board of Directors. Conflicts of interest may arise between our general partner and its affiliates and between us and our unitholders. In resolving these conflicts, our general partner may favor its own interests and the interests of its affiliates over the interests of our unitholders as long as it does not take action that conflicts with our Partnership Agreement or its limited fiduciary duties. These conflicts include, among others, the following situations:

- our general partner, which is owned by ONEOK, and the Board of Directors of our general partner are allowed to take into account the interests of parties other than us in resolving conflicts of interest, which has the effect of limiting their fiduciary duties to our unitholders;
- our Partnership Agreement limits the liability and reduces the fiduciary duties of the members of the Board of Directors of our general partner and also restricts the remedies available to our unitholders for actions that, without the limitations, might constitute breaches of fiduciary duty;
- the Board of Directors of our general partner determines the amount and timing of our cash reserves, asset purchases and sales, capital expenditures, borrowings and issuances of additional partnership securities, each of which can affect the amount of cash that is distributed to our unitholders;
- the Board of Directors of our general partner approves the amount and timing of any capital expenditures and determines whether they are maintenance capital expenditures or growth capital expenditures, which can affect the amount of cash that is distributed to our unitholders;
- the Board of Directors of our general partner may cause us to borrow funds in order to permit the payment of cash distributions, even if the purpose or effect of the borrowing is to make incentive distributions;
- the Board of Directors of our general partner and its Audit Committee determine which costs incurred by the Board of Directors, our general partner and its affiliates are reimbursable by us;
- our Partnership Agreement does not restrict the members of the Board of Directors of our general partner from causing us to pay the Board of Directors, our general partner or its affiliates for any services rendered to us or entering into additional contractual arrangements with any of these entities on our behalf;
- our general partner may exercise its limited right to call and purchase common units if it and its affiliates own more than 80 percent of the common units; and

Table of Contents

- the Board of Directors and Audit Committee of our general partner decide whether to retain separate counsel, accountants or others to perform services for us.

Our general partner and its affiliates may compete directly with us and have no obligation to present business opportunities to us.

ONEOK and its affiliates are not prohibited from owning assets or engaging in businesses that compete directly or indirectly with us. ONEOK may acquire, construct or dispose of additional midstream or other assets in the future without any obligation to offer us the opportunity to purchase or construct any of those assets. In addition, under our Partnership Agreement, the doctrine of corporate opportunity, or any analogous doctrine, will not apply to ONEOK and its affiliates. As a result, neither ONEOK nor any of its affiliates has any obligation to present business opportunities to us.

Our Partnership Agreement limits our general partner's fiduciary duties to our unitholders and restricts the remedies available to unitholders for actions taken by our general partner that might otherwise constitute breaches of fiduciary duty.

Our Partnership Agreement contains provisions that reduce the standards to which our general partner would otherwise be held by state fiduciary duty law. For example, our Partnership Agreement:

- permits our general partner to make a number of decisions in its individual capacity, as opposed to in its capacity as our general partner. This entitles our general partner to consider only the interests and factors that it desires, and it has no duty or obligation to give any consideration to any interest of, or factors affecting, us, our affiliates or any limited partner. Examples include the exercise of its limited call right, its voting rights with respect to the units it owns, its registration rights and its determination (through its Board of Directors) whether or not to consent to any merger or consolidation of us;
- provides that our general partner will not have any liability to us or our unitholders for decisions made in its capacity as general partner so long as it acted in "good faith," meaning it believed the decision was in our best interests;
- provides that our general partner is entitled to make other decisions in "good faith" if it reasonably believes that the decision is in our best interests;
- provides generally that affiliated transactions and resolutions of conflicts of interest not approved by the Audit Committee and not involving a vote of unitholders must be on terms no less favorable to us than those generally being provided to or available from unrelated third parties or be "fair and reasonable" to us, as determined by our general partner in "good faith," and that, in determining whether a transaction or resolution is "fair and reasonable," our general partner may consider the totality of the relationships between the parties involved, including other transactions that may be particularly advantageous or beneficial to us; and
- provides that our general partner and its affiliates, officers and directors will not be liable for monetary damages to us or our limited partners for any acts or omissions so long as such person acted in "good faith" and in a manner believed to be in, or not opposed to, the best interest of us and, with respect to any criminal proceeding, had no reasonable cause to believe its conduct was unlawful.

By purchasing a common unit, a common unitholder will be bound by the provisions in our Partnership Agreement, including the provisions discussed above.

The control of our general partner may be transferred to a third party without unitholder consent.

Our general partner may transfer its general partner interest to a third party without the consent of the unitholders. Furthermore, our Partnership Agreement does not restrict the ability of our general partner from transferring its interest to a third party. The new members or unitholders, as the case may be, of our general partner would then be in a position to replace the directors of our general partner with their own choices and to control the decisions made by the Board of Directors of our general partner.

Any reduction in our credit ratings could materially and adversely affect our business, financial condition, liquidity and results of operations.

Our senior unsecured long-term debt has been assigned an investment grade rating by Moody's of "Baa2" (Stable) and by S&P of "BBB" (Stable). We will seek to maintain an investment grade rating through prudent capital management and financing structures. However, we cannot provide assurance that any of our current ratings will remain in effect for any given period of time or that a rating will not be lowered or withdrawn entirely by a rating agency if, in its judgment, circumstances in the future so warrant. Specifically, if Moody's or S&P were to downgrade our long-term rating, particularly below investment grade, our borrowing costs would increase, which would adversely affect our financial results, and our

Table of Contents

potential pool of investors and funding sources could decrease. Ratings from credit agencies are not recommendations to buy, sell or hold our securities. Each rating should be evaluated independently of any other rating.

Increases in interest rates may cause the market price of our common units to decline.

An increase in interest rates may cause a corresponding decline in demand for equity investments in general, and in particular for yield-based equity investments such as our common units. Any such increase in interest rates or reduction in demand for our common units resulting from other more attractive investment opportunities may cause the trading price of our common units to decline.

A downgrade of our credit rating may require us to offer to repurchase certain of our senior notes or may impair our ability to access capital.

We could be required to offer to repurchase certain of our senior notes due 2010 and 2011 at par value, plus any accrued and unpaid interest, if Moody's or S&P rate those senior notes below investment grade (Baa3 for Moody's and BBB- for S&P). Further, the indenture governing our senior notes due 2010 and 2011 includes an event of default upon acceleration of other indebtedness of $25 million or more and the indenture governing our senior notes due 2012, 2016, 2036 and 2037 includes an event of default upon the acceleration of other indebtedness of $100 million or more that would be triggered by such an offer to repurchase. Such an event of default would entitle the trustee or the holders of 25 percent in aggregate principal amount of the outstanding senior notes due 2010, 2011, 2012, 2016, 2036 and 2037 to declare those notes immediately due and payable in full. We may not have sufficient cash on hand to repurchase and repay any accelerated senior notes, which may cause us to borrow money under our credit facilities or seek alternative financing sources to finance the repayments and repurchases. We could also face difficulties accessing capital or our borrowing costs could increase, impacting our ability to obtain financing for acquisitions or capital expenditures, to refinance indebtedness and to fulfill our debt obligations.

Our indebtedness could impair our financial condition and our ability to fulfill our debt obligations.

As of December 31, 2007, we had total indebtedness of approximately $2.7 billion. Our indebtedness could have significant consequences. For example, it could:

- make it more difficult for us to satisfy our obligations with respect to our notes and our other indebtedness, which could in turn result in an event of default on such other indebtedness or our notes;
- impair our ability to obtain additional financing in the future for working capital, capital expenditures, acquisitions or general business purposes;
- diminish our ability to withstand a downturn in our business or the economy;
- require us to dedicate a substantial portion of our cash flow from operations to debt service payments, reducing the availability of cash for working capital, capital expenditures, acquisitions, distributions to partners, general corporate purposes or other purposes;
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate; and
- place us at a competitive disadvantage compared with our competitors that have proportionately less debt.

If we are unable to meet our debt service obligations, we could be forced to restructure or refinance our indebtedness, seek additional equity capital or sell assets. We may be unable to obtain financing or sell assets on satisfactory terms, or at all.

We are not prohibited under the indentures governing our senior notes from incurring additional indebtedness. Our incurrence of significant additional indebtedness would exacerbate the negative consequences mentioned above, and could adversely affect our ability to repay our notes and other indebtedness.

We and the Intermediate Partnership have a holding company structure in which our subsidiaries conduct our operations and own our operating assets.

We and the Intermediate Partnership are holding companies, and our subsidiaries conduct all of our operations and own all of our operating assets. Neither we nor the Intermediate Partnership have significant assets other than the partnership interests and the equity in our subsidiaries and Northern Border Pipeline. As a result, our ability to make quarterly distributions and required payments on our indebtedness depends on the performance of our subsidiaries and their ability to distribute funds to us. The ability of our subsidiaries to make distributions to us may be restricted by, among other things, credit facilities, applicable state partnership laws, and other laws and regulations. If we are unable to obtain the funds necessary to make quarterly distributions or required payments on our indebtedness, we may be required to adopt one or more alternatives, such

Table of Contents

as refinancing the indebtedness or seeking alternative financing sources to fund the quarterly distributions and indebtedness payments.

We may issue additional common units without unitholder approval, which would dilute unitholders' ownership interests.

Our general partner, without the approval of our unitholders, may cause us to issue an unlimited number of additional units, subject to the limitations imposed by the NYSE. The issuance by us of additional common units or other equity securities of equal or senior rank will have the following effects:

- our unitholders' proportionate ownership interest in us will decrease;
- the distribution paid on each unit may decrease;
- the relative voting strength of each previously outstanding unit may be diminished; and
- the market price of the common units may decline.

Our general partner has a limited call right that may require unitholders to sell their common units at an undesirable time or price.

If at any time our general partner and its affiliates own more than 80 percent of the common units, our general partner will have the right, but not the obligation, which it may assign to any of its affiliates or to us, to acquire all, but not less than all, of the common units held by unaffiliated persons at a price not less than their then-current market price. As a result, unitholders may be required to sell their common units at an undesirable time or price and may not receive any return on their investment. Unitholders may also incur a tax liability upon the sale of their units. Our general partner is not obligated to obtain a fairness opinion regarding the value of the common units to be repurchased by it upon exercise of the limited call right. There is no restriction in our Partnership Agreement that prevents our general partner from issuing additional common units and exercising its call right. If our general partner exercised its limited call right, the effect would be to take us private and, if the units were subsequently deregistered, we would no longer be subject to the reporting requirements of the Exchange Act.

Our Partnership Agreement restricts the voting rights of unitholders owning 20 percent or more of our common units.

Our Partnership Agreement restricts unitholders' voting rights by providing that any units held by a person that owns 20 percent or more of any class of units then outstanding, other than our general partner and its affiliates, cannot vote on any matter. Our Partnership Agreement also contains provisions limiting the ability of unitholders to call meetings or to acquire information about our operations, as well as other provisions limiting the unitholders' ability to influence the manner or direction of management.

Unitholders may not have limited liability if a court finds that unitholder action constitutes control of our business. Unitholders may also have liability to repay distributions.

As a limited partner in a limited partnership organized under Delaware law, unitholders could be held liable for our obligations to the same extent as a general partner if they participate in the "control" of our business. Our general partner generally has unlimited liability for our obligations, such as our debts and environmental liabilities, except for our contractual obligations that are expressly made without recourse to our general partner. In addition, the Delaware Revised Uniform Limited Partnership Act provides that, under some circumstances, a unitholder may be liable to us for the amount of a distribution for a period of three years from the date of the distribution. The limitations on the liability of holders of limited partner interests for the obligations of a limited partnership have not been clearly established in some of the states in which we do business.

TAX RISKS

Our tax treatment depends on our status as a partnership for federal income tax purposes. Additionally, we are only subject to entity level taxation in the state of Texas. If the IRS were to treat us as a corporation or if we to become subject to a material amount of entity level taxation for state tax purposes, then our cash available for distribution to our common unitholders would be substantially reduced.

The anticipated after-tax economic benefit of an investment in our common units depends largely on our being treated as a partnership for federal income tax purposes. We have not requested, and do not plan to request, a ruling from the IRS on this matter.

Table of Contents

If we were treated as a corporation for federal income tax purposes, we would pay federal income tax on our taxable income at the corporate tax rate, which is currently a maximum of 35 percent, and we likely would pay state taxes as well. Distributions to our unitholders would generally be taxed again as corporate distributions, and no income, gains, losses or deductions would flow through to our unitholders. Because a tax would be imposed upon us as a corporation, the cash available for distributions to our common unitholders would be substantially reduced. Therefore, treatment of us as a corporation would result in a material reduction in the after-tax return to our common unitholders, likely causing a substantial reduction in the value of our common units.

Current law may change, causing us to be treated as a corporation for federal income tax purposes or otherwise subjecting us to entity level federal taxation. In addition, several states are evaluating ways to subject partnerships to entity level taxation through the imposition of state income, franchise or other forms of taxation. For example, we became subject to a new entity level tax on the portion of our income generated in Texas beginning in 2007. Specifically, the Texas margin tax was imposed at a maximum effective rate of 0.7 percent of our gross income apportioned to Texas. Imposition of such tax on us by Texas, or any other state, reduces the cash available for distribution to our common unitholders.

A successful IRS contest of the federal income tax positions we take may adversely impact the market for our common units, and the costs of any contest will be borne by our unitholders and general partner.

We have not requested any ruling from the IRS with respect to our treatment as a partnership for federal income tax purposes or any other matter affecting us. The IRS may adopt positions that differ from the federal income tax positions we take. It may be necessary to resort to administrative or court proceedings to sustain some or all of the positions we take. A court may not agree with some or all of the positions we take. Any contest with the IRS may adversely impact the taxable income reported to our unitholders and the income taxes they are required to pay. As a result, any such contest with the IRS may materially and adversely impact the market for our common units and the price at which they trade. In addition, the costs of any such contest with the IRS will result in a reduction in cash available to pay distributions to our unitholders and our general partner and thus will be borne indirectly by our unitholders and our general partner.

A unitholder may be required to pay taxes on a share of our income even if the unitholder does not receive any cash distributions from us.

A unitholder will be required to pay federal income taxes and, in some cases, state and local income taxes on the unitholder's share of our taxable income, whether or not the unitholder receives cash distributions from us. A unitholder may not receive cash distributions from us equal to the unitholder's share of our taxable income or even equal to the actual tax liability that results from the unitholder's share of our taxable income.

The taxable gain or loss on the disposition of our common units could be different than expected.

A unitholder will recognize a gain or loss on the sale of common units equal to the difference between the amount realized and the unitholder's tax basis in those common units. A unitholder's amount realized will be measured by the sum of the cash or the fair market value of other property received plus the unitholder's share of our nonrecourse liabilities. Because the amount realized includes a unitholder's share of our nonrecourse liabilities, the gain recognized on the sale of common units could result in a tax liability in excess of any cash received from the sale. Prior distributions to a unitholder in excess of the total net taxable income allocated to a unitholder for a common unit, which decreased the tax basis in that common unit, will, in effect, become taxable income to a unitholder if the common unit is sold at a price greater than the tax basis in that common unit, even if the price received is less than the original cost. A substantial portion of the amount realized, whether or not representing a gain, may be ordinary income to a unitholder. Should the IRS successfully contest some positions we take, unitholders could recognize more gain on the sale of units than would be the case under those positions, without the benefit of decreased income in prior years.

Tax-exempt entities, regulated investment companies and non-U.S. persons face unique tax issues from owning common units that may result in adverse tax consequences to them.

Investment in common units by tax-exempt entities, such as individual retirement accounts, regulated investment companies known as mutual funds, and non-U.S. persons raises issues unique to them. For example, virtually all of our income allocated to organizations exempt from federal income tax, including individual retirement accounts and other retirement plans, will be unrelated business taxable income and will be taxable to them. Distributions to non-U.S. persons may be subject to U.S. withholding taxes. Non-U.S. persons will be required to file U.S. federal income tax returns and pay tax on their share of our taxable income.

Table of Contents

We will treat each purchaser of units as having the same tax benefits without regard to the units purchased. The IRS may challenge this treatment, which could adversely affect the value of the common units.

Because we cannot match transferors and transferees of common units, we have adopted depreciation and amortization positions that may not conform to all aspects of existing Treasury regulations. A successful IRS challenge to those positions could adversely affect the amount of tax benefits available to unitholders. It also could affect the timing of these tax benefits or the amount of gain from a unitholder's sale of common units and could have a negative impact on the value of our common units or result in audit adjustments to a unitholder's tax returns.

Unitholders will be subject to state and local taxes and return filing requirements as a result of investing in our common units.

In addition to federal income taxes, unitholders will be subject to other taxes, such as state and local income taxes, unincorporated business taxes and estate, inheritance or intangible taxes that are imposed by the various jurisdictions in which we do business or own property. Unitholders will be required to file state and local income tax returns and pay state and local income taxes in some or all of these various jurisdictions and may be subject to penalties for failure to comply with those requirements. We may own property or conduct business in other states or foreign countries in the future. It is each unitholder's responsibility to file all United States federal, state and local tax returns and foreign tax returns, as applicable.

Some of the states in which we do business or own property may require us to, or we may elect to, withhold a percentage of income from amounts to be distributed to a unitholder who is not a resident of the state. Withholding, the amount of which may be greater or less than a particular unitholder's income tax liability to the state, generally does not relieve the non-resident unitholder from the obligation to file an income tax return. Amounts withheld may be treated as if distributed to unitholders for purposes of determining the amounts distributed by us. Our counsel has not rendered an opinion on the state and local tax consequences of an investment in our units.

The sale or exchange of 50 percent or more of the total interest in our capital and profits within a 12-month period will result in the termination of our Partnership for federal income tax purposes.

We will be considered to have terminated for federal income tax purposes if there is a sale or exchange of 50 percent or more of the total interests in our capital and profits within a 12-month period. Our termination would, among other things, result in the closing of our taxable year for all unitholders and could result in a deferral of depreciation deductions allowable in computing our taxable income.

We have adopted certain valuation methodologies that may result in a shift of income, gain, loss and deduction between the general partner and the unitholders. The IRS may challenge this treatment, which could adversely affect the value of our limited partner units.

When we issue additional units or engage in certain other transactions, we determine the fair market value of our assets and allocate any unrealized gain or loss attributable to our assets to the capital accounts of our unitholders and our general partner. Our methodology may be viewed as understating the value of our assets. In that case, there may be a shift of income, gain, loss and deduction between certain unitholders and the general partner, which may be unfavorable to such unitholders. Moreover, under our current valuation methods, subsequent purchasers of common units may have a greater portion of their Internal Revenue Code Section 743(b) adjustment allocated to our tangible assets and a lesser portion allocated to our intangible assets. The IRS may challenge our valuation methods, or our allocation of the Section 743(b) adjustment attributable to our tangible and intangible assets, and allocations of income, gain, loss and deduction between the general partner and certain of our unitholders.

A successful IRS challenge to these methods or allocations could adversely affect the amount of taxable income or loss being allocated to our unitholders. It also could affect the amount of gain from our unitholders' sale of common units and could have a negative impact on the value of the common units or result in audit adjustments to our unitholders' tax returns without the benefit of additional deductions.

Our treatment of a purchaser of common units as having the same tax benefits as the seller could be challenged, resulting in a reduction in value of the common units.

Because we cannot match transferors and transferees of common units, we are required to maintain the uniformity of the economic and tax characteristics of these units in the hands of the purchasers and sellers of these units. We do so by adopting certain depreciation conventions that do not conform to all aspects of the United States Treasury regulations. An IRS challenge to these conventions could adversely affect the tax benefits to a unitholder of ownership of the common units and

Table of Contents

could have a negative impact on their value or result in audit adjustments to our unitholders' tax returns.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

Natural Gas Gathering and Processing

Our operations include gathering of raw natural gas production from oil and natural gas wells. We gather raw natural gas in the Mid-Continent region, which includes the Anadarko Basin of Oklahoma and the Hugoton and Central Kansas Uplift Basins of Kansas. We also gather raw natural gas in three producing basins in the Rocky Mountain region: (i) the Williston Basin, which spans portions of Montana, North Dakota and the Canadian province of Saskatchewan, (ii) the Powder River Basin of Wyoming and (iii) the Wind River Basin of Wyoming.

In the Mid-Continent and Rocky Mountain regions, raw natural gas is compressed and transported through pipelines to processing facilities where volumes are aggregated, treated and processed to remove water vapor, solids and other contaminants, and the unfractionated NGLs are extracted. In some cases, the unfractionated NGLs are separated at the processing facility into NGL products, through fractionation, and the NGL products are sold to refineries or local markets. The residue gas, which consists primarily of methane, is compressed and delivered to natural gas pipelines for transportation to the end user. The unfractionated NGLs not sold in the local markets are delivered to natural gas liquids pipelines where they are transported, fractionated and delivered to the end user.

Our Natural Gas Gathering and Processing segment assets consist of the following:

- approximately 10,100 miles and 4,200 miles of gathering pipelines with capacity owned, leased or contracted for in the Mid-Continent and Rocky Mountain regions, respectively,
- nine active processing plants, with approximately 645 MMcf/d of owned processing capacity in the Mid-Continent region, and four active processing plants with approximately 80 MMcf/d of owned, leased or contracted processing capacity in the Rocky Mountain region, and
- approximately 18 MBbl/d of natural gas liquids fractionation capacity in the Mid-Continent and Rocky Mountain regions.

Our natural gas processing operations utilize straddle and field gas processing plants to extract NGLs from raw natural gas and remove water vapor and other contaminants from the raw natural gas stream. A straddle gas processing plant is situated on a pipeline system and relies on the pipeline's natural gas throughput volume, which subjects the plant to increased supply risk as it is dependent upon the throughput of a single pipeline rather than several supply sources. Field gas processing plants gather raw natural gas from multiple producing wells.

On January 1, 2007, the Bushton Plant was temporarily idled. Volumes available for processing at this straddle plant have declined due to contract terminations and natural field declines, which made it more efficient to process the remaining gas at other facilities. We have contracted for all of the capacity of the plant from ONEOK. We are in the process of adding new facilities at or near the plant, in conjunction with other changes that are being made to the plant. The plant currently has 1.0 Bcf/d processing capacity and 80 MBbl/d fractionation capacity. The plant and other nearby facilities are expected to resume operations in mid-2008, and will primarily provide natural gas liquids fractionation and storage services as a part of our Natural Gas Liquids Gathering and Fractionation segment.

Natural Gas Pipelines

Our Natural Gas Pipelines segment gathers and transports natural gas through regulated interstate and intrastate natural gas transmission pipelines, stores natural gas, and operates non-processable natural gas gathering facilities.

Our interstate natural gas pipeline assets transport natural gas through FERC-regulated interstate natural gas pipelines in Montana, North Dakota, South Dakota, Minnesota, Wisconsin, Illinois, Indiana, Kentucky, Tennessee, Oklahoma, Texas and New Mexico. Our interstate pipelines include Midwestern Gas Transmission, Guardian Pipeline, Viking Gas Transmission, OkTex Pipeline and a 50 percent interest in Northern Border Pipeline. Midwestern Gas Transmission is a bi-directional system that interconnects with Tennessee Gas Transmission near Portland, Tennessee, and several interstate pipelines near Joliet, Illinois. Viking Gas Transmission transports natural gas from an interconnection with TransCanada near Emerson,

Table of Contents

Manitoba, to an interconnection with ANR Pipeline Company near Marshfield, Wisconsin. Guardian Pipeline interconnects with several pipelines in Joliet, Illinois, and with a local distribution company in Ixonia, Wisconsin. OkTex Pipeline has interconnects in Oklahoma, New Mexico and Texas.

Our intrastate natural gas pipeline assets in Oklahoma have access to the major natural gas producing areas and transport natural gas throughout the state. In Texas, our intrastate pipelines are connected to the major natural gas producing areas in the Texas panhandle and the Permian Basin and transport natural gas to the Waha Hub, where other pipelines may be accessed for transportation east to the Houston Ship Channel market, north into the Mid-Continent market and west to the California market. We also have intrastate pipelines that access the major natural gas producing area in south central Kansas.

Our storage assets include five underground natural gas storage facilities in Oklahoma, three underground natural gas storage facilities in Kansas and three underground natural gas storage facilities in Texas. One of our natural gas storage facilities has been idle since 2001 following natural gas explosions and eruptions of natural gas geysers in Hutchinson, Kansas. We began injecting brine into the facility in the first quarter of 2007 in order to ensure the long-term integrity of the facility. Monitoring of the facility and review of the data for the geoengineering study are ongoing.

Our Natural Gas Pipelines segment’s assets consist of the following:

- approximately 1,290 miles of FERC-regulated interstate natural gas pipelines with approximately 2.4 Bcf/d of peak transportation capacity,
- approximately 5,630 miles of intrastate natural gas gathering and state-regulated intrastate transmission pipelines with peak transportation capacity of approximately 2.9 Bcf/d,
- approximately 51.6 Bcf of total active working gas storage capacity, and
- our 50 percent interest in Northern Border Pipeline.

Natural Gas Liquids Gathering and Fractionation

Our natural gas liquids gathering and fractionation assets consist of facilities that gather, fractionate and treat NGLs and store NGL purity products primarily in Oklahoma, Kansas and Texas, as well as store and fractionate NGLs in Mont Belvieu, Texas. Most of the pipeline-connected natural gas processing plants in Oklahoma, Kansas and the Texas panhandle, which extract NGLs from raw natural gas, are connected to our gathering systems. The natural gas liquids operations gather these unfractionated NGLs and deliver them to our fractionators. The unfractionated NGLs are then separated into NGL products, through a fractionation process, to realize the greater economic value of the NGL products. The individual NGL products are then stored or distributed to petrochemical manufacturers, refineries and propane distributors. Our fractionation and storage facilities are connected to the key natural gas liquids market centers in Conway, Kansas, and Mont Belvieu, Texas, by FERC-regulated interstate natural gas liquids pipelines, which are part of our Natural Gas Liquids Pipelines segment.

Our Natural Gas Liquids Gathering and Fractionation segment assets consist of the following:

- approximately 2,570 miles of owned and contracted natural gas liquids gathering pipelines with peak capacity of approximately 270 MBbl/d,
- approximately 163 miles of natural gas liquids distribution pipelines with peak transportation capacity of approximately 62 MBbl/d,
- interests in four natural gas liquids fractionators with proportional operating capacity of approximately 399 MBbl/d,
- one 9 MBbl/d isomerization unit, and
- seven owned or leased storage facilities in Oklahoma, Kansas and Texas with operating storage capacity of approximately 24,600 MBbl.

Natural Gas Liquids Pipelines

Our natural gas liquids gathering pipelines deliver unfractionated NGLs gathered in Oklahoma, Kansas and the Texas panhandle to our Mid-Continent fractionation facilities in Medford, Oklahoma. Our natural gas liquids distribution pipelines deliver NGL products to the natural gas liquids market hubs in Conway, Kansas, and Mont Belvieu, Texas. Through our acquisition of an interstate natural gas liquids and refined petroleum products pipeline system and related assets from a subsidiary of Kinder Morgan, we acquired terminal and storage facilities as well as natural gas liquids and refined petroleum products pipelines that connect our Mid-Continent assets with the Midwest markets near Chicago, Illinois. We operate FERC-regulated natural gas liquids gathering and distribution pipelines in Oklahoma, Kansas, Nebraska, Missouri, Iowa, Illinois and Texas. We have natural gas liquids terminal and storage facilities in Missouri, Nebraska, Iowa and Illinois.

Table of Contents

Our Natural Gas Liquids Pipelines segment's assets consist of the following:

- approximately 720 miles of FERC-regulated natural gas liquids gathering pipelines with peak capacity of approximately 93 MBbl/d,
- approximately 3,350 miles of FERC-regulated natural gas liquids distribution pipelines with peak transportation capacity of 434 MBbl/d,
- eight NGL product terminals in Missouri, Nebraska, Iowa and Illinois, and
- above-and below-ground storage facilities with 978 MBbl operating capacity.

Other

Our Other segment includes Black Mesa, which is a pipeline that was designed to transport crushed coal suspended in water along 273 miles of pipeline that originates at a coal mine in Kayenta, Arizona, and terminates at Mohave in Laughlin, Nevada. We plan to either divest the Black Mesa pipeline or commence decommissioning of the pipeline during 2008.

ITEM 3. LEGAL PROCEEDINGS

Will Price, et al. v. Gas Pipelines, et al. (f/k/a Quinque Operating Company, et al. v. Gas Pipelines, et al.), 26th Judicial District, District Court of Stevens County, Kansas, Civil Department, Case No. 99C30 ("Price I"). Plaintiffs brought suit on May 28, 1999, against Mid-Continent Market Center, Inc., ONEOK Field Services Company, ONEOK WesTex Transmission, L.P. and ONEOK Hydrocarbon, L.P. (formerly Koch Hydrocarbon, LP), as well as approximately 225 other defendants. Plaintiffs sought class certification for its claims for monetary damages that the defendants had underpaid gas producers and royalty owners throughout the United States by intentionally understating both the volume and the heating content of purchased gas. After extensive briefing and a hearing, the Court refused to certify the class sought by plaintiffs. Plaintiffs then filed an amended petition limiting the purported class to gas producers and royalty owners in Kansas, Colorado and Wyoming and limiting the claim to undermeasurement of volumes. Oral argument on the plaintiffs' motion to certify this suit as a class action was conducted on April 1, 2005. The Court has not yet ruled on the class certification issue.

Will Price and Stixon Petroleum, et al. v. Gas Pipelines, et al., 26th Judicial District, District Court of Stevens County, Kansas, Civil Department, Case No. 03C232 ("Price II"). This action was filed by the plaintiffs on May 12, 2003, after the Court had denied class status in Price I. Plaintiffs are seeking monetary damages based upon a claim that 21 groups of defendants, including Mid-Continent Market Center, Inc., ONEOK Field Services Company, ONEOK WesTex Transmission, L.P. and ONEOK Hydrocarbon, L.P. (formerly Koch Hydrocarbon, LP), intentionally underpaid gas producers and royalty owners by understating the heating content of purchased gas in Kansas, Colorado and Wyoming. Price II has been consolidated with Price I for the determination of whether either or both cases may properly be certified as class actions. Oral argument on the plaintiffs' motion to certify this suit as a class action was conducted on April 1, 2005. The Court has not yet ruled on the class certification issue.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

MARKET INFORMATION AND HOLDERS

Our equity consists of a 2 percent general partner interest and a 98 percent limited partner interest. Our limited partner interests are represented by our common units, which are listed on the NYSE under the trading symbol "OKS," and our Class B limited partner units. The following table sets forth the high and low closing prices of our common units for the periods indicated.

	Year Ended December 31, 2007		Year Ended December 31, 2006	
	High	**Low**	**High**	**Low**
First Quarter	**$ 67.80**	**$ 62.62**	$ 49.15	$ 42.74
Second Quarter	**$ 72.42**	**$ 66.82**	$ 51.35	$ 47.63
Third Quarter	**$ 70.70**	**$ 58.20**	$ 56.25	$ 49.99
Fourth Quarter	**$ 65.41**	**$ 59.00**	$ 65.91	$ 57.08

At February 20, 2008, there were 902 holders of record of our 46,397,214 outstanding common units.

CASH DISTRIBUTIONS

The following table sets forth the quarterly cash distribution declared and paid on our common and Class B units during the periods indicated.

	Years Ended December 31,	
	2007	**2006**
First Quarter	**$ 0.98**	$ 0.80
Second Quarter	**$ 0.99**	$ 0.88
Third Quarter	**$ 1.00**	$ 0.95
Fourth Quarter	**$ 1.01**	$ 0.97

In January 2008, we increased our cash distribution to $1.025 per unit for the fourth quarter of 2007, which was paid on February 14, 2008, to unitholders of record as of January 31, 2008.

CASH DISTRIBUTION POLICY

Under our Partnership Agreement, we make distributions to our partners with respect to each calendar quarter in an amount equal to 100 percent of available cash within 45 days following the end of each quarter. Available cash generally consists of our cash receipts adjusted for our cash disbursements and net changes to cash reserves. Available cash will generally be distributed 98 percent to limited partners and 2 percent to our general partner. As an incentive, our general partner's percentage interest in quarterly distributions is increased after certain specified target levels are met. Under the incentive distribution provisions, our general partner receives:

- 15 percent of amounts distributed in excess of $0.605 per unit,
- 25 percent of amounts distributed in excess of $0.715 per unit, and
- 50 percent of amounts distributed in excess of $0.935 per unit.

We paid cash distributions to our general and limited partners of $384.6 million for 2007 and $265.5 million for 2006, which included an incentive distribution to our general partner of $47.1 million for 2007 and $23.1 million for 2006. Additional information about our cash distributions is included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation under "Liquidity and Capital Resources," and Item 13, Certain Relationships and Related Transactions, and Director Independence.

Table of Contents

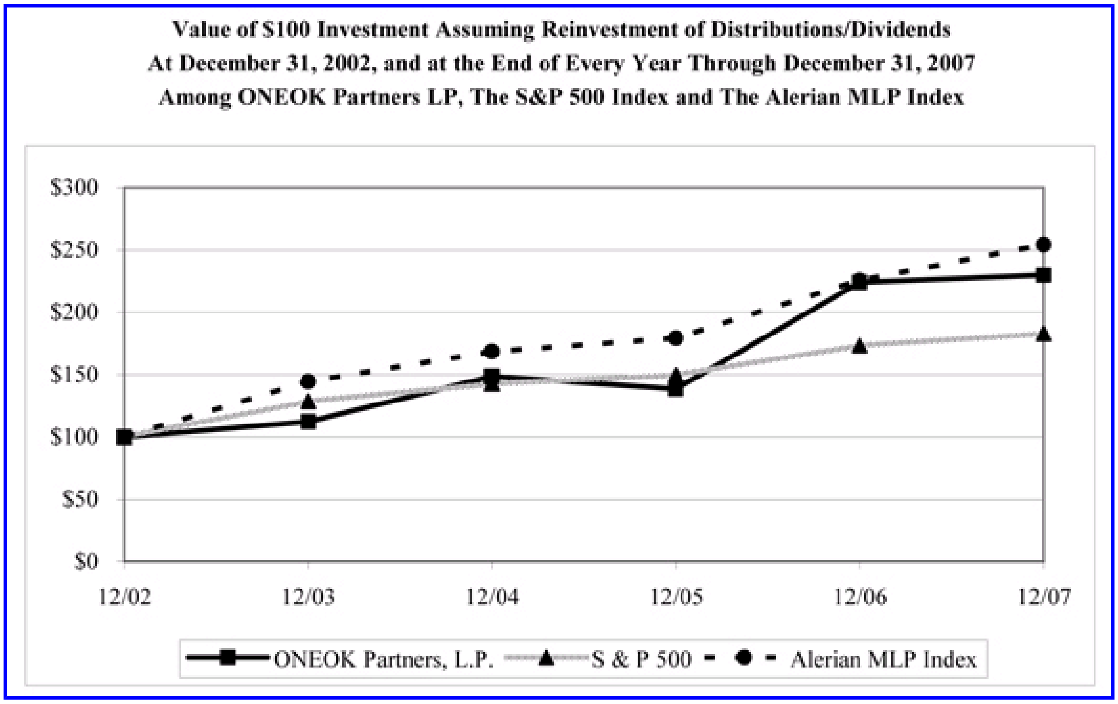
ISSUANCE OF CLASS B UNITS

In April 2006, we issued approximately 36.5 million Class B units to ONEOK as part of the acquisition of the ONEOK Energy Assets. See the discussion of the ONEOK Energy Assets acquisition in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation under "Significant Acquisitions and Divestitures." The units issued to ONEOK were the newly created Class B limited partner units. As of April 7, 2007, the Class B limited partner units are no longer subordinated to distributions on our common units and generally have the same voting rights as our common units. See Note B of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for additional information.

The Class B units were not registered in reliance on the exemption from registration with the SEC as set forth in Section 4(2) of the Securities Act of 1933, as amended, as a transaction not involving any public offering.

PERFORMANCE GRAPH

The following performance graph compares the performance of our common units with the S&P 500 Index and the Alerian MLP Index during the period beginning on December 31, 2002, and ending on December 31, 2007. The graph assumes a $100 investment in our common units and in each of the indices at the beginning of the period and a reinvestment of distributions/dividends paid on such investments throughout the period.



-

	Cumulative Total Return Years Ending December 31,					
	2002	2003	2004	2005	2006	2007
ONEOK Partners, L.P.	$100.00	$112.19	$148.69	$138.50	$224.08	**$230.01**
S&P 500 Index	$100.00	$128.68	$142.69	$149.70	$173.34	**$182.87**
Alerian MLP Index (a)	$100.00	$144.55	$168.65	$179.30	$225.60	**$254.24**

(a) - The Alerian MLP Index measures the composite performance of the 50 most prominent energy master limited partnerships, and is calculated by Standard & Poor's using a float-adjusted, capitalization-weighted methodology.

Table of Contents

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth our selected financial data for each of the periods indicated.

	Years Ended December 31,				
	2007	**2006**	**2005**	**2004**	**2003**
	(In thousands of dollars, except per unit data)				
Operating revenue	**$5,831,558**	$4,738,248	$ 703,944	$ 590,383	$ 550,948
Income (loss) from continuing operations	**$ 407,747**	$ 445,186	$ 146,507	$ 140,921	$ (97,149)
Net income (loss)	**$ 407,747**	$ 445,186	$ 147,013	$ 144,720	$ (88,454)
Total assets	**$6,112,065**	$4,921,717	$2,527,766	$2,514,690	$2,570,583
Long-term debt, including current maturities	**$2,617,326**	$2,031,529	$1,123,971	$1,139,358	$1,238,986
Per unit income (loss) from continuing operations	**$ 4.21**	$ 5.01	$ 2.92	$ 2.81	$ (2.27)
Per unit net income (loss)	**$ 4.21**	$ 5.01	$ 2.93	$ 2.89	$ (2.08)
Distributions per unit	**$ 3.98**	$ 3.60	$ 3.20	$ 3.20	$ 3.20

Financial data for 2007 and 2006 is not directly comparable with 2005, 2004 and 2003 due to the significance of the April 2006 ONEOK Transactions. See discussion of acquisitions and dispositions beginning on page 32 under "Significant Acquisitions and Divestitures" in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The following discussion and analysis should be read in conjunction with our audited consolidated financial statements and the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

EXECUTIVE SUMMARY

The following discussion highlights some of our achievements and significant issues affecting us this past year. Please refer to the Financial and Operating Results section of Management's Discussion and Analysis of Financial Condition and Results of Operation and the Financial Statements for a complete explanation of the following items.

In July 2007, we announced a series of organizational changes that led to the realignment of our previous business segments. Our financial results are now reported in these four segments: (i) Natural Gas Gathering and Processing, which remains unchanged, (ii) Natural Gas Pipelines, which is comprised of our former interstate natural gas pipelines segment and the natural gas assets of our former pipelines and storage segment, (iii) Natural Gas Liquids Gathering and Fractionation, which remains unchanged, and (iv) Natural Gas Liquids Pipelines, which is comprised of the natural gas liquids assets of our former pipelines and storage segment. Prior periods have been restated to reflect these segment changes. The change reflects the increasing scale of the natural gas liquids business, which has grown significantly since 2006. Our natural gas liquids business is expanding as we integrate the assets acquired in October 2007 from a subsidiary of Kinder Morgan into our Natural Gas Liquids Pipelines segment and complete our other internal growth projects.

In September 2007, we completed an underwritten public debt offering of $600 million to finance the assets acquired from Kinder Morgan and to repay debt outstanding under the 2007 Partnership Credit Agreement, which was incurred to fund our internal growth capital projects. Both the assets acquired from Kinder Morgan and our capital projects are discussed below in the "Significant Acquisitions and Divestitures" and the "Capital Projects" sections.

On January 15, 2008, we declared a cash distribution of $1.025 per unit ($4.10 per unit on an annualized basis), an increase of approximately 5 percent over the $0.98 declared in January 2007.

Net income per unit decreased to $4.21 in 2007, compared with $5.01 in 2006. The decrease in net income per unit for the year is primarily due to the gain on sale of a 20 percent partnership interest in Northern Border Pipeline in the second quarter of 2006. Operating income decreased to $446.8 million in 2007, compared with $511.2 million in 2006. Excluding the gain on sale of assets, operating income increased to $444.8 million in 2007 compared with $395.7 million in 2006. Our Natural Gas Liquids Gathering and Fractionation segment and Natural Gas Liquids Pipelines segment benefited primarily from new supply connections that increased volumes gathered, transported, fractionated and sold. In addition, we benefited from higher product price spreads and higher isomerization price spreads in our Natural Gas Liquids Gathering and Fractionation segment. Our Natural Gas Liquids Pipelines segment benefited from the incremental operating income related to the assets

Table of Contents

acquired from Kinder Morgan in October 2007. These increases were partially offset by decreased natural gas transportation margins in our Natural Gas Pipelines segment, primarily resulting from lower throughput and higher fuel costs. Operating income also decreased in our Natural Gas Gathering and Processing segment, primarily due to lower natural gas volumes processed as a result of contract terminations in late 2006.

SIGNIFICANT ACQUISITIONS AND DIVESTITURES

Acquisition of NGL Pipeline - In October 2007, we completed the acquisition of an interstate natural gas liquids and refined petroleum products pipeline system and related assets from a subsidiary of Kinder Morgan for approximately $300 million, before working capital adjustments. The system extends from Bushton and Conway, Kansas, to Chicago, Illinois, and transports, stores and delivers a full range of NGL and refined products. The FERC-regulated system spans 1,627 miles and has a capacity to transport up to 134 MBbl/d. The transaction includes approximately 978 MBbl of owned storage capacity, eight NGL terminals and a 50 percent ownership of Heartland. ConocoPhillips owns the other 50 percent of Heartland and is the managing partner of the Heartland joint venture, which consists primarily of three refined products terminals and connecting pipelines. Financing for this transaction came from the proceeds of our September 2007 issuance of $600 million 6.85 percent Senior Notes due 2037 (the 2037 Notes). See Note G of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for a discussion on the 2037 Notes. These assets are included in our Natural Gas Liquids Pipelines segment.

ONEOK Transactions - In April 2006, we completed the acquisition and consolidated certain companies comprising ONEOK's former gathering and processing, natural gas liquids, and pipelines and storage segments (collectively, the ONEOK Energy Assets) in a series of transactions (collectively, the ONEOK Transactions). This acquisition is accounted for in our Natural Gas Gathering and Processing, Natural Gas Pipelines, Natural Gas Liquids Gathering and Fractionation, and Natural Gas Liquids Pipelines segments.

Acquisition of ONEOK Energy Assets - We acquired the ONEOK Energy Assets for approximately $3 billion, including $1.35 billion in cash, before adjustments, and approximately 36.5 million Class B limited partner units. The Class B limited partner units and the related general partner interest contribution were valued at approximately $1.65 billion. ONEOK now owns approximately 37.0 million of our limited partner units, which, when combined with its general partner interest, increased its total interest in us to approximately 45.7 percent. We used $1.05 billion drawn under our $1.1 billion, 364-day credit agreement (the Bridge Facility), coupled with the proceeds from the sale of a 20 percent partnership interest in Northern Border Pipeline, to finance the cash portion of the transaction. The assets were recorded at historical cost rather than at fair value since these transactions were between affiliates under common control. These assets and their related operations are included in our consolidated financial statements retroactive to January 1, 2006.

Equity Issuance - In connection with the ONEOK Transactions, we amended our Partnership Agreement to provide for the issuance of Class B limited partner units and issued approximately 36.5 million Class B limited partner units to ONEOK. The Class B limited partner units were issued on April 6, 2006. For more information regarding the Class B units, refer to discussion of the ONEOK Transactions in Note B of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

Purchase and Sale of General Partner Interest - In April 2006, ONEOK acquired ONEOK NB, formerly known as Northwest Border Pipeline Company, an affiliate of TransCanada that held a 0.35 percent general partner interest in us. As a result, ONEOK now owns our entire 2 percent general partner interest and controls us.

Disposition of 20 Percent Partnership Interest in Northern Border Pipeline - In April 2006, we completed the sale of a 20 percent partnership interest in Northern Border Pipeline to TC PipeLines for approximately $297 million to help finance the acquisition of the ONEOK Energy Assets. We recorded a gain on the sale of approximately $113.9 million in the second quarter of 2006. We and TC PipeLines each now own a 50 percent interest in Northern Border Pipeline, and an affiliate of TransCanada became the operator of the pipeline in April 2007. Effective January 1, 2006, our interest in Northern Border Pipeline is accounted for as an investment under the equity method in our Natural Gas Pipelines segment.

Acquisition of Guardian Pipeline Interests - In April 2006, we acquired the 66- 2/3 percent interest in Guardian Pipeline not previously owned by us for approximately $77 million, increasing our ownership interest to 100 percent. We used borrowings from our credit facility to fund the acquisition of the additional interest in Guardian Pipeline. Guardian Pipeline is consolidated in our consolidated financial statements and reported in our Natural Gas Pipelines segment as of January 1, 2006.

Table of Contents

Capital Projects

Woodford Shale Natural Gas Liquids Pipeline Extension - In February 2008, we announced plans to construct a 78-mile natural gas liquids gathering pipeline to connect two natural gas processing plants in the Woodford Shale area in southeast Oklahoma at a cost of approximately $25 million, excluding AFUDC. The project is currently scheduled for completion in the second quarter of 2008. These two plants are expected to produce approximately 25 MBbl/d of unfractionated NGLs. Until the Arbuckle Pipeline project is completed, the natural gas liquids production will be transported by our existing Mid-Continent natural gas liquids pipelines. Upon completion of the Arbuckle Pipeline project, the Woodford Shale natural gas liquids production is expected to be transported to our Mont Belvieu, Texas, fractionation facility. This project will be in our Natural Gas Liquids Gathering and Fractionation segment.

Overland Pass Pipeline Company - In May 2006, we entered into an agreement with a subsidiary of Williams to form a joint venture called Overland Pass Pipeline Company. Overland Pass Pipeline Company is building a 760-mile natural gas liquids pipeline from Opal, Wyoming, to the Mid-Continent natural gas liquids market center in Conway, Kansas. The pipeline is designed to transport approximately 110 MBbl/d of unfractionated NGLs, which can be increased to approximately 150 MBbl/d with additional pump facilities. During 2006, we paid $11.6 million to Williams for the acquisition of our interest in the joint venture and for reimbursement of initial capital expenditures. As the 99 percent owner of the joint venture, we will manage the construction project, advance all costs associated with construction and operate the pipeline. Within two years of the pipeline becoming operational, Williams will have the option to increase its ownership up to 50 percent by reimbursing us for its proportionate share of all construction costs. If Williams exercises its option to increase its ownership to the full 50 percent, Williams would have the option to become operator. This project has received the required approvals of various state and federal regulatory authorities, and we are constructing the pipeline with start-up currently scheduled for the second quarter of 2008.

As part of a long-term agreement, Williams dedicated its NGL production from two of its natural gas processing plants in Wyoming to the joint-venture company. We will provide downstream fractionation, storage and transportation services to Williams. The pipeline project is currently estimated to cost approximately $535 million, excluding AFUDC. Since our initial estimate in early 2006, there has been a significant increase in the demand for pipeline construction-related services, which has led to higher rates, particularly for construction labor and equipment. Additionally, due to the extended permitting process, we are constructing the pipeline during the winter months, which could contribute to added construction costs and could cause further delays. The severity of the winter conditions could further impact our cost and schedule estimates. In addition, we are investing approximately $216 million, excluding AFUDC, to expand our existing fractionation and storage capabilities and the capacity of our natural gas liquids distribution pipelines. Financing for both projects may include a combination of short- or long-term debt or equity. Overland Pass Pipeline Company is included in our Natural Gas Liquids Pipelines segment, while the associated expansions are included in our Natural Gas Liquids Gathering and Fractionation segment and Natural Gas Liquids Pipelines segment.

Piceance Lateral Pipeline - In March 2007, we announced that Overland Pass Pipeline Company also plans to construct a 150-mile lateral pipeline with capacity to transport as much as 100 MBbl/d of unfractionated NGLs from the Piceance Basin in Colorado to the Overland Pass Pipeline. Williams announced that it intends to construct a new natural gas processing plant in the Piceance Basin and will dedicate its NGL production from that plant and an existing plant to be transported by the lateral pipeline. This project requires the approval of various state and federal regulatory authorities. Assuming Overland Pass Pipeline Company obtains the required state and federal regulatory approvals, construction of this lateral pipeline is currently expected to begin in late 2008 and be completed during the second quarter of 2009, at a current cost estimate of approximately $120 million, excluding AFUDC. This project is in our Natural Gas Liquids Pipelines segment.

Arbuckle Pipeline Natural Gas Liquids Pipeline - In March 2007, we announced plans to build the 440-mile Arbuckle Pipeline, a natural gas liquids pipeline from southern Oklahoma through northern Texas and continuing on to the Texas Gulf Coast, at a current estimated cost of approximately $260 million, excluding AFUDC. The Arbuckle Pipeline will have the capacity to transport 160 MBbl/d of unfractionated natural gas liquids and will connect our existing Mid-Continent infrastructure with our fractionation facility in Mont Belvieu, Texas, and other Gulf Coast region fractionators. Construction of the pipeline will require permits from various federal, state and local regulatory bodies. Construction is currently expected to begin in mid-2008 and be completed by early 2009. This project is in our Natural Gas Liquids Pipelines segment.

Williston Basin Gas Processing Plant Expansion - In March 2007, we announced the expansion of our Grasslands natural gas processing facility in North Dakota at a cost of approximately $30 million, excluding AFUDC. The Grasslands facility is our largest natural gas processing plant in the Williston Basin. The expansion increases processing capacity to approximately 100 MMcf/d from its current capacity of 63 MMcf/d and increases fractionation capacity to approximately 12 MBbl/d from 8

Table of Contents

MBbl/d. The expansion project is expected to come on-line in phases, with the final phase currently expected to be on-line in the third quarter of 2008. This project is in our Natural Gas Gathering and Processing segment.

Fort Union Gas Gathering Expansion - In January 2007, Fort Union Gas Gathering announced that it will double its existing gathering pipeline capacity by adding 148 miles of new gathering lines, resulting in approximately 649 MMcf/d of additional capacity in the Powder River basin of Wyoming. The expansion is expected to cost approximately $110 million, excluding AFUDC, which will be financed within the Fort Union Gas Gathering partnership and will occur in two phases. Phase 1, with more than 200 MMcf/d capacity, was placed in service during the fourth quarter of 2007. Phase 2, with approximately 450 MMcf/d capacity, is currently expected to be in service during the second quarter of 2008. The additional capacity has been fully subscribed for 10 years beginning with the in-service date of the expansion. We own approximately 37 percent of Fort Union Gas Gathering. This investment is in our Natural Gas Gathering and Processing segment and is accounted for under the equity method of accounting.

Guardian Pipeline Expansion and Extension - In December 2007, Guardian Pipeline received and accepted the certificate of public convenience and necessity issued by the FERC for its expansion and extension project. The certificate authorizes us to construct, install and operate approximately 119 miles of a 20-inch and 30-inch natural gas transportation pipeline with a capacity to transport 537 MMcf/d of natural gas north from Ixonia, Wisconsin, to the Green Bay, Wisconsin, area. The project is supported by long-term shipper commitments. The cost of the project is currently estimated to be $260 million, excluding AFUDC. The pipeline is currently projected to be in service in the fourth quarter of 2008. This project is in our Natural Gas Pipelines segment.

Midwestern Gas Transmission Eastern Extension - Midwestern Gas Transmission’s eastern extension pipeline was placed into service in January 2008. The extension added approximately 31 miles of natural gas transportation pipeline, with a capacity to transport 120 MMcf/d of natural gas from Midwestern’s previous terminus at Portland, Tennessee, to interconnects with Columbia Gulf Transmission Company and East Tennessee Natural Gas, LLC, near Hartsville, Tennessee. The project is supported by a long-term shipper commitment. Total capital expenditures are expected to be $62 million, excluding AFUDC. This project is in our Natural Gas Pipelines segment.

IMPACT OF NEW ACCOUNTING STANDARDS

Information about the impact of Statement 157, "Fair Value Measurements," Statement 159, "The Fair Value Option for Financial Assets and Financial Liabilities," FIN 48, "Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement No. 109," Statement 141R, "Business Combinations," and Statement 160, "Noncontrolling Interest in Consolidated Financial Statements - an amendment to ARB No. 51," is included in Note A of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of our consolidated financial statements and related disclosures in accordance with GAAP requires us to make estimates and assumptions with respect to values or conditions that cannot be known with certainty that affect the reported amount of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements. These estimates and assumptions also affect the reported amounts of revenue and expenses during the reporting period. Although we believe these estimates are reasonable, actual results could differ from our estimates.

The following is a summary of our most critical accounting policies, which are defined as those policies most important to the portrayal of our financial condition and results of operations and requiring management’s most difficult, subjective or complex judgment, particularly because of the need to make estimates concerning the impact of inherently uncertain matters. We have discussed the development and selection of our critical accounting policies and estimates with the Audit Committee of our Board of Directors.

Impairment of Long-Lived Assets, Goodwill and Intangible Assets - We assess our long-lived assets for impairment based on Statement 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." A long-lived asset is tested for impairment whenever events or changes in circumstances indicate that its carrying amount may exceed its fair value. Fair values are based on the sum of the undiscounted future cash flows expected to result from the use and eventual disposition of the assets.

We assess our goodwill and intangible assets for impairment at least annually, based on Statement 142, "Goodwill and Other Intangible Assets." There were no impairment charges resulting from the July 1, 2007, impairment tests and no events indicating an impairment have occurred subsequent to that date. An initial assessment is made by comparing the fair value of

Table of Contents

the operations with goodwill, as determined in accordance with Statement 142, to the book value of each reporting unit. If the fair value is less than the book value, an impairment is indicated, and we must perform a second test to measure the amount of the impairment. In the second test, we calculate the implied fair value of the goodwill by deducting the fair value of all tangible and intangible net assets of the operations with goodwill from the fair value determined in step one of the assessment. If the carrying value of the goodwill exceeds this calculated implied fair value of the goodwill, we will record an impairment charge. At December 31, 2007, we had $394.6 million of goodwill recorded on our Consolidated Balance Sheet as shown below.

	(Thousands of dollars)
Natural Gas Gathering and Processing	$ **90,037**
Natural Gas Pipelines	**128,997**
Natural Gas Liquids Gathering and Fractionation	**175,566**
Total goodwill	$ **394,600**

Intangible assets with a finite useful life are amortized over their estimated useful life, while intangible assets with an indefinite useful life are not amortized. All intangible assets are subject to impairment testing. As shown below, we had $287.5 million of intangible assets recorded on our Consolidated Balance Sheet as of December 31, 2007.

	(Thousands of dollars)
Natural Gas Liquids Gathering and Fractionation	$ **273,751**
Natural Gas Liquids Pipelines	**13,733**
Total intangible assets	$ **287,484**

During 2006, we reassessed our coal slurry pipeline operation and concluded that the likelihood of Black Mesa resuming operations was significantly reduced, and a goodwill and asset impairment of $8.4 million and $3.6 million, respectively, was recorded as depreciation and amortization. The reduction to our net income after income taxes was $10.6 million. Additional information about Black Mesa is included above in Item 1 under "Description of Business Segments - Other."

Our total unamortized excess cost over underlying fair value of net assets accounted for under the equity method was $185.6 million as of December 31, 2007 and 2006. These amounts were recorded in investment in unconsolidated affiliates on our accompanying Consolidated Balance Sheets. For the investments we account for under the equity method, the premium or excess cost over underlying fair value of net assets is referred to as equity method goodwill and under Statement 142 is not subject to amortization but rather to impairment testing pursuant to APB Opinion No. 18, "The Equity Method of Accounting for Investments in Common Stock." The impairment test under APB Opinion No. 18 considers whether the fair value of the equity investment as a whole, not the underlying net assets, has declined and whether that decline is other than temporary. Therefore, we periodically reevaluate the amount at which we carry the excess of cost over fair value of net assets accounted for under the equity method to determine whether current events or circumstances warrant adjustments to our carrying value in accordance with APB Opinion No. 18. See Note K of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for additional discussion of unconsolidated affiliates.

We do not currently anticipate any additional goodwill or asset impairments to occur within the next year, but if such events were to occur over the long term, the impact could be significant to our financial condition and results of operations.

Derivatives and Risk Management - We utilize financial instruments to reduce our market risk exposure to interest rate and commodity price fluctuations and achieve more predictable cash flows. We account for derivative instruments utilized in connection with these activities and services under the fair value basis of accounting in accordance with Statement 133, "Accounting for Derivative Instruments and Hedging Activities," as amended.

Under Statement 133, entities are required to record derivative instruments at fair value. The fair value of a derivative instrument is determined by commodity exchange prices, over-the-counter quotes, volatility, time value, counterparty credit and the potential impact on market prices of liquidating positions in an orderly manner over a reasonable period of time under current market conditions.

Market value changes result in a change in the fair value of our derivative instruments. The accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and, if so, the nature of the risk being hedged and how we will determine if the hedging instrument is effective. If the derivative instrument does not qualify or is not designated as part of a hedging relationship, then we account for changes in fair value of the derivative in earnings as they occur. Commodity price volatility may have a significant impact on the gain

Table of Contents

or loss in a given period. For more information on fair value sensitivity and a discussion of the market risk of pricing changes, see Item 7A, Quantitative and Qualitative Disclosures about Market Risk.

To minimize the risk of fluctuations in natural gas, NGLs and condensate prices, we periodically enter into futures, collars or swap transactions in order to hedge anticipated purchases and sales of natural gas, NGLs, condensate, and fuel requirements. Interest rate swaps are also used to manage interest rate risk. Under certain conditions, we designate these derivative instruments as a hedge of exposure to changes in fair values or cash flow. For hedges of exposure to changes in cash flow, the effective portion of the gain or loss on the derivative instrument is reported initially as a component of accumulated other comprehensive income (loss) and subsequently recorded to earnings when the forecasted transaction affects earnings. Any ineffectiveness of designated hedges is reported in earnings in the period the ineffectiveness occurs. For hedges of exposure to changes in fair value, the gain or loss on the derivative instrument is recognized in earnings during the period of change together with the offsetting gain or loss on the hedged item attributable to the risk being hedged.

Upon election, many of our purchase and sale agreements that otherwise would be required to follow derivative accounting qualify as normal purchases and normal sales under Statement 133 and are therefore exempt from fair value accounting treatment.

See Note C of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for more discussion of derivatives and risk management activities.

Contingencies - Our accounting for contingencies covers a variety of business activities, including contingencies for legal and environmental exposures. We accrue these contingencies when our assessments indicate that it is probable that a liability has been incurred or an asset will not be recovered and an amount can be reasonably estimated in accordance with Statement 5, "Accounting for Contingencies." We base our estimates on currently available facts and our estimates of the ultimate outcome or resolution. Actual results may differ from our estimates resulting in an impact, positive or negative, on earnings. See Note H of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for additional discussion of contingencies.

FINANCIAL AND OPERATING RESULTS

Consolidated Operations

Selected Financial Information - The following table sets forth certain selected financial information for the periods indicated.

	Years Ended December 31,		
Financial Results	**2007**	**2006**	**2005**
	(Thousands of dollars)		
Operating revenue	**$ 5,831,558**	$ 4,738,248	$ 703,944
Cost of sales and fuel	**4,935,665**	3,894,700	210,082
Net margin	**895,893**	843,548	493,862
Operating costs	**337,356**	325,774	151,084
Depreciation and amortization	**113,704**	122,045	86,010
Gain on sale of assets	**1,950**	115,483	-
Operating income	**$ 446,783**	$ 511,212	$ 256,768
Equity earnings from investments	**$ 89,908**	$ 95,883	$ 24,736
Allowance for equity funds used during construction	**$ 12,538**	$ 2,205	$ 527
Interest expense	**$ 138,947**	$ 133,482	$ 86,903
Minority interests in income of consolidated subsidiaries	**$ 416**	$ 2,392	$ 45,674

Operating Results - Net margin increased for 2007, compared with 2006, primarily due to the performance of our Natural Gas Liquids Gathering and Fractionation segment and Natural Gas Liquids Pipelines segment, which benefited primarily from new supply connections that increased volumes gathered, transported, fractionated and sold. In addition, net margin increased due to higher product price spreads and higher isomerization price spreads in our Natural Gas Liquids Gathering and Fractionation segment. Our Natural Gas Liquids Pipelines segment benefited from the incremental net margin related to the acquired assets from Kinder Morgan in October 2007. Net margin also increased due to increased storage margins in our Natural Gas Pipelines segment. These increases were partially offset by decreased natural gas transportation margins in our Natural Gas Pipelines segment, primarily resulting from lower throughput and higher fuel costs. Net margin also decreased

Table of Contents

in our Natural Gas Gathering and Processing segment, primarily due to lower natural gas volumes processed as a result of contract terminations in late 2006.

Operating costs increased for 2007, compared with 2006, primarily due to higher employee-related costs and the incremental operating expenses associated with our acquired assets from Kinder Morgan, partially offset by lower litigation costs.

Depreciation and amortization decreased for 2007, compared with 2006, primarily due to a goodwill and asset impairment charge of $12.0 million recorded in the second quarter of 2006 related to Black Mesa, which is included in our Other segment.

Gain on sale of assets decreased for 2007, compared with 2006, primarily due to the $113.9 million gain on sale of a 20 percent partnership interest in Northern Border Pipeline recorded in the second quarter of 2006 in our Natural Gas Pipelines segment.

Equity earnings from investments for 2007 and 2006 primarily include earnings from our interest in Northern Border Pipeline. The decrease in equity earnings from investments for 2007 is primarily due to the decrease in our share of Northern Border Pipeline's earnings from 70 percent in the first quarter of 2006 to 50 percent beginning in the second quarter of 2006. See page 32 for discussion of the disposition of the 20 percent partnership interest in Northern Border Pipeline.

Allowance for equity funds used during construction increased for 2007, compared with 2006, due to our capital projects, which are discussed beginning on page 33.

Minority interest in income of consolidated subsidiaries decreased for 2007, compared with 2006, primarily due to our acquisition of the remaining interest in Guardian Pipeline. Minority interest in income of consolidated subsidiaries for 2006 included the 66- 2/3 percent interest in Guardian Pipeline that we did not own until April 2006. We owned 100 percent of Guardian Pipeline beginning in April 2006, resulting in no minority interest in income of consolidated subsidiaries related to Guardian Pipeline after March 31, 2006.

Net margin was $843.5 million in 2006, compared with $493.9 million in 2005. Net margin increased primarily due to the acquisition of the ONEOK Energy Assets, which accounts for $638.9 million of our consolidated net margin for the period, and, to a lesser extent, the effect of the Guardian Pipeline consolidation, partially offset by the effect of the Northern Border Pipeline deconsolidation.

Operating costs increased in 2006, compared with 2005, primarily due to our acquisition of the ONEOK Energy Assets.

Equity earnings from investments for 2006 primarily consisted of earnings from our interest in Northern Border Pipeline which is no longer consolidated as of January 1, 2006. Equity earnings from investments for 2005 consisted of earnings from our 33- 1/3 percent interest in Guardian Pipeline, which is reflected on a consolidated basis beginning January 1, 2006.

Minority interest in net income for 2006 included earnings from the 66- 2/3 percent interest in Guardian Pipeline until that interest was acquired by us in April 2006. Minority interest in net income for 2005 included earnings from the 30 percent interest in Northern Border Pipeline owned by TC PipeLines when Northern Border Pipeline's results were consolidated.

More information regarding our results of operations is provided in the following discussion of operating results for each of our segments.

Table of Contents

Natural Gas Gathering and Processing

Acquisition - In April 2006, we completed the acquisition of the ONEOK Energy Assets, which is discussed further on page 32.

Selected Financial and Operating Information - The following tables set forth certain selected financial and operating information for our Natural Gas Gathering and Processing segment for the periods indicated.

	Years Ended December 31,		
Financial Results	**2007**	**2006**	**2005**
	(Thousands of dollars)		
Natural gas liquids and condensate sales	**$ 673,800**	$ 646,548	$ 123,088
Gas sales	**636,761**	706,318	107,999
Gathering, compression, dehydration and processing fees and other revenue	**148,089**	123,224	44,200
Cost of sales and fuel	**1,092,139**	1,105,329	180,052
Net margin	**366,511**	370,761	95,235
Operating costs	**135,422**	147,487	34,476
Depreciation and amortization	**45,099**	43,032	16,045
Gain on sale of assets	**1,825**	373	-
Operating income	**$ 187,815**	$ 180,615	$ 44,714
Equity earnings from investments	**$ 26,399**	$ 22,616	$ 22,473

	Years Ended December 31,

Percentage of total net margin	**14%**	16%	0%

Table of Contents

Operating Results - Net margin decreased $4.3 million for 2007, compared with 2006, primarily due to the following:

- a decrease of $25.8 million from lower volumes processed as a result of contract terminations at the Bushton Plant in late 2006,
- a decrease of $5.6 million primarily due to lower processed volumes associated with winter storms and summer flooding in the Mid-Continent region and reduced processing capacity due to a temporary shutdown to install additional processing and fractionation capacity at our Grasslands plant located in the Williston Basin, partially offset by
- an increase of $13.0 million in fee margins primarily from improved contractual terms and increased volumes in our gathering business,
- an increase of $8.6 million due to one-time favorable contract settlements that occurred in the fourth quarter of 2007, and
- an increase of $5.5 million due to higher realized natural gas liquids and natural gas prices.

Operating costs decreased $12.1 million for 2007, compared with 2006, primarily due to lower litigation costs and reduced operating expenses associated with the temporarily idled Bushton Plant, partially offset by higher employee-related costs.

Depreciation and amortization and capital expenditures increased for 2007, compared with 2006, primarily due to increased depreciation expense associated with our capital projects, which are discussed beginning on page 33.

The increase in equity earnings from investments for 2007, compared with 2006, is driven primarily by the earnings related to our interest in an investment in Venice Energy Services Co., LLC which operated on a limited basis in 2006 due to hurricane damage.

Net margin increased $275.5 million in 2006, compared with 2005, primarily due to the following:

- an increase of $263.1 million related to the acquisition of ONEOK’s natural gas gathering and processing assets,
- an increase of $3.2 million resulting from favorable commodity pricing for natural gas and NGL products on POP contracts in the Rocky Mountain region, net of hedging, and
- an increase of $9.0 million resulting from increased natural gas volumes gathered and processed in the Rocky Mountain region, partially offset by lower average gathering rates.

Our Natural Gas Gathering and Processing segment is exposed to commodity price risk, primarily from NGLs, as a result of our contractual obligations for services provided. A small percentage of our services are provided through keep-whole arrangements. Our realized gross processing spread for 2007 was above the five-year average of $3.58 per MMBtu. See discussion regarding our commodity price risk beginning on page 51 under "Commodity Price Risk" in Item 7A, Quantitative and Qualitative Disclosures about Market Risk.

Table of Contents

Natural Gas Pipelines

Acquisition and Divestiture - The following transactions are described beginning on page 32.

- In April 2006, we completed the acquisition of the ONEOK Energy Assets, which is discussed further on page 32.
- In April 2006, we completed the sale of a 20 percent partnership interest in Northern Border Pipeline to TC PipeLines. We and TC PipeLines each now own a 50 percent interest in Northern Border Pipeline, and an affiliate of TransCanada became operator of the pipeline in April 2007.
- In April 2006, we acquired the 66- 2/3 percent interest in Guardian Pipeline not previously owned by us for approximately $77 million, increasing our ownership interest to 100 percent.

Selected Financial and Operating Information - The following tables set forth certain selected financial and operating results for our Natural Gas Pipelines segment for the periods indicated.

	Years Ended December 31,		
Financial Results	**2007**	**2006**	**2005**
	(Thousands of dollars)		
Transportation revenue	**$228,173**	$234,187	$395,670
Storage revenue	**54,809**	49,486	-
Gas sales and other revenue	**18,982**	33,335	8,415
Cost of sales	**60,867**	70,211	30,030
Net margin	**241,097**	246,797	374,055
Operating costs	**96,584**	91,516	92,630
Depreciation and amortization	**32,380**	32,841	67,257
Gain on sale of assets	**79**	114,890	-
Operating income	**$112,212**	$237,330	$214,168
Equity earnings from investments	**$ 62,487**	$ 72,835	$ 2,263
Allowance for equity funds used during construction	**$ 3,670**	$ 918	$ 527
Minority interest in income of consolidated subsidiaries	**$ 387**	$ 2,392	$ 45,674

	Years Ended December 31,		
Operating Information (a)	**2007**	**2006**	**2005**
Natural gas transported *(MMcf/d)*	**3,579**	3,634	3,808
Average natural gas price			
Mid-continent region (*$/MMBtu*)	**$ 6.05**	$ 6.04	(b)
Capital expenditures *(Thousands of dollars)*	**$138,919**	$ 48,598	$ 39,641

(a) Includes volumes for consolidated entities only.
(b) Companies in the Mid-Continent region were acquired as part of the ONEOK Transactions effective January 1, 2006.

Operating Results - Net margin decreased $5.7 million for 2007, compared with 2006, due to the following:

- a decrease of $7.1 million from natural gas transportation margins, as a result of lower throughput and higher fuel costs,
- a decrease of $2.8 million primarily due to the expiration of reimbursements associated with an intrastate natural gas transportation construction project in Oklahoma, and
- a decrease of $0.9 million due to a reduction in operational natural gas inventory sales, partially offset by
- an increase of $5.4 million from natural gas storage margins as a result of new and renegotiated contracts.

Operating costs increased $5.1 million for 2007, compared with 2006, primarily due to higher employee-related costs.

Equity earnings from investments for 2007 and 2006 primarily include earnings from our interest in Northern Border Pipeline. The decrease in equity earnings from investments of $10.3 million for 2007, compared with 2006, is primarily due to the decrease in our share of Northern Border Pipeline's earnings from 70 percent in the first quarter of 2006 to 50 percent beginning in the second quarter of 2006. See page 32 for discussion of the disposition of the 20 percent partnership interest in Northern Border Pipeline.

The increase in capital expenditures for 2007, compared with 2006, is driven primarily by our capital projects, which are discussed beginning on page 33.

Table of Contents

Net margin decreased $127.3 million for 2006, compared with 2005, due to the following:

- a decrease of $321.7 million related to Northern Border Pipeline, which is no longer consolidated as of January 1, 2006, offset by
- an increase of $149.7 million due to acquisition of the pipelines and storage assets from ONEOK,
- an increase of $35.6 million due to the consolidation of Guardian Pipeline,
- an increase of $7.7 million from natural transportation revenues as a result of lower fuel costs and higher throughput, and
- an increase of $1.7 million due to the acquisition of OkTex Pipeline from ONEOK.

Depreciation and amortization decreased $34.4 million for 2006, compared with 2005, due to a decrease of $58.1 million related to Northern Border Pipeline, which is no longer consolidated as of January 1, 2006, offset by an increase of $5.9 million due to the consolidation of Guardian Pipeline and $17.8 million due to acquiring assets from ONEOK.

During the second quarter of 2006, we sold a 20 percent partnership interest in Northern Border Pipeline and recorded a gain on sale of approximately $113.9 million.

The increase in equity earnings from investments of $70.6 million for 2006, compared with 2005, is primarily due to our interest in Northern Border Pipeline, which is no longer consolidated as of January 1, 2006. Equity earnings from investments of $2.3 million for 2005 were primarily due to our 33-1/3 percent interest in Guardian Pipeline, which is reflected on a consolidated basis beginning January 1, 2006.

Minority interest in income of consolidated subsidiaries for 2006 included the 66-2/3 percent interest in Guardian Pipeline until that interest was acquired by us in April 2006. Minority interest in net income for 2005 included earnings from the 30 percent interest in Northern Border Pipeline owned by TC PipeLines when Northern Border Pipeline's results were consolidated.

The increase in capital expenditures for 2006, compared with 2005, is primarily due to the assets acquired from ONEOK.

Natural Gas Liquids Gathering and Fractionation

Acquisition - In April 2006, we completed the acquisition of the ONEOK Energy Assets, which is discussed further on page 32. We did not have a Natural Gas Liquids Gathering and Fractionation segment prior to 2006.

Selected Financial and Operating Information - The following tables set forth certain selected financial and operating results for our Natural Gas Liquids Gathering and Fractionation segment for the periods indicated.

	Years Ended December 31,	
Financial Results	**2007**	**2006**
	(Thousands of dollars)	
Natural gas liquids and condensate sales	**$ 4,310,474**	$ 3,295,462
Storage and fractionation revenue	**276,819**	197,514
Cost of sales and fuel	**4,381,529**	3,325,995
Net margin	**205,764**	166,981
Operating costs	**70,693**	57,511
Depreciation and amortization	**23,134**	20,738
Gain on sale of assets	**39**	47
Operating income	**$ 111,976**	$ 88,779

	Years Ended December 31,	
Operating Information	**2007**	**2006**
Natural gas liquids gathered *(MBbl/d)*	**228**	206
Natural gas liquids sales *(MBbl/d)*	**231**	207
Natural gas liquids fractionated *(MBbl/d)*	**356**	313
Conway-to-Mont Belvieu OPIS average spread		
Ethane/Propane mixture *($/gallon)*	**$ 0.06**	$ 0.05
Capital expenditures *(Thousands of dollars)*	**$ 123,555**	$ 21,761

Table of Contents

Operating Results - Net margin increased $38.8 million for 2007, compared with 2006, due to the following:
- an increase of $17.8 million due to higher exchange net margin primarily driven by increased volumes due to new supply connections, improved natural gas processing economics and increased fractionation volumes at our Mont Belvieu fractionator,
- an increase of $13.5 million due to higher product price spreads and higher isomerization price spreads, and
- an increase of $7.6 million due to new storage contracts entered into in the second quarter of 2007 and our acquisition of the Mont Belvieu storage assets in the fourth quarter of 2006.

Operating costs increased for 2007, compared with 2006, primarily due to higher regulatory compliance costs at our storage facilities, employee-related costs and general taxes, as well as the acquisition of the Mont Belvieu storage assets in the fourth quarter of 2006.

The increase in capital expenditures for 2007, compared with 2006, is driven primarily by our growth activities for new supply connections. See discussion of our capital projects beginning on page 33.

Natural Gas Liquids Pipelines

Acquisitions - The following acquisitions are described beginning on page 32.
- In October 2007, we completed the acquisition of an interstate natural gas liquids and refined petroleum products pipeline system and related assets from a subsidiary of Kinder Morgan for approximately $300 million, before working capital adjustments. The system extends from Bushton and Conway, Kansas, to Chicago, Illinois, and transports, stores and delivers a full range of NGL and refined products. The FERC-regulated system spans approximately 1,627 miles and has a capacity to transport up to 134 MBbl/d. The transaction includes approximately 978 MBbl of owned storage capacity, eight NGL terminals and a 50 percent ownership of Heartland.
- In April 2006, we completed the acquisition of the ONEOK Energy Assets, which is discussed further on page 32. We did not have a Natural Gas Liquids Pipelines segment prior to 2006.

Selected Financial and Operating Information - The following tables set forth certain selected financial and operating results for our Natural Gas Liquids Pipelines segment for the periods indicated.

	Years Ended December 31,	
Financial Results	**2007**	**2006**
	(Thousands of dollars)	
Transportation and gathering revenue	**$ 90,441**	$ 66,433
Storage revenue	**768**	-
Gas sales and other revenue	**626**	63
Cost of sales and fuel	**10,363**	6,049
Net margin	**81,472**	60,447
Operating costs	**28,957**	19,333
Depreciation and amortization	**13,062**	12,035
Gain on sale of assets	**7**	7
Operating income	**$ 39,460**	$ 29,086
Equity earnings from investments	**$ 1,022**	$ 432
Allowance for equity funds used during construction	**$ 8,868**	$ 1,287
Minority interest in income of consolidated subsidiaries	**$ 29**	$ -

	Years Ended December 31,	
Operating Information	**2007**	**2006**
Natural gas liquids transported *(MBbl/d)*	**299**	200
Natural gas liquids gathered *(MBbl/d)*	**81**	60
Capital expenditures *(Thousands of dollars)*	**$ 363,460**	$ 49,322

Operating Results - Net margin increased $21.0 million for 2007, compared with 2006, primarily as a result of:
- an increase of $11.5 million due to incremental margin from our acquired assets from Kinder Morgan in October 2007 and
- an increase of $9.5 million primarily due to increased throughput from new supply connections and increased production volume from existing supply connections to our natural gas liquids gathering pipelines.

Table of Contents

Operating costs increased $9.6 million for 2007, compared with 2006, primarily due to $5.8 million in incremental operating expenses associated with our acquired assets from Kinder Morgan, as well as higher employee-related costs.

Depreciation and amortization increased for 2007, compared with 2006, primarily due to incremental operating expenses associated with our acquired assets from Kinder Morgan.

The increase in capital expenditures for 2007, compared with 2006, is driven primarily by our growth activities. See discussion of our capital projects beginning on page 33.

Other

In 2007, we recorded a net loss of $1.6 million to maintain the standby status of the Black Mesa facility. We recorded a loss on Black Mesa for 2006 of $12.0 million, which included an after-tax reduction to net income of $10.6 million for the goodwill and asset impairments recognized during the year, compared with net income in 2005 of $3.9 million. We expect that maintaining standby status of the Black Mesa facilities would result in a loss in 2008 of approximately $1.6 million if we do not divest or decommission the pipeline. We plan to either divest the Black Mesa pipeline or commence decommissioning of the pipeline during 2008.

Contingencies

Legal Proceedings - We are a party to various litigation matters and claims that are in the normal course of our operations. While the results of litigation and claims cannot be predicted with certainty, we believe the final outcome of such matters will not have a material adverse effect on our consolidated results of operations, financial position or liquidity.

Other - As a result of an internal review of a transaction that was brought to the attention of one of our affiliates by a third party, we have commenced an internal review of transactions that may have violated FERC capacity release rules or related rules. We have notified the FERC of this review and expect to file a report with the FERC by mid-March 2008 concerning any violations. At this time, we do not believe that penalties, if any, associated with potential violations will have a material impact on our results of operations, financial position or liquidity.

LIQUIDITY AND CAPITAL RESOURCES

General - Our principal sources of liquidity include cash generated from operating activities, bank credit facilities, debt issuances and the sale of limited partner units. We fund our operating expenses, debt service and cash distributions to our limited and general partners primarily with operating cash flow.

Part of our growth strategy is to expand our existing businesses and strategically acquire related businesses that strengthen and complement our existing assets. Capital resources for acquisitions and maintenance and growth expenditures may be funded by a variety of sources, including those listed above as our principal sources of liquidity. Beginning in 2007 and continuing in 2008, the capital markets have been impacted by macroeconomic, liquidity and other recessionary concerns. During this period, we have continued to have access to our 2007 Partnership Credit Agreement to fund our short-term liquidity needs, and we issued $600 million of long-term debt. Our ability to continue to access capital markets for debt and equity financing under reasonable terms depends on our financial condition, credit ratings and market conditions. We anticipate that our existing capital resources, ability to obtain financing and cash flow generated from future operations will enable us to maintain our current level of operations and our planned operations including capital expenditures for the foreseeable future. Our capital expenditures for 2007 and 2006 were financed through operating cash flows and short- and long-term debt. Capital expenditures were $709.9 million and $201.7 million for 2007 and 2006, respectively, exclusive of acquisitions. The increase in capital expenditures for 2007, compared with 2006, is driven primarily by our capital projects, which are discussed beginning on page 33.

Financing - Financing is provided through available cash, our amended and restated revolving credit agreement (2007 Partnership Credit Agreement) and long-term debt. Other options to obtain financing include, but are not limited to, issuance of limited partner units, issuance of hybrid securities such as any trust preferred security or deferrable interest subordinated debt issued by us or any business trusts and sale/leaseback of facilities.

The total amount of short-term borrowings authorized by our general partner's Board of Directors is $1.5 billion. At December 31, 2007, we had $900 million of credit available to us under the 2007 Partnership Credit Agreement, $100 million in borrowings outstanding under the 2007 Partnership Credit Agreement and available cash of approximately $3.2 million.

Table of Contents

The Guardian Pipeline revolving credit agreement terminated in November 2007. As of December 31, 2007, we could have issued $1.1 billion of additional debt under the most restrictive provisions contained in our various borrowing agreements.

Our 2007 Partnership Credit Agreement contains typical covenants as discussed in Note F of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K. At December 31, 2007, we were in compliance with all covenants.

In November 2007, we entered into a $15 million Senior Unsecured Letter of Credit Facility and Reimbursement Agreement with Wells Fargo Bank, N.A., of which $12 million is being used, and a $12 million Standby Letter of Credit Agreement with Royal Bank of Canada. Both agreements are used to support various permits required by the KDHE for our ongoing business in Kansas.

Debt Issuance - In September 2007, we completed an underwritten public offering of $600 million aggregate principal amount of 6.85 percent Senior Notes due 2037 (the 2037 Notes). The 2037 Notes were issued under our existing shelf registration statement filed with the SEC.

In September 2006, we completed an underwritten public offering of (i) $350 million aggregate principal amount of 5.90 percent Senior Notes due 2012 (the 2012 Notes), (ii) $450 million aggregate principal amount of 6.15 percent Senior Notes due 2016 (the 2016 Notes) and (iii) $600 million aggregate principal amount of 6.65 percent Senior Notes due 2036 (the 2036 Notes and collectively with the 2012 Notes and the 2016 Notes, the Notes). We registered the sale of the Notes with the SEC pursuant to a shelf registration statement filed on September 19, 2006.

For more information regarding the 2037 Notes and the Notes, refer to the discussion in Note G of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

Equity Issuance - In connection with the ONEOK Transactions, we amended our Partnership Agreement to provide for the issuance of Class B limited partner units and issued approximately 36.5 million Class B limited partner units to ONEOK. The Class B limited partner units were issued on April 6, 2006. For more information regarding the Class B units, refer to discussion of the ONEOK Transactions in Note B of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

Capitalization Structure - The following table sets forth our capitalization structure for the periods indicated.

	December 31, 2007	December 31, 2006
Long-term Debt	**54%**	48%
Equity	**46%**	52%
Debt (including notes payable)	**55%**	48%
Equity	**45%**	52%

Credit Ratings - Our investment grade credit ratings as of December 31, 2007, are shown in the table below.

Rating Agency	Rating	Outlook
Moody’s	Baa2	Stable
S&P	BBB	Stable

Our credit ratings may be affected by a material change in our financial ratios or a material event affecting our business. The most common criteria for assessment of our credit ratings are the debt-to-EBITDA ratio, interest coverage, business risk profile and liquidity. If our credit ratings were downgraded, the interest rates on the 2007 Partnership Credit Agreement borrowings would increase, resulting in an increase in our cost to borrow funds.

Our $250 million and $225 million long-term notes payable, due 2010 and 2011, respectively, contain provisions that require us to offer to repurchase the senior notes at par value if our Moody’s or S&P credit rating falls below investment grade (Baa3 for Moody’s or BBB- for S&P) and the investment grade rating is not reinstated within a period of 40 days. Further, the indentures governing our senior notes due 2010 and 2011 include an event of default upon acceleration of other indebtedness of $25 million or more and the indentures governing our senior notes due 2012, 2016, 2036 and 2037 include an event of default upon the acceleration of other indebtedness of $100 million or more that would be triggered by such an offer to repurchase. Such an event of default would entitle the trustee or the holders of 25 percent in aggregate principal amount of

Table of Contents

the outstanding senior notes due 2010, 2011, 2012, 2016, 2036 and 2037 to declare those notes immediately due and payable in full. We may not have sufficient cash on hand to repurchase and repay any accelerated senior notes, which may cause us to borrow money under our credit facilities or seek alternative financing sources to finance the repurchases and repayment. We could also face difficulties accessing capital or our borrowing costs could increase, impacting our ability to obtain financing for acquisitions or capital expenditures, to refinance indebtedness and to fulfill our debt obligations. A decline in our credit rating below investment grade may also require us to provide security to our counterparties in the form of cash, letters of credit or other negotiable instruments.

Other than the note repurchase obligations described above, we have determined that we do not have significant exposure to rating triggers in various other contracts and equipment leases. Rating triggers are defined as provisions that would create an automatic default or acceleration of indebtedness based on a change in our credit rating. Our credit agreements contain provisions that would cause the cost to borrow funds to increase if our credit rating is negatively adjusted. An adverse rating change is not defined as a default of our credit agreements.

Capital Expenditures - We classify expenditures that are expected to generate additional revenue or significant operating efficiencies as growth capital expenditures. Any remaining capital expenditures are classified as maintenance capital expenditures.

The following tables set forth the growth and maintenance capital expenditures for 2007, 2006 and 2005.

Growth Capital Expenditures	**2007**	**2006**	**2005**
	(Millions of dollars)		
Natural Gas Gathering and Processing	**$ 64.8**	$ 59.4	$14.3
Natural Gas Pipelines	**123.6**	28.5	16.2
Natural Gas Liquids Gathering and Fractionation	**102.4**	7.0	-
Natural Gas Liquids Pipelines	**359.5**	39.8	-
Total growth capital expenditures	**$650.3**	$134.7	$30.5

Maintenance Capital Expenditures	**2007**	**2006**	**2005**
	(Millions of dollars)		
Natural Gas Gathering and Processing	**$19.0**	$21.6	$ 2.3
Natural Gas Pipelines	**15.3**	20.1	23.4
Natural Gas Liquids Gathering and Fractionation	**21.2**	14.7	-
Natural Gas Liquids Pipelines	**4.0**	9.5	-
Other	**0.1**	1.1	3.7
Total maintenance capital expenditures	**$59.6**	$67.0	$29.4

The majority of the capital expenditures are related to the growth projects discussed in more detail beginning on page 33.

The following table summarizes our 2008 projected growth and maintenance capital expenditures, excluding AFUDC.

2008 Projected Capital Expenditures	**Growth**	**Maintenance**	**Total**
		(Millions of dollars)	
Natural Gas Gathering and Processing	**$ 79**	$ 26	$ 105
Natural Gas Pipelines	**192**	24	216
Natural Gas Liquids Gathering and Fractionation	**99**	29	128
Natural Gas Liquids Pipelines	**484**	12	496
Total projected capital expenditures	**$ 854**	$ 91	$ 945

Additional information about these projects is included under "Capital Projects" on page 33. Financing for these projects may include any, or a combination of, the following: cash from operations, borrowings under the 2007 Partnership Credit Agreement, and debt or equity offerings.

Cash Distributions - We distribute 100 percent of our available cash, which generally consists of all cash receipts less adjustments for cash disbursements and net change to reserves, to our general and limited partners. Our income is allocated to our general partner and limited partners according to their partnership percentages of 2 percent and 98 percent, respectively. The effect of any incremental income allocations for incentive distributions to our general partner is calculated

Table of Contents

after the income allocation for the general partner's partnership interest and before the income allocation to the limited partners.

The following table sets forth the distribution payments for the common and Class B unitholders and our general partner for their general partner and incentive distribution interests for the periods indicated.

	Years Ended December 31, 2007	2006	2005
	(Millions of dollars)		
Common unitholders	**$ 184.7**	$ 167.0	$ 148.5
Class B unitholders	**145.2**	70.1	-
General Partner	**54.7**	28.4	11.1

The following summarizes our quarterly cash distribution activity for 2007:

- In January 2007, we increased our cash distribution to $0.98 per unit for the fourth quarter of 2006. The distribution was paid on February 14, 2007, to unitholders of record on January 31, 2007.
- In April 2007, we increased our cash distribution to $0.99 per unit for the first quarter of 2007. The distribution was paid on May 14, 2007, to unitholders of record as of April 30, 2007.
- In July 2007, we increased our cash distribution to $1.00 per unit for the second quarter of 2007. The distribution was paid on August 14, 2007, to unitholders of record on July 31, 2007.
- In October 2007, we increased our cash distribution to $1.01 per unit for the third quarter of 2007. The distribution was paid on November 14, 2007, to unitholders of record on October 31, 2007.

In January 2008, we increased our cash distribution to $1.025 per unit ($4.10 on an annualized basis) for the fourth quarter of 2007. The distribution was paid on February 14, 2008, to unitholders of record on January 31, 2008.

Additional information about our cash distributions is included under Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities, and Item 13, Certain Relationships and Related Transactions and Director Independence.

ENVIRONMENTAL LIABILITIES

Information about our environmental liabilities is included in Note H of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

CASH FLOW ANALYSIS

Operating Cash Flows - Operating cash flows increased by $98.3 million for 2007, compared with 2006, primarily as a result of changes in the components of working capital. These changes increased operating cash flows by $180.3 million, compared with an increase of $123.7 million for 2006, primarily due to increases in accounts payable, partially offset by increases in accounts receivable. Operating cash flows also increased due to a decrease in income taxes as a result of our consolidation of the ONEOK Energy Assets, as of January 1, 2006, which were previously owned by a taxable entity.

Operating cash flows increased by $335.8 million for 2006 compared with 2005. The increase in operating cash flows was primarily the result of the acquisition of the ONEOK Energy Assets. Changes in components of working capital, net of the effect of the acquisition, increased operating cash flow by $123.7 million, compared with a decrease of $2.9 million in 2005, primarily as a result of decreases in accounts receivable, decreases in inventories and increases in accrued interest.

Investing Cash Flows - Cash used in investing activities was $1.0 billion for 2007, compared with $1.3 billion for 2006. Cash used in investing activities was $68.4 million for 2005.

Investing cash flows for 2007 included the following:

- the acquisition of an interstate natural gas liquids and refined petroleum products pipeline system and related assets from a subsidiary of Kinder Morgan in October 2007 for approximately $300 million, before working capital adjustments, and
- increased capital expenditures of $508.1 million in 2007, compared with 2006, due to our capital projects. See page 33 for discussion of our capital projects.

Table of Contents

Investing cash flows for 2006 included the following:

- the April 2006 purchase of the ONEOK Energy Assets, which included a cash payment of approximately $1.35 billion, before adjustments,
- the acquisition of the 66-2/3 percent interest in Guardian Pipeline not previously owned by us for approximately $77 million,
- payment to Williams of $11.6 million for initial capital expenditures in connection with the Overland Pass Pipeline Company natural gas liquids pipeline joint venture,
- an equity contribution to Northern Border Pipeline of $7.2 million,
- the receipt of approximately $297 million from the sale of a 20 percent partnership interest in Northern Border Pipeline to TC PipeLines,
- increased capital expenditures of $141.9 million in 2006, compared with 2005, primarily related to the ONEOK Energy Assets, and
- the impact of the deconsolidation of Northern Border Pipeline and the consolidation of the ONEOK Energy Assets and Guardian Pipeline.

During 2007 and 2006, we used borrowings from our 2007 Partnership Credit Agreement and cash provided by operating activities to fund our investing activities. During 2006, we also used our Bridge Facility. These borrowings were subsequently repaid with proceeds from the public offering of senior notes completed in the third quarters of 2007 and 2006.

Financing Cash Flows - Cash provided by financing activities was $289.7 million for 2007, compared with $696.9 million for 2006. Cash used in financing activities was $189.8 million for 2005.

During the third quarter of 2007, we completed an underwritten public offering of senior notes totaling $598 million in net proceeds, before offering expenses. During the third quarter of 2006, we completed the underwritten public offering of senior notes totaling $1.4 billion in net proceeds, before offering expenses. The use of these proceeds is discussed below.

We had net borrowings of approximately $94.0 million in 2007, compared with net payments of $200.5 million in 2006. The changes occurred for the following reasons:

- During 2007, short-term financing was primarily used to fund our capital projects. The $598 million debt issuance, net of discounts, was used to repay borrowings under the 2007 Partnership Credit Agreement and finance the $300 million acquisition of assets, before working capital adjustments, from a subsidiary of Kinder Morgan in October 2007.
- During the second quarter of 2006, we borrowed $1.05 billion under our Bridge Facility to finance a portion of the acquisition of the ONEOK Energy Assets and $77 million under our revolving credit agreement to acquire the 66-2/3 percent interest in Guardian Pipeline. In the third quarter of 2006, the net proceeds from the senior notes issued in 2006 discussed above were used to repay all of the amounts outstanding under our Bridge Facility and to repay $335 million of short-term debt.

In 2005, borrowings under Northern Border Pipeline's and our revolving credit agreements were primarily used to repay amounts borrowed under previously existing credit agreements for Northern Border Pipeline and us. Total borrowings in 2005 were $165.0 million and debt repayments were $130.2 million. We also paid $2.8 million to terminate forward-starting interest rate swaps.

We reported cash flows retained by ONEOK of $177.5 million in 2006, which represented the cash flows generated during the first quarter of 2006 by the ONEOK Energy Assets prior to the ONEOK Transactions.

In March 2006, we borrowed $33 million under our amended and restated five-year revolving credit agreement to redeem all of the outstanding Viking Gas Transmission Series A, B, C and D senior notes and paid a redemption premium of $3.6 million.

Cash distributions to our general and limited partners for 2007 were $384.6 million, compared with $265.5 million in 2006, an increase of $119.1 million, primarily due to the additional units that were issued to complete the ONEOK Transactions. Cash distributions to our general and limited partners increased $105.9 million for 2006, compared with 2005, due to increased available cash following the ONEOK Transactions described in this section under "Significant Acquisitions and Developments." We paid cash distributions of $3.98 per unit in 2007, compared with $3.60 per unit paid in 2006 and $3.20 per unit paid in 2005.

Table of Contents

Distributions to minority interests for 2006 decreased $60.5 million, compared with 2005, primarily due to the deconsolidation of Northern Border Pipeline. Distributions to minority interests for 2005 included distributions related to TC PipeLines' 30 percent interest in Northern Border Pipeline prior to the sale.

CONTRACTUAL OBLIGATIONS AND COMMERCIAL COMMITMENTS

The following table sets forth our contractual obligations related to debt, operating leases and other long-term obligations as of December 31, 2007. For further discussion of the debt and operating lease agreements, see Notes G and H, respectively, of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

	Payments Due by Period						
Contractual Obligations	**Total**	**2008**	**2009**	**2010**	**2011**	**2012**	**Thereafter**
	(Thousands of dollars)

Purchase commitments, rights of way and other	58,366	52,971	935	935	935	935	1,655
Total	$5,718,447	$419,936	$214,610	$442,990	$390,488	$488,044	$ 3,762,379

Long-term Debt - Long-term debt as reported on our Consolidated Balance Sheets includes unamortized debt discount.

Interest Payments on Debt - Interest expense is calculated by taking long-term debt and multiplying it by the respective coupon rates.

Operating Leases - Our operating leases include a gas processing plant, storage contracts, office space, pipeline equipment, rights-of-way and vehicles. Our Processing and Services Agreement with ONEOK and OBPI sets out the terms by which OBPI provides processing and related services at the Bushton Plant through 2012. In exchange for such services, we pay OBPI for all direct costs and expenses of operating the Bushton Plant, including reimbursement of a portion of OBPI's obligations under equipment leases covering the Bushton Plant.

Firm Transportation Contracts - Firm transportation agreements with our Natural Gas Gathering and Processing segment's joint ventures require minimum monthly payments.

Financial and Physical Derivatives - Financial and physical derivatives represent fixed-price purchase commitments based on market information at December 31, 2007, associated with our Natural Gas Liquids Gathering and Fractionation segment.

Purchase Commitments - Purchase commitments include purchases related to our growth capital expenditures and other right of way commitments.

FORWARD-LOOKING STATEMENTS

Some of the statements contained and incorporated in this Annual Report on Form 10-K are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The forward-looking statements relate to our anticipated financial performance, management's plans and objectives for our future operations, our business prospects, the outcome of regulatory and legal proceedings, market conditions and other matters. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements in certain circumstances. The following discussion is intended to identify important factors that could cause future outcomes to differ materially from those set forth in the forward-looking statements.

Table of Contents

Forward-looking statements include the items identified in the preceding paragraph, the information concerning possible or assumed future results of our operations and other statements contained or incorporated in this Annual Report on Form 10-K identified by words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "should," "goal," "forecast" and other words and terms of similar meaning.

You should not place undue reliance on forward-looking statements. Known and unknown risks, uncertainties and other factors may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by forward-looking statements. Those factors may affect our operations, markets, products, services and prices. In addition to any assumptions and other factors referred to specifically in connection with the forward-looking statements, factors that could cause our actual results to differ materially from those contemplated in any forward-looking statement include, among others, the following:

- the effects of weather and other natural phenomena on our operations, demand for our services and energy prices;
- competition from other United States and Canadian energy suppliers and transporters as well as alternative forms of energy;
- the capital intensive nature of our businesses;
- the profitability of assets or businesses acquired by us;
- risks of marketing, trading and hedging activities, including the risks of changes in energy prices or the financial condition of our counterparties;
- the uncertainty of estimates, including accruals and costs of environmental remediation;
- the timing and extent of changes in energy commodity prices;
- the effects of changes in governmental policies and regulatory actions, including changes with respect to income and other taxes, environmental compliance, authorized rates or recovery of gas and gas transportation costs;
- impact on drilling and production by factors beyond our control, including the demand for natural gas and refinery-grade crude oil; producers’ desire and ability to obtain necessary permits; reserve performance; and capacity constraints on the pipelines that transport crude oil, natural gas and NGLs from producing areas and our facilities;
- changes in demand for the use of natural gas because of market conditions caused by concerns about global warming or changes in governmental policies and regulations due to climate change initiatives;
- the impact of unforeseen changes in interest rates, equity markets, inflation rates, economic recession and other external factors over which we have no control, including the effect on pension expense and funding resulting from changes in stock and bond market returns;
- actions by rating agencies concerning the credit ratings of us or our general partner;
- the results of administrative proceedings and litigation, regulatory actions and receipt of expected clearances involving the OCC, KCC, Texas regulatory authorities or any other local, state or federal regulatory body, including the FERC;
- our ability to access capital at competitive rates or on terms acceptable to us;
- risks associated with adequate supply to our gathering, processing, fractionation and pipeline facilities, including production declines which outpace new drilling;
- the risk that material weaknesses or significant deficiencies in our internal control over financial reporting could emerge or that minor problems could become significant;
- the impact and outcome of pending and future litigation;
- the ability to market pipeline capacity on favorable terms, including the affects of:
  - future demand for and prices of natural gas and NGLs;
  - competitive conditions in the overall energy market;
  - availability of supplies of Canadian and United States natural gas;
  - availability of additional storage capacity;
  - weather conditions; and
  - competitive developments by Canadian and U.S. natural gas transmission peers;
- performance of contractual obligations by our customers, service providers, contractors and shippers;
- the timely receipt of approval by applicable governmental entities for construction and operation of our pipeline and other projects and required regulatory clearances;
- our ability to acquire all necessary rights-of-way permits and consents in a timely manner, to promptly obtain all necessary materials and supplies required for construction, and to construct pipelines without labor or contractor problems;
- the mechanical integrity of facilities operated;
- demand for our services in the proximity of our facilities;
- our ability to control operating costs;

Table of Contents

- acts of nature, sabotage, terrorism or other similar acts that cause damage to our facilities or our suppliers' or shippers' facilities;
- economic climate and growth in the geographic areas in which we do business;
- the risk of a significant slowdown in growth or decline in the U.S. economy or the risk of delay in growth recovery in the U.S. economy;
- the impact of recently issued and future accounting pronouncements and other changes in accounting policies;
- the possibility of future terrorist attacks or the possibility or occurrence of an outbreak of, or changes in, hostilities or changes in the political conditions in the Middle East and elsewhere;
- the risk of increased costs for insurance premiums, security or other items as a consequence of terrorist attacks;
- risks associated with pending or possible acquisitions and dispositions, including our ability to finance or integrate any such acquisitions and any regulatory delay or conditions imposed by regulatory bodies in connection with any such acquisitions and dispositions;
- the impact of unsold pipeline capacity being greater or less than expected;
- the ability to recover operating costs and amounts equivalent to income taxes, costs of property, plant and equipment and regulatory assets in our state and FERC-regulated rates;
- our ability to promptly obtain all necessary materials and supplies required for construction of gathering, processing, storage, fractionation and transportation facilities;
- the composition and quality of the natural gas and NGLs we gather and process in our plants and transport on our pipelines;
- the efficiency of our plants in processing natural gas and extracting and fractionating NGLs;
- the impact of potential impairment charges;
- the risk inherent in the use of information systems in our respective businesses, implementation of new software and hardware, and the impact on the timeliness of information for financial reporting;
- our ability to control construction costs and completion schedules of our pipelines and other projects; and
- the risk factors listed in the reports we have filed and may file with the SEC, which are incorporated by reference.

These factors are not necessarily all of the important factors that could cause actual results to differ materially from those expressed in any of our forward-looking statements. Other factors could also have material adverse effects on our future results. These and other risks are described in greater detail in Item 1A, Risk Factors, in this Annual Report on Form 10-K. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these factors. Other than as required under securities laws, we undertake no obligation to update publicly any forward-looking statement whether as a result of new information, subsequent events or change in circumstances, expectations or otherwise.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk discussed below includes forward-looking statements and represents an estimate of possible changes in future earnings that could occur assuming hypothetical future movements in interest rates or commodity prices. Our views on market risk are not necessarily indicative of actual results that may occur and do not represent the maximum possible gains and losses that may occur since actual gains and losses will differ from those estimated based on actual fluctuations in interest rates or commodity prices and the timing of transactions.

We are exposed to market risk due to interest rate and commodity price volatility. Market risk is the risk of loss arising from adverse changes in market rates and prices. We may use financial instruments, including forwards, swaps, collars and futures, to manage the risks of certain identifiable or anticipated transactions and achieve a more predictable cash flow. Our risk management function follows established policies and procedures to monitor interest rates and natural gas and natural gas liquids marketing activities to ensure our hedging activities mitigate market risks. We do not use financial instruments for trading purposes.

In accordance with Statement 133, "Accounting for Derivative Instruments and Hedging Activities," as amended, we record derivative instruments on the balance sheet as assets and liabilities based on fair value. We estimate the fair value of derivative instruments using available market information and appropriate valuation techniques. Changes in derivative instruments' fair value are recognized in earnings unless the instrument qualifies as a hedge under Statement 133 and meets specific hedge accounting criteria. Qualifying derivative instruments' gains and losses may offset the hedged items' related results in earnings for a fair value hedge or be deferred in accumulated other comprehensive income (loss) for a cash flow hedge.

Table of Contents

INTEREST RATE RISK

General - We are subject to the risk of interest rate fluctuation in the normal course of business. We manage interest rate risk through the use of fixed-rate debt, floating-rate debt and, at times, interest-rate swaps. Fixed-rate swaps are used to reduce our risk of increased interest costs during periods of rising interest rates. Floating-rate swaps are used to convert the fixed rates of long-term borrowings into short-term variable rates.

We terminated two floating-rate swaps in 2007. The total value we received for the terminated swaps was not material. At December 31, 2007, the interest rate on all of our long-term debt was fixed.

Fair Value Hedges - See Note C of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for discussion of the impact of interest-rate swaps and net interest expense savings from terminated swaps.

Total swap savings for 2007 were $2.5 million, compared with the savings of $2.0 million in 2006. Total swap savings from terminated swaps for 2008 are expected to be $3.7 million.

COMMODITY PRICE RISK

Our Natural Gas Gathering and Processing segment is exposed to commodity price risk, primarily NGLs, as a result of receiving commodities in exchange for our services. To a lesser extent, exposures arise from the relative price differential between NGLs and natural gas, or the gross processing spread, with respect to our keep-whole processing contracts and the risk of price fluctuations and the cost of intervening transportation at various market locations. We use commodity fixed-price physical forwards and derivative contracts, including NYMEX-based futures and over-the-counter swaps, to minimize earnings volatility related to natural gas, NGL and condensate price fluctuations.

We reduce our gross processing spread exposure through a combination of physical and financial hedges. We utilize a portion of our POP equity natural gas as an offset, or natural hedge, to an equivalent portion of our keep-whole shrink requirements. This has the effect of converting our gross processing spread risk to NGL commodity price risk and we then use financial instruments to hedge the sale of NGLs.

The following table sets forth our Natural Gas Gathering and Processing segment’s hedging information for the year ending December 31, 2008.

	Year Ending December 31, 2008		
	Volumes Hedged	**Average Price Per Unit**	**Volumes Hedged**
Natural gas liquids *(Bbl/d)* (a)	8,085	$ 1.28 *($/gallon)*	70%
Condensate *(Bbl/d)* (a)	818	$ 2.15 *($/gallon)*	74%
Total liquid sales *(Bbl/d)*	8,903	$ 1.36 *($/gallon)*	71%

(a) - Hedged with fixed-price swaps.

Our commodity price risk is estimated as a hypothetical change in the price of NGLs, crude oil and natural gas at December 31, 2007, excluding the effects of hedging and assuming normal operating conditions. Our condensate sales are based on the price of crude oil. We estimate the following:

- a $0.01 per gallon increase in the composite price of NGLs would increase annual net margin by approximately $1.7 million,
- a $1.00 per barrel increase in the price of crude oil would increase annual net margin by approximately $0.5 million, and
- a $0.10 per MMBtu increase in the price of natural gas would increase annual net margin by approximately $0.3 million.

The above estimates of commodity price risk do not include any effects on demand for our services that might be caused by, or arise in conjunction with, price changes. For example, a change in the gross processing spread may cause ethane to be sold in the natural gas stream, impacting gathering and processing margins, NGL exchange margins, natural gas deliveries and NGL volumes shipped.

Table of Contents

Our Natural Gas Liquids Gathering and Fractionation segment is exposed to commodity price risk primarily as a result of NGLs in storage, spread risk associated with the relative values of the various NGL products and the relative value of NGL purchases at one location and sales at another location, known as basis risk. We have not entered into any hedges with respect to our NGL marketing activities.

Our Natural Gas Pipelines segment is exposed to commodity price risk because our intrastate and interstate natural gas pipelines collect natural gas from their customers for operations as part of their fee for services provided. When the amount of natural gas consumed in operations by these pipelines differs from the amount provided by their customers, our pipelines must buy or sell natural gas, or store or use natural gas from inventory, which exposes us to commodity price risk. At December 31, 2007, there were no hedges in place with respect to natural gas price risk from our intrastate and interstate pipeline operations.

See Note C of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for more information on our hedging activities.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors of ONEOK Partners GP, L.L.C. as General Partner of ONEOK Partners, L.P. and to the Unitholders:

In our opinion, the accompanying consolidated balance sheet and the related consolidated statement of income, partners' equity and comprehensive income and cash flows present fairly, in all material respects, the financial position of ONEOK Partners, L.P. and its subsidiaries (the Partnership) at December 31, 2007, and the results of their operations and their cash flows for the year ended December 31, 2007, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Partnership maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Partnership's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A in the Partnership's Form 10-K for the year ended December 31, 2007. Our responsibility is to express opinions on these financial statements and on the Partnership's internal control over financial reporting based on our integrated audit. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors of ONEOK Partners GP, L.L.C. as General Partner of ONEOK Partners, L.P. and to the Unitholders:

We have audited the accompanying consolidated balance sheet of ONEOK Partners, L.P. and subsidiaries (the Partnership) (formerly Northern Border Partners, L.P.) as of December 31, 2006, and the related consolidated statements of income, cash flows, and changes in partners' equity and comprehensive income for each of the years in the two-year period ended December 31, 2006. These consolidated financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ONEOK Partners, L.P. and subsidiaries as of December 31, 2006, and the results of their operations and their cash flows for each of the years in the two-year period ended December 31, 2006, in conformity with U.S. generally accepted accounting principles.

ONEOK PARTNERS, L.P. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

A. SUMMARY OF ACCOUNTING POLICIES

Nature of Operations - ONEOK Partners, L.P. is a publicly traded Delaware limited partnership that was formed in 1993. Our common units are listed on the NYSE under the trading symbol "OKS." We own and manage natural gas gathering, processing, storage and interstate and intrastate pipeline assets and natural gas liquids gathering and distribution pipelines, storage and fractionators, connecting much of the natural gas and NGL supply in the Mid-Continent and Gulf Coast regions with key market centers in Conway, Kansas, Mont Belvieu, Texas, and Chicago, Illinois. We also own a 50 percent interest in a leading transporter of natural gas imported from Canada into the United States.

Critical Accounting Policies

The following is a summary of our most critical accounting policies, which are defined as those policies most important to the portrayal of our financial condition and results of operations and requiring management's most difficult, subjective, or complex judgment, particularly because of the need to make estimates concerning the impact of inherently uncertain matters. We have discussed the development and selection of our critical accounting policies and estimates with the Audit Committee of our Board of Directors.

Impairment of Long-Lived Assets, Goodwill and Intangible Assets - We assess our long-lived assets for impairment based on Statement 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." A long-lived asset is tested for impairment whenever events or changes in circumstances indicate that its carrying amount may exceed its fair value. Fair values are based on the sum of the undiscounted future cash flows expected to result from the use and eventual disposition of the assets.

We assess our goodwill and intangible assets for impairment at least annually based on Statement 142, "Goodwill and Other Intangible Assets." An initial assessment is made by comparing the fair value of the operations with goodwill, as determined in accordance with Statement 142, to the book value of each reporting unit. If the fair value is less than the book value, an impairment is indicated, and we must perform a second test to measure the amount of the impairment. In the second test, we calculate the implied fair value of the goodwill by deducting the fair value of all tangible and intangible net assets of the operations with goodwill from the fair value determined in step one of the assessment. If the carrying value of the goodwill exceeds this calculated implied fair value of the goodwill, we will record an impairment charge. See Note D for more discussion of goodwill.

Intangible assets with a finite useful life are amortized over their estimated useful life, while intangible assets with an indefinite useful life are not amortized. All intangible assets are subject to impairment testing.

For the investments we account for under the equity method, the premium or excess cost over underlying fair value of net assets is referred to as equity method goodwill and under Statement 142, is not subject to amortization but rather to impairment testing pursuant to APB Opinion No. 18, "The Equity Method of Accounting for Investments in Common Stock." The impairment test under APB Opinion No. 18 considers whether the fair value of the equity investment as a whole, not the underlying net assets, has declined and whether that decline is other than temporary. Therefore, we periodically reevaluate the amount at which we carry the excess of cost over fair value of net assets accounted for under the equity method to determine whether current events or circumstances warrant adjustments to our carrying value in accordance with APB Opinion No. 18.

Derivatives and Risk Management - We utilize financial instruments to reduce our market risk exposure to interest rate and commodity price fluctuations and achieve more predictable cash flows. We account for derivative instruments utilized in connection with these activities and services under the fair value basis of accounting in accordance with Statement 133, "Accounting for Derivative Instruments and Hedging Activities," as amended.

Under Statement 133, entities are required to record derivative instruments at fair value. The fair value of a derivative instrument is determined by commodity exchange prices, over-the-counter quotes, volatility, time value, counterparty credit and the potential impact on market prices of liquidating positions in an orderly manner over a reasonable period of time under current market conditions.

Market value changes result in a change in the fair value of our derivative instruments. The accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and, if so, the nature of the risk being hedged and how we will determine if the hedging instrument is effective. If the

Table of Contents

derivative instrument does not qualify or is not designated as part of a hedging relationship, then we account for changes in fair value of the derivative in earnings as they occur. Commodity price volatility may have a significant impact on the gain or loss in a given period.

To minimize the risk of fluctuations in natural gas, NGLs and condensate prices, we periodically enter into futures, collars or swap transactions in order to hedge anticipated purchases and sales of natural gas, NGLs, condensate, and fuel requirements. Interest rate swaps are also used to manage interest rate risk. Under certain conditions, we designate these derivative instruments as a hedge of exposure to changes in fair values or cash flow. For hedges of exposure to changes in cash flow, the effective portion of the gain or loss on the derivative instrument is reported initially as a component of accumulated other comprehensive income (loss) and subsequently recorded to earnings when the forecasted transaction affects earnings. Any ineffectiveness of designated hedges is reported in earnings in the period the ineffectiveness occurs. For hedges of exposure to changes in fair value, the gain or loss on the derivative instrument is recognized in earnings during the period of change together with the offsetting gain or loss on the hedged item attributable to the risk being hedged.

Upon election, many of our purchase and sale agreements that otherwise would be required to follow derivative accounting qualify as normal purchases and normal sales under Statement 133 and are therefore exempt from fair value accounting treatment.

See Note C for more discussion of derivatives and risk management activities.

Contingencies - Our accounting for contingencies covers a variety of business activities, including contingencies for legal and environmental exposures. We accrue these contingencies when our assessments indicate that it is probable that a liability has been incurred or an asset will not be recovered and an amount can be reasonably estimated in accordance with Statement 5, "Accounting for Contingencies." We base our estimates on currently available facts and our estimates of the ultimate outcome or resolution. Actual results may differ from our estimates resulting in an impact, positive or negative, on earnings. See Note H for additional discussion of contingencies.

Significant Accounting Policies

Consolidation - Our consolidated financial statements include the assets, liabilities and results of operations for our majority-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation. We account for our investments that we do not control by the equity method of accounting. Under this method, an investment is carried at its acquisition cost, plus the equity in undistributed earnings or losses since acquisition. Minority interest for 2006 primarily represents the 66-2/3 percent interest in Guardian Pipeline that we did not own until we acquired these interests in April 2006. Minority interest for 2005 represents the 30 percent interest in Northern Border Pipeline owned by TC PipeLines when Northern Border Pipeline's results were consolidated.

Use of Estimates - The preparation of our consolidated financial statements and related disclosures in accordance with GAAP requires us to make estimates and assumptions with respect to values or conditions that cannot be known with certainty that affect the reported amount of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements. These estimates and assumptions also affect the reported amounts of revenue and expenses during the reporting period. Items which may be estimated include, but are not limited to, the economic useful life of assets, fair value of assets and liabilities, provisions for uncollectible accounts receivable, unbilled revenues and cost of goods sold, expenses for services received but for which no invoice has been received, the results of litigation and various other recorded or disclosed amounts.

We evaluate these estimates on an ongoing basis using historical experience, consultation with experts and other methods we consider reasonable based on the particular circumstances. Nevertheless, actual results may differ significantly from the estimates. Any effects on our financial position or results of operations from revisions to these estimates are recorded in the period when the facts that give rise to the revision become known.

Regulation - Our intrastate natural gas transmission pipelines are subject to the rate regulation and accounting requirements of the OCC, KCC and RRC. Our interstate natural gas and natural gas liquids pipelines are subject to regulation by the FERC. Accordingly, portions of our Natural Gas Pipelines segment and Natural Gas Liquids Pipelines segment follow the accounting and reporting guidance contained in Statement 71, "Accounting for the Effects of Certain Types of Regulation." During the rate-making process, regulatory authorities may allow us to defer recognition of certain costs and permit recovery of the amounts through rates over time as opposed to expensing such costs as incurred. This allows us to stabilize rates over time rather than passing such costs on to the customer for immediate recovery. Actions by regulatory authorities could have an effect on the amount recovered from rate payers. Any difference in the amount recoverable and the amount deferred is

Table of Contents

recorded as income or expense at the time of the regulatory action. If all or a portion of the regulated operations are no longer subject to the provisions of Statement 71, a write-off of regulatory assets and costs not recovered may be required.

At December 31, 2007 and 2006, we recorded regulatory assets of approximately $6.8 million and $9.2 million, respectively, which are currently being recovered or are expected to be recovered from our customers. Regulatory assets are being recovered as a result of approved rate proceedings over varying time periods up to 40 years. These assets are reflected in other assets on our Consolidated Balance Sheets.

Asset Retirement Obligations - Statement 143, "Accounting for Asset Retirement Obligations," applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development and/or normal use of the asset. Statement 143 requires that we recognize the fair value of a liability for an asset retirement obligation in the period when it is incurred if a reasonable estimate of the fair value can be made. The fair value of the liability is added to the carrying amount of the associated asset and this additional carrying amount is depreciated over the life of the asset. The liability is accreted at the end of each period through charges to operating expense. If the obligation is settled for an amount other than the carrying amount of the liability, we will recognize a gain or loss on settlement. The depreciation and amortization expense is immaterial to our consolidated financial statements.

In accordance with long-standing regulatory treatment, we collect through rates the estimated costs of removal on certain regulated properties through depreciation expense, with a corresponding credit to accumulated depreciation and amortization. These removal costs are non-legal obligations as defined by Statement 143. However, these non-legal asset removal obligations are accounted for as a regulatory liability under Statement 71. Historically, the regulatory authorities that have jurisdiction over our regulated operations have not required us to track this amount; rather these costs are addressed prospectively as depreciation rates and are set in each general rate order. We have made an estimate of our removal cost liability using current rates since the last general rate order in each of our jurisdictions. However, significant uncertainty exists regarding the ultimate determination of this liability pending, among other issues, clarification of regulatory intent. We continue to monitor the regulatory authorities and the liability may be adjusted as more information is obtained.

Cash and Cash Equivalents - Cash equivalents consist of highly liquid investments, which are readily convertible into cash and have original maturities of three months or less.

Revenue Recognition - Our operating segments recognize revenue when services are rendered or product is delivered. Our Natural Gas Gathering and Processing segment records operating revenue when gas is processed in or transported through company facilities. Our Natural Gas Liquids Gathering and Fractionation segment records operating revenues based upon contracted services and actual volumes exchanged or stored under service agreements in the period services are provided. Operating revenue for our Natural Gas Pipelines segment and Natural Gas Liquids Pipelines segment is recognized based upon contracted capacity and contracted volumes transported and stored under service agreements in the period services are provided.

Property - The following table sets forth our property, by segment, for the periods presented.

	December 31, 2007	December 31, 2006
	(Thousands of dollars)	
Non-Regulated		
Natural Gas Gathering and Processing	**$ 1,227,475**	$ 1,133,614
Natural Gas Pipelines	**162,390**	162,636
Natural Gas Liquids Gathering and Fractionation	**672,047**	547,495
Other	**50,482**	50,784
Regulated		
Natural Gas Pipelines	**1,184,112**	1,040,125
Natural Gas Liquids Pipelines	**1,139,865**	489,798
Property, plant and equipment	**4,436,371**	3,424,452
Accumulated depreciation and amortization	**776,185**	660,804
Net property, plant and equipment	**$ 3,660,186**	$ 2,763,648

Gas processing plants, natural gas liquids fractionation plants and all other properties are stated at cost. Gas processing plants, natural gas liquids fractionation plants and all other property and equipment are depreciated using the straight-line method over the estimated useful life.

Table of Contents

Generally, we apply composite depreciation rates to functional groups of property having similar economic circumstances.

At December 31, 2007 and 2006, property, plant and equipment on our Consolidated Balance Sheets included construction work in progress of $859.8 million and $100.5 million, respectively, that had not yet been put in service and therefore was not being depreciated.

Certain maintenance and repairs are charged directly to expense. Gains and losses from sales or transfers of an entire operating unit or system are recognized in income.

We capitalize interest expense during the construction or upgrade of qualifying assets. Interest expense capitalized in 2007, 2006 and 2005 was $14.3 million, $1.2 million and $0.8 million, respectively. Capitalized interest is recorded as a reduction to interest expense.

Regulated properties are stated at cost, which includes the equity portion of AFUDC. The equity portion of AFUDC represents the capitalization of the estimated average cost of equity used during the construction of major projects and is recorded as a credit to the allowance for equity funds used during construction. Generally, the cost of property retired or sold, plus removal costs, less salvage, is charged to accumulated depreciation.

The average depreciation rates for our regulated property are set forth in the following table for the periods indicated.

	Years Ended December 31,		
Regulated Property	**2007**	**2006**	**2005**
Natural Gas Pipelines	**2.4%**	2.4%	2.7%
Natural Gas Liquids Pipelines	**2.5%**	2.6%	2.7%

Income Taxes - We are not a taxable entity for federal income tax purposes. As such, we do not directly pay federal income tax. Our taxable income or loss, which may vary substantially from the net income or loss reported in our Consolidated Statements of Income, is included in the federal income tax returns of each partner. The aggregate difference in the basis of our net assets for financial and income tax purposes cannot be readily determined, as we do not have access to all information about each partner's tax attributes related to us.

Our corporate subsidiaries are required to pay federal and state income taxes. Income taxes are accounted for using the provisions of Statement 109, "Accounting for Income Taxes." Deferred income taxes are provided for the difference between the financial statement and income tax basis of assets and liabilities and carryforward items based on income tax laws and rates existing at the time the temporary differences are expected to reverse. Except for the companies whose accounting policies conform to Statement 71, the effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date of the rate change. For the companies whose accounting policies conform to Statement 71, the effect on deferred tax assets and liabilities of a change in tax rates is recorded as regulatory assets and regulatory liabilities in the period that includes the enactment date.

In June 2006, the FASB issued FIN 48, "Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement No. 109," which is effective for our year beginning January 1, 2007. This interpretation was issued to clarify the accounting for uncertainty in income taxes recognized in the financial statements by prescribing a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 requires the recognition of penalties and interest on any unrecognized tax benefits. Our policy is to reflect penalties and interest as part of income tax expense as they become applicable. During 2007, we had no tax positions that would require establishment of a reserve under FIN 48.

We file numerous consolidated and separate income tax returns in the United States federal jurisdiction and in many state jurisdictions. We also file returns in Canada. No returns are currently under audit, and no extensions of statute of limitations have been requested or granted.

Environmental Expenditures - We accrue for losses associated with environmental remediation obligations when such losses are probable and reasonably estimable. Accruals for estimated losses from environmental remediation obligations generally are recognized no later than completion of the remediation feasibility study. Such accruals are adjusted as further information becomes available or as circumstances change. Recoveries of environmental remediation costs from other parties are recorded as assets when their receipt is deemed probable.

Table of Contents

Inventory, Natural Gas Imbalances and Commodity Exchanges - Inventory is valued at the lower of cost or market. The values of current natural gas and NGLs in storage are determined using the lower of cost or market method. Noncurrent natural gas is classified as property and valued at cost. Materials and supplies are valued at average cost. Natural gas imbalances and NGL exchanges are valued at market or their contractually stipulated rate. Imbalances and NGL exchanges are settled in cash or made up in kind, subject to the terms of the pipelines' tariffs or by agreement.

Other

Fair Value Measurements - In September 2006, the FASB issued Statement 157, "Fair Value Measurements," which establishes a framework for measuring fair value and requires additional disclosures about fair value measurements. Beginning January 1, 2008, we partially applied Statement 157 as allowed by FASB Staff Position (FSP) 157-2, which delayed the effective date of Statement 157 for nonfinancial assets and liabilities. As of January 1, 2008, we have applied the provisions of Statement 157 to our financial instruments and the impact was not material. Under FSP 157-2, we will be required to apply Statement 157 to our nonfinancial assets and liabilities beginning January 1, 2009. We are currently reviewing the applicability of Statement 157 to our nonfinancial assets and liabilities as well as the potential impact on our consolidated financial statements.

In February 2007, the FASB issued Statement 159, "The Fair Value Option for Financial Assets and Financial Liabilities," which allows companies to elect to measure specified financial assets and liabilities, firm commitments, and nonfinancial warranty and insurance contracts at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings each reporting period. At January 1, 2008, we did not elect the fair value option under Statement 159 and therefore there was no impact to our consolidated financial statements.

Business Combinations - In December 2007, the FASB issued Statement 141R, "Business Combinations," which will require most identifiable assets, liabilities, noncontrolling interest (previously referred to as minority interests) and goodwill acquired in a business combination to be recorded at full fair value. Statement 141R is effective for our year beginning January 1, 2009, and will be applied prospectively. We are currently reviewing the applicability of Statement 141R to our operations and its potential impact on our consolidated financial statements.

Noncontrolling Interests - In December 2007, the FASB issued Statement 160, "Noncontrolling Interest in Consolidated Financial Statements - an amendment to ARB No. 51," which requires noncontrolling interests (previously referred to as minority interests) to be reported as a component of equity. Statement 160 is effective for our year beginning January 1, 2009, and will require retroactive adoption of the presentation and disclosure requirements for existing minority interests. We are currently reviewing the applicability of Statement 160 to our operations and its potential impact on our consolidated financial statements.

Reclassifications - Certain amounts in our consolidated financial statements have been reclassified to conform to the 2007 presentation. These reclassifications did not impact previously reported net income or partners' equity.

B. ACQUISITIONS AND DIVESTITURES

Acquisition of NGL Pipeline - In October 2007, we completed the acquisition of an interstate natural gas liquids and refined petroleum products pipeline system and related assets from a subsidiary of Kinder Morgan Energy Partners, L.P. (Kinder Morgan) for approximately $300 million, before working capital adjustments. The system extends from Bushton and Conway, Kansas, to Chicago, Illinois, and transports, stores and delivers a full range of NGL and refined petroleum products. The FERC-regulated system spans 1,627 miles and has a capacity to transport up to 134 MBbl/d. The transaction includes approximately 978 MBbl of owned storage capacity, eight NGL terminals and a 50 percent ownership of Heartland. ConocoPhillips owns the other 50 percent of Heartland and is the managing partner of the Heartland joint venture, which consists primarily of three refined petroleum products terminals and connecting pipelines. Financing for this transaction came from the proceeds of our September 2007 issuance of $600 million 6.85 percent Senior Notes due 2037 (the 2037 Notes). See Note G for a discussion on the 2037 Notes. The working capital settlement has not been finalized; however, we do not expect material adjustments.

Overland Pass Pipeline Company - In May 2006, we entered into an agreement with a subsidiary of The Williams Companies, Inc. (Williams) to form a joint venture called Overland Pass Pipeline Company. Overland Pass Pipeline Company is building a 760-mile natural gas liquids pipeline from Opal, Wyoming, to the Mid-Continent natural gas liquids market center in Conway, Kansas. The pipeline is designed to transport approximately 110 MBbl/d of unfractionated NGLs, which can be increased to approximately 150 MBbl/d with additional pump facilities. During 2006, we paid $11.6 million to Williams for acquisition of our interest in the joint venture and for reimbursement of initial capital expenditures. As the 99 percent owner of the joint venture, we will manage the construction project, advance all costs associated with construction

Table of Contents

and operate the pipeline. Within two years of the pipeline becoming operational, Williams will have the option to increase its ownership up to 50 percent by reimbursing us for its proportionate share of all construction costs. If Williams exercises its option to increase its ownership to the full 50 percent, Williams would have the option to become operator. This project has received the required approvals of various state and federal regulatory authorities, and we are constructing the pipeline with start-up currently scheduled for the second quarter of 2008.

As part of a long-term agreement, Williams dedicated its NGL production from two of its natural gas processing plants in Wyoming to the joint-venture company. We will provide downstream fractionation, storage and transportation services to Williams. The pipeline project is currently estimated to cost approximately $535 million, excluding AFUDC. In addition, we are investing approximately $216 million, excluding AFUDC, to expand our existing fractionation and storage capabilities and the capacity of our natural gas liquids distribution pipelines. Financing for both projects may include a combination of short- or long-term debt or equity.

The ONEOK Transactions - In April 2006, we completed the acquisition and consolidated certain companies comprising ONEOK's former gathering and processing, natural gas liquids, and pipelines and storage segments (collectively, the ONEOK Energy Assets) in a series of transactions (collectively, the ONEOK Transactions). As part of the ONEOK Transactions, ONEOK acquired ONEOK NB, formerly known as Northwest Border Pipeline Company, an affiliate of TransCanada that held a 0.35 percent general partner interest in us, under a Purchase and Sale Agreement between an affiliate of ONEOK and an affiliate of TransCanada. As a result, ONEOK owns our entire 2 percent general partner interest and controls us.

We acquired the ONEOK Energy Assets for approximately $3 billion, including $1.35 billion in cash, before adjustments, and approximately 36.5 million Class B limited partner units. The Class B limited partner units and the related general partner interest contribution were valued at approximately $1.65 billion. ONEOK now owns approximately 37.0 million of our limited partner units, which, when combined with its general partner interest, increased its total interest in us to approximately 45.7 percent. We used $1.05 billion drawn under our $1.1 billion, 364-day credit agreement (the Bridge Facility), coupled with the proceeds from the sale of a 20 percent partnership interest in Northern Border Pipeline, to finance the cash portion of the transaction.

In June 2005, the FASB ratified the consensus reached in EITF Issue No. 04-5, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights" (EITF 04-5). EITF 04-5 presumes that a general partner controls a limited partnership and therefore should consolidate the partnership in the financial statements of the general partner. Our Partnership Agreement provides for the right to replace the general partner by a vote of 66-$^{2}/_{3}$ percent of the outstanding units, excluding units held by the general partner and its affiliates. Under the guidance in EITF 04-5, ONEOK is deemed to have control for accounting purposes. ONEOK elected to use the prospective method and began to consolidate our operations in their consolidated financial statements as of January 1, 2006. As ONEOK is deemed to control us under the requirements of EITF 04-5, the ONEOK Transactions were accounted for as a transaction between entities under common control and these transactions were excluded from the accounting prescribed by Statement 141, "Business Combinations." Accordingly, ONEOK's historical cost basis in the ONEOK Energy Assets was transferred to us in a manner similar to a pooling of interests. The difference between the historical cost basis of the net assets acquired of $2.7 billion and the cash paid was assigned to the value of the Class B limited partner units issued to ONEOK and its general partner interest in us. These assets and their related operations are included in our consolidated financial statements retroactive to January 1, 2006.

Since the ONEOK Transactions were not completed until April 2006, the income and cash flow from the ONEOK Energy Assets for the first quarter of 2006 were retained by ONEOK. In our 2006 Consolidated Statement of Cash Flows, we reported cash flow retained by ONEOK of $177.5 million, which represents the cash flows generated from these companies while they were owned by ONEOK.

Table of Contents

The following table shows the impact to our Consolidated Statements of Income for the ONEOK Energy Assets prior to our acquisition.

ONEOK Energy Assets		**Three Months Ended March 31, 2006**
		(Thousands of dollars)
Operating revenue	$	1,162,571
Cost of sales and fuel		1,013,851
Net margin		148,720
Operating expenses:		
Operations and maintenance		47,530
Depreciation and amortization		19,277
Taxes other than income		4,407
Total operating expenses		71,214
Operating income		77,506
Interest expense		21,281
Other income, net		1,760
Income from continuing operations before income taxes		57,985
Income taxes		22,167
Net income	$	35,818
Limited partners’ interest in net income:		
Net income	$	35,818
General partner interest in net income		(35,818)
Limited partners’ interest in net income	$	-

Prior to the acquisition, the ONEOK Energy Assets were included in the consolidated state and federal income tax returns of ONEOK and, accordingly, current taxes payable were allocated to the ONEOK Energy Assets based on ONEOK’s effective tax rate. Income tax liabilities and provisions for income tax expense for the ONEOK Energy Assets were calculated on a stand-alone basis. Our Consolidated Statements of Income for 2006 includes income tax expense recorded for the ONEOK Energy Assets of $22.2 million for the first quarter of 2006. In conjunction with the ONEOK Transactions, all income tax liabilities of ONEOK Energy Assets at the time of the ONEOK Transactions were retained by ONEOK.

Income from the ONEOK Energy Assets for the first quarter of 2006 also reflects interest expense of $21.3 million, which represents interest charged on long-term debt owed to ONEOK. The interest rate on the debt was calculated periodically based upon ONEOK’s weighted average cost of debt. This debt was retained by ONEOK as part of the ONEOK Transactions.

Under the terms of the ONEOK Transactions, we recorded a $72.6 million purchase price adjustment related to a finalized working capital settlement. The working capital settlement is reflected as an increase to the value of the Class B units and was approved by our Audit Committee.

The unaudited pro forma information in the table below presents a summary of our results of operations as if the acquisition of the ONEOK Energy Assets had occurred at the beginning of the periods presented. The results do not necessarily reflect the results that would have been obtained if the acquisition of the ONEOK Energy Assets had actually occurred on the dates indicated or results that may be expected in the future.

		Pro Forma Year Ended December 31, 2005
		(Thousands of dollars)
Revenue	$	4,102,335
Income from continuing operations	$	314,471
Net income per unit	$	3.51

The units issued to ONEOK were the newly created Class B limited partner units. As of April 7, 2007, the Class B limited partner units are no longer subordinated to distributions on our common units and generally have the same voting rights as our common units.

Table of Contents

At a special meeting of the holders of our common units held March 29, 2007, the unitholders approved a proposal to permit the conversion of all or a portion of the Class B limited partner units issued in the ONEOK Transactions into common units on a one-for-one basis at the option of the Class B unitholder. The March 29, 2007, special meeting was adjourned to May 10, 2007, to allow unitholders additional time to vote on an additional proposal to approve amendments to our Partnership Agreement, which, had the amendments been approved, would have granted voting rights for units held by our general partner and its affiliates if a vote was held to remove our general partner and would have required fair market value compensation for the general partner interest if the general partner was removed. While a majority of our common unitholders voted in favor of the proposed amendments to our Partnership Agreement at the reconvened meeting of our common unitholders held May 10, 2007, the proposed amendments were not approved by the required two-thirds affirmative vote of our outstanding units, excluding the common units and Class B limited partner units held by ONEOK and its affiliates. As a result, effective April 7, 2007, the Class B limited partner units are entitled to receive increased quarterly distributions equal to 110 percent of the distributions paid with respect to our common units.

On June 21, 2007, ONEOK, as the sole holder of our Class B limited partner units, waived its right to receive the increased quarterly distributions on the Class B units for the period of April 7, 2007, through December 31, 2007, and continuing thereafter until ONEOK gives us no less than 90 days advance notice that it has withdrawn its waiver. Any such withdrawal of the waiver will be effective with respect to any distribution on the Class B units declared or paid on or after the 90 days following delivery of the notice.

In addition, since the proposed amendments to our Partnership Agreement were not approved by our common unitholders, if our common unitholders vote at any time to remove ONEOK or its affiliates as our general partner, quarterly distributions payable on the Class B limited partner units would increase to 123.5 percent of the distributions payable with respect to the common units, and distributions payable upon liquidation of the Class B limited partner units would increase to 123.5 percent of the distributions payable with respect to the common units.

Disposition of 20 Percent Partnership Interest in Northern Border Pipeline - In April 2006, we completed the sale of a 20 percent partnership interest in Northern Border Pipeline to TC PipeLines for approximately $297 million to help finance the acquisition of the ONEOK Energy Assets. We recorded a gain on the sale of approximately $113.9 million in the second quarter of 2006. We and TC PipeLines each now own a 50 percent interest in Northern Border Pipeline, and an affiliate of TransCanada became the operator of the pipeline in April 2007. Under Statement 94, "Consolidation of All Majority Owned Subsidiaries," a majority-owned subsidiary is not consolidated if control is likely to be temporary or if it does not rest with the majority owner. Neither we nor TC PipeLines has control of Northern Border Pipeline, as control is shared equally through Northern Border Pipeline's Management Committee. Our interest in Northern Border Pipeline has been accounted for as an investment under the equity method applied on a retroactive basis to January 1, 2006.

Acquisition of Guardian Pipeline Interests - In April 2006, we acquired the 66- $^{2}/_{3}$ percent interest in Guardian Pipeline not previously owned by us for approximately $77 million, increasing our ownership interest to 100 percent. We used borrowings from our credit facility to fund the acquisition of the additional interest in Guardian Pipeline. Following the completion of the transaction, we consolidated Guardian Pipeline in our consolidated financial statements. This change was accounted for on a retroactive basis to January 1, 2006.

C. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

We utilize financial instruments to reduce our market risk exposure to interest rate and commodity price fluctuations, and to achieve more predictable cash flows. We follow established policies and procedures to assess risk and approve, monitor and report our financial instrument activities. We do not use these instruments for trading purposes.

Cash Flow Hedges - Our Natural Gas Gathering and Processing segment periodically enters into commodity derivative contracts and fixed-price physical contracts. Our Natural Gas Gathering and Processing segment primarily utilizes NYMEX-based futures, collars and over-the-counter swaps, which are designated as cash flow hedges, to hedge its exposure to volatility in the price of natural gas, NGLs and condensate and the gross processing spread. At December 31, 2007, the accompanying Consolidated Balance Sheet reflected an unrealized loss of $16.4 million in accumulated other comprehensive income (loss), with a corresponding offset in derivative financial instrument assets and liabilities, all of which will be recognized over the next 12 months. Net gains and losses related to the ineffective portion of our hedges are reclassified out of accumulated other comprehensive income (loss) to operating revenues in the period the ineffectiveness occurs. Ineffectiveness related to these cash flow hedges was not material in 2007 or 2005. Ineffectiveness related to these cash flow hedges resulted in a gain of approximately $4.5 million for 2006. There were no gains or losses during 2007, 2006 or 2005 due to the discontinuance of cash flow hedge treatment.

Table of Contents

Fair Value Hedges - In 2007 and prior years we terminated various interest rate swap agreements. The net savings from the termination of these swaps is being recognized in interest expense over the terms of the debt instruments originally hedged. Net interest expense savings for 2007 for all terminated swaps was $3.7 million, and the remaining net savings for all terminated swaps will be recognized over the following periods.

	(Millions of dollars)	
2008	$	3.7
2009		3.7
2010		3.7
2011		0.9
2012		-
Thereafter		-

At December 31, 2007, none of the interest on our fixed-rate debt was swapped to floating using interest-rate swaps.

D. GOODWILL AND INTANGIBLE ASSETS

Goodwill

Activity - There was no change in the carrying amounts of goodwill during 2007. The following table reflects the changes in the carrying amount of goodwill for the period indicated.

	Balance December 31, 2005	Additions	Adjustments	Balance December 31, 2006
	(Thousands of dollars)			
Natural Gas Gathering and Processing	$ 75,532	$ 14,505	$ -	$ 90,037
Natural Gas Pipelines	68,872	60,125	-	128,997
Natural Gas Liquids Gathering and Fractionation	-	175,566	-	175,566
Other	8,378	-	(8,378)	-
Goodwill	$ 152,782	$ 250,196	$ (8,378)	$ 394,600

The acquisition of the ONEOK Energy Assets resulted in $214.8 million of additional goodwill on our 2006 Consolidated Balance Sheet.

Our acquisition of the 66- 2/3 percent interest in Guardian Pipeline not previously owned by us resulted in the recognition of $5.7 million of additional goodwill and reclassification of $1.7 million to goodwill, which had been previously included in our investment in unconsolidated affiliates.

Goodwill increased by approximately $27.9 million in 2006 relating to the 2003 acquisition of Viking Gas Transmission. In our accounting for the acquisition, we had allocated the entire purchase price to the fair value of the tangible assets including plant in service. Since that date, we have determined that the amount of purchase price representing a premium over Viking Gas Transmission's historic rate base is not being recovered in its rates and, accordingly, should be accounted for as goodwill under Statement 142.

See Black Mesa section of this Note for discussion of goodwill impairment.

Equity Method Goodwill - For the investments we account for under the equity method, the premium or excess cost over underlying fair value of net assets is referred to as equity method goodwill. Investment in unconsolidated affiliates on our accompanying Consolidated Balance Sheets includes equity method goodwill of $185.6 million as of December 31, 2007 and 2006.

Impairment Test - We apply the provisions of Statement 142, "Goodwill and Other Intangible Assets," and perform our annual impairment test on July 1. There were no impairment charges resulting from the July 1, 2007, impairment testing, and no events indicating an impairment have occurred subsequent to that date.

Black Mesa - Black Mesa, which is included in our Other segment, includes a pipeline that was designed to transport crushed coal suspended in water along 273 miles of pipeline that originates at a coal mine in Kayenta, Arizona, and terminates at Mohave Generating Station (Mohave) in Laughlin, Nevada. The coal slurry pipeline was the sole source of fuel for Mohave

Table of Contents

and was fully contracted to Peabody Western Coal until December 31, 2005. The water used by the coal slurry pipeline was supplied from an aquifer in the Navajo Nation and Hopi Tribe joint-use area until December 31, 2005.

Under a consent decree, Mohave agreed to install pollution control equipment by December 2005. However, due to the uncertainty surrounding ongoing water and coal supply negotiations, Southern California Edison Company (SCE), a 56 percent owner of Mohave, filed a petition before the California Public Utilities Commission (CPUC) requesting that they either recognize the end of Mohave's coal-fired operations on December 31, 2005, or authorize expenditures for pollution control activities required for future operation. In December 2004, the CPUC authorized SCE to make the necessary expenditures for critical path investments and directed interested parties to continue working toward resolution of essential water and coal supply issues.

On December 31, 2005, Black Mesa's transportation contract with the coal supplier of Mohave expired, and our coal slurry pipeline operations were shut down. In June 2006, SCE completed a comprehensive study of the water source, coal supply and transportation issues, and announced that it would no longer pursue the resumption of plant operations. In February 2007, another Mohave co-owner, Salt River Project, announced it was ending its efforts to return the plant to service. We plan to either divest the Black Mesa pipeline or commence decommissioning of the pipeline during 2008.

During 2006, we reassessed our coal slurry pipeline operation as a result of the developments described above. We concluded that the likelihood of Black Mesa resuming operations was significantly reduced, and a goodwill and asset impairment of $8.4 million and $3.6 million, respectively, was recorded as depreciation and amortization. The reduction to net income after income taxes was $10.6 million.

Intangible Assets

Our intangible assets primarily relate to contracts acquired through the acquisition of the natural gas liquids businesses from ONEOK and are being amortized over an aggregate weighted-average period of 40 years. Amortization expense for both 2007 and 2006 was $7.7 million, and the aggregate amortization expense for each of the next five years is estimated to be approximately $7.7 million. The following tables reflect the gross carrying amount and accumulated amortization of intangible assets for the periods presented.

	December 31, 2007		
	Gross Intangible Assets	**Accumulated Amortization**	**Net Intangible Assets**
	(Thousands of dollars)		
Natural Gas Liquids Gathering and Fractionation	**$ 292,000**	**$ (18,249)**	**$ 273,751**
Natural Gas Liquids Pipelines	**14,650**	**(917)**	**13,733**
Intangible Assets	**$ 306,650**	**$ (19,166)**	**$ 287,484**

	December 31, 2006		
	Gross Intangible Assets	**Accumulated Amortization**	**Net Intangible Assets**
	(Thousands of dollars)		
Natural Gas Liquids Gathering and Fractionation	$ 292,000	$ (10,949)	$ 281,051
Natural Gas Liquids Pipelines	14,650	(550)	14,100
Intangible Assets	$ 306,650	$ (11,499)	$ 295,151

E. PARTNERS' EQUITY

At December 31, 2007, we had 46,397,214 common units and 36,494,126 Class B Units issued and outstanding. ONEOK owns all of the Class B Units, approximately 500,000 common units, and the 2 percent general partner interest in us. The Class B Units, common units and the general partner interest held by ONEOK and its affiliates together constitute a 45.7 percent interest in us.

Under our Partnership Agreement, in conjunction with the issuance of additional common units, our general partner is required to make equity contributions to us in order to maintain a 2 percent general partner interest.

Under our Partnership Agreement, we make distributions to our partners with respect to each calendar quarter in an amount equal to 100 percent of our available cash within 45 days following the end of each quarter. Available cash generally consists of all our cash receipts adjusted for our cash disbursements and net changes to cash reserves. Available cash will

Table of Contents

generally be distributed 98 percent to limited partners and 2 percent to our general partner. As an incentive, the general partner's percentage interest in quarterly distributions is increased after certain specified target levels are met. Under the incentive distribution provisions, the general partner receives:

- 15 percent of amounts distributed in excess of $0.605 per common unit,
- 25 percent of amounts distributed in excess of $0.715 per unit, and
- 50 percent of amounts distributed in excess of $0.935 per unit.

Our income is allocated to the general partner and the limited partners in accordance with their respective partnership percentages, after giving effect to any priority income allocations for incentive distributions that are allocated to the general partner. For the years ended December 31, 2007, 2006 and 2005, incentive distributions allocated to the general partners totaled $50.6 million, $31.6 million and $8.0 million, respectively.

F. CREDIT FACILITIES

2007 Partnership Credit Agreement - In March 2007, we amended and restated our revolving credit facility agreement (2007 Partnership Credit Agreement) with several banks and other financial institutions and lenders in the following principal ways: (i) revised the pricing, (ii) extended the maturity by one year to March 2012, (iii) eliminated the interest coverage ratio covenant, (iv) increased the permitted ratio of indebtedness to EBITDA to 5 to 1 (from 4.75 to 1), (v) increased the swingline sub-facility commitments from $15 million to $50 million and (vi) changed the permitted amount of subsidiary indebtedness from $35 million to 10 percent of our consolidated indebtedness. The interest rates applicable to extensions of credit under this agreement are based, at our election, on either (i) the higher of prime or one-half of one percent above the Federal Funds Rate, which is the rate that banks charge each other for the overnight borrowing of funds, or (ii) the Eurodollar rate plus a set number of basis points, depending on our current long-term unsecured debt ratings.

In July 2007, we exercised the accordion feature of our 2007 Partnership Credit Agreement to increase the commitment amounts by $250 million to a total of $1.0 billion.

In December 2006, we amended our 2007 Partnership Credit Agreement (previously referred to as the 2006 Partnership Credit Agreement). This agreement now provides for the exclusion of hybrid securities from debt in an amount not to exceed 15 percent of total capitalization when calculating the leverage ratio. Material projects may now be approved by the administrative agent as opposed to requiring approval from 50 percent of the lenders. The methodology of making pro forma adjustments to EBITDA (net income before interest expense, income taxes and depreciation and amortization) that is used in the calculation of the financial covenants with respect to approved material projects was also amended. The amendment excluded the Overland Pass Pipeline Company agreement from the covenant that limits our ability to enter into agreements that restrict our ability to grant liens to the lenders under the 2007 Partnership Credit Agreement.

Under the 2007 Partnership Credit Agreement, we are required to comply with certain financial, operational and legal covenants. Among other things, these requirements include maintaining a ratio of indebtedness to adjusted EBITDA (EBITDA adjusted for any approved capital projects) of no more than 5 to 1. If we consummate one or more acquisitions in which the aggregate purchase price is $25 million or more, the allowable ratio of indebtedness to adjusted EBITDA will be increased to 5.5 to 1 for the three calendar quarters following the acquisition.

Upon breach of any covenant, discussed above, amounts outstanding under the 2007 Partnership Credit Agreement may become immediately due and payable. We were in compliance with these covenants at December 31, 2007. The average interest rate of borrowings under this agreement was 5.40 percent and 6.75 percent at December 31, 2007 and 2006, respectively. At December 31, 2007, we had $100 million of borrowings outstanding under this agreement and $900 million was available.

In November 2007, we entered into a $15 million Senior Unsecured Letter of Credit Facility and Reimbursement Agreement with Wells Fargo Bank, N.A., of which $12 million is being used, and a $12 million Standby Letter of Credit Agreement with Royal Bank of Canada. Both agreements are used to support various permits required by the KDHE for our ongoing business in Kansas.

We had $10 million in letters of credit outstanding at December 31, 2006.

Bridge Facility - In April 2006, we entered into a $1.1 billion 364-day credit agreement (the Bridge Facility) with a syndicate of banks and borrowed $1.05 billion to finance a portion of the acquisition of the ONEOK Energy Assets. In September 2006, we repaid the amounts outstanding under the Bridge Facility using proceeds from the issuance of senior notes, which resulted in the Bridge Facility being terminated in accordance with its terms. See Note G for further discussion regarding the issuance of senior notes.

Table of Contents

Guardian Pipeline - The Guardian Pipeline revolving credit agreement permitted us to choose rates based on the prime commercial lending rate or LIBOR as the interest rate on its outstanding borrowings, specify the portion of the borrowings to be covered by specific interest rate options and specify the interest rate period. The Guardian Pipeline revolving credit agreement terminated in November 2007.

G. LONG-TERM DEBT

The following table sets forth our long-term debt for the periods indicated. All notes are senior unsecured obligations, ranking equally in right of payment with all of our existing and future unsecured senior indebtedness.

	December 31, 2007	December 31, 2006
	(Thousands of dollars)	
ONEOK Partners		
$250,000 at 8.875% due 2010	**$ 250,000**	$ 250,000
$225,000 at 7.10% due 2011	**225,000**	225,000
$350,000 at 5.90% due 2012	**350,000**	350,000
$450,000 at 6.15% due 2016	**450,000**	450,000
$600,000 at 6.65% due 2036	**600,000**	600,000
$600,000 at 6.85% due 2037	**600,000**	-
	2,475,000	1,875,000
Guardian Pipeline		
Average 7.85% due 2022	**133,641**	145,572
Total long-term notes payable	**2,608,641**	2,020,572
Change in fair value of hedged debt	**12,155**	12,310
Unamortized debt premium	**(3,470)**	(1,353)
Current maturities	**(11,930)**	(11,931)
Long-term debt	**$ 2,605,396**	$ 2,019,598

The aggregate maturities of long-term debt outstanding for years 2008 through 2012 are shown below.

	ONEOK Partners	Guardian Pipeline	Total
	(Millions of dollars)		
2008	$ -	$ 11.9	$ 11.9
2009	-	11.9	11.9
2010	250.0	11.9	261.9
2011	225.0	11.9	236.9
2012	350.0	11.1	361.1

2007 Debt Issuance - In September 2007, we completed an underwritten public offering of $600 million aggregate principal amount of 6.85 percent Senior Notes due 2037 (the 2037 Notes). The 2037 Notes were issued under our existing shelf registration statement filed with the SEC.

We may redeem the 2037 Notes, in whole or in part, at any time prior to their maturity at a redemption price equal to the principal amount of the 2037 Notes, plus accrued and unpaid interest and a make-whole premium. The redemption price will never be less than 100 percent of the principal amount of the 2037 Notes plus accrued and unpaid interest. The 2037 Notes are senior unsecured obligations, ranking equally in right of payment with all of our existing and future unsecured senior indebtedness, and effectively junior to all of the existing debt and other liabilities of our non-guarantor subsidiaries. The 2037 Notes are non-recourse to our general partner.

The net proceeds from the 2037 Notes, after deducting underwriting discounts and commissions and expenses, of $592.9 million were used to finance our $300 million acquisition, before working capital adjustments, of an interstate natural gas liquids and refined petroleum products pipeline system and related assets from a subsidiary of Kinder Morgan and to repay debt outstanding under the 2007 Partnership Credit Agreement.

Table of Contents

The terms of the 2037 Notes are governed by the Indenture, dated as of September 25, 2006, between ONEOK Partners and Wells Fargo Bank, N.A., as trustee, as supplemented by the Fourth Supplemental Indenture, dated September 28, 2007 (Indenture). The Indenture does not limit the aggregate principal amount of debt securities that may be issued and provides that debt securities may be issued from time to time in one or more additional series. The Indenture contains covenants including, among other provisions, limitations on our ability to place liens on our property or assets and sell and lease back our property.

The 2037 Notes will mature on October 15, 2037. We will pay interest on the 2037 Notes on April 15 and October 15 of each year. The first payment of interest on the 2037 Notes will be made on April 15, 2008. Interest on the 2037 Notes accrues from September 28, 2007, which was the issuance date of the 2037 Notes.

2006 Debt Issuance - In September 2006, we completed an underwritten public offering of (i) $350 million aggregate principal amount of 5.90 percent Senior Notes due 2012 (the 2012 Notes), (ii) $450 million aggregate principal amount of 6.15 percent Senior Notes due 2016 (the 2016 Notes) and (iii) $600 million aggregate principal amount of 6.65 percent Senior Notes due 2036 (the 2036 Notes and collectively with the 2012 Notes and the 2016 Notes, the Notes). We registered the sale of the Notes with the SEC pursuant to a shelf registration statement filed on September 19, 2006.

We may redeem the Notes, in whole or in part, at any time prior to their maturity at a redemption price equal to the principal amount of the Notes, plus accrued interest and a make-whole premium. The redemption price will never be less than 100 percent of the principal amount of the relevant Notes plus accrued and unpaid interest. The Notes are senior unsecured obligations, ranking equally in right of payment with all of our existing and future unsecured senior indebtedness, and effectively junior to all of the existing and future debt and other liabilities of our non-guarantor subsidiaries. The Notes are non-recourse to our general partner.

The net proceeds from the Notes of approximately $1.39 billion, after deducting underwriting discounts and commissions and expenses but before offering expenses, were used to repay all of the $1.05 billion outstanding under our Bridge Facility and to repay $335 million of indebtedness outstanding under the 2006 Partnership Credit Agreement. The terms of the Notes are governed by the Indenture, dated September 25, 2006, between us and Wells Fargo Bank, N.A., as trustee, as supplemented by the First Supplemental Indenture (with respect to the 2012 Notes), the Second Supplemental Indenture (with respect to the 2016 Notes) and the Third Supplemental Indenture (with respect to the 2036 Notes), each dated September 25, 2006. The Indenture does not limit the aggregate principal amount of debt securities that may be issued and provides that debt securities may be issued from time to time in one or more additional series. The Indenture contains covenants including, among other provisions, limitations on our ability to place liens on our property or assets, and sell and lease back our property.

The 2012 Notes, 2016 Notes and 2036 Notes will mature on April 1, 2012, October 1, 2016 and October 1, 2036, respectively. We will pay interest on the Notes on April 1 and October 1 of each year. The first payment of interest on the Notes was made on April 1, 2007. Interest on the Notes accrued from September 25, 2006, which was the issuance date of the Notes.

Debt Covenants - We have debt covenants in addition to the covenants discussed in "2007 Debt Issuance" and "2006 Debt Issuance" above. Our $250 million and $225 million long-term notes payable, due 2010 and 2011, respectively, contain provisions that require us to offer to repurchase the senior notes at par value if our Moody's or S&P credit rating falls below investment grade (Baa3 for Moody's or BBB- for S&P) and the investment grade rating is not reinstated within a period of 40 days. Further, the indentures governing our senior notes due 2010 and 2011 include an event of default upon acceleration of other indebtedness of $25 million or more and the indentures governing our senior notes due 2012, 2016, 2036 and 2037 include an event of default upon the acceleration of other indebtedness of $100 million or more that would be triggered by such an offer to repurchase. Such an event of default would entitle the trustee or the holders of 25 percent in aggregate principal amount of the outstanding senior notes due 2010, 2011, 2012, 2016, 2036 and 2037 to declare those notes immediately due and payable in full.

Debt Guarantee - The 2037 Notes and the Notes are fully and unconditionally guaranteed on a senior unsecured basis by the Intermediate Partnership. The guarantee ranks equally in right of payment to all of the Intermediate Partnership's existing and future unsecured senior indebtedness. We have no significant assets or operations other than our investment in our wholly owned subsidiary, the Intermediate Partnership, which is also consolidated. The Intermediate Partnership holds partnership interests and the equity in our subsidiaries as well as a 50 percent interest in Northern Border Pipeline at December 31, 2007, which is accounted for under the equity method.

The Northern Border Pipeline partnership agreement provides that distributions to Northern Border Pipeline's partners are to be made on a pro rata basis according to each partner's percentage interest. The Northern Border Pipeline Management Committee determines the amount and timing of such distributions. Any changes to, or suspension of, the cash distribution

Table of Contents

policy of Northern Border Pipeline requires the unanimous approval of the Northern Border Pipeline Management Committee. Cash distributions are equal to 100 percent of distributable cash flow as determined from Northern Border Pipeline's financial statements based upon earnings before interest, taxes, depreciation and amortization less interest expense and maintenance capital expenditures. Loans or other advances from Northern Border Pipeline to its partners or affiliates are prohibited under its credit agreement. After we completed the sale of a 20 percent partnership interest in Northern Border Pipeline to TC PipeLines in April 2006, the Northern Border Pipeline Management Committee adopted certain changes to its cash distribution policy related to financial ratio targets and capital contributions. The change was to define minimum equity to total capitalization ratios to be used by the Northern Border Pipeline Management Committee to establish the timing and amount of required capital contributions. In addition, any shortfall due to the inability to refinance maturing debt will be funded by capital contributions. At December 31, 2007 and 2006, our equity in the net assets of Northern Border Pipeline was approximately $419 million and $438 million, respectively.

Guardian Pipeline Senior Notes - These notes were issued under a master shelf agreement with certain financial institutions. Principal payments are due annually through 2022. Interest rates on the $133.6 million in notes outstanding at December 31, 2007, range from 7.61 percent to 8.27 percent, with an average rate of 7.85 percent. Guardian Pipeline's senior notes contain financial covenants that require the maintenance of a ratio of (1) EBITDAR (net income plus interest expense, income taxes, operating lease expense and depreciation and amortization) to the sum of interest expense plus operating lease expense of not less than 1.5 to 1 and (2) total indebtedness to EBITDAR of not greater than 5.75 to 1. Upon any breach of these covenants, all amounts outstanding under the master shelf agreement may become due and payable immediately. At December 31, 2007, Guardian Pipeline was in compliance with its financial covenants.

Other

Fair Value - The following estimated fair values represent the amount at which debt could be exchanged in a current transaction between willing parties. Based on quoted market prices for similar issues with similar terms and remaining maturities, the estimated fair value of the aggregate of all the senior notes outstanding was approximately $2.7 billion and $2.0 billion at December 31, 2007 and 2006, respectively. We presently intend to maintain the current schedule of maturities for the senior notes, which will result in no gains or losses on their respective repayment. The fair value of the 2007 Partnership Credit Agreement approximates the carrying value since the interest rates are periodically adjusted to reflect current market conditions.

Unamortized Debt Premium, Discount and Expense - We amortize premiums, discounts and expenses incurred in connection with the issuance of long-term debt consistent with the terms of the respective debt instrument.

H. COMMITMENTS AND CONTINGENCIES

Operating Leases - Future minimum lease payments under non-cancelable operating leases on a gas processing plant, storage contracts, office space, pipeline equipment, rights-of-way and vehicles are shown in the table below.

	(Millions of dollars)
2008	$ 18.7
2009	13.8
2010	12.7
2011	12.6
2012	5.8

Firm Transportation Obligations and Other Commitments - We have firm transportation agreements with Fort Union Gas Gathering and Lost Creek Gathering Company. The Fort Union Gas Gathering agreement expires in 2009, and the Lost Creek Gathering Company agreement expires in 2010. Under these agreements, we must make specified minimum payments to Fort Union Gas Gathering and Lost Creek Gathering Company each month. We recorded expenses of $11.9 million, $12.0 million and $11.7 million for 2007, 2006 and 2005, respectively, related to these agreements. At December 31, 2007, the estimated aggregate amounts of such required future payments were $11.9 million for 2008, $11.3 million for 2009 and $3.7 million for 2010.

Environmental Liabilities - We are subject to multiple environmental laws and regulations affecting many aspects of our present and future operations, including air emissions, water quality, wastewater discharges, solid wastes and hazardous materials, and substance management. These laws and regulations generally require us to obtain and comply with a wide variety of environmental registrations, licenses, permits, inspections and other approvals. Failure to comply with these laws, regulations, permits and licenses may expose us to fines, penalties and/or interruptions in our operations that could be

Table of Contents

material to our results of operations. If an accidental leak or spill of hazardous materials occurs from our lines or facilities, in the process of transporting natural gas, NGLs, or refined products, or at any facility that we own, operate or otherwise use, we could be held jointly and severally liable for all resulting liabilities, including investigation and clean-up costs, which could materially affect our results of operations and cash flows. In addition, emission controls required under the federal Clean Air Act and other similar federal and state laws could require unexpected capital expenditures at our facilities. We cannot assure that existing environmental regulations will not be revised or that new regulations will not be adopted or become applicable to us. Revised or additional regulations that result in increased compliance costs or additional operating restrictions, particularly if those costs are not fully recoverable from customers, could have a material adverse effect on our business, financial condition and results of operations.

Our expenditures for environmental evaluation and remediation to date have not been significant in relation to our results of operations, and there were no material effects upon earnings during 2007, 2006 or 2005 related to compliance with environmental regulations.

Legal Proceedings - We are a party to various litigation matters and claims that are in the normal course of our operations. While the results of litigation and claims cannot be predicted with certainty, we believe the final outcome of such matters will not have a material adverse effect on our consolidated results of operations, financial position or liquidity.

Other - As a result of an internal review of a transaction that was brought to the attention of one of our affiliates by a third party, we have commenced an internal review of transactions that may have violated FERC capacity release rules or related rules. We have notified the FERC of this review and expect to file a report with the FERC by mid-March 2008 concerning any violations. At this time, we do not believe that penalties, if any, associated with potential violations will have a material impact on our results of operations, financial position or liquidity.

I. INCOME TAXES

Components of the income tax provision applicable to continuing operations and income taxes paid by our corporate subsidiaries are shown in the table below.

	Years Ended December 31,		
	2007	**2006**	**2005**
	(Thousands of dollars)		
Taxes currently payable:			
Federal	**$ 72**	$ -	$ 2,036
State	**4,203**	-	390
Total taxes currently payable	**4,275**	-	2,426
Deferred taxes:			
Federal	**3,994**	2,163	2,639
State	**573**	3,339	727
Total deferred taxes	**4,567**	5,502	3,366
Taxes retained by ONEOK	**-**	22,167	-
Total tax provision	**$ 8,842**	$ 27,669	$ 5,792

Taxes retained by ONEOK represent taxes accrued for the ONEOK Energy Assets during the first quarter of 2006. In conjunction with the ONEOK Transactions, all income tax liabilities of the ONEOK Energy Assets at the time of the ONEOK Transactions were retained by ONEOK. See Note B for additional discussion of the ONEOK Transactions.

Table of Contents

The following table is a reconciliation of our provision for income taxes for the periods indicated.

	Years Ended December 31,		
	2007	**2006**	**2005**
	(Thousands of dollars)		
Pretax income from continuing operations	**$ 416,589**	$ 420,849	$ 152,299
Federal statutory income tax rate	**35.0%**	35.0%	35.0%
Provision for federal income taxes	**145,806**	147,297	53,305
Partnership earnings not subject to tax	**(141,884)**	(144,928)	(48,630)
State income taxes	**4,772**	2,990	1,117
Other, net	**148**	143	-
Income tax expense	**$ 8,842**	$ 5,502	$ 5,792

The following table sets forth the tax effects of temporary differences that gave rise to significant portions of the deferred tax assets and liabilities for the periods indicated.

	Years Ended December 31,	
	2007	**2006**
	(Thousands of dollars)	
Deferred tax assets:		
Net operating losses	**$ 4,715**	$ 7,971
Other	**1,596**	129
Total deferred tax assets	**6,311**	8,100
Deferred tax liabilities:		
Excess of tax over book depreciation and depletion	**7,934**	5,414
Regulatory assets	**2,544**	2,526
Other	**77**	79
Total deferred tax liabilities	**10,555**	8,019
Net deferred tax assets/ (liabilities)	**$ (4,244)**	$ 81

At December 31, 2007, we had approximately $5.0 million of tax benefits available related to net operating loss carryforwards, which will expire between the years 2022 and 2026. We believe that it is more likely than not that the tax benefits of the net operating loss carryforwards will be utilized prior to their expiration; therefore, no valuation allowance is necessary.

We had income taxes payable of approximately $3.1 million at December 31, 2007. Cash paid for income taxes, net, was approximately $1.0 million, $0.6 million and $1.4 million at December 31, 2007, 2006 and 2005, respectively.

J. SEGMENTS

Segment Descriptions - In July 2007, we announced a series of organizational changes that led to the realignment of our previous business segments. Our financial results are now reported in these four segments: (i) Natural Gas Gathering and Processing, which remains unchanged, (ii) Natural Gas Pipelines, which is comprised of our former interstate natural gas pipelines segment and the natural gas assets of our former pipelines and storage segment, (iii) Natural Gas Liquids Gathering and Fractionation, which remains unchanged, and (iv) Natural Gas Liquids Pipelines, which is comprised of the natural gas liquids assets of our former pipelines and storage segment. Prior periods have been restated to reflect these segment changes.

Our operations are divided into these strategic business segments based on similarities in economic characteristics, products and services, types of customers, methods of distribution and regulatory environment, as follows:

- our Natural Gas Gathering and Processing segment primarily gathers and processes raw natural gas,
- our Natural Gas Pipelines segment primarily operates regulated interstate and intrastate natural gas transmission pipelines and natural gas storage facilities,
- our Natural Gas Liquids Gathering and Fractionation segment primarily gathers, treats and fractionates NGLs and stores and markets NGL products, and
- our Natural Gas Liquids Pipelines segment primarily operates our FERC-regulated interstate natural gas liquids gathering and distribution pipelines.

Table of Contents

The acquisition of the ONEOK Energy Assets in April 2006 is accounted for in our consolidated financial statements effective January 1, 2006. In connection with these transactions, we formed our former natural gas liquids segment and our former pipelines and storage segment.

Accounting Policies - The accounting policies of the segments are described in Note A. Intersegment and affiliate sales are recorded on the same basis as sales to unaffiliated customers. Our Natural Gas Gathering and Processing segment sells natural gas to ONEOK and its subsidiaries. A portion of our Natural Gas Pipelines segment's revenues are from ONEOK and its subsidiaries that utilize transportation and storage services. Corporate overhead costs relating to a reportable segment have been allocated for the purpose of calculating operating income. Our equity method investments do not represent operating segments.

Northern Border Pipeline was no longer consolidated effective January 1, 2006. For our Natural Gas Pipelines segment, Northern Border Pipeline's revenues represented approximately 85 percent of the segment's revenues in 2005.

Customers - The main customers for our Natural Gas Gathering and Processing segment are primarily major and independent oil and gas production companies. Our Natural Gas Liquids Gathering and Fractionation segment's customers are primarily natural gas gathering and processing companies and petrochemical, refining and NGL marketing companies. Companies served by our Natural Gas Pipelines segment include local distribution companies, power generating companies, natural gas marketing companies and petrochemical companies. Our Natural Gas Liquids Pipelines segment's customers are primarily NGL gathering companies, propane distributors and petrochemical and refining companies.

In 2007 and 2006, we had no single external customer from which we received 10 percent or more of our consolidated revenues. For 2005, we had two customers that accounted for more than 10 percent of our total consolidated operating revenues. In 2005, Lodgepole Energy Marketing (Lodgepole) and BP Canada accounted for $123.2 million (18 percent) and $114.4 million (16 percent), respectively, of our consolidated operating revenues. Operating revenues from Lodgepole are recorded in our Natural Gas Gathering and Processing segment. Our Natural Gas Gathering and Processing segment and Natural Gas Pipelines segment have recorded operating revenues from BP Canada.

Operating Segment Information - The following tables set forth certain selected financial information for our operating segments for the periods indicated. Amounts in prior periods have been restated to conform to our current presentation.

Year Ended December 31, 2007	**Natural Gas Gathering and Processing**	**Natural Gas Pipelines (a)**	**Natural Gas Liquids Gathering and Fractionation**	**Natural Gas Liquids Pipelines (b)**	**Other and Eliminations**	**Total**
			(Thousands of dollars)			
Sales to unaffiliated customers	**$ 433,139**	**$ 194,170**	**$ 4,562,178**	**$ 15,280**	**$ 27**	**$5,204,794**
Sales to affiliated customers	**519,755**	**107,009**	**-**	**-**	**-**	**626,764**

EBITDA	**$ 259,246**	**$ 207,196**	**$ 134,393**	**$ 53,411**	**$ 2,872**	**$ 657,118**
Investments in unconsolidated affiliates	**$ 298,701**	**$ 426,992**	**$ -**	**$ 30,567**	**$ -**	**$ 756,260**
Total assets	**$ 1,564,697**	**$ 1,164,111**	**$ 1,881,397**	**$ 1,214,833**	**$ 287,027**	**$6,112,065**
Capital expenditures	**$ 83,820**	**$ 138,919**	**$ 123,555**	**$ 363,460**	**$ 104**	**$ 709,858**

(a) - Our Natural Gas Pipelines segment has regulated and non-regulated operations. Our Natural Gas Pipelines segment's regulated operations had revenues of $252.5 million and operating income of $82.9 million for 2007.

(b) - All of our Natural Gas Liquids Pipelines segment's operations are regulated.

Table of Contents

Year Ended December 31, 2006	Natural Gas Gathering and Processing	Natural Gas Pipelines (a)	Natural Gas Liquids Gathering and Fractionation	Natural Gas Liquids Pipelines (b)	Other and Eliminations	Total
			(Thousands of dollars)			
Sales to unaffiliated customers	$ 478,848	$ 195,063	$ 3,467,048	$ -	$ 1,587	$4,142,546

Capital expenditures	$ 16,602	$ 39,641	$ -	$ -	$ 3,639	$ 59,882

(a) - For 2005, all of our Natural Gas Pipelines segment's operations are regulated.

Table of Contents

We evaluate our performance based on EBITDA, which we define as earnings before interest, income taxes, depreciation and amortization less the cost of the equity component of AFUDC. Management uses EBITDA to compare the financial performance of its segments and to internally manage those business segments. Management believes that EBITDA provides useful information to investors as a measure of comparison with peer companies. EBITDA should not be considered an alternative to, or more meaningful than, net income or cash flow as determined in accordance with GAAP. EBITDA calculations may vary from company to company, so our computation of EBITDA may not be comparable with a similarly titled measure of another company.

The following tables set forth the reconciliation of net income to EBITDA by operating segment for the periods indicated.

Year Ended December 31, 2007	**Natural Gas Gathering and Processing**	**Natural Gas Pipelines**	**Natural Gas Liquids Gathering and Fractionation**	**Natural Gas Liquids Pipelines**	**Other and Eliminations**	**Total**

Table of Contents

K. UNCONSOLIDATED AFFILIATES

Investments in Unconsolidated Affiliates - The following table sets forth our investments in unconsolidated affiliates for the periods indicated.

	Net Ownership Interest	December 31, 2007	December 31, 2006
		(Thousands of dollars)	
Northern Border Pipeline	50%	**$ 418,982**	$ 437,518
Bighorn Gas Gathering	49%	**97,716**	98,299
Fort Union Gas Gathering	37%	**85,197**	82,220
Lost Creek Gathering Company (a)	35%	**75,612**	74,151
Other	Various	**78,753**	56,691
Investments in unconsolidated affiliates		**$ 756,260 (b)**	$ 748,879 (b)

(a) - We are entitled to receive an incentive allocation of earnings from third-party gathering services revenue recognized by Lost Creek Gathering Company. As a result of the incentive, our share of Lost Creek Gathering Company's income exceeds its 35 percent ownership interest.

(b) - Equity method goodwill (Note D) was $185.6 million at December 31, 2007 and 2006.

Equity Earnings from Investments - The following table sets forth our equity earnings from investments for the periods indicated.

	Years Ended December 31, 2007	2006	2005
	(Thousands of dollars)		
Northern Border Pipeline (a)	**$ 62,008**	$ 72,393	$ -
Bighorn Gas Gathering	**7,416**	8,223	9,411
Fort Union Gas Gathering	**9,681**	9,030	6,747
Lost Creek Gathering Company	**4,790**	5,363	6,315
Guardian Pipeline (b)	**-**	-	2,263
Other	**6,013**	874	-
Equity earnings from investments	**$ 89,908**	$ 95,883	$ 24,736

(a) - Beginning January 1, 2006, our interest in Northern Border Pipeline is accounted for as an investment under the equity method (Note B). For the first three months of 2006, we included 70 percent of Northern Border Pipeline’s income in equity earnings from investments. After the sale of a 20 percent interest in Northern Border Pipeline in April 2006, we included 50 percent of Northern Border Pipeline's income in equity earnings from investments.

(b) - In April 2006, we acquired the 66-2/3 percent interest in Guardian Pipeline not previously owned by us, increasing our ownership to 100 percent. Following the completion of the transactions, we consolidated Guardian Pipeline retroactive to January 1, 2006 (Note B).

Table of Contents

Unconsolidated Affiliates Financial Information - Summarized combined financial information of our unconsolidated affiliates is presented below.

	December 31,	
	2007	**2006**
	(Thousands of dollars)	
Balance Sheet		
Current assets	**$ 102,805**	$ 76,376

Net income	**184,434**	183,732	49,742
Distributions paid to us	**$103,785**	$123,427	$ 16,440

L. NET INCOME PER UNIT

Net income per unit is computed by dividing net income, after deducting the general partner's allocation, by the weighted average number of outstanding limited partner units. The general partner owns a 2 percent interest in us and also owns incentive distribution rights that provide for an increasing proportion of cash distributions from the partnership as the distributions made to limited partners increase above specified levels. For purposes of our calculation of net income per unit, net income is generally allocated to the general partner as follows: (1) an amount based upon the 2 percent general partner interest in net income, and (2) the amount of the general partner's incentive distribution rights based on the total cash distributions declared for the period. The amount of incentive distributions allocated to our general partners totaled $50.6 million, $31.6 million and $8.0 million for 2007, 2006 and 2005, respectively. The distribution paid to our general partner shown on the accompanying Consolidated Statements of Changes in Partners' Equity and Comprehensive Income of $54.7 million in 2007, $28.4 million in 2006 and $11.2 million in 2005, included incentive distributions paid to the general partners in 2007, 2006 and 2005 of approximately $47.1 million, $23.1 million and $8.0 million, respectively. Gains resulting from interim capital transactions, as defined in our Partnership Agreement, are generally not subject to distribution; however, our Partnership Agreement provides that if such distributions were made, the incentive distribution rights would not apply. Accordingly, the gain on sale of assets for 2007 and 2006 had no impact on the incentive distribution rights.

As discussed in Note B, we completed the ONEOK Transactions during the second quarter of 2006; however, for accounting purposes, the transactions were accounted for retroactive to January 1, 2006. Net income from the ONEOK Energy Assets prior to the April 2006 acquisition was approximately $35.8 million and has been reflected in our earnings for 2006. For purposes of our calculation of 2006 income per unit, these pre-acquisition earnings were allocated to the general partner, as they retained the related cash flow for that period.

The following summarizes our quarterly cash distribution activity for 2007:

- In January 2007, we declared a cash distribution of $0.98 per unit for the fourth quarter of 2006. The distribution was paid on February 14, 2007, to unitholders of record on January 31, 2007.
- In April 2007, we declared a cash distribution of $0.99 per unit for the first quarter of 2007. The distribution was paid on May 14, 2007, to unitholders of record as of April 30, 2007.
- In July 2007, we declared a cash distribution of $1.00 per unit for the second quarter of 2007. The distribution was paid on August 14, 2007, to unitholders of record on July 31, 2007.
- In October 2007, we declared a cash distribution of $1.01 per unit for the third quarter of 2007. The distribution was paid on November 14, 2007, to unitholders of record on October 31, 2007.

Table of Contents

On January 15, 2008, we declared a cash distribution of $1.025 per unit ($4.10 per unit on an annualized basis) for the fourth quarter of 2007. The distribution was paid on February 14, 2008, to unitholders of record on January 31, 2008.

M. RELATED-PARTY TRANSACTIONS

Intersegment and affiliate sales are recorded on the same basis as sales to unaffiliated customers. Our Natural Gas Gathering and Processing segment sells natural gas to ONEOK and its subsidiaries. A portion of our Natural Gas Pipelines segment's revenues are from ONEOK and its subsidiaries, which utilize both transportation and storage services.

As part of the ONEOK Transactions, we acquired certain contractual rights to the Bushton Plant that is leased by OBPI. Our Processing and Services Agreement with ONEOK and OBPI sets out the terms by which OBPI provides services at the Bushton Plant through 2012. We have contracted for all of the capacity of the Bushton Plant from OBPI. In exchange, we pay OBPI for all direct costs and expenses of the Bushton Plant, including reimbursement of a portion of OBPI's obligations under equipment leases covering the Bushton Plant.

In April 2006, we entered into a Services Agreement with ONEOK, ONEOK Partners GP and NBP Services (the Services Agreement) that replaced the Administrative Services Agreement between us and NBP Services. Under the Services Agreement, our operations and the operations of ONEOK and its affiliates can combine or share certain common services in order to operate more efficiently and cost effectively. Under the Services Agreement, ONEOK will provide to us at least the type and amount of services that it provides to its affiliates, including those services required to be provided pursuant to our Partnership Agreement. ONEOK Partners GP continues to operate our interstate natural gas pipeline assets according to each pipeline's operating agreement, except for the operating agreement between ONEOK Partners GP and Northern Border Pipeline, which terminated effective April 1, 2007. ONEOK Partners GP may purchase services from ONEOK and its affiliates pursuant to the terms of the Services Agreement. ONEOK Partners GP has no employees and utilizes the services of ONEOK and ONEOK Services Company to fulfill its responsibilities.

ONEOK and its affiliates provide a variety of services to us under the Services Agreement, including cash management and financing services, employee benefits provided through ONEOK's benefit plans, administrative services, insurance and office space leased in ONEOK's headquarters building and other field locations. Where costs are specifically incurred on behalf of one of our affiliates, the costs are billed directly to us by ONEOK. In other situations, the costs may be allocated to us through a variety of methods, depending upon the nature of the expense and activities. For example, a service that applies equally to all employees is allocated based upon the number of employees. However, an expense benefiting the consolidated company but having no direct basis for allocation is allocated by the modified Distrigas method, a method using a combination of ratios that include gross plant and investment, operating income and wages. All costs directly charged or allocated to us are included in our Consolidated Statements of Income.

An affiliate of ONEOK enters into some of the commodity derivative contracts at the direction of and on behalf of our Natural Gas Gathering and Processing segment. See Note C for a discussion of our derivative instruments and hedging activities.

The following table sets forth the transactions with related parties for the periods indicated.

	Years Ended December 31,		
	2007	**2006**	**2005**
	(Thousands of dollars)		
Revenues	**$626,764**	$595,702	$ 7,683
Expenses			
Administrative and general expenses	**$171,741**	$175,270	$52,579
Interest expense	-	21,372	-
Total expenses	**$171,741**	$196,642	$52,579

N. QUARTERLY FINANCIAL DATA (UNAUDITED)

Year Ended December 31, 2007	**First Quarter**	**Second Quarter**	**Third Quarter**	**Fourth Quarter**
	(Thousands of dollars, except per unit amounts)			
Total revenues	**$1,168,674**	**$1,375,314**	**$1,410,257**	**$1,877,313**
Net margin	**$ 205,370**	**$ 217,570**	**$ 213,884**	**$ 259,069**
Operating income	**$ 104,376**	**$ 107,558**	**$ 105,116**	**$ 129,733**
Net income	**$ 95,756**	**$ 94,619**	**$ 95,916**	**$ 121,456**
Net income per unit	**$ 1.00**	**$ 0.97**	**$ 0.98**	**$ 1.27**

Year Ended December 31, 2006	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
	(Thousands of dollars, except per unit amounts)			
Total revenues	$ 1,179,613	$ 1,163,859	$ 1,218,541	$ 1,176,235
Net margin	$ 202,062	$ 213,111	$ 211,466	$ 216,909
Operating income	$ 100,174	$ 212,779	$ 107,673	$ 90,586
Net income	$ 70,504	$ 196,199	$ 98,222	$ 80,261
Net income per unit	$ 0.67	$ 2.22	$ 1.04	$ 0.82

Total revenues and net margin for the first and second quarters in the tables above were restated to be consistent with the classification used in our September 30, 2007 Quarterly Report on Form 10-Q and in this Annual Report on Form 10-K. The change was not material.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure that information required to be disclosed by us, including our consolidated entities, in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Under the supervision and with the participation of senior management, including the Chief Executive Officer ("Principal Executive Officer") and the Chief Financial Officer ("Principal Financial Officer") of ONEOK Partners GP, our general partner, we evaluated our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Exchange Act. Based on this evaluation, the Principal Executive Officer and the Principal Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2007, to ensure the timely disclosure of required information in our periodic SEC filings.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, including our Principal Executive Officer and Principal Financial Officer, we evaluated the effectiveness of our internal control over financial reporting based on the framework in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Based on our evaluation under that framework and applicable SEC rules, our management concluded that our internal control over financial reporting was effective as of December 31, 2007.

Our internal control over financial reporting as of December 31, 2007, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report that is included herein (Item 8).

Table of Contents

Changes in Internal Controls Over Financial Reporting

We have made no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act) during the year ended December 31, 2007, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Partnership Board of Directors and Audit Committee

We are managed under the direction of the Board of Directors of our sole general partner, ONEOK Partners GP, which consists of six members designated by ONEOK, the parent corporation of our general partner. We refer to the Board of Directors of ONEOK Partners GP as our Board of Directors. Because we are a limited partnership and meet the definition of a "controlled company" under the listing standards of the NYSE, certain listing standards of the NYSE are not applicable to us. Accordingly, Section 303A.01 of the NYSE Listed Company Manual, which would require that the Board of Directors of our general partner be comprised of a majority of independent directors, and Sections 303A.04 and 303A.05 of the NYSE Listed Company Manual, which would require that the Board of Directors of our general partner maintain a nominating committee and a compensation committee, each consisting entirely of independent directors, are not applicable to us. However, our Board of Directors has affirmatively determined that three members of our Board of Directors, Gary N. Petersen, Gerald B. Smith and Gil J. Van Lunsen, have no material relationship with us and are "independent" under our Governance Guidelines and the listing standards of the NYSE.

Our Board of Directors has appointed an Audit Committee consisting of the three members of our Board of Directors who are independent under our Governance Guidelines and the listing standards of the NYSE. The Audit Committee has oversight responsibility with respect to the integrity of our financial statements, the performance of our internal audit function, the independent auditor’s qualification and independence and our compliance with legal and regulatory requirements. The Audit Committee directly appoints, retains, evaluates and may terminate our independent auditor. The Audit Committee reviews our annual and quarterly financial statements. The Audit Committee also has the authority to review specific matters that may present a conflict of interest in order to determine if the resolution of such conflict proposed by our Board of Directors is fair and reasonable to our unitholders and to engage advisors to assist it in carrying out its duties. The Audit Committee has all other responsibilities required by the applicable NYSE listing standards and applicable SEC rules. The Board of Directors of our general partner has adopted a written charter for our Audit Committee.

The members of our Board of Directors and Audit Committee are not elected by unitholders. Accordingly, we do not have a procedure by which security holders may recommend nominees to our Board of Directors or Audit Committee. The persons designated as our executive officers serve in that capacity at the discretion of our Board of Directors.

Table of Contents

Directors and Executive Officers

The following table sets forth the members of the Board of Directors and Audit Committee and the executive officers of our general partner. There are no family relationships between any of our executive officers or members of the Board of Directors and the Audit Committee. Some of these individuals are also officers of certain of our subsidiaries or affiliates.

Name	Age	Position
John W. Gibson	55	Chairman of the Board, President and Chief Executive Officer
James C. Kneale	56	President and Chief Operating Officer, ONEOK, Inc. Member, Board of Directors
Curtis L. Dinan	40	Senior Vice President, Chief Financial Officer and Treasurer Member, Board of Directors
John R. Barker	60	Executive Vice President, General Counsel and Secretary
Caron A. Lawhorn	46	Senior Vice President and Chief Accounting Officer
Gary N. Petersen	57	Member, Board of Directors and Audit Committee
Gerald B. Smith	57	Member, Board of Directors and Chairman, Audit Committee
Gil J. Van Lunsen	65	Member, Board of Directors and Audit Committee

John W. Gibson became our president and chief executive officer effective January 1, 2007, and chairman of our Board of Directors on October 16, 2007. He served as our president and chief operating officer from May through December 2006. From 2005 until May 2006, he was president of ONEOK Energy companies, which included ONEOK's gathering and processing, natural gas liquids, pipelines and storage and energy services business segments, some of which were acquired by us in April 2006. Prior to that, he was president, Energy, from 2000 to 2005 for ONEOK.

James C. Kneale became the president and chief operating officer of ONEOK effective January 1, 2007. He served as our executive vice president and chief financial officer from May through December 2006. From 1999 to 2000, he was vice president, treasurer and chief financial officer and from 2001 to 2004, senior vice president, treasurer and chief financial officer for ONEOK. From 2005 through May 2006, he was executive vice president, finance and administration and chief financial officer for ONEOK.

Curtis L. Dinan became our senior vice president, chief financial officer and treasurer effective January 1, 2007. He was elected to our Board of Directors on October 16, 2007. Mr. Dinan is a member of both the Management and Audit Committees of Northern Border Pipeline. Mr. Dinan is also the Senior Vice President, Chief Financial Officer and Treasurer of ONEOK. Mr. Dinan served as senior vice president and chief accounting officer of ONEOK from August 2004 through December 2006 and served as vice president and chief accounting officer of ONEOK from February 2004 to August 2004. Prior to joining ONEOK in February 2004, Mr. Dinan served as an assurance and business advisory partner at Grant Thornton, LLP from 2002 to 2004.

John R. Barker became our executive vice president, general counsel and secretary in May 2006. Mr. Barker is also senior vice president, general counsel and assistant secretary for ONEOK, having been appointed to that position in 2004. From 1994 to 2004, he was a stockholder, president and director of Gable & Gotwals, a law firm located in Tulsa, Oklahoma, which provides legal services to both us and ONEOK.

Caron A. Lawhorn was named senior vice president and chief accounting officer on January 15, 2008. Ms. Lawhorn is Chair of the Audit Committee of Northern Border Pipeline. Ms. Lawhorn has served as senior vice president and chief accounting officer for ONEOK since January 1, 2007, and will continue to serve in this capacity. Prior to her current position, Ms. Lawhorn served ONEOK as senior vice president of financial services and treasurer from January 2005 to January 2007, vice president and controller from August 2004 to January 2005, vice president of audit and risk control from May 2003 to August 2004, and manager of audit services from September 1998 to May 2003.

Table of Contents

Gary N. Petersen was appointed to the Audit Committee in 2002. Since 1998, he has provided consulting services related to strategic and financial planning. Additionally, he is president of Endres Processing LLC. From 1977 to 1998, Mr. Petersen was employed by Reliant Energy-Minnegasco. He served as president and chief operating officer of Reliant Energy-Minnegasco from 1991 to 1998. Prior to his employment at Minnegasco, he was a senior auditor with Arthur Andersen. He currently serves on the boards of the YMCA of Metropolitan Minneapolis and the Dunwoody College of Technology.

Gerald B. Smith was appointed to the Audit Committee in 1994. He is chairman and chief executive officer and co-founder of Smith, Graham & Company Investment Advisors, a global investment management firm, which was founded in 1990. He is a member of the board of trustees of the Charles Schwab Family of Funds and lead independent director and member of the Cooper Industries audit committee. He is a former director of the Fund Management Board of Robeco Group, Rorento N.V. (Netherlands).

Gil J. Van Lunsen was appointed to the Audit Committee in March 2005. Prior to his retirement in 2000, Mr. Van Lunsen was a managing partner of KPMG LLP at the firm's Tulsa, Oklahoma office. He began his career with KPMG LLP in 1968. He is currently a director and audit committee chairman of Array Biopharma in Boulder, Colorado.

Director Compensation

Compensation for our non-management directors for the year ended December 31, 2007, consisted of an annual cash retainer of $65,000 and meeting fees of $1,000 for each Audit Committee meeting attended in person or $500 for each Audit Committee meeting attended by telephone. In addition, the chair of our Audit Committee received an additional annual cash fee of $10,000 and each other member of the Audit Committee received an additional cash fee of $5,000. Non-management directors are reimbursed for their expenses related to their attendance at Board of Director and Audit Committee meetings. A director who is also an officer or employee of ONEOK Partners GP or ONEOK receives no compensation for his or her service as a director.

We are required to indemnify the members of the Board of Directors and the general partner, its affiliates and its respective officers, directors, employees, agents and trustees to the fullest extent permitted by law against liabilities, costs and expenses incurred by any such person who acted in good faith and in a manner reasonably believed to be in, or (in the case of a person other than the general partner) not opposed to, our best interests and, with respect to any criminal proceedings, had no reasonable cause to believe the conduct was unlawful.

The following table sets forth the compensation paid to our non-management directors in 2007.

2007 DIRECTOR COMPENSATION

Name	Fees Earned or Paid in Cash ($)	Stock Awards ($)	Option Awards ($)	Non Equity Incentive Plan Compensation ($)	Change in Pension Value and Nonqualified Deferred Compensation Earnings ($)	All Other Compensation ($)	Total ($)
Gary N. Petersen	77,000	—	—	—	—	—	77,000
Gerald B. Smith	82,000	—	—	—	—	—	82,000
Gil J. Van Lunsen	77,000	—	—	—	—	—	77,000

Compensation Committee Interlocks and Insider Participation

We do not have a compensation committee. During 2007, the compensation of our named executive officers was determined by ONEOK's Executive Compensation Committee, which consists of independent members of the ONEOK Board of Directors. No member of ONEOK's Executive Compensation Committee is, or was formerly, an officer, director or employee of ONEOK Partners or any if its subsidiaries.

Table of Contents

Governance Matters

Audit Committee Independence - Our Board of Directors has appointed a standing Audit Committee. Our guidelines for determining the independence of members of the Audit Committee are included in our Governance Guidelines and provide that members of the Audit Committee shall at all times qualify as independent under the listing standards of the NYSE and the applicable rules of the SEC and other applicable laws. At least annually, the Board of Directors reviews the relationships of each Audit Committee member with us to affirmatively determine the independence of each member. In February 2008, our Board of Directors affirmatively determined that Mr. Petersen, Mr. Smith, and Mr. Van Lunsen meet the standards for independence set forth in the Governance Guidelines and are therefore independent.

Audit Committee Financial Experts - Our Board of Directors annually reviews the financial expertise of the members of our Audit Committee. In February 2008, our Board of Directors determined that Mr. Petersen, Mr. Smith, and Mr. Van Lunsen are each "audit committee financial experts," as defined by the rules of the SEC.

Executive Sessions of Board and Audit Committee - Our Board of Directors has documented its governance practices in our Governance Guidelines. The Board of Directors of our general partner holds regular executive sessions in which non-management board members meet without any members of management present. The chairman of our Audit Committee, Mr. Smith, presides at regular sessions of the non-management members of our Board of Directors. Meetings of the non-management board and committee members are scheduled in connection with each in person meeting of our Board of Directors and Audit Committee.

Service on Other Audit Committees - Mr. Smith serves on the audit committee of one other public company. Mr. Van Lunsen serves on the audit committee of one other public company. The Board of Directors has determined that Mr. Smith and Mr. Van Lunsen’s service on these other audit committees does not impair their ability to effectively serve on our Audit Committee.

Section 16(a) Beneficial Ownership Reporting Compliance - Section 16(a) of the Exchange Act requires executive officers, members of the Board of Directors and persons who own more than 10 percent of our common units to file reports of ownership and changes in ownership with the SEC and the NYSE and to furnish us with copies of all Section 16(a) forms they file. Based solely on our review of the copies of such forms received by us during and with respect to the 2007 fiscal year, or written representations from certain reporting persons that no Form 5s were required for those persons, we believe that during 2007 our reporting persons complied with all applicable filing requirements in a timely manner.

Governance Guidelines - The Board of Directors of our general partner has adopted Governance Guidelines that address several governance matters, including responsibilities of directors, the composition and responsibility of the Audit Committee, the conduct and frequency of board meetings, management succession, director access to management and outside advisors, director orientation and continuing education, and annual self-evaluation of the board. The Board of Directors of our general partner recognizes that effective governance is an on-going process, and thus, the Board of Directors will review our Governance Guidelines periodically as deemed necessary.

Code of Ethics - The Board of Directors of our general partner has adopted an Accounting and Financial Reporting Code of Ethics applicable to our chief executive officer, chief financial officer and chief accounting officer. In addition to other matters, this code of ethics establishes policies to prevent wrongdoing and to promote honest and ethical conduct, including ethical handling of actual and apparent conflicts of interest, compliance with applicable laws, rules and regulations, full, fair, accurate, timely and understandable disclosure in public communications and prompt internal reporting violations of the code. We intend to promptly post on our website any amendment to, or waiver from, any provision of our Accounting and Financial Reporting Code of Ethics in accordance with the applicable rules of the SEC and NYSE.

Code of Conduct - The Board of Directors of our general partner has adopted a Code of Business Conduct applicable to the members of our Board of Directors and Audit Committee, our officers and the employees of ONEOK, ONEOK Partners GP, and ONEOK Services Company, who provide services to us. This code sets out our requirements for compliance with legal and ethical standards in the conduct of our business, including general business principles, legal and ethical obligations, compliance policies for specific subjects, obtaining guidance, the reporting of compliance issues and discipline for violations of the code. We intend to promptly post on our website any amendments to, or waivers from (including any implicit waiver), any provision of our Code of Business Conduct in accordance with the applicable rules of the SEC and NYSE.

Table of Contents

Web Access - We provide access through our website at *www.oneokpartners.com* to current information relating to our governance, including our Audit Committee Charter, our Accounting and Financial Reporting Code of Ethics, our Code of Business Conduct, our Governance Guidelines and other matters impacting our governance principles. You may copy each of these documents from our website. You may also contact the office of the secretary of ONEOK Partners GP for printed copies of these documents free of charge.

Communications with Directors - Our Board of Directors believes that it is management's role to speak for us. Our Board of Directors also believes that any communications between members of the Board of Directors and interested parties, including unitholders, should be conducted with the knowledge of our chairman, president and chief executive officer. Interested parties, including unitholders, may contact one or more members of our Board of Directors, including non-management directors and non-management directors as a group, by writing to the director or directors in care of our corporate secretary at our principal executive offices. A communication received from an interested party or unitholder will be promptly forwarded to the director or directors to whom the communication is addressed. A copy of the communication will also be provided to our president and chief executive officer. We will not, however, forward sales or marketing materials or correspondence primarily commercial in nature or not clearly identified as interested party or unitholder correspondence.

ITEM 11. EXECUTIVE COMPENSATION

Compensation Discussion and Analysis

We do not directly employ any of the persons responsible for managing or operating our business. Instead, we are managed by our general partner, ONEOK Partners GP, the executive officers of which are employees of ONEOK. Certain officers of ONEOK Partners GP are deemed to be executive officers of us. We reimburse ONEOK for a portion of the total compensation paid to the executive officers of our general partner as provided by our Services Agreement with ONEOK. Please read "Certain Relationships and Related Party Transactions, and Director Independence - Services Agreement" for a description of the Services Agreement.

We do not have a compensation committee. The compensation of the officers of our general partner, who are deemed to be our officers, is set by the Executive Compensation Committee of the Board of Directors of ONEOK. A discussion of the objectives of, and other matters related to, ONEOK's compensation programs is included in ONEOK's compensation discussion and analysis and other disclosure related to ONEOK executive compensation contained in ONEOK's 2008 Proxy Statement as filed with the SEC (ONEOK 2008 Proxy Statement), a copy of which is provided on, and may be copied from, ONEOK's website at *www.oneok.com* and is available free of charge from the secretary of ONEOK Partners GP upon request.

Under our Services Agreement with ONEOK, a portion of the compensation expense for our named executive officers is allocated by ONEOK to us. The compensation amounts shown in the following table represent that portion of the named executive officer's total compensation which is allocated to and paid by us under the Services Agreement.

Table of Contents

The following table summarizes the compensation allocated to and paid by us in 2007 for our principal executive officer, principal financial officer and the three other most highly compensated executive officers of our general partner, ONEOK Partners GP, which we collectively refer to as the "named executive officers."

Summary Compensation Table For 2007

Name and Principal Position	Year	Salary ($)	Stock Awards ($)(1)	Option Awards ($)(2)	Non-Equity Incentive Plan Compensation ($)(3)	Change in Pension Value and Nonqualified Deferred Compensation Earnings ($)(4)	All Other Compensation ($)(5)	Total ($)
David L. Kyle	2007	$405,705	$ 1,532,891	$ -	$ -	$ 1,096,862	$ 79,523	$3,114,981
Chairman and Chief Executive Officer (6)	2006	$307,043	$ 1,984,503	$ 4,987	$ 690,846	$ 444,716	$ 54,932	$3,487,027
John W. Gibson	2007	$295,926	$ 930,262	$ -	$ 536,963	$ 560,163	$ 67,930	$2,391,244
Chairman, President and Chief Executive Officer (6)	2006	$326,250	$ 794,237	$ 2,210	$ 491,250	$ 377,996	$ 43,448	$2,035,391
James C. Kneale	2007	$248,196	$ 849,464	$ 64,309	$ 389,000	$ 489,172	$ 33,201	$2,073,342
President and Chief Operating Officer, ONEOK, Inc.	2006	$158,014	$ 441,904	$ 173,629	$ 227,032	$ 185,975	$ 21,875	$1,208,429
Curtis L. Dinan	2007	$143,190	$ 122,707	$ -	$ 181,374	$ 45,738	$ 13,667	$ 506,676
Senior Vice President, Chief Financial Officer and Treasurer (6)	2006	$ 82,472	$ 102,515	$ -	$ 59,165	$ 21,727	$ 8,475	$ 274,354
Pierce H. Norton II	2007	$261,354	$ 199,306	$ -	$ 320,000	$ 37,175	$ 14,233	$ 832,068
Executive Vice President - Natural Gas	2006	$225,000	$ 165,200	$ -	$ 215,000	$ 32,769	$ 13,683	$ 651,652

(1) The amounts included in the table reflect the expense allocated to and recognized by us for restricted stock, restricted stock incentive units and performance units granted under the ONEOK Long-Term Incentive Plan (LTI Plan) and the ONEOK Equity Compensation Plan, the grant date fair value of which was determined in accordance with Financial Accounting Standards No. 123 (revised 2004), "Share-Based Payments," (Statement 123R). Assumptions used in the calculation of the value of these equity grants are included in Note O to the ONEOK audited financial statements for the year ended December 31, 2007, included in the ONEOK 2007 Annual Report on Form 10-K filed with the SEC on February 27, 2008.

Annual grants of restricted stock and restricted stock incentive units vest three years from the date of grant. Because no shares of ONEOK common stock are issued under a restricted stock incentive unit until the unit vests, no dividends are payable with respect to restricted stock incentive units. Performance units do not pay dividends and vest three years from the date of grant at which time the holder is entitled to receive a percentage (0 percent to 200 percent in increments of 50 percent) of the performance units granted based on ONEOK’s total shareholder return over the three-year performance cycle compared to the total shareholder return of a peer group of energy companies. Grants of restricted stock, restricted stock incentive units and performance units made in 2003 and grants of restricted stock incentive units and performance units made in 2006 and 2007 are payable in shares of ONEOK common stock upon vesting. Grants of restricted stock incentive units and performance units made in 2004 and 2005 are payable one-third in cash and two-thirds in shares upon vesting. The fair value of restricted stock and restricted stock incentive units for the purposes of Statement 123R was determined on the date of grant based on the closing stock price of ONEOK common stock on the grant date, adjusted for the current dividend yield. The grant date fair value of the performance units granted in 2003, 2004 and 2005 for the purposes of Statement 123R was determined on the date of grant based on the closing stock price of ONEOK common stock on the grant date, adjusted for the current dividend yield. With respect to the performance units granted in 2006 and 2007, the grant date fair value for the purposes of Statement 123R was determined using a valuation model that considers the market condition (total shareholder return), using assumptions developed from historical information of ONEOK and the referenced peer group.

(2) No options were granted by ONEOK in 2007. However, the remaining unamortized expense from restored options granted in 2006 was fully recognized as of May 2007. No options were granted in 2006, except for restored options granted in connection with the exercise of options granted under the LTI Plan. Effective January 1, 2007, the restorative feature of all outstanding ONEOK stock options was eliminated. The 2003 option grant vested on February 20, 2006. The amounts included in the table reflect our allocated portion of the grant date fair value of the 2003 grant and the restored options granted in 2006 as expensed in accordance with Statement 123R. Assumptions used in the calculation of the value of option grants are included in Note O to the ONEOK audited financial statements for the year ended December 31, 2007, included in the ONEOK 2007 Annual Report on Form 10-K filed with the SEC on February 27, 2008.

(3) Reflects the amounts allocated to and paid by us under the ONEOK annual officer incentive plan. The plan provides that ONEOK officers may receive annual cash incentive awards based on the performance and profitability of ONEOK, the performance of particular business units of ONEOK, and individual performance. The corporate and business unit criteria and individual performance criteria are established annually

by the ONEOK Executive Compensation Committee of the ONEOK Board of Directors. The Committee also establishes annual target awards for each ONEOK officer. For a discussion of the performance criteria established by the ONEOK Executive Compensation Committee for awards under the 2007 annual officer incentive plan, see "Components of Compensation - Annual Cash Compensation" in the ONEOK 2008 Proxy Statement.

Table of Contents

(4) Reflects the portion of the aggregate current year change in pension values and above market earnings on nonqualified deferred compensation allocated to us for each named executive officer. The change in pension values is based on the change of the present value of the benefit. For a discussion of the ONEOK pension plan, see the ONEOK 2008 Proxy Statement. The present value is based on the earliest age for which an unreduced benefit is available (age 62) and assumptions from the September 30, 2007 and 2006 measurement dates for the ONEOK pension plan.

Our allocated portion of above market earnings on nonqualified deferred compensation for 2006 and 2007 were $671 and $0, respectively, for Mr. Kyle and $394 and $765, respectively, for Mr. Kneale. No other named executive officers received above market earnings. For additional information on the ONEOK, Inc. Employee Nonqualified Deferred Compensation Plan, see "Long-Term Compensation Plans - Nonqualified Deferred Compensation Plan" in the ONEOK 2008 Proxy Statement.

(5) Reflects the portion allocated to us of the amounts paid as ONEOK's dollar for dollar match of contributions made by the named executive officer under the ONEOK, Inc. Employee Nonqualified Deferred Compensation Plan, amounts paid as ONEOK's dollar for dollar match of contributions made by the named executive officer under the Thrift Plan for Employees of ONEOK, Inc. and Subsidiaries; amounts paid for country club membership; amounts paid as tax reimbursements for employee stock awards under the ONEOK, Inc. Employee Stock Award Program; amounts expensed in accordance with Statement 123R for shares issued under the ONEOK, Inc. Employee Stock Award Program; and amounts paid as employee service awards, as follows:

Name	Year	Match Under Nonqualified Deferred Compensation Plan (a)	Match Under Thrift Plan (b)	Country Club Membership	Service Award	Employee Stock Award (c)	Tax Reimbursement
David L. Kyle	2007	$ 72,669	$ 6,444	$ -	$ -	$ 238	$ 172
	2006	$ 49,936	$ 4,768	$ -	$ -	$ 130	$ 98
John W. Gibson	2007	$ 30,070	$ 6,444	$ 31,006	$ -	$ 238	$ 172
	2006	$ 33,075	$ 9,900	$ -	$ -	$ 270	$ 203
James C. Kneale	2007	$ 26,347	$ 6,444	$ -	$ -	$ 238	$ 172
	2006	$ 16,455	$ 4,795	$ -	$ 396(d)	$ 131	$ 98
Curtis L. Dinan	2007	$ 6,873	$ 6,444	$ -	$ -	$ 238	$ 112
	2006	$ 3,550	$ 4,733	$ -	$ -	$ 129	$ 63
Pierce H. Norton II	2007	$ -	$ 13,500	$ -	$ -	$ 498	$ 235
	2006	$ -	$ 13,200	$ -	$ -	$ 361	$ 122

(a) For additional information on the ONEOK, Inc. Employee Nonqualified Deferred Compensation Plan, see "Long-Term Compensation Plans - Nonqualified Deferred Compensation Plan" in the ONEOK 2008 Proxy.

(b) The Thrift Plan for Employees of ONEOK, Inc. and Subsidiaries is a tax qualified plan which covers all ONEOK employees. Employee contributions are discretionary. Subject to certain limits, ONEOK matches 100 percent of employee contributions to the plan up to a maximum of 6 percent.

(c) Under the ONEOK, Inc. Employee Stock Award Program, ONEOK issued, for no consideration, to all eligible full-time and short-term disabled employees, one share of ONEOK common stock when the closing price of ONEOK common stock on the NYSE was for the first time at or above $26 per share. Nine and 10 shares were issued to each named executive officer under this program in 2006 and 2007, respectively.

(d) This amount was awarded Mr. Kneale for 25 years of service to ONEOK.

Other than as set forth above, the named executive officers did not receive perquisites or other personal benefits with an aggregate value of $10,000 or more.

(6) Effective January 1, 2007, Mr. Kyle became our chairman of the Board of Directors and Mr. Gibson became our president and chief executive officer. Effective October 16, 2007, Mr. Kyle retired as our chairman of the Board of Directors, Mr. Gibson became our chairman of the Board of Directors in addition to his position as president and chief executive officer, and Mr. Dinan became a member of our Board of Directors.

Table of Contents

Potential Post-Employment Payments and Payments upon a Change in Control

Payments Made Upon Any Termination - Regardless of the manner in which a named executive officer's employment terminates, he is entitled to receive amounts earned during his term of employment. Such amounts include:

- accrued but unpaid salary;
- amounts contributed under the Thrift Plan for Employees of ONEOK, Inc. and Subsidiaries and the ONEOK, Inc. Employee Nonqualified Deferred Compensation Plan; and
- amounts accrued and vested through the ONEOK retirement plan and supplemental executive retirement plan (SERP).

Payments Made Upon Retirement - In the event of the retirement of a named executive officer, in addition to the items identified above, such named executive officer will:

- be entitled to certain exercise rights with respect to each outstanding and vested stock option granted under the ONEOK LTI Plan;
- be entitled to receive a prorated portion of each outstanding performance unit granted under the ONEOK Equity Compensation Plan upon the completion of the performance cycle;
- be entitled to receive a prorated portion of each outstanding restricted stock incentive unit granted under the ONEOK LTI Plan and the ONEOK Equity Compensation Plan upon completion of the restricted cycle; and
- be entitled to receive ONEOK health and life benefits for the retiree and qualifying dependents, as applicable.

Payments Made Upon Death or Disability - In the event of the death or disability of a named executive officer, in addition to the benefits listed under the headings "Payments Made Upon Any Termination" and "Payments Made Upon Retirement" above, the named executive officer will receive benefits under ONEOK's disability plan or payments under ONEOK's life insurance plan, as appropriate.

Payments Made Upon a Change in Control - Effective January 2005, ONEOK entered into amended and restated termination agreements with each of our named executive officers. Each termination agreement has an initial two-year term from the date the agreement was entered into and is automatically extended in one-year increments after the expiration of the initial term unless ONEOK provides notice of non-renewal to the officer, or the officer provides notice of non-renewal to ONEOK, at least 90 days before the January 1 preceding any termination date of the agreement. If a "change in control" of ONEOK occurs, the term of each termination agreement will not expire for at least three years after the change in control. Relative to the overall value of the Partnership, the potential benefits payable upon a change in control under these agreements are comparatively minor.

Effective December 21, 2006, ONEOK's termination agreement with Mr. Kyle was terminated by mutual agreement as a result of the change in Mr. Kyle's position with ONEOK. As a result, Mr. Kyle is not eligible to receive payments in the event of termination following a change in control. Also, effective December 21, 2006, ONEOK entered into an amended and restated termination agreement with Mr. Gibson which provides for an initial term through January 1, 2008, and is thereafter automatically extended until either party gives written notice of its election to terminate the agreement 90 days following the date of the notice.

Under the termination agreements, all change in control benefits are "double trigger." Payments and benefits under these termination agreements are payable if the officer's employment is terminated by ONEOK without "just cause" or by the officer for "good reason" at any time during the three years following a change in control. In general, severance payments and benefits include a lump sum payment in an amount equal to the sum of (1) for Messrs. Gibson and Kneale three times, and for Messrs. Dinan and Norton two times, the aggregate of the officer's annual salary as then in effect, plus the greater of either the amount of the officer's bonus received in the prior year or the officer's target bonus for the then current period, and (2) a prorated portion of the officer's target short-term incentive compensation. Messrs. Gibson and Kneale would also be entitled to continuation of health and welfare benefits for 36 months and accelerated benefits under the ONEOK, Inc. 2005 Supplemental Executive Retirement Plan. Messrs. Dinan and Norton would be entitled to continuation of health and welfare benefits for 24 months. In the case of Messrs. Gibson and Kneale, ONEOK will make gross up payments to them to cover any excise taxes due if any portion of their severance payments constitutes an excess parachute payment. For Messrs. Dinan and Norton, severance payments will be reduced if the net after-tax benefit to such named executive officer exceeds the net after-tax benefit if such reduction were not made. ONEOK will make gross up payments to such officers only if the severance payments, as reduced, are subsequently deemed to constitute excess parachute payments.

For the purposes of these agreements, a "change in control" generally means any of the following events:

- an acquisition of ONEOK voting securities by any person that results in the person having beneficial ownership of 20 percent or more of the combined voting power of ONEOK's outstanding voting securities, other than an acquisition directly from ONEOK;

Table of Contents

- the current members of the ONEOK Board, and any new director approved by a vote of at least two-thirds of the ONEOK Board, cease for any reason to constitute at least a majority of the ONEOK Board, other than in connection with an actual or threatened proxy contest (collectively, the "Incumbent Board");
- a merger, consolidation or reorganization with ONEOK or in which ONEOK issues securities, unless (a) ONEOK's shareholders immediately before the transaction, as a result of the transaction, own, directly or indirectly, at least 50 percent of the combined voting power of the voting securities of ONEOK resulting from the transaction, (b) the members of the ONEOK Incumbent Board after the execution of the transaction agreement constitute at least a majority of the members of the Board of ONEOK resulting from the transaction, or (c) no person other than persons who, immediately before the transaction owned 30 percent or more of ONEOK's outstanding voting securities, has beneficial ownership of 30 percent or more of the outstanding voting securities of ONEOK resulting from the transaction; or
- ONEOK completes the liquidation or dissolution or the sale or other disposition of all or substantially all of ONEOK's assets.

For the purposes of these agreements, "just cause" means the executive's conviction in a court of law of a felony, or any crime or offense in a court of law of a felony, or any crime or offense involving misuse or misappropriation of money or property; the executive's violation of any covenant, agreement or obligation not to disclose confidential information regarding our business; any violation by the executive of any covenant not to compete with us; any act of dishonesty by the executive which adversely affects our business; any willful or intentional act of the executive which adversely affects our business, or reflects unfavorably on our reputation; the executive's use of alcohol or drugs which interferes with the executive's performance of duties as our employee; or the executive's failure or refusal to perform the specific directives of our Board of Directors or its officers, which directives are consistent with the scope and nature of the executive's duties and responsibilities. The existence and occurrence of all of such causes are to be determined by us, in our sole discretion, provided, that nothing contained in these provisions of these agreements are to be deemed to interfere in any way with our right to terminate the executive's employment at any time without cause.

For the purposes of these agreements, "good reason" means a demotion, loss of title or significant authority or responsibility of the executive with respect to the executive's employment with us from those in effect on the date of a change in control, a reduction of salary of the executive from that received from us immediately prior to the date of a change in control, a reduction in short-term and/or long-term incentive targets from those applicable to the executive immediately prior to the date of a change in control, the relocation of our principal executive offices to a location outside the metropolitan area of Tulsa, Oklahoma, or our requiring a relocation of principal place of employment of the executive, or the failure of a successor corporation to explicitly assume these termination agreements.

Potential Post-Employment Payment Tables - The following tables reflect estimates of the amount of incremental compensation due to each named executive officer in the event of such executive's termination of employment upon death, disability or retirement, termination of employment without cause or termination of employment without cause or with good reason within three years following a change in control. The amounts shown assume that such termination was effective as of December 31, 2007, and are estimates of the amounts which would be paid out to the executives upon such termination. The actual amounts to be paid out can only be determined at the time of such executive's separation from the Partnership.

In addition to the amounts set forth in the following tables, in the event of termination of employment for any of the reasons set forth in the tables, each of the named executive officers would receive the following payments or benefits, which had been earned as of December 31, 2007: David L. Kyle, $1,576,417 in exercisable options and $106,089 in pension and SERP benefits; John W. Gibson, $585,977 in exercisable options and $135,667 in pension and SERP benefits; James C. Kneale, $334,826 in exercisable options and $65,977 in pension and SERP benefits; Curtis L. Dinan, $1,990 in pension and SERP benefits; Pierce H. Norton II, $2,353 in pension and SERP benefits.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Beneficial Ownership

The following table sets forth the beneficial ownership of our common units and the common stock of ONEOK, the parent company of our general partner, as of February 1, 2008, by each named executive officer, each member of our Board of Directors of our general partner, and all executive officers and members of our Board of Directors as a group. Other than as set forth below, no person is known to us to beneficially own more than five percent of our common units.

Name and Address of Beneficial Owner (1)	Common Units	Percent of Common Units	Class B Units	Percent of Class B Units	Percent of All Units	ONEOK Shares (2)	Percent of ONEOK Shares
David L. Kyle	35,000	*	-	-	*	540,628(3)	*

ONEOK, Inc. and affiliates	500,000	1.078	36,494,126	100	44.63	-	-

* Less than 1 percent.
(1) The business address for each of the beneficial owners is c/o ONEOK Partners, L.P., 100 West Fifth Street, Tulsa, Oklahoma 74103-4298.
(2) Includes shares of ONEOK common stock held by members of the family of the director or executive officer for which the director or executive officer has sole or shared voting or investment power, shares of common stock held in ONEOK's Direct Stock Purchase and Dividend Reinvestment Plan, Thrift Plan for Employees of ONEOK, Inc. and Subsidiaries and shares that the board member or executive officer has the right to acquire within 60 days of February 1, 2008, upon exercise of stock options granted under the LTI Plan.
(3) Includes 196,763 shares exercisable within 60 days of February 1, 2008. Includes 20,000 shares held by Mr. David L. Kyle, 500 shares held by Mr. Kyle's son, and 500 shares held by Mr. Kyle's step-son. Mr. Kyle disclaims beneficial ownership of these shares.
(4) Includes 59,948 shares exercisable within 60 days of February 1, 2008, and 765 shares of phantom stock under the ONEOK, Inc. Nonqualified Deferred Compensation Plan.
(5) Includes 65,853 shares exercisable within 60 days of February 1, 2008.
(6) Includes 4,745 shares exercisable within 60 days of February 1, 2008.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Related-Person Transactions

Our Board of Directors recognizes that transactions between us and related persons (ONEOK and its subsidiaries, affiliates and their and our executive officers, directors, and their immediate family members) can present potential or actual conflicts of interest and create the appearance our decisions are based on considerations other than our best interests and our unitholders. Accordingly, as a general matter, it is our preference to avoid related person transactions. Nevertheless, we recognize that there are situations where related person transactions may be in, or may not be inconsistent with, our best interests and our unitholders including, but not limited to, situations where we acquire products or services from related persons on an arm's length basis on terms comparable to those provided to unrelated third parties.

In the event we enter into a transaction in which ONEOK or its subsidiaries or affiliates or their or our executive officers (other than an employment relationship), directors, or a members of their immediate family have a direct or indirect material interest, the transaction is presented to our Audit Committee and, if warranted, our Board of Directors for review, to determine if the transaction creates a conflict of interest and is otherwise fair to us. We require each executive officer and director of our general partner to annually provide us written disclosure of any transaction between the officer or director and us. Our Board of Directors reviews this disclosure in connection with its annual review of the independence of our Audit Committee. These procedures are not in writing but are evidenced through the meeting agendas of our Board of Directors and our Audit Committee.

Table of Contents

The ONEOK Transactions

For a description of the ONEOK Transactions, see Note B of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K at page 64.

Relationship with ONEOK

ONEOK owns our sole general partner, ONEOK Partners GP, and is able to elect members of our Board of Directors and our Audit Committee. Other relationships include the following.

Cash Distributions - ONEOK owns approximately 0.5 million of our common units and approximately 36.5 million of our Class B limited units, which, when combined with its general partner interest, represents an approximate 45.7 percent interest in us. For 2007, we declared total cash distributions to ONEOK of $207.4 million, which included $50.6 million related to its incentive distribution rights. Additional information about our cash distribution policy is included in Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Services Agreement - In April 2006, we entered into a Services Agreement with ONEOK, ONEOK Partners GP and NBP Services. Under the Services Agreement, our operations and the operations of ONEOK and its affiliates can combine or share certain common services in order to operate more efficiently and cost effectively. Under the Services Agreement, ONEOK will provide to us at least the type and amount of services that it provides to its affiliates, including those services required to be provided pursuant to our Partnership Agreement.

ONEOK and its affiliates provide a variety of services to us under the Services Agreement, including cash management and financing services, employee benefits provided through ONEOK's benefit plans, administrative services, insurance and office space leased in ONEOK's headquarters building and other field locations. Where costs are specifically incurred on behalf of one of our affiliates, the costs are billed directly to us by ONEOK. In other situations, the costs may be allocated to us through a variety of methods, depending upon the nature of the expense and activities. For example, a service that applies equally to all employees is allocated based upon the number of employees. However, an expense benefiting the consolidated company but which has no direct basis for allocation is allocated by the modified Distrigas method, a method using a combination of ratios that include gross plant and investment, operating income and wages. All costs directly charged or allocated to us are included in our Consolidated Statements of Income.

In 2007, the aggregate amount charged by ONEOK, NBP Services and their affiliates to us for their services was approximately $171.7 million.

Operating and Administrative Services Agreements - ONEOK Partners GP provides certain administrative, operating and management services to us and Midwestern Gas Transmission, Viking Gas Transmission, and Guardian Pipeline through operating agreements. We, along with Midwestern Gas Transmission, Viking Gas Transmission, and Guardian Pipeline are charged for the salaries, benefits and expenses of ONEOK Partners GP incurred in connection with the operating agreements.

Transportation Agreements - ONEOK Energy Services, a subsidiary of ONEOK, became an affiliate of Northern Border Pipeline in November 2004 in connection with ONEOK's purchase of ONEOK Partners GP. We do not operate Northern Border Pipeline, but we are a 50 percent owner of the pipeline. In 2007, 3 percent of Northern Border Pipeline's design capacity was contracted on a firm basis with ONEOK Energy Services. Revenue from ONEOK Energy Services for 2007 was $5.1 million. As of January 31, 2008, 3 percent of Northern Border Pipeline's design capacity was contracted on a firm basis with ONEOK Energy Services for 2008.

Our Natural Gas Gathering and Processing segment sold $519.8 million of natural gas to ONEOK and its subsidiaries during 2007. Of our Natural Gas Pipelines segment's revenues, $107.0 million were from ONEOK and its subsidiaries during 2007 for both transportation and storage services.

Bushton Plant - As part of the ONEOK Transactions, we acquired contractual rights to the Bushton Plant that is leased by OBPI. Our Processing and Services Agreement with ONEOK and OBPI sets out the terms by which OBPI provides services at the Bushton Plant through 2012. We have contracted for all the capacity of the Bushton Plant from OBPI. In exchange for such services, we pay OBPI for all direct costs and expenses of operating the Bushton Plant, including reimbursement of a portion of OBPI's obligations under equipment leases covering the Bushton Plant.

Derivative Contracts - An affiliate of ONEOK from time to time enters into commodity derivative contracts on behalf of our Natural Gas Gathering and Processing segment. See Note C of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for a discussion of our derivative instruments and hedging activities.

Table of Contents

Relationship with TransCanada

As part of the ONEOK Transactions, in April 2006 ONEOK acquired ONEOK NB, formerly known as Northwest Border Pipeline Company, an affiliate of TransCanada that held a 0.35 percent general partner interest in us. In 2006, we declared total cash distributions to TransCanada of $0.7 million, which included $0.5 million related to its incentive distribution rights. Additional information about our cash distribution policy is included in Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

ONEOK Partners GP and TransCanada's affiliate became the operator of Northern Border Pipeline and entered into a transition services agreement for the transfer of the operator function effective April 1, 2007. Northern Border Pipeline agreed to pay ONEOK Partners GP an amount up to $1.0 million per year for years 2007 through 2011, to reimburse ONEOK Partners GP for shared equipment and furnishings acquired by ONEOK Partners GP and used to support Northern Border Pipeline operations.

Conflicts of Interest

Our Board of Directors, whose members are designated by our general partner, ONEOK Partners GP, establishes our business policies.

Our general partner, which is a subsidiary of ONEOK, and its respective affiliates currently engage or may engage in the businesses in which we engage or in which we may engage in the future. As a result, conflicts of interest may arise between our general partner and its affiliates, and us. If such conflicts arise, the members of our Board of Directors generally have a fiduciary duty to resolve such conflicts in a manner that is in our best interest.

TC PipeLines (a 50 percent owner and operator of Northern Border Pipeline) and its affiliates are also engaged in interstate natural gas pipeline transportation in the United States separate from their interest in Northern Border Pipeline. As a result, conflicts also may arise between TransCanada and its affiliates or TC PipeLines and its affiliates, and Northern Border Pipeline. If such conflicts arise, the representatives on the Northern Border Management Committee generally have a fiduciary duty to resolve such conflicts in a manner that is in the best interest of Northern Border Pipeline.

Unless otherwise provided for in a partnership agreement, the laws of Delaware and Texas generally require a general partner of a partnership to adhere to fiduciary duty standards under which it owes its partners the highest duties of good faith, fairness and loyalty. Similar rules apply to persons serving on our general partner's Board of Directors or the Northern Border Management Committee. Because of the competing interests identified above, our Partnership Agreement and the partnership agreement for Northern Border Pipeline contain provisions that modify certain of these fiduciary duties. For example:

- Our Partnership Agreement states that our general partner, its affiliates and their officers and directors will not be liable for damages to us, our limited partners or their assignees for errors of judgment or for any acts or omissions if the general partner and such other persons acted in good faith.
- Our Partnership Agreement allows our general partner and our Board of Directors to take into account the interests of other parties in addition to our interests in resolving conflicts of interest.
- Our Partnership Agreement provides that our general partner will not be in breach of its obligations under our Partnership Agreement or its duties to us or our unitholders if the resolution of a conflict is fair and reasonable to us. The latitude given in our Partnership Agreement in connection with resolving conflicts of interest may significantly limit the ability of a unitholder to challenge what might otherwise be a breach of fiduciary duty.
- Our Partnership Agreement provides that a purchaser of common units is deemed to have consented to certain conflicts of interest and actions of our general partner and its affiliates that might otherwise be prohibited and to have agreed that such conflicts of interest and actions do not constitute a breach by the general partner of any duty stated or implied by law or equity.
- The Audit Committee of our general partner will, at the request of the general partner or a member of our Board of Directors, review conflicts of interest that may arise between a general partner and its affiliates (or the member of our Board of Directors designated by it), and the unitholders or us. Any resolution of a conflict approved by the Audit Committee is conclusively deemed fair and reasonable to us.
- The partnership agreement of Northern Border Pipeline relieves us and TC PipeLines, our affiliates, and transferees from any duty to offer business opportunities to Northern Border Pipeline, subject to specified exceptions.

Table of Contents

We are required to indemnify the general partner, the members of its Board of Directors, and its affiliates and their respective officers, directors, employees, agents and trustees to the fullest extent permitted by law against liabilities, costs and expenses incurred by any such person who acted in good faith and in a manner reasonably believed to be in, or (in the case of a person other than our general partner) not opposed to, our best interests and with respect to any criminal proceedings, had no reasonable cause to believe the conduct was unlawful.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Selection of PricewaterhouseCoopers LLP

On April 26, 2007, the Audit Committee of our Board of Directors approved the dismissal of KPMG LLP and the engagement of PricewaterhouseCoopers LLP as our principal independent registered public accountant effective with the filing of our Quarterly Report on Form 10-Q for the period ended March 31, 2007, on May 2, 2007.

Audit and Non-Audit Fees

Audit services provided by PricewaterhouseCoopers LLP during the 2007 fiscal year and by KPMG LLP for the 2006 fiscal year included an audit of our consolidated financial statements, an audit of our internal control over financial reporting, audits of the financial statements of certain of our affiliates, review of our quarterly financial statements, review of debt and equity offerings and related consents and comfort letters, and professional services relating to tax compliance, tax planning, or tax advice.

The following table presents fees billed for audit services rendered (a) by PricewaterhouseCoopers LLP for the audit of annual consolidated financial statements for the year ended December 31, 2007, and fees billed for other services rendered by PricewaterhouseCoopers LLP during that period, and (b) by KPMG LLP for the audit of our annual consolidated financial statements for the year ended December 31, 2006, and fees billed for other services rendered by KPMG LLP during that period.

	PricewaterhouseCoopers LLP - 2007	KPMG LLP - 2006
Audit fees (1)	**$ 1,194,070**	$ 1,466,787
Audit-related fees (2)	**-**	352,135
Tax fees (3)	**950,342**	-
All other fees	**750**	-
Total	**$ 2,145,162**	$ 1,818,922

(1) Audit fees consisted of audit work performed in the preparation of financial statements and the audit of internal controls over financial reporting, fees for review of the interim unaudited financial statements included in our Quarterly Reports on Form 10-Q filed with the Securities and Exchange Commission, and fees for special procedures related to regulatory filings.
(2) Audit-related fees consisted principally of fees for audits of the financial statements of our affiliates.
(3) Tax fees consisted of fees for tax compliance, tax planning, or tax services, including preparation of our K-1 statements.

Audit Committee Policy on Services Provided by Independent Auditor

Consistent with SEC and NYSE policies regarding auditor independence, the Audit Committee has responsibility for appointing, setting compensation, and overseeing the work for the independent auditor. In recognition of this responsibility, the Audit Committee has established a policy with respect to the pre-approval of audit and permissible non-audit services provided by the independent auditor.

Prior to engagement of PricewaterhouseCoopers LLP as our independent auditor for the 2008 audit, a plan was submitted to and approved by the Audit Committee setting forth the services expected to be rendered during 2008 for each of the following four categories for its approval:

(1) audit services comprised of audit work performed in the preparation of financial statements and to attest and report on management's assessment of our internal controls over financial reporting, as well as work that only the independent auditor can reasonably be expected to provide, including quarterly review of our unaudited financial

Table of Contents

statements, comfort letters, statutory audits, attest services, consents and assistance with the review of documents filed with the SEC;

(2) audit related services comprised of assurance and related services that are traditionally performed by the independent auditor, including due diligence related to mergers and acquisitions, employee benefit plan audits and consultation regarding financial accounting and/or reporting standards;

(3) tax services comprised of tax compliance, tax planning, and tax advice; and

(4) all other permissible non-audit services, if any, that the Audit Committee believes are routine and recurring services that would not impair the independence of the auditor.

Audit fees are budgeted and the Audit Committee requires the independent auditor and management to report actual fees versus budgeted fees periodically during the year by category of service.

The Audit Committee may delegate pre-approval authority to one or more of its members. The member to whom such authority is delegated must report, for informational purposes only, any pre-approval decisions to the Audit Committee at its next scheduled meeting.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(1) Exhibits

2.1 Contribution Agreement by and among ONEOK, Inc., Northern Border Partners, L.P. and Northern Border Intermediate Limited Partnership dated February 14, 2006 (incorporated by reference to Exhibit 2.1 to Northern Border Partners, L.P.’s Form 10-K for the period ended December 31, 2005, filed on March 7, 2006 (File No. 1-12202)).

2.2 First Amendment to Contribution Agreement by and among ONEOK, Inc., Northern Border Partners, L.P. and Northern Border Intermediate Limited Partnership dated April 6, 2006 (incorporated by reference to Exhibit 2.2 to Northern Border Partners, L.P.’s Form 8-K filed on April 12, 2006 (File No. 1-12202)).

2.3 Purchase and Sale Agreement by and between ONEOK, Inc. and Northern Border Partners, L.P. dated February 14, 2006 (incorporated by reference to Exhibit 2.2 Northern Border Partners, L.P.’s Form 10-K for the period ended December 31, 2005, filed on March 7, 2006 (File No. 1-12202)).

2.4 First Amendment to Purchase and Sale Agreement by and among ONEOK, Inc., Northern Border Partners, L.P. and Northern Border Intermediate Limited Partnership dated April 6, 2006 (incorporated by reference to Exhibit 2.4 to Northern Border Partners, L.P.’s Form 8-K filed on April 12, 2006 (File No. 1-12202)).

2.5 Second Amendment to Contribution Agreement by and between ONEOK, Inc. and ONEOK Partners, L.P. dated January 16, 2007 (incorporated by reference to Exhibit 2.5 to ONEOK Partners, L.P.’s report on From 10-K for the year ended December 31, 2006 filed on March 1, 2007 (File No. 1-12202)).

2.6 Second Amendment to the Purchase and Sale Agreement by and between ONEOK, Inc. and ONEOK Partners, L.P. dated January 16, 2007 (incorporated by reference to Exhibit 2.6 to ONEOK Partners, L.P.’s report on From 10-K for the year ended December 31, 2006 filed on March 1, 2007 (File No. 1-12202)).

2.7 Partnership Interest Purchase and Sale Agreement by and between Northern Border Intermediate Limited Partnership and TC PipeLines Intermediate Limited Partnership dated as of December 31, 2005 (incorporated by reference to Exhibit 2.3 to Northern Border Partners, L.P.’s Form 10-K for the period ended December 31, 2005, filed on March 7, 2006 (File No. 1-12202)).

2.8 Purchase and Sale Agreement by and among Wisconsin Energy Corporation, WPS Investments, LLC and Northern Border Intermediate Limited Partnership dated as of March 30, 2006 (incorporated by reference to Exhibit 2.1 to Northern Border Partners, L.P.’s Form 8-K filed on March 30, 2006 (File No. 1-12202)).

2.9 Purchase and Sale Agreement by and between Williams Field Services Company, LLC and Northern Border Intermediate Limited Partnership dated as of May 2, 2006 (incorporated by reference to Exhibit 2.7 to ONEOK Partners, L.P.’s Form 10-Q for the period ended June 30, 2006, filed on August 4, 2006 (File No. 1-12202)).

Table of Contents

3.0 First Amendment to Purchase and Sale Agreement and Assignment, Delegation, Acceptance and Assumption of Rights and Obligations by and among Williams Field Services Company, LLC, ONEOK Partners Intermediate Limited Partnership and ONEOK Overland Pass Holdings, L.L.C. dated as of May 31, 2006 (incorporated by reference to Exhibit 2.8 to ONEOK Partners, L.P.'s Form 10-Q for the period ended June 30, 2006, filed on August 4, 2006 (File No. 1-12202)).

Section 2: EX-12.1 (COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES)

Exhibit 12.1

ONEOK Partners, L.P.

Computation of Ratio of Earnings to Fixed Charges

(Unaudited)	Twelve months ended December 31, 2003	2004	2005	2006	2007
	(Thousands of dollars)				
Fixed Charges, as defined					
Interest on long-term debt	$ 80,653	$ 79,020	$ 90,066	$136,533	$146,046
Other interest	45	15	3	439	4,714
Amortization of debt discount, premium & expense	(1,539)	(1,690)	(2,379)	(2,294)	1,765
Interest on lease agreements	1,210	1,192	1,522	5,605	6,392
Total Fixed Charges	80,369	78,537	89,212	140,283	158,917
Earnings before income taxes and undistributed income from equity investees	(49,244)	190,245	189,042	501,595	417,305
Earnings available for fixed charges	$ 31,125	$268,782	$278,254	$641,878	$576,222
Ratio of earnings to fixed charges	0.39**x**	3.42**x**	3.12**x**	4.58**x**	3.63**x**

For purposes of computing the ratio of earnings to combined fixed charges and preferred stock dividend requirements, "earnings" consists of income before cumulative effect of a change in accounting principle plus fixed charges, minority interest, income taxes and distributed income of equity method investees, less capitalized interest and undistributed income for equity investees. "Fixed charges" consists of interest expensed and capitalized, the amortization of debt discounts and issue costs and the representative interest portion of operating leases.

Section 6: EX-31.1 (SECTION 302 CEO CERTIFICATION)

Exhibit 31.1

Certification

I, John W. Gibson, certify that:

I have reviewed this annual report on Form 10-K of ONEOK Partners, L.P.;

Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This document includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are based on management's beliefs and assumptions. These forward-looking statements are identified by terms and phrases such as anticipate, believe, intend, estimate, expect, continue, should, could, may, plan, project, predict, will, potential, forecast, and similar expressions. Forward-looking statements involve risks and uncertainties that may cause actual results to be materially different from the results predicted. Factors that could cause actual results to differ materially from those indicated in any forward-looking statement include, but are not limited to:

- state, federal and foreign legislative and regulatory initiatives that affect cost and investment recovery, have an effect on rate structure, and affect the speed at and degree to which competition enters the natural gas industries;
- outcomes of litigation and regulatory investigations, proceedings or inquiries;
- weather and other natural phenomena, including the economic, operational and other effects of hurricanes and storms;
- the timing and extent of changes in commodity prices, interest rates and foreign currency exchange rates;
- general economic conditions, including any potential effects arising from terrorist attacks and any consequential or other hostilities;
- changes in environmental, safety and other laws and regulations;
- results of financing efforts, including the ability to obtain financing on favorable terms, which can be affected by various factors, including credit ratings and general market and economic conditions;
- increases in the cost of goods and services required to complete capital projects;
- declines in the market prices of equity and debt securities and resulting funding requirements for defined benefit pension plans;
- growth in opportunities, including the timing and success of efforts to develop domestic and international pipeline, storage, gathering, processing and other infrastructure projects and the effects of competition;
- the performance of natural gas transmission and storage, distribution, and gathering and processing facilities;
- the extent of success in connecting natural gas supplies to gathering, processing and transmission systems and in connecting to expanding gas markets;
- the effect of accounting pronouncements issued periodically by accounting standard-setting bodies;
- conditions of the capital markets during the periods covered by the forward-looking statements; and
- the ability to successfully complete merger, acquisition or divestiture plans; regulatory or other limitations imposed as a result of a merger, acquisition or divestiture; and the success of the business following a merger, acquisition or divestiture.

In light of these risks, uncertainties and assumptions, the events described in the forward-looking statements might not occur or might occur to a different extent or at a different time than Spectra Energy Corp has described. Spectra Energy Corp undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Index to Financial Statements

SPECTRA ENERGY CORP
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. General

Nature of Operations. Spectra Energy Corp, through its subsidiaries and equity affiliates (collectively, Spectra Energy), owns and operates a large and diversified portfolio of complementary natural gas-related energy assets. Spectra Energy operates in three key areas of the natural gas industry: gathering and processing, transmission and storage, and distribution. Spectra Energy provides transportation and storage of natural gas to customers in various regions of the northeastern and southeastern United States, the Maritime Provinces in Canada and the Pacific Northwest in the United States and Canada, and in the province of Ontario, Canada. Spectra Energy also provides natural gas sales and distribution services to retail customers in Ontario, and natural gas gathering and processing services to customers in Western Canada. In addition, Spectra Energy owns a 50% interest in DCP Midstream, LLC (DCP Midstream), one of the largest natural gas gatherers and processors in the United States.

Basis of Presentation. The Condensed Consolidated Financial Statements include the accounts of Spectra Energy Corp, its majority-owned subsidiaries where Spectra Energy has control and those variable interest entities, if any, where Spectra Energy is the primary beneficiary. These interim financial statements should be read in conjunction with the consolidated financial statements included in Spectra Energy's Annual Report on Form 10-K for the year ended December 31, 2007, and reflect all normal recurring adjustments that are, in the opinion of management, necessary to fairly present Spectra Energy's results of operations and financial position. Amounts reported in the Condensed Consolidated Statements of Operations are not necessarily indicative of amounts expected for the respective annual periods due to the effects of seasonal temperature variations on energy consumption, primarily in the gas distribution operations of Spectra Energy, as well as changing commodity prices on certain of the processing operations and other factors.

Use of Estimates. To conform with generally accepted accounting principles (GAAP) in the United States, management makes estimates and assumptions that affect the amounts reported in the Condensed Consolidated Financial Statements and Notes to Condensed Consolidated Financial Statements. Although these estimates are based on management's best available knowledge at the time, actual results could differ.

Recasts and Reclassifications. The Condensed Consolidated Statements of Operations and all related information contained in this report have been re-cast to reflect the operating results of certain natural gas gathering and processing facilities within the Western Canada Transmission & Processing segment as discontinued operations for all periods presented. See Note 7 for further discussion. In addition, the components of Operating Revenues on the Condensed Consolidated Statement of Operations for the 2007 periods have been reclassified to conform to the current reporting presentation.

Spin-off from Duke Energy Corporation. In conjunction with the spin-off of Spectra Energy from Duke Energy Corporation (Duke Energy) on January 2, 2007, Duke Energy transferred to Spectra Energy the assets and liabilities, including related tax effects, associated with Spectra Energy's employee benefits and captive insurance positions, as well as miscellaneous corporate assets and liabilities. The net effect of these non-cash transfers during the nine-month period ended September 30, 2007 is reflected as an increase of $8 million to Additional Paid-in Capital and a decrease of $100 million to Accumulated Other Comprehensive Income in the Condensed Consolidated Statements of Stockholders' Equity.

Index to Financial Statements

2. Acquisitions and Dispositions

Acquisition—Spectra Energy Income Fund. On May 1, 2008, Westcoast Energy Inc. (Westcoast), a subsidiary of Spectra Energy, acquired the 24.4 million units of the Spectra Energy Income Fund (Income Fund) that were held by non-affiliated holders at a purchase price of 11.25 Canadian dollars per unit, for a total purchase price of 279 million Canadian dollars (approximately $274 million). Westcoast now owns 100% of the Midstream operations. Prior to the acquisition, the Income Fund indirectly held 54% of Spectra Energy's consolidated Midstream operations and Westcoast indirectly held the remaining 46%. The Income Fund is included in the Western Canada Transmission & Processing business segment. The transaction, primarily driven by changes in Canadian federal tax rules as related to income trusts, was accounted for as a step acquisition, using the purchase method of accounting in accordance with Statement of Financial Accounting Standards (SFAS) No. 141, "Business Combinations."

The following table summarizes the preliminary fair values of the assets acquired and liabilities assumed as of May 1, 2008. The amount assigned to Goodwill increased $17 million from the amount estimated at June 30, 2008. Subsequent adjustments may be recorded upon the completion of the valuation and the final determination of the purchase price allocation.

	Purchase Price Allocation (in millions)
Purchase price	$ 274
Current assets	20
Property, plant and equipment, net	340
Current liabilities	(11)
Long-term debt (intercompany)	(89)
Deferred credits and other liabilities	(9)
Deferred income taxes	(43)
Total assets acquired/liabilities assumed	208
Goodwill	$ 66

Disposition—Saltville Gas Storage Company L.L.C. and P-25 pipeline. In April 2008, Spectra Energy completed the sale of Saltville Gas Storage Company L.L.C. and the P-25 pipeline to Spectra Energy Partners, LP (Spectra Energy Partners) for $107 million. Proceeds from the sale consisted of 4,207,641 Spectra Energy Partners common units, 85,870 general partner units and $5 million in cash. Spectra Energy's ownership of Spectra Energy Partners increased from 83% to 84% as a result of the issuance of the new common and general partner units. No gain or loss was recognized on the disposition since this transaction represented a transfer of entities under common control.

3. Business Segments

Spectra Energy manages its business in four reportable segments: U.S. Transmission, Distribution, Western Canada Transmission & Processing and Field Services. The remainder of Spectra Energy's business operations is presented as "Other," and consists of unallocated corporate costs, wholly owned captive insurance subsidiaries, employee benefit plan assets and liabilities, and other miscellaneous activities.

Spectra Energy's chief operating decision maker regularly reviews financial information about each of these business units in deciding how to allocate resources and evaluate performance. All of the business units are considered reportable segments under SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information." There is no aggregation within Spectra Energy's defined business segments.

Index to Financial Statements

U.S. Transmission provides transportation and storage of natural gas for customers in various regions of the eastern and southeastern United States and the Maritime Provinces in Canada. The natural gas transmission and storage operations in the U.S. are primarily subject to the Federal Energy Regulatory Commission's (FERC's) rules and regulations.

Distribution provides retail natural gas distribution service in Ontario, as well as natural gas transportation and storage services to other utilities and energy market participants. These services are provided by Union Gas Limited (Union Gas), and are primarily subject to the rules and regulations of the Ontario Energy Board (OEB).

Western Canada Transmission & Processing provides transportation of natural gas, natural gas gathering and processing services, and natural gas liquids (NGLs) extraction, fractionation, transportation, storage and marketing to customers in western Canada and the northern tier of the United States. This segment conducts business primarily through the BC Pipeline and BC Field Services operations, the Empress System and the Midstream business, which includes the Income Fund discussed in Note 2. The BC Pipeline and BC Field Services operations are primarily subject to the rules and regulations of Canada's National Energy Board (NEB).

Field Services gathers and processes natural gas and fractionates, markets and trades NGLs. It conducts operations through DCP Midstream, which is owned 50% by Spectra Energy and 50% by ConocoPhillips. Field Services gathers raw natural gas through gathering systems located in eight major natural gas producing regions: Mid-Continent, Rocky Mountains, East Texas-North Louisiana, Barnett Shale, Gulf Coast, South Texas, Central Texas, and Permian Basin.

Spectra Energy's reportable segments offer different products and services and are managed separately as business units. Management evaluates segment performance based on earnings before interest and taxes (EBIT) from continuing operations, after deducting minority interest expense related to those profits.

On a segment basis, EBIT excludes discontinued operations, represents all profits from continuing operations (both operating and non-operating) before deducting interest and taxes, and is net of the minority interest expense related to those profits. Cash, cash equivalents and short-term investments are managed centrally by Spectra Energy, so the associated realized and unrealized gains and losses from foreign currency transactions, and interest and dividend income on those balances are excluded from the segments' EBIT.

Transactions between reportable segments are accounted for on the same basis as with unaffiliated third parties.

4. Regulatory Matters

The following is a summary of recent regulatory matters. Management believes the impacts of these matters will not have a material adverse effect on Spectra Energy's future consolidated results of operations, financial position or cash flows.

Union Gas. Union Gas has rates that are approved by the OEB. Final 2008 rates, reflecting the incentive regulation settlement agreement accepted by the OEB on January 17, 2008, were implemented April 1, 2008, retroactive to January 1, 2008.

In November 2006, Union Gas received a decision from the OEB on the regulation of rates for gas storage services in Ontario (the Storage Forbearance Decision). The OEB determined that it would not regulate the rates for storage services to customers outside Union Gas' franchise area or the rates for new storage services to customers within its franchise area. The Storage Forbearance Decision requires Union Gas to continue to share long-term storage margin with ratepayers over a four-year phase-out period that started in 2007.

In March 2008, Union Gas applied to the OEB for the annual disposition of its 2007 non-commodity deferral account balances. The OEB issued its decision on this application in June 2008 finding that Union Gas should share revenue on all long-term storage contracts. Union Gas had previously interpreted the Storage Forbearance Decision to apply only to those contracts that were in existence as of the date of the Storage Forbearance Decision. Union Gas appealed this decision, and the OEB denied the appeal in October 2008. Union Gas recorded a $15 million charge to Transportation, Storage and Processing of Natural Gas operating revenues on the Condensed Consolidated Statement of Operations in the second quarter of 2008 as a result of the June 2008 decision.

BC Pipeline. The existing two-year BC Pipeline settlement agreement reached with customers and approved by the NEB expired on December 31, 2007. In December 2007, the NEB approved 2008 interim transportation tolls. In May 2008, the NEB approved BC Pipeline's application requesting the approval of 2008 revised interim tolls effective June 1, 2008. BC Pipeline and its customers recently reached an agreement regarding the determination of final tolls for transmission services for 2008, 2009 and 2010. The NEB approved this settlement agreement on November 4, 2008.

Maritimes & Northeast Pipeline Limited Partnership (M&N LP). In 2007, M&N LP operated under an NEB-approved toll settlement that expired December 31, 2007. A toll settlement agreement for the 2008 fiscal year was approved by the NEB in January 2008.

5. Gains on the Sales of Other Assets and Other, net

In the second quarter of 2008, Spectra Energy's U.S. Transmission segment received shares of stock as consideration for a customer bankruptcy settlement and recorded a gain of $31 million ($21 million after tax) which is reflected in Gains on Sales of Other Assets and Other, Net in the Condensed Consolidated Statements of Operations. The stock was subsequently sold in July 2008, resulting in net proceeds of $27 million, reflected in Cash Flows from Operating Activities on the Condensed Consolidated Statements of Cash Flows, and a loss of $4 million recorded as Other Income and Expenses, Net.

6. Income Taxes

Income tax expense from continuing operations for the three and nine-month periods ended September 30, 2008 was $145 million and $453 million, respectively, compared to $110 million and $312 million reported in the same periods in 2007, increasing primarily as a result of higher earnings in 2008.

Index to Financial Statements

The effective tax rate for income from continuing operations for the three months ended September 30, 2008 was 32.7% as compared to 31.9% for the same period in 2007. The lower effective tax rate in the prior period was primarily a result of an adjustment in the 2007 period for final 2006 tax returns in Canada. The effective tax rate for the nine months ended September 30, 2008 was 32.0% as compared to 32.3% for the same period of 2007.

Spectra Energy recognized no material changes in unrecognized tax benefits during the three and nine-month periods ended September 30, 2008. Although uncertain, Spectra Energy believes it is reasonably possible that the total amount of unrecognized tax benefits could decrease by approximately $14 million prior to September 30, 2009. The anticipated changes in unrecognized tax benefits relate to expected audit settlements focused primarily on classification of certain tax attributes, transfer pricing and expiration of statutes of limitations.

7. Discontinued Operations

On October 7, 2008, Spectra Energy entered into an agreement to sell its interests in the Nevis and Brazeau River natural gas gathering and processing facilities, which are part of the Western Canada Transmission & Processing segment. Subject to receipt of required regulatory approvals and certain other conditions, the transaction is expected to close in the fourth quarter of 2008. Assets associated with these operations, totaling $123 million at September 30, 2008, are classified as Assets Held for Sale on the Condensed Consolidated Balance Sheet, and associated liabilities totaling $11 million are classified within Other Current Liabilities. Results of operations of these assets are reflected as discontinued operations in the Condensed Consolidated Statements of Operations for all periods presented.

In the second quarter of 2007, Spectra Energy LNG Sales, Inc. (Spectra Energy LNG) reached a settlement agreement related to an arbitration proceeding regarding Spectra Energy LNG's claims for the period prior to May 2002 under certain liquefied natural gas (LNG) transportation contracts with Sonatrach and Sonatrading, and Spectra Energy LNG received $18 million, which resulted in $11 million in Income (Loss) From Discontinued Operations, Net of Tax on the Condensed Consolidated Statements of Operations. In June 2008, the parties entered into a settlement agreement under which Spectra Energy LNG's claims for the period after May 2002 were satisfied pursuant to commercial transactions involving the purchase of propane from Sonatrach. Spectra Energy entered into associated agreements with an affiliate of DCP Midstream and another party for the sale of these propane volumes. Net purchases and sales of propane under these arrangements are reflected as discontinued operations.

In the third quarter of 2007, Spectra Energy recorded $3 million of income ($3 million, net of tax), classified as Income (Loss) From Discontinued Operations, Net of Tax, related to a settlement of a sales price contingency associated with the 2005 sale of a natural gas gathering facility that was associated with Duke Energy North America (DENA), which is classified within the "Other" segment.

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1635 of 2431

Index to Financial Statements

The following table summarizes the results classified as Income From Discontinued Operations, Net of Tax, in the Consolidated Statements of Operations.

	Operating Revenues	Pre-tax Earnings (Loss)	Income Tax Expense (Benefit)	Income (Loss) From Discontinued Operations, Net of Tax
		(in millions)		
Three Months Ended September 30, 2008				
Western Canada Transmission & Processing	$ 7	$ (3)	$ —	$ (3)
Other	29	—	—	—
Total consolidated	$ 36	$ (3)	$ —	$ (3)
Three Months Ended September 30, 2007				
Western Canada Transmission & Processing	$ 10	$ 2	$ 2	$ —
Other	—	3	—	3
Total consolidated	$ 10	$ 5	$ 2	$ 3
Nine Months Ended September 30, 2008				
Western Canada Transmission & Processing	$ 23	$ (5)	$ (1)	$ (4)
Other	59	1	1	—
Total consolidated	$ 82	$ (4)	$ —	$ (4)
Nine Months Ended September 30, 2007				
Western Canada Transmission & Processing	$ 28	$ 6	$ 3	$ 3
Other	—	21	7	14
Total consolidated	$ 28	$ 27	$ 10	$ 17

8. Comprehensive Income

Comprehensive income includes net income and all other non-owner changes in equity. Components of comprehensive income are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
		(in millions)		
Net income	$ 296	$ 234	$ 958	$ 666
Other comprehensive income (loss)				
Foreign currency translation adjustments	(266)	432	(411)	910
Unrealized mark-to-market net loss on hedges (a)	(23)	—	(9)	—
Reclassification of cash flow hedges into earnings (b)	1	(3)	1	(2)
Pension and benefits impact of SFAS 158 (c)	3	—	29	—
Other comprehensive income (loss), net of tax	(285)	429	(390)	908
Total comprehensive income	$ 11	$ 663	$ 568	$ 1,574

(a) Net of $9 million and $6 million of tax benefits for the three and nine months ended September 30, 2008, respectively.
(b) Net of $1 million of tax expense for both the three and nine months ended September 30, 2008 and net of less than a $1 million tax benefit for both the three and nine months ended September 30, 2007.
(c) Includes $1 million of tax expense and $14 million of tax benefits for the three and nine months ended September 30, 2008, respectively.

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1636 of 2431

Index to Financial Statements

9. Earnings per Common Share

Basic earnings per common share (EPS) is computed by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted EPS is computed by dividing net income by the diluted weighted-average number of common shares outstanding during the period. Diluted EPS reflects the potential dilution that could occur if securities or other agreements to issue common stock, such as stock options, stock-based performance unit awards and phantom stock awards, were exercised, settled or converted into common stock.

The following table presents Spectra Energy's basic and diluted EPS calculations:

	Three Months Ended September 30, 2008	Three Months Ended September 30, 2007	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
	(in millions, except per-share amounts)			
Income from continuing operations	$ 299	$ 235	$ 962	$ 653
Income (loss) from discontinued operations, net of tax	(3)	3	(4)	17
Extraordinary items, net of tax	—	(4)	—	(4)
Net income	$ 296	$ 234	$ 958	$ 666
Weighted average common shares, outstanding				
Basic	615	632	626	632
Diluted	617	635	629	635
Basic earnings per common share				
Continuing operations	$ 0.49	$ 0.37	$ 1.54	$ 1.03
Discontinued operations, net of tax	(0.01)	0.01	(0.01)	0.03
Extraordinary items, net of tax	—	(0.01)	—	(0.01)
Total basic earnings per common share	$ 0.48	$ 0.37	$ 1.53	$ 1.05
Diluted earnings per common share				
Continuing operations	$ 0.48	$ 0.37	$ 1.53	$ 1.03
Discontinued operations, net of tax	—	0.01	(0.01)	0.03
Extraordinary items, net of tax	—	(0.01)	—	(0.01)
Total diluted earnings per common share	$ 0.48	$ 0.37	$ 1.52	$ 1.05

Weighted-average shares used to calculate diluted EPS includes the effect of certain options and restricted stock awards. Certain other options and stock awards related to approximately six million and nine million shares for the three months ended September 30, 2008 and 2007, respectively, and seven million and eight million shares for the nine months ended September 30, 2008 and 2007, respectively, were not included in the calculation of diluted EPS because either the option exercise prices were greater than the average market price of the shares during these periods or performance measures related to the awards had not yet been met.

10. Inventory

Inventory consists of natural gas and NGLs held in storage for transmission and processing, and also includes materials and supplies. Natural gas inventories related to the Distribution segment in Canada are valued at costs approved by the OEB. The difference between the approved price and the actual cost of gas purchased is recorded in either accounts receivable or other current liabilities for future disposition with customers, subject to approval by the OEB. The remaining inventory is recorded at cost, primarily using average cost.

Page 1636

Index to Financial Statements

The components of inventory are as follows:

	September 30, 2008	December 31, 2007
	(in millions)	
Natural gas	$ 323	$ 154
Natural gas liquids	55	25
Materials and supplies	92	108
Total inventory	$ 470	$ 287

11. Investments in and Loans to Unconsolidated Affiliates

Spectra Energy's most significant investment in unconsolidated affiliates is the 50% investment in DCP Midstream, which is accounted for under the equity method of accounting. The following represents summary financial information for DCP Midstream, presented at 100%.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(in millions)			
Operating revenues	$ 4,892	$ 3,115	$ 13,769	$ 9,214
Operating expenses	4,261	2,793	12,370	8,410
Operating income	631	322	1,399	804
Net income	477	281	1,293	690

As further discussed in Note 7, Spectra Energy entered into a propane sales agreement with an affiliate of DCP Midstream in the second quarter of 2008. During the three and nine-month periods ended September 30, 2008, Spectra Energy recorded revenues of $22 million and $36 million, respectively, associated with this agreement, classified within Income (Loss) From Discontinued Operations, Net of Tax.

In the nine-month period ended September 30, 2008, Spectra Energy loaned Southeast Supply Header, LLC (SESH), a 50%-owned equity affiliate, $170 million in connection with the construction of SESH pipeline facilities. The loan receivable from SESH, including accrued interest, totaled $323 million at September 30, 2008 and $148 million at December 31, 2007.

In the nine-month period ended September 30, 2008, Spectra Energy loaned Steckman Ridge, LP (Steckman), a 50%-owned equity affiliate, $21 million in connection with the construction of Steckman storage facilities. The loan receivable from Steckman, including accrued interest, totaled $24 million at September 30, 2008 and $3 million at December 31, 2007.

12. Goodwill

Spectra Energy has completed its annual goodwill impairment test as of August 31, 2008 and no impairments were identified. Spectra Energy primarily uses a discounted cash flow analysis to determine fair value for each reporting unit. Key assumptions in the determination of fair value include the use of an appropriate discount rate and estimated future cash flows. In estimating cash flows, Spectra Energy incorporates expected long-term rates, regulatory stability, the ability to renew contracts, commodity prices (where appropriate), and foreign currency exchange rates, as well as other factors that affect its revenue, expense and capital expenditure projections.

The long-term cash flows and resulting reporting unit values of Spectra Energy's Western Canada gathering and processing operations remain sensitive to projected growth rate assumptions. While exploration and drilling activities slowed somewhat in certain of Spectra Energy's business areas in 2006 and 2007, overall long-term growth rates associated with these Western Canada operations increased during 2008 as a result of strong indicators of

Index to Financial Statements

interest for continued natural gas exploration and drilling in the areas of British Columbia and Alberta that are in close proximity to Spectra Energy's facilities. Management continues to monitor these growth activities.

Management is also monitoring the affects of the economic downturn that could result from the equity market declines that have occurred in recent months. If these conditions continue over the long-term, these factors could increase the long-term cost of capital utilized to calculate reporting unit fair values. Any such increase would primarily affect Spectra Energy's BC Pipeline unit in Western Canada, as well as the Distribution segment. However, if an increase in the cost of capital occurred, the effect on reporting unit fair values would be ultimately offset by a similar increase in these units' regulated revenues since those rates include a component that is based on the units' cost of capital.

13. Debt and Credit Facilities

Spectra Energy completed the following debt issuances during 2008 as part of its overall financing plan to fund capital expenditures and for other corporate purposes.

	Issue Date	Amount (in millions)	Interest Rate	Due Date
Spectra Energy Capital, LLC	April 2008	$ 500	6.20%	2018
Union Gas Limited	April 2008	198(a)	5.35%	2018
Westcoast Energy Inc.	July 2008	250(a)	5.60%	2019
Westcoast Energy Inc.	August 2008	48(a)	5.60%	2019
Union Gas Limited	September 2008	281(a)	6.05%	2038
Spectra Energy Capital, LLC	September 2008	250	5.90%	2013
Spectra Energy Capital, LLC	September 2008	250	7.50%	2038

(a) U.S. dollar equivalent

On July 31, 2008, Maritimes & Northeast Pipeline, L.L.C. paid $288 million to retire its outstanding bonds and bank debt, and an additional $54 million early-extinguishment premium for the bonds. The payment of the premium, a regulatory asset, is presented within Cash Flows from Financing Activities—Other on the Condensed Consolidated Statements of Cash Flows.

Credit Facilities Summary

	Expiration Date	Credit Facilities Capacity	Outstanding at September 30, 2008 Commercial Paper	Term Loan	Revolving Credit (in millions)	Letters of Credit	Total
Spectra Energy Capital, LLC	2012	$ 1,500(a)	$ 128	$ —	$ 654	$ 5	$ 787
Westcoast Energy Inc.	2011	188(b)	—	—	—	—	—
Union Gas Limited	2012	470(c)	131	—	—	—	131
Spectra Energy Partners, LP	2012	500(d)	—	68	172	—	240
Total		$ 2,658	$ 259	$ 68	$ 826	$ 5	$1,158

(a) Credit facility contains a covenant requiring the debt-to-total capitalization ratio to not exceed 65%. Lehman Brothers Commercial Bank (Lehman) is a lender in this facility and, as of September 30, 2008, was in default in its obligation to fund under the agreement. As a result of this default, Spectra Energy Capital, LLC (Spectra Capital) has the right to replace the lender; however, until a replacement is completed, Spectra Capital considers $48 million dollars of unfunded commitment from Lehman to be unavailable. Amounts outstanding under the revolving credit facility are classified within Short-Term Borrowings and Commercial Paper on the Condensed Consolidated Balance Sheets.

(b) Denominated in Canadian dollars totaling 200 million and contains a covenant that requires the debt-to-total capitalization ratio to not exceed 75%.

Index to Financial Statements

(c) Denominated in Canadian dollars totaling 500 million and contains a covenant that requires the debt-to-total capitalization ratio to not exceed 75% and a provision which requires Union Gas to repay all borrowings under the facility for a period of two days during the second quarter of each year.

(d) Contains a covenant requiring the borrower to collateralize the term loan with qualifying investment-grade securities in an amount equal to or greater than the outstanding principal amount of the loan. Lehman is also a lender in this facility. As Lehman Brothers Holding Inc. has filed bankruptcy, Spectra Energy Partners considers $16 million of unfunded commitment from Lehman to be unavailable. Amounts outstanding under the revolving credit facility are classified within Long-Term Debt.

The terms of the Spectra Energy Partners credit facility allow for liquidation of collateral to fund capital expenditures or certain acquisitions provided that an equal amount of term loan is converted to a revolving loan. Investments in marketable securities totaling $69 million at September 30, 2008 and $155 million at December 31, 2007 were pledged as collateral against the term loan. These investments are classified as Investments and Other Assets—Other on the Condensed Consolidated Balance Sheets.

Spectra Energy's debt and credit agreements contain various financial and other covenants. Failure to meet those covenants beyond applicable grace periods could result in accelerated due dates and/or termination of the agreements. As of September 30, 2008, Spectra Energy was in compliance with those covenants. In addition, credit agreements allow for acceleration of payments or termination of the agreements due to nonpayment, or in certain cases, due to the acceleration of other significant indebtedness of the borrower or certain of its subsidiaries. None of the debt or credit agreements contain material adverse change clauses.

14. Common Stock Repurchases

On May 6, 2008, Spectra Energy's Board of Directors authorized a share repurchase program of up to $600 million under which purchases of Spectra Energy common stock under the program were made from time to time in the open market. During the second and third quarters of 2008, Spectra Energy repurchased the cumulative authorized limit of $600 million of common shares, and the share repurchase program was concluded on August 8, 2008. The shares were retired upon repurchase and are presented as a reduction to Additional Paid-In Capital on the Condensed Consolidated Balance Sheets.

15. Fair Value Measurements

Effective January 1, 2008, Spectra Energy adopted the required provisions of SFAS No. 157, "Fair Value Measurements," for financial assets and liabilities. SFAS No. 157 defines fair value, establishes a consistent framework for measuring fair value and expands disclosure requirements about fair value measurements. SFAS No. 157 requires entities to, among other things, maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

SFAS No. 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

SFAS No. 157 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect Spectra Energy's market assumptions. In accordance with SFAS No. 157, these two types of inputs have created the following fair value hierarchy:

- Level 1—Quoted unadjusted prices for identical instruments in active markets.
- Level 2—Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3—Model-derived valuations in which one or more significant inputs or significant value drivers are unobservable.

Index to Financial Statements

The following table presents, for each of the fair value hierarchy levels, Spectra Energy's assets and liabilities that are measured at fair value on a recurring basis as of September 30, 2008.

Description	Balance Sheet Caption	Total	Level 1	Level 2	Level 3
		(in millions)			
Available-for-sale securities	Cash and cash equivalents	$236	$ 99	$ 137	$ —
Short term investment	Current assets-other	5	5	—	—
Available-for-sale securities	Investments and other assets-other	104	34	70	—
Employee benefit assets	Investments and other assets-other	24	24	—	—
Long-term derivative assets	Investments and other assets-other	53	—	11	42
Total Assets		$422	$ 162	$ 218	$ 42
Long-term derivative liabilities	Deferred credits and other liabilities-regulatory and other	15	—	15	—
Total Liabilities		$ 15	$ —	$ 15	$ —

The table below reconciles assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3).

	Short-Term Derivative Asset	Short-Term Derivative Liability	Long-Term Derivative Asset	Long-Term Derivative Liability

Index to Financial Statements

Level 2 Valuation Techniques

Fair values of Spectra Energy's available-for-sale securities, primarily fixed-income debt instruments and money market funds that are actively traded in the secondary market, are determined based on market-based prices. These valuations may include inputs such as quoted market prices of the exact or similar instruments, broker or dealer quotations, or alternative pricing sources that may include models or matrix pricing tools, with reasonable levels of price transparency.

Level 3 Valuation Techniques

Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques where at least one significant model assumption or input is unobservable. Level 3 financial instruments also include those for which the determination of fair value requires significant management judgment or estimation.

The fair values of Level 3 derivative instruments are estimated using proprietary valuation models that utilize both market observable and unobservable parameters. The long-term derivative asset and liability is valued using internal valuation models and techniques that include such inputs as forward natural gas and power prices, forward interest rates and foreign currency assumptions. The short-term derivative asset is valued based upon interest rates, natural gas options pricing for current and future months including volatility, foreign exchange fluctuations and swap values.

Gains and losses for the three and nine months ended September 30, 2008 associated with the long-term derivative asset and liability are reported in Other Income and Expenses, net on the Condensed Consolidated Statement of Operations and are of offsetting amounts.

During 2008, there were no adjustments to assets and liabilities measured at fair value on a nonrecurring basis.

16. Commitments and Contingencies

Environmental

Spectra Energy is subject to international, federal, state and local regulations regarding air and water quality, hazardous and solid waste disposal and other environmental matters. These regulations can be changed from time to time, imposing new obligations on Spectra Energy.

Remediation activities. Like others in the energy industry, Spectra Energy and its affiliates are responsible for environmental remediation at various contaminated sites. These include some properties that are part of ongoing Spectra Energy operations, sites formerly owned or used by Spectra Energy entities, and sites owned by third parties. Remediation typically involves management of contaminated soils and may involve groundwater remediation. Managed in conjunction with relevant international, federal, state/provincial and local agencies, activities vary with site conditions and locations, remedial requirements, complexity and sharing of responsibility. If remediation activities involve statutory joint and several liability provisions, strict liability, or cost recovery or contribution actions, Spectra Energy or its affiliates could potentially be held responsible for contamination caused by other parties. In some instances, Spectra Energy may share liability associated with contamination with other potentially responsible parties, and may also benefit from insurance policies or contractual indemnities that cover some or all cleanup costs. All of these sites generally are managed in the normal course of business or affiliate operations. Management believes that completion or resolution of these matters will not have a material adverse effect on Spectra Energy's consolidated results of operations, financial position or cash flows.

Index to Financial Statements

Extended Environmental Activities, Accruals. Included in Deferred Credits and Other Liabilities—Regulatory and Other on the Condensed Consolidated Balance Sheets were accruals related to extended environmental-related activities totaling $18 million as of September 30, 2008 and $22 million as of December 31, 2007. These accruals represent provisions for costs associated with remediation activities at some current and former sites, as well as other environmental contingent liabilities. Management believes that completion or resolution of these matters will not have a material adverse effect on Spectra Energy's consolidated results of operations, financial position or cash flows.

Litigation

Duke Energy Retirement Cash Balance Plan. A class action lawsuit was filed in federal court in South Carolina in 2006 against Duke Energy and the Duke Energy Retirement Cash Balance Plan. A second similar class action was also filed in 2006 alleging similar claims and seeking to represent the same class of defendants, but this second case was dismissed without prejudice, and only the first case has moved forward. Various causes of action were alleged in the class action lawsuit, including violations of the Employee Retirement Income Security Act of 1974 (ERISA) and the Age Discrimination in Employment Act. These allegations arise out of the conversion of the Duke Power Company Employees' Retirement Plan into the Duke Power Company Retirement Cash Balance Plan. The plaintiffs seek to represent present and former participants in the Duke Energy Retirement Cash Balance Plan. This group is estimated to include approximately 36,000 persons. Duke Energy filed its answer in March 2006, and various motions were thereafter filed by the parties, including plaintiffs' motion to certify a class, Duke Energy's motion to dismiss, and cross motions for summary judgment filed by both the plaintiffs and Duke Energy. The Court issued a series of rulings in June 2008 denying the plaintiffs class certification motion, dismissing certain of the causes of action originally filed by plaintiffs and allowing other causes of action to proceed. As a result of these rulings, the Plaintiffs re-filed a new Amended Class Action Complaint in June 2008 asserting and re-pleading the claims which the Court is allowing to proceed. Duke Energy filed a motion to dismiss in July 2008 requesting the dismissal of plaintiffs' breach of fiduciary claims. Plaintiffs filed a new motion to certify a class action in August 2008 and Duke Energy has filed a response to this motion. All motions are pending before the Court. A new scheduling order has been entered and it is expected that certain discovery activities will ensue with respect to the surviving causes of action.

In connection with the spin-off from Duke Energy in January 2007, Spectra Energy agreed to share with Duke Energy any liabilities or damages associated with this matter that relate to Spectra Energy employees that may be members of a plaintiff class if one is certified. At mediation, plaintiffs quantified their claims as being in excess of $150 million. However, based on management's current estimate of Spectra Energy employees that could be included in any plaintiff class, management believes that the final disposition of this matter will not have a material adverse effect on Spectra Energy's consolidated results of operations, financial position or cash flows.

Other Litigation and Legal Proceedings. Spectra Energy and its subsidiaries are involved in other legal, tax and regulatory proceedings in various forums arising in the ordinary course of business, including matters regarding contract, royalty, measurement and payment claims, some of which involve substantial monetary amounts. Spectra Energy has insurance coverage for certain of these losses should they be incurred. Management believes that the final disposition of these proceedings will not have a material adverse effect on Spectra Energy's consolidated results of operations, financial position or cash flows.

Spectra Energy has exposure to certain legal matters that are described herein. Spectra Energy had no material reserves as of September 30, 2008 or December 31, 2007 related to litigation matters in accordance with management's best estimate of probable loss as defined by SFAS No. 5, "Accounting for Contingencies."

Legal costs related to the defense of loss contingencies are expensed as incurred.

Index to Financial Statements

Other Commitments and Contingencies

Spectra Energy Islander East Pipeline Company, LLC (Spectra Islander), a wholly owned subsidiary, is a 50% equity partner and operator for the Islander East pipeline project which is owned by Islander East Pipeline Company, L.L.C. (Islander East), a proposed pipeline that would connect natural gas supplies to markets on Long Island, New York. This project has received FERC and other approvals but has been denied a Section 401 Water Quality Certificate (WQC) by the State of Connecticut and was the subject of an appeal before the 2nd Circuit U.S. Court of Appeals (the 2nd Circuit) filed in December 2006. On May 2, 2008, the 2nd Circuit denied Islander East's appeal concerning the State's second WQC denial. Islander East subsequently filed a petition with the 2nd Circuit seeking reconsideration of the court's denial in the WQC case which was denied on June 23, 2008. On September 18, 2008, Islander East filed a petition for certiorari with the U.S. Supreme Court seeking review of the State of Connecticut denial to issue the WQC.

In August 2007, a Connecticut U.S. District Court determined that the Secretary of Commerce's 2004 decision to override the State's denial to issue a Coastal Zone Management Act (CZM) approval was not supported by the record and remanded the matter back to the Secretary of Commerce. Islander East and the U.S. Office of Solicitor General (the Solicitor General) subsequently filed appeals with the 2nd Circuit to overturn the lower court's decision to remand and the State filed a motion to dismiss claiming the U.S. District Court's remand order was non-appealable. In January 2008, the 2nd Circuit granted the State's motion to dismiss. In March 2008, Islander East and the Solicitor General filed separate petitions with the 2nd Circuit seeking reconsideration of the 2nd Circuit's decision in the CZM case. On June 23, 2008, the 2nd Circuit denied the petitions for both the CZM and WQC matters. The Secretary of Commerce has issued a stay in any remand activity due to the pending request for U.S. Supreme Court review of the WQC matter.

Management continues to believe that there are sufficient factual and legal bases supporting Islander East's position that the State's denial of the WQC was in error. Due to the appellate process, management has deferred the project completion date from its previous plans to accommodate the U.S. Supreme Court's review of the petition for a writ of certiorari. However, Islander East remains committed to serving this market area through the development of a future firm transportation project. As of September 30, 2008, Islander East had incurred and capitalized cumulative development costs of $60 million (100% Islander East project level). Algonquin Gas Transmission, LLC (Algonquin), a wholly owned subsidiary, also has a companion project, the AGT Islander East Lease Project. As of September 30, 2008 Algonquin had incurred and capitalized cumulative development costs of $20 million associated with the AGT Islander East Lease Project. Management expects the development and material costs incurred to date could be utilized by other capital projects of Spectra Energy or a deferred project of Islander East, or with respect to materials, sold to third parties.

See Note 17 for a discussion of guarantees and indemnifications.

17. Guarantees and Indemnifications

Spectra Energy and certain of its subsidiaries have various financial guarantees and indemnifications which are issued in the normal course of business. As discussed below, these contracts include financial guarantees, stand-by letters of credit, debt guarantees, surety bonds and indemnifications. Spectra Energy and its subsidiaries enter into these arrangements to facilitate a commercial transaction with a third party by enhancing the value of the transaction to the third party. To varying degrees, these guarantees involve elements of performance and credit risk, which are not included on the Condensed Consolidated Balance Sheets. The possibility of Spectra Energy having to honor its contingencies is largely dependent upon future operations of various subsidiaries, investees and other third parties, or the occurrence of certain future events.

Spectra Energy has issued performance guarantees to customers and other third parties that guarantee the payment and performance of other parties, including certain non-wholly owned entities. In connection with the spin-off of Spectra Energy to Duke Energy shareholders, certain guarantees that were previously issued by Spectra Energy were assigned to, or replaced by, Duke Energy as guarantor in 2006. For any remaining guarantees of other Duke Energy obligations, Duke Energy has indemnified Spectra Energy against any losses incurred under these guarantee arrangements.

Index to Financial Statements

The maximum potential amount of future payments Spectra Energy could have been required to make under these performance guarantees as of September 30, 2008 was approximately $460 million, which has been indemnified by Duke Energy, as discussed above. Approximately $33 million of the performance guarantees will expire during the remainder of 2008 through 2010, with the remaining performance guarantees expiring after 2010 or having no contractual expiration.

Additionally, Spectra Energy has issued joint and several guarantees to some of the Duke/Fluor Daniel (D/FD) project owners, guaranteeing the performance of D/FD under its engineering, procurement and construction contracts and other contractual commitments. D/FD is one of the entities transferred to Duke Energy in connection with the spin-off of Spectra Energy from Duke Energy. Substantially all of these guarantees have no contractual expiration and no stated maximum amount of future payments that Spectra Energy could be required to make. Fluor Enterprises Inc., as 50% owner in D/FD, has issued similar joint and several guarantees to the same D/FD project owners. In accordance with the D/FD partnership agreement, each of the partners is responsible for 50% of any payments to be made under those guarantees.

Westcoast has issued performance guarantees to third parties guaranteeing the performance of unconsolidated entities, such as equity method investments, and of entities previously sold by Westcoast to third parties. Those guarantees require Westcoast to make payment to the guaranteed third party upon the failure of such unconsolidated or sold entity to make payment under some of its contractual obligations, such as debt, purchase contracts and leases. Certain guarantees that were previously issued by Westcoast for obligations of entities that remained a part of Duke Energy are considered guarantees of third-party performance; however, Duke Energy has indemnified Spectra Energy against any losses incurred under these guarantee arrangements.

The maximum potential amount of future payments Westcoast could have been required to make under those performance guarantees of non-wholly owned entities and third-party entities as of September 30, 2008 was $56 million. Guarantees related to Westcoast have no contractual expiration.

Spectra Energy has entered into various indemnification agreements related to purchase and sale agreements and other types of contractual agreements with vendors and other third parties. These agreements typically cover environmental, tax, litigation and other matters, as well as breaches of representations, warranties and covenants. Typically, claims may be made by third parties for various periods of time, depending on the nature of the claim. Spectra Energy's potential exposure under these indemnification agreements can range from a specified amount, such as the purchase price, to an unlimited dollar amount, depending on the nature of the claim and the particular transaction. Spectra Energy is unable to estimate the total potential amount of future payments under these indemnification agreements due to several factors, such as the unlimited exposure under certain guarantees.

At September 30, 2008, the amounts recorded for the guarantees and indemnifications described above, including the indemnifications by Duke Energy to Spectra Energy, are not material, both individually and in the aggregate.

18. Employee Benefit Plans

Retirement Plans. Effective with the separation from Duke Energy on January 2, 2007, Spectra Energy established a new qualified non-contributory defined benefit (DB) retirement plan for U.S. employees and new non-qualified plans for various executive retirement and savings plans. Spectra Energy's Westcoast subsidiary maintains retirement plans that cover substantially all employees of Spectra Energy's Canadian operations. In accordance with the separation agreement with Duke Energy, $49 million of net qualified pension plan assets and $52 million in liabilities associated with various executive retirement and savings plans were transferred to Spectra Energy in 2007.

[Index to Financial Statements](#)

Spectra Energy's policy is to fund amounts for U.S. qualified retirement plans on an actuarial basis to provide assets sufficient to meet benefits to be paid to plan participants. Spectra Energy did not make contributions to its U.S. retirement plans in the nine-month periods ended September 30, 2008 and 2007, and does not anticipate making any contributions to the U.S. plans during the remainder of 2008.

Spectra Energy's policy is to fund its DB retirement plans in Canada on an actuarial basis and in accordance with Canadian pension standards legislation in order to accumulate assets sufficient to meet benefit obligations. Contributions to the defined contribution (DC) retirement plan are determined in accordance with the terms of the plan. Spectra Energy made contributions to the Canadian qualified DB plans of $28 million and $31 million during the nine-month periods ended September 30, 2008 and 2007, respectively. Spectra Energy anticipates that it will make additional contributions of approximately $15 million to the Canadian DB plans during the remainder of 2008, for a total of $43 million of contributions in 2008. Spectra Energy also made contributions to the Canadian DC plan of $4 million and $3 million during the nine-month periods ended September 30, 2008 and 2007, respectively. Spectra Energy anticipates that it will make additional contributions of approximately $1 million to the Canadian DC plans during the remainder of 2008, for a total of $5 million of contributions in 2008.

Other Post-Retirement Benefit Plans. Spectra Energy and most of its subsidiaries provide certain health care and life insurance benefits for retired employees on a contributory and non-contributory basis. In accordance with the separation agreement, $194 million in liabilities associated with other post-retirement benefits were transferred to Spectra Energy upon the separation from Duke Energy.

19. Consolidating Financial Information

Spectra Energy Corp has fully and unconditionally guaranteed the payment of principal and interest under all series of notes outstanding under the Senior Indenture of Spectra Energy Capital, LLC (Spectra Capital), the wholly owned, consolidated subsidiary of Spectra Energy Corp. In accordance with Securities and Exchange Commission (SEC) rules, the following condensed consolidating financial information is presented. The information shown for Spectra Energy Corp and Spectra Capital is presented utilizing the equity method of accounting for investments in subsidiaries, as required. The non-guarantor subsidiaries column represents all wholly owned subsidiaries of Spectra Capital. This information should be read in conjunction with Spectra Energy's accompanying condensed consolidated financial statements and notes thereto.

20. New Accounting Pronouncements

The following new accounting pronouncements were adopted during the nine months ended September 30, 2008:

SFAS No. 157, "Fair Value Measurements." In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 157, which defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. In February 2008, the FASB issued FASB Staff Position (FSP) No. FAS 157-1, "Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13." Also in February 2008, the FASB issued FSP No. 157-2, "Effective Date of FASB Statement No. 157," which delays the effective date of SFAS No. 157 to fiscal years beginning after November 15, 2008 for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The adoption of SFAS No. 157 and FSP No. FAS 157-1 by Spectra Energy effective January 1, 2008 did not have a material impact on Spectra Energy's consolidated results of operations, financial position or cash flows. See Note 15 for further discussion. Spectra Energy has elected to defer the adoption of SFAS No. 157 for its goodwill impairment test and the measurement of asset retirement obligations until January 1, 2009 as permitted.

In October 2008, the FASB issued FSP No. FAS 157-3, *"Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active,"* which clarifies the application of SFAS No. 157 in determining the fair value of a financial asset when the market for that financial asset is not active. FSP No. FAS 157-3 was effective upon issuance, including prior periods for which financial statements have not been issued. Revisions in fair values resulting from a change in the valuation technique or its application would be accounted for as a change in accounting estimate. The adoption of FSP No. FAS 157-3 had no impact on Spectra Energy's consolidated results of operations, financial position or cash flows.

SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities." In February 2007, the FASB issued SFAS No. 159, which permits entities to choose to measure certain financial instruments at fair value. Spectra Energy has determined it will not elect fair value measurements for financial assets and financial liabilities included in the scope of SFAS No. 159.

EITF 06-11, "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards." In June 2007, the FASB Emerging Issues Task Force (EITF) reached a consensus that a realized income tax benefit from dividends or dividend equivalents that are charged to retained earnings and are paid to employees for equity classified nonvested equity shares, nonvested equity share units, and outstanding equity share options should be recognized as an increase to additional paid-in capital. The amount recognized in additional paid-in capital for the realized income tax benefit from dividends on those awards should be included in the pool of excess tax benefits available to absorb tax deficiencies on share-based payment awards. EITF 06-11 was applied to the income tax benefits that result from dividends on equity-classified employee share-based payment awards that are declared after December 31, 2007. The effect of adopting EITF 06-11 was not material to Spectra Energy's consolidated results of operations, financial position or cash flows as of and for the nine-month period ended September 30, 2008 and is not expected to be material to future periods.

The following new accounting pronouncements have been issued, but have not yet been adopted as of September 30, 2008:

SFAS No. 141R, "Business Combinations." In December 2007, the FASB issued SFAS No. 141R which replaces SFAS No. 141, "Business Combinations." SFAS No. 141R requires the acquiring entity in a business combination to recognize all and only the assets acquired and liabilities assumed in the transaction, establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed, and requires the acquirer to disclose to investors and other users all of the information they need to evaluate and understand the nature and financial effect of the business combination. SFAS No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008 and cannot be early adopted.

Index to Financial Statements

SFAS No. 160, "Noncontrolling Interest in Consolidated Financial Statements." In December 2007, the FASB issued SFAS No. 160 which requires all entities to report noncontrolling (minority) interests in subsidiaries as equity in the consolidated financial statements. SFAS No. 160 eliminates the diversity that currently exists in accounting for transactions between an entity and noncontrolling interests by requiring they be treated as equity transactions. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Early adoption is prohibited.

When adopting the presentation and disclosure items, retrospective application to conform previously reported financial statements to the new presentation requirements is required. Changes to reflect the new measurement guidance for increases or decreases in ownership and other changes must be done prospectively. The new requirements for noncontrolling interests, results of operations and comprehensive income of subsidiaries change the presentation of operating results, related per-share information, and equity. SFAS No. 160 requires net income and comprehensive income to be displayed for both the controlling and the noncontrolling interests. Additional required disclosures and reconciliations include a separate schedule that shows the effects of any transactions with the noncontrolling interests on the equity attributable to the controlling interest.

Spectra Energy continues to examine the balances previously reflected as minority interests on the Condensed Consolidated Balance Sheet and of the amount of minority interest net income previously reflected within net income. Spectra Energy cannot currently estimate the full effect that this standard will have on its historical or future consolidated results of operations, financial position and cash flows. However, previously deferred gains associated with the formation of Spectra Energy Partners totaling approximately $60 million, currently classified within Deferred Credits and Other Liabilities—Regulatory and Other on the Condensed Consolidated Balance Sheets at September 30, 2008 and December 31, 2007, is expected to be reclassified to Stockholders' Equity upon adoption of this standard.

SFAS No. 161 "Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133." In March 2008, the FASB issued SFAS No. 161 which amends and expands the disclosure requirements for SFAS No. 133 with the intent to provide users of financial statements an enhanced understanding of how and why derivative instruments are used, how derivative instruments and related hedged items are accounted for under SFAS No. 133 and its related interpretations and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. SFAS No. 161 is effective for fiscal years and interim periods within those fiscal years, beginning on or after November 15, 2008.

FSP No. FAS 142-3, "Determination of the Useful Life of Intangible Assets." In April 2008, the FASB issued FSP No. FAS 142-3 which amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, "Goodwill and Other Intangible Assets." FSP No. FAS 142-3 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. Spectra Energy does not expect the adoption of FSP No. FAS 142-3 to have a material impact on its consolidated results of operations, financial position or cash flows.

21. Subsequent Events

On October 7, 2008, Spectra Energy entered into an agreement to sell certain interests in the natural gas gathering and processing facilities within the Western Canada Transmission & Processing segment. See Note 7 for further discussion.

Index to Financial Statements

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

INTRODUCTION

Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Condensed Consolidated Financial Statements. As previously discussed, the Condensed Consolidated Statements of Operations and related discussions contained in this report have been re-cast to reflect the operating results of certain Western Canada Transmission & Processing natural gas gathering and processing facilities as discontinued operations for all periods presented. See Note 7 of Notes to Condensed Consolidated Financial Statements for further discussion.

Executive Overview

For the three months ended September 30, 2008 and 2007, Spectra Energy reported net income of $296 million and $234 million, respectively. For the nine months ended September 30, 2008 and 2007, Spectra Energy reported net income of $958 million and $666 million, respectively. The increase in net income for the three and nine-month periods primarily reflects the positive impact of higher NGL prices, which correlate to higher crude oil prices, during the first nine months of 2008 on the earnings from Field Services. Crude oil averaged $113 per barrel for the nine months ended September 30, 2008 versus $67 per barrel during the same period in 2007.

The highlights for the three months and nine months ended September 30, 2008 include:

- U.S. Transmission's earnings benefited from completed expansion projects and a customer bankruptcy settlement in the second quarter of 2008, offset by higher project development costs charged to expense, primarily in the third quarter 2008, as well as higher operating and administrative costs.
- Distribution results reflect higher storage and transportation revenues and a stronger Canadian dollar comparing the 2008 and 2007 periods.
- Western Canada Transmission & Processing earnings increased primarily as a result of higher volumes and stronger NGL prices related to the Empress processing plant and a stronger Canadian dollar.
- Field Services earnings reflect higher NGL prices, improved efficiencies and higher volumes, partially offset by lost revenues in the third quarter 2008 resulting from Hurricane Ike.
- Results for Other include costs associated with the spin-off of Spectra Energy in 2007, mostly offset by the favorable resolution of a legal matter in 2007 and higher benefits and incentive costs in 2008.

Spectra Energy reported $1.5 billion of capital and investment expenditures in the first nine months of 2008 of the approximately $2.2 billion that is projected for the full year, including expansion capital of approximately $1.6 billion. As of early November 2008, Spectra Energy's 2008 expansion projects are substantially complete, with returns on these projects expected to be at the high end of those originally anticipated. Expansion expenditures for 2009 are currently expected to be about one-half of the amount of 2008, mainly as a result of many of the larger projects coming into service in 2008 or early 2009. Spectra Energy continues to assess projected long-term market requirements and, based on the current assessment, believes that expansion expenditures will continue to support strategic objectives.

Through September 30, 2008, Spectra Energy has successfully issued approximately $1.8 billion of new long-term debt, completing the new long-term debt issuances expected for 2008. In addition, Spectra Energy continues to have ongoing access to over $2.5 billion in credit facilities and has continued to utilize commercial paper and revolving lines of credit as needed to fund liquidity needs throughout September and October 2008 when there has been significant general market disruption around credit.

On May 6, 2008, Spectra Energy's Board of Directors approved a share repurchase program, authorizing Spectra Energy to purchase in the aggregate up to $600 million of shares of its outstanding common stock. This share repurchase program was completed on August 8, 2008.

Index to Financial Statements

On July 3, 2008, Spectra Energy declared a 9% increase in its quarterly dividend from $0.23 to $0.25 per common share. The new annualized dividend rate is $1.00 per share, representing a nearly 14% increase over the 2007 level of $0.88 per share.

Three and Nine Months Ended September 30, 2008 Compared to Same Periods in 2007

Operating Revenues. Operating revenues for the three and nine months ended September 30, 2008 increased $130 million or 14%, and $496 million or 15%, respectively, compared to the same periods in 2007. The increases were driven primarily by:

- higher NGL prices associated with the Empress operations,
- the effects of a stronger Canadian dollar on revenues at Western Canada Transmission & Processing and Distribution, and
- expansion projects placed in service in late 2007 at U.S. Transmission.

Operating Expenses. Operating expenses for the three and nine months ended September 30, 2008 increased $115 million or 18%, and $388 million or 17%, respectively, compared to the same periods in 2007. The increases were driven primarily by:

- higher prices and volumes of natural gas purchased for the Empress facility,
- the effects of a stronger Canadian dollar at Western Canada Transmission & Processing and Distribution,
- an increase in project development costs as a result of the capitalization of previously expensed costs on northeast expansions in 2007, and increased operating and administrative costs at U.S. Transmission.

For a more detailed discussion of operating revenues and expenses, see the segment discussions that follow.

[Index to Financial Statements]

Gains on Sales of Other Assets and Other, net. Gains on sales of other assets and other, net for the three and nine months ended September 30, 2008 decreased $5 million and increased $26 million, respectively, compared to the same periods in 2007. The increase year-to-date, was primarily due to a 2008 second quarter customer bankruptcy settlement.

Operating Income. Operating income for the three and nine months ended September 30, 2008 increased $10 million, or 3%, and $134 million, or 13%, respectively, compared to the same periods in 2007 primarily as a result of higher NGL prices that benefited the Empress operations, a stronger Canadian dollar, a 2008 customer bankruptcy settlement, and higher earnings from expansion projects, partially offset by higher project development costs charged to expense as well as higher operating and administrative costs.

Other Income and Expenses, net. Other income and expenses, net for the three and nine months ended September 30, 2008 increased $96 million and $324 million, respectively, compared to the same periods in 2007. The increases represent higher equity in earnings from the Field Services segment, primarily reflecting higher commodity prices in 2008 compared to 2007.

Interest Expense. Interest expense for the three and nine months ended September 30, 2008 increased $7 million and $3 million, respectively, compared to the same periods in 2007, reflecting the successful completion of Spectra Energy's planned debt issuances in 2008 and a stronger Canadian dollar, partially offset by lower balances and rates on commercial paper, higher interest costs capitalized and increased benefits from interest rate swaps in 2008.

Minority Interest Expense. Minority interest expense for the nine months ended September 30, 2008 increased $5 million compared to the same period in 2007, primarily as a result of earnings from Spectra Energy Partners formed in July 2007.

Income Tax Expense from Continuing Operations. Income tax expense from continuing operations for the three and nine months ended September 30, 2008 increased $35 million and $141 million, respectively, as a result of higher earnings from continuing operations. The effective tax rate for income from continuing operations for the three months ended September 30, 2008 was 32.7% as compared to 31.9% for the same period in 2007. The lower effective tax rate in the prior period was primarily a result of an adjustment in the 2007 period for final 2006 tax returns in Canada. The effective tax rate for the nine months ended September 30, 2008 was 32.0% as compared to 32.3% for the same period of 2007.

Income (Loss) from Discontinued Operations, net of tax. Income from discontinued operations for the three and nine months ended September 30, 2008 decreased $6 million and $21 million, respectively. The year-to-date variance is driven by proceeds received from a litigation settlement in the second quarter of 2007. The decreases for three months and nine months ended September 30, 2008 also reflect the operating results of certain Western Canada Transmission & Processing natural gas gathering and processing facilities. In October 2008, Spectra Energy entered into an agreement to sell its interests in these facilities.

Extraordinary Items, net of tax. Extraordinary items, net of tax for the three and nine months ended September 30, 2007 reflected an extraordinary loss in the third quarter of 2007 of $4 million, net of tax. Union Gas received a decision from the OEB in 2006 that effectively caused a portion of its storage operations to become unregulated. As a result of an additional and related August 2007 decision from the OEB, Spectra Energy recorded an extraordinary loss to further remove the effects of storage regulation from the consolidated balance sheet.

Index to Financial Statements

Segment Results

Management evaluates segment performance based on EBIT from continuing operations, after deducting minority interest expense related to those earnings. On a segment basis, EBIT excludes discontinued operations, represents all profits from continuing operations (both operating and non-operating) before deducting interest and taxes, and is net of the minority interest expense related to those profits. Cash, cash equivalents and short-term investments are managed centrally by Spectra Energy, so the gains and losses on foreign currency transactions, and interest and dividend income on those balances, are excluded from the segments' EBIT. Management considers segment EBIT to be a good indicator of each segment's operating performance from its continuing operations, as it represents the results of Spectra Energy's ownership interest in operations without regard to financing methods or capital structures.

Spectra Energy's segment EBIT may not be comparable to similarly titled measures of other companies because other companies may not calculate EBIT in the same manner. Segment EBIT is summarized in the following table, and detailed discussions follow.

EBIT by Business Segment

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(in millions)			
U.S. Transmission	$ 213	$ 230	$ 683	$ 673

Total reportable segment EBIT	609	511	1,926	1,474
Other	(9)	(15)	(57)	(56)
Total reportable segment and other EBIT	600	496	1,869	1,418
Interest expense	163	156	470	467
Interest income and other (a)	7	5	16	14
Consolidated earnings from continuing operations before income taxes	$ 444	$ 345	$ 1,415	$ 965

(a) Includes foreign currency transaction gains and losses, additional minority interest expense not allocated to the segment results and intersegment eliminations.

Minority interest expense as presented in the following segment-level discussions includes only minority interest expense related to EBIT of non-wholly owned entities. It does not include minority interest expense related to interest and taxes of those operations. The amounts discussed below include intercompany transactions that are eliminated in the Condensed Consolidated Financial Statements.

(a) Trillion British thermal units. Revenues are not significantly affected by pipeline throughput fluctuations, since revenues are primarily composed of demand charges.

Three Months Ended September 30, 2008 Compared to Same Period in 2007

Operating Revenues. The $16 million increase was driven primarily by:

- a $16 million increase from expansion projects placed in service in late 2007 and third quarter 2008, and
- a $6 million increase in processing revenues associated with pipeline operations, primarily from higher NGL prices.

Operating, Maintenance and Other. The $30 million increase was driven primarily by:

- a $19 million increase in operating and administrative costs including fuel, utilities, equipment repairs, benefit and software costs, and
- an $8 million increase in project development costs expensed when comparing the periods. In accordance with Spectra Energy's policy, project development costs are initially expensed until it is determined that recovery of such costs through regulated revenues of the completed project is probable, at which time inception-to-date costs of the project are capitalized and operating expenses are reduced.

Other Income and Expenses, net. The $2 million decrease was primarily a result of lower equity income attributable to the net capitalization of project development costs in 2007 on SESH and Gulfstream's Phase IV expansion projects totaling $18 million, mostly offset by the increased capitalization of interest associated with the SESH project.

EBIT. The $17 million decrease reflects higher project development expenses, primarily resulting from the capitalization of these expenses in the prior quarter, and increased operating and administrative costs, partially offset by higher earnings from expansion projects placed in service in late 2007 and higher earnings from capitalized interest on construction projects during the 2008 quarter.

Nine Months Ended September 30, 2008 Compared to Same Period in 2007

Operating Revenues. The $72 million increase was driven primarily by:

- a $46 million increase from expansion projects placed in service in late 2007 and third quarter 2008,

Index to Financial Statements

- a $23 million increase in processing revenues associated with pipeline operations, primarily from higher NGL prices, and
- a $9 million increase resulting from a stronger Canadian dollar, related to M&N LP.

Operating, Maintenance and Other. The $105 million increase was driven primarily by:

- a $50 million increase in project development costs, reflecting expensed project development costs of $28 million in 2008 and a net benefit of $22 million in 2007 due to the capitalization of previously expensed costs on northeast expansions during that period,
- a $35 million increase in operating and administrative costs including pipeline integrity, fuel, utilities, equipment repairs, labor and outside services and software costs, and
- a $16 million increase in ad valorem taxes primarily as a result of favorable valuations in 2007.

Depreciation and Amortization. The $12 million increase was driven primarily by expansion projects placed into service in 2007.

Gains on Sales of Other Assets and Other, net. The $31 million increase reflects a customer bankruptcy settlement in June 2008.

Other Income and Expenses, net. The $31 million increase was primarily a result of higher equity income from unconsolidated affiliates attributable to the capitalization of interest on construction projects and $7 million of lower project development costs charged to expense, both of which are primarily for the SESH project.

Minority Interest Expense. The $7 million increase was driven primarily by earnings from Spectra Energy Partners formed in July 2007.

EBIT. The $10 million increase reflects a gain on a customer bankruptcy settlement, higher earnings from expansion projects and higher commodity prices for gas processing associated with pipeline operations. These increases were partially offset by an increase in project development costs charged to expense and increased operating and administrative costs.

Index to Financial Statements

Three Months Ended September 30, 2008 as Compared to Same Period in 2007

Operating Revenues. The $14 million increase was driven primarily by:

- a $5 million increase due to growth in the number of customers,
- an $11 million increase from higher natural gas prices passed through to customers without a mark-up, and
- a $13 million increase in storage and transportation revenues primarily due to favorable market conditions and growth of the transmission system, partially offset by
- a $14 million decrease in customer usage of natural gas.

Natural Gas Purchased. The $1 million decrease was driven primarily by:

- an $11 million decrease in customer usage of natural gas, and
- a $4 million decrease related to fuel used in operations, partially offset by
- a $3 million increase due to growth in the number of customers, and
- an $11 million increase related to higher natural gas prices passed through to customers without a mark-up.

Depreciation and Amortization. The $3 million increase was due to a higher asset base resulting primarily from completion of Phase II of the Dawn-Trafalgar expansion.

Gains on Sales of Other Assets and Other, net. The $5 million decrease was due to a gain on the sale of land in 2007.

EBIT. The $4 million increase was primarily attributable to higher storage and transportation revenues.

Nine Months Ended September 30, 2008 as Compared to Same Period in 2007

Operating Revenues. The $103 million increase was driven primarily by:

- a $146 million increase resulting from a stronger Canadian dollar,
- a $30 million increase due to growth in the number of customers, and
- a $32 million increase in storage and transportation revenues primarily due to favorable market conditions and growth of the transmission system, partially offset by
- a $63 million decrease from lower natural gas prices passed through to customers without a mark-up,
- a $22 million decrease in customer usage of natural gas, and
- a $15 million decrease due to an unfavorable decision from the OEB on unregulated storage revenues in the second quarter of 2008.

Natural Gas Purchased. The $21 million increase was driven primarily by:

- an $85 million increase resulting from a stronger Canadian dollar, and
- a $28 million increase due to growth in the number of customers, partially offset by
- a $63 million decrease related to lower natural gas prices passed through to customers without a mark-up, and
- a $20 million decrease in customer usage of natural gas.

Three Months Ended September 30, 2008 Compared to Same Period in 2007

Operating Revenues. The $99 million increase was driven primarily by:

- an $89 million increase due to higher volumes and stronger NGL sales prices associated with the Empress operations, and
- a $4 million increase mainly due to higher processing volumes in the Pine River area of northeastern British Columbia.

Natural Gas and Petroleum Products Purchased. The $69 million increase was driven primarily by higher volumes and prices of natural gas purchased for the Empress facility.

Operating, Maintenance and Other. The $17 million increase was driven primarily by:

- a $7 million increase caused by timing of operating expenses between the quarters,
- a $3 million increase in plant fuel and electricity costs at the Empress facility, and
- a $3 million increase due to higher repairs and maintenance costs for processing plants.

EBIT. The $12 million increase was driven primarily by higher volumes and stronger NGL prices that benefited the Empress operations, partially offset by higher operating expenses.

Index to Financial Statements

Nine Months Ended September 30, 2008 Compared to Same Period in 2007

Operating Revenues. The $322 million increase was driven primarily by:

- a $202 million increase primarily due to stronger NGL sales prices and higher volumes associated with the Empress operations,
- a $91 million increase resulting from a stronger Canadian dollar, and
- a $13 million increase mainly due to higher processing volumes in the Pine River area of northeastern British Columbia.

Natural Gas and Petroleum Products Purchased. The $144 million increase was driven by:

- a $115 million increase mainly from higher prices and volumes of natural gas purchased for the Empress facility, and
- a $28 million increase resulting from a stronger Canadian dollar.

Operating, Maintenance and Other. The $50 million increase was driven by:

- a $28 million increase resulting from a stronger Canadian dollar,
- an $11 million increase in plant fuel and electricity costs at the Empress facility, and
- a $4 million increase caused by higher repairs and maintenance costs for processing plants.

Depreciation and Amortization. The $16 million increase was driven primarily by:

- a $9 million increase resulting from a stronger Canadian dollar, and
- a $6 million increase due to increased pipeline depreciation rates as a result of a pipeline rate settlement as well as capital additions.

Minority Interest Expense. The $3 million decrease was driven primarily by the purchase of the Income Fund in the second quarter of 2008. Prior to the acquisition, the Income Fund indirectly held 54% of Spectra Energy's consolidated Midstream operations and Westcoast indirectly held the remaining 46%.

EBIT. The $115 million increase was driven primarily by higher NGL prices and volumes that benefited the Empress operations, and a stronger Canadian dollar.

Index to Financial Statements

Three Months Ended September 30, 2008 Compared to Same Period in 2007

EBIT. Higher equity in earnings of $99 million were primarily the result of the following variances, each representing Spectra Energy's 50% ownership portion of the earnings drivers at DCP Midstream:

- an $82 million increase from commodity-sensitive processing arrangements due to increased commodity prices,
- a $26 million increase in marketing margins related to derivative timing gains associated with gas marketing positions, and
- a $23 million increase in earnings from DCP Midstream Partners primarily as a result of mark-to-market gains on hedges used to protect distributable cash flows, partially offset by
- a $17 million decrease resulting primarily from increased operating and maintenance expenses due to growth, inflation and increased maintenance activity, and higher depreciation expense primarily attributable to asset acquisitions, partially offset by decreased general and administrative costs as a result of $3 million of costs in 2007 associated with DCP Midstream's initiative to create stand alone corporate functions separate from its two partners,
- an $11 million decrease in gathering and processing margins primarily attributable to decreased natural gas and NGL volumes as a result of hurricanes and adverse weather events, partially offset by increased gas and NGL volumes and improved system efficiencies in non weather-impacted areas, and
- a $4 million decrease due to higher net interest expense resulting from the increased debt associated with acquisitions in 2007.

Nine Months Ended September 30, 2008 Compared to Same Period in 2007

EBIT. Higher equity in earnings of $302 million were primarily the result of the following variances, each representing Spectra Energy's 50% ownership portion of the earnings drivers at DCP Midstream:

- a $317 million increase from commodity-sensitive processing arrangements, due to increased commodity prices, and
- a $28 million increase in gathering and processing margins primarily attributable to increased natural gas volumes, partially due to lower natural gas volumes in 2007 from the effects of severe weather, as well as increased NGL volumes due to improved plant efficiencies, partially offset by decreased natural gas and NGL volumes as a result of hurricanes and adverse weather events, partially offset by
- a $27 million decrease resulting from increased operating and maintenance expenses due to growth, inflation and increased maintenance activity, and higher depreciation expense primarily attributable to asset acquisitions, partially offset by decreased general and administrative costs as a result of $9 million of costs in 2007 associated with DCP Midstream's initiative to create stand alone corporate functions separate from its two partners,
- a $13 million decrease due to higher net interest expense resulting from the increased debt associated with acquisitions in 2007, and
- a $7 million decrease in earnings from DCP Midstream Partners primarily as a result of mark-to-market losses on hedges used to protect distributable cash flows.

EBIT	$ (9)	$(15)	$ 6	$(57)	$(56)	$ (1)

Three Months Ended September 30, 2008 as Compared to Same Period in 2007

EBIT. The 2007 period included $5 million of costs associated with the spin-off of Spectra Energy. The 2008 third quarter results included a benefit for the favorable resolution of an insurance contingency offset by higher benefit costs in 2008 when compared to 2007.

Nine Months Ended September 30, 2008 as Compared to Same Period in 2007

EBIT. The 2007 period included $16 million of costs associated with the spin-off of Spectra Energy. Excluding these costs, EBIT was lower by $17 million primarily as a result of a benefit recognized from the favorable resolution of a legal matter in 2007 and higher benefits and incentive costs in 2008.

LIQUIDITY AND CAPITAL RESOURCES

Operating Cash Flows

Net cash provided by operating activities increased $544 million to $1,396 million for the nine months ended September 30, 2008 compared to the same period in 2007. This change was driven primarily by:

- an increase of $312 million in distributions received from unconsolidated affiliates in 2008, primarily from DCP Midstream, and
- a January 2007 payment of $100 million, which was accrued at December 31, 2006, to resolve certain litigation matters associated with discontinued LNG operations.

Net working capital was negative $737 million as of September 30, 2008, which included short-term borrowings and commercial paper totaling $913 million and current maturities of long-term debt of $221 million. Spectra Energy will rely upon cash flows from operations and additional financing transactions to fund its liquidity and capital requirements for the next 12 months including issuances of short-term and long-term debt. See also Financing Cash Flows and Liquidity for discussions of effective shelf registrations, available credit facilities and new debt issuances.

Capital market declines experienced during the third quarter of 2008 have adversely impacted the market value of investment assets used to fund Spectra Energy's defined benefit employee retirement plans. Given the current volatility of capital market returns, Spectra Energy is unable to determine the impact of such market returns on future funding requirements or expense levels for 2009 and beyond. However, based on activity through the third quarter of 2008, management believes there will be no material impacts on Spectra Energy's consolidated results of operations, financial position or liquidity.

[Index to Financial Statements](#)

Investing Cash Flows

Cash flows used in investing activities increased $447 million to $1,564 million in the first nine months of 2008 compared to the same period in 2007. This change was driven primarily by:

- a $595 million increase in capital and investment expenditures in 2008 as a result of expansion projects underway at each of Spectra Energy's segments, and
- the $274 million acquisition on May 1, 2008 of the units of the Income Fund that were held by non-affiliated holders, partially offset by
- a net increase of $268 million in proceeds from the sales and maturities of available-for-sale securities primarily at Spectra Energy Partners, and
- distributions received from DCP Midstream of $179 million in 2008 representing a return of capital.

	Nine Months Ended September 30,	
	2008	2007
	(in millions)	
Capital and Investment Expenditures		
U.S. Transmission	$ 1,098	$ 573
Distribution	274	224
Western Canada Transmission & Processing	139	114
Other	24	29
Total	$ 1,535	$ 940

Capital and investment expenditures for the nine months ended September 30, 2008 consisted of $1,224 million for expansion projects and $311 million for maintenance and other projects.

Spectra Energy continues to project 2008 capital and investment expenditures of approximately $2.2 billion, consisting of approximately $1.5 billion for U.S. Transmission, $0.4 billion for Distribution and $0.3 billion for Western Canada Transmission & Processing. These expenditures exclude the Income Fund acquisition. Total projected 2008 capital and investment expenditures include approximately $1.6 billion of expansion capital expenditures and $0.6 billion for maintenance and upgrades of existing plants, pipelines and infrastructure to serve growth. Spectra Energy expects to place into service approximately $1.8 billion of capital expansion projects in 2008.

Financing Cash Flows and Liquidity

Net cash provided by financing activities totaled $354 million in the first nine months of 2008 compared to $39 million in the first nine months of 2007. This change was driven primarily by:

- a $185 million increase in short-term borrowings in the 2008 period compared to the 2007 period and
- a $938 million increase in net issuances of long-term debt in 2008 compared to the 2007 period, partially offset by
- repurchases of Spectra Energy common shares in 2008 of $600 million, and
- proceeds of $230 million in 2007 from the issuance of Spectra Energy Partners common shares.

Long-term Debt Issuances/Retirements. See Note 13 of Notes to Condensed Consolidated Financial Statements for a discussion of significant long-term debt issuances and retirements.

Common Stock Repurchases. As previously discussed, Spectra Energy repurchased a cumulative total of $600 million of its outstanding common stock during the second and third quarters of 2008, and its share repurchase program was concluded on August 8, 2008.

[Index to Financial Statements](#)

Available Credit Facilities and Restrictive Debt Covenants. Commercial paper markets in the U.S. and Canada have recently experienced varying degrees of credit volatility and contraction that has limited the demand for commercial paper and reduced the ability of Spectra Energy to issue commercial paper. This volatility has been caused by many factors, including concerns about creditworthiness in the overall market, especially the financial services sector, which has culminated in the failure or consolidation of several large financial and investment institutions. During this credit contraction, Spectra Energy has been able to issue commercial paper or draw on its committed and available credit facilities in amounts sufficient to fund liquidity needs. Spectra Energy's commercial paper borrowings are not asset-backed nor are they related to real estate financing, the two sectors facing the most severe credit contraction.

Spectra Energy and its subsidiaries have outstanding credit facilities with an aggregate of approximately $2.7 billion in bank commitments, of which approximately $80 million ($64 million unfunded) were allocated to Lehman Brothers Commercial Bank (Lehman) as of September 30, 2008. Following the bankruptcy filing of its parent, Lehman defaulted on its obligations to fund advances under the Spectra Capital credit facility. As a result of the default, Spectra Capital has the right to replace the lender. Spectra Energy and its subsidiaries are working to identify replacement lenders for the remaining portion of its credit facility commitments currently held by Lehman. Spectra Energy believes that the commitments of the other lenders under Spectra Energy's and its subsidiaries' credit facilities are sufficient to fund working capital and short-term requirements and that default by Lehman does not materially affect the liquidity of Spectra Energy.

See Note 13 for a summary of available credit facilities and related financial and other covenants.

Credit Ratings. The short-term and long-term debt of Spectra Energy and certain subsidiaries are rated by Standard & Poor's (S&P), Moody's Investors Service (Moody's) and Dominion Bond Rating Service (DBRS).

Credit Ratings Summary as of October 31, 2008	Standard and Poor's	Moody's Investor Service	Dominion Bond Rating Service
Spectra Energy Capital, LLC (a)	BBB	Baa1	Not applicable
Texas Eastern Transmission, LP (a)	BBB+	A3	Not applicable
Westcoast Energy Inc. (a)	BBB+	Not applicable	A (low)
Union Gas Limited (a)	BBB+	Not applicable	A
Maritimes & Northeast Pipeline, LP (b)	A	A2	A

(a) Senior unsecured credit rating
(b) Senior secured credit rating

The above credit ratings are dependent upon, among other factors, the ability to generate sufficient cash to fund capital and investment expenditures, while maintaining the strength of the current balance sheets. These credit ratings could be negatively impacted if, as a result of market conditions or other factors, they are unable to maintain the current balance sheet strength or if earnings or cash flow outlooks deteriorate materially.

Dividends. Spectra Energy currently anticipates a dividend payout ratio of approximately 60% of estimated annual net income per share of common stock. The declaration and payment of dividends is subject to the sole discretion of Spectra Energy's Board of Directors and will depend upon many factors, including the financial condition, earnings and capital requirements of our operating subsidiaries, covenants associated with certain debt obligations, legal requirements, regulatory constraints and other factors deemed relevant by the Board of Directors. On July 3, 2008, Spectra Energy declared a 9% increase in its quarterly dividend from $0.23 to $0.25 per common share. The new annual dividends are $1.00 per share, representing a nearly 14% increase over the 2007 annualized level of $0.88 per share. A dividend of $0.25 per common share was declared on October 28, 2008 and will be paid on December 15, 2008.

Index to Financial Statements

Union Gas Preference Share Redemption. Subject to approval of the OEB, Union Gas anticipates it will redeem all of its issued and outstanding preference shares on January 1, 2009 in order to implement a new corporate legal structure. It is estimated that the redemption will cost approximately 110 million Canadian dollars (approximately $103 million) and will be financed through a combination of available cash, cash generated from operations and available credit facilities. These preference shares are classified as Minority Interests on the Condensed Consolidated Balance Sheets.

Other Matters. Spectra Energy has an automatic shelf registration statement on file with the SEC to register the issuance of unspecified amounts of various equity and debt securities by Spectra Energy. In addition, as of the date of this filing, subsidiaries of Spectra Energy had 800 million Canadian dollars (approximately $750 million) available under shelf registrations for issuances in the Canadian market, of which 400 million expires in August 2010 and 400 million expires in September 2010.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

In Item 7A of Spectra Energy's Annual Report on Form 10-K for the year ended December 31, 2007, Spectra Energy estimated its 2008 NGL-related oil price sensitivity at approximately $135 million of annual pre-tax earnings per a $10 move in oil prices at Spectra Energy's forecasted NGL-to-oil price relationship. However, NGL prices have lagged oil prices during oil's unprecedented upward price movement earlier this year. Assuming crude oil prices average approximately $100 per barrel, each 1% change in the price relationship between NGLs and crude oil would change Spectra Energy's annual pre-tax earnings by approximately $18 million. At crude oil prices above $100 per barrel, the impact of a 1% change in the crude oil/NGL relationship would increase, and at crude oil prices below $100 per barrel, the impact of a 1% change in the crude oil/NGL relationship would decrease.

Recently, there have been significant equity and commodity market declines driven by general economic factors and credit concerns, primarily in the financial services sector. Spectra Energy continues to utilize its established risk management policies and procedures to ensure the appropriate monitoring of customer credit positions and, based on current evaluations, does not expect any significant negative impacts associated with these positions. In addition, Spectra Energy does not have a material amount of assets recorded at market value in its consolidated balance sheet, and therefore does not expect any significant effect from the market volatility currently being experienced.

Other than described above, management believes Spectra Energy's exposure to market risk has not changed materially at September 30, 2008.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed by Spectra Energy in the reports it files or submits under the Securities Exchange Act of 1934 (Exchange Act) is recorded, processed, summarized, and reported, within the time periods specified by the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to provide reasonable assurance that information required to be disclosed by Spectra Energy in the reports it files or submits under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, Spectra Energy has evaluated the effectiveness of its disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of September 30, 2008, and, based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these controls and procedures are effective.

Changes in Internal Control over Financial Reporting

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, Spectra Energy has evaluated changes in internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the fiscal quarter ended September 30, 2008 and found no change that has materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

For information regarding material legal proceedings, see Note 16 of Notes to Condensed Consolidated Financial Statements.

Item 1A. Risk Factors.

In addition to the other information set forth in this report, careful consideration should be given to the factors discussed in Part I, "Item 1A. Risk Factors" in Spectra Energy's Annual Report on Form 10-K for the year ended December 31, 2007, which could materially affect Spectra Energy's financial condition or future results. Other than the updated NGL-to-oil price relationship sensitivity as previously discussed in "Item 3. Quantitative and Qualitative Disclosures about Market Risk," there were no changes to those risk factors at September 30, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of Shares that may yet be Purchased under the Plans or Programs
April 1 – April 30, 2008	—	—	—	—
May 1 – May 31, 2008	3,139,665	$ 27.10	3,139,665	—
June 1 – June 30, 2008	7,360,507	26.96	7,360,507	—
July 1 – July 31, 2008	7,980,639	26.74	7,980,639	—
August 1 – August 31, 2008	3,848,933	26.78	3,848,933	—
September 1 – September 30, 2008	—	—	—	—
Total	22,329,744	26.87	22,329,744	—

(a) On May 6, 2008, Spectra Energy's Board of Directors authorized a share repurchase program of up to $600 million under which purchases of Spectra Energy common stock under the program were made from time to time in the open market. During the second and third quarters of 2008, Spectra Energy repurchased the cumulative authorized limit of $600 million of common shares, and the share repurchase program was concluded on August 8, 2008.

Item 4. Submission of Matters to a Vote of Security Holders.

None.

Explanatory Note

This Amendment No. 1 to the Annual Report on Form 10-K of Spectra Energy Corp (Spectra Energy) for the fiscal year ended December 31, 2007 is being filed for the purpose of providing separate audited financial statements and the related schedule of DCP Midstream, LLC in accordance with Rule 3-09 of Regulation S-X. These audited financial statements and the related schedule are included in Item 15. Exhibits and Financial Statement Schedule. This amendment does not update or modify in any way the results of operations, financial position, cash flows or other disclosures in Spectra Energy's Annual Report on Form 10-K for the fiscal year ended December 31, 2007, and does not reflect events occurring after the original filing date of said Form 10-K of February 29, 2008.

Item 15. Exhibits, Financial Statement Schedules.

(a)(1) Financial Statements

The following financial statements and supplemental schedules were filed as part of Spectra Energy's Form 10-K filed February 29, 2008:

Spectra Energy Corp:
- Report of Independent Registered Accounting Firm
- Consolidated Statements of Operations for the Years Ended December 31, 2007, 2006 and 2005
- Consolidated Balance Sheets as of December 31, 2007 and 2006
- Consolidated Statements of Cash Flows for the Years Ended December 31, 2007, 2006 and 2005
- Consolidated Statements of Stockholders'/Member's Equity and Comprehensive Income for the Years Ended December 31, 2007, 2006 and 2005
- Notes to the Consolidated Financial Statements

TEPPCO Partners, L.P.:
- Report of Independent Registered Public Accounting Firm
- Consolidated Balance Sheets as of December 31, 2005 and 2004
- Consolidated Statements of Income for the Years Ended December 31, 2005, 2004 and 2003
- Consolidated Statements of Cash Flows for the Years Ended December 31, 2005, 2004 and 2003
- Consolidated Statements of Partners' Capital for the Years Ended December 31, 2005, 2004 and 2003
- Consolidated Statements of Comprehensive Income for the Years Ended December 31, 2005, 2004 and 2003
- Notes to Consolidated Financial Statements

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and Members of
DCP Midstream, LLC
Denver, Colorado

We have audited the accompanying consolidated balance sheets of DCP Midstream, LLC and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of operations and comprehensive income, members' equity, and cash flows for each of the three years in the period ended December 31, 2007. Our audits also included the financial statement schedule listed in the Index at Item 15. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of DCP Midstream, LLC and subsidiaries at December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

/s/ Deloitte & Touche LLP

Denver, Colorado
March 7, 2008 (March 20, 2008 as to the offering described in Note 19)

DCP MIDSTREAM, LLC

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005**

1. General and Summary of Significant Accounting Policies

Basis of Presentation—DCP Midstream, LLC, with its consolidated subsidiaries, us, we, our, or the Company, is a joint venture owned 50% by Spectra Energy Corp, or Spectra Energy, and 50% by ConocoPhillips. We operate in the midstream natural gas industry. Our primary operations consist of natural gas gathering, processing, compression, transportation and storage, and natural gas liquid, or NGL, fractionation, transportation, gathering, treating, processing and storage, as well as marketing, from which we generate revenues primarily by trading and marketing natural gas and NGLs.

We formed DCP Midstream Partners, LP, a master limited partnership, or DCP Partners, of which our subsidiary, DCP Midstream GP, LP, acts as general partner. DCP Partners completed their initial public offering in December 2005. As of December 31, 2007 and 2006, respectively, we owned a 33.9% and 40.7% limited partnership interest and a 1.5% and 2.0% general partnership interest in DCP Partners, as well as incentive distribution rights that entitle us to receive an increasing share of available cash when pre-defined distribution targets are achieved. As the general partner of DCP Partners, we have responsibility for its operations. Since we exercise control over DCP Partners, we account for them as a consolidated subsidiary.

Prior to January 2, 2007, we were owned 50% by Duke Energy Corporation, or Duke Energy. On January 2, 2007, Duke Energy created two separate publicly traded companies by spinning off their natural gas businesses, including their 50% ownership interest in us, to Duke Energy shareholders. As a result of this transaction, Duke Energy's 50% ownership interest in us was transferred to a new company, Spectra Energy. This transaction is referred to in this report as "the Spectra spin." For periods prior to January 2, 2007, references to Spectra Energy are interchangeable with Duke Energy. Effective January 2, 2007, Spectra Energy refers to the newly formed public company.

In July 2005, Duke Energy transferred a 19.7% interest in us to ConocoPhillips in exchange for direct and indirect monetary and non-monetary consideration, effectively decreasing Duke Energy's membership interest in us to 50% and increasing ConocoPhillips' membership interest in us to 50%, referred to as "the 50-50 Transaction." Included in this transaction, we distributed to Duke Energy substantially all of our Canadian business, made a disproportionate cash distribution of approximately $1,100 million to Duke Energy using the proceeds from the sale of our general partner interest in TEPPCO Partners L.P., or TEPPCO, and paid a $245 million proportionate distribution to Duke Energy and ConocoPhillips. In addition, ConocoPhillips contributed cash of $398 million to us. Under the terms of the Second Amended and Restated LLC Agreement dated July 5, 2005, as amended, or the LLC Agreement, proceeds from this contribution were designated for the acquisition or improvement of property, plant and equipment. At December 31, 2007 and 2006, there were no remaining restricted investment balances related to this contribution.

We are governed by a five member board of directors, consisting of two voting members from each parent and our Chief Executive Officer and President, a non-voting member. All decisions requiring board of directors' approval are made by simple majority vote of the board, but must include at least one vote from both a Spectra Energy and ConocoPhillips board member. In the event the board cannot reach a majority decision, the decision is appealed to the Chief Executive Officers of both Spectra Energy and ConocoPhillips.

The consolidated financial statements include the accounts of the Company and all majority-owned subsidiaries where we have the ability to exercise control, variable interest entities where we are the primary beneficiary, and undivided interests in jointly owned assets. We also consolidate DCP Partners, which we control as the general partner and where the limited partners do not have substantive kick-out or participating rights.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

Investments in greater than 20% owned affiliates that are not variable interest entities and where we do not have the ability to exercise control, and investments in less than 20% owned affiliates where we have the ability to exercise significant influence, are accounted for using the equity method. Intercompany balances and transactions have been eliminated.

Use of Estimates—Conformity with accounting principles generally accepted in the United States of America, or GAAP, requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and notes. Although these estimates are based on management's best available knowledge of current and expected future events, actual results could be different from these estimates.

Cash and Cash Equivalents—Cash and cash equivalents includes all cash balances and highly liquid investments with an original maturity of three months or less.

Short-Term and Restricted Investments—We may invest available cash balances in various financial instruments, such as commercial paper, money market instruments and tax-exempt debt securities that have stated maturities of 20 years or more. These instruments provide for a high degree of liquidity through features, which allow for the redemption of the investment at its face amount plus earned income. As we generally intend to sell these instruments within one year or less from the balance sheet date, and as they are available for use in current operations, they are classified as current assets, unless otherwise restricted. We have classified all short-term and restricted debt investments as available-for-sale and they are carried at fair market value. Unrealized gains and losses on available-for-sale securities are recorded in the consolidated balance sheets as accumulated other comprehensive income (loss), or AOCI. No such gains or losses were deferred in AOCI at December 31, 2007 or 2006. Restricted investments consist of collateral for DCP Partners' term loan. The costs, including accrued interest on investments, approximates fair value due to the short-term, highly liquid nature of the securities held by us and as interest rates are re-set on a daily, weekly or monthly basis.

Inventories—Inventories consist primarily of natural gas and NGLs held in storage for transportation and processing and sales commitments. Inventories are valued at the lower of weighted average cost or market. Transportation costs are included in inventory on the consolidated balance sheets.

Accounting for Risk Management and Derivative Activities and Financial Instruments—Effective July 1, 2007, we elected to discontinue using the hedge method of accounting for our commodity cash flow hedges. We are using the mark-to-market method of accounting for all commodity derivative instruments beginning in July 2007. As a result, the remaining net loss deferred in AOCI is being reclassified to sales of natural gas and petroleum products through December 2011, as the derivative transactions impact earnings.

Each derivative not qualifying for the normal purchases and normal sales exception is recorded on a gross basis in the consolidated balance sheets at its fair value as unrealized gains or unrealized losses on mark-to-market and hedging instruments. Derivative assets and liabilities remain classified in the consolidated balance sheets as unrealized gains or unrealized losses on mark-to-market and hedging instruments at fair value until the contractual delivery period impacts earnings.

We designate each energy commodity derivative as either trading or non-trading. Certain non-trading derivatives are further designated as either a hedge of a forecasted transaction or future cash flow (cash flow hedge), a hedge of a recognized asset, liability or firm commitment (fair value hedge), or a normal purchase or normal sale contract, while certain non-trading derivatives, which are related to asset based activity, are

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

non-trading mark-to-market derivatives. For each of our derivatives, the accounting method and presentation in the consolidated statements of operations and comprehensive income are as follows:

Classification of Contract	Accounting Method	Presentation of Gains & Losses or Revenue & Expense
Trading Derivatives	Mark-to-market method[b]	Net basis in trading and marketing gains and losses
Non-Trading Derivatives:		
Cash Flow Hedge[a]	Hedge method[c]	Gross basis in the same consolidated statements of operations and comprehensive income category as the related hedged item
Fair Value Hedge	Hedge method[c]	Gross basis in the same consolidated statements of operations and comprehensive income category as the related hedged item
Normal Purchase or Normal Sale	Accrual method[d]	Gross basis upon settlement in the corresponding consolidated statements of operations and comprehensive income category based on purchase or sale
Non-Trading Derivatives	Mark-to-market method[b]	Net basis in trading and marketing gains and losses

a Effective July 1, 2007, all commodity cash flow hedges are classified as non-trading derivative activity. Our interest rate swaps continue to be accounted for as cash flow hedges.

b Mark-to-market—An accounting method whereby the change in the fair value of the asset or liability is recognized in the consolidated statements of operations and comprehensive income in trading and marketing gains and losses during the current period.

c Hedge method—An accounting method whereby the change in the fair value of the asset or liability is recorded in the consolidated balance sheets as unrealized gains or unrealized losses on mark-to-market and hedging instruments. For cash flow hedges, there is no recognition in the consolidated statements of operations and comprehensive income for the effective portion until the service is provided or the associated delivery period impacts earnings. For fair value hedges, the changes in the fair value of the asset or liability, as well as the offsetting changes in value of the hedged item, are recognized in the consolidated statements of operations and comprehensive income in the same category as the related hedged item.

d Accrual method—An accounting method whereby there is no recognition in the consolidated balance sheets or consolidated statements of operations and comprehensive income for changes in fair value of a contract until the service is provided or the associated delivery period impacts earnings.

Cash Flow and Fair Value Hedges—For derivatives designated as a cash flow hedge or a fair value hedge, we maintain formal documentation of the hedge. In addition, we formally assess both at the inception of the hedge and on an ongoing basis, whether the hedge contract is highly effective in offsetting changes in cash flows or fair values of hedged items. All components of each derivative gain or loss are included in the assessment of hedge effectiveness, unless otherwise noted.

The fair value of a derivative designated as a cash flow hedge is recorded in the consolidated balance sheets as unrealized gains or unrealized losses on mark-to-market and hedging instruments. The effective portion of the change in fair value of a derivative designated as a cash flow hedge is recorded in the consolidated balance sheets as AOCI and the ineffective portion is recorded in the consolidated statements of operations and comprehensive income. During the period in which the hedged transaction impacts earnings, amounts in AOCI associated with the hedged transaction are reclassified to the consolidated statements of operations and comprehensive income in

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

the same accounts as the item being hedged. We discontinue hedge accounting prospectively when it is determined that the derivative no longer qualifies as an effective hedge, or when it is probable that the hedged transaction will not occur. When hedge accounting is discontinued because the derivative no longer qualifies as an effective hedge, the derivative is subject to the mark-to-market accounting method prospectively. The derivative continues to be carried on the consolidated balance sheets at its fair value; however, subsequent changes in its fair value are recognized in current period earnings. Gains and losses related to discontinued hedges that were previously accumulated in AOCI will remain in AOCI until the hedged transaction impacts earnings, unless it is probable that the hedged transaction will not occur, in which case, the gains and losses that were previously deferred in AOCI will be immediately recognized in current period earnings.

For derivatives designated as fair value hedges, we recognize the gain or loss on the derivative instrument, as well as the offsetting changes in value of the hedged item in earnings in the current period. All derivatives designated and accounted for as fair value hedges are classified in the same category as the item being hedged in the consolidated statements of operations and comprehensive income.

Valuation—When available, quoted market prices or prices obtained through external sources are used to determine a contract’s fair value. For contracts with a delivery location or duration for which quoted market prices are not available, fair value is determined based on pricing models developed primarily from historical and expected correlations with quoted market prices.

Values are adjusted to reflect the credit risk inherent in the transaction as well as the potential impact of liquidating open positions in an orderly manner over a reasonable time period under current conditions. Changes in market prices and management estimates directly affect the estimated fair value of these contracts. Accordingly, it is reasonably possible that such estimates may change in the near term.

Property, Plant and Equipment—Property, plant and equipment are recorded at original cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets. The costs of maintenance and repairs, which are not significant improvements, are expensed when incurred.

Asset retirement obligations associated with tangible long-lived assets are recorded at fair value in the period in which they are incurred, if a reasonable estimate of fair value can be made, and added to the carrying amount of the associated asset. This additional carrying amount is then depreciated over the life of the asset. The liability increases due to the passage of time based on the time value of money until the obligation is settled. We recognize a liability for conditional asset retirement obligations as soon as the fair value of the liability can be reasonably estimated. A conditional asset retirement obligation is defined as an unconditional legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity.

Investments in Unconsolidated Affiliates—We use the equity method to account for investments in greater than 20% owned affiliates that are not variable interest entities and where we do not have the ability to exercise control, and investments in less than 20% owned affiliates where we have the ability to exercise significant influence.

We evaluate our investments in unconsolidated affiliates for impairment when events or changes in circumstances indicate, in management’s judgment, that the carrying value of such investments may have experienced an other than temporary decline in value. When evidence of loss in value has occurred, management compares the estimated fair value of the investment to the carrying value of the investment to determine whether any impairment has occurred. Management assesses the fair value of our unconsolidated affiliates using

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

commonly accepted techniques, and may use more than one method, including, but not limited to, recent third party comparable sales and discounted cash flow models. If the estimated fair value is less than the carrying value and management considers the decline in value to be other than temporary, the excess of the carrying value over the estimated fair value is recognized in the financial statements as an impairment loss.

Intangible Assets and Goodwill—Intangible assets consist primarily of commodity sales and purchase contracts and relationships, which are amortized on a straight-line basis over the term of the contract or anticipated relationship, ranging from one to 25 years. Goodwill is the cost of an acquisition less the fair value of the net assets of the acquired business.

We evaluate goodwill for impairment annually in the third quarter, and whenever events or changes in circumstances indicate it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Impairment testing of goodwill consists of a two-step process. The first step involves comparing the fair value of the reporting unit, to which goodwill has been allocated, with its carrying amount. If the carrying amount of the reporting unit exceeds its fair value, the second step of the process involves comparing the fair value and carrying value of the goodwill of that reporting unit. If the carrying value of the goodwill of a reporting unit exceeds the fair value of that goodwill, the excess of the carrying value over the fair value is recognized as an impairment loss.

Long-Lived Assets—We evaluate whether the carrying value of long-lived assets, excluding goodwill, has been impaired when circumstances indicate the carrying value of those assets may not be recoverable. The carrying amount is not recoverable if it exceeds the undiscounted sum of cash flows expected to result from the use and eventual disposition of the asset. We consider various factors when determining if these assets should be evaluated for impairment, including but not limited to:

- a significant adverse change in legal factors or business climate;
- a current period operating or cash flow loss combined with a history of operating or cash flow losses, or a projection or forecast that demonstrates continuing losses associated with the use of a long-lived asset;
- an accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of a long-lived asset;
- significant adverse changes in the extent or manner in which an asset is used, or in its physical condition;
- a significant adverse change in the market value of an asset; and
- a current expectation that, more likely than not, an asset will be sold or otherwise disposed of before the end of its estimated useful life.

If the carrying value is not recoverable, the impairment loss is measured as the excess of the asset’s carrying value over its fair value. Management assesses the fair value of long-lived assets using commonly accepted techniques, and may use more than one method, including, but not limited to, recent third party comparable sales and discounted cash flow models. Significant changes in market conditions resulting from events such as the condition of an asset or a change in management’s intent to utilize the asset would generally require management to reassess the cash flows related to the long-lived assets.

Upon classification as held for sale, a long-lived asset is measured at the lower of its carrying amount or fair value less cost to sell, depreciation is ceased and the asset is separately presented on the consolidated balance sheets.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

If an asset held for sale or sold (1) has clearly distinguishable operations and cash flows, generally at the plant level, (2) has direct cash flows of the held for sale or sold component that will be eliminated (from the perspective of the held for sale or sold component), and (3) if we are unable to exert significant influence over the disposed component, then the related results of operations for the current and prior periods, including any related impairments and gains or losses on sales are reflected as income from discontinued operations in the consolidated statements of operations and comprehensive income. If an asset held for sale or sold does not have clearly distinguishable operations and cash flows, impairments and gains or losses on sales are recorded as gain on sale of assets in the consolidated statements of operations and comprehensive income.

Unamortized Debt Premium, Discount and Expense—Premiums, discounts and expenses incurred with the issuance of long-term debt are amortized over the terms of the debt using the effective interest method. These premiums and discounts are recorded on the consolidated balance sheets within long-term debt. These unamortized expenses are recorded on the consolidated balance sheets as other non-current assets.

Distributions—Under the terms of the LLC Agreement, we are required to make quarterly distributions to Spectra Energy and ConocoPhillips based on allocated taxable income. The LLC Agreement provides for taxable income to be allocated in accordance with Internal Revenue Code Section 704(c). This Code Section accounts for the variation between the adjusted tax basis and the fair market value of assets contributed to the joint venture. The distribution is based on the highest taxable income allocated to either member with a minimum of each member's tax, with the other member receiving a proportionate amount to maintain the ownership capital accounts at 50% for both Spectra Energy and ConocoPhillips. Prior to January 2, 2007, the capital accounts were maintained at 50% for both Duke Energy and ConocoPhillips, and prior to July 1, 2005, the capital accounts were maintained at 69.7% for Duke Energy and 30.3% for ConocoPhillips. During the years ended December 31, 2007, 2006 and 2005, we paid distributions of $497 million, $650 million and $389 million, respectively, based on estimated annual taxable income allocated to the members according to their respective ownership percentages at the date the distributions became due.

Our board of directors determines the amount of the quarterly dividend to be paid to Spectra Energy and ConocoPhillips, by considering net income, cash flow or any other criteria deemed appropriate. The LLC Agreement restricts payment of dividends except with the approval of both members. During the years ended December 31, 2007, 2006 and 2005, we paid dividends of $867 million, $801 million and $1,925 million, respectively, to the members. The $1,925 million paid during the year ended December 31, 2005, is comprised of a disproportionate cash distribution of approximately $1,100 million to Duke Energy using the proceeds from the sale of our general partner interest in TEPPCO as part of the 50-50 Transaction, a $245 million proportionate distribution to Duke Energy and ConocoPhillips as part of the 50-50 Transaction, and $580 million in proportionate distributions to Duke Energy and ConocoPhillips, which were allocated in accordance with our partners' respective ownership percentages. The $867 million and $801 million paid during the years ended December 31, 2007 and 2006, are comprised of proportionate distributions to Duke Energy and ConocoPhillips, allocated in accordance with our partners' respective ownership percentages.

DCP Partners considers the payment of a quarterly distribution to the holders of its common units and subordinated units, to the extent DCP Partners has sufficient cash from its operations after establishment of cash reserves and payment of fees and expenses, including payments to its general partner, a wholly-owned subsidiary of ours. There is no guarantee, however, that DCP Partners will pay the minimum quarterly distribution on the units in any quarter. DCP Partners will be prohibited from making any distributions to unitholders if it would cause an event of default, or an event of default exists, under its credit agreement. Our limited partner interest in DCP Partners primarily consists of subordinated units and common units. The subordinated units are entitled to receive the minimum quarterly distribution only after DCP Partners' common unitholders have received the

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

minimum quarterly distribution plus any arrearages in the payment of the minimum quarterly distribution from prior quarters. The subordination period will end, and the subordinated units will convert to common units, on a one for one basis, when certain distribution requirements, as defined in DCP Partners' partnership agreement, have been met. The subordination period has an early termination provision that permitted 50% of the subordinated units, or 3,571,428 units, to convert to common units in February 2008 and permits the other 50% of the subordinated units to convert to common units on the second business day following the first quarter distribution in 2009, provided the tests for ending the subordination period contained in DCP Partners' partnership agreement are satisfied. During the years ended December 31, 2007 and 2006, DCP Partners paid distributions of approximately $25 million and $13 million, respectively, to its public unitholders. In addition to our 33.9% limited partnership interests we hold a 1.5% general partnership interest, as well as incentive distribution rights, which entitle us to receive an increasing share of available cash when pre-defined distribution targets are achieved.

Foreign Currency Translation—We translated assets and liabilities of our Canadian operations, where the Canadian dollar was the functional currency, at the period-end exchange rates. Revenues and expenses were translated using average monthly exchange rates during the period, which approximates the exchange rates at the time of each transaction during the period. Foreign currency translation adjustments are included in the consolidated statements of operations and of comprehensive income. In July 2005, as part of the 50-50 Transaction, we distributed to Duke Energy substantially all of our Canadian business. As a result, there were no translation gains or losses in AOCI at December 31, 2007, 2006 and 2005.

Revenue Recognition—We generate the majority of our revenues from natural gas gathering, processing, compression, transportation and storage, and NGL fractionation, transportation, gathering, treating, processing and storage, as well as trading and marketing of natural gas and NGLs. We realize revenues either by selling the residue natural gas and NGLs, or by receiving fees from the producers.

We obtain access to raw natural gas and provide our midstream natural gas services principally under contracts that contain a combination of one or more of the following arrangements.

- *Fee-based arrangements*—Under fee-based arrangements, we receive a fee or fees for one or more of the following services: gathering, compressing, treating, processing, or transporting of natural gas. Our fee-based arrangements include natural gas purchase arrangements pursuant to which we purchase raw natural gas at the wellhead, or other receipt points, at an index related price at the delivery point less a specified amount, generally the same as the fees we would otherwise charge for gathering of raw natural gas from the wellhead location to the delivery point. The revenue we earn is directly related to the volume of natural gas that flows through our systems and is not directly dependent on commodity prices. To the extent a sustained decline in commodity prices results in a decline in volumes, however, our revenues from these arrangements would be reduced.
- *Percent-of-proceeds/index arrangements*—Under percentage-of-proceeds/index arrangements, we generally purchase natural gas from producers at the wellhead, or other receipt points, gather the wellhead natural gas through our gathering system, treat and process the natural gas, and then sell the resulting residue natural gas and NGLs based on index prices from published index market prices. We remit to the producers either an agreed-upon percentage of the actual proceeds that we receive from our sales of the residue natural gas and NGLs, or an agreed-upon percentage of the proceeds based on index related prices for the natural gas and the NGLs, regardless of the actual amount of the sales proceeds we receive. Certain of these arrangements may also result in our returning all or a portion of the residue natural gas and/or the NGLs to the producer, in lieu of returning sales proceeds. Our revenues under percent-of-proceeds/index arrangements correlate directly with the price of natural gas and/or NGLs.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

- *Keep-whole arrangements and wellhead purchase arrangements*—Under the terms of a keep-whole processing contract, we gather raw natural gas from the producer for processing, sell the NGLs and return to the producer residue natural gas with a British thermal unit, or Btu, content equivalent to the Btu content of the raw natural gas gathered. This arrangement keeps the producer whole to the thermal value of the raw natural gas received. Under the terms of a wellhead purchase contract, we purchase raw natural gas from the producer at the wellhead or defined receipt point for processing and then market the resulting NGLs and residue gas at market prices. Under these types of contracts, we are exposed to the "frac spread." The frac spread is the difference between the value of the NGLs extracted from processing and the value of the Btu equivalent of the residue natural gas. We benefit in periods when NGL prices are higher relative to natural gas prices.

Our trading and marketing of natural gas and petroleum products, consists of physical purchases and sales, as well as derivative instruments.

We recognize revenue for sales and services under the four revenue recognition criteria, as follows:

Persuasive evidence of an arrangement exists—Our customary practice is to enter into a written contract, executed by both us and the customer.

Delivery—Delivery is deemed to have occurred at the time custody is transferred, or in the case of fee-based arrangements, when the services are rendered. To the extent we retain product as inventory, delivery occurs when the inventory is subsequently sold and custody is transferred to the third party purchaser.

The fee is fixed or determinable—We negotiate the fee for our services at the outset of our fee-based arrangements. In these arrangements, the fees are nonrefundable. For other arrangements, the amount of revenue, based on contractual terms, is determinable when the sale of the applicable product has been completed upon delivery and transfer of custody.

Collectability is probable—Collectability is evaluated on a customer-by-customer basis. New and existing customers are subject to a credit review process, which evaluates the customers' financial position (for example, cash position and credit rating) and their ability to pay. If collectability is not considered probable at the outset of an arrangement in accordance with our credit review process, revenue is recognized when the fee is collected.

We generally report revenues gross in the consolidated statements of operations and comprehensive income, as we typically act as the principal in these transactions, take custody of the product, and incur the risks and rewards of ownership. Effective April 1, 2006, any new or amended contracts for certain sales and purchases of inventory with the same counterparty, when entered into in contemplation of one another, are reported net as one transaction. We recognize revenues for our NGL and residue gas derivative trading activities net in the consolidated statements of operations and comprehensive income as trading and marketing gains and losses. These activities include mark-to-market gains and losses on energy trading contracts, and the financial or physical settlement of energy trading contracts.

Revenue for goods and services provided but not invoiced is estimated each month and recorded along with related purchases of goods and services used but not invoiced. These estimates are generally based on estimated commodity prices, preliminary throughput measurements and allocations and contract data. There are no material differences between the actual amounts and the estimated amounts of revenues and purchases recorded at December 31, 2007, 2006 and 2005.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

Quantities of natural gas or NGLs over-delivered or under-delivered related to imbalance agreements with customers, producers or pipelines are recorded monthly as other receivables or other payables using current market prices or the weighted average prices of natural gas or NGLs at the plant or system. These balances are settled with deliveries of natural gas or NGLs, or with cash. Included in the consolidated balance sheets as accounts receivable—other as of December 31, 2007 and 2006 were imbalances totaling $48 million and $45 million, respectively. Included in the consolidated balance sheets as accounts payable—other, as of December 31, 2007 and 2006 were imbalances totaling $54 million and $42 million, respectively.

Significant Customers—ConocoPhillips, an affiliated company, was a significant customer in each of the past three years. Sales to ConocoPhillips, including its 50% owned equity method investment, Chevron Phillips Chemical Company LLC, or CP Chem, totaled approximately $2,787 million, $2,677 million, and $2,513 million during 2007, 2006 and 2005, respectively.

Environmental Expenditures—Environmental expenditures are expensed or capitalized as appropriate, depending upon the future economic benefit. Expenditures that relate to an existing condition caused by past operations, and that do not generate current or future revenue, are expensed. Liabilities for these expenditures are recorded on an undiscounted basis when environmental assessments and/or clean-ups are probable and the costs can be reasonably estimated. Environmental liabilities as of December 31, 2007 and 2006, included in the consolidated balance sheets, totaled $6 million in both periods recorded as other current liabilities, and totaled $6 million in both periods recorded as other long-term liabilities.

Stock-Based Compensation—Equity classified stock-based compensation cost is measured at fair value, based on the closing common unit price at grant date, and is recognized as expense over the vesting period. Liability classified stock-based compensation cost is remeasured at each reporting date at fair value, based on the closing common unit price, and is recognized as expense over the requisite service period. Compensation expense for awards with graded vesting provisions is recognized on a straight-line basis over the requisite service period of each separately vesting portion of the award. Awards granted to non-employees for acquiring, or in conjunction with selling goods and services, are measured at the estimated fair value of the goods or services, or the fair value of the award, whichever is more reliably measured.

Through July 1, 2005, we accounted for stock-based compensation by measuring the intrinsic value of an award at the measurement dates. The intrinsic value of an award is the amount by which the quoted market price of the underlying stock exceeds the amount, if any, an employee would be required to pay to acquire the stock. Since the exercise price for all options granted under the plan was equal to the market value of the underlying common stock on the date of grant, no compensation expense has historically been recognized in the accompanying consolidated statements of operations and comprehensive income. Compensation expense for phantom stock awards and other stock awards was recorded from the date of grant over the required vesting period based on the market value of the awards at the date of grant. Compensation expense for stock-based performance awards was recorded over the required vesting period, and adjusted for increases and decreases in market value at each reporting date up to the measurement dates.

Effective January 1, 2006, we adopted the provisions of Statement of Financial Accounting Standard, or SFAS, No. 123(R) (Revised 2004) *"Share-Based Payment,"* or SFAS 123R, which establishes accounting for stock-based awards exchanged for employee and non-employee services. Accordingly, equity classified stock-based compensation cost is measured at grant date, based on the fair value of the award, and is recognized as expense over the requisite service period. Liability classified stock-based compensation cost is remeasured at each reporting date, and is recognized over the requisite service period.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

We elected to adopt the modified prospective application method as provided by SFAS 123R and, accordingly, financial statement amounts for 2005 presented in these consolidated financial statements have not been restated. Compensation expense for awards with graded vesting provisions is recognized on a straight-line basis over the requisite service period of each separately vesting portion of the award.

The following table shows what net income would have been if the fair value recognition provisions of SFAS 123R had been applied to all stock-based compensation awards for the year ended December 31, 2005.

	Year Ended December 31, 2005 (millions)
Net income, as reported	$ 2,170
Add: stock-based compensation expense included in reported net income	3
Deduct: total stock-based compensation expense determined under fair value-based method for all awards	(3)
Pro forma net income	$ 2,170

Accounting for Sales of Units by a Subsidiary—We account for sales of units by a subsidiary by recording a gain or loss on the sale of common equity of a subsidiary equal to the amount of proceeds received in excess of the carrying value of the units sold. As a result, we have deferred approximately $228 million of gain on sale of common units in DCP Partners, which is included in other long-term liabilities in the consolidated balance sheets. This gain is comprised of approximately $36 million related to DCP Partners’ private placement in August 2007, $43 million related to DCP Partners’ private placement in June 2007, and approximately $149 million related to DCP Partners’ initial public offering in December 2005. We will recognize this gain in earnings upon conversion of all of our subordinated units in DCP Partners to common units.

Income Taxes—We are structured as a limited liability company, which is a pass-through entity for U.S. income tax purposes. We own a corporation that files its own federal, foreign and state corporate income tax returns. The income tax expense related to this corporation is included in our income tax expense, along with state, local, franchise and margin taxes of the limited liability company and other subsidiaries. In addition, until July 1, 2005, we had Canadian subsidiaries that were subject to Canadian income taxes.

We follow the asset and liability method of accounting for income taxes. Under the asset and liability method, deferred income taxes are recognized for the tax consequences of temporary differences between the financial statement carrying amounts and the tax basis of the assets and liabilities.

Recent Accounting Pronouncements**—SFAS No. 160, "*****Noncontrolling Interests in Consolidated Financial Statements, an amendment of Accounting Research Bulletin No. 51,*****" or SFAS 160.** In December 2007, the FASB issued SFAS 160, which establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent’s ownership interest and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. The Statement also establishes reporting requirements that provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS 160 is effective for us on January 1, 2009. Due to the recency of this pronouncement, we have not assessed the impact of SFAS 160 on our consolidated results of operations, cash flows or financial position.

Table of Contents

DCP MIDSTREAM, LLC

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005**

SFAS No. 141(R) "*Business Combinations (revised 2007)*," or SFAS 141(R). In December, 2007, the FASB issued SFAS 141(R), which requires the acquiring entity in a business combination to recognize all (and only) the assets acquired and liabilities assumed in the transaction; establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; and requires the acquirer to disclose to investors and other users all of the information they need to evaluate and understand the nature and financial effect of the business combination. SFAS 141(R) is effective for us on January 1, 2009. As this standard will be applied prospectively upon adoption, we will account for all transactions with closing dates subsequent to the adoption date in accordance with the provisions of the standard.

SFAS No. 159 "*The Fair Value Option for Financial Assets and Financial Liabilities—including an amendment of FAS 115*," or SFAS 159. In February 2007, the FASB issued SFAS 159, which allows entities to choose, at specified election dates, to measure eligible financial assets and liabilities at fair value that are not otherwise required to be measured at fair value. If a company elects the fair value option for an eligible item, changes in that item's fair value in subsequent reporting periods must be recognized in current earnings. SFAS 159 also establishes presentation and disclosure requirements designed to draw comparison between entities that elect different measurement attributes for similar assets and liabilities. SFAS 159 is effective for us on January 1, 2008. We have not elected the fair value option relative to any of our financial assets and liabilities which are not otherwise required to be measured at fair value by other accounting standards. Therefore, there is no effect of adoption reflected in our consolidated results of operations, cash flows or financial position.

SFAS No. 157 *"Fair Value Measurements,"* or SFAS 157. In September 2006, the FASB issued SFAS 157, which provides a single definition of fair value, together with a framework for measuring it, and requires additional disclosure about the use of fair value to measure assets and liabilities. The standard establishes a framework for measuring fair value and expands the disclosure requirements surrounding assumptions made in the measurement of fair value.

The adoption of this standard will result in us making slight changes to our valuation methodologies to incorporate the marketplace participant view as prescribed by SFAS 157. Such changes will include, but will not be limited to, changes in valuation policies to reflect an exit price methodology, the effect of considering our own non-performance risk on the valuation of liabilities, and the effect of any change in our credit rating or standing. As a result of adopting SFAS 157, we estimate a cumulative effect transition adjustment of an after-tax increase to members' equity of approximately $8 million. This transition adjustment will directly affect the beginning balance of members' equity.

Pursuant to FASB Financial Staff Position 157-2, the FASB issued a partial deferral of the implementation of SFAS 157 as it relates to all non-financial assets and liabilities where fair value is the required measurement attribute by other accounting standards. While, we have adopted SFAS 157 for all financial assets and liabilities (primarily as a result of derivative trading activity) effective January 1, 2008, we have not assessed the impact that the adoption of SFAS 157 will have on our non-financial assets and liabilities.

FASB Interpretation No. 48 *"Accounting for Uncertainty in Income Taxes—An Interpretation of FASB Statement 109,"* or FIN 48. In July 2006, the FASB issued FIN 48, which clarifies the accounting for uncertainty in income taxes recognized in financial statements in accordance with FASB Statement No. 109, "*Accounting for Income Taxes."* FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The provisions of FIN 48 were effective for us on January 1, 2007, and the adoption of FIN 48 did not have a material impact on our consolidated results of operations, cash flows or financial position.

YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

2. Acquisitions and Dispositions

Acquisitions

Acquisition of Various Gathering, Pipeline and Compression Assets—On August 29, 2007, we acquired the stock of Momentum Energy Group, Inc., or MEG, for approximately $635 million plus closing adjustments of approximately $11 million. The results of MEG's operations have been included in the consolidated financial statements since that date. As a result of the acquisition, we expanded our operations into the Fort Worth, Piceance and Powder River producing basins, thus diversifying our business into new areas. We funded our portion of this acquisition with a 364-day bridge loan for $450 million, which was paid off in September 2007 with proceeds from the issuance of the $450 million principal amount of 6.75% Senior Notes, as well as cash on hand. See further discussion of this transaction in the Contributions to DCP Partners section below.

Under the purchase method of accounting, the assets and liabilities of MEG were recorded at their respective fair values as of the date of the acquisition, and we recorded goodwill of approximately $135 million. The goodwill amount recognized relates primarily to projected growth in the Fort Worth and Piceance producing basins due to significant natural gas reserves and high level of drilling activity. We expect all of the goodwill to be tax deductible. The values of certain assets and liabilities are preliminary, and are subject to adjustment as additional information is obtained. When finalized, material adjustments to goodwill may result.

The purchase price allocation is as follows (millions):

Cash	$ 42
Receivables	23
Other assets	2
Property, plant and equipment	278
Intangible assets	254
Goodwill	135
Payables	(18)
Other liabilities	(27)
Current debt	(20)
Minority interest	(23)
Total allocation of purchase price	$646

In May 2007, DCP Partners acquired certain gathering and compression assets located in southern Oklahoma, as well as related commodity purchase contracts, from Anadarko Petroleum Corporation for approximately $181 million.

In the fourth quarter of 2005, we entered into an agreement to purchase certain pipeline and compressor station assets in Kansas, Oklahoma and Texas for approximately $50 million, which are regulated by the Federal Energy Regulatory Commission, or FERC. We did not receive regulatory approval from the FERC to purchase the assets as non-jurisdictional gathering, but we have filed with the FERC for a certificate to operate as an interstate pipeline. This acquisition is expected to close in 2008.

Acquisition of Additional Equity Interests—In December 2006, we acquired an additional one-third interest in Main Pass Oil Gathering Company, or Main Pass, for approximately $30 million. We now own two-thirds of Main Pass with one other partner. Main Pass is a joint venture whose primary operation is a crude oil gathering

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

pipeline system in the Gulf of Mexico. Since Main Pass is not a variable interest entity, and we do not have the ability to exercise control, we continue to account for Main Pass under the equity method.

In November 2006, we purchased the remaining 16% minority interest in Dauphin Island Gathering Partners, or DIGP, for $7 million. DIGP was owned 84% by us prior to this transaction, and subsequent to this transaction, is owned 100% by us. DIGP owns gathering and transmission assets in the Gulf Coast.

In December 2005, we purchased an additional 6.67% interest in Discovery Producer Services LLC, or Discovery, from Williams Energy, LLC for a purchase price of $13 million. Discovery is an unconsolidated affiliate, which, prior to this transaction, was 33.33% owned by us, and subsequent to this transaction is 40% owned by us. Discovery owns and operates an interstate pipeline, a condensate handling facility, a cryogenic gas processing plant and other gathering assets in deepwater offshore Louisiana.

Dispositions

Disposition of Various Gathering, Transmission and Processing Assets—During the first quarter of 2006, we sold assets totaling $57 million, for proceeds of $85 million, and we recognized a gain of $28 million.

In August 2005, we sold certain gas gathering facilities in Kansas and Oklahoma for a sales price of approximately $11 million. No gain or loss was recognized.

In February 2005, we exchanged certain processing plant assets in Wyoming for certain gathering assets and related gathering contracts in Oklahoma of equivalent fair value.

In February 2005, we sold certain gathering, compression, fractionation, processing plant and transportation assets in Wyoming for approximately $28 million.

Disposition of Equity Interests—In February 2005, we sold our general partner interest in TEPPCO to Enterprise GP Holdings L.P., an unrelated third party, for $1,100 million in cash and recognized a gain of $1,137 million. The cash proceeds from this transaction were received in February 2005 and loaned to Duke Energy and ConocoPhillips in amounts equal to their ownership percentages in the Company at that time. The loans were made under the terms of revolving credit facilities established in February 2005 with Duke Capital LLC, an affiliate of Duke Energy, and ConocoPhillips in the amounts of $767 million and $333 million, respectively. ConocoPhillips repaid its outstanding borrowings in full in March 2005. Duke Capital, LLC repaid its outstanding borrowings in full in July 2005.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

Distribution of Canadian Business to Duke Energy—In July 2005, as part of the 50-50 Transaction, we distributed to Duke Energy substantially all of our Canadian business. These assets comprised a component of the Company for purposes of reporting discontinued operations. The results of operations and cash flows related to these assets have been reclassified to discontinued operations for all periods presented. The following is a summary of the net assets distributed to Duke Energy on the closing date of July 1, 2005 (millions):

Assets:	
Cash	$ 44
Accounts receivable	18
Other assets	1
Property, plant and equipment, net	291
Goodwill	18
Total assets	$372
Liabilities:	
Accounts payable	$ 11
Other current liabilities	4
Current and long-term debt	1
Deferred income taxes	20
Other long-term liabilities	12
Total liabilities	$ 48
Net assets of Canadian business distributed to Duke Energy	$324

We routinely sell assets that comprise a component of the Company, and are recorded as discontinued operations, but are not individually significant. The results of operations and cash flows related to these assets have been reclassified to discontinued operations for all periods presented.

There were no assets accounted for as discontinued operations for the years ended December 31, 2007 or 2006. The following table sets forth selected financial information associated with assets accounted for as discontinued operations.

	For the Year Ended December 31, 2005 (millions)
Operating revenues	$ 35
Pre-tax operating income	$ 4
Income tax expense	(1)
Income from discontinued operations	$ 3

Contributions to DCP Partners

MEG—Concurrent with our acquisition of the stock of MEG in August 2007, DCP Partners acquired certain subsidiaries of MEG from us for $166 million plus post-closing purchase price adjustments of approximately $9 million. These subsidiaries of MEG own assets in the Piceance Basin, including a 70% operated interest in the

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

Collbran Valley Gas Gathering system joint venture in western Colorado, and assets in the Powder River Basin, including the Douglas gas gathering system in Wyoming. DCP Partners financed this transaction with $120 million of revolver and term loan borrowings under DCP Partners' Amended Credit Agreement, the issuance of common units through a private placement with certain institutional inventors and cash on hand. In August 2007, DCP Partners issued 2,380,952 common limited partner units in a private placement, pursuant to a common unit purchase agreement with private owners of MEG or affiliates of such owners, at $42.00 per unit, or approximately $100 million in the aggregate. As a result of this transaction, the omnibus agreement with DCP Partners was amended to increase the annual fee payable to us by DCP Partners by $2 million for incremental general and administrative expenses. We will continue to operate these assets and these assets will continue to be included in our financial statements, through the consolidation of DCP Partners.

DCP East Texas Holdings, LLC and Discovery Producer Services LLC—In July 2007, we contributed to DCP Partners our 25% limited liability company interest in DCP East Texas Holdings, LLC, or East Texas, our 40% limited liability company interest in Discovery and a derivative instrument, for aggregate consideration of $244 million in cash, including $1 million for net working capital and other adjustments, $27 million in common units and $1 million in general partner equivalent units. We own the remaining 75% limited liability company interest in East Texas, while third parties still own the other 60% limited liability interest in Discovery. DCP Partners financed the cash portion of this transaction with borrowings under its existing credit facility. We will continue to operate East Texas and both of these assets will continue to be included in our financial statements, through the consolidation of DCP Partners.

Wholesale Propane Logistics Business—In November 2006, we contributed our wholesale propane logistics business to DCP Partners for consideration of approximately $83 million, including $77 million in cash ($10 million of which was paid in January 2007 upon completion of construction of a new propane terminal), and $6 million in Class C units. DCP Partners financed this transaction with its existing credit facility and the issuance of Class C units, which were subsequently converted to common units on July 2, 2007. As a result of this transaction, the omnibus agreement with DCP Partners was amended to increase the annual fee payable to us by DCP Partners by $2 million for incremental general and administrative expenses. We will continue to operate these assets and these assets will continue to be included in our financial statements, through the consolidation of DCP Partners.

YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005**

3. Agreements and Transactions with Affiliates

The following table summarizes the transactions with affiliates:

	For the Years Ended, December 31,		
	2007	2006	2005
		(millions)	
Spectra Energy:			
Sales of natural gas and petroleum products to affiliates	$ 2	$ —	$ —
Transportation, storage and processing	$ 4	$ —	$ —
Purchases of natural gas and petroleum products from affiliates	$ 123	$ —	$ —
Operating and general and administrative expenses	$ 13	$ —	$ —
Duke Energy:			
Sales of natural gas and petroleum products to affiliates	$ —	$ 41	$ 109
Transportation, storage and processing	$ —	$ 18	$ 2
Purchases of natural gas and petroleum products from affiliates	$ —	$ 137	$ 130
Operating and general and administrative expenses	$ —	$ 30	$ 44
Interest income	$ —	$ —	$ 8
ConocoPhillips (a):			
Sales of natural gas and petroleum products to affiliates	$ 2,787	$ 2,677	$ 2,513
Transportation, storage and processing	$ 17	$ 12	$ 11
Purchases of natural gas and petroleum products from affiliates	$ 489	$ 492	$ 556
General and administrative expenses	$ 2	$ 5	$ —
Unconsolidated affiliates:			
Sales of natural gas and petroleum products to affiliates	$ 95	$ 95	$ 163
Transportation, storage and processing	$ 23	$ 20	$ 20
Purchases of natural gas and petroleum products from affiliates	$ 169	$ 160	$ 144

(a) Includes ConocoPhillips' 50% owned equity method investment, Chevron Phillips Chemical Company LLC

Spectra Energy

Commodity Transactions—We sell a portion of our residue gas and NGLs to, purchase raw natural gas and other petroleum products from, and provide gathering and transportation services to Spectra Energy and their subsidiaries. Management anticipates continuing to purchase and sell commodities and provide services to Spectra Energy in the ordinary course of business.

Included in the consolidated balance sheets in other non-current assets—affiliates as of December 31, 2007 and 2006, are insurance recovery receivables of $27 million and $47 million, respectively, and included in accounts receivable—affiliates as of December 31, 2007 and 2006, are other receivables of $2 million and $8 million, respectively. Prior to January 2, 2007, these receivables were from an insurance provider that is a subsidiary of Duke Energy. In connection with the Spectra spin, Spectra Energy is responsible for these insurance liabilities. During the years ended December 31, 2007, 2006 and 2005, we recorded hurricane related business interruption insurance recoveries of $4 million, $1 million and $3 million, respectively, included in the consolidated statements of operations and comprehensive income as transportation, storage and processing.

Duke Energy

In connection with the Spectra spin, Duke Energy is not considered a related party for reporting periods after January 2, 2007.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

Commodity Transactions—In 2006, we sold a portion of our residue gas and NGLs to, purchased raw natural gas and other petroleum products from, and provided gathering and transportation services to Duke Energy and their subsidiaries.

Services Agreement—Under a services agreement, Duke Energy and certain of its subsidiaries provided us with various staff and support services, including information technology products and services, payroll, employee benefits, property taxes, media relations, printing and records management. Additionally, we used other Duke Energy services subject to hourly rates, including legal, insurance, internal audit, tax planning, human resources and security departments.

In connection with the Spectra spin, as of December 31, 2007, our corporate operations, Spectra Energy, or third party service providers have assumed responsibility for all services previously provided to us by Duke Energy.

In the fourth quarter of 2006, an insurance provider that is a subsidiary of Duke Energy agreed to settle an insurance claim, related to a damaged underground storage facility, for approximately $21 million. We had recorded a receivable in 2005 related to this claim for approximately $4 million. Upon receipt of the cash in December 2006, we relieved the receivable and recorded business interruption insurance recoveries of approximately $16 million, included in the consolidated statements of operations and comprehensive income as transportation, storage and processing.

ConocoPhillips

Long-term NGLs Purchases Contract and Transactions—We sell a portion of our residue gas and NGLs to ConocoPhillips and its subsidiaries, including Chevron Phillips Chemical Company LLC, or CP Chem, a 50% equity investment of ConocoPhillips. In addition, we purchase raw natural gas from ConocoPhillips. Under the NGL Output Purchase and Sale Agreements, or the NGL Agreements, with ConocoPhillips and CP Chem, ConocoPhillips and CP Chem have the right to purchase at index-based prices substantially all NGLs produced by our various processing plants located in the Mid-Continent and Permian Basin regions, and the Austin Chalk area, which include approximately 40% of our total NGL production. The NGL Agreements also grant ConocoPhillips and CP Chem the right to purchase at index-based prices certain quantities of NGLs produced at processing plants that are acquired and/or constructed by us in the future in various counties in the Mid-Continent and Permian Basin regions, and the Austin Chalk area. The primary terms of the agreements are effective until January 1, 2015. We anticipate continuing to purchase and sell these commodities and provide these services to ConocoPhillips and CP Chem in the ordinary course of business.

Transactions with other unconsolidated affiliates

We sell a portion of our residue gas and NGLs to, purchase raw natural gas and other petroleum products from, and provide gathering and transportation services to, unconsolidated affiliates. We anticipate continuing to purchase and sell commodities and provide services to unconsolidated affiliates in the ordinary course of business.

In February 2005, we sold our general partner interest in TEPPCO to Enterprise GP Holdings L.P., an unrelated third party, for $1,100 million in cash and recognized a gain of $1,137 million. The cash proceeds from this transaction were received in February 2005 and loaned to Duke Energy and ConocoPhillips in amounts equal to their ownership percentages in the Company at that time. The loans were made under the terms of revolving

YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

credit facilities established in February 2005 with Duke Capital LLC, an affiliate of Duke Energy, and ConocoPhillips in the amounts of $767 million and $333 million, respectively. ConocoPhillips repaid their outstanding borrowings in full in March 2005. Duke Capital LLC repaid their outstanding borrowings in full in July 2005.

Estimates related to affiliates

Revenue for goods and services provided but not invoiced to affiliates is estimated each month and recorded along with related purchases of goods and services used but not invoiced. These estimates are generally based on estimated commodity prices, preliminary throughput measurements and allocations and contract data. Actual invoices for the current month are issued in the following month and differences from estimated amounts are recorded. There are no material differences from the actual amounts invoiced subsequent to quarter end relating to estimated revenues and purchases recorded at December 31, 2007, 2006 and 2005.

4. Inventories

Inventories were as follows:

	December 31, 2007	December 31, 2006
	(millions)	
Natural gas held for resale	$ 39	$ 34
NGLs	78	53
Total inventories	$ 117	$ 87

5. Property, Plant and Equipment

Property, plant and equipment by classification was as follows:

	Depreciable Life	December 31, 2007	December 31, 2006
		(millions)	
Gathering	15 - 30 years	$ 3,233	$ 2,641
Processing	25 - 30 years	2,030	1,904
Transportation	25 - 30 years	1,224	1,217
Underground storage	20 - 50 years	121	119
General plant	3 - 5 years	153	146
Construction work in progress		347	203
		7,108	6,230
Accumulated depreciation		(2,665)	(2,361)
Property, plant and equipment, net		$ 4,443	$ 3,869

Depreciation expense for the years ended December 31, 2007, 2006 and 2005 was $304 million, $275 million and $278 million, respectively. Interest capitalized on construction projects in 2007, 2006 and 2005, was approximately $4 million, $3 million and $2 million, respectively. At December 31, 2007 we had non-cancelable purchase obligations of approximately $9 million for capital projects to be completed in 2008.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

6. Goodwill and Intangible Assets

The changes in carrying amount of goodwill are as follows:

	December 31, 2007	December 31, 2006
	(millions)	
Goodwill, beginning of period	$ 421	$ 421
Goodwill acquired	135	—
Goodwill, end of period	$ 556	$ 421

The increase in goodwill during 2007 consists of the amount that we recognized in connection with our acquisition of MEG.

We perform an annual goodwill impairment test, and update the test during interim periods if events or circumstances occur that would more likely than not reduce the fair value of a reporting unit below its carrying amount. We use a discounted cash flow analysis supported by market valuation multiples to perform the assessment. Key assumptions in the analysis include the use of an appropriate discount rate, estimated future cash flows and an estimated run rate of general and administrative costs. In estimating cash flows, we incorporate current market information, as well as historical and other factors, into our forecasted commodity prices. Our annual goodwill impairment test, as of August 31, 2007, and our interim goodwill impairment test in conjunction with the distribution of substantially all of our Canadian business to Duke Energy in conjunction with the 50-50 Transaction, in July 2005, both indicated that our reporting units' fair values exceed their carrying or book values. Accordingly, no impairment of goodwill is indicated.

Intangible assets consist primarily of commodity sales and purchase contracts and relationships. The gross carrying amount and accumulated amortization for intangible assets are as follows:

	December 31, 2007	December 31, 2006
	(millions)	
Gross carrying amount	$398	$132
Accumulated amortization	(86)	(74)
Intangible assets, net	$312	$ 58

Intangible assets increased as a result of the Southern Oklahoma and MEG acquisitions, through which $12 million and $254 million, respectively, of intangible assets were acquired. During the years ended December 31, 2007, 2006 and 2005 we recorded amortization expense of $12 million, $9 million, and $9 million, respectively. The remaining amortization periods range from less than one year to 25 years, with a weighted average remaining period of approximately 21 years.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

Estimated amortization for these contracts for the next five years and thereafter is as follows as of December 31, 2007:

	Estimated Amortization (millions)
2008	$ 21
2009	20
2010	19
2011	18
2012	18
Thereafter	216
Total	$312

7. Investments in Unconsolidated Affiliates

We have investments in the following unconsolidated affiliates accounted for using the equity method:

	2007 Ownership	December 31, 2007	December 31, 2006
		(millions)	
Discovery Producer Services LLC	40.00%	$ 118	$ 114
Main Pass Oil Gathering Company	66.67%	43	47
Mont Belvieu I	20.00%	12	11
Sycamore Gas System General Partnership	48.45%	11	12
Tri-States NGL Pipeline, LLC	16.67%	9	9
Black Lake Pipe Line Company	50.00%	7	6
Other unconsolidated affiliates	Various	4	5
Total investments in unconsolidated affiliates		$ 204	$ 204

Discovery Producer Services LLC—Discovery operates a 600 MMcf/d cryogenic natural gas processing plant near Larose, Louisiana, a natural gas liquids fractionator plant near Paradis, Louisiana with a design capacity of 600 MMcf/d and approximately 173 miles of pipe, and several onshore laterals expanding their presence in the Gulf. In December 2005, we acquired an additional 6.67% interest in Discovery from Williams Energy, LLC for a purchase price of $13 million, bringing our total ownership to 40%. The deficit between the carrying amount of the investment and the underlying equity of Discovery of $44 million and $49 million at December 31, 2007 and 2006, respectively, is associated with, and is being depreciated over the life of, the underlying long-lived assets of Discovery.

Main Pass Oil Gathering Company—In December 2006, we acquired an additional 33.33% interest in Main Pass, a joint venture whose primary operation is a crude oil gathering pipeline system in the Main Pass East and Viosca Knoll Block areas in the Gulf of Mexico. We now own 66.67% of Main Pass with one other partner. Since Main Pass is not a variable interest entity, and we do not have the ability to exercise control, we continue to account for Main Pass under the equity method. The excess of the carrying amount of the investment over the underlying equity of Main Pass of $12 million at both December 31, 2007 and 2006, is associated with, and is being depreciated over the life of, the underlying long-lived assets of Main Pass.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

Mont Belvieu I—Mont Belvieu I owns a 150 MBbl/d fractionation facility in the Mont Belvieu, Texas Market Center. The deficit between the carrying amount of the investment and the underlying equity of Mont Belvieu I of $10 million and $11 million at December 31, 2007 and 2006, respectively, is associated with, and is being depreciated over the life of, the underlying long-lived assets of Mont Belvieu I.

Sycamore Gas System General Partnership—Sycamore Gas System General Partnership, or Sycamore, is a partnership formed for the purpose of constructing, owning and operating a gas gathering and compression system in Carter County, Oklahoma. The excess of the carrying amount of the investment over the underlying equity of Sycamore of $7 million and $9 million at December 31, 2007 and 2006, respectively, is associated with, and is being depreciated over the life of, the underlying long-lived assets of Sycamore.

Tri-States NGL Pipeline, LLC—Tri-States NGL Pipeline, LLC, or Tri-States, owns 169 miles of NGL pipeline, extending from a point near Mobile Bay, Alabama to a point near Kenner, Louisiana. The deficit between the carrying amount of the investment and the underlying equity of Tri-States of $3 million at both December 31, 2007 and 2006 is associated with, and is being depreciated over the life of, the underlying long-lived assets of Tri-States. We own less than 20% interest in this Partnership, however, we exercise significant influence, therefore, this investment is accounted for under the equity method of accounting.

Black Lake Pipe Line Company—Black Lake Pipe Line Company, or Black Lake, owns a 317 mile long NGL pipeline, with a current capacity of approximately 40 MBbl/d. The pipeline receives NGLs from a number of gas plants in Louisiana and Texas. The NGLs are transported to Mont Belvieu fractionators. The deficit between the carrying amount of the investment and the underlying equity of Black Lake of $7 million at both December 31, 2007 and 2006, is associated with, and is being depreciated over the life of, the underlying long-lived assets of Black Lake.

TEPPCO Partners, L.P.—In February 2005, we sold our general partner interest in TEPPCO to Enterprise GP Holdings L.P., an unrelated third party, for $1,100 million in cash and recognized a gain of $1,137 million.

Equity in earnings of unconsolidated affiliates amounted to the following:

	For the Years Ended December 31,		
	2007	2006	2005
		(millions)	
Discovery Producer Services LLC	$ 24	$ 17	$ 11
Main Pass Oil Gathering Company	1	3	3
Mont Belvieu I	1	(1)	(1)
Sycamore Gas System General Partnership	(1)	(1)	(1)
Tri-States NGL Pipeline, LLC	1	1	1
Black Lake Pipe Line Company	1	—	—
TEPPCO Partners, L.P.	—	—	8
Other unconsolidated affiliates	2	1	1
Total equity in earnings of unconsolidated affiliates	$ 29	$ 20	$ 22

Current liabilities	(49)	(61)
Non-current liabilities	(19)	(7)
Net assets	$693	$771

8. Estimated Fair Value of Financial Instruments

We have determined the following fair value amounts using available market information and appropriate valuation methodologies. Considerable judgment is required, however, in interpreting market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that we could realize in a current market exchange. The use of different market assumptions and/or estimation methods may have a material effect on the estimated fair value amounts.

	December 31, 2007		December 31, 2006	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
		(millions)		
Short-term investments	$ 9	$ 9	$ 437	$ 437
Restricted investments	$ 101	$ 101	$ 102	$ 102
Accounts receivable	$ 1,688	$ 1,688	$ 1,272	$ 1,272
Accounts payable	$ 1,675	$ 1,675	$ 1,624	$ 1,624
Net unrealized (losses) and gains on mark-to-market and hedging instruments	$ (97)	$ (97)	$ 22	$ 22
Long-term debt	$ 2,930	$ 3,030	$ 2,115	$ 2,258

The fair value of short-term investments, restricted investments, accounts receivable and accounts payable are not materially different from their carrying amounts because of the short-term nature of these instruments or the stated rates approximating market rates. Unrealized gains and unrealized losses on mark-to-market and hedging instruments are carried at fair value.

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

The estimated fair values of current debt, including current maturities of long-term debt, and long-term debt, with the exception of DCP Partners' long-term debt, are determined by prices obtained from market quotes. The carrying value of DCP Partners' long-term debt approximates fair value, as the interest rate is variable and reflects current market conditions.

9. Asset Retirement Obligations

Our asset retirement obligations relate primarily to the retirement of various gathering pipelines and processing facilities, obligations related to right-of-way easement agreements, and contractual leases for land use. We recognize the fair value of a liability for an asset retirement obligation in the period in which it is incurred, if a reasonable estimate of fair value can be made. The fair value of the liability is added to the carrying amount of the associated asset. This additional carrying amount is then depreciated over the life of the asset. The liability increases due to the passage of time based on the time value of money until the obligation is settled.

We identified various assets as having an indeterminate life, for which there is no requirement to establish a fair value for future retirement obligations associated with such assets. These assets include certain pipelines, gathering systems and processing facilities. A liability for these asset retirement obligations will be recorded only if and when a future retirement obligation with a determinable life is identified. These assets have an indeterminate life because they are owned and will operate for an indeterminate future period when properly maintained. Additionally, if the portion of an owned plant containing asbestos were to be modified or dismantled, we would be legally required to remove the asbestos. We currently have no plans to take actions that would require the removal of the asbestos in these assets. Accordingly, the fair value of the asset retirement obligation related to this asbestos cannot be estimated and no obligation has been recorded.

The asset retirement obligation is adjusted each quarter for any liabilities incurred or settled during the period, accretion expense and any revisions made to the estimated cash flows. The following table summarizes changes in the asset retirement obligation, included in other long-term liabilities in the consolidated balance sheets:

	December 31, 2007	December 31, 2006
	(millions)	
Balance, beginning of period	$ 52	$ 50
Accretion expense	4	3
Liabilities incurred	4	—
Liabilities settled	—	(1)
Other	(1)	—

10. Financing

Long-term debt was as follows:

	December 31, 2007	December 31, 2006
	(millions)	
Debt securities:		
Issued August 2000, interest at 7.875% payable semiannually, due August 2010	$ 800	$ 800
Issued January 2001, interest at 6.875% payable semiannually, due February 2011	250	250
Issued October 2005, interest at 5.375% payable semiannually, due October 2015	200	200
Issued August 2000, interest at 8.125% payable semiannually, due August 2030	300	300
Issued October 2006, interest at 6.450% payable semiannually, due November 2036	300	300
Issued September 2007, interest at 6.750% payable semiannually, due September 2037	450	—
DCP Partners' credit facility revolver, weighted-average interest rate of 5.47% and 5.86%, respectively, due June 2012(a)	530	168
DCP Partners' credit facility term loan, interest rate of 5.05% and 5.47%, respectively, due June 2012	100	100
Fair value adjustments related to interest rate swap fair value hedges(b)	8	4
Unamortized discount	(8)	(7)
Long-term debt	$2,930	$2,115

(a) $425 million of debt has been swapped to a fixed rate obligation.
(b) $100 million of debt has been swapped to a floating rate obligation.

Debt Securities—In September 2007, we issued $450 million principal amount of 6.75% Senior Notes due 2037, or the 6.75% Notes, for proceeds of approximately $444 million, net of related offering costs. The 6.75% Notes mature and become due and payable on September 15, 2037. We will pay interest semiannually on March 15 and September 15 of each year, commencing March 15, 2008. The proceeds of this offering were used to pay off the 364-Day Bridge Loan described below.

In October 2006, we issued $300 million principal amount of 6.45% Senior Notes due 2036, or the 6.45% Notes, for proceeds of approximately $297 million, net of related offering costs. The 6.45% Notes mature and become due and payable on November 3, 2036. We will pay interest semiannually on May 3 and November 3 of each year, commencing May 3, 2007.

In October 2005, we issued $200 million principal amount of 5.375% Senior Notes Due 2015, or 5.375% Notes, for proceeds of $197 million (net of related offering costs). The 5.375% Notes mature on October 15, 2015. We pay interest semiannually on April 15 and October 15 of each year, commencing April 15, 2006. The proceeds from this offering were used to repay the August 2005 term loan facility discussed below.

In August 2005, we repaid the $600 million 7.5% Notes that were due on August 16, 2005. We repaid a portion of this debt with available cash and proceeds from the issuance of commercial paper, and refinanced a portion of this debt with the August 2005 term loan facility discussed below.

The debt securities mature and become payable on the respective due dates, and are not subject to any sinking fund provisions. Interest is payable semiannually. The debt securities are unsecured and are redeemable at our option.

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

Credit Facilities with Financial Institutions—We have a $450 million revolving credit facility, or the Facility, which is used to support our commercial paper program, and for working capital and other general corporate purposes. In October 2006, we amended the Facility to modify the change of control provisions to allow for the Spectra spin, to extend the maturity to April 29, 2012, to amend the pricing, to remove the interest coverage covenant and to incorporate other minor revisions. Any outstanding borrowings under the Facility at maturity may, at our option, be converted to an unsecured one-year term loan. The Facility requires us to maintain at all times a debt to total capitalization ratio of less than or equal to 60%. Draws on the Facility bear interest at a rate equal to, at our option and based on our current debt rating, either (1) LIBOR plus 0.23% per year for the initial 50% usage or LIBOR plus 0.28% per year if usage is greater than 50% or (2) the higher of (a) the Wachovia Bank prime rate per year and (b) the Federal Funds rate plus 0.5% per year. The Facility incurs an annual facility fee of 0.07% based on our credit rating on the drawn and undrawn portions. The Facility may be used for letters of credit. As of December 31, 2007 and 2006, there were no borrowings or commercial paper outstanding, and there were approximately $5 million in letters of credit outstanding for both periods.

In August 2005, we entered into a credit agreement, or the Term Loan Facility, where we made a one-time request to borrow $200 million in the form of a term loan. We used this Term Loan Facility to repay a portion of our $600 million 7.5% Notes that matured on August 16, 2005. The Term Loan Facility was repaid in October 2005 with proceeds from the 5.375% Notes.

On June 21, 2007, DCP Partners entered into the Amended and Restated Credit Agreement, or DCP Partners' Amended Credit Agreement, that replaced their existing credit agreement, or DCP Partners' Credit Agreement, which consists of a $600 million revolving credit facility and a $250 million term loan facility. At December 31, 2007 and 2006, DCP Partners had less than $1 million of letters of credit outstanding. Outstanding balances under the term loan facility are fully collateralized by investments in high-grade securities, which are classified as restricted investments in the accompanying consolidated balance sheet as of December 31, 2007 and December 31, 2006.

Under DCP Partners' Amended Credit Agreement, indebtedness under the revolving credit facility bears interest at either: (1) the higher of Wachovia Bank's prime rate or the federal funds rate plus 0.50%; or (2) LIBOR plus an applicable margin, which ranges from 0.23% to 0.575% dependent upon the leverage level or credit rating. The revolving credit facility incurs an annual facility fee of 0.07% to 0.175% depending on the applicable leverage level or debt rating. This fee is paid on drawn and undrawn portions of the revolving credit facility. The term loan facility bears interest at a rate equal to; (1) LIBOR plus 0.10%; or (2) the higher of Wachovia Bank's prime rate or the federal funds rate plus 0.50%.

DCP Partners' Amended Credit Agreement requires DCP Partners to maintain a leverage ratio (the ratio of consolidated indebtedness to consolidated EBITDA, in each case as is defined by DCP Partners' Amended Credit Agreement) of not more than 5.0 to 1.0, and on a temporary basis for not more than three consecutive quarters (including the quarter in which such acquisition is consummated) following the consummation of asset acquisitions in the midstream energy business of not more than 5.50 to 1.0. DCP Partners' Amended Credit Agreement also requires DCP Partners to maintain an interest coverage ratio (the ratio of consolidated EBITDA to consolidated interest expense, in each case as is defined by DCP Partners' Amended Credit Agreement) of equal or greater than 2.5 to 1.0 determined as of the last day of each quarter for the four-quarter period ending on the date of determination.

Bridge Loans

In August 2007, we entered into a 364-day bridge loan, or the 364-Day Bridge Loan, which provided for borrowings of up to $450 million, and had terms and conditions substantially similar to those of our Facility. We borrowed $450 million to fund a portion of the acquisition of the stock of MEG, and then paid it off in September with proceeds from the issuance of the 6.75% Notes.

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

In May 2007, DCP Partners entered into a two-month bridge loan, or the Two-Month Bridge Loan, which provided for borrowings up to $100 million, and had terms and conditions substantially similar to those of DCP Partners' Credit Agreement. In conjunction with DCP Partners entering into the Two-Month Bridge Loan, DCP Partners' Credit Agreement was amended to provide for additional unsecured indebtedness, of an amount not to exceed $100 million, which was due and payable no later than August 9, 2007. DCP Partners used borrowings of $88 million from the Two-Month Bridge Loan to partially fund the acquisition of assets from Anadarko. The remaining $12 million available for borrowing on the Two-Month Bridge Loan was not utilized. DCP Partners used a portion of the net proceeds of a private placement of limited partner units to extinguish the $88 million outstanding on the Two-Month Bridge Loan in June 2007.

Approximate future maturities of long-term debt in the year indicated are as follows at December 31, 2007:

Debt Maturities (millions)	
2010	$ 800
2011	250
2012	630
Thereafter	1,258
	2,938
Unamortized discount	(8)
Long-term debt	$2,930

11. Risk Management and Derivative Activities, Credit Risk and Financial Instruments

The impact of our derivative activity on our results of operations and financial position is summarized below:

	For the Years Ended December 31, 2007	2006 (millions)	2005
Commodity derivative instruments:			
Gains reclassified into earnings	$ 1	$ 4	$—
Commodity derivative activity:			
Unrealized (losses) gains from derivative activity	$(102)	$ 6	$ (6)
Realized gains (losses) from derivative activity	$ 59	$ 71	$ (9)
Interest rate derivative instruments:			
Losses reclassified into earnings	$ (1)	$ (1)	$ (1)

	December 31, 2007	2006 (millions)
Commodity derivative instruments:		
Net deferred (losses) gains in AOCI	$ (1)	$ 3
Interest rate derivative instruments:		
Net deferred losses in AOCI	$ (10)	$ (7)
Interest rate fair value hedges:		
Unrealized gains	$ 8	$ 4

Table of Contents

For the years ended December 31, 2007 and 2006, no derivative gains or losses were reclassified from AOCI to current period earnings as a result of the discontinuance of cash flow hedges related to certain forecasted transactions that are not probable of occurring.

Commodity Price Risk—Our principal operations of gathering, processing, compression, transportation and storage of natural gas, and the accompanying operations of fractionation, transportation, gathering, treating, processing, storage and trading and marketing of NGLs create commodity price risk exposure due to market fluctuations in commodity prices, primarily with respect to the prices of NGLs, natural gas and crude oil. As an owner and operator of natural gas processing and other midstream assets, we have an inherent exposure to market variables and commodity price risk. The amount and type of price risk is dependent on the underlying natural gas contracts entered into to purchase and process raw natural gas. Risk is also dependent on the types and mechanisms for sales of natural gas and NGLs, and related products produced, processed, transported or stored.

Energy Trading (Market) Risk—Certain of our subsidiaries are engaged in the business of trading energy related products and services, including managing purchase and sales portfolios, storage contracts and facilities, and transportation commitments for products. These energy trading operations are exposed to market variables and commodity price risk with respect to these products and services, and we may enter into physical contracts and financial instruments with the objective of realizing a positive margin from the purchase and sale of commodity-based instruments.

Interest Rate Risk—We enter into debt arrangements that have either fixed or floating rates, therefore we are exposed to market risks related to changes in interest rates. We periodically use interest rate swaps to hedge interest rate risk associated with our debt. Our primary goals include (1) maintaining an appropriate ratio of fixed-rate debt to floating-rate debt; (2) reducing volatility of earnings resulting from interest rate fluctuations; and (3) locking in attractive interest rates based on historical rates.

Credit Risk—Our principal customers range from large, natural gas marketing services to industrial end-users for our natural gas products and services, as well as large multi-national petrochemical and refining companies, to small regional propane distributors for our NGL products and services. Substantially all of our natural gas and NGL sales are made at market-based prices. Approximately 40% of our NGL production is committed to ConocoPhillips and CP Chem under an existing 15-year contract, which expires in 2015. This concentration of credit risk may affect our overall credit risk, in that these customers may be similarly affected by changes in economic, regulatory or other factors. Where exposed to credit risk, we analyze the counterparties' financial condition prior to entering into an agreement, establish credit limits and monitor the appropriateness of these limits on an ongoing basis. We may use master collateral agreements to mitigate credit exposure. Collateral agreements provide for a counterparty to post cash or letters of credit for exposure in excess of the established threshold. The threshold amount represents an open credit limit, determined in accordance with our credit policy. The collateral agreements also provide that the inability to post collateral is sufficient cause to terminate a contract and liquidate all positions. In addition, our standard gas and NGL sales contracts contain adequate assurance provisions, which allow us to suspend deliveries and cancel agreements, or continue deliveries to the buyer after the buyer provides security for payment in a satisfactory form.

As of December 31, 2007, we held deposits, of $57 million included in other current liabilities, and letters of credit, of $97 million, from counterparties to secure their future performance of financial or physical contracts. We had deposits with counterparties of $45 million, included in other current assets, of such collateral to secure our obligations to provide future services or to perform under financial contracts. Collateral amounts held or posted may be fixed or may vary, depending on the value of the underlying contracts, and could cover normal purchases and sales, trading and hedging contracts. In many cases, we and our counterparties publicly disclose credit ratings, which may impact the amounts of collateral requirements.

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

Physical forward contracts and financial derivatives are generally cash settled at the expiration of the contract term. These transactions are generally subject to specific credit provisions within the contracts that would allow the seller, at its discretion, to suspend deliveries, cancel agreements or continue deliveries to the buyer after the buyer provides security for payment satisfactory to the seller.

Commodity Derivative Activity—Our operations of gathering, processing, and transporting natural gas, and the related operations of transporting and marketing of NGL create commodity price risk due to market fluctuations in commodity prices, primarily with respect to the prices of NGL, natural gas and crude oil.

We manage our commodity derivative activities in accordance with our risk management policy, which limits exposure to market risk and requires regular reporting to management of potential financial exposure.

Commodity Cash Flow Protection Activities—DCP Partners uses NGL, natural gas and crude oil swaps to mitigate the risk of market fluctuations in the price of NGL, natural gas and condensate. Prior to July 1, 2007, the effective portion of the change in fair value of a derivative designated as a cash flow hedge was accumulated in AOCI. During the period in which the hedged transaction impacted earnings, amounts in AOCI associated with the hedged transaction were reclassified to the consolidated statements of operations and comprehensive income in the same accounts as the item being hedged.

Effective July 1, 2007, we elected to discontinue using the hedge method of accounting for our commodity cash flow hedges. Therefore, we are using the mark-to-market method of accounting for all commodity derivative instruments. As a result, the remaining net loss deferred in AOCI will be reclassified to sales of natural gas and petroleum products through December 2011, as the hedged transactions impact earnings. Deferred net losses of less than $1 million are expected to be reclassified into earnings during the next 12 months. Subsequent to July 1, 2007, the changes in fair value of these financial derivatives are included in trading and marketing gains and losses in the consolidated statements of operations and comprehensive income.

As of December 31, 2007, DCP Partners has mitigated a portion of our expected natural gas, NGL and condensate commodity price risk associated with the equity volumes from their gathering and processing operations through 2013 with natural gas, NGL and crude oil derivatives.

Commodity Fair Value Hedges—Historically, we used fair value hedges to mitigate risk to changes in the fair value of an asset or a liability (or an identified portion thereof) that is attributable to fixed price risk. We may hedge producer price locks (fixed price gas purchases) and market locks (fixed price gas sales) to reduce our cash flow exposure to fixed price risk via swapping the fixed price risk for a floating price position (New York Mercantile Exchange or index based).

Normal Purchases and Normal Sales—If a contract qualifies and is designated as a normal purchase or normal sale, no recognition of the contract's fair value in the consolidated financial statements is required until the associated delivery period impacts earnings. We have applied this accounting election for contracts involving the purchase or sale of physical natural gas, propane or NGLs in future periods.

Commodity Derivatives—Trading and Marketing—Our trading and marketing program is designed to realize margins related to fluctuations in commodity prices and basis differentials, and to maximize the value of certain storage and transportation assets. Certain of our subsidiaries are engaged in the business of trading energy related products and services including managing purchase and sales portfolios, storage contracts and facilities, and transportation commitments for products. These energy trading operations are exposed to market variables

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

and commodity price risk with respect to these products and services, and may enter into physical contracts and financial instruments with the objective of realizing a positive margin from the purchase and sale of commodity-based instruments. We manage our trading and marketing portfolio with strict policies, which limit exposure to market risk, and require daily reporting to management of potential financial exposure. These policies include statistical risk tolerance limits using historical price movements to calculate daily value at risk.

Interest Rate Cash Flow Hedges—DCP Partners mitigates a portion of their interest rate risk with interest rate swaps, which reduce the exposure to market rate fluctuations by converting variable interest rates to fixed interest rates. These interest rate swaps convert the interest rate associated with an aggregate of $425 million of the variable rate exposure to a fixed rate obligation, thereby reducing the exposure to market rate fluctuations. All interest rate swap agreements have been designated as cash flow hedges, and effectiveness is determined by matching the principal balance and terms with that of the specified obligation. The effective portions of changes in fair value are recognized in AOCI in the consolidated balance sheets. As of December 31, 2007, $2 million of deferred net losses on derivative instruments in AOCI are expected to be reclassified into earnings during the next 12 months as the hedged transactions impact earnings however, due to the volatility of the interest rate markets, the corresponding value in AOCI is subject to change prior to its reclassification into earnings. Ineffective portions of changes in fair value are recognized in earnings. The agreements reprice prospectively approximately every 90 days. Under the terms of the interest rate swap agreements, we pay fixed rates ranging from 3.97% to 5.19%, and receive interest payments based on the three-month LIBOR. The differences to be paid or received under the interest rate swap agreements are recognized as an adjustment to interest expense. The agreements are with major financial institutions, which are expected to fully perform under the terms of the agreements.

Interest Rate Fair Value Hedges—In August 2003, we entered into two interest rate swaps to convert $100 million of fixed-rate debt securities issued in August 2000 to floating rate debt. These interest rate fair value hedges are at a floating rate based on six-month LIBOR, which is re-priced semiannually through 2030. The swaps meet conditions that permit the assumption of no ineffectiveness. As such, for the life of the swaps no ineffectiveness will be recognized.

12. Non-Controlling Interest

Non-controlling interest represents the ownership interests of third-party entities in net assets of various equity method investments in consolidated affiliates, including ownership interest of DCP Partners' public unitholders in net assets of DCP Partners through DCP Partners' publicly traded common units, and in net assets of DCP East Texas Holdings, LLC, of which DCP Partners acquired a 25% equity interest in July 2007 as well as Collbran Valley Gas Gathering, which was acquired in conjunction with the MEG acquisition in August 2007. For financial reporting purposes, the assets and liabilities of these entities are consolidated with those of our own, with any third party and affiliate investors' interest in our consolidated balance sheet amounts shown as non-controlling interest. Distributions to and contributions from non-controlling interests represent cash payments and cash contributions, respectively, from such third-party and affiliate investors.

13. Stock-Based Compensation

We recorded stock-based compensation expense as follows, the components of which are further described below:

	For the Years Ended December 31, 2007	2006 (millions)	2005
DCP Midstream, LLC Long-Term Incentive Plan (2006 Plan)	$ 4	$ 1	$ —
DCP Partners' Long-Term Incentive Plan (DCP Partners' Plan)	2	1	—
Duke Energy 1998 Plan and Spectra Energy Long-Term Incentive Plan	1	6	5
Total	$ 7	$ 8	$ 5

	Vesting Period (years)	Unrecognized Compensation Expense at December 31, 2007 (millions)	Estimated Forfeiture Rate	Weighted-Average Remaining Vesting (years)
DCP Midstream's 2006 Plan:				
Relative Performance Units (RPUs)	8	$ 1	64%	6
Strategic Performance Units (SPUs)	3	$ 4	12%/32%	2
Phantom Units	5	$ 1	19%	4
DCP Partners' Phantom Units	3	$ 1	12%/32%	1
DCP Partners' Plan:				
Performance Units	3	$ 1	0%	2
Phantom Units	3	$ —	0%	1
Duke Energy's 1998 Plan and Spectra Energy's 2007 LTIP Plan:				
Stock Options (no activity in 2006 or 2007)	0-10	$ —	NA	—
Stock Based Performance Awards	3	$ —	0-8%	1
Phantom Awards	1-5	$ —	4-5%	2
Other Stock Awards	1-5	$ —	NA	—

DCP Midstream, LLC Long-Term Incentive Plan, or 2006 Plan—Under our 2006 Long Term Incentive Plan, or 2006 Plan, equity instruments may be granted to our key employees. The 2006 Plan provides for the grant of Relative Performance Units, or RPUs, Strategic Performance Units, or SPUs, and Phantom Units. The RPUs, SPUs and Phantom Units consist of a notional unit based on the value of common shares or units of ConocoPhillips, Duke Energy, Spectra Energy and DCP Partners. The weighting varies depending on when the units were granted. The DCP Partners' Phantom Units constitute a notional unit equal to the fair value of DCP Partners' common units. Each award provides for the grant of dividend or distribution equivalent rights. The 2006 Plan is administered by the compensation committee of our board of directors. We first granted awards under the 2006 Plan during the second quarter of 2006. All awards are subject to cliff vesting.

Relative Performance Units—The number of RPUs that will ultimately vest range from 0% to 200% of the outstanding RPUs, depending on the achievement of specified performance targets over a three year period ending in January 2009 and 2010, respectively, for units granted in 2006 and 2007. The final performance payout is determined by the compensation committee of our board of directors. After the performance period, vesting

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

occurs over five years, at the end of which the value is based on the participant's investment elections during the deferral period. Dividend or distribution equivalent rights will be paid in cash at the end of the performance period. The following tables presents information related to RPUs:

	Units	Grant Date Weighted-Average Price Per Unit	Measurement Date Weighted-Average Price Per Unit
Outstanding at December 31, 2005	—	$ —	
Granted	44,080	$ 42.89	
Outstanding at December 31, 2006	44,080	$ 42.89	
Granted	42,340	$ 43.98	
Forfeited	(21,237)	$ 43.55	
Vested or paid in cash	(3,016)	$ 42.86	
Outstanding at December 31, 2007	62,167	$ 43.41	$ 54.84
Expected to vest	33,041	$ 43.41	$ 54.84

Strategic Performance Units—The number of SPUs that will ultimately vest range from 0% to 150% of the outstanding SPUs, depending on the achievement of specified performance targets over a three year period ending on December 31, 2008 and 2009, respectively, for units granted in 2006 and 2007. The final performance payout is determined by the compensation committee of our board of directors. Dividend or distribution equivalent rights will be paid in cash at the end of the performance period. The following tables presents information related to SPUs:

	Units	Grant Date Weighted-Average Price Per Unit	Measurement Date Weighted-Average Price Per Unit
Outstanding at December 31, 2005	—	$ —	
Granted	84,960	$ 42.92	
Outstanding at December 31, 2006	84,960	$ 42.92	
Granted	86,380	$ 44.04	
Forfeited	(28,305)	$ 43.51	
Vested or paid in cash	(3,016)	$ 42.86	
Outstanding at December 31, 2007	140,019	$ 43.49	$ 54.84
Expected to vest	127,432	$ 43.49	$ 54.84

The estimate of RPUs and SPUs that are expected to vest is based on highly subjective assumptions that could potentially change over time, including the expected forfeiture rate and achievement of performance targets. Therefore the amounts of unrecognized compensation expense noted above does not necessarily represent the value that will ultimately be realized in our consolidated statements of operations and comprehensive income.

Granted	19,450	$ 44.10	
Forfeited	(2,930)	$ 43.42	
Vested or paid in cash	(180)	$ 42.86	
Outstanding at December 31, 2007	33,800	$ 43.57	$ 54.84
Expected to vest	29,931	$ 43.57	$ 54.84

DCP Partners' Phantom Units—The distribution equivalent rights are paid quarterly in arrears. The following table presents information related to the DCP Partners' Phantom Units:

	Units	Grant Date Weighted-Average Price Per Unit	Measurement Date Weighted-Average Price Per Unit
Outstanding at December 31, 2005	—	$ —	
Granted	47,750	$ 28.60	
Outstanding at December 31, 2006	47,750	$ 28.60	
Granted	13,500	$ 50.57	
Forfeited	(2,000)	$ 28.60	
Vested or paid in cash	(7,500)	$ 28.60	
Outstanding at December 31, 2007	51,750	$ 34.33	$ 45.95
Expected to vest	46,080	$ 34.33	$ 45.95

DCP Partners' Long-Term Incentive Plan, or DCP Partners' Plan—Under DCP Partners' Long Term Incentive Plan, or DCP Partners' Plan, which was adopted by DCP Midstream GP, LLC, equity instruments may be granted to key employees, consultants and directors of DCP Midstream GP, LLC and its affiliates who perform services for DCP Partners. The DCP Partners' Plan provides for the grant of limited partner units, or LPUs, phantom units, unit options and substitute awards, and, with respect to unit options and phantom units, the grant of dividend equivalent rights, or DERs. Subject to adjustment for certain events, an aggregate of 850,000 common units may be delivered pursuant to awards under the DCP Partners' Plan. Awards that are canceled, forfeited or withheld to satisfy DCP Midstream GP, LLC's tax withholding obligations are available for delivery pursuant to other awards. The DCP Partners' Plan is administered by the compensation committee of DCP Midstream GP, LLC's board of directors. All awards are subject to cliff vesting, with the exception of the Phantom Units issued to the directors in conjunction with the initial public offering, which are subject to graded vesting provisions.

Table of Contents

DCP MIDSTREAM, LLC

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005**

Awards granted to directors are accounted for as equity-based awards and all other awards are accounted for as liability awards.

Performance Units—The number of Performance Units that will ultimately vest range from 0% to 150% of the outstanding Performance Units, depending on the achievement of specified performance targets over three year performance periods. The final performance percentage payout is determined by the compensation committee of DCP Partners' board of directors. The DERs will be paid in cash at the end of the performance period. Of the remaining Performance Units outstanding at December 31, 2007, 28,350 units are expected to vest on December 31, 2008 and 27,150 units are expected to vest on December 31, 2009. The following tables presents information related to the Performance Units:

	Units	Grant Date Weighted-Average Price Per Unit	Measurement Date Weighted-Average Price Per Unit
Outstanding at December 31, 2005	—	$ —	
Granted	40,560	$ 26.96	
Forfeited	(17,470)	$ 26.96	
Outstanding at December 31, 2006	23,090	$ 26.96	
Granted	29,610	$ 37.29	
Forfeited	(5,740)	$ 31.39	
Outstanding at December 31, 2007	46,960	$ 32.93	$ 45.95
Expected to vest(a)	55,500	$ 32.93	$ 45.95

(a) Based on our December 31, 2007 estimated achievement of specified performance targets, the number of performance units granted in 2006 that will ultimately vest is estimated at 143% of the targeted units granted.

The estimate of Performance Units that are expected to vest is based on highly subjective assumptions that could potentially change over time, including the expected forfeiture rate and achievement of performance targets. Therefore the amount of unrecognized compensation expense noted above does not necessarily represent the value that will ultimately be realized in our consolidated statements of operations and comprehensive income.

Phantom Units—In conjunction with their initial public offering, in January 2006 DCP Partners awarded Phantom Units to key employees, and to directors who are not officers or employees of DCP Midstream GP, LLC, or its affiliates who perform services for DCP Partners. Of the remaining Phantom Units outstanding at December 31, 2007, 2,001 units are expected to vest on January 3, 2008 and 17,698 units are expected to vest on January 3, 2009.

In 2007, DCP Partners granted 4,500 Phantom Units pursuant to the DCP Partners' Plan, to directors who are not officers or employees of affiliates of DCP Midstream as part of their annual director fees for 2007. Of these Phantom Units, 4,000 units vested during 2007 and 500 units are expected to vest on February 7, 2008.

The DERs are paid quarterly in arrears.

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

The following table presents information related to the Phantom Units:

	Units	Grant Date Weighted-Average Price Per Unit	Measurement Date Weighted-Average Price Per Unit
Outstanding at December 31, 2005	—	$ —	
Granted	35,900	$ 24.05	
Forfeited	(11,200)	$ 24.05	
Outstanding at December 31, 2006	24,700	$ 24.05	
Granted	4,500	$ 42.90	
Forfeited	(2,333)	$ 24.05	
Vested	(6,668)	$ 35.23	
Outstanding at December 31, 2007	20,199	$ 24.56	$ 45.95
Expected to vest	20,199	$ 24.56	$ 45.95

The estimate of Phantom Units that are expected to vest is based on highly subjective assumptions that could potentially change over time, including the expected forfeiture rate. Therefore the amount of unrecognized compensation expense noted above does not necessarily represent the value that will ultimately be realized in our consolidated statements of operations and comprehensive income.

During the year ended December 31, 2007, 2,668 units vested and were settled in cash for less than $1 million, and 4,000 units were settled with the issuance of limited partner units.

All awards issued under the 2006 Plan and the DCP Partners' Plan are intended to be settled in cash or stock upon vesting. Compensation expense is recognized ratably over each vesting period, and will be remeasured quarterly for all awards outstanding until the units are vested. The fair value of all awards is determined based on the closing price of the relevant underlying securities at each measurement date.

Duke Energy 1998 Plan and Spectra Energy 2007 Long-Term Incentive Plan—Under the Duke Energy 1998 Plan, or the 1998 Plan, Duke Energy granted certain of our key employees stock options, stock-based performance awards, phantom stock awards and other stock awards to be settled in shares of Duke Energy's common stock, or the Stock-Based Awards. Upon execution of the 50-50 Transaction in July 2005, our employees incurred a change in status from Duke Energy employees to non-employees. As a result, we began accounting for these awards using the fair value method. No awards have been and we do not expect to settle any awards granted under the 1998 Plan with cash.

In connection with the Spectra spin, one replacement Duke Energy Stock-Based Award and one-half Spectra Energy Stock-Based Award were distributed to each holder of Duke Energy Stock-Based Awards for each award held at the time of the Spectra spin. Substantially all converted Stock-Based Awards are subject to the terms and conditions applicable to the original Duke Energy Stock-Based Awards. The Spectra Energy Stock-Based Awards resulting from the conversion are considered to have been issued under the Spectra Energy 2007 Long-Term Incentive Plan, or the Spectra Energy 2007 LTIP.

The Spectra Energy 2007 LTIP provides for the granting of stock options, restricted stock awards and units, unrestricted stock awards and units, and other equity-based awards, to employees and other key individuals who

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

perform services for Spectra Energy. A maximum of 30 million shares of common stock may be awarded under the Spectra Energy 2007 LTIP. Options granted under the Spectra Energy 2007 LTIP are issued with exercise prices equal to the fair market value of Spectra Energy common stock on the grant date, have ten year terms, and vest immediately or over terms not to exceed five years. Compensation expense related to stock options is recognized over the requisite service period. The requisite service period for stock options is the same as the vesting period, with the exception of retirement eligible employees, who have shorter requisite service periods ending when the employees become retirement eligible. Restricted, performance and phantom stock awards granted under the Spectra Energy 2007 LTIP typically become 100% vested on the three-year anniversary of the grant date. The fair value of the awards granted is measured based on the fair market value of the shares on the date of grant, and the related compensation expense is recognized over the requisite service period which is the same as the vesting period.

Stock Options—Under the 1998 Plan, the exercise price of each option granted could not be less than the market price of Duke Energy's common stock on the date of grant. Effective July 1, 2005, these options were accounted using the fair value method. As a result, compensation expense subsequent to July 1, 2005, is recognized based on the change in the fair value of the stock options at each reporting date until vesting.

The following table shows information regarding options to purchase Duke Energy's common stock granted to our employees, reflecting shares outstanding as impacted by the conversion.

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Life (years)	Aggregate Intrinsic Value (millions)
Outstanding at December 31, 2005	2,592,567	$ 29.46	5.2	
Exercised	(367,088)	$ 21.15		
Forfeited	(124,417)	$ 29.96		
Effect of conversion	(258,058)			
Outstanding at December 31, 2006	1,843,004	$ 17.85	4.1	
Exercised	(21,960)	$ 13.89		
Forfeited	(5,088)	$ 22.90		
Outstanding at December 31, 2007	1,815,956	$ 17.89	3.2	$ 7
Exercisable at December 31, 2007	1,815,956	$ 17.89	3.2	$ 7

The total intrinsic value of options exercised during the years ended December 31, 2007 and 2006, was less than $1 million and approximately $3 million, respectively.

Outstanding at December 31, 2007	—	$ —	$ —
Expected to vest	—	$ —	$ —

The total fair value of the other stock awards that vested during the years ended December 31, 2007 and 2006 was not significant. No awards were granted or canceled during the years ended December 31, 2007 and 2006.

14. Benefits

All Company employees who are 18 years old and work at least 20 hours per week are eligible for participation in our 401(k) and retirement plan, to which we contributed 4% of each eligible employee’s qualified earnings through December 31, 2006. Effective January 1, 2007, we began contributing a range of 4% to 7% of each eligible employee’s qualified earnings to the retirement plan, based on years of service. Additionally, we match employees’ contributions in the 401(k) plan up to 6% of qualified earnings. During 2007 we expensed plan contributions of $17 million and during 2006 and 2005 we expensed plan contributions of $15 million in both periods.

We offer certain eligible executives the opportunity to participate in DCP Midstream LP’s Non-Qualified Executive Deferred Compensation Plan. This plan allows participants to defer current compensation on a pre-tax basis and to receive tax deferred earnings on such contributions. The plan also has make-whole provisions for plan participants who may otherwise be limited in the amount that we can contribute to the 401(k) plan on the

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

participant's behalf. All amounts contributed to or earned by the plan's investments are held in a trust account for the benefit of the participants. The trust and the liability to the participants are part of our general assets and liabilities, respectively.

15. Income Taxes

We are structured as a limited liability company, which is a pass-through entity for United States income tax purposes. We own a corporation that files its own federal, foreign and state corporate income tax returns. The income tax expense related to this corporation is included in our income tax expense, along with state and local taxes of the limited liability company and other subsidiaries. In addition, until July 1, 2005, we had Canadian subsidiaries that were subject to Canadian income taxes. Taxes associated with these subsidiaries have been reclassified to discontinued operations for year ended December 31, 2005.

In May 2006, the State of Texas enacted a margin-based franchise tax law that replaced the existing franchise tax, commonly referred to as the Texas margin tax. The Texas margin tax is assessed at 1% of taxable margin apportioned to Texas. As a result of the change in Texas franchise law, our status in the state of Texas changed from non-taxable to taxable. Since the Texas margin tax is considered an income tax, in the second quarter of 2006 we recorded a non-current deferred tax liability of $18 million. The Texas margin tax becomes effective for franchise tax reports due on or after January 1, 2008. The 2008 tax will be based on revenues earned during the 2007 fiscal year. Accordingly, we recorded current tax expense for the Texas margin tax, beginning in 2007.

Income tax expense consists of the following:

	For the Years Ended December 31,		
	2007	2006 (millions)	2005
Current:			
Federal	$ 5	$ 5	$ 9
State	11	1	2
Deferred:			
Federal	(4)	—	—
State	(1)	17	(2)
Total income tax expense	$ 11	$ 23	$ 9

Temporary differences for our federal deferred tax assets of $7 million primarily relate to basis differences between property, plant and equipment, and investments in consolidated affiliates. Temporary differences for our state deferred tax liabilities of $16 million primarily relate to basis differences between property, plant and equipment.

Our effective tax rate differs from statutory rates, primarily due to our being structured as a limited liability company, which is a pass-through entity for United States income tax purposes, while being treated as a taxable entity in certain states.

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

16. Commitments and Contingent Liabilities

Litigation—The midstream industry has seen a number of class action lawsuits involving royalty disputes, mismeasurement and mispayment allegations. Although the industry has seen these types of cases before, they were typically brought by a single plaintiff or small group of plaintiffs. A number of these cases are now being brought as class actions. We are currently named as defendants in some of these cases. Management believes we have meritorious defenses to these cases and, therefore, will continue to defend them vigorously. These class actions, however, can be costly and time consuming to defend. We are also a party to various legal, administrative and regulatory proceedings that have arisen in the ordinary course of our business.

In December 2006, El Paso E&P Company, L.P., or El Paso, filed a lawsuit against one of our subsidiaries, DCP Assets Holding, LP and an affiliate of DCP Midstream GP, LP, in District Court, Harris County, Texas. The litigation stems from an ongoing commercial dispute involving DCP Partners' Minden processing plant that dates back to August 2000. El Paso claims damages, including interest, in the amount of $6 million in the litigation, the bulk of which stems from audit claims under our commercial contract. It is not possible to predict whether we will incur any liability or to estimate the damages, if any, we might incur in connection with this matter.

Management currently believes that these matters, taken as a whole, and after consideration of amounts accrued, insurance coverage and other indemnification arrangements, will not have a material adverse effect upon our consolidated results of operations, financial position or cash flows.

In October 2007, we settled a lawsuit alleging migration of acid gas from a storage formation into a third party producing formation. Pending regulatory approval, we will obtain the rights to the producing formation. This matter did not have a material adverse effect upon our consolidated results of operations, financial position or cash flows.

General Insurance—Effective August 2006, Midstream's insurance coverage is carried with an affiliate of ConocoPhillips and third party insurers. Prior to August 2006, Midstream carried a portion of their insurance coverage with an affiliate of Duke Energy Corporation. Midstream's insurance coverage includes: (1) general liability insurance covering third party exposures; (2) statutory workers' compensation insurance; (3) automobile liability insurance for all owned, non-owned and hired; (4) excess liability insurance above the established primary limits for general liability and automobile liability insurance; (5) property insurance, which covers the replacement value of all real and personal property and includes business interruption/extra expense; and (6) directors and officers insurance covering our directors and officers for acts related to our business activities. All coverage is subject to certain limits and deductibles, the terms and conditions of which are common for companies with similar types of operations.

During the third quarter of 2004, certain assets, located in the Gulf Coast, were damaged as a result of hurricane Ivan. Also, during the third quarter of 2005, hurricanes Katrina and Rita forced us to temporarily shut down our operations at certain assets located in Alabama, Louisiana, Texas and New Mexico. Several of our assets sustained property damage, including some of our operating equipment on a platform in the Gulf of Mexico. A portion of the resulting lost revenues and property damages were covered by our insurance, subject to applicable deductibles. The financial impact of hurricanes has increased market rates for insurance coverage; however, these increases did not have a material adverse effect on our consolidated results of operations, financial position or cash flows. Insurance recovery receivables and business interruption recoveries related to these hurricanes are detailed in Note 3.

Environmental—The operation of pipelines, plants and other facilities for gathering, transporting, processing, treating, or storing natural gas, NGLs and other products is subject to stringent and complex laws and regulations pertaining to health, safety and the environment. As an owner or operator of these facilities, we must

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

comply with United States laws and regulations at the federal, state and local levels that relate to air and water quality, hazardous and solid waste management and disposal, and other environmental matters. The cost of planning, designing, constructing and operating pipelines, plants, and other facilities must incorporate compliance with environmental laws and regulations and safety standards. Failure to comply with these laws and regulations may trigger a variety of administrative, civil and potentially criminal enforcement measures, including citizen suits, which can include the assessment of monetary penalties, the imposition of remedial requirements, the issuance of injunctions or restrictions on operation. Management believes that, based on currently known information, compliance with these laws and regulations will not have a material adverse effect on our consolidated results of operations, financial position or cash flows.

On July 20, 2006, the State of New Mexico Environment Department issued Compliance Orders to us that list air quality violations during the past five years at six of our owned or operated facilities in New Mexico. The orders allege a number of violations related to excess emissions beginning January 2001, and further require us to install flares for smokeless operations and to use the flares only for emergency purposes. Management does not believe the ultimate resolution of this issue will have a material adverse effect on our consolidated results of operations, financial position or cash flows.

Other Commitments and Contingencies—In June 2007, DCP Partners entered into a private placement agreement with a group of institutional investors for $130 million, representing 3,005,780 common limited partner units at a price of $43.25 per unit, and received proceeds of $129 million, net of offering costs. In August 2007, DCP Partners issued 2,380,952 common limited partner units in a private placement, pursuant to a common unit purchase agreement with private owners of MEG or affiliates of such owners, at $42.00 per unit, or approximately $100 million in the aggregate. In January 2008, DCP Partners' registration statement on Form S-3 to register the common limited partner units represented in the private placement agreements was declared effective by the Securities and Exchange Commission.

We utilize assets under operating leases in several areas of operations. Consolidated rental expense, including leases with no continuing commitment, amounted to $41 million, $37 million and $36 million in 2007, 2006 and 2005, respectively. Rental expense for leases with escalation clauses is recognized on a straight line basis over the initial lease term.

Minimum rental payments under our various operating leases in the year indicated are as follows:

	Minimum Rental Payments (millions)
2008	$ 24
2009	19
2010	18
2011	17
2012	15
Thereafter	31
Total gross payments	124
Sublease receipts	(1)
Total net payments	$123

Table of Contents

DCP MIDSTREAM, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — Continued
YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

17. Guarantees and Indemnifications

We have signed a corporate guaranty, pursuant to which we are the guarantor of a maximum of approximately $1 million and $10 million of construction obligations as of December 31, 2007 and 2006, respectively. The guaranty will expire upon completion and payment for construction of a pipeline expected to be completed during 2008. The fair value of this guarantee is not significant to our consolidated results of operations, financial position or cash flows.

We periodically enter into agreements for the acquisition or divestiture of assets. These agreements contain indemnification provisions that may provide indemnity for environmental, tax, employment, outstanding litigation, breaches of representations, warranties and covenants, or other liabilities related to the assets being acquired or divested. Claims may be made by third parties under these indemnification agreements for various periods of time depending on the nature of the claim. The effective periods on these indemnification provisions generally have terms of one to five years, although some are longer. Our maximum potential exposure under these indemnification agreements can vary depending on the nature of the claim and the particular transaction. We are unable to estimate the total maximum potential amount of future payments under indemnification agreements due to several factors, including uncertainty as to whether claims will be made under these indemnities.

18. Supplementary Cash Flow Information

	December 31,		
	2007	2006	2005

Non-cash additions of property, plant and equipment	$ 8	$ 10	$ 13
Distributions payable to members	$123	$127	$185

19. Subsequent Events

On January 24, 2008, DCP Partners announced the declaration of a cash distribution of $0.57 per unit that was paid on February 14, 2008 to unitholders of record on February 7, 2008.

In January 2008, we received a distribution from Discovery of $11 million.

In February 2008, 50% of our subordinated units in DCP Partners, or 3,571,428 subordinated units, were converted to common units in accordance with the early termination provision in DCP Partners' partnership agreement.

Subsequent to December 31, 2007, DCP Partners executed a series of derivative instruments to mitigate a portion of its anticipated commodity exposure. DCP Partners entered into natural gas swap contracts for 2,000 MMBtu/d at $7.80/MMBtu, for a term from July through December 2008, and DCP Partners entered into crude oil swap contracts, each for 225 Bbls/d at an average of $87.93/Bbl, for terms ranging from July 2008 through December 2012.

On March 17, 2008, DCP Partners closed an offering of 4,250,000 of its common units representing limited partner interests at $32.44 per unit.

The Company's common stock is $1 par value. Therefore, the change in *Common Stock, $1 par value,* is equivalent to the change in the number of shares of common stock issued.

The accompanying notes are an integral part of these condensed consolidated financial statements.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The accompanying unaudited interim condensed consolidated financial statements of Southern Union and its subsidiaries (collectively, *the Company*) have been prepared pursuant to the rules and regulations of the SEC for quarterly reports on Form 10-Q. These statements do not include all of the information and annual note disclosures required by GAAP, and should be read in conjunction with the Company's financial statements and notes thereto for the year ended December 31, 2007, which are included in the Company's Form 10-K filed with the SEC. The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with GAAP and reflect adjustments that are, in the opinion of management, necessary for a fair statement of results for the interim period. The year-end condensed balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP. Due to the seasonal nature of the Company's operations, the results of operations and cash flows for any interim period are not necessarily indicative of the results that may be expected for the full year.

1. Description of Business

Southern Union owns and operates assets in the regulated and unregulated natural gas industry and is primarily engaged in the gathering, processing, transportation, storage and distribution of natural gas in the United States. The Company operates in three reportable segments: Transportation and Storage, Gathering and Processing, and Distribution. The Transportation and Storage segment is primarily engaged in the interstate transportation and storage of natural gas in the Midwest and from the Gulf Coast to Florida, and also provides LNG terminalling and regasification services. The Gathering and Processing segment is primarily engaged in the gathering, treating, processing and redelivery of natural gas and NGL in Texas and New Mexico. The Distribution segment is primarily engaged in the local distribution of natural gas in Missouri and Massachusetts.

2. New Accounting Principles

Accounting Principles Recently Adopted.

FASB Statement No. 157, "Fair Value Measurements" (Statement No. 157): Issued by the FASB in September 2006, this Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Where applicable, this Statement simplifies and codifies related guidance within GAAP. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. In February 2008, the FASB released a FASB Staff Position (FSP FAS 157-2, "*Effective Date of FASB Statement No. 157*"), which delays the effective date of this Statement for all non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), to fiscal years beginning after November 15, 2008. The Company's major categories of non-financial assets and non-financial liabilities that are

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

recognized or disclosed at fair value for which, in accordance with FSP FAS 157-2, the Company has not applied the provisions of Statement No. 157 as of January 1, 2008 are (i) fair value calculations associated with annual or periodic impairment tests, and (ii) asset retirement obligations measured at fair value upon initial recognition or upon certain remeasurement events under FASB Statement No. 143, "*Accounting for Asset Retirement Obligations*." The partial adoption on January 1, 2008 of this Statement for financial assets and liabilities did not have a material impact on the Company's consolidated financial statements. See *Note 12 – Fair Value Measurement* for more information. In October 2008, the FASB issued FASB Staff Position FSP FAS 157-3, "*Determining the Fair Value of a Financial Asset When the Market for that Asset is Not Active*" (*FSP FAS 157-3*). FSP FAS 157-3 provides clarifying guidance with respect to the application of Statement No. 157 in determining the fair value of a financial asset when the market for that asset is not active. FSP FAS 157-3 was effective upon its issuance. The application of FSP FAS 157-3 did not have a material impact on the Company's consolidated financial statements.

FASB Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115": Issued by the FASB in February 2007, this Statement permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. The Statement does not affect any existing accounting literature that requires certain assets and liabilities to be carried at fair value. The Statement is effective for fiscal years beginning after November 15, 2007. At January 1, 2008, the Company did not elect the fair value option under the Statement and, therefore, there was no impact on the Company's consolidated financial statements.

Staff Accounting Bulletin No. 110 (SAB 110): Issued by the SEC in December 2007, SAB 110 expresses the views of the SEC staff regarding the use of a "simplified" method, as discussed in SAB No. 107, in developing an estimate of expected term of "plain vanilla" share options in accordance with Statement No. 123R, "*Accounting for Stock-Based Compensation*." The SEC staff indicated in SAB No. 107 that it would accept a company's election to use the simplified method, regardless of whether the company has sufficient information to make more refined estimates of expected term, for options granted prior to December 31, 2007. In SAB 110, the SEC staff states that it will continue to accept, under certain circumstances, the use of the simplified method beyond December 31, 2007. Pursuant to the guidance provided in SAB 110, the Company has elected to continue utilizing the simplified method in developing the estimate of the expected term for its share options.

FSP No. FIN 39-1, "Amendment of FASB Interpretation No. 39" (FIN 39-1): Issued by the FASB in April 2007, FIN 39-1 impacts entities that enter into master netting arrangements as part of their derivative transactions by allowing net derivative positions to be offset in the financial statements against the fair value of amounts (or amounts that approximate fair value) recognized for the right to reclaim cash collateral or the obligation to return cash collateral under those arrangements. In accordance with FASB Interpretation No. 39, the Company has historically offset the fair value amounts for derivative instruments executed with the same counterparty where a right of setoff existed, which included derivative instruments subject to master netting arrangements at December 31, 2007. In accordance with FIN 39-1, the Company elects to offset the fair value amounts for derivative instruments, including cash collateral, executed with the same counterparty under a master netting arrangement.

Accounting Principles Not Yet Adopted.

FASB Statement No. 141 (revised), "Business Combinations" (SFAS 141). Issued by the FASB in December 2007, this Statement changes the accounting for business combinations including the measurement of acquirer shares issued in consideration of a business combination, the recognition of contingent consideration, the accounting for preacquisition gain and loss contingencies, the recognition of capitalized in-process research and development costs, the accounting for acquisition-related restructuring cost accruals, the treatment of acquisition-related transaction costs and the recognition of changes in the acquirer's income tax valuation allowance. The Statement is effective for fiscal years beginning after December 15, 2008, with early adoption prohibited.

FASB Statement No. 160, "Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51". Issued by the FASB in December 2007, this Statement changes the accounting for noncontrolling (minority) interests in consolidated financial statements, including the requirements to classify noncontrolling interests as a component of consolidated stockholders' equity, and the elimination of minority interest accounting in results of operations with earnings attributable to noncontrolling interests reported as part of consolidated earnings. Additionally, the Statement revises the accounting for both increases and decreases in a parent's controlling ownership interest. The Statement is effective for fiscal years beginning after December 15, 2008, with early adoption prohibited. The Company is currently evaluating the impact of this Statement on its consolidated financial statements.

FASB Statement No. 161, "Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133". Issued by the FASB in March 2008, this Statement requires disclosure of how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for and how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. The Statement is effective for fiscal years beginning after November 15, 2008, with early adoption permitted. The Company is currently evaluating the impact of this Statement on its consolidated financial statements.

3. Comprehensive Income (Loss)

The table below provides an overview of *Comprehensive income (loss)* for the periods indicated:

Comprehensive Income (Loss)	Three Months Ended September 30, 2008	Three Months Ended September 30, 2007	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
	(In thousands)			
Net Earnings	$ 46,776	$ 45,283	$ 172,594	$ 174,979
Comprehensive Income (Loss) Adjustments:				
Change in fair value of interest rate hedges, net of tax of $(2,096), $(4,329), $(3,090) and $(1,374), respectively	(3,118)	(6,319)	(4,523)	(1,924)
Reclassification of unrealized (gain) loss on interest rate hedges into earnings, net of tax of $1,280, $(34), $2,978 and $115, respectively	1,940	(143)	4,537	(946)
Realized loss on interest rate hedges, net of tax of $0, $0, $(620) and $0, respectively	-	-	(1,175)	-
Change in fair value of commodity hedges, net of tax of $21,257, $1,156, $7,006 and $(828), respectively	37,724	1,906	12,434	(1,364)
Reclassification of unrealized (gain) loss on commodity hedges into earnings, net of tax of $(268), $(829), $1,352 and $(2,004), respectively	(475)	(1,366)	2,399	(3,303)
Reduction of prior service credit relating to pension and other postretirement benefits, net of tax of $0, $0, $(3,231) and $0, respectively	-	-	(6,603)	-
Reclassification of net actuarial (gain) loss and prior service credit relating to pension and other postretirement benefits into earnings, net of tax of $(30), $(880), $921 and $(381), respectively	(110)	(1,341)	1,349	(158)
Total other comprehensive income (loss)	35,961	(7,263)	8,418	(7,695)
Total comprehensive income	$ 82,737	$ 38,020	$ 181,012	$ 167,284

See *Note 8 – Employee Benefits* for a discussion related to an amendment of Panhandle's other postretirement benefit plans in March 2008, which resulted in a $6.6 million net of tax reduction in the net prior service credit included in *Accumulated other comprehensive loss*.

4. Inventories

In the Transportation and Storage segment, inventories consist of natural gas held for operations and materials and supplies, both of which are stated at the lower of weighted average cost or market, while gas received from or owed back to customers is valued at market. The gas held for operations that the Company does not expect to consume in its operations in the next twelve months is reflected in non-current assets.

In the Gathering and Processing segment, inventories consist of non-fractionated Y-grade NGL and materials and supplies, both of which are stated at the lower of weighted average cost or market. With respect to information regarding the increase in SUGS' NGL inventory resulting from hurricane damage to a third-party NGL fractionator, see *Note 10 – Commitments and Contingencies – Other Commitments and Contingencies – 2008 Hurricane Damage*. Materials and supplies are primarily comprised of compressor components and parts.

In the Distribution segment, inventories consist of natural gas in underground storage and materials and supplies, both of which are stated at weighted average cost.

The components of inventory at the dates indicated are as follows:

	Transportation & Storage	Gathering & Processing	Distribution	Total
		(In thousands)		
At September 30, 2008				
Current				
Natural gas held for operations (1)	$ 140,870	$ -	$ -	$ 140,870
Materials and Supplies	13,602	9,550	4,357	27,509
NGL (2)	-	4,336	-	4,336
Natural gas in underground storage (3)	-	-	171,369	171,369
Total Current	154,472	13,886	175,726	344,084
Non-Current				
Natural gas held for operations (1)	15,542	-	-	15,542
	$ 170,014	$ 13,886	$ 175,726	$ 359,626
At December 31, 2007				
Current				
Natural gas held for operations (1)	$ 168,010	$ -	$ -	$ 168,010
Materials and Supplies	12,791	6,176	3,822	22,789
Natural gas in underground storage (3)	-	-	72,819	72,819
Total Current	180,801	6,176	76,641	263,618
Non-Current				
Natural gas held for operations (1)	18,947	-	-	18,947
	$ 199,748	$ 6,176	$ 76,641	$ 282,565

(1) Natural gas volumes held for operations at September 30, 2008 and December 31, 2007 were 20,333,000 MMBtu and 26,001,000 MMBtu, respectively.
(2) NGL at September 30, 2008 and December 31, 2007 was 4,568,000 gallons and nil, respectively.
(3) Natural gas volumes in underground storage at September 30, 2008 and December 31, 2007 were 17,406,000 MMBtu and 11,823,000 MMBtu, respectively.

5. Earnings per Share

Basic earnings per share is computed based on the weighted average number of common shares outstanding during each period. Diluted earnings per share is computed based on the weighted average number of common shares outstanding during each period, increased by conversion of equity units and common stock equivalents from stock options, restricted stock and SARs. A reconciliation of the shares used in the basic and diluted earnings per share calculations is shown in the following table.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(In thousands)			
Weighted average shares outstanding - Basic	123,975	120,018	123,264	119,894
Add assumed vesting of restricted stock	29	41	14	30
Add assumed conversion of equity units	-	270	-	227
Add assumed exercise of stock options and SARs	201	430	245	471
Weighted average shares outstanding - Diluted	124,205	120,759	123,523	120,622

The table below includes information related to stock options and SARs that were outstanding but have been excluded from the computation of weighted-average stock options due to the exercise price exceeding the weighted-average market price of the Company's common shares.

	September 30,	
	2008	2007
	(In thousands, except per share amounts)	
Options excluded	717	-
Exercise price of options excluded	$ 28.48	N/A
SARs excluded	416	-
Exercise price ranges of SARs excluded	$ 28.07 - $28.48	N/A
Third quarter weighted-average market price	$ 24.91	$ 30.96
Year-to-date weighted-average market price	$ 25.67	$ 30.55

6. Unconsolidated Investments

A summary of the Company's unconsolidated equity investments at the dates indicated is as follows:

	September 30, 2008	December 31, 2007
	(In thousands)	
Citrus	$ 1,223,059	$ 1,219,009
Other	20,580	21,411
	$ 1,243,639	$ 1,240,420

Unconsolidated equity investments at September 30, 2008 and December 31, 2007 included the Company's 50 percent, 50 percent, 29 percent and 49.9 percent investments in Citrus, Grey Ranch, Lee 8 Partnership and PEI II, LLC, respectively. The Company accounts for these investments using the equity method. The Company's share of net earnings or loss from these equity investments is recorded in *Earnings from unconsolidated investments* in the unaudited interim Condensed Consolidated Statement of Operations.

Summarized financial information for the Company's equity investments is as follows:

	September 30,2008		September 30,2007	
	Citrus	Other	Citrus	Other
	(In thousands)			
Three Months Ended:				
Revenues	$ 139,513	$ 2,593	$ 136,800	$ 4,115
Operating income	81,080	(320)	84,686	1,554
Net earnings (losses)	38,609	(642)	42,177	1,532
Nine Months Ended:

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Citrus.

Dividends. During the three- and nine-month periods ended September 30, 2008, Citrus paid dividends of nil and $40.8 million, respectively, to the Company. In the three- and nine-month periods ended September 30, 2007, Citrus paid dividends of $27.4 million and $103.6 million, respectively, to the Company, of which $9.7 million has been reflected by the Company as a return of investment. Citrus also declared a dividend in September 2008, payable in October 2008, of which the Company's share is $36.4 million.

Phase VIII Expansion. Florida Gas, a wholly-owned subsidiary of Citrus, filed a certificate application on October 31, 2008 with FERC to construct an expansion to increase its natural gas capacity into Florida by approximately 820 MMcf/d (*Phase VIII Expansion*). The proposed Phase VIII Expansion includes construction of approximately 500 miles of large diameter pipeline and the installation of approximately 200,000 horsepower of compression. Pending FERC approval, which is expected in the latter half of 2009, Florida Gas anticipates an in-service date during 2011, at a currently estimated cost of approximately $2.4 billion, including capitalized equity and debt costs. To date, Florida Gas has entered into precedent agreements with shippers for transportation services for 25-year terms accounting for approximately 89 percent of the available expansion capacity.

On February 5, 2008, Citrus entered into a $500 million unsecured construction and term loan agreement (*Construction Loan Agreement*) with a wholly-owned subsidiary of FPL Group Capital Inc., which is a wholly-owned subsidiary of FPL Group, Inc. Citrus will primarily invest the proceeds of this loan into Florida Gas in order to finance a portion of the Phase VIII Expansion. On August 6, 2008, the parties amended the Construction Loan Agreement to accelerate the funding date to October 1, 2008. On October 1, 2008, Citrus borrowed all of the $500 million available under the Construction Loan Agreement.

Florida Gas Pipeline Relocation Costs. The FDOT/FTE has various turnpike widening projects that have or may, over time, impact one or more of Florida Gas' mainline pipelines located in FDOT/FTE rights-of-way. Under certain conditions, existing agreements between Florida Gas and the FDOT/FTE require the FDOT/FTE to provide any new rights-of-way needed for relocation of the pipelines and Florida Gas to pay for rearrangement or relocation costs. Under certain other conditions, Florida Gas may be entitled to reimbursement for the costs associated with relocation, including construction and rights-of-way costs.

On October 20, 2005, Florida Gas filed an application with FERC for a State Road 91 Relocation Project. The first phase of the turnpike project included replacement of approximately 11.3 miles of its existing 18- and 24-inch pipelines located in FDOT/FTE rights-of-way in Broward County, Florida to accommodate the widening of State Road 91 by the FDOT/FTE. The FERC issued an order approving the project on May 3, 2006, and Florida Gas notified the FERC that construction commenced on April 25, 2007. Florida Gas received authorization from the FERC to place the facilities in service on March 20, 2008 and the State Road 91 Relocation facilities were placed in service on the same day. Approximately $111 million of replacement costs have been incurred as of September 30, 2008. As of September 30, 2008, no pipeline removal costs associated with the State Road 91 Relocation Project have been incurred.

On May 2, 2008, Florida Gas filed with FERC an amendment to its existing certificate seeking to hold in abeyance the abandonment authorization of the 18- and 24-inch existing pipelines for up to three years as a result of actions by the FDOT/FTE. On June 16, 2008, the FDOT/FTE intervened in the proceeding before FERC regarding the first phase of the project seeking an order from FERC to force Florida Gas to abandon and decommission the 18- and 24-inch pipelines. In an order issued October 10, 2008, FERC denied the amendment filed by Florida Gas and ordered Florida Gas to remove the 18- and 24-inch pipelines from service in accordance with a prior order. Florida Gas is also in discussions with the FDOT/FTE related to additional projects that may affect Florida Gas' 18- and 24-inch pipelines within FDOT/FTE rights-of-way. The total miles of pipe that may ultimately be affected by all of the FDOT/FTE widening projects, and any associated relocation and/or rights-of-way costs, cannot be determined at this time.

The various FDOT/FTE projects have also been the subject of state court litigation. On January 25, 2007, Florida Gas filed a complaint against FDOT/FTE in the Seventeenth Judicial Circuit, Broward County, Florida, to seek relief for three specific sets of FDOT/FTE widening projects in Broward County. The complaint seeks damages for breach of easement and relocation agreements for the State Road 91 Relocation Project and injunctive relief as well as damages for the two other sets of projects upon which construction has yet to commence. The FDOT/FTE filed an amended answer

**SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

and counterclaim against Florida Gas on February 5, 2008 in the Broward County action. The counterclaim alleges Florida Gas is subject to estoppel and breach of contract claims regarding removal from service of the existing 18- and 24-inch pipelines related to the State Road 91 Relocation Project and seeks a declaratory judgment that Florida Gas is responsible for all relocation costs and is not entitled to workspace and uniform minimum area with respect to its pipelines. On February 14, 2008 the case was transferred to the Broward County Complex Business Civil Division 07. On April 14, 2008, the FDOT/FTE amended its counterclaim, alleging Florida Gas committed fraud in the inducement by not removing its previously existing pipelines, seeking to place a constructive trust over any revenues associated with the previously existing and newly constructed pipelines, seeking a declaratory order from the Court that Florida Gas has abandoned its previously existing pipelines and seeking a temporary and permanent injunction forcing Florida Gas to remove such pipelines. On July 21, 2008, the Court allowed the FDOT/FTE to further amend its counterclaim to include counts of fraud and trespass but reserved ruling on permitting a demand for punitive damages on those counts. On October 6, 2008, the FDOT/FTE filed a supplemental motion for temporary injunction and a motion for partial summary judgment against Florida Gas on the extent of the rights Florida Gas claims under the easements at issue, the breach of the easements by the FDOT/FTE for failing to provide adequate rights-of-way, the failure of the FDOT/FTE to reimburse Florida Gas for the costs of relocation, and inverse condemnation by the FDOT/FTE as a result of the breach of the easements. Trial is scheduled for August 2009. A 2007 action brought by the FDOT/FTE against Florida Gas in Orange County, Florida, seeking a declaratory judgment that, under existing agreements, Florida Gas is liable for the costs of relocation associated with FDOT/FTE projects, has been stayed pending resolution of the Broward County, Florida action.

Should Florida Gas be denied reimbursement by the FDOT/FTE for relocation expenses, such costs are expected to be covered by operating cash flows and additional borrowings. Florida Gas expects to seek rate recovery at FERC for all reasonable and prudent costs incurred in relocating its pipelines to accommodate the FDOT/FTE to the extent not reimbursed by the FDOT/FTE. There can be no assurance that Florida Gas will be successful in obtaining complete reimbursement for any such relocation costs from the FDOT/FTE or from its customers or that the timing of reimbursement will fully compensate Florida Gas for its costs.

Litigation.

Jack Grynberg. Jack Grynberg, an individual, filed actions for damages against a number of companies, including Florida Gas, alleging mis-measurement of gas volumes and Btu content, resulting in lower royalties to mineral interest owners. For additional information related to these filed actions, see *Note 10 – Commitments and Contingencies – Litigation.*

Total consolidated debt obligations	3,693,011	3,518,006
Less current portion of long-term debt	60,888	434,680
Less short-term debt	377,246	123,000
Total consolidated long-term debt obligations	$ 3,254,877	$ 2,960,326

Short-Term Facility. On August 11, 2008, Southern Union entered into a short-term Credit Agreement in the amount of $150 million (*Short-Term Facility*). The Short-Term Facility is a 364-day term loan facility and will be due in its entirety on August 10, 2009. The interest rate associated with the Short-Term Facility is based, at the Company's option, upon either LIBOR plus 125 basis points or the prime lending rate. Borrowings under the Short-Term Facility are available for general corporate purposes. On October 1, 2008, Southern Union borrowed the $150 million and used the proceeds to reduce the amounts outstanding under other credit facilities. As of October 31, 2008, there was a balance of $150 million outstanding under the Short-Term Facility, with an effective interest rate of 4.00 percent.

7.00% Senior Notes due 2018. In June 2008, PEPL issued $400 million in senior notes due June 15, 2018 with an interest rate of 7.00 percent (*7.00% Senior Notes*). In connection with the issuance of the 7.00% Senior Notes, the Company incurred underwriting costs and debt discount totaling approximately $4.1 million, resulting in approximately $395.9 million in proceeds to the Company.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Amendment of Credit Facilities. Effective June 20, 2008, the Company entered into the Fifth Amended and Restated Revolving Credit Agreement (*Revolver*) among the Company, as borrower, and the lenders party thereto. The Company entered into the Revolver, which replaces the Fourth Amended and Restated Revolving Credit Agreement, dated as of September 29, 2005, as amended, in order to (i) permit the Company to make additional repurchases of a portion of the depositary shares representing ownership of its 7.55 percent Noncumulative Preferred Stock, Series A (*Preferred Stock*); (ii) permit the Company to redeem all outstanding depositary shares on or after October 8, 2008 in accordance with the terms of its certificate of designations; (iii) create more favorable representations, warranties and covenants for the Company; and (iv) remove certain provisions that are no longer relevant for the Company's needs.

On July 23, 2008, the Company entered into a short-term committed credit facility with one of its existing lenders in the amount of $20 million. The facility will mature on July 22, 2009 and replaces a $15 million uncommitted facility that the Company had in place with that same lender.

On September 30, 2008, the Company entered into a $30 million uncommitted facility with one of its existing lenders. The facility replaced a $15 million uncommitted facility that the Company had in place with that same lender. As of October 3, 2008, the Company was advised by the lender that no borrowings would be allowed under the facility until further notice, due to disruptions in the credit markets. Because this is an uncommitted facility and the Company has not included it as a funding source in its cash flow forecast planning, the lack of availability of the facility does not materially impact the Company's liquidity position.

Remarketing Obligation. On February 8, 2008, the Company remarketed the 4.375% Senior Notes, which yielded no cash proceeds for the Company. The interest rate on the Senior Notes was reset to 6.089 percent per annum effective on and after February 19, 2008. The 6.089% Senior Notes will mature on February 16, 2010. On February 19, 2008, the Company issued 3,693,240 shares of common stock for $100 million in cash proceeds in conjunction with the remarketing of its 4.375% Senior Notes.

Retirement of Debt Obligations

In August 2008, the Company repaid and retired its $300 million 4.80% Senior Notes and $125 million 6.15% Senior Notes using the remaining proceeds from the 7.00% Senior Notes issued in June 2008 and draw downs of its credit facilities.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

8. Employee Benefits

Components of Net Periodic Benefit Cost. Net periodic benefit cost for the periods ended September 30, 2008 and 2007 includes the components noted in the table below.

	Pension Benefits		Other Postretirement Benefits	
	2008	2007	2008	2007
	(In thousands)			
Three Months ended September 30,				
Service cost	$ 686	$ 664	$ 689	$ 489
Interest cost	2,470	2,287	1,405	1,047
Expected return on plan assets	(2,877)	(2,382)	(832)	(719)
Prior service cost (credit) amortization	138	127	(212)	(732)
Recognized actuarial (gain) loss	1,717	1,994	(307)	(204)
Sub-total	2,134	2,690	743	(119)
Regulatory adjustment	705	(515)	666	666
Net periodic benefit cost	$ 2,839	$ 2,175	$ 1,409	$ 547
Nine Months ended September 30,				
Service cost	$ 2,058	$ 1,992	$ 1,942	$ 1,467
Interest cost	7,410	6,861	4,090	3,141
Expected return on plan assets	(8,631)	(7,146)	(2,471)	(2,157)
Prior service cost (credit) amortization	414	381	(888)	(2,196)
Recognized actuarial (gain) loss	5,150	5,982	(919)	(612)
Sub-total	6,401	8,070	1,754	(357)
Regulatory adjustment	2,114	(2,981)	1,998	1,998
Net periodic benefit cost	$ 8,515	$ 5,089	$ 3,752	$ 1,641

In March 2008, a postretirement benefit plan change was approved for Panhandle for retirements beginning April 1, 2008. The change resulted in a pre-tax obligation increase of approximately $9.8 million.

In the Distribution segment, the Company recovers certain qualified pension benefit plan and other postretirement benefit plan costs through rates charged to utility customers. Certain utility commissions require that the recovery of these costs be based on the Employee Retirement Income Security Act of 1974, as amended, or other utility commission specific guidelines. The difference between these amounts and periodic benefit cost calculated pursuant to FASB Statement No. 87, *Employers' Accounting for Pensions and FASB Statement 106, Employers' Accounting for Postretirement Benefits Other Than Pensions,* is deferred as a regulatory asset or liability and amortized to expense over periods promulgated by the applicable utility commission in which this difference will be recovered in rates.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

9. Taxes on Income

The Company's income taxes were as follows:

	Three Months Ended September 30, 2008	Three Months Ended September 30, 2007	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
	(In thousands)			
Income tax expense	$ 19,665	$ 23,853	$ 75,260	$ 68,747
Effective tax rate	30%	35%	30%	28%

The decrease in the EITR for the three-month period ended September 30, 2008 was primarily due to the impact of state income tax rate changes resulting in higher state income tax expense of $4.9 million recorded in the third quarter of 2007, partially offset by a decrease in the tax benefit associated with the dividends received deduction as a result of lower estimated dividends from the Company's unconsolidated investment in Citrus. For the three-month periods ended September 30, 2008 and 2007, the tax benefit of the dividends received deduction was $6 million and $8.1 million, respectively.

The increase in the EITR for the nine-month period ended September 30, 2008 was primarily due to the decrease in the tax benefit associated with the dividends received deduction as a result of lower estimated dividends from the Company's unconsolidated investment in Citrus. For the nine-month periods ended September 30, 2008 and 2007, the tax benefit of the dividends received deduction was $19.8 million and $28.2 million, respectively. The dividends received deduction benefit in 2007 was partially offset by higher state income tax expense of $2.7 million recorded in 2007 attributable to an increase in state income tax rates.

The Company evaluates its tax reserves (unrecognized tax benefits) under the recognition, measurement and derecognition thresholds as prescribed by FIN 48, "*Accounting for Uncertainty in Income Taxes*". The Company increased the amount of its unrecognized tax benefits for certain state filing positions taken in prior periods by nil and $5.1 million ($3.3 million, net of federal tax) during the three- and nine-month periods ended September 30, 2008, respectively.

The Company increased the amount of its unrecognized tax benefits for certain state filing positions taken during the current periods by $1 million ($600,000, net of federal tax) and $3.2 million ($2.1 million, net of federal tax) during the three- and nine-month periods ended September 30, 2008, respectively. The Company decreased the amount of its unrecognized tax benefits as a result of the lapse of the federal statute of limitations for the annual tax periods ended June 30, 2004 and December 31, 2004 by $200,000 and $600,000 during the three- and nine-month periods ended September 30, 2008, respectively.

The Company currently has $8.3 million ($5.4 million, net of federal tax) of unrecognized tax benefits as of September 30, 2008, all of which would impact the Company's EITR if recognized. The Company believes it is reasonably possible that its unrecognized tax benefits may be reduced by $800,000 ($500,000, net of federal tax) within the next twelve months due to settlement of certain state filing positions and lapse of statutes of limitations.

The Company is no longer subject to U.S. federal, state or local examinations for the tax year ended June 30, 2004 and prior years except for state and local jurisdictions under examination. The Company has recorded unrecognized tax benefits of $800,000 ($500,000, net of federal tax) for state and local jurisdictions' assessments for examinations for June 30, 2004 and prior years. The Company also is no longer subject to federal examination for the tax period ended December 31, 2004.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

10. Commitments and Contingencies

Environmental

The Company's operations are subject to federal, state and local laws and regulations regarding water quality, hazardous and solid waste management, air quality control and other environmental matters. These laws and regulations require the Company to conduct its operations in a specified manner and to obtain and comply with a wide variety of environmental registrations, licenses, permits, inspections and other approvals. Failure to comply with environmental requirements may expose the Company to significant fines, penalties and/or interruptions in operations. The Company's environmental policies and procedures are designed to achieve compliance with such laws and regulations. These evolving laws and regulations and claims for damages to property, employees, other persons and the environment resulting from current or past operations may result in significant expenditures and liabilities in the future. The Company engages in a process of updating and revising its procedures for the ongoing evaluation of its operations to identify potential environmental exposures and enhance compliance with regulatory requirements. The Company follows the provisions of American Institute of Certified Public Accountants Statement of Position 96-1, *Environmental Remediation Liabilities,* for recognition, measurement, display and disclosure of environmental remediation liabilities.

The Company is allowed to recover environmental remediation expenditures through rates in certain jurisdictions within its Distribution segment. Although significant charges to earnings could be required prior to rate recovery for jurisdictions that do not have rate recovery mechanisms, management does not believe that environmental expenditures will have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows. The table below reflects the amount of accrued liabilities recorded in the unaudited interim Condensed Consolidated Balance Sheet at September 30, 2008 and December 31, 2007 to cover probable environmental response actions:

	September 30, 2008	December 31, 2007
	(In thousands)	
Current	$ 5,405	$ 6,772
Noncurrent	14,660	15,209
Total Environmental Liabilities	$ 20,065	$ 21,981

SPCC Rules. In May 2007, the EPA extended the SPCC rule compliance dates until July 1, 2009, permitting owners and operators of facilities to prepare or amend and implement SPCC Plans in accordance with previously enacted modifications to the regulations. In October 2007, the EPA proposed amendments to the SPCC rules with the stated intention of providing greater clarity, tailoring requirements, and streamlining requirements. The Company is currently reviewing the impact of the modified regulations on operations in its Transportation and Storage and Gathering and Processing segments and may incur costs for tank integrity testing, alarms and other associated corrective actions as well as potential upgrades to containment structures. Costs associated with such activities cannot be estimated with certainty at this time, but the Company believes such costs will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Transportation and Storage Segment Environmental Matters.

Gas Transmission Systems. Panhandle is responsible for environmental remediation at certain sites on its gas transmission systems for contamination resulting from the past use of lubricants containing PCBs in compressed air systems; the past use of paints containing PCBs; and the prior use of wastewater collection facilities and other on-site disposal areas. Panhandle has developed and is implementing a program to remediate such contamination. Remediation and decontamination has been completed at each of the 35 compressor station sites where auxiliary buildings that house the air compressor equipment were impacted by the past use of lubricants containing PCBs. At some locations, PCBs have been identified in paint that was applied many years ago. A program has been implemented to remove and dispose of PCB impacted paint during painting activities. At one location on the Trunkline system, PCBs were discovered on the painted surfaces of equipment in a

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

building that is outside the scope of the compressed air system program and the existing PCB impacted paint program. The estimated cost to remediate the painted surfaces at this location is approximately $300,000. Preliminary assessments were completed at all compressor station locations as of September 30, 2008. Subsequent focused assessments indicated PCBs at regulated levels in a small number of samples at 18 locations. Until the complete results of the assessment program are available and the analysis is completed, the costs associated with remediation of the painted surfaces cannot be reasonably estimated.

Other remediation typically involves the management of contaminated soils and may involve remediation of groundwater. Activities vary with site conditions and locations, the extent and nature of the contamination, remedial requirements, complexity and sharing of responsibility. The ultimate liability and total costs associated with these sites will depend upon many factors. If remediation activities involve statutory joint and several liability provisions, strict liability, or cost recovery or contribution actions, Panhandle could potentially be held responsible for contamination caused by other parties. In some instances, such as the Pierce waste oil sites described below, Panhandle may share liability associated with contamination with other PRPs. Panhandle may also benefit from contractual indemnities that cover some or all of the cleanup costs. These sites are generally managed in the normal course of business or operations. The Company believes the outcome of these matters will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

PEPL and Trunkline, together with other non-affiliated parties, were identified as potentially liable for conditions at three former waste oil disposal sites in Illinois – the Pierce Oil Springfield site, the Dunavan Waste Oil site and the McCook site (collectively, the *Pierce Waste Oil sites*). PEPL and Trunkline received notices of potential liability from the U.S. EPA for the Dunavan site by letters dated September 30, 2005. Although no formal notice has been received for the Pierce Oil Springfield site, special notice letters are anticipated and the process of listing the site on the National Priority List has begun. No formal notice has been received for the McCook site. The Company believes the outcome of these matters will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

On June 16, 2005, PEPL experienced a release of liquid hydrocarbons near Pleasant Hill, Illinois. The EPA took the lead role in overseeing the subsequent cleanup activities, which have been completed. PEPL has resolved claims of affected boat owners and the marina operator. PEPL received a violation notice from the IEPA alleging that PEPL was in apparent violation of several sections of the Illinois Environmental Protection Act by allowing the release. The violation notice did not propose a penalty. Responses to the violation notice were submitted and the responses were discussed with the agency. In December 2005, the IEPA notified PEPL that the matter might be considered for referral to the Office of the Attorney General, the State's Attorney or the EPA for formal enforcement action and the imposition of penalties. The only contact from the IEPA on this matter has been three requests for information to which the Company responded in January 2007, April 2008 and August 2008. The Company believes the outcome of this matter will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Air Quality Control. In early April 2007, the IEPA proposed a rule to the IPCB for adoption to control NOx emissions from reciprocating engines and turbines, including a provision applying the rule beyond issues addressed by federal provisions, pursuant to a blanket statewide application. After objections were filed with the IPCB, the IEPA filed an amended proposal withdrawing the statewide applicability provisions of the proposed rule and applying the rule requirements to non-attainment areas. The amended proposal was approved on January 10, 2008. No controls on PEPL and Trunkline stations are required under the most recent proposal. However, the IEPA indicated in earlier industry discussions that it was reserving the right to make future proposals for statewide controls. In the event the IEPA proposes a statewide rule again, preliminary estimates indicate the cost of compliance would require minimum capital expenditures of approximately $45 million for emission controls.

The KDHE has established certain contingency measures as part of the agency's ozone maintenance plan for the Kansas City area. These measures will be triggered if there are any new elevated ozone readings in the Kansas City area. One of the NOx emission sources that will be impacted is the PEPL Louisburg compressor station. In addition, the U.S. EPA has revised the ozone standard and the Kansas City area will likely be designated as a non-attainment area under the new and stricter standard. A meeting was held with KDHE on August 14, 2008 to discuss issues associated with reducing emissions at the Louisburg compressor station. In the event KDHE requires emission reductions, it is estimated that approximately $14 million in capital expenditures will be required.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Gathering and Processing Segment Environmental Matters.

Gathering and Processing Systems. SUGS is responsible for environmental remediation at certain sites on its gathering and processing systems, resulting primarily from releases of hydrocarbons. SUGS has a program to remediate such contamination. The remediation typically involves the management of contaminated soils and may involve remediation of groundwater. Activities vary with site conditions and locations, the extent and nature of the contamination, remedial requirements and complexity. The ultimate liability and total costs associated with these sites will depend upon many factors. These sites are generally managed in the normal course of business or operations. The Company believes the outcome of these matters will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Air Quality Control. On June 16, 2006, SUGS, as the facility operator and holder of a 50 percent interest in a partnership that leases the Grey Ranch facility, submitted information to the TCEQ in connection with a request to permit the Grey Ranch facility to continue its current level of emissions. The State of Texas required all previously grandfathered emission sources to obtain permits or shut down by March 1, 2008. By letter dated September 5, 2007, the TCEQ issued a permit extending current emission levels to March 1, 2009. Prior to the conclusion of the extension period, SUGS must obtain appropriate permits and implement an emission control strategy that achieves specific maximum allowable emissions rates. It is anticipated that the Company will not bear any of the costs associated with the emission controls. It is expected that Roc Gas Company, or one of its affiliates, which holds the other 50 percent interest in the partnership that leases the Grey Ranch facility (and also owns the site and facility), will bear all the costs necessary to construct control devices and modify its nearby compression facilities in order to meet maximum allowable emission limits.

Distribution Segment Environmental Matters.

The Company is responsible for environmental remediation at various contaminated sites that are primarily associated with former *MGPs* and sites associated with the operation and disposal activities of former MGPs that produced a fuel known as "town gas". Some byproducts of the historic manufactured gas process may be regulated substances under various federal and state environmental laws. To the extent these byproducts are present in soil or groundwater at concentrations in excess of applicable standards, investigation and remediation may be required. The sites include properties that are part of the Company's ongoing operations, sites formerly owned or used by the Company and sites owned by third parties. Remediation typically involves the management of contaminated soils and may involve removal of old MGP structures and remediation of groundwater. Activities vary with site conditions and locations, the extent and nature of the contamination, remedial requirements, complexity and sharing of responsibility; some contamination may be unrelated to former MGPs. The ultimate liability and total costs associated with these sites will depend upon many factors. If remediation activities involve statutory joint and several liability provisions, strict liability, or cost recovery or contribution actions, the Company could potentially be held responsible for contamination caused by other parties. In some instances, the Company may share liability associated with contamination with other PRPs, and may also benefit from insurance policies or contractual indemnities that cover some or all of the cleanup costs. These sites are generally managed in the normal course of business or operations. The Company believes the outcome of these matters will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

North Attleborough MGP Site in Massachusetts. In November 2003, the MDEP issued a Notice of Responsibility to New England Gas Company, acknowledging receipt of prior notifications and investigative reports submitted by New England Gas Company, following the discovery of suspected coal tar material at the site. Subsequent sampling in the adjacent river channel revealed sediment impacts necessitating the investigation of off-site properties. The Company, working with the MDEP, is in the process of performing assessment work at these properties. In a September 2006 report filed with the MDEP, the Company proposed a remedy for the upland portion of the site by means of an engineered barrier. Construction of this remedy was completed in October 2008. Assessment activities continue both on- and off-site to define the nature and extent of the impacts. It is estimated that the Company will spend approximately $7.5 million over the next several years to complete the investigation and remediation activities at this site, as well as maintain the engineered barrier. As New England Gas Company is allowed to recover environmental remediation expenditures through rates associated with its Massachusetts operations, the estimated costs associated with this site have been included in *Regulatory assets* in the Condensed Consolidated Balance Sheet.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Litigation

The Company is involved in legal, tax and regulatory proceedings before various courts, regulatory commissions and governmental agencies regarding matters arising in the ordinary course of business, some of which involve substantial amounts. Where appropriate, the Company has made accruals in accordance with FASB Statement No. 5, *Accounting for Contingencies*, in order to provide for such matters. The Company believes the final disposition of these proceedings will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Bay Street, Tiverton, Rhode Island Site. On March 17, 2003, the RIDEM sent the Company's New England Gas Company division a letter of responsibility pertaining to soils allegedly impacted by historic MGP residuals in a residential neighborhood in Tiverton, Rhode Island. Without admitting responsibility or accepting liability, New England Gas Company began assessment work in June 2003 and has continued to perform assessment field work since that time. On September 19, 2006, RIDEM filed an Amended Notice of Violation seeking an administrative penalty of $1,000/day, which as of the date of RIDEM's filing totaled $258,000 and continues to accrue. In June 2007, the Rhode Island Legislature considered, but failed to adopt, legislation that would have increased the maximum administrative penalty under a Notice of Violation to $50,000/day on a prospective basis. Similar legislation was considered in June 2008 that would have increased the maximum administrative penalty under a Notice of Violation to $25,000/day on a prospective basis. That proposed legislation was not adopted. On April 19, 2007, the Company filed a complaint, and an accompanying preliminary injunction motion, against RIDEM in Rhode Island Superior Court, seeking, among other things, a declaratory judgment that RIDEM's Amended Notice of Violation is premised on an unlawful application of RIDEM's regulations and that RIDEM's pending administrative proceeding against the Company is invalid. On July 13, 2007, the Superior Court dismissed the Company's suit, finding that RIDEM's AAD has original jurisdiction to determine "responsible party" status and finding premature the Company's challenge to RIDEM's unlawful application of its own regulations because the Company did not first seek a ruling on that issue from RIDEM's AAD. The Company has appealed from part of the Superior Court's ruling, and has also filed a motion for summary judgment in the AAD proceeding seeking dismissal thereof based on RIDEM's unlawful application of its own regulations. Briefing on the summary judgment motion is now complete. The Hearing Officer in the AAD proceeding has not yet issued a ruling on that motion. In consideration of the ongoing settlement discussions described below, the RIDEM administrative proceeding has been stayed. The Company will continue to vigorously defend itself in the AAD proceeding.

During 2005, four lawsuits were filed against New England Gas Company in Rhode Island regarding the Tiverton neighborhood. These lawsuits were consolidated for trial. The plaintiffs seek to recover damages for the diminution in value of their property, lost use and enjoyment of their property and emotional distress in an unspecified amount. The Company removed the lawsuits to federal court and filed motions to dismiss. On November 3, 2006, the Court dismissed plaintiffs' claims relating to gross negligence, private nuisance, infliction of emotional distress and violation of the Rhode Island Hazardous Waste Management Act. The Court denied the Company's motion to dismiss as to claims relating to negligence, strict liability and public nuisance, as well as plaintiffs' request for punitive damages. In September and October 2007, the court granted the Company's motion to serve third-party complaints on a total of nine PRPs. Among the PRPs the Company impleaded is the Town of Tiverton, which asserted a counterclaim against the Company under the Comprehensive Environmental Response, Compensation, and Liability Act. On January 30, 2008, the Court denied the Company's motion for partial judgment on the pleadings seeking dismissal of plaintiffs' claims for remediation, finding, contrary to the Company's contention, that RIDEM does not have exclusive jurisdiction to determine the responsibility for and extent of remediation of plaintiffs' properties. On February 13, 2008, the Court entered a "Trial Order" superseding several prior orders, and directing that (1) on or about April 24, 2008, the Court will conduct a "Phase I" trial on claims asserted by plaintiffs and by Tiverton against the Company; (2) the Phase I trial will be bifurcated into a liability stage, and, if necessary, a damages stage, with both stages to be tried before the same jury; (3) the discovery cutoff date for the Phase I trial is extended from February 29 to March 21, 2008; (4) if necessary, a

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

"Phase II" trial shall address the Company's third-party claims against the PRPs it has impleaded; and (5) the parties to the Phase II trial shall have 120 days after the Phase I trial to conduct discovery related thereto. The Court subsequently ruled that Tiverton's claims against the Company will be tried in the Phase II trial. The Company filed a motion seeking extension of the discovery and trial date, which was denied in material part. The Phase I trial, which was scheduled to commence on April 28, 2008, was adjourned without date by the Court in consideration of the progress of settlement discussions between the Company and the plaintiffs. The Court held a conference on November 5, 2008 regarding the status of settlement discussions. No settlement has been reached. A new Phase I trial date has not been set. The Company believes the outcome of these matters will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Mercury Release. In October 2004, New England Gas Company discovered that one of its facilities had been broken into and that mercury had been released both inside a building and in the immediate vicinity, including a parking lot in a neighborhood several blocks away. Mercury from the parking lot was apparently tracked into nearby apartment units, as well as other buildings. Cleanup was completed at the property and nearby apartment units. The vandals who broke into the facility were arrested and convicted. On October 16, 2007, the U.S. Attorney in Rhode Island filed a three-count indictment against the Company in the U.S. District Court for the District of Rhode Island alleging violation of permitting requirements under the federal RCRA and notification requirements under the federal Emergency Planning and Community Right to Know Act (*EPCRA*) relating to the 2004 incident. The Company entered a not guilty plea on October 29, 2007 and trial commenced on September 22, 2008. On October 15, 2008, the jury acquitted Southern Union on the EPCRA count and one of the two RCRA counts, and found the Company guilty on the other RCRA count. The Company intends to file post-verdict motions not later than December 1, 2008. In the event such motions are not granted, sentencing as regards the single RCRA count, is scheduled for February 20, 2009. The Company believes the outcome of this matter will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

On January 20, 2006, a complaint was filed against the Company in the Superior Court in Providence, Rhode Island regarding the mercury release from the Pawtucket facility, asserting claims for personal injury and property damage as a result of the release. The suit was removed to Rhode Island federal court on January 27, 2006. A motion to remand the case to state court filed by plaintiffs was denied on April 16, 2007. The Company thereafter moved to dismiss plaintiffs' amended complaint, which motion was granted in part, dismissing claims for public nuisance, private nuisance and violation of Rhode Island's Hazardous Waste Management Act, leaving plaintiffs with claims for negligence and strict liability. The Court has set December 1, 2008 as the Closure Date for all discovery. On October 18, 2007, an attorney representing other Pawtucket residents filed suit against the Company in the Superior Court in Providence asserting claims similar to those pending in the above-described federal court suit for personal injury and property damage. An additional complaint alleging personal injury arising out of the mercury release was filed on behalf of three plaintiffs with the District Court for the Sixth District, Providence County, Rhode Island, on January 22, 2008. The Company will vigorously defend all such suits. The Company believes the outcome of this matter will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Jack Grynberg. Jack Grynberg, an individual, filed actions for damages against a number of companies, including Panhandle, now transferred to the U.S. District Court for the District of Wyoming, alleging mis-measurement of gas volumes and Btu content, resulting in lower royalties to mineral interest owners. Among the defendants are Panhandle, Citrus, Florida Gas and certain of their affiliates (*Company Defendants*). On October 20, 2006, the District Judge adopted in part the earlier recommendation of the Special Master in the case and ordered the dismissal of the case against the Company Defendants. Grynberg is appealing that action to the Tenth Circuit Court of Appeals. Grynberg's opening brief was filed on July 31, 2007. Respondents filed their brief rebutting Grynberg's arguments on November 21, 2007. A hearing before the Court of Appeals was held on September 25, 2008. The Court has not yet ruled on Grynberg's appeal. A similar action, known as the Will Price litigation, also has been filed against a number of companies, including Panhandle, in U.S. District Court for the District of Kansas. Panhandle is currently awaiting the decision of the trial judge on the defendants' motion to dismiss the Will Price action. Panhandle and the other Company Defendants believe that their measurement practices conformed to the terms of their FERC gas tariffs, which were filed with and approved by FERC. As a result, the Company believes that it has meritorious defenses to these lawsuits (including FERC-related affirmative defenses, such as the filed rate/tariff doctrine, the primary/exclusive jurisdiction of FERC, and the defense that Panhandle and the other Company Defendants complied with the terms of their tariffs) and will continue to vigorously defend against them, including any appeal from the dismissal of the Grynberg case. The Company does not believe the outcome of these cases will have a material adverse effect on its consolidated financial position, results of operations or cash flows.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

GP II Energy Litigation. On October 23, 2006, landowners filed suit against the Company in the 109th District Court of Winkler County, Texas, seeking money damages, equitable relief and punitive damages alleging continuing pollution to underground aquifers underlying the plaintiffs' approximately 16,000 acre property. SUGS operated the Halley Plant, a hydrocarbon processing facility, which is located on a limited portion of the plaintiff landowners' ranch pursuant to a lease. On February 15, 2008, the Company learned that plaintiffs significantly revised their claims to include approximately $40 million in economic damages and approximately $85 million in punitive damages. On March 31, 2008, plaintiffs filed a third amended petition revising their claims to include approximately $96 million in economic damages and approximately $193 million in punitive damages. The parties finalized a settlement of the case in October 2008, pursuant to which SUGS paid $1.4 million to the plaintiffs and all claims were dismissed with prejudice.

Other Commitments and Contingencies.

2008 Hurricane Damage. In September 2008, Hurricanes Gustav and Ike came ashore on the Louisiana and Texas coasts. Damage from the hurricanes have affected both the Company's Transportation and Storage and Gathering and Processing segments. Offshore transportation facilities, including Sea Robin and Trunkline's Terrebonne system, suffered damage to several platforms and are continuing to experience reduced volumes. The SUGS business was indirectly adversely affected by Hurricane Ike.

With respect to the Company's preliminary damage assessments associated with Hurricane Gustav, the Company estimates an expense impact to its facilities totaling approximately $3 million, which was recorded in the third quarter of 2008. The capital expenditure impact related to the hurricane was insignificant. As these amounts are below the Company's $10 million property insurance deductible, the Company does not expect any of the repair and replacement costs associated with Hurricane Gustav to be reimbursed by its property insurance carrier.

With respect to the Company's preliminary damage assessments associated with Hurricane Ike, the Company estimates an expense impact related to its facilities totaling approximately $7 million, which was recorded in the third quarter of 2008. The Company also preliminarily estimates that capital expenditures relating to the hurricane will total approximately $90 million in 2008 and 2009. The estimates are subject to further revision as the assessment of the damage to the Company's facilities is ongoing. The Company anticipates reimbursement from its property insurance carrier for a significant portion of the damages in excess of its $10 million deductible; however, the recoverable amount is subject to pro rata reduction to the extent that the level of total accepted claims from all insureds exceeds the carrier's $750 million aggregate exposure limit. The Company's insurance provider has announced that it expects to reach the $750 million limit, but the amount of any applicable pro rata reduction cannot be determined until the Company's insurance provider has completed its assessment of all submitted claims.

With respect to the Company's Gathering and Processing segment, SUGS' facilities were not affected by the hurricanes. SUGS' third-party NGL fractionator sustained damage to its Mont Belvieu, Texas facility as a result of Hurricane Ike. SUGS was forced to shut in its natural gas processing plants and attendant production on September 11, 2008 for approximately a week, and operated at reduced production levels for the remainder of the month. The majority of SUGS' September 2008 NGL production was fractionated and sold, with approximately 3.1 million gallons of NGL delivered into Mont Belvieu storage pending completion of repairs resulting from the hurricane and a previously scheduled maintenance outage at the fractionation facility for approximately four weeks during the fourth quarter of 2008. The stored NGL totaling $2.5 million as of September 30, 2008 is included in *Inventories* in the Condensed Consolidated Balance Sheet.

2005 Hurricane Damage. Late in the third quarter of 2005, Hurricanes Katrina and Rita came ashore along the Upper Gulf Coast. These hurricanes caused damage to property and equipment owned by Sea Robin, Trunkline, and Trunkline LNG. The Company has filed approximately $32 million of damage claims related to the hurricanes, primarily amounts for repairs, replacement or abandonment of damaged property and equipment at Sea Robin and Trunkline. The Company has received reimbursement from its property insurance carrier for a significant portion of the damages in excess of the $5 million deductible in effect in 2005. Such reimbursement is currently estimated by the Company's property insurance carrier to be limited to 63 percent of the portion of the claimed damages accepted by the insurance carrier, based on a pro rata reduction to the extent accepted claims exceeded the carrier's $1 billion aggregate exposure limit. As of September 30, 2008, the Company has received payments of $13 million from its insurance carrier, representing a 55 percent payout to date of the 63 percent payout ultimately expected. No additional receivables due from the insurance carrier have been recorded related to the hurricane claims as of September 30, 2008.

11. Reportable Segments

The Company's reportable business segments are organized based on the way internal managerial reporting presents the results of the Company's various businesses to its executive management for use in determining the performance of the businesses and in allocating resources to the businesses, as well as based on similarities in economic characteristics, products and services, types of customers, methods of distribution and regulatory environment. The Company operates in three reportable segments: Transportation and Storage, Gathering and Processing, and Distribution.

The Transportation and Storage segment operations are conducted through Panhandle and the Company's investment in Citrus. Through Panhandle, the Company is primarily engaged in the interstate transportation and storage of natural gas from the Gulf of Mexico, South Texas and the Panhandle regions of Texas and Oklahoma to major U.S. markets in the Midwest and Great Lakes regions. Panhandle also provides LNG terminalling and regasification services. Through its investment in Citrus, the Company has an interest in and operates Florida Gas. Florida Gas is primarily engaged in the interstate transportation of natural gas from South Texas through the Gulf Coast region to Florida.

The Gathering and Processing segment is primarily engaged in connecting wells of natural gas producers to its gathering system, treating natural gas to remove impurities to meet pipeline quality specifications, processing natural gas for the removal of NGL, and redelivering natural gas and NGL to a variety of markets. Its operations are conducted through SUGS in Texas and New Mexico.

The Distribution segment is primarily engaged in the local distribution of natural gas in Missouri and Massachusetts.

Revenue included in the Corporate and other category is primarily attributable to PEI Power Corporation, which generates and sells electricity. PEI Power Corporation does not meet the quantitative threshold for segment reporting.

The Company evaluates operational and financial segment performance based on several factors, of which the primary financial measure is EBIT, which is a non-GAAP measure. The Company defines EBIT as *Net earnings available for common stockholders*, adjusted for the following:

- items that do not impact net earnings, such as extraordinary items, discontinued operations and the impact of changes in accounting principles;
- income taxes;
- interest;
- dividends on preferred stock; and
- loss on extinguishment of preferred stock.

EBIT may not be comparable to measures used by other companies and should be considered in conjunction with net earnings and other performance measures such as operating income or net cash flows provided by operating activities.

Sales of products or services between segments are billed at regulated rates or at market rates, as applicable. There were no material intersegment revenues during the three- and nine-month periods ended September 30, 2008 and 2007.

12. Fair Value Measurement

Adoption of Statement No. 157.

Effective January 1, 2008, the Company partially adopted Statement No. 157, which provides a framework for measuring fair value (see *Note 2 – New Accounting Principles*). As defined in Statement No. 157, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company utilizes market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about credit risk (both the Company's own credit risk and counterparty credit risk) and the risks inherent in the inputs to any applicable valuation techniques. These inputs can be readily observable, market corroborated, or generally unobservable. The Company endeavors to utilize the best available information, including valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Statement No. 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used to measure fair value as follows:

- Level 1 – Observable inputs such as quoted prices in active markets for identical assets or liabilities;

- Level 2 – Observable inputs such as: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active; or (iii) valuations based on pricing models where significant inputs (e.g., interest rates, yield curves, etc.) are observable for the assets or liabilities, are derived principally from observable market data, or can be corroborated by observable market data, for substantially the full term of the assets or liabilities; and

- Level 3 – Unobservable inputs, including valuations based on pricing models, discounted cash flow methodologies or similar techniques where at least one significant model assumption or input is unobservable. Unobservable inputs are used to the extent that observable inputs are not available and reflect the Company's own assumptions about the assumptions market participants would use in pricing the assets or liabilities. Unobservable inputs are based on the best information available in the circumstances, which might include the Company's own data.

Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of these assets and liabilities and their placement within the fair value hierarchy.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The following table sets forth the Company's financial assets and liabilities that are measured at fair value on a recurring basis at September 30, 2008.

	Fair Value as of September 30, 2008	Fair Value Measurements at September 30, 2008 Using Fair Value Hierarchy		
		Level 1	Level 2	Level 3
		(In thousands)		
Assets:				
Cash equivalents (money market investments)	$ 820	$ 820	$ -	$ -
Commodity derivatives	22,114	-	(609)	22,723
Long-term investments	919	919	-	-
Total	$ 23,853	$ 1,739	$ (609)	$ 22,723
Liabilities:				
Commodity derivatives	$ (54,591)	$ -	$ (54,591)	$ -
Interest-rate derivatives	(18,325)	-	-	(18,325)
Total	$ (72,916)	$ -	$ (54,591)	$ (18,325)

The Company's Level 3 instruments include commodity derivative instruments, such as natural gas and NGL processing spread swaps, and interest-rate swap derivatives that are valued using an income approach where at least one significant assumption or input to the underlying pricing model, discounted cash flow methodology or similar technique is unobservable – i.e. natural gas swap valuations include basis adjustments to NYMEX forward curves obtained from third-party pricing services; fractionation processing spread swap valuations include natural gas liquid forward curves derived from historical correlations of pricing data; and interest rate swap valuations include composite yield curves provided by the bank counterparty. The financial assets and liabilities that the Company has categorized in Level 3 may later be reclassified to Level 2 when the Company is able to obtain additional observable market data to corroborate the unobservable inputs to models used to measure the fair value of these assets and liabilities. The Company's Level 2 instruments include natural gas swap derivatives that are valued based on pricing models where significant inputs are observable. The Company's Level 1 instruments consist of money market mutual funds and trading securities related to a non-qualified deferred compensation plan that are valued based on active market quotes.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Gathering and Processing Segment Derivative Financial Instruments. The following table summarizes SUGS' principal commodity derivative instruments as of September 30, 2008 (all instruments are settled monthly), which were developed based upon operating conditions and expected equity NGL sales volumes.

Instrument Type	Index	Average Price (per MMBtu)	Volumes (MMBtu/d) 2008	Volumes (MMBtu/d) 2009	Fair Value Asset (Liability)
					(In thousands)
***Natural Gas - Cash Flow Hedges* (1)**					
Swap	IF - Waha	$ 8.01	5,525	-	$ 1,155
Swap	IF - El Paso Permian	8.01	4,475	-	935
Swap	Gas Daily - Waha	8.42	11,050	-	2,726
Swap	Gas Daily - Waha	9.49	-	11,050	8,932
Swap	Gas Daily - El Paso Permian	8.42	8,950	-	2,208
Swap	Gas Daily - El Paso Permian	9.49	-	8,950	7,235
		Total Swaps	30,000	20,000	$ 23,191
***Processing Spread - Economic Hedges* (2)**					
Put	IF - Waha	$ 8.15	6,119	-	$ 475
Put	IF - El Paso Permian	8.15	4,956	-	385
		Total Puts	11,075	-	$ 860
Swap	Gas Daily - Waha	$ 6.85	15,981	-	$ (2,836)
Swap	Gas Daily - Waha	7.40	-	16,575	1,406
Swap	Gas Daily - El Paso Permian	6.85	12,944	-	(2,297)
Swap	Gas Daily - El Paso Permian	7.40	-	13,425	1,139
		Total Swaps	28,925	30,000	$ (2,588)

(1) The Company's natural gas swap arrangements have been designated as cash flow hedges. The effective portion of changes in the fair value of the cash flow hedges is recorded in *Accumulated other comprehensive loss* until the related hedged items impact earnings. Any ineffective portion of a cash flow hedge is reported in current-period earnings.
(2) The Company's processing spread put and swap arrangements are treated as economic hedges, with the change in fair value reported in current-period earnings.

There were no up-front costs associated with the derivative instruments entered into in 2008.

13. Regulation and Rates

The Company commenced construction of an enhancement at its Trunkline LNG terminal in February 2007. This infrastructure enhancement project, which was originally expected to cost approximately $250 million, plus capitalized interest, will increase send out flexibility at the terminal and lower fuel costs. Recent cost projections indicate the construction costs will likely be approximately $400 million, plus capitalized interest. The revised costs, which are under review, reflect increases in the quantities and cost of materials required, higher contract labor costs, including reduced productivity due to an August 2008 tropical storm and the two September 2008 hurricanes, and an allowance for additional contingency funds, if needed. The negotiated rate with the project's customer, BG LNG Services, will be adjusted based on final capital costs pursuant to a contract-based formula. The project is currently expected to be in operation around the end of the second quarter of 2009. In addition, Trunkline LNG and BG LNG Services have agreed to extend the existing terminal and pipeline services agreements to coincide with the infrastructure enhancement project contract, which runs 20 years from the in-service date. Approximately $311.9 million and $178.3 million of costs are included in the line item *Construction work-in-*

progress at September 30, 2008 and December 31, 2007, respectively.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Sea Robin filed a rate case with FERC in June 2007, requesting an increase in its maximum rates. Several parties submitted protests to the rate increase filing with FERC. On July 30, 2007, FERC suspended the effectiveness of the filed rate increase until January 1, 2008. The filed rates were put into effect on January 1, 2008, subject to refund. On February 14, 2008, at the request of the participants in the proceeding, the procedural schedule was suspended to facilitate the filing of a settlement. On April 29, 2008, Sea Robin submitted to FERC a Stipulation and Agreement (*Settlement*) that would resolve all issues in the proceeding. The Administrative Law Judge certified the Settlement to FERC on June 3, 2008. The Settlement is currently pending further FERC action. Customer refund liability provisions of approximately $3.4 million, including interest, have been recorded as of September 30, 2008.

On July 17, 2008, New England Gas Company made a filing with the MDPU seeking to implement an annual base rate increase of approximately $5.6 million. It is expected that new rates resulting from this filing will not take effect until February 1, 2009.

On September 15, 2008, New England Gas Company made a filing with the MDPU seeking recovery of approximately $4 million, or 50 percent of the amount by which its 2007 earnings fell below a return on equity of 7 percent. This filing was made pursuant to New England Gas Company's rate settlement approved by the MDPU in 2007. The procedural schedule is expected to conclude by the end of the first quarter of 2009 and, if approved, the rate change would be implemented on or before November 1, 2009.

On July 1, 2008, the Circuit Court of Greene County, Missouri made a docket entry indicating that, following judicial review, it had affirmed the Report and Order issued by the MPSC resolving Missouri Gas Energy's general rate increase that went into effect on April 3, 2007. While that judicial review proceeding, which had been initiated by both Missouri Gas Energy (challenging the adequacy of the overall rate increase awarded) and the Office of the Public Counsel (challenging the design of residential distribution rates that eliminates the impact of weather and conservation for residential margin revenues and related earnings), has been appealed to the Southern District of the Missouri Court of Appeals by both Missouri Gas Energy and the Office of the Public Counsel, the Company does not believe the outcome of the judicial review will have a material adverse effect on its consolidated financial position, results of operations or cash flows.

14. Stockholders' Equity

Dividends. The table below presents the amount of cash dividends declared and paid in the respective periods:

Shareholder Record Date	Date Paid	Amount Per Share	Amount Paid (In thousands)
September 26, 2008	October 10, 2008	$ 0.15	$ 18,597
June 27, 2008	July 11, 2008	0.15	18,595
March 28, 2008	April 11, 2008	0.15	18,592

Preferred Stock. On May 22, 2008, the Company announced that the Finance Committee of its Board of Directors had authorized a program to repurchase a portion of the depositary shares representing ownership of its Preferred Stock. Repurchases are made at the Company's discretion in the open market and through privately negotiated transactions, subject to market conditions, applicable legal requirements and other factors. The Company has the right to redeem all of the Preferred Stock at any time at par after October 8, 2008. During the three-month period ended September 30, 2008, the Company paid $62.3 million to repurchase 2,482,250 depository shares representing 248,225 shares of Preferred Stock, resulting in a $2 million loss adjustment charged to *Retained earnings* which reduced *Net earnings available for common stockholders*. During the nine-month period ended September 30, 2008, the Company paid $110.9 million to repurchase 4,401,087 depository shares representing 440,109 shares of Preferred Stock, resulting in a $4 million loss adjustment charged to *Retained earnings* which reduced *Net earnings available for common stockholders*. In October 2008, the Company paid $4.3 million to repurchase an additional 198,900 depositary shares representing 19,890 shares of Preferred Stock, which will result in a $500,000 gain adjustment to *Retained earnings* increasing *Net earnings available for common stockholders*.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

INTRODUCTION

This Management's Discussion and Analysis of Financial Condition and Results of Operations is provided as a supplement to the accompanying unaudited interim condensed consolidated financial statements and notes to help provide an understanding of Southern Union's financial condition, changes in financial condition and results of operations. The following section includes an overview of the Company's business as well as recent developments that management of the Company believes are important in understanding its results of operations, and to anticipate future trends in those operations. Subsequent sections include an analysis of the Company's results of operations on a consolidated basis and on a segment basis for each reportable segment, and information relating to the Company's liquidity and capital resources, quantitative and qualitative disclosures about market risk and other matters.

OVERVIEW

The Company's business purpose is to provide gathering, processing, transportation, storage and distribution of natural gas and NGL in a safe, efficient and dependable manner. The Company's reportable business segments are determined based on the way internal managerial reporting presents the results of the Company's various businesses to its executive management for use in determining the performance of the businesses and in allocating resources to the businesses as well as based on similarities in economic characteristics, products and services, types of customers, methods of distribution and regulatory environment. The Company operates in three reportable segments: Transportation and Storage, Gathering and Processing, and Distribution.

RESULTS OF OPERATIONS

Overview

The Company evaluates operational and financial segment performance using several factors, of which the primary financial measure is EBIT, which is a non-GAAP measure. The Company defines EBIT as *Net earnings available for common stockholders*, adjusted for the following:

- items that do not impact net earnings, such as extraordinary items, discontinued operations and the impact of changes in accounting principles;
- income taxes;
- interest;
- dividends on preferred stock; and
- loss on extinguishment of preferred stock.

EBIT may not be comparable to measures used by other companies and should be considered in conjunction with net earnings and other performance measures such as operating income or net cash flows provided by operating activities.

The following table provides a reconciliation of EBIT (by segment) to *Net earnings available for common stockholders*.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	**2007**	**2008**	**2007**
	(In thousands)			
EBIT:				
Transportation and storage segment	$ 89,128	$ 90,129	$ 292,822	$ 300,906
Gathering and processing segment	26,951	20,020	67,641	41,506
Distribution segment	3,613	9,173	36,733	49,162
Corporate and other	(19)	517	5,194	6,186
Total EBIT	119,673	119,839	402,390	397,760
Interest	53,232	50,703	154,536	154,034
Earnings before income taxes	66,441	69,136	247,854	243,726
Federal and state income tax expense	19,665	23,853	75,260	68,747
Net earnings	46,776	45,283	172,594	174,979
Preferred stock dividends	2,264	4,342	10,041	13,024
Loss on extinguishment of preferred stock	2,036	-	4,031	-
Net earnings available for common stockholders	$ 42,476	$ 40,941	$ 158,522	$ 161,955

Three-month period ended September 30, 2008 versus the three-month period ended September 30, 2007. The Company's $1.5 million increase in *Net earnings available for common stockholders* in the three-month period ended September 30, 2008 versus the same period in 2007 was primarily due to:

- Higher EBIT contributions of $6.9 million from the Gathering and Processing segment primarily due to higher market-driven realized average natural gas and NGL prices in 2008 and the impact of $1.5 million of net hedging gains in 2008 versus 2007, partially offset by reduced natural gas and NGL sales in September 2008 when the Company was forced to shut in its natural gas processing plants and attendant production because of damage by Hurricane Ike to the Company's third-party NGL fractionator, the establishment of a $2.7 million bad debt reserve for receivables associated with a company that filed for bankruptcy protection and a $1.4 million charge related to settlement of the GP II Energy litigation;
- Lower income tax expense of $4.2 million primarily due to the EITR of 30 percent in the 2008 period versus 35 percent in the 2007 period primarily due to the impact of state income tax rate changes resulting in higher state income tax rates in the 2007 period, partially offset by a decrease in the tax benefit associated with the dividends received deduction as a result of lower estimated dividends from the Company's unconsolidated investment in Citrus;
- Lower EBIT contributions of $5.6 million from the Distribution segment primarily due to $2.7 million of higher operating expenses primarily attributable to higher injuries and damage litigation claims and higher provisions for uncollectible customer accounts and lower net revenues of $1.8 million primarily due to lower market-driven pipeline capacity release and off-system sales in the 2008 period versus the 2007 period;
- Higher interest expense of $2.5 million primarily due to higher outstanding long-term debt balances in the 2008 period versus the 2007 period, partially offset by lower interest expense resulting from the effect of lower LIBOR-based interest rates on the Company's variable interest rate debt and lower outstanding balances associated with the Company's credit facilities in the 2008 period versus the 2007 period; and
- Lower EBIT contributions of $1 million from the Transportation and Storage segment primarily due to a $2.1 million decrease in equity earnings from the Company's unconsolidated investment in Citrus primarily due to its higher operating expenses, partially offset by a higher EBIT contribution of $1.1 million from Panhandle primarily attributable to higher transportation reservation revenues, partially offset by higher operating expenses.

Nine-month period ended September 30, 2008 versus the nine-month period ended September 30, 2007. The Company's $3.4 million decrease in *Net earnings available for common stockholders* in the nine-month period ended September 30, 2008 versus the same period in 2007 was primarily due to:

- Lower EBIT contributions of $12.4 million from the Distribution segment primarily due to higher operating expenses of $9.9 million primarily attributable to higher environmental remediation and benefit costs and higher provisions for uncollectible customer accounts and lower net revenues of $2 million primarily due to lower market-driven pipeline capacity release and off-system sales in the 2008 period versus the 2007 period;
- Lower EBIT contributions of $8.1 million from the Transportation and Storage segment primarily due to lower equity earnings of $20.8 million primarily resulting from $18.7 million of nonrecurring gains in the 2007 period resulting from the sale of bankruptcy-related receivables and from the settlement of litigation, partially offset by higher EBIT contributions of $12.7 million in 2008 from Panhandle primarily attributable to higher transportation reservation revenues, partially offset by higher operating expenses;
- Higher income tax expense of $6.5 million primarily due to the EITR of 30 percent in the 2008 period versus 28 percent in the 2007 period resulting from the decrease in the tax benefit associated with the reduction in the dividends received deduction as a result of lower estimated dividends from the Company's unconsolidated investment in Citrus, partially offset by higher state income tax expense in 2007 attributable to an increase in state income tax rates; and
- Higher EBIT contributions of $26.1 million from the Gathering and Processing segment primarily due to higher market-driven realized average natural gas and NGL prices in 2008 and lower fuel, flare and unaccounted for natural gas volumes in the 2008 period versus the 2007 period, partially offset by the impact of $24.5 million of higher net hedging losses in the 2008 period versus the 2007 period, reduced natural gas and NGL sales in September 2008 when the Company was forced to shut in its natural gas processing plants and attendant production because of damage by Hurricane Ike to the Company's third-party NGL fractionator, the establishment of a $2.7 million bad debt reserve for receivables associated with a company that filed for bankruptcy protection and a $1.4 million charge related to settlement of the GP II Energy litigation.

Business Segment Results

Transportation and Storage Segment. The Transportation and Storage segment is primarily engaged in the interstate transportation and storage of natural gas in the Midwest and from the Gulf Coast to Florida, and LNG terminalling and regasification services. The Transportation and Storage segment's operations, conducted through Panhandle and Florida Gas, are regulated as to rates and other matters by FERC. Demand for gas transmission on Panhandle's pipeline systems is seasonal, with the highest throughput and a higher portion of annual total operating revenues and EBIT occurring in the traditional winter heating season in the first and fourth calendar quarters. Florida Gas' pipeline system experiences the highest throughput in the summer period due to gas-fired generation loads in the second and third calendar quarters.

Historically, much of the Transportation and Storage segment's business was conducted through long-term contracts with customers. Over the past several years, some customers within the segment have shifted to shorter term transportation services contracts. This shift, which can increase the volatility of revenues, is primarily due to changes in market conditions and competition with other pipelines, new supply sources, changing supply sources and volatility in natural gas prices. Average reservation revenue rates realized by the Transportation and Storage segment are dependent on certain factors, including but not limited to rate regulation, customer demand for reserved capacity, capacity sold levels for a given period and, in some cases, utilization of capacity. Commodity revenues are also dependent upon a number of variable factors including weather, storage levels, and customer demand for firm, interruptible and parking services. The majority of the Transportation and Storage segment revenues are related to firm capacity reservation charges.

The Company's regulated transportation and storage businesses periodically file for changes in their rates, which are subject to approval by FERC. Changes in rates and other tariff provisions resulting from these regulatory proceedings have the potential to impact negatively the Company's results of operations and financial condition.

The following table presents the results of operations applicable to the Company's Transportation and Storage segment for the periods presented:

Transportation and Storage Segment	Three Months Ended September 30, 2008	Three Months Ended September 30, 2007	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
	(In thousands)			
Financial Information:				
Operating revenues	$ 173,400	$ 158,963	$ 528,784	$ 489,699
Operating expenses	72,858	63,987	196,211	184,676
Depreciation and amortization	26,133	21,863	76,885	63,634
Taxes other than on income and revenues	8,226	7,350	24,419	22,438
Total operating income	66,183	65,763	231,269	218,951
Earnings from unconsolidated investments	22,212	24,300	60,026	80,822
Other income, net	733	66	1,527	1,133
EBIT	$ 89,128	$ 90,129	$ 292,822	$ 300,906
Operating information:				
Panhandle natural gas volumes transported (TBtu)	356	341	1,085	1,116
Florida Gas natural gas volumes transported (TBtu) (1)	226	225	610	563

(1) Represents 100 percent of natural gas volumes transported by Florida Gas versus the Company's effective equity ownership interest of 50 percent.

Three-month period ended September 30, 2008 versus the three-month period ended September 30, 2007. The $1 million EBIT reduction in the three-month period ended September 30, 2008 versus the same period in 2007 was primarily due to lower 2008 equity earnings of $2.1 million offset by a higher 2008 EBIT contribution from Panhandle totaling $1.1 million.

Equity earnings, primarily attributable to the Company's unconsolidated investment in Citrus, were lower by $2.1 million in 2008 versus 2007 primarily due to the following items, adjusted where applicable to reflect the Company's proportional equity share:

- Higher operating expenses of $2.5 million primarily due to increased property taxes and higher overall costs experienced in 2008 applicable to employee labor and benefits, outside contract services costs and other operating costs;
- Lower other income of $800,000 primarily due to reduced AFUDC;
- Higher depreciation expense of $600,000 primarily due to increased plant placed in service;
- Higher debt interest cost of $600,000 primarily due to higher average outstanding revolver debt balances;
- Higher operating revenues of $1.4 million primarily due to higher reservation revenues attributable to increased capacity from prior expansions; and
- Lower income taxes of $1.1 million primarily due to lower pre-tax earnings.

Panhandle's $1.1 million EBIT improvement was primarily due to the following items:

- Higher operating revenues of $14.4 million primarily related to the following items:
  - Higher transportation reservation revenues of $14.8 million primarily due to the phased completion of the Trunkline Field Zone Expansion project during the period December 2007 to February 2008 and reduced discounting resulting in higher average rates realized on contracts driven by higher customer demand;
  - Higher storage revenues of $1.9 million due to additional contracted storage capacity;
  - Higher commodity revenues of $300,000 primarily due to a rate increase on Sea Robin, net of related customer liability refund provisions, which includes the impact of approximately $1.4 million of lower revenues attributable to reduced volumes flowing after Hurricane Ike and lower parking revenues of $1.2 million due to market conditions; and
  - A $2.2 million decrease in LNG terminalling revenue due to lower volumes from a reduced number of LNG cargoes during 2008.

  The Company preliminarily estimates lost revenue opportunities of $3 million will be experienced in the fourth quarter of 2008 as a result of Hurricane Ike. Such preliminary estimate is subject to further update based upon the timing of the Company completing the repair and replacement of its damaged property and equipment and the timing of producers completing their interconnects to the Company's offshore system. Currently, the Company anticipates the majority of the interconnects will be completed by the 2008 year end.

- Higher operating expenses of $8.9 million primarily attributable to:
  - Expense of $9.5 million for the estimated impact related to damages to the Company's facilities resulting from Hurricanes Gustav and Ike;
  - A $2.3 million increase in contract storage costs resulting from an increase in leased storage capacity;
  - A $1.1 million decrease in LNG power costs resulting from a reduced number of cargoes during 2008;
  - A $1.7 million decrease in fuel tracker costs primarily due to a net over-recovery in 2008 versus a net under-recovery in 2007; and
  - A $1.6 million decrease in hydrostatic testing costs primarily due to a higher number of tests performed in the 2007 period.

- Increased depreciation and amortization expense of $4.3 million due to a $643.9 million increase in property, plant and equipment placed in service after September 30, 2007. Depreciation and amortization expense is expected to continue to increase primarily due to higher capital spending, primarily from the LNG terminal infrastructure enhancement and compression modernization construction projects; and
- Increased taxes, other than on income and revenues, of $900,000 primarily due to higher property taxes attributable to higher property tax assessments resulting from increased earnings, partially offset by lower compressor fuel tax resulting from decreased LNG cargoes.

Nine-month period ended September 30, 2008 versus the nine-month period ended September 30, 2007. The $8.1 million EBIT reduction in the nine-month period ended September 30, 2008 versus the same period in 2007 was primarily due to lower 2008 equity earnings of $20.8 million offset by a higher 2008 EBIT contribution from Panhandle totaling $12.7 million.

Equity earnings, primarily attributable to the Company's unconsolidated investment in Citrus, were lower by $20.8 million in 2008 versus 2007 primarily due to the following items, adjusted where applicable to reflect the Company's proportional equity share:

- A $15.1 million nonrecurring gain recorded in the 2007 period related to the settlement of litigation;
- A $3.6 million nonrecurring gain recorded in the 2007 period related to the sale of bankruptcy-related receivables;
- Higher operating expenses of $4 million primarily due to increased property taxes and higher overall costs experienced in 2008 applicable to employee labor and benefits, outside contract services costs and other operating costs;
- Higher depreciation expense of $1.7 million primarily due to increased plant placed in service;
- Higher operating revenues of $5.7 million primarily due to higher reservation revenues of $4 million attributable to increased capacity from prior expansions and the extra day in 2008 for the leap year; and
- Lower income taxes of $6.7 million primarily due to lower pre-tax earnings.

Panhandle's $12.7 million EBIT improvement was primarily due to the following items:

- Higher operating revenues of $39.1 million primarily related to the following items:
  - Higher transportation reservation revenues of $37.9 million primarily due to the phased completion of the Trunkline Field Zone Expansion project during the period December 2007 to February 2008 and reduced discounting resulting in higher average rates realized on contracts driven by higher customer demand, and approximately $1.2 million of additional revenues attributable to the extra day in the 2008 leap year;
  - Higher commodity revenues of $7.1 million primarily due to a rate increase on Sea Robin, net of related customer liability refund provisions and the impact of approximately $1.4 million of lower revenues attributable to reduced volumes flowing after Hurricane Ike;
  - Higher storage revenues of $5.5 million due to increased leased storage capacity; and
  - A $10.5 million decrease in LNG terminalling revenue due to lower volumes from decreased LNG cargoes during 2008.

  The Company preliminarily estimates lost revenue opportunities of $3 million will be experienced in the fourth quarter of 2008 as a result of Hurricane Ike. Such preliminary estimate is subject to further update based upon the timing of the Company completing the repair and replacement of its damaged property and equipment and the timing of producers completing their interconnects to the Company's offshore system. Currently, the Company anticipates the majority of the interconnects will be completed by the 2008 year end.

- Higher operating expenses of $11.5 million primarily attributable to:
  - Expense of $9.5 million for the estimated impact related to damages to the Company's facilities resulting from Hurricanes Gustav and Ike;
  - An $8 million increase in contract storage costs resulting from an increase in leased storage capacity;
  - A $3.8 million increase in benefits primarily due to higher active and retiree medical costs experienced in the 2008 period and higher defined contribution savings plan expenses resulting from an increase in Panhandle savings plan benefits in March 2008;
  - A $3.1 million increase in insurance costs primarily due to higher property premiums;
  - A $9.5 million decrease in LNG power costs resulting from a reduced number of LNG cargoes during 2008; and
  - A $6.2 million decrease in fuel tracker costs primarily due to a net over-recovery in 2008 versus a net under-recovery in 2007.

- Increased depreciation and amortization expense of $13.3 million due to a $643.9 million increase in property, plant and equipment placed in service after September 30, 2007. Depreciation and amortization expense is expected to continue to increase primarily due to higher capital spending, primarily from the LNG terminal infrastructure enhancement and compression modernization construction projects and other capital expenditures; and
- Increased taxes, other than on income and revenues, of $2 million primarily due to higher property taxes attributable to higher property tax assessments resulting from increased earnings, partially offset by lower compressor fuel tax on a reduced number of LNG cargoes.

Gathering and Processing Segment. The Gathering and Processing segment is primarily engaged in connecting wells of natural gas producers to its gathering system, treating natural gas to remove impurities to meet pipeline quality specifications, processing natural gas for the removal of NGL, and redelivering natural gas and NGL to a variety of markets.

The following table presents the results of operations applicable to the Company's Gathering and Processing segment:

Gathering and Processing Segment	**Three Months Ended September 30, 2008**	**Three Months Ended September 30, 2007**	**Nine Months Ended September 30, 2008**	**Nine Months Ended September 30, 2007**
	(In thousands)

Estimated plant processing spread ($/gallon)	0.89	0.62	0.76	0.45

(1) Gross margin consists of *Operating revenues* less *Cost of gas and other energy*. The Company believes that this measurement is more meaningful for understanding and analyzing the Gathering and Processing segment's operating results for the periods presented because commodity costs are a significant factor in the determination of the segment's revenues.
(2) In addition to volumes processed by SUGS, includes volumes sold under various buy-sell arrangements.
(3) Excludes impact of realized and unrealized commodity derivative gains and losses detailed in the above EBIT presentation.

Three-month period ended September 30, 2008 versus the three-month period ended September 30, 2007. The $6.9 million EBIT improvement in the three-month period ended September 30, 2008 versus the same period in 2007 was primarily due to the following items:

- Higher gross margin of $17.2 million primarily as the result of:
  - Higher market-driven realized average natural gas and NGL prices (unadjusted for the impact of realized and unrealized commodity derivative gains and losses) of $8.15 per MMBtu and $1.64 per gallon in the 2008 period versus $5.72 per MMBtu and $1.16 per gallon in the 2007 period, respectively;
  - Impact of $1.5 million of net hedging gains in the 2008 period versus the 2007 period; and
  - Unfavorable gross margin impact of approximately $10.6 million resulting from damage by Hurricane Ike to the Company's third-party NGL fractionator. Commencing September 11, 2008, the Company was forced to shut in its natural gas processing plants and attendant production for approximately a week and operated at reduced production levels for the remainder of the month.

    The Company's third party NGL fractionator will be unavailable to provide fractionation services for approximately four weeks during the fourth quarter of 2008 due to a scheduled maintenance outage. In order to continue operating at normal production levels during the fourth quarter of 2008, the Company has arranged for a portion of its NGL to be fractionated by a different third-party fractionator during the scheduled maintenance outage. The portion of NGL which are not fractionated by either fractionator will be delivered into Mont Belvieu storage. The Company expects a significant portion of the stored NGL to be fractionated and sold before year end.

- Operating expenses were higher by $7.2 million primarily due to:
  - A $2.7 million bad debt reserve for receivables associated with a company that filed for bankruptcy protection in the third quarter of 2008;
  - A $1.4 million provision in the third quarter of 2008 related to the settlement of the GP II Energy litigation;
  - An $800,000 increase in chemical and lubricants costs, which generally track with the price of oil and are expected to remain higher in the 2008 period versus the 2007 period; and
  - A $500,000 increase in utilities costs primarily due to higher compressor fuel costs and the associated rising cost of natural gas in 2008 versus 2007;
- Higher depreciation expense of $1 million primarily attributable to a $71 million increase in property, plant and equipment placed in service after September 30, 2007; and
- Lower equity earnings of $1.2 million from the Company's unconsolidated investment in Grey Ranch, which has been out of service since June 2008 because of a fire at the Grey Ranch processing plant. The Grey Ranch processing plant was placed back in service in late October 2008.

Nine-month period ended September 30, 2008 versus the nine-month period ended September 30, 2007. The $26.1 million EBIT improvement in the nine-month period ended September 30, 2008 versus the same period in 2007 was primarily due to the following items:

- Higher gross margin of $45.6 million primarily as the result of:
  - Higher market-driven realized average natural gas and NGL prices (unadjusted for the impact of realized and unrealized commodity derivative gains and losses) of $8.60 per MMBtu and $1.55 per gallon in the 2008 period versus $6.30 per MMBtu and $1.03 per gallon in the 2007 period, respectively;
  - Favorable gross margin impact of lower levels of fuel, flare, and unaccounted for gas losses in the 2008 period versus the unusually high levels experienced in the first and second quarters in the 2007 period;
  - Impact of $24.5 million of higher net hedging losses in the 2008 period versus the 2007 period; and
  - Unfavorable gross margin impact of approximately $10.6 million resulting from damage by Hurricane Ike to the Company's third-party NGL fractionator. Commencing September 11, 2008, the Company was forced to shut in its natural gas processing plants and attendant production for approximately a week and operated at reduced production levels for the remainder of the month.

The Company's third party NGL fractionator will be unavailable to provide fractionation services for approximately four weeks during the fourth quarter of 2008 due to a scheduled maintenance outage. In order to continue operating at normal production levels during the fourth quarter of 2008, the Company has arranged for a portion of its NGL to be fractionated by a different third-party fractionator during the scheduled maintenance outage. The portion of NGL which are not fractionated by either fractionator will be delivered into Mont Belvieu storage. The Company expects a significant portion of the stored NGL to be fractionated and sold before year end.

- Operating expenses were higher by $11.9 million primarily due to:
  - A $2.7 million bad debt reserve for receivables associated with a company that filed for bankruptcy protection in the third quarter of 2008;
  - A $1.4 million provision in the third quarter of 2008 related to the settlement of the GP II Energy litigation;
  - A $2.5 million increase in utilities costs primarily due to higher compressor fuel costs and the associated rising cost of natural gas in 2008 versus 2007; and
  - A $2.3 million increase in chemical and lubricants costs, which generally track with the price of oil and are expected to remain higher in the 2008 period versus the 2007 period;
- Higher depreciation expense of $2.7 million primarily attributable to a $71 million increase in property, plant and equipment placed in service after September 30, 2007; and
- Lower equity earnings of $2.1 million from the Company's unconsolidated investment in Grey Ranch, which has been out of service since June 2008 because of a fire at the Grey Ranch processing plant. The Grey Ranch processing plant was placed back in service in late October 2008.

Distribution Segment. The Distribution segment is primarily engaged in the local distribution of natural gas in Missouri and Massachusetts through its Missouri Gas Energy and New England Gas Company divisions, respectively. The Distribution segment's operations are regulated as to rates and other matters by the regulatory commissions of the states in which each operates. The Distribution segment's operations have historically been sensitive to weather and seasonal in nature, with a significant percentage of annual operating revenues and EBIT occurring in the traditional winter heating season in the first and fourth calendar quarters. However, the MPSC approved distribution rates effective April 3, 2007 for Missouri Gas Energy's residential customers (which comprise approximately 87 percent of its total natural gas sales customers and approximately 74 percent of its gross natural gas sales revenues) that eliminate the impact of weather and conservation for residential margin revenues and related earnings in Missouri.

The following table presents the results of operations applicable to the Company's Distribution segment for the periods presented:

Distribution Segment	Three Months Ended September 30, 2008	Three Months Ended September 30, 2007	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
	(In thousands)			
Financial Information:				
Net operating revenues (1)	$ 43,825	$ 45,657	$ 160,585	$ 162,542
Operating expenses	29,410	26,693	91,531	81,649
Depreciation and amortization	7,615	7,633	22,909	22,646
Taxes other than on income and revenues	2,747	1,822	8,391	7,945
Total operating income	4,053	9,509	37,754	50,302
Other income (expenses), net	(440)	(336)	(1,021)	(1,140)
EBIT	$ 3,613	$ 9,173	$ 36,733	$ 49,162
Operating Information:				
Gas sales volumes (MMcf)	3,612	3,584	46,945	41,691
Gas transported volumes (MMcf)	5,131	5,182	20,817	19,462
Weather – Degree Days: (2)				
Missouri Gas Energy service territories	54	27	3,474	2,907
New England Gas Company service territories	74	35	3,505	3,575

(1) Operating revenues for the Distribution segment are reported net of *Cost of gas and other energy* and *Revenue-related taxes*, which are pass-through costs.

(2) "Degree days" are a measure of the coldness of the weather experienced. A degree day is equivalent to each degree that the daily mean temperature for a day falls below 65 degrees Fahrenheit.

Three-month period ended September 30, 2008 versus the three-month period ended September 30, 2007. The $5.6 million EBIT reduction in the three-month period ended September 30, 2008 versus the same period in 2007 was primarily due to the following items:

- Lower net operating revenues of $1.8 million primarily due to $1.6 million of lower market-driven pipeline capacity release and off-system sales in the 2008 period versus the 2007 period.
- Higher operating expenses of $2.7 million primarily attributable to:
  - Higher injuries and damage claims of $1.4 million related to ongoing litigation;
  - Higher provisions for uncollectible customer accounts of approximately $1 million primarily resulting from the impact of the current depressed economic conditions on some of the Company's customers. The Company expects that more governmental assistance will be offered to its low income customers, potentially reducing the amount required in its related customer allowance reserve; and
  - Higher benefit expenses of $600,000 primarily due to increased pension amortization expense resulting from the Missouri Gas Energy rate case that became effective during the second quarter of 2007.

Nine-month period ended September 30, 2008 versus the nine-month period ended September 30, 2007. The $12.4 million EBIT reduction in the nine-month period ended September 30, 2008 versus the same period in 2007 was primarily due to the following items:

- Lower net operating revenues of $2 million primarily due to $2.5 million of lower market-driven pipeline capacity release and off-system sales in the 2008 period versus the 2007 period.
- Higher operating expenses of $9.9 million primarily attributable to:
  - Higher environmental remediation costs of $2.8 million primarily attributable to site investigation evaluations completed during 2008. Missouri Gas Energy has requested from the MPSC authority to defer environmental costs in excess of recoveries from insurance carriers or other parties for consideration in a future rate proceeding and expects a ruling on its deferral authority request before the end of 2008;
  - Higher benefit expenses of $2.7 million primarily due to increased pension amortization expense resulting from the Missouri Gas Energy rate case that became effective during the second quarter of 2007; and
  - Higher provisions for uncollectible customer accounts of approximately $2.1 million primarily resulting from the impact of the current depressed economic conditions on some of the Company's customers. The Company expects that more governmental assistance will be offered to its low income customers, potentially reducing the amount required in its related customer allowance reserve.

Corporate and Other

Nine-month period ended September 30, 2008 versus the nine-month period ended September 30, 2007. The EBIT reduction of $1 million was primarily due to the following items:

- A $4.2 million increase in legal fees associated with ongoing litigation;
- Favorable impact of $1.5 million of higher insurance reimbursements associated with environmental claims settlements with the insurance providers in the 2008 period versus the 2007 period; and
- Higher EBIT contribution of $1.9 million from PEI Power Corporation primarily due to higher revenues resulting from increased electricity production and higher electricity prices in the 2008 period versus the 2007 period.

Interest Expense

Three-month period ended September 30, 2008 versus the three-month period ended September 30, 2007. Interest expense was $2.5 million higher in the three-month period ended September 30, 2008 versus the same period in 2007 primarily due to:

- Higher interest expense of $8.8 million primarily due to higher outstanding debt balances from the $300 million 6.20% Senior Notes and the $400 million 7.00% Senior Notes issued in October 2007 and June 2008, respectively, partially offset by lower interest expense from the repayment of the $300 million 4.80% Senior Notes and the $125 million 6.15% Senior Notes due August 2008;
- Higher net interest expense of $400,000 associated with the remarketing of the $100 million 4.375% Senior Notes in February 2008, which were replaced with the higher interest rate $100 million 6.089% Senior Notes;
- Lower interest expense of $3.8 million primarily due to the effect of lower LIBOR interest rates on the $465 million term loan agreement that was amended in June 2007 to extend the maturity date to June 2012 at a lower interest rate;
- Lower interest expense of $1.7 million primarily due to the impact of the higher level of interest costs capitalized attributable to higher average capital project balances outstanding in 2008 compared to 2007; and
- Lower interest expense of $1.7 million associated with borrowings under the Company's credit agreements primarily due to lower interest rates in 2008 compared to 2007.

Nine-month period ended September 30, 2008 versus the Nine-month period ended September 30, 2007. Interest expense was $500,000 higher in the nine-month period ended September 30, 2008 versus the same period in 2007 primarily due to:

- Higher interest expense of $19.4 million primarily due to higher outstanding debt balances from the $300 million 6.20% Senior Notes issued in October 2007, the $400 million 7.00% Senior Notes issued June 2008, and the $455 million 2012 Term Loan entered into in March 2007, partially offset by lower interest expense from the repayment of the $300 million 4.80% Senior Notes due August 2008, the $200 million 2.75% Senior Notes in March 2007, and the Trunkline LNG Holdings, LLC (LNG Holdings) $255.6 million Term Loan in March 2007;
- Higher net interest expense of $1 million associated with the remarketing of the $100 million 4.375% Senior Notes in February 2008, which were replaced with the higher interest rate $100 million 6.089% Senior Notes;
- Lower interest expense of $10.3 million primarily due to the effect of lower LIBOR interest rates on the $465 million term loan agreement that was amended in June 2007 to extend the maturity date to June 2012 at a lower interest rate;
- Lower interest expense of $6 million primarily due to the impact of the higher level of interest costs capitalized attributable to higher average capital project balances outstanding in 2008 compared to 2007; and
- Lower interest expense of $3.9 million associated with borrowings under the Company's credit agreements primarily due to lower interest rates in 2008 compared to 2007.

Federal and State Income Taxes

The Company's income taxes were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(In thousands)			
Income tax expense	$ 19,665	$ 23,853	$ 75,260	$ 68,747
Effective tax rate	30%	35%	30%	28%

Three-month period ended September 30, 2008 versus the three-month period ended September 30, 2007. The decrease in the EITR was primarily due to the impact of state income tax rate changes resulting in higher state income tax expense of $4.9 million recorded in the third quarter 2007, partially offset by a decrease in the tax benefit associated with the dividends received deduction as a result of lower estimated dividends from the Company's unconsolidated investment in Citrus. For the three-month periods ended September 30, 2008 and 2007, the tax benefit of the dividends received deduction was $6 million and $8.1 million, respectively.

Nine-month period ended September 30, 2008 versus the nine-month period ended September 30, 2007. The increase in the EITR was primarily due to the decrease in the tax benefit associated with the dividends received deduction as a result of lower estimated dividends from the Company's unconsolidated investment in Citrus. For the nine-month periods ended September 30, 2008 and 2007, the tax benefit of the dividends received deduction was $19.8 million and $28.2 million, respectively. The dividends received deduction benefit in 2007 was partially offset by higher state income tax expense of $2.7 million recorded in 2007 attributable to an increase in state income tax rates.

LIQUIDITY AND CAPITAL RESOURCES

The Liquidity and Capital Resources information contained herein should be read in conjunction with the related information set forth in *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources* of the Company's Form 10-K for the year ended December 31, 2007.

Cash generated from internal operations constitutes the Company's primary source of liquidity. The Company's working capital deficit at September 30, 2008 is $348.7 million. This includes $60.9 million of debt maturing in July 2009, which is expected to be funded using cash generated from internal operations and/or from draw downs of its credit facilities. Additional sources of liquidity include use of available credit facilities and may include various equity offerings, project and bank financings and proceeds from asset dispositions. The availability and terms relating to such liquidity will depend upon various factors and conditions such as the Company's combined cash flow and earnings, the Company's resulting capital structure and conditions in the financial markets at the time of such offerings. Acquisitions, which generally require a substantial increase in expenditures, and related financings also affect the Company's combined results. Future acquisitions or related financings or refinancing may involve the issuance of shares of the Company's common stock, which could have a dilutive effect on the then-current stockholders of the Company.

Financial Sector Exposure

Recent events in the global financial markets have caused the Company to place increased scrutiny on its liquidity position and the financial condition of its critical third-party business partners. The purpose of this heightened review, which was based on publicly available information, was to assess the potential impact of the credit crisis and related liquidity issues on its business partners and to assess the associated business risks to the Company. The review focused on the Company's revolving credit facilities, future capital needs (including long-term borrowing needs and potential refinancing plans) of the Company and its joint ventures, derivative counterparties and customer and other contractual relationships.

The Company notes that while there is no way to predict the extent or duration of any negative impact that the current credit disruptions in the economy will have on its liquidity position, there is no current expectation that the impact on the Company would be significant. However, the Company does believe credit spreads will remain elevated throughout 2009, compared to recent years. As such, the Company is considering refinancing obligations that mature in 2009 prior to their maturity dates and timing of any required capital market transactions to take advantage of favorable issuance windows that may become evident in the markets.

Sources (Uses) of Cash

	Nine months ended September 30, 2008	2007	Change
		(In thousands)	
Cash flows provided by (used in):			
Operating activities	$ 373,442	$ 388,720	$ (15,278)
Investing activities	(465,540)	(418,252)	(47,288)
Financing activities	89,468	43,520	45,948
Increase (decrease) in cash and cash equivalents	$ (2,630)	$ 13,988	$ (16,618)

Operating activities. Cash provided by operating activities decreased by $15.3 million in the 2008 period versus the same period in 2007. Cash flows provided by operating activities before changes in operating assets and liabilities for the 2008 period were $410.9 million compared with $386.7 million for the 2007 period. Changes in operating assets and liabilities used cash of $37.5 million in 2008 and provided cash of $2 million in 2007, resulting in a decrease in cash of $39.5 million in 2008 compared to 2007. The $39.5 million decrease in cash is primarily due to an $89 million increase in Distribution segment inventories due to increased volumes for use in the winter months and higher market-driven gas prices, partially offset by decreased accounts receivables in the Gathering and Processing segment of $66.9 million resulting from lower period-end market-driven index pricing and decreased production available for sale due to Hurricane Ike.

Investing activities. The Company's business strategy includes making prudent capital expenditures primarily across its base of interstate transmission, storage, gathering, processing and distribution assets and growing the businesses through the selective acquisition of assets in order to position itself favorably in the evolving natural gas markets.

The $47.3 million increase in invested cash is primarily due to the $78.6 million of increased capital spending in the Transportation and Storage segment, partially offset by the $49.3 million in working capital adjustment payments made in the 2007 period related to the 2006 sales of certain distribution assets.

The following table presents a summary of additions to property, plant and equipment by segment, including additions related to major projects for the periods presented.

Property, Plant and Equipment Additions	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
	(In thousands)	
Transportation and Storage Segment		
LNG Terminal Expansions/Enhancements	$ 122,474	$ 84,570
Trunkline Field Zone Expansion	69,729	134,203
East End Enhancement	35,503	35,861
Compression Modernization	51,578	48,609
Other, primarily pipeline integrity, system reliability, information technology, air emission compliance	68,568	75,827
Total	347,852	379,070
Gathering and Processing Segment	52,144	33,377
Distribution Segment		
Missouri Safety Program	9,873	7,544
Other, primarily system replacement and expansion	18,987	22,696
Total	28,860	30,240
Corporate and other	7,235	2,394
Total (1)	$ 436,091	$ 445,081

(1) Includes net capital accruals totaling $(32.7) million and $63 million for the nine-month periods ended September 30, 2008 and 2007, respectively.

Principal Capital Expenditure Projects. The Company's capital expenditure programs through 2008 are expected to be funded primarily by cash flows from operations and from financings more fully described in *Part I, Item 1. Financial Statements (Unaudited), Note 7 – Debt Obligations*. During the first quarter of 2008, the Company completed construction of its Trunkline system Field Zone Expansion project for a total estimated cost of approximately $255 million, plus capitalized interest. The Company's Trunkline LNG terminal infrastructure enhancement project, with a current estimated construction cost of approximately $400 million, plus capitalized interest, is still expected to be placed into operation in the second quarter of 2009. See *Part I, Item 1. Financial Statements (Unaudited), Note 10 – Commitments and Contingencies – Other Commitments and Contingencies* for a discussion related to the Company's capital expenditure obligations resulting from damages incurred from hurricanes in the third quarter of 2008 and 2005.

Potential Sea Robin Impairment. Sea Robin, comprised primarily of offshore facilities, suffered damage related to several platforms from Hurricane Ike. The Company has estimated capital expenditures of $45 million to replace damaged property and equipment of Sea Robin. This estimate is subject to further revision as the damage assessment is ongoing. The Company anticipates reimbursement from its property insurance carrier for its damages in excess of its $10 million deductible, except for certain expenditures not reimbursable under the insurance policy terms. See *Part I, Item 1. Financial Statements (Unaudited), Note 10 – Commitments and Contingencies – 2008 Hurricane Damage* for additional related information. To the extent the Company's capital expenditures are not recovered through insurance proceeds, its net investment in Sea Robin's property and equipment would increase without necessarily generating additional revenues unless the incremental costs are recovered through future rate proceedings. If the amount of Sea Robin's insurance reimbursements are significantly reduced or it experiences other adverse developments incrementally impacting the Company's related net investment or anticipated future cash flows that are not remedied through rate proceedings, the Company could potentially be required to record an impairment of its net investment in Sea Robin pursuant to FASB Statement No. 144, "*Accounting for Impairment or Disposal of Long-Lived Assets*."

Financing activities. The $45.9 million increase in financing cash inflows was primarily due to $100 million of common stock issuances in 2008 and an increase in revolving credit facilities of $124.2 million in 2008 compared to 2007, partially offset by a $110.9 million extinguishment of preferred stock, higher common stock dividends of $19.3 million in the 2008 period versus the 2007 period and lower net debt issuances of $40.5 million in 2008.

Retirement of Debt Obligations

In August 2008, the Company retired its $300 million 4.80% Senior Notes and $125 million 6.15% Senior Notes using the remaining proceeds from the 7.00% Senior Notes issued in June 2008 and draw downs of its credit facilities. See *Part I, Item 1. Financial Statements (Unaudited), Note 7 – Debt Obligations* for additional information related to issuance of the $400 million 7.00% Senior Notes and amendment of the Company's credit facilities agreements in June 2008. See *Part I, Item 1. Financial Statements (Unaudited), Note 14 – Shareholders' Equity – Preferred Stock* for additional information related to the extinguishment of the Company's outstanding Preferred Stock. See *Part I, Item 1. Financial Statements (Unaudited), Note 7 – Debt Obligations* for information related to the issuance of a $150 million short-term obligation issued in October 2008.

Credit and Short-Term Facilities

The Company has $420 million available under its credit facilities. As of October 31, 2008, there was a balance of $225 million outstanding under the Company's credit facilities, with an effective interest rate of 3.82 percent. Additionally, as of October 31, 2008, there was a balance of $150 million outstanding under the Short-Term Facility, with an effective interest rate of 4.00 percent.

OTHER MATTERS

Contingencies

See *Part I, Item 1. Financial Statements (Unaudited), Note 10 – Commitments and Contingencies*, in this Quarterly Report on Form 10-Q.

Recently Issued Accounting Standards

See *Part I, Item 1. Financial Statements (Unaudited), Note 2 – New Accounting Principles*, in this Quarterly Report on Form 10-Q.

Inflation

The Company believes that inflation has caused, and will continue to cause, increases in certain operating expenses, and will continue to require higher capital replacement and construction costs. In the Transportation and Storage and Distribution segments, the Company continually reviews the adequacy of its rates in relation to the impact of market conditions, the increasing cost of providing services and the inherent regulatory lag experienced in adjusting those rates.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information contained in Item 3 updates, and should be read in conjunction with, related information set forth in Part II, Item 7A in the Company's Annual Report on Form 10-K for the year ended December 31, 2007, in addition to the unaudited interim condensed consolidated financial statements, accompanying notes, and Management's Discussion and Analysis of Financial Condition and Results of Operations presented in Part I, Items 1 and 2 of this Quarterly Report on Form 10-Q.

The Company had approximately $22.7 million and $18.3 million of fair value assets and liabilities, respectively, at September 30, 2008 that were measured using significant unobservable inputs (i.e. Statement No. 157 level 3 assets and liabilities). Although the Company does not have sufficient corroborative market evidence to support classifying certain level 3 assets and liabilities within level 2, the Company does not utilize significant unobservable inputs that are based on its own internal assumptions within these level 3 assets and liabilities. Rather, the Company utilizes non-binding broker quotes or third-party pricing services in determining their period-end fair value.

Interest Rate Risk

The Company is subject to the risk of loss associated with movements in market interest rates. The Company manages this risk through the use of fixed-rate debt, floating-rate debt and interest rate swaps. Fixed-rate swaps are used to reduce the risk of increased interest costs during periods of rising interest rates. Floating-rate swaps are used to convert the fixed rates of long-term borrowings into short-term variable rates. At September 30, 2008, the interest rate on 86 percent of the Company's long-term debt was fixed after considering the impact of interest rate swaps.

At September 30, 2008, $18.3 million is included in *Deferred credits* in the unaudited interim Condensed Consolidated Balance Sheet related to the fixed-rate interest rate swaps on the $455 million Term Loan due 2012.

At September 30, 2008, a 100 basis point move in the annual interest rate on all outstanding floating-rate long-term debt would increase the Company's interest payments by approximately $600,000 for each month during which such increase continued. If interest rates changed significantly, the Company would take actions to manage its exposure to the change.

The Company also enters into treasury rate locks to manage its exposure against changes in future interest payments attributable to changes in the US treasury rates. By entering into these agreements, the Company locks in an agreed upon interest rate until the settlement of the contract. The Company accounts for the treasury rate locks as cash flow hedges. The treasury locks were settled in February and June 2008.

The change in exposure to loss in earnings and cash flows related to interest rate risk for the three-month period ended September 30, 2008 is not material to the Company.

Commodity Price Risk

Gathering and Processing Segment. The Company markets natural gas and NGL in its Gathering and Processing segment and manages associated commodity price risks using both economic and accounting hedge derivative financial instruments. These instruments involve not only the risk of transacting with counterparties and their ability to meet the terms of the contracts but also the risk associated with unmatched positions and market fluctuations. The Company is required to record its commodity derivative financial instruments at fair value, which is determined by commodity exchange prices, over-the-counter quotes, volatility, time value, counterparty credit and the potential impact on market prices of liquidating positions in an orderly manner over a reasonable period of time under current market conditions.

To manage its commodity price risk related to natural gas and NGL, the Company uses a combination of puts, NGL gross processing spread puts, fixed-price physical forward sales contracts, exchange-traded futures and options, and fixed or floating index and basis swaps to manage commodity price risk. These derivative financial instruments allow the Company to preserve value and protect margins because changes in the value of the derivative financial instruments are highly effective in offsetting changes in the physical market and reducing basis risk. Basis risk exists primarily due to price differentials between cash market delivery locations and futures contract delivery locations.

The Company realizes NGL and/or natural gas volumes from the contractual arrangements associated with the gas processing services it provides. The Company utilizes various economic hedge techniques to manage its price exposure of Company owned volumes, including processing spread put options and swaps and natural gas swaps. Expected NGL and/or natural gas volumes compared to the actual volumes sold and the effectiveness of the associated economic hedges utilized by the Company can be unfavorably impacted by:

- Processing plant outages;
- Higher than anticipated fuel, flare and unaccounted for natural gas efficiency levels;
- Impact of commodity prices in general;
- Lower than expected recovery of NGL from the residue gas stream; and
- Lower than expected receipt of natural gas volumes to be processed.

The following table summarizes SUGS' principal commodity derivative instruments as of September 30, 2008 (all instruments are settled monthly), which were developed based upon operating conditions and expected equity NGL sales volumes.

Instrument Type	Index	Average Price (per MMBtu)	Volumes (MMBtu/d) 2008	Volumes (MMBtu/d) 2009	Fair Value Asset (Liability)
					(In thousands)
***Natural Gas - Cash Flow Hedges* (1)**					
Swap	IF - Waha	$ 8.01	5,525	-	$ 1,155
Swap	IF - El Paso Permian	8.01	4,475	-	935
Swap	Gas Daily - Waha	8.42	11,050	-	2,726
Swap	Gas Daily - Waha	9.49	-	11,050	8,932
Swap	Gas Daily - El Paso Permian	8.42	8,950	-	2,208
Swap	Gas Daily - El Paso Permian	9.49	-	8,950	7,235
		Total Swaps	30,000	20,000	$ 23,191
***Processing Spread - Economic Hedges* (2)**					
Put	IF - Waha	$ 8.15	6,119	-	$ 475
Put	IF - El Paso Permian	8.15	4,956	-	385
		Total Puts	11,075	-	$ 860
Swap	Gas Daily - Waha	$ 6.85	15,981	-	$ (2,836)
Swap	Gas Daily - Waha	7.40	-	16,575	1,406
Swap	Gas Daily - El Paso Permian	6.85	12,944	-	(2,297)
Swap	Gas Daily - El Paso Permian	7.40	-	13,425	1,139
		Total Swaps	28,925	30,000	$ (2,588)

(1) The Company's natural gas swap arrangements have been designated as cash flow hedges. The effective portion of changes in the fair value of the cash flow hedges is recorded in *Accumulated other comprehensive loss* until the related hedged items impact earnings. Any ineffective portion of a cash flow hedge is reported in current-period earnings.

(2) The Company's processing spread put and swap arrangements are treated as economic hedges, with the change in fair value reported in current-period earnings.

There were no up-front costs associated with the derivative instruments entered into in 2008.

Transportation and Storage Segment. The Company is exposed to commodity price risk as its interstate pipelines collect natural gas from customers for operations or as part of the fee for services provided. When the amount of natural gas utilized in operations by these pipelines differs from the amount provided by customers, the pipelines may use natural gas from inventory or could have to buy or sell natural gas to cover these operational needs, resulting in exposure to commodity price risk. At September 30, 2008, there were no hedges in place with respect to natural gas price risk from its interstate pipeline operations.

Distribution Segment. The Company has entered into natural gas commodity swaps to mitigate price volatility of natural gas passed through to customers in the Distribution segment. The cost of the derivative products and the settlement of the respective obligations are recorded through the gas purchase adjustment clause as authorized by the applicable regulatory authority and therefore do not impact earnings. The fair values of the contracts are recorded as an adjustment to a regulatory asset or liability in the unaudited interim Condensed Consolidated Balance Sheet. As of September 30, 2008 and December 31, 2007, the fair values of the contracts, which expire at various times through August 2010, are included in the unaudited interim Condensed Consolidated Balance Sheet as liabilities, with matching adjustments to deferred cost of gas of $54.6 million and $22.3 million, respectively.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures.

Southern Union has established disclosure controls and procedures to ensure that information required to be disclosed by the Company, including consolidated entities, in reports filed or submitted under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports it files or submits under the Exchange Act is accumulated and communicated to management, including the Company's CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure. The Company performed an evaluation under the supervision and with the participation of management, including its CEO and CFO, and with the participation of personnel from its Legal, Internal Audit, Risk Management and Financial Reporting Departments, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) as of the end of the period covered by this report. Based on that evaluation, Southern Union's CEO and CFO concluded that the Company's disclosure controls and procedures were effective as of September 30, 2008.

Changes in Internal Controls.

Management's assessment of internal control over financial reporting as of December 31, 2007 was included in Southern Union's Annual Report on Form 10-K filed on February 29, 2008.

There have been no changes in internal control over financial reporting that occurred during the first nine months of 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Cautionary Statement Regarding Forward-Looking Information

The disclosure and analysis in this Form 10-Q contains some forward-looking statements that set forth anticipated results based on management's plans and assumptions. From time to time, Southern Union also provides forward-looking statements in other materials it releases to the public as well as oral forward-looking statements. Such statements give the Company's current expectations or forecasts of future events; they do not relate strictly to historical or current facts. Southern Union has tried, wherever possible, to identify such statements by using words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "will" and similar expressions in connection with any discussion of future operating or financial performance. In particular, these include statements relating to future actions, future performance or results of current and anticipated products, expenses, interest rates, the outcome of contingencies, such as legal proceedings, and financial results.

Southern Union cannot guarantee that any forward-looking statement will be realized, although management believes that the Company has been prudent in its plans and assumptions. Achievement of future results is subject to risks, uncertainties and potentially inaccurate assumptions. If known or unknown risks or uncertainties should materialize, or if underlying assumptions should prove inaccurate, actual results could differ materially from past results and those anticipated, estimated or projected. Readers should bear this in mind as they consider forward-looking statements. Southern Union undertakes no obligation publicly to update forward-looking statements, whether as a result of new information, future events or otherwise. Readers are advised, however, to consult any further disclosures the Company makes on related subjects in its Form 10-K, 10-Q and 8-K reports to the SEC. Also note that Southern Union provides the following cautionary discussion of risks, uncertainties and possibly inaccurate assumptions relevant to its businesses. These are factors that, individually or in the aggregate, management believes could cause the Company's actual results to differ materially from expected and historical results. Southern Union notes these factors for investors as permitted by the Private Securities Litigation Reform Act of 1995. Readers should understand that it is not possible to predict or identify all such factors. Consequently, readers should not consider the following to be a complete discussion of all potential risks or uncertainties.

Factors that could cause actual results to differ materially from those expressed in the Company's forward-looking statements include, but are not limited to, the following:

- changes in demand for natural gas or NGL and related services by the Company's customers, in the composition of the Company's customer base and in the sources of natural gas available to the Company;
- the effects of inflation and the timing and extent of changes in the prices and overall demand for and availability of natural gas or NGL as well as electricity, oil, coal and other bulk materials and chemicals;
- adverse weather conditions, such as warmer than normal weather in the Company's service territories, and the operational impact of natural disasters;
- changes in laws or regulations, third-party relations and approvals, decisions of courts, regulators and governmental bodies affecting or involving Southern Union, including deregulation initiatives and the impact of rate and tariff proceedings before FERC and various state regulatory commissions;
- the speed and degree to which additional competition is introduced to Southern Union's business and the resulting effect on revenues;
- the outcome of pending and future litigation;
- the Company's ability to comply with or to challenge successfully existing or new environmental regulations;
- unanticipated environmental liabilities;
- the Company's exposure to highly competitive commodity businesses through its Gathering and Processing segment;
- the Company's exposure because of limited availability of third party NGL fractionation facilities and limited availability of third party NGL transportation capacity applicable to its Gathering and Processing segment;
- the Company's ability to acquire new businesses and assets and integrate those operations into its existing operations, as well as its ability to expand its existing businesses and facilities;
- the Company's ability to control costs successfully and achieve operating efficiencies, including the purchase and implementation of new technologies for achieving such efficiencies;
- the impact of factors affecting operations such as maintenance or repairs, environmental incidents, gas pipeline system constraints and relations with labor unions representing bargaining-unit employees;
- exposure to customer concentration with a significant portion of revenues realized from a relatively small number of customers and any credit risks associated with the financial position of those customers;
- changes in the ratings of the debt securities of Southern Union or any of its subsidiaries;
- changes in interest rates and other general capital markets conditions, and in the Company's ability to continue to access the capital markets;
- acts of nature, sabotage, terrorism or other acts causing damage greater than the Company's insurance coverage limits;
- market risks beyond the Company's control affecting its risk management activities including market liquidity, commodity price volatility and counterparty creditworthiness; and
- other risks and unforeseen events.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Southern Union is a party to or has property subject to litigation and other proceedings, including matters arising under provisions relating to the protection of the environment, as described in *Part I, Item 1. Financial Statements (Unaudited), Note 10 – Commitments and Contingencies,* in this Quarterly Report on Form 10-Q and in the *Item 8. Financial Statements and Supplementary Data, Note 18 – Commitments and Contingencies,* information included in the Company's Form 10-K for the year ended December 31, 2007.

Southern Union is subject to federal and state requirements for the protection of the environment, including those for the discharge of hazardous materials and remediation of contaminated sites. As a result, Southern Union is a party to or has its property subject to various other lawsuits or proceedings involving environmental protection matters. For information regarding these matters, see *Part I, Item 1. Financial Statements (Unaudited), Note 10 – Commitments and Contingencies,* in this Quarterly Report on Form 10-Q and in the *Item 8. Financial Statements and Supplementary Data, Note 18 – Commitments and Contingencies,* information included in the Company's Form 10-K for the year ended December 31, 2007.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors previously disclosed in the Company's Form 10-K filed with the SEC on February 29, 2008.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table presents information with respect to purchases during the three months ended September 30, 2008 made by Southern Union or any "affiliated purchaser" of Southern Union (as defined in Rule 10b-18(a)(3)) of equity securities that are registered pursuant to Section 12 of the Exchange Act.

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Maximum Number of Shares that May Yet be Purchased Under the Publicly Announced Plans or Programs (2)
July 1, 2008 through July 31, 2008	3,211	$ 25.29	1,864,250	
August 1, 2008 through August 31, 2008	347	25.88	618,000	
September 1, 2008 through September 30, 2008	386	23.31	-	
Total	3,944	$ 25.15	2,482,250	4,798,913

(1) Shares of common stock purchased in open-market transactions and held in various Company employee benefit plan trusts by the trustees using cash amounts deferred by the participants in such plans (and quarterly cash dividends issued by the Company on shares held in such plans.)

(2) On May 22, 2008, the Company announced that the Finance Committee of its Board of Directors had authorized a program to repurchase a portion of the depositary shares representing ownership of its Preferred Stock. Repurchases are made at the Company's discretion in the open market and through privately negotiated transactions, subject to market conditions, applicable legal requirements and other factors. The Company has the right to redeem all of the Preferred Stock at any time at par after October 8, 2008. See *Part I, Item 1. Financial Statements (Unaudited), Note 14 – Stockholders' Equity*, in this Quarterly Report on Form 10-Q, for additional information related to the repurchase of depositary shares.

ITEM 5. OTHER INFORMATION

All information required to be reported on Form 8-K for the quarter ended September 30, 2008 was appropriately reported.

ITEM 6. EXHIBITS

The following exhibits are filed as part of this Quarterly Report on Form 10-Q:

2(a) Purchase and Sale Agreement by and among SRCG, Ltd. and SRG Genpar, L.P., as Sellers and Southern Union Panhandle LLC and Southern Union Gathering Company LLC, as Buyers, dated as of December 15, 2005. (Filed as Exhibit 10.1 to Southern Union's Current Report on Form 8-K filed on December 16, 2005 and incorporated herein by reference.)

2(b) Purchase and Sale Agreement between Southern Union Company and UGI Corporation, dated as of January 26, 2006. (Filed as Exhibit 10.1 to Southern Union's Current Report on Form 8-K filed on January 30, 2006 and incorporated herein by reference.)

2(c) First Amendment to the Purchase and Sale Agreement between Southern Union Company and UGI Corporation, dated as of August 24, 2006. (Filed as Exhibit 10.1 to Southern Union's Current Report on Form 8-K filed on August 30, 2006 and incorporated herein by reference.)

2(d) Purchase and Sale Agreement between Southern Union Company and National Grid USA, dated as of February 15, 2006. (Filed as Exhibit 10.1 to Southern Union's Current Report on Form 8-K filed on February 17, 2006 and incorporated herein by reference.)

2(e) Limited Settlement Agreement between Southern Union Company, Narragansett Electric Company d/b/a National Grid, the Department of the Attorney General for the State of Rhode Island and the Rhode Island Department of Environmental Management, dated as of August 24, 2006. (Filed as Exhibit 10.2 to Southern Union's Current Report on Form 8-K filed on August 30, 2006 and incorporated herein by reference.)

2(f) First Amendment to the Purchase and Sale Agreement between Southern Union Company and National Grid USA, dated as of August 24, 2006. (Filed as Exhibit 10.3 to Southern Union's Current Report on Form 8-K filed on August 30, 2006 and incorporated herein by reference.)

2(g) Redemption Agreement by and between CCE Holdings, LLC and Energy Transfer Partners, L.P., dated as of September 18, 2006. (Filed as Exhibit 10.1 to Southern Union's Current Report on Form 8-K filed on September 18, 2006 and incorporated herein by reference.)

2(h) Letter Agreement by and between Southern Union Company and Energy Transfer Partners, L.P., dated as of September 14, 2006. (Filed as Exhibit 10.2 to Southern Union's Current Report on Form 8-K filed on September 18, 2006 and incorporated herein by reference.)

3(a) Amended and Restated Certificate of Incorporation of Southern Union Company. (Filed as Exhibit 3(a) to Southern Union's Annual Report on Form 10-K filed on March 16, 2006 and incorporated herein by reference.)

3(b) By-Laws of Southern Union Company, as amended through January 3, 2007. (Filed as Exhibit 3.1 to Southern Union's Current Report on Form 8-K filed on January 3, 2007 and incorporated herein by reference.)

3(c) Certificate of Designations, Preferences and Rights re: Southern Union Company's 7.55% Noncumulative Preferred Stock, Series A. (Filed as Exhibit 4.1 to Southern Union's Form 8-A/A dated October 17, 2003 and incorporated herein by reference.)

4(a) Specimen Common Stock Certificate. (Filed as Exhibit 4(a) to Southern Union's Annual Report on Form 10-K for the year ended December 31, 1989 and incorporated herein by reference.)

4(b) Indenture between The Bank of New York Trust Company, N.A., as successor to Chase Manhattan Bank, N.A., as trustee, and Southern Union Company dated January 31, 1994. (Filed as Exhibit 4.1 to Southern Union's Current Report on Form 8-K dated February 15, 1994 and incorporated herein by reference.)

4(c) Officers' Certificate dated January 31, 1994 setting forth the terms of the 7.60% Senior Debt Securities due 2024. (Filed as Exhibit 4.2 to Southern Union's Current Report on Form 8-K dated February 15, 1994 and incorporated herein by reference.)

4(d) Officer's Certificate of Southern Union Company dated November 3, 1999 with respect to 8.25% Senior Notes due 2029. (Filed as Exhibit 99.1 to Southern Union's Current Report on Form 8-K filed on November 19, 1999 and incorporated herein by reference.)

4(e) Form of Supplemental Indenture No. 1, dated June 11, 2003, between Southern Union Company and The Bank of New York Trust Company, N.A., as successor to JP Morgan Chase Bank (formerly the Chase Manhattan Bank, National Association). (Filed as Exhibit 4.5 to Southern Union's Form 8-A/A dated June 20, 2003 and incorporated herein by reference.)

4(f) Supplemental Indenture No. 2, dated February 11, 2005, between Southern Union Company and The Bank of New York Trust Company, N.A., as successor to JP Morgan Chase Bank, N.A. (f/n/a JP Morgan Chase Bank). (Filed as Exhibit 4.4 to Southern Union's Form 8-A/A dated February 22, 2005 and incorporated herein by reference.)

4(g) Subordinated Debt Securities Indenture between Southern Union Company and The Bank of New York Trust Company, N.A., as successor to JP Morgan Chase Bank (as successor to The Chase Manhattan Bank, N.A.), as Trustee. (Filed as Exhibit 4-G to Southern Union's Registration Statement on Form S-3 (No. 33-58297) and incorporated herein by reference.)

4(h) Second Supplemental Indenture, dated October 23, 2006, between Southern Union Company and The Bank of New York Trust Company, N.A., successor to JP Morgan Chase Bank, N.A., formerly known as JPMorgan Chase Bank, formerly known as The Chase Manhattan Bank (National Association). (Filed as Exhibit 4.1 to Southern Union's Form 8-K/A dated October 24, 2006 and incorporated herein by reference.)

4(i) 2006 Series A Junior Subordinated Notes Due November 1, 2066 dated October 23, 2006. (Filed as Exhibit 4.2 to Southern Union's Current Report on Form 8-K/A filed on October 24, 2006 and incorporated herein by reference.)

4(j) Replacement Capital Covenant, dated as of October 23, 2006 by Southern Union Company, a Delaware corporation with its successors and assigns, in favor of and for the benefit of each Covered Debtor (as defined in the Covenant). (Filed as Exhibit 4.3 to Southern Union's Current Report on Form 8-K/A filed on October 24, 2006 and incorporated herein by reference.)

4(k) Southern Union is a party to other debt instruments, none of which authorizes the issuance of debt securities in an amount which exceeds 10% of the total assets of Southern Union. Southern Union hereby agrees to furnish a copy of any of these instruments to the Commission upon request.

10(a) First Amendment to Construction and Term Loan Agreement between Citrus Corp., as borrower, and Pipeline Funding Company, LLC, as lender and administrative agent, dated as of August 6, 2008. (Filed as Exhibit 10(a) to Southern Union Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2008 and incorporated herein by reference.)

10(b) Construction and Term Loan Agreement between Citrus Corp., as borrower, and Pipeline Funding Company, LLC, as lender and administrative agent, dated as of February 5, 2008. (Filed as Exhibit 10.1 to Southern Union's Current Report on Form 8-K filed on February 8, 2008 and incorporated herein by reference.)

10(c) Amended and Restated Credit Agreement between Trunkline LNG Holdings, LLC, as borrower, Panhandle Eastern Pipeline Company, LP and CrossCountry Citrus, LLC, as guarantors, the financial institutions listed therein Bayerische Hypo-Und Vereinsbank AG, New York Branch, as administrative agent, dated as of June 29, 2007. (Filed as Exhibit 10.1 to Southern Union's Current Report on Form 8-K filed on July 6, 2007 and incorporated herein by reference.)

10(d) Amendment Number 1 to the Amended and Restated Credit Agreement between Trunkline LNG Holdings, LLC, as borrower, Panhandle Eastern Pipe Line Company, LP and CrossCountry Citrus, LLC, as guarantors, the financial institutions listed therein and Bayerische Hypo-Und Vereinsbank AG, New York Branch, as administrative agent, dated as of June 13, 2008. (Filed as Exhibit 10(d) to Southern Union Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2008 and incorporated herein by reference.)

10(e) Fifth Amended and Restated Revolving Credit Agreement, dated as of June 20, 2008, among the Company, as borrower, and the lenders party thereto. (Filed as Exhibit 10.1 to Southern Union's Current Report on Form 8-K filed on June 25, 2008 and incorporated herein by reference.)

10(f) Employment Agreement between Southern Union Company and George L. Lindemann, dated as of August 28, 2008. (Filed herewith as Exhibit 10(f).)

10(g) Employment Agreement between Southern Union Company and Eric D. Herschmann, dated as of August 28, 2008. (Filed herewith as Exhibit 10(g).)

10(h) Employment Agreement between Southern Union Company and Robert O. Bond, dated as of August 28, 2008. (Filed herewith as Exhibit 10(h).)

10(i) Employment Agreement between Southern Union Company and Monica M. Gaudiosi, dated as of August 28, 2008. (Filed herewith as Exhibit 10(i).)

10(j) Employment Agreement between Southern Union Company and Richard N. Marshall, dated as of August 28, 2008. (Filed herewith as Exhibit 10(j).)

10(k) Form of Employment Agreement between Southern Union Company and certain Executives (filed as Exhibit 10.1 to Southern Union's Current Report on
Form 8-K filed on August 28, 2008 and incorporated herein by reference.)

10(l) Form of Change in Control Severance Agreement, between Southern Union Company and certain Executives (filed as Exhibit 10.2 to Southern Union's Current Report on
Form 8-K filed on August 28, 2008 and incorporated herein by reference.)

10(m) Credit Agreement between Trunkline LNG Holdings, LLC, as borrower, Panhandle Eastern Pipeline Company, LP and Trunkline LNG Company, LLC, as guarantors,
the financial institutions listed therein and Hypo-Und Vereinsbank AG, New York Branch, as administrative agent, dated as of March 15, 2007. (Filed as Exhibit 10.1 to
Southern Union's Current Report on Form 8-K filed on March 21, 2007 and incorporated herein by reference.)

10(n) Form of Indemnification Agreement between Southern Union Company and each of the Directors of Southern Union Company. (Filed as Exhibit 10(i) to Southern Union's Annual Report on Form 10-K for the year ended December 31, 1986 and incorporated herein by reference.)

10(o) Southern Union Company 1992 Long-Term Stock Incentive Plan, As Amended. (Filed as Exhibit 10(l) to Southern Union's Annual Report on Form 10-K for the year ended June 30, 1998 and incorporated herein by reference.)

10(p) Southern Union Company Director's Deferred Compensation Plan. (Filed as Exhibit 10(g) to Southern Union's Annual Report on Form 10-K for the year ended December 31, 1993 and incorporated herein by reference.)

10(q) First Amendment to Southern Union Company Director's Deferred Compensation Plan, effective April 1, 2007. (Filed as Exhibit 10(h) to Southern Union Company's Quarterly Report for the quarter ended September 30, 2007 and incorporated herein by reference.)

10(r) Southern Union Company Amended Supplemental Deferred Compensation Plan with Amendments. (Filed as Exhibit 4 to Southern Union's Form S-8 filed May 27, 1999 and incorporated herein by reference.)

10(s) Separation Agreement and General Release Agreement between Thomas F. Karam and Southern Union Company dated November 8, 2005. (Filed as Exhibit 10.1 to Southern Union's Current Report on Form 8-K filed on November 8, 2005 and incorporated herein by reference.)

10(t) Separation Agreement and General Release Agreement between John E. Brennan and Southern Union Company dated July 1, 2005. (Filed as Exhibit 10.1 to Southern Union's Current Report on Form 8-K filed on July 5, 2005 and incorporated herein by reference.)

10(u) Separation Agreement and General Release Agreement between David J. Kvapil and Southern Union Company dated July 1, 2005. (Filed as Exhibit 10.4 to Southern Union's Current Report on Form 8-K filed on July 5, 2005 and incorporated herein by reference.)

10(v) Second Amended and Restated Southern Union Company 2003 Stock and Incentive Plan. (Filed as Exhibit 4 to Form S-8, SEC File No. 333-138524, filed on November 8, 2006 and incorporated herein by reference.)

10(w) Southern Union Company Pennsylvania Division Stock Incentive Plan. (Filed as Exhibit 4 to Form S-8, SEC File No. 333-36146, filed on May 3, 2000 and incorporated herein by reference.)

10(x) Southern Union Company Pennsylvania Division 1992 Stock Option Plan. (Filed as Exhibit 4 to Form S-8, SEC File No. 333-36150, filed on May 3, 2000 and incorporated herein by reference.)

10(y) Form of Long Term Incentive Award Agreement, dated December 28, 2006, between Southern Union Company and the undersigned. (Filed as Exhibit 99.1 to Southern Union's Form 8-K dated January 3, 2007) and incorporated herein by reference.)

10(z) Capital Stock Agreement dated June 30, 1986, as amended April 3, 2000 ("Agreement"), among El Paso Energy Corporation (as successor in interest to Sonat, Inc.);
CrossCountry Energy, LLC (assignee of Enron Corp., which is the successor in interest to InterNorth, Inc. by virtue of a name change and successor in interest to
Houston Natural Gas Corporation by virtue of a merger) and Citrus Corp. (Filed as Exhibit 10(p) to Southern Union's Form 10-K dated March 1, 2007 and incorporated
herein by reference.)

10(aa) Certificate of Incorporation of Citrus Corp. (Filed as Exhibit 10(q) to Southern Union's Form 10-K dated March 1, 2007 and incorporated herein by reference.)

10(bb) By-Laws of Citrus Corp., filed herewith. (Filed as Exhibit 10(r) to Southern Union's Form 10-K dated March 1, 2007 and incorporated herein by reference.)

12 Ratio of earnings to fixed charges.

14 Code of Ethics and Business Conduct. (Filed as Exhibit 14 to Southern Union's Annual Report on Form 10-K filed on March 16, 2006 and incorporated herein by reference.)

21 Subsidiaries of the Registrant. (Filed as Exhibit 21 to Southern Union's Annual Report on Form 10-K filed on February 29, 2008 and incorporated herein by reference.)

31.1 Certificate by Chief Executive Officer pursuant to Rule 13a-14(a) or Rule 15d-14(a) promulgated under the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certificate by Chief Financial Officer pursuant to Rule 13a-14(a) or Rule 15d-14(a) promulgated under the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certificate by Chief Executive Officer pursuant to Rule 13a-14(b) or Rule 15d-14(b) promulgated under the Securities Exchange Act of 1934 and Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350.

32.2 Certificate by Chief Financial Officer pursuant to Rule 13a-14(b) or Rule 15d-14(b) promulgated under the Securities Exchange Act of 1934 and Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
FORM 10-K
DECEMBER 31, 2007

Table of Contents

Table of Contents

PART I

ITEM 1. Business.

OUR BUSINESS

Introduction

Southern Union Company (*Southern Union* and, together with its subsidiaries, the *Company*) was incorporated under the laws of the State of Delaware in 1932. The Company owns and operates assets in the regulated and unregulated natural gas industry and is primarily engaged in the gathering, processing, transportation, storage and distribution of natural gas in the United States. The Company operates in three reportable segments: Transportation and Storage, Gathering and Processing, and Distribution.

BUSINESS SEGMENTS

Reportable Segments

The Company's operations, as reported, include three reportable segments:

- The Transportation and Storage segment, which is primarily engaged in the interstate transportation and storage of natural gas from gas producing areas in Texas, Oklahoma, Colorado, the Gulf of Mexico and the Gulf Coast to markets throughout the Midwest and from the Gulf Coast to Florida, and liquefied natural gas (*LNG*) terminalling and regasification services. Its operations are currently conducted through Panhandle Eastern Pipe Line Company, LP (*PEPL*) and its subsidiaries (collectively *Panhandle*) and its 50 percent equity ownership interest in Florida Gas Transmission Company, LLC (*Florida Gas*) through Citrus Corp. (*Citrus*);

- The Gathering and Processing segment, which is primarily engaged in the gathering, treating, processing and redelivery of natural gas and natural gas liquids (*NGLs*) in Texas and New Mexico. Its operations are conducted through Southern Union Gas Services (*SUGS*); and

- The Distribution segment, which is primarily engaged in the local distribution of natural gas in Missouri and Massachusetts. Its operations are conducted through Missouri Gas Energy and New England Gas Company.

The Company has other operations that support and expand its natural gas and other energy sales, which are not included in its reportable segments. These operations do not meet the quantitative thresholds for determining reportable segments and have been combined for disclosure purposes in the *Corporate and Other* category. For information about the revenues, operating income, assets and other financial information relating to the Corporate and Other category, see *Item 8. Financial Statements and Supplementary Data, Note 21 – Reportable Segments*.

The Company also provides various corporate services to support its operating businesses, including executive management, accounting, communications, human resources, information technology, insurance, internal audit, investor relations, environmental, legal, payroll, purchasing, risk management, tax and treasury.

Sales of products or services between segments are billed at regulated rates or at market rates, as applicable. There were no material intersegment revenues during the years ended December 31, 2007, 2006 or 2005.

Transportation and Storage Segment

Services

The Transportation and Storage segment is primarily engaged in the interstate transportation and storage of natural gas to the Midwest and from the Gulf Coast to Florida, and LNG terminalling and regasification services. The Transportation and Storage segment's operations are conducted through Panhandle and Florida Gas.

For the years ended December 31, 2007, 2006 and 2005, the Transportation and Storage segment's operating revenues were $658.4 million, $577.2 million and $505.2 million, respectively. *Earnings from unconsolidated investments* related to Citrus were $98.9 million for the year ended December 31, 2007. For the years ended December 31, 2006 and 2005, *Earnings from unconsolidated investments* contributed through CCE Holdings,

Table of Contents

LLC (*CCE Holdings*) were $141.1 million and $70.4 million, respectively. See discussion below in *Citrus and CCE Holdings* related to the Company's increased ownership interest in Florida Gas through Citrus effective December 1, 2006.

For information about operating revenues, earnings before interest and taxes (*EBIT*), earnings from unconsolidated investments, assets and other financial information relating to the Transportation and Storage segment, see *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations – Business Segment Results – Transportation and Storage* and *Item 8. Financial Statements and Supplementary Data, Note 21 – Reportable Segments.*

Panhandle. Panhandle owns and operates a large natural gas open-access interstate pipeline network. The pipeline network, consisting of the PEPL transmission system, the Trunkline Gas Company, LLC (*Trunkline*) transmission system and the Sea Robin Pipeline Company, LLC (*Sea Robin*) transmission system, serves customers in the Midwest with a comprehensive array of transportation and storage services. PEPL's transmission system consists of four large diameter pipelines extending approximately 1,300 miles from producing areas in the Anadarko Basin of Texas, Oklahoma and Kansas through Missouri, Illinois, Indiana, Ohio and into Michigan. Trunkline's transmission system consists of two large diameter pipelines extending approximately 1,400 miles from the Gulf Coast areas of Texas and Louisiana through Arkansas, Mississippi, Tennessee, Kentucky, Illinois and Indiana to a point on the Indiana-Michigan border. Sea Robin's transmission system consists of two offshore Louisiana natural gas supply systems extending approximately 81 miles into the Gulf of Mexico. In connection with its gas transmission and storage systems, Panhandle has five gas storage fields located in Illinois, Kansas, Louisiana, Michigan and Oklahoma. Pan Gas Storage, LLC (d.b.a. *Southwest Gas Storage*) operates four of these fields and Trunkline operates one. Through Trunkline LNG Company, LLC (*Trunkline LNG*), Panhandle owns and operates an LNG terminal in Lake Charles, Louisiana. The Trunkline LNG terminal is one of the largest operating LNG facilities in North America based on its current sustainable send out capacity of approximately 1.8 billion cubic feet per day (*Bcf/d*).

Panhandle earns most of its revenue by entering into firm transportation and storage contracts, reserving capacity for customers to transport or store natural gas or LNG, in its facilities. Approximately 34 percent of Panhandle's total operating revenue comes from long-term service agreements with local distribution company customers and their affiliates. Panhandle also provides firm transportation services under contract to gas marketers, producers, other pipelines, electric power generators and a variety of end-users. Panhandle's pipelines offer both firm and interruptible transportation to customers on a short-term or seasonal basis. Demand for gas transmission on Panhandle's pipeline systems is seasonal, with the highest throughput and a higher portion of annual total operating revenues and net earnings occurring in the traditional winter heating season in the first and fourth calendar quarters.

Citrus and CCE Holdings. On December 1, 2006, the Company completed a series of transactions that resulted in it increasing its effective ownership interest in Florida Gas from 25 percent to 50 percent and eliminating its effective 50 percent ownership interest in Transwestern Pipeline Company, LLC (*Transwestern*). On September 14, 2006, Energy Transfer Partners, LP. (*Energy Transfer*) entered into a definitive purchase agreement to acquire the 50 percent interest in CCE Holdings, LLC (*CCE Holdings*) held by GE Energy Financial Services and other investors. At the same time, Energy Transfer and CCE Holdings entered into a definitive redemption agreement (*Redemption Agreement*), pursuant to which Energy Transfer's 50 percent ownership interest in CCE Holdings would be redeemed in exchange for 100 percent of the equity interests in Transwestern. Upon closing of the Redemption Agreement on December 1, 2006, the Company became the sole owner of 100 percent of CCE Holdings, whose principal remaining asset was its 50 percent interest in Citrus which, in turn, owns 100 percent of Florida Gas.

Florida Gas is an open-access interstate pipeline system with a mainline capacity of 2.1 Bcf/d extending approximately 5,000 miles from south Texas through the Gulf Coast region of the United States to south Florida. Florida Gas' pipeline system primarily receives natural gas from natural gas producing basins along the Louisiana and Texas Gulf Coast, Mobile Bay and offshore Gulf of Mexico. Florida Gas is the principal transporter of natural gas to the Florida energy market, delivering over 70 percent of the natural gas consumed in the state. In addition, Florida Gas' pipeline system operates and maintains 60 interconnects with major interstate and intrastate natural gas pipelines, which provide Florida Gas' customers access to diverse natural gas producing regions.

Table of Contents

Florida Gas earns the majority of its revenue by entering into firm transportation contracts, providing capacity for customers to transport natural gas in their pipelines. Florida Gas also earns variable revenue from charges assessed on each unit of transportation provided.

Demand for gas transmission service on the Florida Gas pipeline system is somewhat seasonal, with the highest throughput and related net earnings occurring in the summer period due to gas-fired generation loads in the second and third calendar quarters. The Company's share of net earnings of Florida Gas and, until its transfer on December 1, 2006, Transwestern have been reported in *Earnings from unconsolidated investments* in the Consolidated Statement of Operations.

The following table provides a summary of transportation volumes (in trillion British thermal units) associated with the reported results of operations for the periods presented:

	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
Panhandle			
PEPL	662	579	609
Trunkline	648	486	459
Sea Robin	144	115	146
Trunkline LNG Usage Volumes	261	149	108
Citrus and CCE Holdings (1)			
Florida Gas	751	737	699
Transwestern	N/A	572 (2)	589

____

(1) Represents 100 percent of Transwestern and Florida Gas versus the Company's effective equity ownership interest. The Company's effective equity ownership interests in Transwestern and Florida Gas were 50 percent and 25 percent, respectively, until December 1, 2006, when the Company's interest in Transwestern was transferred to Energy Transfer, increasing the Company's effective interest in Florida Gas to 50 percent.

(2) Represents transportation volumes for Transwestern for the eleven-month period ended November 30, 2006.

Table of Contents

The following table provides a summary of certain statistical information associated with Panhandle and Florida Gas at December 31, 2007:

	As of December 31, 2007
Panhandle	
Approximate Miles of Pipelines	
PEPL	6,000
Trunkline	3,500
Sea Robin	400
Peak Day Delivery Capacity (Bcf/d)	
PEPL	2.8
Trunkline	1.7
Sea Robin	1.0
Trunkline LNG	2.1
Trunkline LNG Sustainable Send Out Capacity (Bcf/d)	1.8
Underground Storage Capacity-Owned (Bcf)	74.4
Underground Storage Capacity-Leased (Bcf)	19.9
Trunkline LNG Terminal Storage Capacity (Bcf)	9.0
Average Number of Transportation Customers	500
Weighted Average Remaining Life in Years of Firm Transportation Contracts	
PEPL	4.6
Trunkline	9.0
Sea Robin (1)	N/A
Weighted Average Remaining Life in Years of Firm Storage Contracts	
PEPL	5.9
Trunkline	3.1
Florida Gas (2)	
Approximate Total Miles of Pipelines	5,000
Peak Day Delivery Capacity (Bcf/d)	2.3
Average Number of Transportation Customers	125
Weighted Average Remaining Life of Firm Transportation Contracts	8.7

(1) Sea Robin's contracts are primarily interruptible, with only one firm contract in place.
(2) Represents 100 percent of Florida Gas versus the Company's effective equity ownership interest of 50 percent at December 31, 2007.

Recent System Enhancements – Completed or Under Construction

LNG Terminal Enhancement. The Company has commenced construction of an enhancement at its Trunkline LNG terminal. This infrastructure enhancement project, which was originally expected to cost approximately $250 million, plus capitalized interest, will increase send out flexibility at the terminal and lower fuel costs. Recent cost projections indicate the construction costs will likely be approximately $365 million, plus capitalized interest. The revised costs reflect increases in the quantities and cost of materials required, higher contract labor costs and an allowance for additional contingency funds, if needed. The negotiated rate with the project's customer, BG LNG Services, will be adjusted based on final capital costs pursuant to a contract-based formula. The project is now expected to be in operation in the second quarter of 2009. In addition, Trunkline LNG and BG LNG Services agreed to extend the existing terminal and pipeline services agreements through 2028, representing a five-year extension. Approximately $178.3 million and $40.8 million of costs are included in the line item *Construction work-in-progress* at December 31, 2007 and 2006, respectively.

Table of Contents

Compression Modernization. The Company has received approval from FERC to modernize and replace various compression facilities on PEPL. Such replacements are ultimately expected to be made at eleven compressor stations, with three stations completed as of December 31, 2007. Three additional stations are in progress and planned to be completed by the end of 2009, with the remaining cost for these stations estimated at approximately $100 million, plus capitalized interest. Planning for the other five compressor stations on which construction has not yet begun is continuing, with the timing and scope of the work on these stations being evaluated on an individual station basis. The Company is also replacing approximately 32 miles of existing pipeline on the east end of the PEPL system at a current estimated cost of approximately $125 million, plus capitalized interest, which will further improve system integrity and reliability. The revised higher cost relates to various construction issues and delays which have resulted in current estimated in-service dates for the related facilities around the end of the first quarter of 2008 or in the second quarter of 2008. Approximately $124.7 million and $57.9 million of costs related to these projects are included in the line item *Construction work-in-progress* at December 31, 2007 and December 31, 2006, respectively.

Trunkline Field Zone Expansion Project. Trunkline has completed construction on its field zone expansion project. The expansion project included the north Texas expansion and creation of additional capacity on Trunkline's pipeline system in Texas and Louisiana to increase deliveries to Henry Hub. Trunkline has increased the capacity along existing rights-of-way from Kountze, Texas to Longville, Louisiana by approximately 625 million cubic feet per day (*MMcf/d*) with the construction of approximately 45 miles of 36-inch diameter pipeline. The project included horsepower additions and modifications at existing compressor stations. Trunkline has also created additional capacity to Henry Hub with the construction of a 13.5-mile, 36-inch diameter pipeline loop from Kaplan, Louisiana directly into Henry Hub. The Henry Hub lateral provides capacity of 1 Bcf/d from Kaplan, Louisiana to Henry Hub. The majority of the project was put into service in late December 2007 with the remainder placed in-service in February 2008. The Company currently estimates the final project costs will total approximately $250 million, plus capitalized interest. The estimated costs include a $40 million contribution in aid of construction (*CIAC*) to a subsidiary of Energy Transfer, which was paid in January 2008 and is expected to be amortized over the life of the facilities. Approximately $26.4 million and $12.5 million of costs for this project are included in the line item *Construction work-in-progress* at December 31, 2007 and 2006, respectively, with $178.3 million closed to *Plant in service* in December 2007.

Significant Customers

The following table provides the percentage of Transportation and Storage segment *Operating revenues* and related weighted average contract lives of Panhandle's significant customers at December 31, 2007:

Customer	Percent of Segment Revenues For Year Ended December 31, 2007 (1)	Weighted Average Life of Contracts at December 31, 2007
BG LNG Services	28%	16 years (LNG, transportation)
ProLiance	11	5.2 years (transportation) 6.9 years (storage)
Other top 10 customers	26	N/A
Remaining customers	35	N/A
Total percentage	100%	

(1) Panhandle has no single customer, or group of customers under common control, that accounted for ten percent or more of the Company's total consolidated operating revenues.

Table of Contents

Panhandle's customers are subject to change during the year as a result of capacity release provisions that allow current customers to release all or part of their capacity, which generally occurs for a limited time period. Under the terms of Panhandle's tariffs, a temporary capacity release does not relieve the original customer from its payment obligations if the replacement customer fails to pay.

The following table provides information related to Florida Gas' significant customers at December 31, 2007:

Customer	**Percent of Florida Gas' Total Operating Revenues For Year Ended December 31, 2007 (1)**	**Weighted Average Life of Contracts at December 31, 2007**
Florida Power & Light	40%	7.3 Years
Tampa Electric/Peoples Gas	16	9.6 Years
Other top 10 customers	28	N/A
Remaining customers	16	N/A
Total percentage	100%	

(1) The Company accounts for its investment in Florida Gas through its equity investment in Citrus using the equity method. Accordingly, it reports its share of Florida Gas' net earnings within *Earnings from unconsolidated investments* in the Consolidated Statement of Operations.

Regulation and Rates

Panhandle and Florida Gas are subject to regulation by various federal, state and local governmental agencies, including those specifically described below. See also *Item 1A. Risk Factors – Risks That Relate to the Company's Transportation and Storage Segment* and *Item 8. Financial Statements and Supplementary Data, Note 16 – Regulation and Rates.*

FERC has comprehensive jurisdiction over PEPL, Trunkline, Sea Robin, Trunkline LNG, Southwest Gas Storage and Florida Gas as natural gas companies within the meaning of the Natural Gas Act of 1938. For natural gas companies, FERC's jurisdiction relates, among other things, to the acquisition, operation and disposition of assets and facilities and to the service provided and rates charged.

FERC has authority to regulate rates and charges for transportation and storage of natural gas in interstate commerce. FERC also has authority over the construction and operation of pipeline and related facilities utilized in the transportation and sale of natural gas in interstate commerce, including the extension, enlargement or abandonment of service using such facilities. PEPL, Trunkline, Sea Robin, Trunkline LNG, Southwest Gas Storage and Florida Gas hold certificates of public convenience and necessity issued by FERC, authorizing them to construct and operate the pipelines, facilities and properties now in operation for which such certificates are required, and to transport and store natural gas in interstate commerce.

Table of Contents

The following table summarizes the status of the rate proceedings applicable to the Transportation and Storage segment as of December 31, 2007:

Company	Date of Last Rate Filing	Status
PEPL	May 1992	Settlement effective April 1997
Trunkline	January 1996	Settlement effective May 2001
Sea Robin	June 2007	Ongoing; procedural schedule currently suspended (1)
Trunkline LNG	June 2001	Settlement effective January 2002 (2)
Southwest Gas Storage	August 2007	Settlement approved February 2008
Florida Gas	October 2003	Settlement effective March 2005; rate moratorium in effect until October 2007; required to file by October 2009

(1) Filed rates put into effect January 1, 2008, subject to refund.
(2) Settlement provides for a rate moratorium through 2015.

Panhandle and Florida Gas are also subject to the Natural Gas Pipeline Safety Act of 1968 and the Pipeline Safety Improvement Act of 2002, which regulate the safety of gas pipelines.

For a discussion of the effect of certain FERC orders on Panhandle, see *Item 8. Financial Statements and Supplementary Data, Note 16 – Regulation and Rates – Panhandle.*

Competition

The interstate pipeline systems of Panhandle and Florida Gas compete with those of other interstate and intrastate pipeline companies in the transportation and storage of natural gas. The principal elements of competition among pipelines are rates, terms of service, flexibility and reliability of service.

Natural gas competes with other forms of energy available to the Company's customers and end-users, including electricity, coal and fuel oils. The primary competitive factor is price. Changes in the availability or price of natural gas and other forms of energy, the level of business activity, conservation, legislation and governmental regulation, the capability to convert to alternate fuels and other factors, including weather and natural gas storage levels, affect the ongoing demand for natural gas in the areas served by Panhandle and Florida Gas.

Federal and state regulation of natural gas interstate pipelines has changed dramatically in the last two decades and could continue to change over the next several years. These regulatory changes have resulted, and will likely continue to result, in increased competition in the pipeline business. In order to meet competitive challenges, Panhandle and Florida Gas will need to adapt their marketing strategies, the type of transportation and storage services provided and their pricing and rate responses to competitive forces. Panhandle and Florida Gas will also need to respond to changes in state regulation in their market areas that allow direct sales to all retail end-user customers or, at a minimum, broader customer classes than now allowed.

FERC may authorize the construction of new interstate pipelines that are competitive with existing pipelines. A number of new pipeline and pipeline expansion projects are under development to transport large additional volumes of natural gas to the Midwest from the Rockies. These pipelines, which include Kinder Morgan's Rockies Express Pipeline project, could potentially compete with the Company.

The Company's direct competitors include Alliance Pipeline LP, ANR Pipeline Company, Natural Gas Pipeline Company of America, ONEOK Partners, Texas Gas Transmission Corporation, Northern Natural Gas Company, Vector Pipeline, Columbia Gulf Transmission and Midwestern Gas Transmission.

Florida Gas competes in peninsular Florida with Gulfstream, a joint venture of Spectra Energy Corporation and The Williams Companies. Florida Gas also serves the Florida panhandle, where it competes with Gulf South Pipeline Company and the natural gas transportation business of Southern Natural Gas. Florida Gas faces competition, to a lesser degree, from alternate fuels, including residual fuel oil, in the Florida market, as well as from proposed LNG regasification facilities.

[Table of Contents](#)

Gathering and Processing Segment

Services

SUGS' operations consist of a network of approximately 4,800 miles of natural gas and NGLs pipelines, four active cryogenic processing plants with a combined capacity of 410 MMcf/d and five active natural gas treating plants with a combined capacity of 470 MMcf/d. The principal assets of SUGS are located in the Permian Basin of Texas and New Mexico.

SUGS is primarily engaged in connecting wells of natural gas producers to its gathering system, treating natural gas to remove impurities to meet pipeline quality specifications, processing natural gas for the removal of NGLs, and redelivering natural gas and NGLs to a variety of markets. SUGS gathers and processes natural gas for approximately 240 customers. Its primary sales customers include producers, power generating companies, utilities, energy marketers, and industrial users located primarily in the southwestern United States. SUGS receives natural gas for purchase or gathering and redelivery to market from more than 240 producers and suppliers. SUGS' business is not generally seasonal in nature.

As a result of the operational flexibility built into SUGS' gathering system and plants, it is able to offer a broad array of services to producers, including:

- field gathering and compression of natural gas for delivery to its plants;
- treating, dehydration, sulfur recovery and other conditioning; and
- natural gas processing and marketing of products.

For the year 2007 and the 2006 period subsequent to the March 1, 2006 acquisition, SUGS' gross margin (*Operating revenues* net of *Cost of gas and other energy)* were $210.8 million and $172.2 million, respectively. For information about operating revenues, EBIT, assets and other financial information relating to the Gathering and Processing segment, see *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations – Business Segment Results – Gathering and Processing* and *Item 8. Financial Statements and Supplementary Data, Note 21 – Reportable Segments*.

Significant Customers

The following table provides the percentage of Gathering and Processing segment *Operating revenues* and related weighted average contract lives of SUGS' significant customers at December 31, 2007:

Customer	**Percent of Segment Revenues For Year Ended December 31, 2007**	**Weighted Average Life of Firm Contracts at December 31, 2007**
ConocoPhillips Company (1)	16%	Month-to-Month
Other top 10 customers	47	N/A
Remaining customers	37	N/A
Total percentage	100%	

(1) SUGS has no single customer, or group of customers under common control, that accounted for ten percent or more of the Company's total consolidated operating revenues.

Table of Contents

Natural Gas Connections

SUGS' major natural gas pipeline interconnects are with ATMOS Pipeline Texas, El Paso Natural Gas Company, Energy Transfer Fuel, LP, DCP Guadalupe Pipeline, LP, Enterprise Texas Pipeline, Northern Natural Gas Company, Oasis Pipeline, LP, ONEOK Westex Transmission, LP, Public Service Company of New Mexico and Transwestern. Its major NGLs pipeline interconnects are with Chapparal, Louis Dreyfus and Chevron.

Natural Gas Supply Contracts

SUGS's gas supply contracts primarily include fee-based, percent-of-proceeds, conditioning fee and wellhead contracts, which as of December 31, 2007, comprised 50 percent, 39 percent, 9 percent and 2 percent by volume of its gas supply contracts, respectively. These gas supply contracts vary in length from month-to-month to a number of years, with many of the contracts having a term of three to five years.

Following is a summary description of the gas supply contracts utilized by SUGS:

- ***Fee-Based.*** Under fee-based arrangements, SUGS receives a fee or fees for one or more of the following services: gathering, compressing, treating or processing natural gas. The fee or fees are usually based on the volume or level of service provided to gather, compress, treat or process natural gas. While fee-based arrangements are generally not subject to commodity risk, certain operating conditions as well as provisions of these arrangements, including fuel recovery mechanisms, may subject SUGS to a limited amount of commodity risk.

- ***Percent-of-Proceeds, Percent-of-Value or Percent-of-Liquids.*** Under percent-of-proceeds arrangements, SUGS generally gathers and processes natural gas from producers for an agreed percentage of the proceeds from the sales of the resulting residue gas and NGLs. The percent-of-value and percent-of-liquids are variations on this arrangement. These types of arrangements expose SUGS to some commodity price risk as the costs and revenues from the contracts are directly correlated with the price of natural gas and NGLs.

- ***Conditioning Fee.*** Conditioning fee arrangements provide a guaranteed minimum margin or fee on gas that must be processed for liquid hydrocarbon extraction in order to meet the quality specifications of the transmission pipelines. In addition to the minimum margin or fee, SUGS keeps all or a large percentage of the value of the NGLs. The revenue earned is directly related to the processing value of the gas, however, SUGS is kept whole on a minimum value or fee in low processing spread environments.

- ***Keep-Whole and Wellhead.*** A keep-whole arrangement allows SUGS to keep 100 percent of the NGLs produced and requires the return of the processed natural gas, or value of the gas, to the producer or owner. Since some of the gas is used during processing, SUGS must compensate the producer or owner for the gas shrink entailed in processing by supplying additional gas or by paying an agreed value for the gas utilized. These arrangements have the highest commodity price exposure for SUGS because the costs are dependent on the price of natural gas and the revenues are based on the price of NGLs. As a result, SUGS benefits from these types of arrangements when the value of the NGLs is high relative to the cost of the natural gas and is disadvantaged when the cost of the natural gas is high relative to the value of NGLs. SUGS has the ability to eliminate its exposure to negative processing spreads by treating, dehydrating and blending the wellhead gas with leaner gas in order to meet downstream transmission pipeline specifications rather than processing the gas. In situations where the negative processing spread is eliminated, such contracts are referred to as wellhead contracts.

For information related to SUGS use of various derivative financial instruments to manage its commodity price risk and related operating cash flows, see *Item 8. Financial Statements and Supplementary Data, Note 11 – Derivative Instruments and Hedging Activities – Gathering and Processing Segment.*

Table of Contents

Regulation

SUGS' facilities are not currently regulated by FERC but are subject to oversight by various other governmental agencies, including matters of asset integrity, safety and environmental protection. The relevant agencies include the U.S. Environmental Protection Agency and its state counterparts, the Occupational Safety and Health Administration and the U.S. Department of Transportation's Office of Pipeline Safety and its state counterparts. The Company believes that its gathering and processing operations are in material compliance with applicable safety and environmental statutes and regulations.

Competition

SUGS competes with other midstream service providers and producer-owned midstream facilities in the Permian basin. The Company's direct competitors include Targa Resources Partners LP, DCP Midstream Partners, LP (formerly Duke Energy Field Services), Enterprise Texas Field Services, Anadarko Petroleum, Atlas Pipeline Partners, LP and Regency Gas Services. Industry factors that typically affect the Company's ability to compete in this segment are:

- contract fees charged,
- pressures maintained on the gathering systems,
- location of the gathering systems relative to competitors and producer drilling activity,
- efficiency and reliability of the operations, and
- delivery capabilities in each system and plant location.

Commodity prices for natural gas and NGLs also play a major role in drilling activity on or near the Company's gathering and processing systems. Generally, lower commodity prices will result in less producer drilling activity and conversely, higher commodity prices will result in increased producer drilling activity.

SUGS has responded to these industry conditions by positioning and configuring its gathering and processing facilities to offer a broad range of services to accommodate the types and quality of natural gas produced in the region, while many competing systems provide only a single level of service.

Distribution Segment

Services

The Company's Distribution segment is primarily engaged in the local distribution of natural gas in Missouri, through Missouri Gas Energy, and Massachusetts, through New England Gas Company. The utilities serve over 550,000 residential, commercial and industrial customers through local distribution systems consisting of 9,068 miles of mains, 6,096 miles of service lines and 45 miles of transmission lines. The utilities' natural gas rates and operations in Missouri and Massachusetts are regulated by the Missouri Public Service Commission (*MPSC*) and the Massachusetts Department of Public Utilities (*MDPU*), respectively.

The utilities operations have historically been sensitive to weather and are seasonal in nature, with a significant percentage of annual operating revenues and EBIT occurring in the traditional winter heating season in the first and fourth calendar quarters. However, the MPSC approved distribution rates effective April 3, 2007 for Missouri Gas Energy's residential customers (which comprise approximately 87 percent of its total customers and approximately 67 percent of its operating revenues) that eliminate the impact of weather and conservation for residential margin revenues and related earnings in Missouri.

For the years ended December 31, 2007, 2006 and 2005, the Distribution segment's *Operating revenues* were \$732.1 million, \$668.7 million and \$752.7 million, respectively; average customers served totaled 552,023, 551,604 and 548,514, respectively; and gas volumes sold or transported totaled 83,107 million cubic feet (*MMcf*), 77,890 MMcf and 84,112 MMcf, respectively. The Distribution segment has no single customer, or group of customers under common control, which accounted for ten percent or more of the Company's Distribution segment or the Company's total consolidated operating revenues for the years ended December 31, 2007, 2006 and 2005.

Table of Contents

For information about operating revenues, EBIT, assets and other financial information relating to the Distribution segment, see *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations – Business Segment Results – Distribution Segment* and *Item 8. Financial Statements and Supplementary Data, Note 21 – Reportable Segments.*

The Distribution segment customers served, gas volumes sold or transported and weather-related information for the years ended December 31, 2007, 2006 and 2005 are as follows:

	Years Ended December 31,		
	2007	**2006**	**2005**
Average number of customers:			
Residential	483,753	482,882	480,381
Commercial	66,631	67,120	66,608
Industrial	122	129	142
Total average customers served	550,506	550,131	547,131
Transportation customers	1,517	1,473	1,383
Total average gas sales and transportation customers	552,023	551,604	548,514
Gas sales (MMcf):			
Residential	37,916	34,946	39,160
Commercial	15,988	14,938	16,633
Industrial	504	517	525
Gas sales billed	54,408	50,401	56,318
Net change in unbilled gas sales	1,788	(1,025)	185
Total gas sales	56,196	49,376	56,503
Gas transported	26,911	26,340	27,609
Total gas sales and gas transported	83,107	75,716	84,112
Gas sales revenues ($ in thousands):			
Residential	$ 495,464	$ 472,926	$ 500,874
Commercial	186,987	189,837	201,122
Industrial	10,900	11,140	10,499
Gas revenues billed	693,351	673,903	712,495
Net change in unbilled gas sales revenues	9,491	(25,681)	19,561
Total gas sales revenues	702,842	648,222	732,056
Gas transportation revenues	12,669	12,253	12,885
Other revenues	16,598	8,246	7,758
Total operating revenues	$ 732,109	$ 668,721	$ 752,699
Weather:			
Massachusetts Utility Operations:			
Degree days (1)	5,371	4,901	5,801
Percent of 10-year measure (2)	86%	90%	106%
Percent of 30-year measure (2)	89%	85%	101%
Missouri Utility Operations:			
Degree days (1)	4,776	3,996	4,621
Percent of 10-year measure (2)	92%	77%	89%
Percent of 30-year measure (2)	92%	77%	89%

(1) "Degree days" are a measure of the coldness of the weather experienced. A degree day is equivalent to each degree that the daily mean
temperature for a day falls below 65 degrees Fahrenheit.

(2) Information with respect to weather conditions is provided by the National Oceanic and Atmospheric Administration. Percentages of 10-
and 30-year measures are computed based on the weighted average volumes of gas sales billed. The 10- and 30-year measures are used for consistent external reporting purposes. Measures of normal weather used by the Company's regulatory authorities to set rates

vary by jurisdiction. Periods used to measure normal weather for regulatory purposes range from 10 years to 30 years.

Table of Contents

Gas Supply

The cost and reliability of natural gas service are dependent upon the Company's ability to achieve favorable mixes of long-term and short-term gas supply agreements and fixed and variable transportation contracts. The Company has been acquiring its gas supplies directly since the mid-1980s when interstate pipeline systems opened their systems for transportation service. The Company sought to ensure reliable service to customers by developing the ability to dispatch and monitor gas volumes on a daily, hourly or real-time basis.

For the year ended December 31, 2007, the majority of the gas requirements for the utility operations of Missouri Gas Energy were delivered under short- and long-term transportation contracts through five major pipeline companies and more than 22 commodity suppliers. For this same period, the majority of the gas requirements for the Massachusetts utility operations of New England Gas Company were delivered under long-term contracts through five major pipeline companies and contracts with four commodity suppliers. Collectively, these contracts have various expiration dates ranging from 2009 through 2036. Missouri Gas Energy and New England Gas Company have firm supply commitments for all areas that are supplied with gas purchased under short- and long-term arrangements. Missouri Gas Energy and New England Gas Company hold contract rights to over 17 billion cubic feet (*Bcf*) and 1 Bcf of storage capacity, respectively, to assist in meeting peak demands.

Like the gas industry as a whole, Southern Union utilizes gas sales and/or transportation contracts with interruption provisions, by which large volume users purchase gas with the understanding that they may be forced to shut down or switch to alternate sources of energy at times when the gas is needed by higher priority customers for load management. In addition, during times of special supply problems, curtailments of deliveries to customers with firm contracts may be made in accordance with guidelines established by appropriate federal and state regulatory agencies.

Regulation and Rates

The Company's utilities are regulated as to rates, operations and other matters by the regulatory commissions of the states in which each operates. In Missouri, natural gas rates are established by the MPSC on a system-wide basis. In Massachusetts, natural gas rates for New England Gas Company are subject to the regulatory authority of the MDPU. For additional information concerning recent state and federal regulatory developments, see *Item 8. Financial Statements and Supplementary Data, Note 16 – Regulation and Rates.*

The Company holds non-exclusive franchises with varying expiration dates in all incorporated communities where it is necessary to carry on its business as it is now being conducted. Fall River, Massachusetts; Kansas City, Missouri; and St. Joseph, Missouri are the largest cities in which the Company's utility customers are located. The franchise in Kansas City, Missouri expires in 2010. The Company fully expects this franchise to be renewed prior to its expiration. The franchises in Fall River, Massachusetts and St. Joseph, Missouri are perpetual. Regulatory authorities establish gas service rates so as to permit utilities the opportunity to recover operating, administrative and financing costs, and the opportunity to earn a reasonable return on equity. Gas costs are billed to customers through purchased gas adjustment clauses, which permit the Company to adjust its sales price as the cost of purchased gas changes. This is important because the cost of natural gas accounts for a significant portion of the Company's total expenses. The appropriate regulatory authority must receive notice of such adjustments prior to billing implementation. The MPSC and MDPU allow such adjustments up to three and two times per year, respectively.

The Company supports any service rate changes that it proposes to its regulators using an historic test year of operating results adjusted to normal conditions and for any known and measurable revenue or expense changes. Because the regulatory process has certain inherent time delays, rate orders in these jurisdictions may not reflect the operating costs at the time new rates are put into effect.

Except for Missouri Gas Energy's residential customers, that are billed a fixed monthly charge for services provided, the Company's monthly customer bills contain a fixed service charge, a usage charge for service to deliver gas, and a charge for the amount of natural gas used. Although the monthly fixed charge provides an even revenue stream, the usage charge increases the Company's annual revenue and earnings in the traditional heating load months when usage of natural gas increases.

Table of Contents

In addition to public service commission regulation of its utility businesses, the Distribution segment is affected by other regulations, including pipeline safety regulations under the Natural Gas Pipeline Safety Act of 1968, the Pipeline Safety Improvement Act of 2002, safety regulations under the Occupational Safety and Health Act and various state and federal environmental statutes and regulations. The Company believes that its utility operations are in material compliance with applicable safety and environmental statutes and regulations.

The following table summarizes the rate proceedings applicable to the Distribution segment:

Utility Operations	Date of Last Rate Filing	Status (1)
Missouri	May 2006	MPSC rate order effective April 2007.
Massachusetts	June 2007	Settlement effective August 2007.

(1) For more information related to these rate filings, see *Item 8. Financial Statements and Supplementary Data, Note 16 – Regulation and Rates*.

Competition

As energy providers, Missouri Gas Energy and New England Gas Company have historically competed with alternative energy sources available to end-users in their service areas, particularly electricity, propane, fuel oil, coal, NGLs and other refined products. At present rates, the cost of electricity to residential and commercial customers in the Company's regulated utility service areas generally is higher than the effective cost of natural gas service. There can be no assurance, however, that future fluctuations in gas and electric costs will not reduce the cost advantage of natural gas service.

Competition between the use of fuel oils, natural gas and propane, particularly by industrial and electric generation customers, has increased due to the volatility of natural gas prices and increased marketing efforts from various energy companies. Competition among the use of fuel oils, natural gas and propane is generally greater in the Company's Massachusetts service area than in its Missouri service area. Nevertheless, this competition affects the nationwide market for natural gas. Additionally, the general economic conditions in the Company's regulated utility service areas continue to affect certain customers and market areas, thus impacting the results of the Company's operations. The Company's regulated utility operations are not currently in significant direct competition with any other distributors of natural gas to residential and small commercial customers within their service areas.

OTHER MATTERS

Environmental

The Company is subject to federal, state and local laws and regulations relating to the protection of the environment. These evolving laws and regulations may require expenditures over a long period of time to control environmental impacts. The Company has established procedures for the ongoing evaluation of its operations to identify potential environmental exposures. These procedures are designed to achieve compliance with such laws and regulations. For additional information concerning the impact of environmental regulation on the Company, see *Item 8. Financial Statements and Supplementary Data, Note 18 – Commitments and Contingencies.*

Insurance

The Company maintains insurance coverage provided under its policies similar to other comparable companies in the same lines of business. The insurance policies are subject to terms, conditions, limitations and exclusions that do not fully compensate the Company for all losses. Insurance deductibles range from $100,000 to $10 million for the various policies utilized by the Company.

Table of Contents

Employees

As of December 31, 2007, the Company had 2,337 employees, of whom 1,513 are paid on an hourly basis and 824 are paid on a salary basis. Unions represent approximately 50 percent of the 1,513 hourly paid employees. The table below sets forth the number of employees represented by unions for each division, as well as the expiration dates of the current contracts with the respective bargaining units.

Company	**Number of employees Represented by Unions**	**Expiration of Current Contract**
PEPL		
USW Local 348	215	May 27, 2009
Missouri Gas Energy		
Gas Workers 781	195	April 30, 2009
IBEW Local 53	98	April 30, 2009
USW Local 5-267	27	April 30, 2009
USW Local 12561, 14228	142	April 30, 2009
New England Gas Company		
UWUA Local 431	72	April 30, 2010

As of December 31, 2007, the number of persons employed by each segment was as follows: Transportation and Storage segment –1,121 persons; Gathering and Processing segment – 317 persons; Distribution segment – 792 persons; All Other subsidiary operations – 12 persons. In addition, the corporate employees of Southern Union totaled 95 persons.

The employees of Florida Gas are not employees of Southern Union or its segments and, therefore, were not considered in the employee statistics noted above. As of December 31, 2007, Florida Gas had 301 non-union employees.

The Company believes that its relations with its employees are good. From time to time, however, the Company may be subject to labor disputes. The Company did not experience any strikes or work stoppages during the years ended December 31, 2007, 2006 or 2005.

Available Information

Southern Union files annual, quarterly and special reports, proxy statements and other information with the Securities and Exchange Commission (*SEC*) as required. Any document that Southern Union files with the SEC may be read or copied at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for information on the public reference room. Southern Union's SEC filings are also available at the SEC's website at http://www.sec.gov and through Southern Union's website at http://www.sug.com. The information on Southern Union's website is not incorporated by reference into and is not made a part of this report.

Southern Union, by and through the audit committee of its board of directors, has adopted a Code of Ethics and Business Conduct (*Code*) designed to reflect requirements of the Sarbanes-Oxley Act of 2002, New York Stock Exchange rules and other applicable laws, rules and regulations. The Code applies to all of the Company's directors, officers and employees. Any amendment to the Code will be posted promptly on Southern Union's website.

Table of Contents

Southern Union, by and through the corporate governance committee of its board of directors, also has adopted Corporate Governance Guidelines (*Guidelines*). The Guidelines set forth the responsibilities and standards under which the major board committees and management shall function. The Code of Ethics and Business Conduct (*Code*), the Guidelines and the charters of the audit, corporate governance, compensation and finance committees are posted on the Corporate Governance section of Southern Union's website under "Governance Documents" and are available free of charge by calling Southern Union at (713) 989-2000 or by writing to:

ITEM 1A. Risk Factors.

The risks and uncertainties described below are not the only ones faced by the Company. Additional risks and uncertainties that it is unaware of, or that it currently deems immaterial, may become important factors that affect it. If any of the following risks occur, the Company's business, financial condition, results of operations or cash flows could be materially and adversely affected.

RISKS THAT RELATE TO SOUTHERN UNION

Southern Union has substantial debt and depends on its ability to access the capital markets.

Southern Union has a significant amount of debt outstanding. As of December 31, 2007, consolidated debt on the Consolidated Balance Sheet totaled $3.5 billion outstanding, compared to total capitalization (long and short-term debt plus stockholders' equity) of $5.7 billion.

Some of the Company's debt obligations contain financial covenants concerning debt-to-capital ratios and interest coverage ratios. The Company's failure to comply with any of these covenants could result in an event of default which, if not cured or waived, could result in the acceleration of outstanding debt obligations or render the Company unable to borrow under certain credit agreements. Any such acceleration or inability to borrow could cause a material adverse change in the Company's financial condition.

The Company relies on access to both short-term and long-term credit as a significant source of liquidity for capital requirements not satisfied by the cash flow from its operations. Any worsening of the Company's financial condition or a material decrease in its common stock price could hamper its ability to access the capital markets. External events could also increase the Company's cost of borrowing or adversely affect its ability to access the capital markets.

Further, because of the need for certain state regulatory approvals in order to incur debt and issue capital stock, the Company may not be able to access the capital markets on a timely basis. Restrictions on the Company's ability to access capital markets could affect its ability to execute its business plan or limit its ability to pursue improvements or acquisitions on which it may otherwise rely for future growth.

The Company plans to refinance its $425 million of debt maturing in August 2008 with new capital market debt or bank financings. Alternatively, should the Company not be successful in its refinancing efforts, the Company may choose to retire such debt upon maturity by utilizing some combination of cash flows from operations, draw downs under existing credit facilities, and altering the timing of controllable expenditures, among other things. The Company believes, based on its investment grade credit ratings and general financial condition, successful historical access to capital and debt markets, current economic and capital market conditions and market expectations regarding the Company's future earnings and cash flows, that it will be able to refinance and/or retire these obligations under acceptable terms prior to their maturity. There can be no assurance, however, that the Company will be able to achieve acceptable refinancing terms in any negotiation of new capital market debt or bank financings. Moreover, there can be no assurance the Company will be successful in its implementation of these refinancing and/or retirement plans and the Company's inability to do so would cause a material adverse effect on the Company's financial condition and liquidity.

Table of Contents

Credit ratings downgrades could increase the Company's financing costs and limit its ability to access the capital markets.

As of December 31, 2007, both Southern Union's and Panhandle's debt is rated Baa3 by Moody's Investor Services, Inc., BBB- by Standard & Poor's and BBB by Fitch Ratings. If the Company's credit ratings are downgraded below investment grade or if there are times when it is placed on "credit watch," both borrowing costs and the costs of maintaining certain contractual relationships could increase. Lower credit ratings could also adversely affect the Distribution segment's relationships with state regulators, who may be unwilling to allow the Company to pass along increased debt service costs to natural gas customers.

The Company's growth strategy entails risk for investors.

The Company intends to actively pursue acquisitions in the energy industry to complement and diversify its existing businesses. As part of its growth strategy, Southern Union may:

- examine and potentially acquire regulated or unregulated businesses, including transportation and storage assets and gathering and processing businesses within the natural gas industry;
- enter into joint venture agreements and/or other transactions with other industry participants or financial investors;
- selectively divest parts of its business, including parts of its core operations; and
- continue expanding its existing operations.

The Company's ability to acquire new businesses will depend upon the extent to which opportunities become available, as well as, among other things:

- its success in bidding for the opportunities;
- its ability to assess the risks of the opportunities;
- its ability to obtain regulatory approvals on favorable terms; and
- its access to financing on acceptable terms.

Once acquired, the Company's ability to integrate a new business into its existing operations successfully will depend on the adequacy of implementation plans, including the ability to identify and retain employees to manage the acquired business, and the ability to achieve desired operating efficiencies. The successful integration of any businesses acquired in the future may entail numerous risks, including, among others:

- the risk of diverting management's attention from day-to-day operations;
- the risk that the acquired businesses will require substantial capital and financial investments;
- the risk that the investments will fail to perform in accordance with expectations; and
- the risk of substantial difficulties in the transition and integration process.

These factors could have a material adverse effect on the Company's business, financial condition, results of operations and cash flows, particularly in the case of a larger acquisition or multiple acquisitions in a short period of time.

Additionally, if the Company expands its existing operations, the success of any such expansion is subject to substantial risk and may expose the Company to significant costs. The Company cannot assure that its development or construction efforts will be successful.

The consideration paid in connection with an investment or acquisition also affects the Company's financial results. To the extent it issues shares of capital stock or other rights to purchase capital stock, including options or other rights, existing stockholders may be diluted and earnings per share may decrease. In addition, acquisitions or expansions may result in the incurrence of additional debt.

Table of Contents

The Company depends on distributions from its subsidiaries and joint ventures to meet its needs.

The Company is dependent on the earnings and cash flows of, and dividends, loans, advances or other distributions from, its subsidiaries and joint ventures (including Citrus) to generate the funds necessary to meet its obligations. The availability of distributions from such entities is subject to their earnings and capital requirements, the satisfaction of various covenants and conditions contained in financing documents by which they are bound or in their organizational documents, and in the case of the regulated subsidiaries, regulatory restrictions that limit their ability to distribute profits to Southern Union.

The Company owns 50 percent of Citrus, the holding company for Florida Gas. As such, the Company cannot control or guarantee the receipt of distributions from Florida Gas through Citrus.

The Company is subject to operating risks.

The Company's operations are subject to all operating hazards and risks incident to handling, storing, transporting and providing customers with natural gas or NGLs, including explosions, pollution, release of toxic substances, fires and other hazards, each of which could result in damage to or destruction of its facilities or damage to persons and property. If any of these events were to occur, the Company could suffer substantial losses. Moreover, as a result, the Company has been, and likely will be, a defendant in legal proceedings and litigation arising in the ordinary course of business. Although the Company maintains insurance coverage, such coverage may be inadequate to protect the Company from all expenses related to these risks.

The Company is subject to extensive federal, state and local laws and regulations regulating the environmental aspects of its business that may increase its costs of operation, expose it to environmental liabilities and require it to make material unbudgeted expenditures.

The Company is subject to extensive federal, state and local laws and regulations regulating the environmental aspects of its business (including air emissions), which are complex and have tended to become increasingly strict over time. These laws and regulations have necessitated, and in the future may necessitate, increased capital expenditures and operating costs. In addition, certain environmental laws may result in liability without regard to fault concerning contamination at a broad range of properties, including those currently or formerly owned, leased or operated properties and properties where the Company disposed of, or arranged for the disposal of, waste.

The Company is currently monitoring or remediating contamination at a number of its facilities and at third party waste disposal sites pursuant to environmental laws and regulations and indemnification agreements. The Company cannot predict with certainty the sites for which it may be responsible, the amount of resulting cleanup obligations that may be imposed on it or the amount and timing of future expenditures related to environmental remediation because of the difficulty of estimating cleanup costs and the uncertainty of payment by other potentially responsible parties.

Costs and obligations also can arise from claims for toxic torts and natural resource damages or from releases of hazardous materials on other properties as a result of ongoing operations or disposal of waste. Compliance with amended, new or more stringently enforced existing environmental requirements, or the future discovery of contamination, may require material unbudgeted expenditures. These costs or expenditures could have a material adverse effect on the Company's business, financial condition, results of operations or cash flows, particularly if such costs or expenditures are not fully recoverable from insurance or through the rates charged to customers or if they exceed any amounts that have been reserved.

Terrorist attacks, such as the attacks that occurred on September 11, 2001, have resulted in increased costs, and the consequences of the War on Terror and the Iraq conflict may adversely impact the Company's results of operations.

The impact that terrorist attacks, such as the attacks of September 11, 2001, may have on the energy industry in general, and on the Company in particular, is not known at this time. Uncertainty surrounding military activity may affect the Company's operations in unpredictable ways, including disruptions of fuel supplies and markets and the possibility that infrastructure facilities, including pipelines, LNG facilities, gathering facilities and processing plants,

Table of Contents

could be direct targets of, or indirect casualties of, an act of terror or a retaliatory strike. The Company may have to incur significant additional costs in the future to safeguard its physical assets.

Federal, state and local jurisdictions may challenge the Company's tax return positions

The positions taken by the Company in its tax return filings require significant judgment, use of estimates, and the interpretation and application of complex tax laws. Significant judgment is also required in assessing the timing and amounts of deductible and taxable items. Despite management's belief that the Company's tax return positions are fully supportable, certain positions may be successfully challenged by federal, state and local jurisdictions.

The success of the pipeline and gathering and processing businesses depends, in part, on factors beyond the Company's control.

Third parties own most of the natural gas transported and stored through the pipeline systems operated by Panhandle and Florida Gas. Additionally, third parties produce all the natural gas or NGLs gathered and processed by SUGS. As a result, the volume of natural gas transported, stored, gathered or processed depends on the actions of those third parties and is beyond the Company's control. Further, other factors beyond the Company's control may unfavorably impact its ability to maintain or increase current transmission, storage, gathering or processing rates, to renegotiate existing contracts as they expire or to remarket unsubscribed capacity.
