The success of the pipeline and gathering and processing businesses depends on the continued development of additional natural gas reserves in the vicinity of their facilities and their ability to access additional reserves to offset the natural decline from existing wells connected to their systems.

The amount of revenue generated by Panhandle and Florida Gas ultimately depends upon their access to reserves of available natural gas. Additionally, the amount of revenue generated by SUGS depends substantially upon the volume of natural gas or NGLs gathered and processed. As the reserves available through the supply basins connected to these systems naturally decline, a decrease in development or production activity could cause a decrease in the volume of natural gas available for transmission, gathering or processing. Investments by third parties in the development of new natural gas reserves connected to the Company's facilities depend on many factors beyond the Company's control.

The pipeline and gathering and processing business revenues are generated under contracts that must be renegotiated periodically.

The revenues of Panhandle, Florida Gas and SUGS are generated under contracts that expire periodically. Although the Company will actively pursue the renegotiation, extension and/or replacement of all of its contracts, it cannot assure that it will be able to extend or replace these contracts when they expire or that the terms of any renegotiated contracts will be as favorable as the existing contracts. If the Company is unable to renew, extend or replace these contracts, or if the Company renews them on less favorable terms, it may suffer a material reduction in revenues and earnings.

The expansion of the Company's pipeline and gathering and processing systems by constructing new facilities subjects the Company to construction and other risks that may adversely affect the financial results of the pipeline and gathering and processing businesses.

During 2007, the domestic energy industry experienced an unprecedented level of expansion activity, including new natural gas and LNG pipelines and compression infrastructure projects. This level of activity is expected to continue for a period of three to four years. As a result, requirements for material, equipment and construction resources are straining supply and causing significant industry-wide cost increases. While the Company's project cost estimates include provisions for cost escalation, future costs are uncertain. Further, the Company's construction productivity was adversely affected in 2007 by contractor employee turnover and shortages of experienced contractor staff, as well as other factors beyond the Company's control, such as weather conditions. These factors may continue to affect ultimate cost and timing of the Company's expansion projects through the current construction boom-cycle.

Table of Contents

RISKS THAT RELATE TO THE COMPANY'S TRANSPORTATION AND STORAGE BUSINESS

The Company's transportation and storage business is highly regulated.

The Company's transportation and storage business is subject to regulation by federal, state and local regulatory authorities. FERC, the U.S. Department of Transportation and various state and local regulatory agencies regulate the interstate pipeline business. In particular, FERC regulates services provided and rates charged by Panhandle and Florida Gas. In addition, the U.S. Coast Guard has oversight over certain issues related to the importation of LNG.

The Company's rates and operations are subject to regulation by federal regulators as well as the actions of Congress and state legislatures and, in some respects, state regulators. The Company cannot predict or control what effect future actions of regulatory agencies may have on its business or its access to the capital markets. Furthermore, the nature and degree of regulation of natural gas companies has changed significantly during the past 25 years and there is no assurance that further substantial changes will not occur or that existing policies and rules will not be applied in a new or different manner.

Should new regulatory requirements regarding the security of its pipeline system or new accounting requirements for certain entities be imposed, the Company could be subject to additional costs that could adversely affect its business, financial condition or results of operations if these costs are deemed unrecoverable in rates.

The pipeline businesses are subject to competition.

The interstate pipeline businesses of Panhandle and Florida Gas compete with those of other interstate and intrastate pipeline companies in the transportation and storage of natural gas. The principal elements of competition among pipelines are rates, terms of service and the flexibility and reliability of service. Natural gas competes with other forms of energy available to the Company's customers and end-users, including electricity, coal and fuel oils. The primary competitive factor is price. Changes in the availability or price of natural gas and other forms of energy, the level of business activity, conservation, legislation and governmental regulations, the capability to convert to alternate fuels and other factors, including weather and natural gas storage levels, affect the demand for natural gas in the areas served by Panhandle and Florida Gas.

Substantial risks are involved in operating a natural gas pipeline system.

Numerous operational risks are associated with the operation of a complex pipeline system. These include adverse weather conditions, accidents, the breakdown or failure of equipment or processes, the performance of pipeline facilities below expected levels of capacity and efficiency, the collision of equipment with pipeline facilities (such as may occur if a third party were to perform excavation or construction work near the facilities) and other catastrophic events beyond the Company's control. In particular, the Company's pipeline system, especially those portions that are located offshore, may be subject to adverse weather conditions including hurricanes, earthquakes, tornadoes, extreme temperatures and other natural phenomena, making it more difficult for the Company to realize the historic rates of return associated with these assets and operations. It is also possible that infrastructure facilities could be direct targets or indirect casualties of an act of terror. A casualty occurrence might result in injury or loss of life, extensive property damage or environmental damage. Insurance proceeds may be inadequate to cover all liabilities or expenses incurred or revenues lost.

Fluctuations in energy commodity prices could adversely affect the pipeline businesses.

If natural gas prices in the supply basins connected to the pipeline systems of Panhandle and Florida Gas are higher than prices in other natural gas producing regions, especially Canada, the volume of gas transported by the Company may be negatively impacted.

Table of Contents

The pipeline businesses are dependent on a small number of customers for a significant percentage of their sales.

Panhandle's top three customers accounted for 48 percent of its 2007 revenue. Florida Gas' top two customers accounted for 56 percent of its 2007 revenue. The loss of any one or more of these customers could have a material adverse effect on the Company's business, financial condition, results of operations or cash flows.

The Company is exposed to the credit risk of its transportation and storage customers in the ordinary course of business.

Transportation service contracts obligate customers to pay charges for reservation of capacity, or reservation charges, regardless of whether they transport natural gas on the pipeline system. As a result, the Company's profitability will depend upon the continued financial performance and creditworthiness of its customers rather than just upon the amount of capacity provided under service contracts.

Generally, customers are rated investment grade or, as permitted by the Company's tariff, are required to make pre-payments or deposits, or to provide collateral, if their creditworthiness does not meet certain criteria. Nevertheless, the Company cannot predict to what extent future declines in customers' creditworthiness may negatively impact its business.

RISKS THAT RELATE TO THE COMPANY'S NATURAL GAS GATHERING AND PROCESSING BUSINESS

The Company's natural gas gathering and processing business is unregulated.

Unlike the Company's returns on its regulated transportation and distribution businesses, the natural gas and NGLs gathering and processing operations conducted at SUGS are not regulated and may potentially have a higher level of risk than the Company's regulated operations.

Although SUGS operates in an unregulated market, the business is subject to certain regulatory risks, most notably environmental and safety regulations. Moreover, the Company cannot predict when additional legislation or regulation might affect the gathering and processing industry, nor the impact of any such changes on the Company's business, financial position, results of operations or cash flows.

The Company's natural gas gathering and processing business is subject to competition.

The natural gas gathering and processing industry is expected to remain highly competitive. Most customers of SUGS have access to more than one gathering and/or processing system. The Company's ability to compete depends on a number of factors, including the infrastructure and contracting strategy of competitors in the Company's gathering region; the efficiency, quality and reliability of the Company's system; and the Company's ability to maintain a reliable low-cost pipeline operating system.

In addition to SUGS' current competitive position in the natural gas gathering and processing industry, its business is subject to pricing risks associated with changes in the supply of, and the demand for, natural gas and NGL byproducts. If natural gas or NGL prices in the supply basins connected to the Company's gathering system are comparatively higher than prices in other natural gas producing regions, the volume of gas that SUGS chooses to process may be reduced to maximize returns to the Company. Similarly, since the demand for natural gas or NGLs is primarily a function of commodity prices (including prices for alternative energy sources), customer usage rates, weather, economic conditions and service costs, the volume processed by SUGS may be reduced based on these market conditions on a daily basis after analysis by the Company.

The Company's profit margin in the natural gas gathering and processing business is highly dependent on energy commodity prices.

SUGS' gross margin is largely derived from (a) percentage of proceeds arrangements based on the volume of gas gathered and/or NGLs processed through its facilities or (b) specified fee arrangements for a range of services provided. Under percent-of-proceeds arrangements, SUGS generally gathers and processes natural gas from producers for an agreed percentage of the proceeds from the sales of the resulting residue gas and

Table of Contents

NGLs. The percent-of-proceeds arrangements, in particular, expose SUGS' revenues and cash flows to risks associated with the fluctuation of the price of natural gas, NGLs, crude oil and their relationship to each other.

The markets and prices for natural gas and NGLs depend upon factors beyond our control. These factors include demand for these commodities, which fluctuate with changes in market and economic conditions and other factors, including:

- the impact of seasonality and weather;
- general economic conditions;
- the level of domestic crude oil and natural gas production and consumption;
- the availability of imported natural gas, NGLs and crude oil;
- actions taken by foreign oil and gas producing nations;
- the availability of local, intrastate and interstate transportation systems;
- the availability of natural gas liquids transportation and fractionation capacity;
- the availability and marketing of competitive fuels;
- the impact of energy conservation efforts; and
- the extent of governmental regulation and taxation.

The Company employs various derivative financial instruments to manage commodity price risk. The Company uses a combination of fixed price physical forward contracts, exchange-traded futures and options and fixed for floating index and basis swaps to manage commodity price risk. These derivative financial instruments allow the Company to preserve value and protect margins because changes in the value of the derivative financial instruments are effective in offsetting changes in the physical market and reducing basis risk. However, these financial derivative instrument contracts do not entirely eliminate pricing risks and, to the extent certain elements of these financial derivative instruments are speculative in nature, may expose the Company to losses or unprotected margins and value diminution. Moreover, the Company is subject to other risks including un-hedged commodity price changes, market supply shortages and customer defaults. For information related to derivative financial instruments, see *Item 8. Financial Statements and Supplementary Data – Note 11 Derivative Instruments and Hedging Activities – Gathering and Processing Segment*.

Operational risks are involved in operating a natural gas gathering and processing business.

Numerous operational risks are associated with the operation of a natural gas gathering and processing business. These include adverse weather conditions, accidents, the breakdown or failure of equipment or processes, the performance of processing facilities below expected levels of capacity or efficiency, the collision of equipment with facilities and catastrophic events such as explosions, fires, earthquakes, floods, landslides, tornadoes, lightning or other similar events beyond the Company's control. It is also possible that infrastructure facilities could be direct targets or indirect casualties of an act of terror. A casualty occurrence might result in injury or loss of life, extensive property damage or environmental damage. Insurance proceeds may be inadequate to cover all liabilities or expenses incurred or revenues lost.

The Company's natural gas gathering and processing business accepts some credit risk in dealing with customers.

SUGS derives its revenues from customers engaged primarily in the natural gas and utilities industries and extends payment credit to these customers. SUGS' accounts receivable primarily consist of mid- to large-size domestic customers with credit ratings of investment grade or better. Moreover, SUGS maintains trading relationships with counterparties that include reputable U.S. broker-dealers and other financial institutions and evaluates the ability of each counterparty to perform under the terms of the derivative agreements. Nevertheless, the Company cannot predict to what extent future declines in customers' creditworthiness may negatively impact its business.

The inability to continue to access independently owned and publicly owned lands could adversely affect the Company's ability to operate and/or expand its natural gas gathering and processing business.

SUGS' ability to operate within its operating region will depend on its success in maintaining existing rights-of-way and obtaining new rights-of-way. Securing additional rights-of-way is also critical to SUGS' ability to pursue expansion projects. SUGS cannot assure that it will be able to acquire new rights-of-way or maintain access to existing rights-of-way upon the expiration of the current grants. The Company's financial position could be adversely affected if the costs of new or extended rights-of-way grants exceed the margin within a gathering region.

RISKS THAT RELATE TO THE COMPANY'S DISTRIBUTION BUSINESS

The distribution business is highly regulated and the Company's revenues, operating results and financial condition may fluctuate with the distribution business' ability to achieve timely and effective rate relief from state regulators.

The Company's distribution business is subject to regulation by the MPSC and the MDPU. These authorities regulate many aspects of the

Company's distribution operations, including construction and maintenance of facilities, operations, safety, the rates that can be charged to customers and the maximum rates of return that the Company is allowed to realize. The ability to obtain rate increases and rate supplements to maintain the current rate of return depends upon regulatory discretion.

Table of Contents

The distribution business is influenced by fluctuations in costs, including operating costs such as insurance, postretirement and other benefit costs, wages, changes in the provision for the allowance for doubtful accounts associated with volatile natural gas costs and other operating costs. The profitability of regulated operations depends on the business' ability to pass through to its customers costs related to providing them service. To the extent that such operating costs increase in an amount greater than that for which rate recovery is allowed, this differential could impact operating results until the business files for and is allowed an increase in rates. The lag between an increase in costs and the rate relief obtained from the regulators can have a direct negative impact on operating results. As with any request for an increase in rates in a regulatory filing, once granted, the rate increase may not be adequate. In addition, regulators may prevent the business from passing along some costs in the form of higher rates.

The distribution business' operating results and liquidity needs are seasonal in nature and may fluctuate based on weather conditions and natural gas prices.

The gas distribution business is a seasonal business and is subject to weather conditions. The utilities' operations have historically been sensitive to weather and are seasonal in nature, with a significant percentage of annual operating revenues and EBIT occurring in the traditional winter heating season in the first and fourth calendar quarters. However, the MPSC approved distribution rates effective April 3, 2007 for Missouri Gas Energy's residential customers (which comprise approximately 87 percent of its total customers and approximately 67 percent of its operating revenues) that eliminate the impact of weather and conservation for residential margin revenues and related earnings in Missouri.

The business is also subject to seasonal and other variations in working capital due to changes in natural gas prices and the fact that customers pay for the natural gas delivered to them after they use it, whereas the business is required to pay for the natural gas before delivery. As a result, fluctuations in weather between years may have a significant effect on results of operations and cash flows. In years with warm winters, revenues may be adversely affected.

Operational risks are involved in operating a natural gas distribution business.

Numerous risks are associated with the operations of a natural gas distribution business. These include adverse weather conditions, accidents, the breakdown or failure of equipment or processes, the performance of suppliers' processing facilities below expected levels of capacity or efficiency, the collision of equipment with facilities and catastrophic events such as explosions, fires, earthquakes, floods, landslides, tornadoes, lightning or other similar events beyond the Company's control. It is also possible that infrastructure facilities could be direct targets or indirect casualties of an act of terror. A casualty occurrence might result in injury or loss of life, extensive property damage or environmental damage. Insurance proceeds may be inadequate to cover all liabilities or expenses incurred or revenues lost.

CAUTIONARY FACTORS THAT MAY AFFECT FUTURE RESULTS

The disclosure and analysis in this Form 10-K contains forward-looking statements that set forth anticipated results based on management's plans and assumptions. From time to time, Southern Union also provides forward-looking statements in other materials it releases to the public as well as oral forward-looking statements. Such statements give the Company's current expectations or forecasts of future events; they do not relate strictly to historical or current facts. Southern Union has tried, wherever possible, to identify such statements by using words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "will" and similar expressions in connection with any discussion of future operating or financial performance. In particular, these include statements relating to future actions, future performance or results of current and anticipated services, expenses, interest rates, the outcome of contingencies, such as legal proceedings, and financial results.

Southern Union cannot guarantee that any forward-looking statement will be realized, although management believes that the Company has been prudent in its plans and assumptions. Achievement of future results is subject to risks, uncertainties and potentially inaccurate assumptions. If known or unknown risks or uncertainties should materialize, or if underlying assumptions should prove inaccurate, actual results could differ materially from past results and those anticipated, estimated or projected. Readers should bear this in mind as they consider forward-looking statements.

Table of Contents

Southern Union undertakes no obligation to update publicly forward-looking statements, whether as a result of new information, future events or otherwise. Readers are advised, however, to consult any further disclosures the Company makes on related subjects in its Form 10-K, Form 10-Q and Form 8-K reports to the SEC. Also note that Southern Union provides the following cautionary discussion of risks, uncertainties and possibly inaccurate assumptions relevant to its businesses. These are factors that, individually or in the aggregate, management believes could cause the Company's actual results to differ materially from expected and historical results. Southern Union notes these factors for investors as permitted by the Private Securities Litigation Reform Act of 1995. Readers should understand that it is not possible to predict or identify all such factors. Consequently, readers should not consider the following to be a complete discussion of all potential risks or uncertainties.

Factors that could cause actual results to differ materially from those expressed in the Company's forward-looking statements include, but are not limited to, the following:

- changes in demand for natural gas by the Company's customers, the composition of the Company's customer base and in the sources of natural gas available to the Company;
- the effects of inflation and the timing and extent of changes in the prices and overall demand for and availability of natural gas or natural gas liquid products as well as electricity, oil, coal and other bulk materials and chemicals;
- adverse weather conditions, such as warmer than normal weather in the Company's service territories, and the operational impact of natural disasters;
- changes in laws or regulations, third-party relations and approvals, decisions of courts, regulators and governmental bodies affecting or involving Southern Union, including deregulation initiatives and the impact of rate and tariff proceedings before FERC and various state regulatory commissions;
- the speed and degree to which additional competition is introduced to Southern Union's business and the resulting effect on revenues;
- the outcome of pending and future litigation;
- the Company's ability to comply with or to challenge successfully existing or new environmental regulations;
- unanticipated environmental liabilities;
- The Company's increased exposure to highly competitive commodity businesses through its Gathering and Processing segment;
- the Company's ability to acquire new businesses and assets and integrate those operations into its existing operations, as well as its ability to expand its existing businesses and facilities;
- the Company's ability to control costs successfully and achieve operating efficiencies, including the purchase and implementation of new technologies for achieving such efficiencies;
- the impact of factors affecting operations such as maintenance or repairs, environmental incidents, gas pipeline system constraints and relations with labor unions representing bargaining-unit employees;
- exposure to customer concentration with a significant portion of revenues realized from a relatively small number of customers and any credit risks associated with the financial position of those customers;
- changes in the ratings of the debt securities of Southern Union or any of its subsidiaries;
- changes in interest rates and other general capital markets conditions, and in the Company's ability to continue to access the capital markets;
- acts of nature, sabotage, terrorism or other acts causing damage greater than the Company's insurance coverage limits;
- market risks beyond the Company's control affecting its risk management activities including market liquidity, commodity price volatility and counterparty creditworthiness; and
- other risks and unforeseen events.

MARKET INFORMATION

Southern Union's common stock is traded on the New York Stock Exchange under the symbol "SUG." The high and low sales prices for shares of Southern Union common stock and the cash dividends per share declared in each quarter since January 1, 2006 are set forth below:

	Dollars per share		
	High	**Low**	**Dividends**
(Quarter Ended)			
December 31, 2007	$ 33.01	$ 28.46	$ 0.15
September 30, 2007	35.05	27.20	0.10
June 30, 2007	35.50	30.35	0.10
March 31, 2007	30.50	26.81	0.10
(Quarter Ended)			
December 31, 2006	$ 29.76	$ 26.19	$ 0.10
September 30, 2006	27.75	25.83	0.10
June 30, 2006	27.22	22.76	0.10
March 31, 2006	25.55	22.90	0.10

Provisions in certain of Southern Union's long-term debt and bank credit facilities limit the issuance of dividends on capital stock. Under the most restrictive provisions in effect, Southern Union may not declare or issue any dividends on its common stock or acquire or retire any of Southern Union's common stock, unless no event of default exists and the Company meets certain financial ratio requirements, which presently are met. Southern Union's ability to pay cash dividends may be limited by debt restrictions at Panhandle and Citrus that could limit Southern Union's access to funds from Panhandle and Citrus for debt service or dividends. See *Item 8. Financial Statements and Supplementary Data, Note 13 – Debt Obligations*.

Table of Contents

COMMON STOCK PERFORMANCE GRAPH

The following performance graph compares the performance of Southern Union's common stock to the Standard & Poor's 500 Stock Index (*S&P 500 Index*) and the Bloomberg U.S. Pipeline Index. The comparison assumes $100 was invested on December 31, 2002 in Southern Union common stock, the S&P 500 Index and in the Bloomberg U.S. Pipeline Index. Each case assumes reinvestment of dividends.

	2002	2003	2004	2005	2006	2007
Southern Union	100	117	160	166	199	212
S&P 500 Index	100	129	143	150	173	183
Bloomberg U.S. Pipeline Index	100	164	209	270	305	353

The following companies are included in the Bloomberg U.S. Pipeline Index used in the graph: El Paso Corp., Enbridge, Inc., Equitable Resources, Inc., ONEOK, Inc., Questar Corp., Spectra Energy Corp., TransCanada Corp., and Williams Cos, Inc.

HOLDERS

As of February 22, 2008, there were 5,996 holders of record of Southern Union's common stock, and 123,772,513 shares of Southern Union's common stock were issued and outstanding. The holders of record do not include persons whose shares are held of record by a bank, brokerage house or clearing agency, but do include any such bank, brokerage house or clearing agency that is a holder of record.

Table of Contents

EQUITY COMPENSATION PLANS

Equity compensation plans approved by stockholders include the Southern Union Company Second Amended and Restated 2003 Stock and Incentive Plan and the 1992 Long-Term Stock Incentive Plan (*1992 Plan*). While Southern Union options are still outstanding under the 1992 Plan, the 1992 Plan expired on July 1, 2002 and no shares are available for future grant thereunder. Under both plans, stock options are issued having an exercise price equal to the fair market value of the common stock on the date of grant and typically vest ratably over three, four or five years.

The following table sets forth the number of outstanding options and stock appreciation rights (*SARs*), the weighted-average exercise price of outstanding options and the number of shares remaining available for issuance as of December 31, 2007:

Plan Category	Number of Securities to Be issued Upon Exercise of Outstanding Options/SARs		Weighted-Average Exercise Price of Outstanding Options/SARs	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans
Plans approved by stockholders	2,076,836	(1)	$22.87	6,304,479

(1) Excludes 201,170 shares of restricted stock that were outstanding at December 31, 2007.

(1) Includes the impact of significant acquisitions and sales of assets. See *Item 8. Financial Statements and Supplementary Data, Note 3 – Acquisitions and Sales* and *Item 8. Financial Statements and Supplementary Data, Note 19 – Discontinued Operations* for information related to the acquisitions and sales.

(2) The Company's investment in CCE Holdings, which was accounted for using the equity method, was included in the Company's Consolidated Balance Sheet at December 31, 2004. The Company's share of net income from CCE Holdings was recorded as *Earnings from unconsolidated investments* in the Company's Consolidated Statement of Operations since its acquisition on November 17, 2004. For these reasons, the Consolidated Statement of Operations for the periods subsequent to such acquisition is not comparable to the year of acquisition.

(3) Panhandle was acquired on June 11, 2003 and was accounted for as a purchase. The Panhandle assets were included in the Company's Consolidated Balance Sheet at June 30, 2003 and its results of operations have been included in the Company's Consolidated Statement of Operations since its acquisition on June 11, 2003. For these reasons, the Consolidated Statement of Operations for the periods subsequent to such acquisition is not comparable to the year of acquisition.

(4) Net earnings from continuing operations are net of dividends on preferred stock of $17.4 million, $17.4 million, $17.4 million, $8.7 million and $12.7 million for the years ended December 31, 2007, 2006 and 2005, the six months ended December 31, 2004 and the year ended June 30, 2004, respectively. For additional related information, see *Item 8. Financial Statements and Supplementary Data, Note12 – Preferred Securities.*

(5) On August 24, 2006, the Company completed the sales of the assets of its PG Energy natural gas distribution division to UGI Corporation and the Rhode Island operations of its New England Gas Company natural gas distribution division to National Grid USA. On January 1, 2003, ONEOK acquired the Company's Southern Union Gas natural gas operating division and related assets. These dispositions were accounted for as discontinued operations in the Consolidated Statement of Operations. For

additional related information, see *Item 8. Financial Statements and Supplementary Data, Note 19 – Discontinued Operations.*

(6) Earnings per share for all periods presented were computed based on the weighted average number of shares of common stock and common stock equivalents outstanding during the period, adjusted for the five percent stock dividends distributed on September 1, 2005, August 31, 2004, July 31, 2003 and July 15, 2002.

(7) No cash dividends on common stock were paid during the reporting periods prior to 2006. See *Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities* and *Item 8. Financial Statements and Supplementary Data, Note 10 – Stockholders' Equity – Dividends*.

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

INTRODUCTION

This Management's Discussion and Analysis of Financial Condition and Results of Operations is provided as a supplement to the accompanying consolidated financial statements and notes to help provide an understanding of Southern Union's financial condition, changes in financial condition and results of operations. The following section includes an overview of the Company's business as well as recent developments that the Company believes are important in understanding its results of operations, and to anticipate future trends in those operations. Subsequent sections include an analysis of the Company's results of operations on a consolidated basis and on a segment basis for each reportable segment, and information relating to the Company's liquidity and capital resources, quantitative and qualitative disclosures about market risk and other matters.

The Company's business purpose is to provide gathering, processing, transportation, storage and distribution of natural gas and NGLs in a safe, efficient and dependable manner. The Company's reportable business segments are determined based on the way internal managerial reporting presents the results of the Company's various businesses to its executive management for use in determining the performance of the businesses and in allocating resources to the businesses as well as based on similarities in economic characteristics, products and services, types of customers, methods of distribution and regulatory environment. The Company operates in three reportable segments.

BUSINESS STRATEGY

The Company's strategy is focused on achieving profitable growth and enhancing stockholder value. The Company seeks to balance its entrepreneurial focus with respect to maximizing cash and capital appreciation return to shareholders with preservation of its investment grade credit ratings. The key elements of its strategy include the following:

- *Expanding through development of the Company's existing businesses.* The Company will continue to pursue growth opportunities through the expansion of its existing asset base, while maintaining its focus on providing safe and reliable service to its customers. In each of its business segments, the Company identifies opportunities for organic growth through incremental volumes and system enhancements to generate operating efficiencies. In its interstate transmission and distribution businesses, the Company seeks rate increases and/or improved rate design as appropriate to achieve a fair return on its investment. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources – Investing Activities* for information related to the Company's principal capital expenditure projects. *See Item 8. Financial Statements and Supplementary Data, Note 16 – Regulation and Rates* for information related to ratemaking activities.

- *New initiatives.* The Company regularly assesses strategies to enhance stockholder value, including diversification of earning sources through strategic acquisitions or joint ventures in the diversified natural gas industry.

- *Disciplined capital expenditures and cost containment programs.* The Company will continue to focus on system optimization and cost savings while making prudent capital expenditures across its base of energy infrastructure assets.

Table of Contents

RESULTS OF OPERATIONS

Overview

The Company believes that its completed and ongoing expansion of Panhandle's asset base, its acquisition of Sid Richardson Energy Services on March 1, 2006, its investment in CCE Holdings on November 17, 2004 and the related CCE Holdings redemption transaction with Energy Transfer more fully described below, and the sale of the assets of its PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division represent significant steps undertaken by the Company in its transformation into a higher return business with significant growth opportunities.

The Company evaluates operational and financial segment performance using several factors, of which the primary financial measure is EBIT, which is a non-GAAP measure. The Company defines EBIT as *Net earnings available for common stockholders*, adjusted for the following:

- items that do not impact net earnings from continuing operations, such as extraordinary items, discontinued operations and the impact of changes in accounting principles;
- income taxes;
- interest; and
- dividends on preferred stock.

EBIT may not be comparable to measures used by other companies and should be considered in conjunction with net earnings and other performance measures such as operating income or operating cash flow.

The following table provides a reconciliation of EBIT (by segment) to *Net earnings available for common stockholders*.

	Years Ended December 31,		
	2007	2006	2005
		(In thousands)	
EBIT:			
Transportation and storage segment	$ 391,029	$ 417,536	$ 281,344
Gathering and processing segment	65,368	62,630	-
Distribution segment	70,568	41,883	61,698
Corporate and other	151	14,324	(11,424)
Total EBIT	527,116	536,373	331,618
Interest expense	203,146	210,043	128,470
Earnings from continuing operations before income taxes	323,970	326,330	203,148
Federal and state income taxes	95,259	109,247	50,052
Earnings from continuing operations	228,711	217,083	153,096
Discontinued operations:			
Loss from discontinued operations before income taxes	-	(2,369)	(111,588)
Federal and state income taxes	-	150,583	20,825
Loss from discontinued operations	-	(152,952)	(132,413)
Preferred stock dividends	17,365	17,365	17,365
Net earnings available for common stockholders	$ 211,346	$ 46,766	$ 3,318

Year ended December 31, 2007 versus the year ended December 31, 2006. The Company's $164.6 million increase in *Net earnings available for common stockholders* was primarily due to:

- Impact of the $153 million loss from discontinued operations in the 2006 period associated with the August 2006 sales of the assets of the Company's PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division;

Table of Contents

- Higher EBIT contributions of $28.7 million from the Distribution segment primarily due to higher net operating revenue resulting from the Missouri Gas Energy rate increase effective April 3, 2007 eliminating the impact of weather and conservation for residential margin revenues;
- Lower interest expense of $6.9 million primarily due to the retirement of debt in 2006 associated with the bridge loan facility entered into to finance the acquisition of the Sid Richardson Energy Services business, partially offset by increased interest expense related to the $600 million Junior Subordinated Notes issued in October 2006 and higher interest expense on Panhandle debt primarily due to higher debt balances; and
- Lower income tax expense from continuing operations of $14 million primarily due to the lower federal and state effective income tax rate (*EITR*) of 29 percent in the 2007 period versus 33 percent in the 2006 period primarily due to the tax benefit associated with the increase in the dividends received deduction as a result of increased dividends from the Company's unconsolidated investment in Citrus.

These earnings improvements were partially offset by:

- Lower EBIT contributions of $26.5 million from the Transportation and Storage segment largely due to the gain on CCE Holdings' exchange of Transwestern in 2006, partially offset by higher LNG terminalling revenue associated with the Trunkline LNG Phase I and Phase II expansions completed in April 2006 and July 2006, respectively, higher pipeline reservation revenues driven by higher average rates on contracts, higher parking revenues and higher equity earnings from Citrus resulting from the Company's increased equity ownership in Citrus from 25 percent to 50 percent effective December 1, 2006; and
- Impact of the pre-acquisition pre-tax mark-to-market gain of $37.2 million in the 2006 period on the put options associated with the acquisition of the Sid Richardson Energy Services business, partially offset by $12.8 million of executive bonus compensation awarded and paid in 2006.

Year ended December 31, 2006 versus the year ended December 31, 2005. The Company's $43.4 million increase in earnings was primarily attributable to improved earnings from Panhandle largely due to higher LNG terminalling revenue resulting from the LNG terminal enhancement construction projects completed during 2006, the earnings contribution from SUGS, which was acquired on March 1, 2006, and increased equity earnings primarily due to the gain on CCE Holdings' exchange of Transwestern, partially offset by higher interest expense, most of which was related to debt and debt issuance costs associated with the SUGS acquisition, and losses and taxes associated with the sales of the assets of the Company's PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division.

Business Segment Results

Transportation and Storage Segment. The Transportation and Storage segment is primarily engaged in the interstate transportation and storage of natural gas in the Midwest and from the Gulf Coast to Florida, and LNG terminalling and regasification services. Prior to the completion of the Redemption Agreement on December 1, 2006, the Transportation and Storage segment also provided service to the Southwest region through its interests in Transwestern. The Transportation and Storage segment's operations, now conducted through Panhandle and Florida Gas, are regulated as to rates and other matters by FERC. Demand for gas transmission on Panhandle's pipeline systems is seasonal, with the highest throughput and a higher portion of annual total operating revenues and EBIT occurring in the traditional winter heating season in the first and fourth calendar quarters. Florida Gas' pipeline system experiences the highest throughput in the summer period due to gas-fired generation loads in the second and third calendar quarters.

Historically, much of the Transportation and Storage segment's business was conducted through long-term contracts with customers. Over the past decade, some customers within the segment have shifted to shorter term transportation services contracts. This overall shift, which can increase the volatility of revenues, is primarily due to changes in market conditions and competition with other pipelines, changing supply sources and volatility in natural gas prices. Average reservation revenue rates realized by the Company are dependent on certain factors, including but not limited to rate regulation, customer demand for reserved capacity, capacity sold levels for a given period and, in some cases, utilization of capacity. Commodity revenues, which are more short-term sensitive in nature, are dependent upon a number of variable factors including weather, storage levels, and customer demand for firm, interruptible and parking services. The majority of the Transportation and Storage segment revenues are related to firm capacity reservation charges. For additional information related to Transportation and Storage segment risk factors and the weighted average remaining lives of firm transportation and storage contracts, see *Item 1A. Risk Factors – Risks that Relate to the Company's Transportation and*

Table of Contents

Storage Segment, and *Item 1. Business – Business Segments – Transportation and Storage Segment*, respectively.

The Company's regulated transportation and storage businesses periodically file for changes in their rates, which are subject to approval by FERC. Changes in rates and other tariff provisions resulting from these regulatory proceedings have the potential to negatively impact the Company's results of operations and financial condition. For information related to the status of current rate filings, see *Item 1. Business – Business Segments – Transportation and Storage Segment.*

The following table illustrates the results of operations applicable to the Company's Transportation and Storage segment for the periods presented:

	Years Ended December 31,		
Transportation and Storage Segment	**2007**	**2006**	**2005**
		(In thousands)	
Operating revenues	$ 658,446	$ 577,182	$ 505,233
Operating expenses	252,903	206,181	204,711
Depreciation and amortization	85,641	72,724	62,171
Taxes other than on income and revenues	29,699	25,405	28,196
Total operating income	290,203	272,872	210,155
Earnings from unconsolidated investments	99,222	141,310	70,618
Other income, net	1,604	3,354	571
EBIT	$ 391,029	$ 417,536	$ 281,344
Operating information:			
Panhandle natural gas volumes transported (in trillion British thermal units (TBtu))	1,454	1,180	1,214
CCE Holdings natural gas volumes transported (TBtu) (1)			
Florida Gas	751	737	699
Transwestern	-	572	589

(1) Represents 100 percent of Florida Gas and Transwestern natural gas volumes transported versus the Company's effective equity ownership interests. The Company's effective equity ownership interests in Florida Gas and Transwestern were 25 percent and 50 percent, respectively, until December 1, 2006, when the Company's indirect interest in Transwestern was transferred to Energy Transfer, increasing the Company's effective indirect ownership interest in Florida Gas to 50 percent.

See *Item 1. Business – Business Segments – Transportation and Storage Segment* for additional related operational and statistical information associated with the Transportation and Storage segment.

Year ended December 31, 2007 versus the year ended December 31, 2006. The $26.5 million EBIT reduction in the year ended December 31, 2007 versus the same period in 2006 was primarily due to lower equity earnings from unconsolidated investments of $42.1 million, now primarily consisting of the Company's investment in Citrus, offset by improved contributions from Panhandle totaling $15.6 million.

Panhandle's $15.6 million EBIT increase was primarily related to the following items:

- Higher operating revenues of $81.3 million as the result of:
  - Increased transportation and storage revenue of $59.8 million attributable to:
    - o Higher transportation reservation revenues of $27.4 million primarily due to reduced discounting resulting in higher average rates realized on contracts driven by higher customer demand and utilization of contract capacity;
    - o Higher parking revenues of $18 million resulting from customer demand for parking services and market conditions;
    - o Higher storage revenues of $7.8 million due to increased contracted capacity; and

Table of Contents

- o Higher other commodity revenues of $6.5 million due to higher throughput volumes including transportation of higher LNG volumes on Trunkline, higher volumes on Sea Robin due to adverse hurricane impacts on 2006 throughput, and higher throughput on Panhandle due to storage refill activity.
- A $23.6 million increase in LNG terminalling revenue based on a capacity increase on the BG LNG Services contract as a result of the Trunkline LNG Phase I and Phase II expansions, which were placed in service in April 2006 and July 2006, respectively, as well as higher volumes resulting from an increase in LNG cargoes; and
- A decrease in other revenue of $2.2 million primarily due to higher operational sales of gas in 2006.

These increased revenues were offset by:

- Higher operating expenses of $46.7 million as the result of:
  - o A $15.6 million increase in corporate services costs relating to Southern Union's disposition of certain assets during 2006, resulting in a larger allocation of corporate services costs to the remaining business units;
  - o A $13.1 million increase in contract storage costs attributable to an increase in leased capacity;
  - o A $6.2 million increase in LNG power costs resulting from increased cargoes;
  - o A $3.4 million increase in fuel tracker costs primarily due to a net under-recovery in 2007;
  - o A $2.4 million net increase in labor and benefits primarily due to incentive and merit increases; and
  - o A $1.8 million increase in insurance due to higher premiums.
- Increased depreciation and amortization expense of $12.9 million due to a $411.2 million increase in property, plant and equipment placed in service in 2007. Depreciation and amortization expense is expected to continue to increase primarily due to higher capital spending, including compression modernization and other expenditures; and
- Higher taxes other than on income of $4.3 million primarily due to a $2.8 million refund received in 2006 for franchise and sales taxes and higher property and compressor fuel taxes in 2007.

Equity earnings were lower by $42.1 million in 2007 versus 2006 primarily due to the following items, adjusted where applicable to reflect the Company's proportionate equity share:

- $74.8 million nonrecurring gain in 2006 resulting from the transfer of Transwestern to Energy Transfer in December 2006 in connection with the redemption of Energy Transfer's interest in CCE Holdings pursuant to the Redemption Agreement;
- $28 million of earnings in 2006 attributable to Transwestern;
- Higher equity earnings of approximately $42 million from Citrus' core business largely due to the increase in the Company's effective ownership from 25 percent to 50 percent as a result of the transactions under the Redemption Agreement, which closed in December 2006;
- A $7.6 million gain in 2007 related to a reduction in a previously established liability to Enron associated with the Duke lawsuit;
- A gain of $7.5 million recognized by Citrus in 2007 associated with settlement of the Duke lawsuit; and
- A $3.6 million gain in 2007 related to the sale of Enron bankruptcy claim receivables.

The Company's indirect interest in Transwestern was transferred to Energy Transfer in December 2006 in connection with the redemption of Energy Transfer's interest in CCE Holdings pursuant to the Redemption Agreement.

Year ended December 31, 2006 versus the year ended December 31, 2005. The $136.2 million EBIT improvement in the year ended December 31, 2006 versus the same period in 2005 was primarily due to improved contributions from Panhandle totaling $65.5 million and higher equity earnings from the Company's investment in CCE Holdings of $70.7 million, including a $74.8 million non-recurring gain.

Panhandle's $65.5 million EBIT improvement was primarily related to the following items:

- Higher operating revenues of $71.9 million primarily due to:
  - o A $49.3 million increase in LNG terminalling revenue primarily due to expanded vaporization capacity, a base capacity increase on the BG LNG Services contract and higher volumes resulting from an increase in LNG cargoes;

Table of Contents

  - o Increased transportation and storage revenue of $17 million due to higher reservation revenues of $15.6 million, which were primarily driven by higher average rates on contracts, higher parking revenues of $1.6 million and higher storage revenues of $4.7 million due to increased contracted capacity. These increases were partially offset by lower usage revenues of $4.9 million, of which $3.1 million resulted from the 2006 impact on Sea Robin in 2006 of the hurricanes that occurred in the third quarter of 2005 and $1.8 million resulted from lower overall capacity utilization at Trunkline; and
  - o Increased other revenue of $5.7 million primarily due to $3.7 million of non-recurring operational sales of gas in 2006 and $1.1 million of higher liquids revenue.

- Higher operating expenses of $1.5 million primarily due to:
  - o Approximately $3.2 million of higher pipeline integrity assessment costs;
  - o Approximately $1.6 million of higher maintenance project costs;
  - o $1.3 million for 2006 inspections of facilities due to Hurricane Rita;
  - o $2.1 million of higher LNG fuel and electric power tracker costs associated with greater LNG cargo activity;
  - o A $3.8 million nonrecurring adjustment in 2005 for lower vacation accruals due to a change in vacation pay practice; and
  - o Favorable offsetting impact of a $9.7 million decrease in insurance related costs due to accrued losses recorded in 2005 associated with the hurricanes and lower 2006 premiums and a $4.4 million decrease in benefit costs primarily related to lower postretirement benefit expenses including the impact of enactment of Medicare Part D reimbursements and benefit plan changes;
- Increased depreciation and amortization expense of $10.6 million due to an increase in property, plant and equipment placed in service in 2006, including the Trunkline LNG Phase I and Phase II expansions;
- Favorable offsetting impact of decreased taxes other than on income of $2.8 million primarily due to refunds of franchise and sales taxes received in 2006; and
- Favorable offsetting impact of a $2.8 million increase in other income, net primarily due to a gain on sale of certain Trunkline assets in 2006.

Equity earnings were higher by $70.7 million primarily due to:

- A nonrecurring gain of $74.8 million resulting from the transfer of Transwestern pursuant to the Redemption Agreement in 2006;
- Higher earnings from Florida Gas of $5.5 million, $2.8 million of which related to the December 2006 incremental earnings resulting from the Company's additional 25 percent indirect ownership interest in Florida Gas as a result of the transactions under the Redemption Agreement;
- Lower earnings from discontinued operations of $10.6 million (adjusted to reflect the Company's 50 percent share) related to Transwestern primarily due to:
  - o Lower net revenues of $4.8 million primarily related to the $8 million impact of a decrease in transportation volumes associated with the replacement of expired contracts at discounted rates, partially offset by $3.2 million of increased operational gas sales revenue;
  - o Higher operating expense of $5.5 million primarily related to higher system balancing expenses of $3.7 million and $2 million of higher electricity costs due to the addition of San Juan compression;
  - o A decrease of $1.9 million in net earnings attributable to Transwestern because 2006 contained only eleven months versus a full year of operations in 2005 due to the redemption of Transwestern on December 1, 2006; and
  - o Favorable offsetting impact of lower depreciation expense of $2.4 million due to the cessation of depreciation on Transwestern following the execution of the Redemption Agreement with Energy Transfer.

Table of Contents

Gathering and Processing Segment. The Gathering and Processing segment is primarily engaged in connecting wells of natural gas producers to its gathering system, treating natural gas to remove impurities to meet pipeline quality specifications, processing natural gas for the removal of NGLs, and redelivering natural gas and NGLs to a variety of markets. The results of operations provided by SUGS have been included in the Consolidated Statement of Operations since its March 1, 2006 acquisition.

The following table presents the results of operations applicable to the Company's Gathering and Processing segment:

	Years Ended December 31,	
Gathering and Processing Segment	**2007**	**2006 (1)**
Gross margin (2)	$ 210,780	$ 172,152
Operating expenses	84,550	61,428
Depreciation and amortization	59,560	47,321
Taxes other than on income and revenues	2,742	2,156
Total operating income	63,928	61,247
Earnings (loss) from unconsolidated investments	1,300	(188)
Other income, net	140	1,571
EBIT	$ 65,368	$ 62,630
Operating Statistics:		
Volumes		
Avg natural gas processed (MMBtu/d)	426,097	451,675
Avg NGLs produced (gallons/d)	1,337,450	1,423,138
Avg natural gas wellhead (MMBtu/d)	637,794	585,185
Natural gas sales (MMBtu)	105,677,108	113,362,236
NGLs sales (gallons)	469,907,600	421,896,247
Average Pricing		
Realized natural gas ($/MMBtu)	$ 6.26	$ 5.83
Realized NGLs ($/gallon)	1.13	0.97
Natural Gas Daily WAHA ($/MMBtu)	6.35	5.78
Natural Gas Daily El Paso ($/MMBtu)	6.20	5.68
Estimated plant processing spread ($/gallon)	0.55	0.43

(1) Represents results of operations for the period March 1, 2006 (date of acquisition) through December 31, 2006.
(2) Gross margin consists of *Operating revenues* less *Cost of gas and other energy*. The Company believes that this measurement is more meaningful for understanding and analyzing the Gathering and Processing segment's operating results for the periods presented because commodity costs are a significant factor in the determination of the segment's revenues.

Year ended December 31, 2007 versus the year ended December 31, 2006. The $2.7 million EBIT increase for the year ended December 31, 2007 versus the post-acquisition ten-month period ended December 31, 2006 was primarily due to the following items:

- Gross margin was higher by $38.6 million primarily due to:
  - Realization of operating results for the complete twelve-month period in 2007 versus ten months in the 2006 period;
  - Favorable impact of market-driven higher average realized natural gas and NGLs prices of $6.26 per MMBtu and $1.13 per gallon in the 2007 period versus $5.83 per MMBtu and $0.97 per gallon in the 2006 period, respectively; and
  - Higher producer fee revenues of $5 million primarily due to increased volumes from the Atoka producing region associated with the Company's Mi Vida system.

Table of Contents

The favorable gross margin impact was partially offset by unusually high levels of fuel, flare and unaccounted for gas losses in the 2007 period versus the 2006 period primarily attributable to capacity and treating limitations experienced during 2007 at the Jal Plant treating facility;

- Operating expenses were higher by $23.1 million primarily due to:
  - Incurrence of twelve months of activity in the 2007 period versus ten months in the 2006 period;
  - A $4.9 million increase in corporate services costs relating to Southern Union's disposition of certain assets during 2006, resulting in a larger allocation of corporate services costs to the remaining business units; and
  - Increases in operating costs such as employee labor and benefit costs and contractor services costs resulting from competitive forces within the midstream energy industry, as well as higher costs incurred for chemical and lubricant petroleum products used in SUGS' gathering and processing operations;
- Depreciation and amortization expense was higher by $12.2 million primarily due to the incurrence of twelve months of activity in the 2007 period versus ten months in the 2006 period and a $57.5 million increase in property, plant and equipment placed in service in 2007;
- Earnings (loss) from unconsolidated investments increased by $1.5 million primarily due to the Company's proportionate equity share of $463,000 related to a settlement with a producer for damages incurred from sour gas delivered into the Grey Ranch facility and the benefit derived from improved operating efficiencies realized at the Grey Ranch facility; and
- Other income, net decreased by $1.4 million primarily due to approximately $911,000 of lower interest income resulting from higher available cash balances for investment purposes in the 2006 period versus the 2007 period, principally due to the $53.7 million of cash on hand at the March 1, 2006 acquisition date.

To alleviate the treating limitations discussed above related to the Jal Plant, the Company completed construction of an 18-mile, 16-inch high pressure pipeline to utilize existing treating capacity at the Keystone Plant. The pipeline was put into service on June 21, 2007 at an approximate cost of $6.1 million. The Company is exploring other expansion opportunities to provide additional growth capacity and further improve system operating efficiency.

Economic Hedging Activities. The Company realizes NGL and/or natural gas volumes from its contractual arrangements associated with gas processing services it provides. The Company utilizes various economic hedge techniques to manage its price exposure of Company owned volumes, including processing spread puts and natural gas swaps. Expected NGL and/or natural gas volumes compared to the actual volumes sold and the effectiveness of the associated economic hedges utilized by the Company can be unfavorably impacted by:

- Processing plant outages;
- Higher than anticipated FF&U efficiency levels;
- Impact of commodity prices in general;
- Lower than expected recovery of NGLs from the residue gas stream; and
- Lower than expected recovery of natural gas volumes to be processed.

For the purpose of reducing its processing spread exposure, the Company purchased put options for the period February 1, 2008 through December 31, 2008. The put options reduce its processing spread exposure on 11,075 MMBtu/day, or approximately 25 percent of the Company's expected NGLs sales volumes based on 2007 historical processing trends. The put options set a floor for the Company's processing spread at $8.15 per MMBtu for such volumes. The cost of the December 2007 transaction was $5.2 million, or $1.41 per MMBtu.

Additionally, in February 2008, for the period March 1, 2008 through December 31, 2008, the Company entered into various natural gas swaps which have reduced its commodity price exposure related to 30,000 MMBtu/day. The natural gas swaps have effectively established an average fixed index price at locations where we sell natural gas, at the "basis adjusted price" of $8.28 per MMBtu for the related period. The combination of the processing spread put option with an equal MMBtu portion of the natural gas swap effectively establishes a floor of $15.02 per MMBtu for 25 percent of the Company's expected NGL sales volumes as noted above. In February 2008, the Company also entered into natural gas swaps associated with 10,000 MMBtu/day for the period January 1, 2009 through December 31, 2009, fixing the 2009 basis adjusted sales price of such volumes at $8.19 per MMBtu.

For further information related to SUGS' commodity-based put options and non-heding derivative instruments, see *Item 8. Financial Statements and Supplementary Data, Note 11 – Derivative Instruments and Hedging Activities – Gathering and Processing Segment*.

Table of Contents

Distribution Segment. The Distribution segment is primarily engaged in the local distribution of natural gas in Missouri and Massachusetts. The Company's utilities operations are regulated as to rates and other matters by the regulatory commissions of the states in which each operates. For information related to the status of current rate filings relating to the Distribution segment, see *Item 1. Business – Business Segments – Distribution Segment*. The utilities operations have historically been sensitive to weather and are seasonal in nature, with a significant percentage of annual operating revenues and EBIT occurring in the traditional winter heating season in the first and fourth calendar quarters. However, the MPSC approved distribution rates effective April 3, 2007 for Missouri Gas Energy's residential customers (which comprise approximately 87 percent of its total customers and approximately 67 percent of its operating revenues) that eliminate the impact of weather and conservation for residential margin revenues and related earnings in Missouri.

The following table illustrates the results of operations applicable to the Company's Distribution segment for the periods presented:

	Years Ended December 31,		
Distribution Segment	**2007**	**2006**	**2005**
		(In thousands)	
Net operating revenues (1)	$ 222,097	$ 174,584	$ 184,257
Operating expenses	108,788	90,178	87,306
Depreciation and amortization	30,251	30,353	29,447
Taxes other than on income and revenues	10,588	10,040	3,208
Total operating income	72,470	44,013	64,296
Other income (expenses), net	(1,902)	(2,130)	(2,598)
EBIT	$ 70,568	$ 41,883	$ 61,698

(1) Operating revenues for the Distribution segment are reported net of *Cost of gas and other energy* and *Revenue-related taxes*, which are both pass-through costs.

See *Item 1. Business – Business Segments – Distribution Segment* for additional related operational and statistical information related to the Distribution segment.

Year ended December 31, 2007 versus the year ended December 31, 2006. The $28.7 million EBIT improvement in the year ended December 31, 2007 versus the same period in 2006 was primarily due to the following items:

- Net operating revenues increased $47.5 million primarily due to the Missouri Gas Energy $27.2 million annual revenue rate increase effective April 3, 2007 and higher consumption volumes resulting from colder weather in 2007 versus 2006 as evidenced by a 13.8 percent increase in consumption volumes and a 14 percent increase in degree days;
- The net operating revenues increase was partially offset by higher operating expenses of $18.6 million in the 2007 period versus the 2006 period primarily due to:
  - Increased benefit costs of approximately $7.1 million primarily due to higher pension costs resulting from the recent Missouri Gas Energy rate case;
  - Increased general expenses of approximately $4.5 million primarily due to cathodic protection maintenance, the establishment of a customer education program for energy efficiency associated with the 2007 rate case and other costs;
  - Increased labor expenses of approximately $5.5 million primarily due to the filling of vacant positions and incentive and merit increases in 2007 versus 2006;
  - Higher uncollectible accounts of approximately $1.8 million resulting primarily from higher revenues realized in the 2007 period versus the 2006 period.

Table of Contents

Year ended December 31, 2006 versus the year ended December 31, 2005. The $19.8 million EBIT reduction in the year ended December 31, 2006 versus the same period in 2005 was primarily due to the following items:

- Net operating revenues were $9.7 million lower primarily due to a 12.6 percent reduction in consumption volumes resulting from the warmer than normal weather, as evidenced by a 15 percent reduction in degree days;
- Higher taxes other than on income and revenues of $6.8 million primarily due to refunds received for Missouri property tax settlements in 2005; and
- Higher operating expenses of $2.9 million primarily due to higher bad debt expenses of $900,000 due to the residual effects of higher gas prices in the 2005 to 2006 winter season and higher general expenses in 2006 of $1.3 million primarily due to higher corrosion control costs resulting from drier weather in 2006 compared to 2005.

Corporate and Other

Year ended December 31, 2007 versus the year ended December 31, 2006. The $14.2 million EBIT reduction for the year ended December 31, 2007 versus the same period in 2006 was primarily due to the following items:

- Impact of a mark-to-market gain in 2006 of $37.2 million on put options for the pre-acquisition period associated with the March 1, 2006 acquisition of the Sid Richardson Energy Services business; and
- Favorable offsetting impact of a decrease in operating expenses in 2007 versus 2006 due to executive bonus compensation of $12.8 million awarded by the compensation committee of the Company's Board of Directors in 2006 in respect of transactional activity and a $10.7 million increase in corporate services costs allocated to the Company's business units in 2007.

Year ended December 31, 2006 versus the year ended December 31, 2005. The $25.7 million EBIT improvement for the year ended December 31, 2006 versus the same period in 2005 was primarily due to the following items:

- A mark-to-market gain of $37.2 million on put options for the pre-acquisition period associated with the March 1, 2006 acquisition of Sid Richardson Energy Services;
- Negative impact of $12.8 million of executive bonus compensation awarded and paid in 2006;
- Negative impact of a $6.5 million write-down in the carrying value of the Scranton corporate building recorded in 2006;
- Negative impact of $1.4 million of corporate stock-based compensation costs resulting from the implementation of and accounting under Financial Accounting Standards Board (*FASB*) Statement No. 123(R), Accounting for Stock-Based Compensation in 2006;
- Impact of $3.8 million of non-cash compensation expense in the third quarter of 2005 related to separation agreements with former executives of the Company; and
- Charges of $6.3 million in the first quarter of 2005 to: (i) reserve for an other-than-temporary impairment in the Company's investment in a technology company, and (ii) record a liability for the guarantee by a subsidiary of the Company of a line of credit between the technology company and a bank.

Interest Expense

Year ended December 31, 2007 versus the year ended December 31, 2006. Interest expense was $6.9 million lower in 2007 compared with 2006 primarily due to:

- Impact of interest expense of $49.2 million and debt issuance cost amortization of $7.8 million in 2006 associated with the bridge loan facility entered into to finance the acquisition of the Sid Richardson Energy Services business, which was retired using approximately $1.1 billion in net proceeds from the sale of certain assets in August 2006 and funds obtained in October 2006 from the issuance of the $600 million Junior Subordinated Notes;
- Lower interest expense of $6 million associated with borrowings under the Company's credit agreements primarily due to lower average outstanding balances in 2007 compared to 2006;
- Lower interest expense of $2.2 million due to the retirement of the 2.75% Senior Notes in August 2006;

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1844 of 2431

Table of Contents

- Lower interest expense of $1.6 million associated with interest owed to Missouri Gas Energy's ratepayers in connection with its purchased gas cost recovery mechanism primarily due to higher levels of overcollections in 2006;
- Partially offset by increased interest expense of $34.9 million related to the $600 million Junior Subordinated Notes issued in October 2006;
- Partially offset by increased interest expense of $20.6 million related to Panhandle debt primarily due to higher debt balances in 2007 versus 2006; and
- Partially offset by increased interest expense of $4.8 million under the 6.15% Senior Notes issued in August 2006.

Year ended December 31, 2006 versus the year ended December 31, 2005. Interest expense was $81.6 million higher in 2006 compared with 2005 primarily due to:

- Interest expense of $49.2 million and debt issuance cost amortization of $7.8 million associated with the bridge loan facility entered into to finance the acquisition of the Sid Richardson Energy Services business;
- Increased interest expense of $10.8 million related to Panhandle debt primarily due to higher average interest rates in 2006 versus 2005;
- Interest expense of $2.5 million under the $465 million 2006 Term Loan;
- Interest expense of $8.3 million related to the $600 million Junior Subordinated Notes issued in 2006; and
- Increased interest expense of $4.4 million associated with borrowings under the Company's credit agreements primarily due to higher average outstanding balances and higher interest rates in 2006 compared to 2005.

Federal and State Income Taxes from Continuing Operations

Year ended December 31, 2007 versus the year ended December 31, 2006. The EITR from continuing operations for the years ended December 31, 2007 and 2006 was 29 percent and 33 percent, respectively. The decrease in the EITR from continuing operations was primarily due to:

- Tax benefits of $30.9 million in 2007 versus $11.5 million in 2006 associated with the increase in the dividends received deduction as a result of increased dividends from the Company's unconsolidated investment in Citrus;
- Reduced tax expense of $523,000 in 2007 versus $5.4 million in 2006 associated with the decrease in nondeductible executive compensation; and
- Partially offset by the release of $9.4 million of tax reserves in 2006 for uncertain tax positions established in prior years due to the completion of the Internal Revenue Service (*IRS*) audit for the fiscal year ended June 30, 2003 and expiring state statutes.

Year ended December 31, 2006 versus the year ended December 31, 2005. The EITR from continuing operations for the years ended December 31, 2006 and 2005 was 33 percent and 25 percent, respectively. The fluctuation in the EITR from continuing operations was primarily due to:

- The release in 2005 of an $11.9 million valuation allowance, which was originally established in 2004 for a deferred tax asset related to the difference between the book and tax basis of the Company's investment in CCE Holdings. The Company determined that this valuation allowance was no longer necessary because the book income from CCE Holdings was substantially greater than the taxable income for 2005 and was expected to continue to be higher for the foreseeable future;
- The release in 2006 of $9.4 million of tax reserves for uncertain tax positions established in prior years due to the completion of the IRS audit for the fiscal year ended June 30, 2003 and expiring state statutes; and
- $5.4 million of additional taxes resulting from the $14.5 million of non-deductible executive compensation paid in 2006.

IRS Audit.

In November 2006, the IRS completed its examination of the Company's federal income tax return for the fiscal year ended June 30, 2003. The Company realized a favorable settlement regarding the like-kind exchange structure under Section 1031 of the Internal Revenue Code related to the sale of the assets of its Southern Union

Page 1844

Table of Contents

Gas natural gas operating division and related assets to ONEOK Inc. for approximately $437 million in January 2003 and the acquisition of Panhandle in June 2003.

The Company was successful in sustaining all but $26.3 million of the original estimated $90 million of income tax deferral associated with the like-kind structure. However, the Company's net tax due to the IRS was reduced to $11.6 million, plus interest, primarily due to alternative minimum tax credits and other favorable audit results. As a result of the IRS examination, the Company paid $12.6 million of income tax to the IRS in November 2006, received a refund of $1 million from the IRS and paid $1.4 million to state and local jurisdictions in 2007. The Company also paid $2.4 million ($1.5 million net of tax) in 2007 representing interest payable to the IRS, and state and local jurisdictions as a result of the IRS examination of the year ended June 30, 2003. No penalties were assessed against the Company in this IRS examination.

The Company will be entitled to recover a corresponding $26.3 million of future income tax benefit over time from additional depreciation deductions in respect of the Panhandle assets due to the higher tax basis in such assets as a result of the reduction of income tax benefits from the like-kind exchange.

Net Earnings from Discontinued Operations

Earnings (loss) from discontinued operations included in the 2006 period are associated with the assets of the Company's PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division, which were sold in August 2006. See *Item 8. Financial Statements and Supplementary Data, Note 19 – Discontinued Operations* for additional information.

Year ended December 31, 2006 versus the year ended December 31, 2005. *Earnings from discontinued operations before income taxes* for the year ended December 31, 2006 versus the same period in 2005 were $109.2 million higher primarily due to the $175 million goodwill impairment recognized in 2005, partially offset by a loss of $56.8 million resulting from the sales of assets in 2006 and lower earnings of $8.9 million primarily due to the inclusion of a full year of activity in 2005 versus activity only through August 24 in 2006. Significant components contributing to the $56.8 million loss include $19.4 million of asset impairment charges related to increases in plant, property and equipment during 2006, selling costs of $4.7 million, and charges associated with pre-closing arrangements between the Company and UGI Corporation and National Grid USA, principally consisting of $15.1 million of pension funding requirements and $5.8 million of premiums related to early retirement of debt.

The Company's EITR from discontinued operations was significantly higher in 2006 compared to 2005 primarily due to the following items that resulted from the sale of the assets of the PG Energy natural gas distribution division and the Rhode Island operations of the New England Gas Company natural gas distribution division:

- The Company incurred $142.4 million of income tax expense in 2006 resulting from $379.8 million of non-deductible goodwill related to the disposition of these assets in 2006 compared to $65.6 million of income tax expense resulting from $175 million of non-deductible goodwill impairment related to these assets recorded in 2005; and
- The Company incurred income tax expense of $17.6 million in 2006 as a result of the write-off of a tax-related regulatory asset of PG Energy.

LIQUIDITY AND CAPITAL RESOURCES

Cash generated from internal operations constitutes the Company's primary source of liquidity. The Company's $515.4 million working capital deficit at December 31, 2007 is primarily comprised of $425 million of debt maturing in August 2008. The Company plans to refinance its $425 million of debt maturing in August 2008 with new capital market debt or bank financings. See *Item 1A. Risk Factors* for additional information related to the refinancing. Additional sources of liquidity include use of available credit facilities, project and bank financings and proceeds from asset dispositions. The availability and terms relating to such liquidity will depend upon various factors and conditions such as the Company's combined cash flow and earnings, the Company's resulting capital structure and conditions in the financial markets at the time of such offerings. Acquisitions, which generally require a substantial increase in expenditures, and related financings also affect the Company's combined results. Future acquisitions or related financings or refinancings may involve the issuance of shares of the Company's common stock, which could have a dilutive effect on the then-current stockholders of the Company.

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1846 of 2431

Table of Contents

Operating Activities

Year ended December 31, 2007 versus the year ended December 31, 2006. Cash flows provided by operating activities were $470.4 million for the year ended December 31, 2007 compared with cash flows provided by operating activities of $458.8 million for the same period in 2006. Cash flows provided by operating activities before changes in operating assets and liabilities for 2007 were $516.6 million compared with $393.6 million for 2006. Changes in operating assets and liabilities used cash of $46.2 million in 2007 and provided cash of $65.2 million in 2006, resulting in a decrease in cash of $111.4 million in 2007 compared to 2006. The $111.4 million decrease in cash is primarily due to the impact of $91.8 million of lower receivables from the Distribution segment attributable to higher December 2005 balances realized from the colder related winter period versus the subsequent winter periods and the receipt of $38.8 million less from cash settlements of put options in the Gathering and Processing segment in the 2007 period versus the 2006 period.

Year ended December 31, 2006 versus the year ended December 31, 2005. Cash flows provided by operating activities were $458.8 million for the year ended December 31, 2006 compared with cash flows provided by operating activities of $218.6 million for the same period in 2005. Cash flows provided by operating activities before changes in operating assets and liabilities for 2006 were $393.6 million compared with $356.6 million for 2005. Changes in operating assets and liabilities provided cash of $65.2 million in 2006 and used cash of $138 million in 2005, resulting in an increase in cash of $203.2 million in 2006 compared to 2005. The $203.2 million increase in cash is primarily due to the receipt in 2006 of $74.2 million from cash settlements of put options versus the purchase of $49.7 million of put options in 2005, higher net accounts receivable resulting from increased billings due to improved earnings and other increases of operating activities from the Gathering and Processing segment, partially offset by increased usage of cash primarily related to the replenishment of natural gas inventory levels in the 2006 period compared to 2005.

Investing Activities

Summary

The Company's business strategy includes making prudent capital expenditures across its base of interstate transmission, storage, gathering, processing and distribution assets and growing the businesses through the selective acquisition of assets in order to position itself favorably in the evolving North American natural gas markets.

Page 1846

Table of Contents

Cash flows used in investing activities in the years ended December 31, 2007 and 2006 were $666.6 million and $806.8 million, respectively. The $140.2 million decrease in invested cash is primarily due to the $1.54 billion (net of $53.7 million cash received) acquisition of the Sid Richardson Energy Services business completed on March 1, 2006, offset by the effect of the $1.08 billion disposition in August 2006 of the assets of the Company's PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division. This decrease is partially offset by increased capital expenditures of $269 million for the same periods, primarily due to increased capital spending in the Transportation and Storage segment. The following table presents a summary of additions to property, plant and equipment in continuing operations by segment, including additions related to major projects for the periods presented.

	Years ended December 31,		
Property, Plant and Equipment Additions	**2007**	**2006**	**2005**
		(In thousands)	
Transportation and Storage Segment			
LNG Terminal Expansions/Enhancements	$ 133,469	$ 57,045	$ 75,263
Trunkline Field Zone Expansion	185,180	12,314	169
East End Enhancement	80,249	52,102	1,012
Compression Modernization	81,687	11,642	-
Other, primarily pipeline integrity, system reliability, information technology, air emission compliance	110,568	111,718	112,971
Total	591,153	244,821	189,415
Gathering and Processing Segment	48,633	35,101 (1)	-
Distribution Segment			
Missouri Safety Program	11,405	11,592	11,426
Other, primarily system replacement and expansion	33,364	36,362	73,470
Total	44,769	47,954	84,896
Corporate and other	4,173	4,798	2,306
Total (2)	$ 688,728	$ 332,674	$ 276,617

(1) Reflects expenditures for the period subsequent to the March 1, 2006 acquisition of Sid Richardson Energy Services.
(2) Includes net capital accruals totaling $71.8 million, $14.9 million and $(3.1) million for the years ended 2007, 2006 and 2005, respectively.

Principal Capital Expenditure Projects

The following is a summary of the Company's principal capital expenditure projects.

LNG Expansion Projects. Trunkline LNG's Phase I expansion project was placed into service on April 5, 2006 with a total project cost of $141 million, plus capitalized interest. The expanded vaporization capacity portion of the expansion was placed into service on September 18, 2005. Phase II went into service on July 8, 2006. The final cost of Phase II was $79 million, plus capitalized interest. The expansions increased sustainable send out capacity from .63 Bcf/d to 1.8 Bcf/d, and storage increased from 6.3 Bcf to 9 Bcf.

LNG Terminal Enhancement. The Company has commenced construction of an enhancement at its Trunkline LNG terminal. This infrastructure enhancement project, which was originally expected to cost approximately $250 million, plus capitalized interest, will increase send out flexibility at the terminal and lower fuel costs. Recent cost projections indicate the construction costs will likely be approximately $365 million, plus capitalized interest. The revised costs reflect increases in the quantities and cost of materials required, higher contract labor costs and an allowance for additional contingency funds, if needed. The negotiated rate with the project's customer, BG LNG Services, will be adjusted based on final capital costs pursuant to a contract-based formula. The project is now

Table of Contents

expected to be in operation in the second quarter of 2009. In addition, Trunkline LNG and BG LNG Services agreed to extend the existing terminal and pipeline services agreements through 2028, representing a five-year extension. Approximately $178.3 million and $40.8 million of costs are included in the line item *Construction work-in-progress* at December 31, 2007 and 2006, respectively.

Compression Modernization. The Company has received approval from FERC to modernize and replace various compression facilities on PEPL. Such replacements are ultimately expected to be made at eleven compressor stations, with three stations completed as of December 31, 2007. Three additional stations are in progress and planned to be completed by the end of 2009, with the remaining cost for these stations estimated at approximately $100 million, plus capitalized interest. Planning for the other five compressor stations on which construction has not yet begun is continuing, with the timing and scope of the work on these stations being evaluated on an individual station basis. The Company is also replacing approximately 32 miles of existing pipeline on the east end of the PEPL system at a current estimated cost of approximately $125 million, plus capitalized interest, which will further improve system integrity and reliability. The revised higher cost relates to various construction issues and delays which have resulted in current estimated in-service dates for the related facilities around the end of the first quarter of 2008 or in the second quarter of 2008. Approximately $124.7 million and $57.9 million of costs related to these projects are included in the line item *Construction work-in-progress* at December 31, 2007 and 2006, respectively.

Trunkline Field Zone Expansion Project. Trunkline has completed construction on its field zone expansion project. The expansion project included the north Texas expansion and creation of additional capacity on Trunkline's pipeline system in Texas and Louisiana to increase deliveries to Henry Hub. Trunkline has increased the capacity along existing rights-of-way from Kountze, Texas to Longville, Louisiana by approximately 625 MMcf/d with the construction of approximately 45 miles of 36-inch diameter pipeline. The project included horsepower additions and modifications at existing compressor stations. Trunkline has also created additional capacity to Henry Hub with the construction of a 13.5-mile, 36-inch diameter pipeline loop from Kaplan, Louisiana directly into Henry Hub. The Henry Hub lateral provides capacity of 1 Bcf/d from Kaplan, Louisiana to Henry Hub. The majority of the project was put into service in late December 2007 with the remainder placed in-service in February 2008. The Company currently estimates the final project costs will total approximately $250 million, plus capitalized interest. The estimated costs include a $40 million CIAC to a subsidiary of Energy Transfer, which was paid in January 2008 and is expected to be amortized over the life of the facilities. Approximately $26.4 million and $12.5 million of costs for this project are included in the line item *Construction work-in-progress* at December 31, 2007 and 2006, respectively, with $178.3 million closed to *Plant in service* in December 2007.

Hurricane Damage. Late in the third quarter of 2005, Hurricanes Katrina and Rita came ashore along the Upper Gulf Coast. These hurricanes caused damage to property and equipment owned by Sea Robin, Trunkline, and Trunkline LNG. As of December 31, 2007, the Company has incurred approximately $35 million of capital expenditures related to the hurricanes, primarily for replacement or abandonment of damaged property and equipment at Sea Robin and construction project delays at the Trunkline LNG terminal.

The Company anticipates reimbursement from its property insurance carriers for a significant portion of damages from the hurricanes in excess of its $5 million deductible. Such reimbursement is currently estimated by the Company's property insurance carrier ultimately to be limited to 70 percent of the portion of the claimed damages accepted by the insurance carrier, but the amount is subject to the level of total ultimate claims from all companies relative to the carrier's $1 billion total limit on payout per event. As of December 31, 2007, the Company has received payments of $7.6 million of the $19.5 million total estimated eligible recoveries from its insurance carriers. No receivables due from the insurance carriers have been recorded as of December 31, 2007.

In addition, after the 2005 hurricanes, the U.S. Mineral Management Service mandated inspections by leaseholders and pipeline operators along the hurricane tracks. The Company has detected exposed pipe and other facilities on Trunkline and Sea Robin that must be re-covered to comply with applicable regulations. Capital expenditures of approximately $3.7 million have been incurred as of December 31, 2007 to address these issues. The Company will seek recovery of these expense and capital amounts as part of the hurricane-related claims.

Table of Contents

Missouri Safety Program. Pursuant to a 1989 MPSC order, Missouri Gas Energy is engaged in a major gas safety program in its service territories (*Missouri Safety Program*). This program includes replacement of Company and customer-owned gas service and yard lines, the movement and resetting of meters, the replacement of cast iron mains and the replacement and cathodic protection of bare steel mains. In recognition of the significant capital expenditures associated with this safety program, the MPSC initially permitted the deferral and subsequent recovery through rates of depreciation expense, property taxes and associated carrying costs over a 10-year period. On August 28, 2003, the state of Missouri passed certain statutes that provided Missouri Gas Energy the ability to adjust rates periodically to recover depreciation expense, property taxes and carrying costs associated with the Missouri Safety Program, as well as investments in public improvement projects. The continuation of the Missouri Safety Program will result in significant levels of future capital expenditures. The Company incurred capital expenditures of $11.4 million in 2007 related to this program and estimates incurring approximately $141.3 million over the next 12 years, after which all service lines, representing about 40 percent of the annual safety program investment, will have been replaced.

For additional information related to the Company's strategy regarding other growth opportunities, see *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Business Strategy*.

Financing Activities

Summary

The Company continues to pursue opportunities to enhance its credit profile by reducing its ratio of total debt to total capital. At each of, December 31, 2007 and 2006, the Company's ratio of total debt to total capital was 61 percent. The issuance of common stock, equity units, preferred stock and asset sales and use of proceeds therefrom to reduce debt or limit use of debt in conjunction with acquisitions is continued evidence of the Company's commitment to strengthen its balance sheet and solidify its current investment grade status.

Cash flows provided by financing activities were $196.1 million and $336.8 million for the years ended December 31, 2007 and 2006, respectively. Financing activity cash flow changes were primarily due to the net impact of higher issuances of debt partially offset by higher payments on the revolving credit facilities in the 2006 period versus the 2007 period and the issuance of common stock in 2006.

Cash flows provided by financing activities were $336.8 million for the year ended December 31, 2006 compared with $50.8 million for the same period in 2005. Financing activity cash flow changes were primarily due to the net impact of acquisition financing and the repayment of such debt, net borrowings under the revolving credit facilities and the payment of common and preferred stock dividends.

Common Stock, Equity Units and Preferred Stock Issuances

On August 16, 2006, the Company remarketed the 2.75% Senior Notes. The interest rate on the Senior Notes was reset to 6.15 percent per annum effective on and after August 16, 2006. The Senior Notes will mature on August 16, 2008. On August 16, 2006, the Company issued 7,413,074 shares of common stock for $125 million in conjunction with the remarketing of its 2.75% Senior Notes.

On February 11, 2005, Southern Union issued 2,000,000 of its 5% Equity Units at a public offering price of $50 per unit, resulting in net proceeds, after underwriting discounts and commissions and other transaction related costs, of $97.4 million. Southern Union used the proceeds to repay the balance of the bridge loan used to fund a portion of the Company's investment in CCE Holdings (*CCE Holdings Bridge Loan*) and to repay borrowings under its credit facilities. Each 5% Equity Unit consisted of a 1/20th interest in a $1,000 principal amount of Southern Union's 4.375% Senior Notes due 2008 and a forward stock purchase contract that obligated the holder to purchase Southern Union common stock on February 16, 2008. On February 8, 2008, the Company remarketed the 4.375% Senior Notes. The interest rate on the Senior Notes was reset to 6.089 percent per annum effective on and after February 19, 2008. The Senior Notes will mature on February 16, 2010. On February 19, 2008, the Company issued 3,693,240 shares of common stock for $100 million in conjunction with the remarketing of its 4.375% Senior Notes. See *Item 8. Financial Statements and Supplementary Data, Note 25 – Subsequent Event*.

Table of Contents

For additional information related to the Company's remarketed debt obligations, see *Item 8. Financial Statements and Supplementary Data, Note 13 – Debt Obligations – Long-Term Debt* and *Note 25 – Subsequent Event*.

On February 9, 2005, Southern Union issued 14,913,042 shares of its common stock at $23.00 per share, resulting in net proceeds, after underwriting discounts and commissions, of $332.6 million. Southern Union used the net proceeds to repay a portion of the CCE Holdings Bridge Loan.

Debt Refinancing, Repayment and Issuance Activity

6.20% Senior Notes. On October 26, 2007, PEPL issued $300 million in senior notes due November 1, 2017 with an interest rate of 6.20 percent (*6.20% Senior Notes*). In connection with the issuance of the 6.20% Senior Notes, the Company incurred underwriting and discount costs of approximately $2.7 million. The debt was priced to the public at 99.741 percent, resulting in $297.3 million in proceeds to the Company. The proceeds were initially used to repay approximately $246 million outstanding under the credit facilities. The remaining proceeds of $51.3 million were invested by the Company and subsequently utilized to fund working capital obligations.

LNG Holdings Term Loans. On March 15, 2007, LNG Holdings, LLC (*LNG Holdings*), as borrower, and PEPL and Trunkline LNG, as guarantors, entered into a $455 million unsecured term loan facility due March 13, 2012 (*2012 Term Loan*). The interest rate under the 2012 Term Loan is a floating rate tied to a LIBOR rate or prime rate at the Company's option, in addition to a margin tied to the rating of PEPL's senior unsecured debt. The proceeds of the 2012 Term Loan were used to repay approximately $455 million in existing indebtedness that matured in March 2007, including the $200 million 2.75% Senior Notes and the LNG Holdings $255.6 million Term Loan. LNG Holdings has entered into interest rate swap agreements that effectively fixed the interest rate applicable to the 2012 Term Loan at 4.98 percent plus a credit spread of 0.625, based upon PEPL's credit rating for its senior unsecured debt. See *Item 8. Financial Statements and Supplementary Data, Note 11 – Derivative Instruments and Hedging Activities – Interest Rate Swaps* for information regarding interest rate swaps on the 2012 Term Loan.

In connection with the December 1, 2006 closing of the Redemption Agreement, LNG Holdings, as borrower, and PEPL and CrossCountry Citrus, LLC, as guarantors, entered into the $465 million 2006 Term Loan due April 4, 2008. On June 29, 2007, the parties entered into an amended and restated term loan facility (*Amended Credit Agreement*). The Amended Credit Agreement extended the maturity of the term loan from April 4, 2008 to June 29, 2012, and decreased the interest rate from LIBOR plus 87.5 basis points to LIBOR plus 55 basis points, based upon the current credit rating of PEPL's senior unsecured debt. The balance of the term loan facility at December 31, 2007 was $412.2 million.

Junior Subordinated Notes. On October 23, 2006, the Company issued $600 million in Junior Subordinated Notes due November 1, 2066 with an initial fixed interest rate of 7.20 percent. In connection with the issuance of the Junior Subordinated Notes, the Company incurred underwriting and discount costs of approximately $9 million. The debt was priced to the public at 99.844 percent, resulting in $590.1 million in proceeds to the Company. The outstanding balance of $525 million on the Sid Richardson Bridge Loan discussed below was retired using the proceeds from the debt offering and the remaining approximately $65 million of debt offering proceeds were used to pay down a portion of the Company's credit facilities. See related information in *Item 8. Financial Statements and Supplementary Data, Note 13 – Debt Obligations – Long-Term Debt – Junior Subordinated Notes*.

Short-Term Debt Obligations, Excluding Current Portion of Long-Term Debt.

Credit Facilities. On September 29, 2005, the Company entered into a Fourth Amended and Restated Revolving Credit Facility in the amount of $400 million (*Long-Term Facility*). The Long-Term Facility has a five-year term and matures on May 28, 2010. The Long-Term Facility replaced the Company's May 28, 2004 long-term credit facility in the same amount. Borrowings under the Long-Term Facility are available for Southern Union's working capital and letter of credit requirements and other general corporate purposes. The Long-Term Facility is subject to a commitment fee based on the rating of the Company's senior unsecured notes (*Senior Notes*). As of December 31, 2007, the commitment fees were an annualized 0.15 percent. The Company has an additional $30 million of availability under uncommitted lines of credit facilities with various banks.

Table of Contents

Balances of $123 million and $100 million were outstanding under the Company's credit facilities at effective interest rates of 5.82 percent and 6.02 percent at December 31, 2007 and December 31, 2006, respectively. The Company classifies its borrowings under the credit facilities due May 28, 2010 as short-term debt, as the individual borrowings are generally for periods of 15 to 180 days. At maturity, the Company may (i) retire the outstanding balance of each borrowing with available cash on hand and/or proceeds from a new borrowing, or (ii) at the Company's option, extend the borrowing's maturity date for up to an additional 90 days. As of February 22, 2008, there was a balance of $45 million outstanding under the Company's credit facilities at an average effective interest rate of 3.77 percent.

Sid Richardson Bridge Loan. On March 1, 2006, Southern Union acquired SUGS for $1.6 billion in cash. The acquisition was funded by a bridge loan facility in the amount of $1.6 billion that was entered into on March 1, 2006 between the Company and a group of banks as lenders. On August 24, 2006, the Company applied approximately $1.1 billion in net proceeds from the sales of the assets of its PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division to repayment of the Sid Richardson Bridge Loan. On October 23, 2006, the Company retired the remainder of the Sid Richardson Bridge Loan using a portion of the $590.1 million in proceeds received from the $600 million Junior Subordinated Notes offering discussed above.

Interest expense totaling $49.2 million related to the Sid Richardson Bridge Loan was incurred during 2006 at an average interest rate of 5.72 percent. Debt issuance costs totaling $9.2 million were incurred in connection with the financing of the acquisition, of which $7.8 million was related to the Sid Richardson Bridge Loan and $1.4 million was related to the placement of permanent financing. The Company fully amortized the $7.8 million of the Sid Richardson Bridge Loan debt issuance cost to interest expense during 2006.

Expected Refinancing and Other Debt Matters

Expected Refinancing. The Company plans to refinance its $425 million of debt maturing in August 2008 with new capital market debt or bank financings. Alternatively, should the Company not be successful in its refinancing efforts, the Company may choose to retire such debt upon maturity by utilizing some combination of cash flows from operations, draw downs under existing credit facilities, and altering the timing of controllable expenditures, among other things. The Company believes, based on its investment grade credit ratings and general financial condition, successful historical access to capital and debt markets, current economic and capital market conditions and market expectations regarding the Company's future earnings and cash flows, that it will be able to refinance and/or retire these obligations under acceptable terms prior to their maturity. There can be no assurance, however, that the Company will be able to achieve acceptable refinancing terms in any negotiation of new capital market debt or bank financings. Moreover, there can be no assurance the Company will be successful in its implementation of these refinancing and/or retirement plans and the Company's inability to do so would cause a material adverse effect on the Company's financial condition and liquidity.

Credit Ratings. As of December 31, 2007, both Southern Union's and Panhandle's debt are rated Baa3 by Moody's Investor Services, Inc., BBB- by Standard & Poor's and BBB by Fitch Ratings. If its current credit ratings are downgraded below investment grade or if there are times when it is placed on "credit watch," both borrowing costs and the costs of maintaining certain contractual relationships could increase. Lower credit ratings could also adversely affect relationships with state regulators, who may be unwilling to allow the Company to pass along increased debt service costs to natural gas customers.

Table of Contents

OTHER MATTERS

Master Limited Partnership

On November 9, 2007, the Company announced its intention to pursue an initial public offering of units representing limited partner interests of a master limited partnership (*MLP*) to be formed by the Company to hold a portion of the gathering and processing assets of its SUGS business. In light of recent unfavorable conditions in the MLP market, including the delay or cancellation of other previously announced initial public offerings, the Company has determined to postpone filing of a registration statement until such time as market conditions improve.

This Annual Report on Form 10-K shall not constitute an offer to sell or the solicitation of an offer to buy any securities. Any offers, solicitations of offers to buy, or any sales of securities will only be made in accordance with the registration requirements of the Securities Act of 1933 or an exemption therefrom.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

The following table summarizes the Company's expected contractual obligations by payment due date as of December 31, 2007:

	Contractual Obligations (In thousands)						
	Total	**2008**	**2009**	**2010**	**2011**	**2012**	**2013 and thereafter**
Long-term debt (1), (2)	$ 3,388,913	$ 434,831	$ 60,623	$ 140,500	$ -	$ 857,389	$ 1,895,570
Short-term borrowing, including credit facilities (1)	123,000	123,000	-	-	-	-	-
Gas purchases (3)	618,822	244,103	209,202	165,517	-	-	-
Missouri Gas Energy Safety Program	141,324	12,991	12,633	12,760	12,887	10,868	79,185
Transportation contracts	310,987	74,786	70,732	55,815	44,664	11,819	53,171
Storage contracts (4)	175,169	32,273	24,242	18,720	17,250	14,302	68,382
Operating lease payments	143,903	16,423	19,236	18,294	18,230	13,929	57,791
Interest payments on debt (5), (6)	4,196,668	213,424	190,243	184,631	182,961	151,448	3,273,961
Benefit plan contributions	24,314	24,314	-	-	-	-	-
Other (7)	4,116	1,690	980	872	389	185	-
Total contractual cash obligations	$ 9,127,216	$ 1,177,835	$ 587,891	$ 597,109	$ 276,381	$ 1,059,940	$ 5,428,060

(1) The Company is party to debt agreements containing certain covenants that, if not satisfied, would give rise to an event of default that would cause such debt to become immediately due and payable. Such covenants require the Company to maintain a certain level of net worth, to meet certain debt to total capitalization ratios, and to meet certain ratios of earnings before depreciation, interest and taxes to cash interest expense. At December 31, 2007, the Company was in compliance with all of its covenants. See *Item 8. Financial Statements and Supplementary Data, Note 13 – Debt Obligations*.
(2) The long-term debt principal payment obligations exclude $6.1 million of unamortized debt premium as of December 31, 2007.
(3) The Company has purchase gas tariffs in effect for all its utility service areas that provide for recovery of its purchased gas costs under defined methodologies.
(4) Represents charges for third party storage capacity.
(5) Interest payments on debt are based upon the applicable stated or variable interest rates as of December 31, 2007. Includes approximately $2.5 billion of interest payments associated with the $600 million Junior Subordinated Notes due November 1, 2066.
(6) Excludes interest on the $100 million 6.089% Senior Notes due February 16, 2010 entered into on February 19, 2008. See *Item 8. Financial Statements and Supplementary Data, Note 25 – Subsequent Event.*
(7) Includes FIN 48 unrecognized tax benefits and various other contractual obligations.

Table of Contents

Contingencies

See *Item 8. Financial Statements and Supplementary Data, Note 18 – Commitments and Contingencies*.

Inflation

The Company believes that inflation has caused, and will continue to cause, increases in certain operating expenses and has required, and will continue to require, it to replace assets at higher costs. The Company continually reviews the adequacy of its rates in relation to the impact of market conditions, the increasing cost of providing services and the inherent regulatory lag experienced in the Transportation and Storage and Distribution segments in adjusting those rates.

Regulatory

See *Item 8. Financial Statements and Supplementary Data, Note 16 – Regulation and Rates*.

Critical Accounting Policies

Summary

The Company's consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and related disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions about future events and their effects cannot be determined with certainty. On an ongoing basis, the Company evaluates its estimates based on historical experience, current market conditions and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Nevertheless, actual results may differ from these estimates under different assumptions or conditions. The following is a summary of the Company's most critical accounting policies, which are defined as those policies whereby judgments or uncertainties could affect the application of those policies and materially different amounts could be reported under different conditions or using different assumptions. For a summary of all of the Company's significant accounting policies, see *Item 8. Financial Statements and Supplementary Data, Note 2 – Summary of Significant Accounting Policies.*

Effects of Regulation

The Company is subject to regulation by certain state and federal authorities in each of its reportable segments and for certain of its operations reported as discontinued operations. Missouri Gas Energy, New England Gas Company and Florida Gas have accounting policies that conform to FASB Statement No. 71, *Accounting for the Effects of Certain Types of Regulation (Statement No. 71)*, and which are in accordance with the accounting requirements and ratemaking practices of the applicable regulatory authorities. The application of these accounting policies allows the Company to defer expenses and revenues on the balance sheet as regulatory assets and liabilities when it is probable that those expenses and revenues will be allowed in the ratemaking process in a period different from the period in which they would have been reflected in the Consolidated Statement of Operations by an unregulated company. These deferred assets and liabilities then flow through the results of operations in the period in which the same amounts are included in rates and recovered from or refunded to customers. Management's assessment of the probability of recovery or pass through of regulatory assets and liabilities requires judgment and interpretation of laws and regulatory commission orders. If, for any reason, the Company ceases to meet the criteria for application of regulatory accounting treatment for all or part of its operations, the regulatory assets and liabilities related to those portions ceasing to meet such criteria would be eliminated from the Consolidated Balance Sheet and included in the Consolidated Statement of Operations for the period in which the discontinuance of regulatory accounting treatment occurs. The aggregate amount of regulatory assets reflected in the Consolidated Balance Sheet applicable to the Distribution segment are $64.2 million and $65.9 million at December 31, 2007 and 2006, respectively. The aggregate amount of regulatory liabilities reflected in the Consolidated Balance Sheet applicable to the Distribution segment are $6.5 million and $8.9 million at December 31, 2007 and 2006, respectively. For a summary of regulatory matters applicable to the

[Table of Contents](#)

Company, see *Item 8. Financial Statements and Supplementary Data, Note 16 – Regulation and Rates*. Panhandle and SUGS do not currently apply Statement No. 71.

Long-Lived Assets

Long-lived assets, including property, plant and equipment and goodwill, comprise a significant amount of the Company's total assets. The Company makes judgments and estimates about the carrying value of these assets, including amounts to be capitalized, depreciation methods and useful lives. The Company also reviews these assets for impairment on a periodic basis or whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. The impairment test consists of a comparison of an asset's fair value with its carrying value; if the carrying value of the asset exceeds its fair value, an impairment loss is recognized in the Consolidated Statement of Operations in an amount equal to that excess. When an asset's fair value is not readily apparent from other sources, management's determination of an asset's fair value requires it to make long-term forecasts of future net cash flows related to the asset. These forecasts require assumptions about future demand, future market conditions and regulatory developments. Significant and unanticipated changes to these assumptions could require a provision for impairment in a future period.

The Company assesses its goodwill for impairment at least annually based on FASB Statement 142, *Goodwill and Other Intangible Assets*. An initial assessment is made by comparing the fair value of the operations with goodwill, as determined in accordance with Statement 142, to the book value of each reporting unit. If the fair value is less than the book value, an impairment is indicated, and a second test is performed to measure the amount of the impairment. In the second test, the implied fair value of the goodwill is calculated by deducting the fair value of all tangible and intangible net assets of the operations with goodwill from the fair value determined in step one of the assessment. If the carrying value of the goodwill exceeds this calculated implied fair value of the goodwill, an impairment charge is recorded. As of November 30, 2007, the Company evaluated goodwill for impairment and no impairment was indicated. Execution of agreements for the sale of the Company's PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division in the first quarter of 2006 constituted a subsequent event of the type that under generally accepted accounting principles in the United States of America required the Company to consider the fair value indicated by the definitive sale agreements in its 2005 goodwill impairment evaluation. Based on the purchase prices reflected in the definitive agreements, the Company reported a $175 million goodwill impairment in the fourth quarter of 2005.

Purchase Accounting

The Company's acquisition of Sid Richardson Energy Services was accounted for using the purchase method of accounting in accordance with FASB Statement No. 141, *Business Combinations*. CCE Holdings, a joint venture in which Southern Union owned a 50 percent equity interest until it became a wholly-owned subsidiary on December 1, 2006 in conjunction with the closing of the Redemption Agreement, also applied the purchase method of accounting for its acquisition of CrossCountry Energy on November 17, 2004. Under this statement, the purchase price paid by the acquirer, including transaction costs, is allocated to the net assets acquired as of the acquisition date based on their fair value. Determining the fair value of certain assets acquired and liabilities assumed is judgmental in nature and often involves the use of significant estimates and assumptions. Southern Union has generally used outside appraisers to assist in the initial determination of fair value. The appraisals related to Southern Union's acquisition of CCE Holdings and Sid Richardson Energy Services were finalized in 2005 and 2006, respectively.

Southern Union effectively acquired an additional 25 percent interest in Citrus on December 1, 2006 as a result of the transactions described in *Item 8. Financial Statements and Supplementary Data, Note 3 – Acquisitions and Sales – CCE Holdings Transactions*. The purchase price allocation associated with this incremental equity investment in Citrus is accounted for under Accounting Principles Board Opinion 18, *The Equity Method of Accounting for Investments in Common Stock*. For additional information, see *Item 8. Financial Statements and Supplementary Data, Note 9 – Unconsolidated Investments – CCE Holdings Goodwill Evaluation*.

Table of Contents

Pensions and Other Postretirement Benefits

Effective December 31, 2006, the Company adopted the recognition and disclosure provisions of FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans – an amendment of FASB Statements No. 87, 88, 106 and 132(R)* (*Statement No. 158*). Statement No. 158 does not amend the expense recognition provisions of Statements No. 87, 88 and 106, but requires employers to recognize in their balance sheets the overfunded or underfunded status of defined benefit postretirement plans, measured as the difference between the fair value of the plan assets and the benefit obligation (the projected benefit obligation for pension plans and the accumulated postretirement benefit obligation for other postretirement plans). Each overfunded plan is recognized as an asset and each underfunded plan is recognized as a liability. Employers must recognize the change in the funded status of the plan in the year in which the change occurs through *Accumulated other comprehensive loss* in stockholders' equity. Effective for years ending after December 15, 2008 (with early adoption permitted), Statement No. 158 also requires plan assets and benefit obligations to be measured as of the employers' balance sheet date. The Company has not yet adopted the measurement date provisions of Statement No. 158.

The Company accounted for the measurement of its defined benefit postretirement plans under Statement No. 87, *Employers Accounting for Pensions* (*Statement No. 87*) and Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions* (*Statement No. 106*). Prior to the adoption of the recognition and disclosure provisions of Statement No. 158, Statement No. 87 required that a liability (minimum pension liability) be recorded when the accumulated benefit obligation liability exceeded the fair value of plan assets. Any adjustment was recorded as a non-cash charge to *Accumulated other comprehensive loss*. Statement No. 106 had no minimum liability provision. Under both Statements No. 87 and 106, changes in the funded status were not immediately recognized, rather they were deferred and recognized ratably over future periods. Upon adoption of the recognition provisions of Statement No. 158, the Company recognized the amounts of these prior changes in the funded status of its defined benefit postretirement plans through *Accumulated other comprehensive loss*.

The calculation of the Company's pension expense and projected benefit obligation requires the use of a number of assumptions. Changes in these assumptions can have a significant effect on the amounts reported in the financial statements. The Company believes that the two most critical assumptions are the assumed discount rate and the expected rate of return on plan assets.

The Company establishes the discount rate using the Citigroup Pension Discount Curve as published on the Society of Actuaries website as the hypothetical portfolio of high-quality debt instruments that would provide the necessary cash flows to pay the benefits when due. Pension expense and projected benefit obligation (*PBO*) increases and equity decreases as the discount rate is reduced. Lowering the discount rate assumption by 0.5 percent would increase the Company's 2007 pension expense and PBO at the end of 2007 by $400,000 and $13.1 million, respectively, and would decrease equity at the end of 2007 by $8.1 million.

The expected rate of return on plan assets is based on long-term expectations given current investment objectives and historical results. Pension expense increases as the expected rate of return on plan assets is reduced. Lowering the expected rate of return on plan assets assumption by 0.5 percent would increase the Company's 2007 pension expense by $550,000.

See *Item 8. Financial Statements and Supplementary Data, Note 14 – Benefits* for additional related information.

Derivatives and Hedging Activities

The Company follows FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended, to account for derivative and hedging activities. In accordance with this statement all derivatives are recognized on the balance sheet at their fair value. On the date the derivative contract is entered into, the Company designates the derivative as: (i) a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (fair value hedge); (ii) a hedge of a forecasted transaction or the variability of cash flows to be received or paid in conjunction with a recognized asset or liability (cash flow hedge); or (iii) an instrument that is held for trading or non-hedging purposes (a trading or economic hedging instrument). For derivatives treated as a fair value hedge, the effective portion of changes in fair value are recorded as an adjustment to the hedged item. The ineffective portion of a fair value hedge is recognized in earnings if the short cut method of assessing effectiveness is not used. Upon termination of a fair value hedge of a debt instrument, the resulting

Table of Contents

gain or loss is amortized to earnings through the maturity date of the debt instrument. For derivatives treated as a cash flow hedge, the effective portion of changes in fair value is recorded in *Accumulated other comprehensive loss* until the related hedged items impact earnings. Any ineffective portion of a cash flow hedge is reported in current-period earnings. For derivatives treated as trading or economic hedging instruments, changes in fair value are reported in current-period earnings. Fair value is determined based upon quoted market prices and mathematical models using current and historical data.

The Company formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivatives that are used in hedging transactions have been highly effective in offsetting changes in the fair value or cash flows of hedged items and whether those derivatives may be expected to remain highly effective in future periods. The Company discontinues hedge accounting when: (i) it determines that the derivative is no longer effective in offsetting changes in the fair value or cash flows of a hedged item; (ii) the derivative expires or is sold, terminated, or exercised; (iii) it is no longer probable that the forecasted transaction will occur; or (iv) management determines that designating the derivative as a hedging instrument is no longer appropriate. In all situations in which hedge accounting is discontinued and the derivative remains outstanding, the Company will carry the derivative at its fair value on the balance sheet, recognizing changes in the fair value in current-period earnings. See *Item 8. Financial Statements and Supplementary Data, Note 11 – Derivative Instruments and Hedging Activities*.

Commitments and Contingencies

The Company is subject to proceedings, lawsuits and other claims related to environmental and other matters. Accounting for contingencies requires significant judgments by management regarding the estimated probabilities and ranges of exposure to potential liability. For further discussion of the Company's commitments and contingencies, see *Item 8. Financial Statements and Supplementary Data, Note 18 – Commitments and Contingencies.*

New Accounting Pronouncements

See *Item 8. Financial Statements and Supplementary Data, Note 2 – Summary of Significant Accounting Policies – New Accounting Principles*.

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk.

Interest Rate Risk

The Company is subject to the risk of loss associated with movements in market interest rates. The Company manages this risk through the use of fixed-rate debt, floating-rate debt and interest rate swaps. Fixed-rate swaps are used to reduce the risk of increased interest costs during periods of rising interest rates. Floating-rate swaps are used to convert the fixed rates of long-term borrowings into short-term variable rates. At December 31, 2007, the interest rate on 88 percent of the Company's long-term debt was fixed after considering the impact of interest rate swaps.

At December 31, 2007, $17.1 million is included in *Deferred Credits* in the Consolidated Balance Sheet related to the fixed-rate interest rate swaps on the $455 million Term Loan due 2012.

At December 31, 2007, a 100 basis point move in the annual interest rate on all outstanding floating-rate long-term debt would increase the Company's interest payments by approximately $434,000 for each month during which such increase continued. If interest rates changed significantly, the Company would take actions to manage its exposure to the change. No change has been assumed, as a specific action and the possible effects are uncertain.

Table of Contents

The Company also enters into treasury rate locks to manage its exposure against changes in future interest payments attributable to changes in the US treasury rates. By entering into these agreements, the Company locks in an agreed upon interest rate until the settlement of the contract. The Company accounts for the treasury rate locks as cash flow hedges. At December 31, 2007, $1.7 million is included in *Prepayments and Other* in the Consolidated Balance Sheet related to the treasury rate locks. The Company has treasury rate locks with an aggregate notional amount of $375 million outstanding as of December 31, 2007 to hedge the changes in cash flows of anticipated interest payments from changes in treasury rates prior to the issuance of new debt instruments.

The change in exposure to loss in earnings and cash flow related to interest rate risk for the year ended December 31, 2007 is not material to the Company.

See *Item 8. Financial Statements and Supplementary Data*, *Note 11 – Derivative Instruments and Hedging Activities* and *Note 13 - Debt Obligations*.

Commodity Price Risk

Gathering and Processing Segment. The Company markets natural gas and NGLs in its Gathering and Processing segment and manages associated commodity price risks using both economic and accounting hedge derivative financial instruments. These instruments involve not only the risk of transacting with counterparties and their ability to meet the terms of the contracts but also the risk associated with unmatched positions and market fluctuations. The Company is required to record its commodity derivative financial instruments at fair value, which is determined by commodity exchange prices, over-the-counter quotes, volatility, time value, counterparty credit and the potential impact on market prices of liquidating positions in an orderly manner over a reasonable period of time under current market conditions.

To manage its commodity price risk related to natural gas and NGLs, the Company uses a combination of crude oil puts, NGL gross processing spread puts, fixed-price physical forward sales contracts, exchange-traded futures and options, and fixed or floating index and basis swaps to manage commodity price risk. These derivative financial instruments allow the Company to preserve value and protect margins because changes in the value of the derivative financial instruments are highly effective in offsetting changes in the physical market and reducing basis risk. Basis risk exists primarily due to price differentials between cash market delivery locations and futures contract delivery locations. At December 31, 2007, the net asset derivative balance of the Company's economic hedging derivatives in the Gathering and Processing segment was $6.7 million. All previous accounting hedges designated as cash flow hedges in the Gathering and Processing segment expired at December 31, 2007.

The Company realizes NGL and/or natural gas volumes from its contractual arrangements associated with gas processing services it provides. The Company utilizes various economic hedge techniques to manage its price exposure of Company owned volumes, including processing spread puts and natural gas swaps. Expected NGL and/or natural gas volumes compared to the actual volumes sold and the effectiveness of the associated economic hedges utilized by the Company can be unfavorably impacted by:

- Processing plant outages;
- Higher than anticipated FF&U efficiency levels;
- Impact of commodity prices in general;
- Lower than expected recovery of NGLs from the residue gas stream; and
- Lower than expected recovery of natural gas volumes to be processed.

For the purpose of reducing its processing spread exposure, the Company purchased put options for the period February 1, 2008 through December 31, 2008. The put options reduce its processing spread exposure on 11,075 MMBtu/day, or approximately 25 percent of the Company's expected NGLs sales volumes based on 2007 historical processing trends. The put options set a floor for the Company's processing spread at $8.15 per MMBtu for such volumes. The cost of the December 2007 transaction was $5.2 million, or $1.41 per MMBtu.

Additionally, in February 2008, for the period March 1, 2008 through December 31, 2008, the Company entered into various natural gas swaps which have reduced its commodity price exposure related to 30,000 MMBtu/day. The natural gas swaps have effectively established an average fixed index price at locations where we sell natural gas, at the "basis adjusted price" of $8.28 per MMBtu for the related period. The combination of the processing spread put option with an equal MMBtu portion of the natural gas swap effectively establishes a floor of $15.02 per MMBtu for 25 percent of the Company's expected NGL sales volumes as noted above. In February 2008, the Company also entered into natural gas swaps associated with 10,000 MMBtu/day for the period January 1, 2009 through December 31, 2009, fixing the 2009 basis adjusted sales price of such volumes at $8.19 per MMBtu.

For further information related to SUGS' commodity-based put options and non-heding derivative instruments, see *Item 8. Financial Statements and Supplementary Data, Note 11 – Derivative Instruments and Hedging Activities – Gathering and Processing Segment*.

Table of Contents

Transportation and Storage Segment. The Company is exposed to commodity price risk as its interstate pipelines collect natural gas from its customers for operations or as part of their fee for services provided. When the amount of natural gas utilized in operations by these pipelines differs from the amount provided by their customers, the pipelines may use natural gas from inventory or could have to buy or sell natural gas to cover these operational needs, and thus have some exposure to commodity price risk. At December 31, 2007, there were no hedges in place in respect to natural gas price risk from its interstate pipeline operations.

Distribution Segment Economic Hedging Activities. During 2007, 2006 and 2005, the Company entered into natural gas commodity swaps and collars to mitigate price volatility of natural gas passed through to utility customers in the Distribution segment. The cost of the derivative products and the settlement of the respective obligations are recorded through the gas purchase adjustment clause as authorized by the applicable regulatory authority and therefore do not impact earnings. The fair values of the contracts are recorded as an adjustment to a regulatory asset or liability in the Consolidated Balance Sheet. As of December 31, 2007, the fair values of the contracts, which expire at various times through December 2009, are included in the Consolidated Balance Sheet as assets and liabilities, respectively, with matching adjustments to deferred cost of gas of $22.3 million.

ITEM 8. Financial Statements and Supplementary Data.

The information required here is included in the report as set forth in the *Index to Consolidated Financial Statements* on page F-1.

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

ITEM 9A. Controls and Procedures.

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Southern Union has established disclosure controls and procedures to ensure that information required to be disclosed by the Company, including consolidated entities, in reports filed or submitted under the Securities Exchange Act of 1934, as amended (*Exchange Act*), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports it files or submits under the Exchange Act is accumulated and communicated to management, including the Company's Chief Executive Officer (*CEO*) and Chief Financial Officer (*CFO*), as appropriate, to allow timely decisions regarding required disclosure. The Company performed an evaluation under the supervision and with the participation of management, including its CEO and CFO, and with the participation of personnel from its Legal, Internal Audit, Risk Management and Financial Reporting Departments, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) as of the end of the period covered by this report. Based on the evaluation, Southern Union's CEO and CFO concluded that the Company's disclosure controls and procedures were effective as of December 31, 2007.

Table of Contents

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Exchange Act Rule 13a-15(f) as a process designed by, or under the supervision of, the Company's principal executive officer and principal financial officers, or persons performing similar functions, and effected by the Company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles, and includes those policies and procedures that:

- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company;
- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company; and
- Provide reasonable assurance regarding the prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Exchange Act Rules 13a-15(c) and 15d-15(c) and Section 404 of the Sarbanes-Oxley Act of 2002 require management of the Company to conduct an annual evaluation of the Company's internal control over financial reporting and to provide a report on management's assessment, including a statement as to whether or not internal control over financial reporting is effective.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management's evaluation of the effectiveness of the Company's internal control over financial reporting was based on the framework in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (*COSO*). Based on its evaluation under that framework and applicable SEC rules, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2007.

The Company's internal control over financial reporting as of December 31, 2007 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report, which is included herein.

Southern Union Company
February 29, 2008

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is not aware of any change in Southern Union's internal control over financial reporting that occurred during the quarter ended December 31, 2007 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

ITEM 9B. Other Information.

All information required to be reported on Form 8-K for the quarter ended December 31, 2007 was appropriately reported.

PART III

ITEM 10. Directors, Executive Officers and Corporate Governance.

There is incorporated in this Item 10 by reference the information that will appear in the Company's definitive proxy statement for the 2008 Annual Meeting of Stockholders under the captions *Meetings and Committees of the Board – Board of Directors, 2007 Executive Compensation – Named Executive Officers, Section 16(a) Beneficial Ownership Reporting Compliance, Corporate Governance – Code of Ethics, Meetings and Committees of the Board – Board Committees – Corporate Governance Committee* and – *Audit Committee*.

The Company has adopted a Code that applies to its CEO, CFO, Controller and other individuals in the finance department performing similar functions. The Code is available on the Company's website at www.sug.com. If any substantive amendment to the Code is made or any waiver is granted thereunder, including any implicit waiver, the Company's CEO, CFO or other authorized officer will disclose the nature of such amendment or waiver on the website at www.sug.com or in a Current Report on Form 8-K.

The CEO Certification and Annual Written Affirmation required by the NYSE Listing Standards, Section 303A.12(a), relating to the Company's compliance with the NYSE Corporate Governance Listing Standards, was submitted to the NYSE on May 25, 2007.

ITEM 11. Executive Compensation.

There is incorporated in this Item 11 by reference the information that will appear in the Company's definitive proxy statement for the 2008 Annual Meeting of Stockholders under the captions *Compensation Discussion and Analysis, 2007 Executive Compensation - Summary Compensation Table - Grants of Plan-Based Awards - Outstanding Equity Awards at December 31, 2007 - Option Exercises and Stock Vested - Non-Qualified Deferred Compensation* and - *Potential Payments Upon Termination or Change of Control,* and *2007 Director Compensation,* and *Meetings and Committees of the Board – Board Committees – Compensation Committee*.

ITEM 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

There is incorporated in this Item 12 by reference the information that will appear in the Company's definitive proxy statement for the 2008 Annual Meeting of Stockholders under the captions *Security Ownership of Certain Beneficial Owners and Management*.

ITEM 13. Certain Relationships and Related Transactions, and Director Independence.

There is incorporated in this Item 13 by reference the information that will appear in the Company's definitive proxy statement for the 2008 Annual Meeting of Stockholders under the caption *Corporate Governance – Transactions with Related Persons* and – *Review, Approval or Ratification of Transactions with Related Persons,* and *Corporate Governance – Director Independence* and – *Independent Director Chairman*.

ITEM 14. Principal Accounting Fees and Services.

There is incorporated in this Item 14 by reference the information that will appear in the Company's definitive proxy statement for the 2008 Annual Meeting of Stockholders under the caption *Meetings and Committees of the Board – Board Committees and Meetings – Audit Committee*.

The Company's common stock is $1 par value. Therefore, the change in Common Stock, $1 par value, is equivalent to the change in the number of shares of common stock issued.

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Corporate Structure

Operations. Southern Union Company (*Southern Union* and, together with its subsidiaries, the *Company*) was incorporated under the laws of the State of Delaware in 1932. The Company owns and operates assets in the regulated and unregulated natural gas industry and is primarily engaged in the gathering, processing, transportation, storage and distribution of natural gas in the United States. Through Southern Union's wholly-owned subsidiary, Panhandle Eastern Pipe Line Company, LP (*PEPL*), and its subsidiaries (collectively, *Panhandle*), the Company owns and operates approximately 10,000 miles of interstate pipelines that transport up to 5.3 billion cubic feet per day (*Bcf/d*) of natural gas from the Gulf of Mexico, South Texas and the Panhandle regions of Texas and Oklahoma to major U.S. markets in the Midwest and Great Lakes regions. Panhandle also owns and operates a liquefied natural gas (*LNG*) import terminal, located on Louisiana's Gulf Coast, which is one of the largest operating LNG facilities in North America. Through its investment in Citrus Corp. (*Citrus*), the Company has an interest in and operates Florida Gas Transmission Company (*Florida Gas*), an interstate pipeline company that transports natural gas from producing areas in South Texas through the Gulf Coast region to Florida. See the related discussion of the change in ownership interests of CCE Holdings, LLC (*CCE Holdings*) on December 1, 2006 applicable to Florida Gas and Transwestern Pipeline Company, LLC (*Transwestern*) in *Note 3 – Acquisitions and Sales – CCE Holdings Transactions*. Through Southern Union's wholly-owned subsidiary, Southern Union Gas Services (*SUGS),* the Company owns approximately 4,800 miles of natural gas and natural gas liquids (*NGLs*) pipelines, four active cryogenic plants with a combined capacity of 410 million cubic feet per day (*MMcf/d*) and five active natural gas treating plants with a combined throughput of 470 MMcf/d. SUGS is primarily engaged in connecting wells of natural gas producers to its gathering system, treating natural gas to remove impurities to meet pipeline quality specifications, processing natural gas for the removal of NGLs, and redelivering natural gas and NGLs to a variety of markets. The operations are located primarily throughout Texas and in the southwestern United States. Through Southern Union's regulated utility operations, Missouri Gas Energy and the Massachusetts operations of New England Gas Company, the Company serves natural gas end-user customers in Missouri and Massachusetts, respectively. The Company's discontinued operations relate to its PG Energy natural gas distribution division in Pennsylvania and the Rhode Island operations of its New England Gas Company natural gas distribution division, which were sold on August 24, 2006.

2. Summary of Significant Accounting Policies

Basis of Presentation. The Company's consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (*GAAP*).

Principles of Consolidation. The consolidated financial statements include the accounts of Southern Union and its wholly-owned subsidiaries. Investments in which the Company has significant influence over the operations of the investee are accounted for using the equity method. All significant intercompany accounts and transactions are eliminated in consolidation. Certain reclassifications have been made to prior years' financial statements to conform to the current year presentation.

Purchase Accounting. The Company's March 1, 2006 acquisition of Sid Richardson Energy Services, Ltd. and related entities (collectively, *Sid Richardson Energy Services*) was accounted for using the purchase method of accounting in accordance with Financial Accounting Standards Board (*FASB*) Statement No. 141, *Business Combinations*. Under this statement, the purchase price paid by the acquirer, including transaction costs, is allocated to the assets and liabilities acquired as of the acquisition date based on their fair value. Determining the fair value of certain assets and liabilities assumed is judgmental in nature and often involves the use of significant estimates and assumptions. Southern Union generally has used outside appraisers to assist in the initial determination of fair value. The appraisal related to Southern Union's acquisition of Sid Richardson Energy Services was finalized in 2006. See *Note 3 – Acquisitions and Sales – Acquisition of Sid Richardson Energy Services.*

Southern Union effectively acquired an additional 25 percent interest in Citrus on December 1, 2006 as a result of the transactions described in *Note 3 – Acquisitions and Sales – CCE Holdings Transactions*. The allocation of fair value associated with this incremental equity investment in Citrus is accounted for under Accounting

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Principles Board Opinion 18, *The Equity Method of Accounting for Investments in Common Stock* (*APB 18*). For additional information, see *Note 9 – Unconsolidated Investments – CCE Holdings Goodwill Evaluation*.

Property, Plant and Equipment. Ongoing additions of property, plant and equipment (*PP&E*) are stated at cost. The Company capitalizes all construction-related direct labor and material costs, as well as indirect construction costs. The cost of renewals and betterments that extend the useful life of PP&E is also capitalized. The cost of repairs and replacements of minor PP&E items is charged to expense as incurred.

When PP&E is retired, the original cost less salvage value is charged to accumulated depreciation and amortization. When entire regulated operating units of PP&E are retired or sold or non-regulated properties are retired or sold, the property and related accumulated depreciation and amortization accounts are reduced, and any gain or loss is recorded in earnings.

The Company computes depreciation expense using the straight-line method. Depreciation rates for the utility plants are approved by the applicable regulatory commissions.

Computer software, which is a component of PP&E, is stated at cost and is generally amortized on a straight-line basis over its useful life on a product-by-product basis.

For additional information, see *Note 6 – Property, Plant and Equipment*.

Use of Estimates. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents. The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. Short-term investments are highly liquid investments with maturities of more than three months when purchased, and are carried at cost, which approximates market. The Company places its temporary cash investments with a high credit quality financial institution that, in turn, invests the temporary funds in a variety of high-quality short-term financial securities.

Under the Company's cash management system, checks issued but not presented to banks frequently result in book overdraft balances for accounting purposes and are classified in accounts payable in the Consolidated Balance Sheet. At December 31, 2007 and December 31, 2006, such book overdraft balances classified in accounts payable were approximately $37.5 million and $45.3 million, respectively.

Segment Reporting. FASB Statement No. 131, *Disclosures about Segments of an Enterprise and Related Information*, requires disclosure of segment data based on how management makes decisions about allocating resources to segments and measuring performance. The Company is principally engaged in the transportation and storage, gathering and processing and distribution of natural gas in the United States, and reports these operations under three reportable segments: the Transportation and Storage segment, the Gathering and Processing segment and the Distribution segment. See *Note 21 – Reportable Segments*.

Transportation and Storage Revenues. In the Transportation and Storage segment, revenues from transportation and storage of natural gas and LNG terminalling are based on capacity reservation charges and commodity usage charges. Reservation revenues are based on contracted rates and capacity reserved by customers and are recognized monthly. Revenues from commodity usage charges are also recognized monthly, based on the volumes received from or delivered to customers, depending on the tariff of that particular entity, with any differences in received and delivered volumes resulting in an imbalance. Volume imbalances generally are settled in-kind with no impact on revenues, with the exception of PEPL's subsidiary, Trunkline Gas Company, LLC (*Trunkline*), which settles imbalances in cash pursuant to its tariff, and records gains and losses on such cashout sales as a component of revenue, to the extent not owed back to customers.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Gathering and Processing Revenues and Cost of Sales Recognition. Revenue and the related cost of sales for natural gas and NGLs are recognized in the period when the physical product is delivered to the customer at the contractually agreed-upon price and title is transferred. Cost of sales primarily includes the cost of purchased natural gas and NGLs.

SUGS accounts for sale and purchase arrangements on a gross basis in the Consolidated Statement of Operations as *Operating revenues* and *Cost of gas and other energy*, respectively. Contractual arrangements establish the purchase of natural gas and NGLs at specified locations and the sale at different locations on the same or other specified dates. Both purchase and sale transactions require physical delivery of the natural gas and NGLs. The transfer of ownership is evidenced by the purchaser's assumption of title, price risk, credit risk, counterparty nonperformance risk, environmental risk, and transportation scheduling.

Gas Distribution Revenues and Gas Purchase Costs. In the Distribution segment, gas utility customers are billed on a monthly-cycle basis. The related cost of gas and revenue taxes are matched with cycle-billed revenues through utilization of purchased gas adjustment provisions in tariffs approved by the regulatory agencies having jurisdiction. Revenues from gas delivered but not yet billed are accrued, along with the related gas purchase costs and revenue-related taxes. Unbilled receivables related to the Distribution segment recorded in *Accounts receivable* in the Consolidated Balance Sheet at December 31, 2007 and 2006 were $56.8 million and $47.3 million, respectively.

Accounts Receivable and Allowance for Doubtful Accounts. The Company manages trade credit risks to minimize exposure to uncollectible trade receivables. In the Transportation and Storage and Gathering and Processing segments, prospective and existing customers are reviewed for creditworthiness based upon pre-established standards. Customers that do not meet minimum standards are required to provide additional credit support. In the Distribution segment, concentrations of credit risk in trade receivables are limited due to the large customer base with relatively small individual account balances. Additionally, the Company requires a deposit from customers in the Distribution segment who lack a credit history or whose credit rating is substandard. The Company utilizes the allowance method for recording its allowance for uncollectible accounts, which is primarily based on the application of historical bad debt percentages applied against its aged accounts receivable. Increases in the allowance are recorded as a component of operating expenses. Reductions in the allowance are recorded when receivables are written off or subsequently collected.

The following table presents the balance in the allowance for doubtful accounts and activity for the years ended December 31, 2007, 2006 and 2005:

	Years Ended December 31, 2007	2006	2005
		(In thousands)	
Beginning balance	$ 4,830	$ 15,893	$ 15,424
Additions: charged to cost and expenses (1)	11,391	9,646	22,519
Deductions: write-off of uncollectible accounts	(12,657)	(9,756)	(22,751)
Balance related to discontinued operations (2)	-	(10,968)	-
Other	580	15	701
Ending balance	$ 4,144	$ 4,830	$ 15,893

(1) Additions charged to cost and expenses applicable to continuing operations for the years ended December 31, 2007, 2006 and 2005 were $11.4 million, $9.6 million and $8.5 million, respectively.
(2) Represents elimination of the allowance for doubtful accounts balance resulting from the Company's August 24, 2006 sale of the assets of the PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Earnings Per Share. The Company's earnings per share (*EPS*) presentation conforms to FASB Statement No. 128, *Earnings per Share*. All share and per share data have been appropriately restated for all stock dividends, unless otherwise stated. See *Note 10 – Stockholders' Equity – Dividends*.

Stock-Based Compensation. The Company follows FASB Statement No. 123(R), *Accounting for Stock-Based Compensation* (*Statement No. 123R*), to account for stock-based employee compensation. The Company adopted Statement No. 123R effective January 1, 2006, using the modified prospective method. The statement requires the Company to measure all employee stock-based compensation using a fair value method and record such expense in its Consolidated Statement of Operations. Prior to adoption of Statement No. 123R, the Company used the intrinsic value method of accounting for stock-based compensation awards in accordance with APB Opinion No. 25, *Accounting for Stock Issued to Employees*, which generally resulted in no compensation expense for employee stock options with an exercise price not less than fair value on the date of grant. For more information, see *Note 24 – Stock-Based Compensation.*

Pursuant to the modified prospective application method of transition, the Company has not adjusted results of operations for prior periods. The following table reflects pro forma net earnings and net EPS adjusted for subsequent stock dividends that the Company would have reported if it had elected to adopt the fair value approach of Statement No. 123 prior to January 1, 2006:

	Year Ended December 31, 2005	
	(In thousands, except per share amounts)	
Net earnings, as reported	$	20,683
Add stock-based compensation expense included in reported net earnings, net of related taxes		3,767
Deduct total stock-based employee compensation expense determined under fair value based method for all awards, net of related taxes		4,355
Pro forma net earnings	$	20,095
Net earnings available for common stockholders per share:		
Basic- as reported	$	0.03
Basic- pro forma	$	0.02
Diluted- as reported	$	0.03
Diluted- pro forma	$	0.02

Accumulated Other Comprehensive Loss. The Company reports comprehensive income and its components in accordance with FASB Statement No. 130, *Reporting Comprehensive Income*. The main components of comprehensive income that relate to the Company are net earnings, unrealized gain (loss) on hedging activities and unrealized actuarial gain (loss) and prior service credits (cost) on pension and other postretirement plans, all of which are presented in the Consolidated Statement of Stockholders' Equity and Comprehensive Income. For more information, see *Note 22 – Accumulated Other Comprehensive Loss.*

Inventories. In the Transportation and Storage segment, inventories consist of gas held for operations and materials and supplies, both of which are carried at the lower of weighted average cost or market, while gas received from or owed back to customers is valued at market. The gas held for operations that the Company

Table of Contents

does not expect to consume in its operations in the next 12 months is reflected in non-current assets. Gas held for operations at December 31, 2007 was $187 million, or 26,001,000 million British thermal units (*MMBtu*), of which $19 million was classified as non-current. Gas held for operations at December 31, 2006 was $129 million, or 20,965,000 MMBtu, of which $14.9 million was classified as non-current. Materials and supplies include spare parts which are critical to the pipeline system operations and are valued at the lower of cost or market. Materials and supplies inventory in the Transportation and Storage segment were $12.8 million and $13.2 million at December 31, 2007 and 2006, respectively.

In the Gathering and Processing segment, inventories consist of materials and supplies and are stated at the lower of weighted average cost or market. Materials and supplies in the Gathering and Processing segment, primarily comprised of compressor components and parts, were $6.2 million and $6.9 million at December 31, 2007 and 2006, respectively.

In the Distribution segment, inventories consist of natural gas in underground storage and materials and supplies, both of which are carried at weighted average cost. Natural gas in underground storage at December 31, 2007 and 2006 was $72.8 million and $103.5 million, respectively, and consisted of 11,823,474 and 14,702,000 MMBtu, respectively. Materials and supplies inventories in the Distribution segment were $3.8 million and $3.7 million at December 31, 2007 and 2006, respectively.

Unconsolidated Investments. Investments in affiliates over which the Company may exercise significant influence, generally 20 percent to 50 percent ownership interests, are accounted for using the equity method. Any excess of the Company's investment in affiliates, as compared to its share of the underlying equity, that is not recognized as goodwill is amortized over the estimated economic service lives of the underlying assets. Other investments over which the Company may not exercise significant influence are accounted for under the cost method. The Company reviews its portfolio of unconsolidated investment securities on a quarterly basis to determine whether a decline in value is other-than-temporary. Factors that are considered in assessing whether a decline in value is other-than-temporary include, but are not limited to, the following: earnings trends and asset quality; near term prospects and financial condition of the issuer, including the availability and terms of any additional financing requirements; financial condition and prospects of the issuer's region and industry, customers and markets; and the Company's intent and ability to retain the investment. If the Company determines that a decline in value of an investment security is other-than-temporary, the Company will record a charge in its Consolidated Statement of Operations to reduce the carrying value of the security to its estimated fair value. Write-downs associated with equity-method investments are recognized in *Earnings from unconsolidated investments* in the Consolidated Statement of Operations, and write-downs associated with cost-method investments are recognized in *Other income (expenses), net*, in the Consolidated Statement of Operations. See *Note 9 – Unconsolidated Investments*.

Regulatory Assets and Liabilities. The Company is subject to regulation by certain state and federal authorities. In its Distribution segment and for certain of its operations reported as discontinued operations, the Company has accounting policies that conform to FASB Statement No. 71, *Accounting for the Effects of Certain Types of Regulation* (*Statement No. 71*), and are in accordance with the accounting requirements and ratemaking practices of the regulatory authorities. The application of these accounting policies allows the Company to defer expenses and revenues on the balance sheet as regulatory assets and liabilities when it is probable that those expenses and revenues will be allowed in the ratemaking process in a period different from the period in which they would have been reflected in the Consolidated Statement of Operations by an unregulated company. These deferred assets and liabilities then flow through the results of operations in the period in which the same amounts are included in rates and recovered from or refunded to customers. Management's assessment of the probability of recovery or pass through of regulatory assets and liabilities requires judgment and interpretation of laws and regulatory commission orders. If, for any reason, the Company ceases to meet the criteria for application of regulatory accounting treatment for all or part of its operations, the regulatory assets and liabilities related to those portions ceasing to meet such criteria would be eliminated from the Consolidated Balance Sheet and included in the Consolidated Statement of Operations for the period in which the discontinuance of regulatory accounting treatment occurs. See *Note 8 – Regulatory Assets.*

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Goodwill. The Company accounts for its goodwill and other intangible assets in accordance with FASB Statement No. 142, *Accounting for Goodwill and Other Intangible Assets*. Goodwill acquired in a purchase business combination and determined to have an indefinite useful life is not amortized, but instead is tested for impairment at a reporting unit level at least annually by applying a fair-value based test. The Company's goodwill is related to its Distribution segment. See *Note 7 – Goodwill*.

Fair Value of Financial Instruments. The carrying amounts reported in the Consolidated Balance Sheet for cash and cash equivalents, accounts receivable, accounts payable, derivative instruments and notes payable approximate their fair value. The fair value of the Company's long-term debt is estimated using current market quotes and other estimation techniques. See *Note 13 – Debt Obligations*.

Gas Imbalances. In the Transportation and Storage and Gathering and Processing segments, gas imbalances occur as a result of differences in volumes of gas received and delivered. In the Transportation and Storage segment, the Company records gas imbalance in-kind receivables and payables at cost or market, based on whether net imbalances have reduced or increased system gas balances, respectively. Net imbalances that have reduced system gas are valued at the cost basis of the system gas, while net imbalances that have increased system gas and are owed back to customers are priced, along with the corresponding system gas, at market.

In the Gathering and Processing segment, the Company records gas imbalances at the lower of cost or market. Imbalances due to a pipeline are recorded at market and imbalances due from a pipeline are recorded at the lower of cost or market. Market prices are based upon gas daily indexes.

Fuel Tracker. Liability accounts are maintained in the Transportation and Storage segment for net volumes of fuel gas owed to customers collectively. Whenever fuel is due from customers from prior under-recovery based on contractual and specific tariff provisions, Trunkline and Trunkline LNG Company, LLC (*Trunkline LNG*) record an asset. Panhandle's other companies that are subject to fuel tracker provisions record an expense when fuel is under-recovered. The pipelines' fuel reimbursement is in-kind and non-discountable.

Interest Cost Capitalized. The Company capitalizes interest on certain qualifying assets that are undergoing activities to prepare them for their intended use in accordance with FASB Statement No. 34, *Capitalization of Interest Cost*. Interest costs incurred during the construction period are capitalized and amortized over the life of the assets. Capitalized interest for the years ended December 31, 2007, 2006 and 2005 was $14.7 million, $5.4 million and $9 million, respectively.

Derivative Instruments and Hedging Activities. The Company follows FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended (*Statement No. 133*), to account for derivative and hedging activities. In accordance with this statement, all derivatives are recognized on the Consolidated Balance Sheet at their fair value. On the date the derivative contract is entered into, the Company designates the derivative as (i) a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (*a fair value hedge*); (ii) a hedge of a forecasted transaction or the variability of cash flows to be received or paid in conjunction with a recognized asset or liability (*a cash flow hedge*); or (iii) an instrument that is held for trading or non-hedging purposes (*a trading or economic hedging instrument*). For derivatives treated as a fair value hedge, the effective portion of changes in fair value are recorded as an adjustment to the hedged item. The ineffective portion of a fair value hedge is recognized in earnings if the short cut method of assessing effectiveness is not used. Upon termination of a fair value hedge of a debt instrument, the resulting gain or loss is amortized to earnings through the maturity date of the debt instrument. For derivatives treated as a cash flow hedge, the effective portion of changes in fair value is recorded in *Accumulated other comprehensive loss* until the related hedged items impact earnings. Any ineffective portion of a cash flow hedge is reported in current-period earnings. For derivatives treated as trading or economic hedging instruments, changes in fair value are reported in current-period earnings. Fair value is determined based upon quoted market prices and mathematical models using current and historical data. See *Note 11 – Derivative Instruments and Hedging Activities*.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Asset Retirement Obligations. The Company accounts for its asset retirement obligations in accordance with FASB Statement No. 143, *Accounting for Asset Retirement Obligations (ARO) (Statement No. 143*) and FASB Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations (FIN No. 47*). These accounting principles require legal obligations associated with the retirement of long-lived assets to be recognized at their fair value at the time the obligations are incurred. Upon initial recognition of a liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. The liability is accreted to its present value each period, and the capitalized cost is depreciated over the useful life of the related long-lived asset. In certain rate jurisdictions, the Company is permitted to include annual charges for cost of removal in its regulated cost of service rates charged to customers.

For more information, see *Note 20 – Asset Retirement Obligations*.

Income Taxes. Income taxes are accounted for under the asset and liability method in accordance with the provisions of FASB Statement No. 109, *Accounting for Income Taxes*. Under this method, deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in earnings in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts more likely than not to be realized

The determination of the Company's provision for income taxes requires significant judgment, use of estimates, and the interpretation and application of complex tax laws. Significant judgment is required in assessing the timing and amounts of deductible and taxable items. Reserves are established when, despite management's belief that the Company's tax return positions are fully supportable, management believes that certain positions may be successfully challenged. When facts and circumstances change, these reserves are adjusted through the provision for income taxes. Effective January 1, 2007, with the adoption of FIN 48, *Accounting for Uncertainty in Income Tax*es (*FIN 48*), the Company began evaluating its tax reserves under the recognition, measurement and derecognition thresholds as prescribed by FIN 48.

Pensions and Other Postretirement Benefit Plans. Effective December 31, 2006, the Company adopted the recognition and disclosure provisions of Statement No. 158. Statement No. 158 does not amend the expense recognition provisions of Statements No. 87, 88 and 106, but requires employers to recognize in their balance sheets the overfunded or underfunded status of defined benefit postretirement plans, measured as the difference between the fair value of the plan assets and the benefit obligation (the projected benefit obligation for pension plans and the accumulated postretirement benefit obligation for other postretirement plans). Each overfunded plan is recognized as an asset and each underfunded plan is recognized as a liability. Employers must recognize the change in the funded status of the plan in the year in which the change occurs through *Accumulated other comprehensive loss* in stockholders' equity. Effective for years ending after December 15, 2008 (with early adoption permitted), Statement No. 158 also requires plan assets and benefit obligations to be measured as of the employers' balance sheet date. The Company has not yet adopted the measurement date provisions of Statement No. 158.

The Company accounted for the measurement of its defined benefit postretirement plans under Statement No. 87 and Statement No. 106. Prior to the adoption of the recognition and disclosure provisions of Statement No. 158, Statement No. 87 required that a liability (minimum pension liability) be recorded when the accumulated benefit obligation liability exceeded the fair value of plan assets. Any adjustment was recorded as a non-cash charge to *Accumulated other comprehensive loss*. Statement No. 106 had no minimum liability provisions. Under both Statements No. 87 and 106, changes in the funded status were not immediately recognized, rather they were deferred and recognized ratably over future periods. Upon adoption of the recognition provisions of Statement No. 158, the Company recognized the amounts of these prior changes in the funded status of its defined benefit postretirement plans through *Accumulated other comprehensive loss*.

Commitments and Contingencies. The Company is subject to proceedings, lawsuits and other claims related to environmental and other matters. Accounting for contingencies requires significant judgments by management regarding the estimated probabilities and ranges of exposure to potential liability. For further discussion of the Company's commitments and contingencies, see *Note 18 – Commitments and Contingencies.*

New Accounting Principles

Accounting Principles Recently Adopted.

FIN 48, "Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement 109": Issued by the FASB in June 2006, FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 prescribes a recognition and measurement threshold attributable for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures and transition. FIN 48 became effective for fiscal years beginning after December 15, 2006. The Company's consolidated financial statements have not been materially impacted by the adoption of FIN 48 as of January 1, 2007. See *Note 15 - Taxes on Income*.

FSP No. FIN 48-1, "Definition of 'Settlement' in FASB Interpretation No. 48" (FIN 48-1): Issued by the FASB in May 2007, FIN 48-1 provides guidance on how an enterprise should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits. The Company's adoption of FIN 48, effective January 1, 2007, was consistent with FIN 48-1.

Accounting Principles Not Yet Adopted.

FASB Statement No. 157, "Fair Value Measurements": Issued by the FASB in September 2006, this Statement defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Where applicable, this Statement simplifies and codifies related guidance within GAAP. Except for certain non financial assets and liabilities more fully discussed in FSP No. FAS 157-2, "*Effective Date of FASB Statement No. 157*" (*FSP No. FAS 157*-2) which was issued by the FASB in February 2008, this Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. For those non financial assets and liabilities deferred pursuant to FSP No. FAS 157-2, this Statement is effective for financial statements for fiscal years beginning after November 15, 2008. The Company is currently evaluating the impact of this Statement on its consolidated financial statements.

FASB Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115": Issued by the FASB in February 2007, this Statement permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. The Statement does not affect any existing accounting literature that requires certain assets and liabilities to be carried at fair value. The Statement is effective for fiscal years beginning after November 15, 2007. At January 1, 2008, the Company did not elect the fair value option under the Statement and, therefore, there was no impact to the Company's consolidated financials statements.

FSP No. FIN 39-1, "Amendment of FASB Interpretation No. 39" (FIN 39-1): Issued by the FASB in April 2007, FIN 39-1 impacts entities that enter into master netting arrangements as part of their derivative transactions by allowing net derivative positions to be offset in the financial statements against the fair value of amounts (or amounts that approximate fair value) recognized for the right to reclaim cash collateral or the obligation to return cash collateral under those arrangements. FIN 39-1 is effective for fiscal years beginning after November 15, 2007. The Company has determined the impact of FIN 39-1 will not have a material impact on its consolidated financial statements.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FASB Statement No. 141 (revised), "Business Combinations". Issued by the FASB in December 2007, this Statement changes the accounting for business combinations including the measurement of acquirer shares issued in consideration for a business combination, the recognition of contingent consideration, the accounting for preacquisition gain and loss contingencies, the recognition of capitalized in-process research and development costs, the accounting for acquisition-related restructuring cost accruals, the treatment of acquisition related transaction costs and the recognition of changes in the acquirer's income tax valuation allowance. The Statement is effective for fiscal years beginning after December 15, 2008, with early adoption prohibited.

FASB Statement No. 160, "Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51". Issued by the FASB in December 2007, this Statement changes the accounting for noncontrolling (minority) interests in consolidated financial statements, including the requirements to classify noncontrolling interests as a component of consolidated stockholders' equity, and the elimination of minority interest accounting in results of operations with earnings attributable to noncontrolling interests reported as part of consolidated earnings. Additionally, the Statement revises the accounting for both increases and decreases in a parent's controlling ownership interest. The Statement is effective for fiscal years beginning after December 15, 2008, with early adoption prohibited. The Company is currently evaluating the impact of this statement on its consolidated financial statements.

Staff Accounting Bulletin No. 110 (SAB 110): Issued by the Securities and Exchange Commission (*SEC*) in December 2007, SAB 110 expresses the views of the SEC staff regarding the use of a "simplified" method, as discussed in SAB No. 107, in developing an estimate of expected term of "plain vanilla" share options in accordance with FAS 123R. The SEC staff indicated in SAB No. 107 that it would accept a company's election to use the simplified method, regardless of whether the company has sufficient information to make more refined estimates of expected term, for options granted prior to December 31, 2007. In SAB 110, the SEC staff states that it will continue to accept, under certain circumstances, the use of the simplified method beyond December 31, 2007. The Company is currently evaluating the impact of SAB 110 on its consolidated financial statements.

3. Acquisitions and Sales

Acquisition of Sid Richardson Energy Services. On March 1, 2006, Southern Union acquired 100 percent of the partnership interests in Sid Richardson Energy Services for approximately $1.6 billion in cash. The acquisition was undertaken by the Company to increase its investment in higher growth businesses. The acquisition was funded under a short-term bridge loan facility in the amount of $1.6 billion (*Sid Richardson Bridge Loan*). See *Note 13 – Debt Obligations – Short-Term Debt Obligations, Excluding Current Portion of Long-Term Debt* for additional information related to the bridge loan facility.

The principal assets of the acquired Sid Richardson Energy Services business, now known as SUGS, are located in the Permian Basin of Texas and New Mexico and include approximately 4,800 miles of natural gas and NGLs pipelines, four active cryogenic plants and five active natural gas treating plants. SUGS' operations are located primarily throughout Texas and in the southwestern United States. SUGS is primarily engaged in connecting wells of natural gas producers to its gathering system, treating natural gas to remove impurities to meet pipeline quality specifications, processing natural gas for the removal of NGLs, and redelivering natural gas and NGLs to a variety of markets. SUGS' primary sales customers include producers, power generating companies, utilities, energy marketers, and industrial users located primarily in the southwestern United States. SUGS receives hydrocarbons for purchase or transportation to market from over 240 producers and suppliers. SUGS' major natural gas pipeline interconnects are with ATMOS Pipeline, El Paso Natural Gas Company, Energy Transfer Fuel, LP, DCP Guadalupe Pipeline, LP, Enterprise Texas Pipeline, Northern Natural Gas Company, Oasis Pipeline, LP, ONEOK Wes Tex Transmission, LP, Public Service Company of New Mexico and Transwestern, a former affiliate of the Company (see *Note 9 – Unconsolidated Investments*). Its major NGLs pipeline interconnects are with Chapparal, Louis Dreyfus and Chevron.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The acquisition was accounted for using the purchase method of accounting, with the purchase price paid by the Company allocated to SUGS' net assets as of the acquisition date based on their fair values. SUGS' assets acquired and liabilities assumed have been recorded in the Consolidated Balance Sheet beginning March 1, 2006 at their estimated fair values and have been adjusted to reflect the results of a third-party appraisal and final working capital adjustments. SUGS' results of operations have been included in the Consolidated Statement of Operations since March 1, 2006. Thus, the Consolidated Statement of Operations for the periods subsequent to the acquisition are not comparable to the same periods in prior years.

The following table summarizes the estimated fair values of SUGS' assets acquired and liabilities assumed at the date of acquisition.

	At March 1, 2006 (In thousands)
Property, plant and equipment (1)	$ 1,562,835
Current assets (2)	162,793
Unconsolidated investment (3)	5,767
Other non-current assets (4)	2,618
Total assets acquired	1,734,013
Current liabilities	141,244
Deferred taxes	8,427
Other non-current liabilities	634
Total liabilities assumed	150,305
Net assets acquired	$ 1,583,708

(1) Includes an allocation of $13.5 million to other intangibles for leases and software with weighted average lives of 4 years and 1 year respectively.
(2) Includes cash and cash equivalents of approximately $53.7 million.
(3) Represents a 50 percent ownership interest in Grey Ranch Plant LP (*Grey Ranch*).
(4) Except for $33,000 of other non-current assets, balance is comprised of intangibles for customer relationships with a weighted-average life of 3 years.

The following unaudited pro forma financial information for the periods presented is reported as though the acquisition of Sid Richardson Energy Services and the related permanent financing, including utilization of the proceeds from the sales of the Company's Pennsylvania and Rhode Island natural gas distribution divisions,
occurred at January 1, 2005. The pro forma financial information is not necessarily indicative of the results that would have been obtained if the acquisition of Sid Richardson Energy Services and the related financing had been completed as of the assumed date for the period presented or of the results that may be obtained in the future.

	Year Ended December 31, 2006	2005
	(In thousands, except per share amounts)	
Operating revenue	$ 2,570,693	$ 2,636,056
Net earnings available for common shareholders from continuing operations	209,807	163,471
Net earnings available for common shareholders from continuing operations per share:		
Basic	$ 1.83	$ 1.49
Diluted	$ 1.79	$ 1.45

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Sale of PG Energy. On August 24, 2006, the Company completed the sale of the assets of its PG Energy natural gas distribution division to UGI Corporation for approximately $580 million in cash, excluding certain working capital adjustment reductions of approximately $24.4 million, which were paid in the first quarter of 2007. Proceeds from the sale were used to retire a portion of the acquisition debt incurred in connection with Southern Union's $1.6 billion purchase of Sid Richardson Energy Services.

Sale of the Rhode Island Operations of New England Gas Company. On August 24, 2006, the Company completed the sale of the Rhode Island operations of its New England Gas Company natural gas distribution division to National Grid USA for $575 million in cash, less the assumption of approximately $77 million of debt and excluding certain working capital adjustment reductions of approximately $24.9 million, which were paid in the first quarter of 2007. Proceeds from the sale were used to retire a portion of the acquisition debt incurred in connection with Southern Union's $1.6 billion purchase of Sid Richardson Energy Services.

See *Note 7 – Goodwill* and *Note 19 – Discontinued Operations* for additional information, including loss on sales amounts, related to the sales of the assets of the PG Energy natural gas distribution division and the Rhode Island operations of the New England Gas Company natural gas distribution division.

CCE Holdings Transactions.

On December 1, 2006, the Company completed a series of transactions that resulted in it increasing its effective ownership interest in Citrus from 25 percent to 50 percent and eliminating its effective 50 percent ownership interest in Transwestern. On September 14, 2006, Energy Transfer Partners, L.P. (*Energy Transfer*) entered into a definitive purchase agreement to acquire the 50 percent interest in CCE Holdings held by GE Financial Services and other investors. At the same time, Energy Transfer and CCE Holdings entered into a definitive redemption agreement, pursuant to which Energy Transfer's 50 percent ownership interest in CCE Holdings would be redeemed in exchange for 100 percent of the equity interests in Transwestern (*Redemption Agreement*). Upon the closing of the transactions under the Redemption Agreement on December 1, 2006, the Company became the sole owner of 100 percent of CCE Holdings, whose principal remaining asset was its 50 percent interest in Citrus which, in turn, owns 100 percent of Florida Gas. This resulted in the elimination of the Company's prior equity investment in CCE Holdings of $680.9 million from its Consolidated Balance Sheet as of December 1, 2006, and the separate inclusion of Citrus as an equity investment with a balance of $1.23 billion in the Company's Consolidated Balance Sheet. Prior to December 1, 2006, Citrus was a 50 percent equity investment of CCE Holdings and was included within the Company's 50 percent equity interest in CCE Holdings. The resulting increase in the Company's equity investment from CCE Holdings to Citrus is primarily attributable to the Company becoming obligated to retire $455 million of debt held by CCE Holdings and recognition of a pre-tax $74.8 million gain associated with the transaction. The debt was simultaneously paid off using the proceeds of the $465 million LNG Holdings 2006 Term Loan more fully described in *Note 13 – Debt Obligations*.

Florida Gas is an open-access interstate pipeline system extending approximately 5,000 miles with a capacity of 2.1 Bcf/d from south Texas through the Gulf Coast region of the United States to south Florida. Florida Gas' pipeline system primarily receives natural gas from natural gas producing basins along the Louisiana and Texas Gulf Coast, Mobile Bay and offshore Gulf of Mexico. Florida Gas is the principal transporter of natural gas to the Florida energy market, delivering over 70 percent of the natural gas consumed in the state. In addition, Florida Gas' pipeline system operates and maintains 60 interconnects with major interstate and intrastate natural gas pipelines, which provide Florida Gas' customers access to diverse natural gas producing regions.

At December 1, 2006, Transwestern was an open-access natural gas interstate pipeline extending approximately 2,500 miles with a capacity of 2.1 Bcf/d from the gas producing regions of west Texas, Oklahoma, eastern and northwest New Mexico and southern Colorado primarily to pipeline interconnects off the east end of its system and to the California market. Transwestern has access to three significant gas basins: the Permian Basin in west Texas and eastern New Mexico; the San Juan Basin in northwest New Mexico and southern Colorado; and the Anadarko Basin in the Texas and Oklahoma panhandle.

Table of Contents

4. Other Income and Expense Items

Operating, maintenance and general expense for the year ended December 31, 2007 includes a $6.9 million impairment of the Company's former corporate office building due to a change in the Company's expected proceeds from the sale of the building.

Other, net income of $39.9 million for the year ended December 31, 2006 primarily includes $37.2 million of pre-acquisition mark-to-market gains on put options associated with the acquisition of Sid Richardson Energy Services and $3.2 million in gains on sales of certain assets. See *Note 11 – Derivative Instruments and Hedging Activities – Gathering and Processing Segment*, for more information related to the gain on put options mentioned above.

Other, net expense for the year ended December 31, 2005 of $8.2 million primarily includes charges of $6.3 million to reserve for the other-than-temporary impairment of the Company's investment in separate technology companies and to record a liability for a related loan guaranty (see *Note 9 – Unconsolidated Investments*), partially offset by a $1.8 million gain related to the mark-to-market accounting of put options purchased in connection with the agreement to acquire Sid Richardson Energy Services. See *Note 11 – Derivative Instruments and Hedging Activities – Gathering and Processing Segment* for additional information related to the put options.

5. Earnings Per Share

The following table summarizes the Company's basic and diluted earnings EPS calculations for the years ended December 31, 2007, 2006 and 2005:

	Years Ended December 31,		
	2007	2006	2005
	(In thousands, except per share amounts)		
Net earnings from continuing operations	$ 228,711	$ 217,083	$ 153,096
Loss from discontinued operations	-	(152,952)	(132,413)
Preferred stock dividends	(17,365)	(17,365)	(17,365)
Net earnings available for common stockholders	$ 211,346	$ 46,766	$ 3,318
Weighted average shares outstanding - Basic	119,930	114,787	109,395
Weighted average shares outstanding - Diluted	120,674	117,344	112,794
Basic earnings per share:			
Net earnings available for common stockholders from continuing operations	$ 1.76	$ 1.74	$ 1.24
Loss from discontinued operations	-	(1.33)	(1.21)
Net earnings available for common stockholders	$ 1.76	$ 0.41	$ 0.03
Diluted earnings per share:			
Net earnings available for common stockholders from continuing operations	$ 1.75	$ 1.70	$ 1.20
Loss from discontinued operations	-	(1.30)	(1.17)
Net earnings available for common stockholders	$ 1.75	$ 0.40	$ 0.03

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1894 of 2431

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Basic EPS is computed based on the weighted-average number of common shares outstanding during each period. Diluted EPS is computed based on the weighted-average number of common shares outstanding during each period, increased by common stock equivalents from stock options, stock appreciation rights (*SARs*), warrants, restricted stock and convertible equity units. A reconciliation of the shares used in the basic and diluted EPS calculations is shown in the following table.

	Years Ended December 31,		
	2007	**2006**	**2005**
		(In thousands)	
Weighted average shares outstanding - Basic	119,930	114,787	109,395
Add assumed vesting of restricted stock	35	35	16
Add assumed conversion of equity units	248	2,021	2,141
Add assumed exercise of stock options and stock appreciation rights	461	501	1,242
Weighted average shares outstanding - Dilutive	120,674	117,344	112,794

For the years ended December 31, 2007, 2006 and 2005, no adjustments were required in *Net earnings available for common stockholders* in the diluted EPS calculations.

The Company repurchased nil, nil and 649,343 shares of its common stock outstanding during the years ended December 31, 2007, 2006 and 2005, respectively. The 2005 repurchases substantially occurred in private off-market large-block transactions.

There were nil, nil and 87,346 "anti-dilutive" options outstanding for the years ended December 31, 2007, 2006 and 2005, respectively. At December 31, 2007, 783,445 shares of common stock were held by various rabbi trusts for certain of the Company's benefit plans. From time to time, the Company's benefit plans may purchase shares of Southern Union common stock subject to regular restrictions.

See *Note 10 – Stockholders' Equity – 2005 Equity Issuances* and *2006 Equity Issuances* for information related to the 5.75% and 5% Equity Units issued on June 11, 2003 and February 11, 2005, respectively, which had a dilutive effect on EPS for the years 2005 through 2007.

6. Property, Plant and Equipment

The following table provides a summary of PP&E at the dates indicated:

Property, Plant and Equipment	Lives in Years (1)	December 31, 2007	December 31, 2006
		(In thousands)	
Gathering and processing plant	3-50	$ 1,678,953	$ 1,623,265
Transmission plant	36-46	1,770,742	1,400,547
Distribution plant	10-75	930,349	897,075
General - LNG	20-40	624,250	619,018
Underground storage plant	36-46	290,753	279,845
General plant and other	1-50	214,945	205,881
Plant in service (2)		5,509,992	5,025,631
Construction work in progress		377,918	178,935
		5,887,910	5,204,566
Less accumulated depreciation and amortization (2)		785,623	620,139
Net property, plant and equipment		$ 5,102,287	$ 4,584,427

(1) The composite weighted-average depreciation rates for the years ended December 31, 2007, 2006 and 2005 were 3.4 percent, 3.0 percent and 3.0 percent, respectively.

(2) Includes capitalized computerized software cost totaling:

	2007	2006
Unamortized computer software cost	$ 109,167	$ 96,556
Less accumulated amortization	45,824	41,186
Net capitalized computer software costs	$ 63,343	$ 55,370

Amortization expense of capitalized computer software costs for the years ended December 31, 2007, 2006 and 2005 was $10.6 million, $9.8 million and $11 million, respectively. Computer software costs are amortized between four and fifteen years.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

7. Goodwill

The following table displays changes in the carrying amount of goodwill, which relates solely to the Distribution segment:

Goodwill Analysis	Amounts (In thousands)
Balance as of December 31, 2004	640,547
Impairment losses	(175,000)
Balance as of December 31, 2005	465,547
Impairment losses	-
Write-off associated with sales	(376,320)
Balance as of December 31, 2006	89,227
Impairment losses	-
Balance as of December 31, 2007	$ 89,227

During 2005, the Company changed the date upon which its annual goodwill impairment assessment is performed from May 31 to November 30 to correspond with the Company's change in its fiscal year end from June 30 to December 31 and related change in the timing of completing the Company's annual operating and capital budgets. The Company believes this change is preferable. The determination of whether an impairment has occurred is based on an estimate of discounted future cash flows attributable to the Company's reporting units that have goodwill, as compared to the carrying value of those reporting units' net assets. No impairment was evident based upon the evaluations performed as of May 31, 2005 and November 30, 2005. Execution of agreements for the sale of the assets of the Company's PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division constituted a subsequent event of the type that, under GAAP, required the Company to consider the market value indicated by the definitive sale agreements in its 2005 goodwill impairment evaluation. Accordingly, based on the fair values of these reporting units derived principally from the definitive sales agreements, a goodwill impairment charge of $175 million was recorded in the 2005 period in *Loss from discontinued operations before income taxes* in the Consolidated Statement of Operations. Goodwill of $376.3 million was written off on August 24, 2006 upon the completion of the sale of the assets of the PG Energy natural gas distribution division and the Rhode Island operations of the New England Gas Company natural gas distribution division. See *Note 19 – Discontinued Operations* for related information. All goodwill reflected in the Company's Consolidated Balance Sheet is applicable to its Distribution segment. There were no goodwill impairment indicators evident for the year ended December 31, 2007 or 2006.

8. Regulatory Assets

The Company records regulatory assets and liabilities with respect to its Distribution segment operations in accordance with Statement No. 71. Although Panhandle's natural gas transmission systems and storage operations are subject to the jurisdiction of the Federal Energy Regulatory Commission (*FERC*) in accordance with the Natural Gas Act of 1938 and Natural Gas Policy Act of 1978, it does not currently apply Statement No. 71 in accounting for its operations. In 1999, prior to its acquisition by Southern Union, Panhandle discontinued the application of Statement No. 71 primarily due to the level of discounting from tariff rates and its inability to recover specific costs.

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1897 of 2431

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table provides a summary of regulatory assets at the dates indicated:

Regulatory Assets	December 31, 2007	December 31, 2006
	(In thousands)	
Pension and Postretirement Benefits	$ 32,889	$ 33,969
Environmental	21,782	15,571
Missouri Safety Program	5,546	8,751
Other	3,976	7,574
	$ 64,193	$ 65,865

The Company's regulatory assets at December 31, 2007 relating to Distribution segment operations that are being recovered through current rates totaled $44.8 million. The Company expects that the $19.4 million of regulatory assets not currently in rates will be included in its rates as rate cases occur in the future. The remaining recovery period associated with these assets ranged from 7 months to 93 months. The Company's regulatory assets at December 31, 2006 relating to Distribution segment operations that are being recovered through current rates totaled $30.7 million. The remaining recovery period associated with these assets ranged from 12 months to 93 months.

9. Unconsolidated Investments

A summary of the Company's unconsolidated investments at the dates indicated is as follows:

Unconsolidated Investments	December 31, 2007	December 31, 2006
	(In thousands)	
Equity investments:		
Citrus	$ 1,219,009	$ 1,233,172
Other	21,411	20,802
Investments at cost	-	775
	$ 1,240,420	$ 1,254,749

Equity Investments. Unconsolidated investments at December 31, 2007 and 2006 included the Company's 50 percent, 50 percent, 29 percent and 49.9 percent investments in Citrus, Grey Ranch, Lee 8 and PEI Power II, respectively. The Company accounts for these investments using the equity method. The Company's share of net earnings or loss from these equity investments is recorded in *Earnings from unconsolidated investments* in the Consolidated Statement of Operations.

Dividends. During the year ended December 31, 2007, Citrus paid dividends of $103.6 million to the Company. Citrus also declared a dividend in December 2007, payable in January 2008, of which the Company's share of $21.3 million is included in *Accounts receivable — affiliates* in the Consolidated Balance Sheet at December 31, 2007. The Company received this dividend on January 18, 2008.

For the eleven months ended November 30, 2006 and the year ended December 31, 2005, prior to becoming a wholly-owned subsidiary of the Company on December 1, 2006, CCE Holdings paid the Company distributions totaling $48.8 million and $15 million, respectively.

Earnings from discontinued operations	-	-	156,612 (3)	-	-
Net earnings	157,092	5,256	196,857	9,579	1,005

(1) The statement of operations information of CCE Holdings is through the period ended December 1, 2006. See *Note 3 - Acquisitions and Sales - CCE Holdings Transactions* for a description of the transactions that led to the Company's consolidation of CCE Holdings as of December 1, 2006.
(2) Represents equity earnings of CCE Holdings in Citrus through the period ending December 1, 2006.
(3) Earnings from discontinued operations for CCE Holdings relates primarily to the eleven months of operations of Transwestern and to the closing of the transactions on December 1, 2006 included in the Redemption Agreement, resulting in Energy Transfer's interest in CCE Holdings being exchanged for CCE Holdings' interest in Transwestern. The year ended December 31, 2006 includes a pre-tax gain of $74.8 million related to the closing of the transactions included in the Redemption Agreement. See *Note 3 - Acquisitions and Sales - CCE Holdings Transactions* for a description of the transaction.
(4) Includes Citrus results for the post-Redemption Agreement period of December 2006.

Citrus and CCE Holdings. On December 1, 2006, as more fully described in *Note 3 – Acquisitions and Sales – CCE Holdings Transactions*, the Company completed a series of transactions that resulted in it increasing its effective ownership interest in Florida Gas from 25 percent to 50 percent and eliminating its effective 50 percent ownership interest in Transwestern. Upon closing of the transactions under the Redemption Agreement on December 1, 2006, the Company became the sole owner of 100 percent of CCE Holdings, whose principal remaining asset was its 50 percent interest in Citrus. This resulted in the elimination of the Company's equity investment in CCE Holdings as of December 1, 2006 and the separate presentation of Citrus as an equity investment. Prior to December 1, 2006, Citrus was a 50 percent equity investment of CCE Holdings and included within the Company's 50 percent equity interest in CCE Holdings.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company's equity investment balances include amounts in excess of the Company's share of the underlying equity of the investee of $617.4 million and $585.6 million as of December 31, 2007 and 2006, respectively. These amounts relate to the Company's 50 percent equity ownership interest in Citrus. The equity goodwill includes an allocation of $208.4 million of excess purchase cost associated with the increased interest in Citrus effectively acquired on December 1, 2006. The combined fair value amount recorded in excess of the Company's 50 percent share of the underlying Citrus equity at December 31, 2007 was as follows:

	Excess Purchase Costs (In thousands)	Amortization Period
Property, plant and equipment	$ 2,885	40 years
Capitalized software	1,478	5 years
Long-term debt (1)	(80,204)	4-20 years
Deferred taxes (1)	(6,883)	40 years
Other net liabilities	(541)	N/A
Goodwill (2)	664,609	N/A
Sub-total	581,344	
Accumulated, net accretion to equity earnings	36,102	
Net investment in excess of underlying equity	$ 617,446	

(1) Accretion of this amount increases equity earnings and accumulated net accretion.
(2) The Company's tax basis in the investment in Citrus includes equity goodwill. See "Goodwill Evaluation" below.

Other. The Company's investments in Grey Ranch, the Lee 8 partnership and PEI Power are accounted for under the equity method. The Grey Ranch Plant, LP is a 225 MMcf/d carbon dioxide treatment facility. The Lee 8 partnership operates a 3.0 Bcf natural gas storage facility in Michigan. PEI Power II is a 45-megawatt, natural gas-fired electric generation plant operated through a joint venture with Cayuga Energy in Pennsylvania.

Investments at Cost. As of December 31, 2007, the Company, either directly or through a subsidiary, owned common and preferred stock in two non-public companies, Advent Networks, Inc. (*Advent*) and PointServe, Inc. (*PointServe*), whose fair values are not readily determinable. These investments are accounted for under the cost method. Realized gains and losses on sales of these investments, as determined on a specific identification basis, are included in the Consolidated Statement of Operations when incurred, and dividends are recognized within earnings when received. Various officers, directors and employees of Southern Union either directly or through a partnership also have an equity ownership interest in Advent. As of December 31, 2007, the Company had fully reserved the related book balances for other-than-temporary impairments. See *Note 4 – Other Income and Expense Items* for additional related information.

Contingent Matters Potentially Impacting Southern Union Through the Company's Investment in Citrus.

Phase VIII Expansion. Florida Gas plans to seek FERC approval to construct an expansion to increase its natural gas capacity into Florida by approximately 800 MMcf/d (*Phase VIII Expansion*). The proposed Phase VIII Expansion includes construction of approximately 500 miles of additional large diameter pipeline and the installation of approximately 170,000 horsepower of additional compression. Pending FERC approval, which is expected in 2009, Florida Gas anticipates an in-service date of 2011, at an approximate cost of $2 billion. Florida Gas has signed a 25-year agreement with Florida Power and Light Company, a wholly–owned subsidiary of FPL Group, Inc., for 400 MMcf/d of capacity.

On February 5, 2008, Citrus entered into a $500 million unsecured construction and term loan agreement (*Citrus Credit Agreement*) with a wholly-owned subsidiary of FPL Group Capital Inc, which is a wholly–owned subsidiary of FPL Group, Inc. Citrus will contribute the proceeds of this loan to Florida Gas in order to finance a portion of the Phase VIII Expansion.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Citrus Credit Agreement provides for a single $500 million draw after Florida Gas' receipt of a certificate from the FERC authorizing construction of the Phase VIII Expansion and Citrus' satisfaction of customary conditions precedent, which are expected to be met in the second half of 2009. On or before the Phase VIII Expansion in-service date, the construction loan will convert to an amortizing 20-year term loan with a $300 million balloon payment at maturity. The loan requires semi-annual payments of principal beginning five years and six months after the conversion to a term loan. The Citrus Credit Agreement provides for interest on the outstanding principal amount at the rate of six-month LIBOR plus 535 basis points prior to conversion to a term loan and at the twenty-year treasury rate plus 535 basis points after conversion to a term loan. The loan is not guaranteed by Florida Gas and does not include a prepayment option. The Citrus Credit Agreement contains certain customary representations, warranties and covenants and requires the execution of a negative pledge agreement by Florida Gas.

Environmental Matters. Florida Gas is responsible for environmental remediation of contamination resulting from past releases of hydrocarbons and chlorinated compounds at certain sites on its gas transmission systems. Florida Gas is implementing a program to remediate such contamination. Activities vary with site conditions and locations, the extent and nature of the contamination, remedial requirements and complexity. The ultimate liability and total costs associated with these sites will depend upon many factors. These sites are generally managed in the normal course of business or operations. The Company believes the outcome of these matters will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Spill Prevention, Control and Countermeasure Rules (SPCC). In May 2007, the U.S. EPA extended the SPCC rule compliance dates until July 1, 2009 permitting owners and operators of facilities to prepare or amend and implement SPCC Plans in accordance with previously enacted modifications to the regulations. In October of 2007, the U.S. EPA proposed amendments to the SPCC rules with the stated intention of providing greater clarity, tailoring requirements, and streamlining requirements. The Company is currently reviewing the impact of the modified regulations on its operations and may incur costs for tank integrity testing, alarms and other associated corrective actions as well as potential upgrades to containment structures. Costs associated with such activities cannot be estimated with certainty at this time, but the Company believes such costs will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

CCE Holdings' Goodwill Evaluation. CCE Holdings applied the purchase method of accounting for its acquisition of CrossCountry Energy on November 17, 2004. Goodwill associated with CCE Holdings' equity investment in Citrus accounted for under APB 18 was approximately $664.6 million and $642.2 million at December 31, 2007 and 2006, respectively. The amounts recorded at December 31, 2007 includes final purchase price allocations related to the December 1, 2006 redemption of Transwestern and the resulting increase in Southern Union's equity interest in Citrus. See *Note 3 – Acquisitions and Sales – CCE Holdings Transactions*.

Regulatory Assets and Liabilities. Florida Gas is subject to regulation by certain state and federal authorities. Florida Gas has accounting policies that conform to Statement No. 71 and are in accordance with the accounting requirements and ratemaking practices of applicable regulatory authorities. Management's assessment for Florida Gas of the probability of its recovery or pass through of regulatory assets and liabilities requires judgment and interpretation of laws and regulatory commission orders. If, for any reason, Florida Gas ceases to meet the criteria for application of regulatory accounting treatment for all or part of its operations, the regulatory assets and liabilities related to those portions ceasing to meet such criteria would be eliminated from its consolidated balance sheet, resulting in an impact to the Company's share of its equity earnings. Florida Gas' regulatory asset and liability balances at December 31, 2007 were $19.2 million and $14.8 million, respectively.

Federal Pipeline Integrity Rules. On December 15, 2003, the U.S. Department of Transportation issued a final rule requiring pipeline operators to develop integrity management programs to comprehensively evaluate their pipelines, and take measures to protect pipeline segments located in what the regulation defines as "high consequence areas" (*HCAs*). This rule resulted from the enactment of the Pipeline Safety Improvement Act of 2002. The rule requires operators to have identified HCAs along their pipelines by December 2004 and to have begun baseline integrity assessments, comprised of in-line inspection (smart pigging), hydrostatic testing or direct assessment, by June 2004. Operators were required to rank the risk of their pipeline segments containing

Table of Contents

HCAs and to complete assessments on at least 50 percent of the segments using one or more of these methods by December 2007. Assessments will generally be conducted on the higher risk segments first, with the balance being completed by December 2012. As of December 31, 2007, Florida Gas completed 62 percent of the risk assessments. In addition, some system modifications will be necessary to accommodate the in-line inspections. All systems operated by the Company will be compliant with the rule; however, while identification and location of all HCAs has been completed, it is not practicable to determine with certainty the total scope of required remediation activities prior to completion of the assessments and inspections. For Florida Gas, the required modifications and inspections are currently estimated to be in the range of approximately $21 million to $28 million per year through 2012.

Florida Gas Pipeline Relocation Costs. The Florida Department of Transportation, Florida's Turnpike Enterprise (*FDOT/FTE*) has various turnpike widening projects that have impacted or may, over time, impact one or more of Florida Gas' mainline pipelines co-located in FDOT/FTE rights-of-way. The first phase of the turnpike project includes replacement of approximately 11.3 miles of its existing 18- and 24- inch pipelines located in FDOT/FTE right-of-way in Florida. Estimated cost of such replacement would be $110 million. Florida Gas is also in discussions with the FDOT/FTE related to additional projects that may affect Florida Gas' 18- and 24-inch pipelines within FDOT/FTE rights-of-way. The total miles of pipe that may ultimately be affected by all of the FDOT/FTE widening projects, and any associated relocation and/or right-of-way costs, cannot be determined at this time.

Under certain conditions, existing agreements between Florida Gas and the FDOT/FTE require the FDOT/FTE to provide any new rights-of-way needed for relocation of the pipelines and for Florida Gas to pay for rearrangement or relocation costs. Under certain other conditions, Florida Gas may be entitled to reimbursement for the costs associated with relocation, including construction and right-of-way costs. On January 25, 2007, Florida Gas filed a complaint against the FDOT/FTE in the Seventeenth Judicial Circuit, Broward County, Florida, seeking relief with respect to three specific sets of FDOT/FTE widening projects in Broward County. The complaint seeks damages for breach of easement and relocation agreements for the one set of projects on which construction has already commenced, and injunctive relief as well as damages for the two other sets of projects on which construction has yet to commence. The FDOT/FTE filed an amended answer and counterclaim against Florida Gas on February 5, 2008 in the Broward County action. The counterclaim alleges Florida Gas is subject to estoppel and breach of contract regarding removal from service of the existing pipelines on the project currently under construction and seeks a declaratory judgment that Florida Gas is responsible for all relocation costs and is not entitled to workspace and uniform minimum area precluding FDOT/FTE activity. On February 14, 2008, the case was transferred to the Broward County Complex Business Civil Division 07. As a result, the March 10, 2008 hearing on the motion by Florida Gas for a temporary injunction enjoining the FDOT/FTE interference with the pipelines of Florida Gas will be rescheduled. On April 24, 2007, the FDOT/FTE filed a complaint against Florida Gas in the Ninth Judicial Circuit, Orange County, Florida, seeking a declaratory judgment that, under existing agreements, Florida Gas is liable for the costs of relocation associated with such projects and is not entitled to certain other rights. On August 7, 2007, the Orange County Court granted a motion by Florida Gas to abate and stay the Orange County action.

On October 24, 2007, Florida Gas filed a complaint in the US District Court of the Northern District of Florida, Tallahassee Division, against Stephanie C. Kopelousos (*Kopelousos*) in her official capacity as the Secretary of the Florida Department of Transportation, seeking to enjoin Kopelousos from violating federal law in connection with construction of the FDOT/FTE Golden Glades project, a new toll plaza in Miami-Dade County, Florida. Florida Gas seeks a declaratory judgment that certain Florida statutes are preempted by federal law to the extent such state statutes purport to regulate the abandonment or relocation schedule for the federally regulated pipelines of Florida Gas and prospective preliminary and permanent injunctive relief enjoining Kopelousos from proceeding with construction on the Golden Glades project over and around such pipelines. Kopelousos has filed a motion to dismiss and Florida Gas has responded. Based upon representations by the FDOT/FTE that work would not begin on the Golden Glades project until 2013, the parties entered into a joint stipulation of dismissal without prejudice on February 15, 2008.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Should Florida Gas be denied reimbursement by the FDOT/FTE for any possible relocation expenses, such costs are expected to be covered by operating cash flows and additional borrowings. Florida Gas expects to seek rate recovery at FERC for all reasonable and prudent costs incurred in relocating its pipelines to accommodate the FDOT/FTE to the extent not reimbursed by the FDOT/FTE. There can be no assurance that Florida Gas will be successful in obtaining complete reimbursement for any such relocation costs from the FDOT/FTE or from its customers or that the timing of reimbursement will fully compensate Florida Gas for its costs.

Citrus Trading Litigation. On January 29, 2007, Citrus Trading, Citrus, Southern Union and El Paso Corporation (collectively, *Citrus Parties*) entered into a settlement regarding litigation with Spectra Energy LNG Sales, Inc., formerly known as Duke Energy LNG Sales, Inc. (*Duke*), and its parent company, Spectra Energy Corporation (collectively, *Spectra*), whereby Spectra agreed to pay $100 million to Citrus Trading. The litigation related to a natural gas purchase contract between Citrus Trading and Duke that had been terminated in 2003. Citrus recorded a net gain of $15 million in the first quarter of 2007, $7.5 million of which is included in *Earnings from unconsolidated investments* in the Consolidated Statement of Operations. The Citrus Parties also entered into a settlement on January 29, 2007 with Enron Corp. pursuant to which CCE Holdings' obligation to remit to Enron Corp. certain proceeds of any Duke settlement was reduced, resulting in a $7.6 million gain recorded in *Earnings from unconsolidated investments* in the Consolidated Statement of Operations.

Citrus Enron Bankruptcy Receivable. Citrus previously filed bankruptcy related claims against an Enron-affiliated bankrupt company. The parties reached a settlement in the amount of $22.7 million on the allowed claim, which was approved by the bankruptcy court in March 2007. Citrus fully reserved for the amounts in 2001 and sold the receivable claim in the second quarter of 2007 to a third-party for $11.4 million, resulting in a gain. *Earnings from unconsolidated investments* includes $5.7 million of the gain ($3.6 million, net of tax), representing the Company's 50 percent equity share of the gain.

Litigation.

Jack Grynberg. Jack Grynberg, an individual, has filed actions against a number of companies, including Florida Gas, alleging mis-measurement of gas volumes and Btu content, resulting in lower royalties to mineral interest owners. For additional information related to these filed actions, see *Note 18 – Commitments and Contingencies – Litigation.*

10. Stockholders' Equity

Dividends. The table below presents the amount of cash dividends declared and paid in the respective periods:

Shareholder Record Date	Date Paid	Amount Per Share	Amount Paid (In thousands)
December 28, 2007	January 11, 2008	$ 0.15	$ 17,999
September 28, 2007	October 12, 2007	0.10	11,997
June 29, 2007	July 13, 2007	0.10	11,995
March 30, 2007	April 13, 2007	0.10	11,977
December 29, 2006	January 12, 2007	$ 0.10	$ 11,961
September 29, 2006	October 13, 2006	0.10	11,956
June 30, 2006	July 14, 2006	0.10	11,197

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2006, the Company reduced *Retained earnings (deficit)* and *Premium on capital stock* in the Consolidated Statement of Stockholders' Equity and Comprehensive Income by $19.9 million (to the extent that retained earnings were available) and $26.4 million, respectively.

Prior to 2006, the Company distributed common stock dividends in lieu of cash dividend payments. On September 1, 2005, the Company distributed its then annual five percent common stock dividend to stockholders of record on August 22, 2005. Unless otherwise stated, all per share and share data in this report for periods prior to 2006 have been restated to give effect to the stock dividend.

Under the terms of the indenture governing its Senior Notes, Southern Union may not declare or pay any cash or asset dividends on its common stock (other than dividends and distributions payable solely in shares of its common stock or in rights to acquire its common stock) or acquire or retire any shares of its common stock, unless no event of default exists and certain financial ratio requirements are satisfied. Currently, the Company is in compliance with these requirements and, therefore, the Senior Note indenture does not prohibit the Company from paying cash dividends.

Stock Award Plans. On May 9, 2005, the stockholders of the Company adopted the Southern Union Company Amended and Restated 2003 Stock and Incentive Plan (*Amended 2003 Plan*). The Amended 2003 Plan allows for awards in the form of stock options (either incentive stock options or non-qualified options), SARs, stock bonus awards, restricted stock, performance units or other equity-based rights. The persons eligible to receive awards under the Amended 2003 Plan include all of the employees, directors, officers and agents of, and other service providers to, the Company and its affiliates and subsidiaries. The Amended 2003 Plan provides that each non-employee director will receive annually a restricted stock award, or at the election of the non-employee director options having an equivalent value, which will be granted at such time or times as the compensation committee shall determine. Under the Amended 2003 Plan: (i) no participant may receive in any calendar year awards covering more than 500,000 shares; (ii) the exercise price for a stock option may not be less than 100 percent of the fair market value of the common stock on the date of grant; and (iii) no award may be granted more than ten years after the date of the Amended 2003 Plan.

On May 2, 2006, the stockholders of the Company adopted the Second Amended and Restated 2003 Plan (*Second Amended 2003 Plan*), which included the following changes to the Amended 2003 Plan:

- An increase from 7,000,000 to 9,000,000 in the aggregate number of shares of stock that may be issued under the plan;
- An increase from 725,000 to 1,500,000 in the total number of shares of stock that may be issued pursuant to stock awards, performance units and other equity-based rights; and
- An increase from 4,000 to 5,000 in the maximum number of shares of restricted common stock that each non-employee director is eligible to receive annually.

On July 1, 2005, pursuant to the respective separation agreements between the Company and each of its former Vice Chairman of the Board of Directors and former Chief Financial Officer, the Company modified the terms of approximately 307,000 options to purchase its common stock that had previously been granted to and were exercisable by these executives under the Company's 1992 Long-Term Stock Incentive Plan (*1992 Plan*) and Amended 2003 Plan. As a result of the modification and re-valuation of the options as of July 1, 2005, the Company recorded $3.8 million of non-cash compensation expense during the quarter ended September 30, 2005. All of these options were exercised as of December 31, 2006.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company maintains its 1992 Plan, under which options to purchase 8,491,540 shares of its common stock were authorized to be granted until July 1, 2002 to officers and key employees at prices not less than the fair market value on the date of grant. The 1992 Plan allowed for the granting of SARs, dividend equivalents, performance shares and restricted stock. Options granted under the 1992 Plan are exercisable for ten years from the date of grant or such lesser period as may be designated for particular options, and become exercisable after a specified period of time from the date of grant in cumulative annual installments. Options typically vest at the rate of 20 percent per year, but may vest over a longer or shorter period as designated for a particular option grant. At December 31, 2006, there were no shares available for future option grants under the 1992 Plan.

In connection with the acquisition of Pennsylvania Enterprises, Inc., the Company adopted the Pennsylvania Division 1992 Stock Option Plan (*Pennsylvania Option Plan*) and the Pennsylvania Division Stock Incentive Plan (*Pennsylvania Incentive Plan* and, together with the Pennsylvania Option Plan, *the Pennsylvania Plans*). At December 31, 2007, no options were outstanding and no additional options will be granted under the Pennsylvania Plans. During the year ended December 31, 2005, options exercised under the Pennsylvania Option Plan were 466,127. During the year ended December 31, 2005, 139,837 and 91,831 options were exercised and canceled, respectively, under the Pennsylvania Incentive Plan.

For more information on share-based awards, see *Note 24 – Share-Based Compensation*.

2006 Equity Issuances. On August 16, 2006, the Company received $125 million from the issuance of 7,413,074 shares of common stock in conjunction with the remarketing of its 2.75% Senior Notes and the consummation of the forward stock purchase contracts that were issued with the 2.75% Senior Notes as part of the June 2003 5.75% Equity Units issuance. See *Note 13 – Debt Obligations – Long-Term Debt*.

2005 Equity Issuances. On February 11, 2005, Southern Union issued 2,000,000 of its 5% Equity Units at a public offering price of $50 per unit, resulting in net proceeds to the Company, after underwriting discounts and commissions and other transaction related costs, of $97.4 million. Southern Union used the proceeds to repay the balance of the bridge loan used to finance a portion of its investment in CCE Holdings and to repay borrowings under its credit facilities. Each 5% Equity Unit consisted of a $1/20^{th}$ interest in a $1,000 principal amount of Southern Union's 4.375% Senior Notes due 2008 (see *Note 13 – Debt Obligations*) and a forward stock purchase contract that obligated the holder to purchase Southern Union common stock on February 16, 2008, at a price based on the preceding 20-day average closing price (subject to a minimum and maximum conversion price per share of $22.74 and $28.42, respectively, which were subject to adjustments for future stock splits or stock dividends). On February 19, 2008, the Company issued 3,693,240 shares of its common stock upon the consummation of the forward purchase contracts. The 5% Equity Units carried a total annual coupon of 5.00 percent (4.375 percent annual face amount of the senior notes plus 0.625 percent annual contract adjustment payments). The present value of the 5% Equity Units' contract adjustment payments was initially charged to stockholders' equity, with an offsetting credit to liabilities. The liability was accreted over three years by interest charges to the Consolidated Statement of Operations. Before the issuance of Southern Union's common stock upon settlement of the purchase contracts, the 5% Equity Units were reflected in the Company's diluted EPS calculations using the treasury stock method. See *Note 25 – Subsequent Event*.

On February 9, 2005, Southern Union issued 14,913,042 shares of common stock at a public offering price of $23.00 per share, resulting in net proceeds, after underwriting discounts and commissions of $332.6 million. Southern Union used the net proceeds to repay a portion of the bridge loan used to finance a portion of its investment in CCE Holdings.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

11. Derivative Instruments and Hedging Activities

Interest Rate Swaps. The Company uses interest rate swaps to reduce interest rate risks and to manage interest expense. By entering into these agreements, the Company converts floating-rate debt into fixed-rate debt, or alternatively converts fixed-rate debt to floating-rate debt. Interest differentials paid or received under the swap agreements are reflected as an adjustment to interest expense. These interest rate swaps are financial derivative instruments that qualify for hedge treatment. The notional amounts of the interest rate swaps are not exchanged and do not represent exposure to credit loss. In the event of default by a counterparty, the risk in these transactions is the cost of replacing the agreements at current market rates. For the years ended December 31, 2007, 2006 and 2005, there was no swap ineffectiveness. At December 31, 2007, $17.1 million is included in *Deferred Credits* in the Consolidated Balance Sheet related to the fixed-rate interest rate swaps on the $455 million Term Loan due 2012. As of December 31, 2007, approximately $3.2 million of net after-tax losses in *Accumulated other comprehensive loss* will be amortized into interest expense during the next twelve months related to the swap agreements. Current market pricing models were used to estimate fair values of interest rate swap agreements.

Treasury Rate Locks. The Company enters into treasury rate locks to hedge the changes in cash flows of anticipated interest payments from changes in treasury rates prior to the issuance of new debt instruments. The Company accounts for the treasury rate locks as cash flow hedges. At December 31, 2007, $1.7 million is included in *Prepayments and Other* in the Consolidated Balance Sheet related to the treasury rate locks entered into during 2007. As of December 31, 2007, approximately $1 million of net after-tax losses in *Accumulated other comprehensive loss* will be amortized into interest expense during the next twelve months related to these treasury rate locks.

Distribution Segment

Economic Hedging Activities. During 2007, 2006 and 2005, the Company entered into natural gas commodity swaps and collars to mitigate price volatility of natural gas passed through to utility customers in the Distribution Segment. The cost of the derivative products and the settlement of the respective obligations are recorded through the gas purchase adjustment clause as authorized by the applicable regulatory authority and therefore do not impact earnings. The fair values of the contracts are recorded as an adjustment to a regulatory asset or liability in the Consolidated Balance Sheet. As of December 31, 2007 and 2006, the fair values of the contracts, which expire at various times through December 2009, are included in the Consolidated Balance Sheet as assets and liabilities, respectively, with matching adjustments to deferred cost of gas of $22.3 million and $19 million, respectively.

Gathering and Processing Segment

The Company markets natural gas and NGLs in its Gathering and Processing segment and manages associated commodity price risks using derivative financial instruments. These instruments involve not only the risk of transacting with counterparties and their ability to meet the terms of the contracts but also the risk associated with unmatched positions and market fluctuations. The Company is required to record derivative financial instruments at fair value, which is determined by commodity exchange prices, over-the-counter quotes, volatility, time value, counterparty credit and the potential impact on market prices of liquidating positions in an orderly manner over a reasonable period of time under current market conditions.

Table of Contents

Economic Hedging Derivatives. The Company uses various derivative financial instruments to manage commodity price risk and to take advantage of pricing anomalies among derivative financial instruments related to natural gas and NGLs. The Company uses a combination of crude oil puts, NGL gross processing spread puts, fixed-price physical forward contracts, exchange-traded futures and options, and fixed or floating index and basis swaps to manage sales commodity price risk. These economic hedge derivative financial instruments allow the Company to preserve value and protect margins because changes in the value of the derivative financial instruments are effective in offsetting changes in the physical market and reducing basis risk. Basis risk exists primarily due to price differentials between cash market delivery locations and futures contract delivery locations. For the year ended December 31, 2007 and the ten-months ended December 31, 2006, gains of $1.2 million and $1.2 million, respectively, were recorded for the economic hedging activities. At December 31, 2007 and 2006, the net asset derivative balance was $6.7 million and $10.3 million, respectively.

The Company realizes NGL and/or natural gas volumes from its contractual arrangements associated with gas processing services it provides. The Company utilizes various economic hedge techniques to manage its price exposure of Company owned volumes, including processing spread puts and natural gas swaps. Expected NGL and/or natural gas volumes compared to the actual volumes sold and the effectiveness of the associated economic hedges utilized by the Company can be unfavorably impacted by:

- Processing plant outages;
- Higher than anticipated FF&U efficiency levels;
- Impact of commodity prices in general;
- Lower than expected recovery of NGLs from the residue gas stream; and
- Lower than expected recovery of natural gas volumes to be processed.

For the purpose of reducing its processing spread exposure, the Company purchased put options for the period February 1, 2008 through December 31, 2008. The put options reduce its processing spread exposure on 11,075 MMBtu/day, or approximately 25 percent of the Company's expected NGLs sales volumes based on 2007 historical processing trends. The put options set a floor for the Company’s processing spread at $8.15 per MMBtu for such volumes. The cost of the December 2007 transaction was $5.2 million, or $1.41 per MMBtu.

Additionally, in February 2008, for the period March 1, 2008 through December 31, 2008, the Company entered into various natural gas swaps which have reduced its commodity price exposure related to 30,000 MMBtu/day. The natural gas swaps have effectively established an average fixed index price at locations where we sell natural gas, at the “basis adjusted price” of $8.28 per MMBtu for the related period. The combination of the processing spread put option with an equal MMBtu portion of the natural gas swap effectively establishes a floor of $15.02 per MMBtu for 25 percent of the Company’s expected NGL sales volumes as noted above. In February 2008, the Company also entered into natural gas swaps associated with 10,000 MMBtu/day for the period January 1, 2009 through December 31, 2009, fixing the 2009 basis adjusted sales price of such volumes at $8.19 per MMBtu.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Accounting Hedges Designated as Cash Flow Hedges. In accordance with Statement No. 133, the Company designated its natural gas, propane and ethane put options as accounting (cash flow) hedges. The Company used such accounting hedges to manage its commodity price risk and reduce fluctuations in operating cash flows. All of the Company's put options on its natural gas, propane and ethane products expired as of December 31, 2007.

The table below summarizes the financial statement impact of hedged put options related to natural gas and NGLs the Company had in place during the respective periods.

	Years Ended December 31,	
	2007	2006
	(In thousands)	
Change in fair value of commodity hedges - increase (decrease) in *Accumulated other comprehensive loss,* excluding tax expense effect of $(775) and $7,556, respectively	$ (2,054)	$ 19,826
Reclassification of unrealized gain on commodity hedges - increase of *Operating Revenues*, excluding tax expense effect of $2,425 and $4,266, respectively	6,422	11,350
Loss realized upon cash settlement - decrease of *Operating revenues*	718	45
Loss on ineffectiveness of commodity hedges	-	1,634
Cash realized on settlement of commodity hedges	35,374	74,214

At December 31, 2007 and 2006, the Company reported in the Consolidated Balance Sheet in *Prepayments and other assets*, derivative asset balances for its hedged put options of nil and $38.1 million, respectively. During 2007, the Company reclassified all previously deferred gains included in *Accumulated other comprehensive loss* into earnings.

12. Preferred Securities

On October 8, 2003, the Company issued 9,200,000 depositary shares, each representing a 1/10th interest in a share of its 7.55% Noncumulative Preferred Stock, Series A (Liquidation Preference $250 Per Share) (*Preferred Stock*), at the public offering price of $25 per share, or $230 million in the aggregate. The total net proceeds were used to repay debt under the Company's revolving credit facilities. The Company may redeem the Preferred Stock beginning on October 8, 2008.

Less short-term debt	123,000		100,000	
Total consolidated long-term debt obligations	$ 2,960,326		$ 2,689,656	

(1) At December 31, 2006, this Term Loan was due in 2008. See the following *LNG Holdings Term Loans* discussion for information related
to the extension of the maturity date from April 4, 2008 to June 29, 2012.

(2) Includes nil and $1.3 million of fair value of swaps related to debt classified as current at December 31, 2007 and 2006, respectively.

(3) Excludes $100 million related to the 4.375% Senior Notes that were remarketed in February 2008 resulting in a change of the

maturity
date to February 16, 2010. See Note 25 — Subsequent Event for additional related information.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Long-Term Debt.

Southern Union has $3.4 billion of long-term debt, including net premiums of $6.1 million, recorded at December 31, 2007, of which $434.7 million is current. Debt of $2.98 billion is at fixed rates ranging from 4.38 percent to 9.44 percent. Southern Union also has floating rate debt totaling $412.2 million, bearing an interest rate of 5.37 percent as of December 31, 2007.

As of December 31, 2007, the Company has scheduled long-term debt payments, excluding credit facility payments and net premiums on debt, as follows:

	2008	2009	2010	2011	2012	2013 and thereafter
			(In thousands)			
Southern Union Company	$ 125,000	$ -	$ 100,000	$ -	$ -	$ 1,279,265
Panhandle	309,831	60,623	40,500	-	857,389	616,305
Total	$ 434,831	$ 60,623	$ 140,500	$ -	$ 857,389	$ 1,895,570

Each note, debenture or bond is an obligation of Southern Union or a unit of Panhandle, as noted above. Panhandle's debt is non-recourse to Southern Union. All debts that are listed as debt of Southern Union are direct obligations of Southern Union. None of the Company's long-term debt is cross-collateralized and most of its long-term debt obligations contain cross-default provisions.

6.20% Senior Notes. On October 26, 2007, PEPL issued $300 million in senior notes due November 1, 2017 with an interest rate of 6.20 percent (*6.20% Senior Notes*). In connection with the issuance of the 6.20% Senior Notes, the Company incurred underwriting and discount costs of approximately $2.7 million. The debt was priced to the public at 99.741 percent, resulting in $297.3 million in proceeds to the Company. The proceeds were initially used to repay approximately $246 million outstanding under the credit facilities. The remaining proceeds of $51.3 million were invested by the Company and subsequently utilized to fund working capital obligations.

LNG Holdings Term Loans. On March 15, 2007, LNG Holdings, as borrower, and PEPL and Trunkline LNG, as guarantors, entered into a $455 million unsecured term loan facility due March 13, 2012 (*2012 Term Loan*). The interest rate under the 2012 Term Loan is a floating rate tied to a LIBOR rate or prime rate at the Company's option, in addition to a margin tied to the rating of PEPL's senior unsecured debt. The proceeds of the 2012 Term Loan were used to repay approximately $455 million in existing indebtedness that matured in March 2007, including the $200 million 2.75% Senior Notes and the LNG Holdings $255.6 million Term Loan. LNG Holdings has entered into interest rate swap agreements that effectively fixed the interest rate applicable to the 2012 Term Loan at 4.98 percent plus a credit spread of 0.625, based upon PEPL's credit rating for its senior unsecured debt. See *Note 11 – Derivative Instruments and Hedging Activities – Interest Rate Swaps* for information regarding interest rate swaps.

In connection with the December 1, 2006 closing of the Redemption Agreement, LNG Holdings, as borrower, and PEPL and CrossCountry Citrus, LLC, as guarantors, entered into a $465 million unsecured term loan facility due April 4, 2008 (*2006 Term Loan*). On June 29, 2007, the parties entered into an amended and restated term loan facility (*Amended Credit Agreement*). The Amended Credit Agreement extended the maturity of the 2006 Term Loan from April 4, 2008 to June 29, 2012, and decreased the interest rate from LIBOR plus 87.5 basis points to LIBOR plus 55 basis points, based upon the current credit rating of PEPL's senior unsecured debt. The balance of the term loan facility at December 31, 2007 was $412.2 million.

Exhibit No. HIO-74
Page 1912 of 2431

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Junior Subordinated Notes. On October 23, 2006, the Company issued $600 million in junior subordinated notes due November 1, 2066 with an initial fixed interest rate of 7.20 percent (*Junior Subordinated Notes*). In connection with the issuance of the Junior Subordinated Notes, the Company incurred underwriting and discount costs of approximately $9 million. The debt was priced to the public at 99.844 percent, resulting in $590.1 million in proceeds to the Company. The outstanding Sid Richardson Bridge Loan balance of approximately $525 million was retired using the proceeds from the debt offering and the remaining approximately $65 million of debt offering proceeds were used to pay down a portion of the Company's credit facilities.

Pursuant to the terms of the Junior Subordinated Notes, the Company may at its discretion defer interest payments for up to ten consecutive years at a time. The Company may make such election on more than one occasion, provided that payment of all previously deferred interest has been made and the deferral period does not extend beyond the November 1, 2066 maturity date, at which time all deferred interest would become due and payable.

The Company has entered into a covenant agreement for the benefit of holders of a designated series of indebtedness, other than the Junior Subordinated Notes, that it will not redeem or repurchase the Junior Subordinated Notes, in whole or in part, on or before October 31, 2036, unless, subject to certain limitations, during the 180 days prior to the date of that redemption or repurchase, the Company has received an equal or greater amount of net cash proceeds from the sale of common stock or other qualifying securities.

Remarketing Obligation. In June 2003, the Company issued $125 million aggregate principal amount of 2.75% senior notes due August 16, 2006 in conjunction with the issuance of its 5.75% equity units. Each equity unit was comprised of a senior note in the principal amount of $50 and a forward purchase contract under which the equity unit holder agreed to purchase shares of Southern Union common stock on August 16, 2006 at a price based on the preceding 20-trading day average closing price subject to a minimum conversion price per share of $13.82 (in which case 9.044 million shares would be issued) and a maximum conversion price of $16.86 (in which case 7.413 million shares would be issued). On August 16, 2006, the Company remarketed the 2.75% senior notes, which are now due August 16, 2008.

As part of the remarketing, the interest rate on the senior notes was reset to 6.15 percent. The senior notes paid interest in arrears on each February 16 and August 16, which commenced on February 16, 2007. The senior notes will mature on August 16, 2008. The senior notes are unsecured and rank equally with all of the Company's other unsecured and unsubordinated indebtedness from time to time outstanding.

Short-Term Debt Obligations, Excluding Current Portion of Long-Term Debt.

Credit Facilities. On September 29, 2005, Southern Union entered into a Fourth Amended and Restated Revolving Credit Facility in the amount of $400 million (*Long-Term Facility*). The Long-Term Facility has a five-year term and matures on May 28, 2010. The Long-Term Facility replaced the Company's May 28, 2004 long-term credit facility in the same amount. Borrowings under the Long-Term Facility are available for Southern Union's working capital and letter of credit requirements and for other general corporate purposes. The Long-Term Facility is subject to a commitment fee based on the rating of the Company's senior unsecured notes (*Senior Notes*). As of December 31, 2007, the commitment fees were an annualized 0.15 percent. The Company has an additional $30 million of availability under uncommitted line of credit facilities with various banks.

Balances of $123 million and $100 million were outstanding under the Company's credit facilities at effective interest rates of 5.82 percent and 6.02 percent at December 31, 2007 and 2006, respectively. The Company classifies its borrowings under the credit facilities due May 28, 2010 as short-term debt, as the individual borrowings are generally for periods of 15 to 180 days. At maturity, the Company may (i) retire the outstanding balance of each borrowing with available cash on hand and/or proceeds from a new borrowing, or (ii) at the Company's option, extend the borrowing's maturity date for up to an additional 90 days. As of February 22, 2008, there was a balance of $45 million outstanding under the Company's credit facilities, with an effective interest rate of 3.77 percent.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Sid Richardson Bridge Loan. On March 1, 2006, Southern Union acquired Sid Richardson Energy Services for approximately $1.6 billion in cash. The acquisition was funded under a bridge loan facility in the amount of $1.6 billion that was entered into on March 1, 2006 between the Company and a group of banks as lenders. On August 24, 2006, the Company applied approximately $1.1 billion in net proceeds from the sales of the assets of its PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division to repayment of the Sid Richardson Bridge Loan. See *Note 19 – Discontinued Operations* for related information. On October 23, 2006, the Company retired the remainder of the Sid Richardson Bridge Loan using a portion of the proceeds received from the Company's issuance of $600 million in Junior Subordinated Notes.

Interest expense totaling $49.2 million related to the Sid Richardson Bridge Loan was incurred during 2006 at an average interest rate of 5.72 percent. Debt issuance costs totaling $9.2 million were incurred in connection with the financing of the acquisition, of which $7.8 million was related to the Sid Richardson Bridge Loan and $1.4 million was related to the placement of permanent financing. The Company fully amortized the $7.8 million of the Sid Richardson Bridge Loan debt issuance cost to interest expense during 2006.

Other Debt Activity.

In conjunction with the Company's sale of the assets of its PG Energy natural gas distribution division, $15 million of the Company's First Mortgage Bonds were repaid. National Grid USA assumed $77 million of the Company's First Mortgage Bonds in conjunction with its purchase of the Rhode Island operations of the Company's New England Gas Company natural gas distribution division. See *Note 19 – Discontinued Operations* for related information.

On July 14, 2005, the Company amended an existing short-term bank note to increase the principal amount thereunder from $15 million to $65 million in order to provide additional liquidity. The note is repayable upon demand. The Company borrowed $50 million under the note on July 19, 2005 at an initial interest rate of 4.54 percent, which was based on LIBOR plus 70 basis points. The Company repaid the $50 million additional principal amount on April 17, 2006.

Restrictive Covenants. The Company is not party to any lending agreement that would accelerate the maturity date of any obligation due to a failure to maintain any specific credit rating. Certain covenants exist in certain of the Company's debt agreements that require the Company to maintain a certain level of net worth, to meet certain debt to total capitalization ratios and to meet certain ratios of earnings before depreciation, interest and taxes to cash interest expense. A failure by the Company to satisfy any such covenant would give rise to an event of default under the associated debt, which could become immediately due and payable if the Company did not cure such default within any permitted cure period or if the Company did not obtain amendments, consents or waivers from its lenders with respect to such covenants.

The Company's restrictive covenants include restrictions on debt levels, restrictions on liens securing debt and guarantees, restrictions on mergers and on the sales of assets, capitalization requirements, dividend restrictions, cross default and cross-acceleration and prepayment of debt provisions. A breach of any of these covenants could result in acceleration of Southern Union's debt and other financial obligations and that of its subsidiaries. Under the current credit agreements, the significant debt covenants and cross defaults are as follows:

(a) Under the Company's Long-Term Facility, the consolidated debt to total capitalization ratio, as defined therein, cannot exceed 65 percent.
(b) Under the Company's Long-Term Facility, the Company must maintain an earnings before interest, tax, depreciation and amortization interest coverage ratio of at least 2.00 times.
(c) Under the Company's First Mortgage Bond indentures for the Fall River Gas division of New England Gas Company, the Company's consolidated debt to total capitalization ratio, as defined therein, cannot exceed 70 percent at the end of any calendar quarter.
(d) All of the Company's major borrowing agreements contain cross-defaults if the Company defaults on an agreement involving at least $3 million of principal.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In addition to the above restrictions and default provisions, the Company and/or its subsidiaries are subject to a number of additional restrictions and covenants. These restrictions and covenants include limitations on additional debt at some of its subsidiaries; limitations on the use of proceeds from borrowing at some of its subsidiaries; limitations, in some cases, on transactions with its affiliates; limitations on the incurrence of liens; potential limitations on the abilities of some of its subsidiaries to declare and pay dividends and potential limitations on some of its subsidiaries to participate in the cash management program; and limitations on the Company's ability to prepay debt.

Retirement of Debt Obligations

The Company plans to refinance its $425 million of debt maturing in August 2008 with new capital market debt or bank financings. Alternatively, should the Company not be successful in its refinancing efforts, the Company may choose to retire such debt upon maturity by utilizing some combination of cash flows from operations, draw downs under existing credit facilities, and altering the timing of controllable expenditures, among other things. The Company believes, based on its investment grade credit ratings and general financial condition, successful historical access to capital and debt markets, current economic and capital market conditions and market expectations regarding the Company's future earnings and cash flows, that it will be able to refinance and/or retire these obligations under acceptable terms prior to their maturity. There can be no assurance, however, that the Company will be able to achieve acceptable refinancing terms in any negotiation of new capital market debt or bank financings. Moreover, there can be no assurance the Company will be successful in its implementation of these refinancing and/or retirement plans and the Company's inability to do so would cause a material adverse effect on the Company's financial condition and liquidity.

14. Benefits

Pension and Other Postretirement Benefit Plans. The Company has funded non-contributory defined benefit pension plans (*pension plans*) which cover substantially all Distribution segment employees. Normal retirement age is 65, but certain plan provisions allow for earlier retirement. Pension benefits are calculated under formulas principally based on average earnings and length of service for salaried and non-union employees and average earnings and length of service or negotiated non-wage based formulas for union employees. At the beginning of 2006, the Company had eight pension plans. Effective August 24, 2006, the Company's responsibility for benefit obligations under five of these plans was relieved upon the transfer of the plans to the buyers of the assets of PG Energy and the Rhode Island operations of New England Gas Company.

The Company has postretirement health care and life insurance plans (*other postretirement plans*) which cover substantially all Distribution and Transportation and Storage segment employees and effective January 1, 2008, all Corporate employees. The health care plans generally provide for cost sharing between the Company and its retirees in the form of retiree contributions, deductibles, coinsurance and a fixed cost cap on the amount the Company pays annually to provide future retiree health care coverage under certain of these plans. At the beginning of 2006, the Company had six other postretirement plans. Effective August 24, 2006, the Company's responsibility for benefit obligations under two of these plans was relieved upon the transfer of the plans to the buyer of the Rhode Island operations of New England Gas Company.

	$ 28,729	$ 42,891	$ (25,723)	$ (29,563)

(1) Effective August 24, 2006, the Company transferred five pension plans and two other postretirement plans to the buyers of the assets of the Company's PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company

natural gas distribution division.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The accumulated benefit obligation for all defined benefit pension plans was $155 million and $155.9 million at December 31, 2007 and 2006, respectively.

The following table summarizes information for plans with an accumulated benefit obligation in excess of plan assets:

	Pension Benefits December 31, 2007	Pension Benefits December 31, 2006	Other Postretirement Benefits December 31, 2007	Other Postretirement Benefits December 31, 2006
	(In thousands)			
Projected benefit obligation	$ 162,824	$ 162,955	N/A	N/A
Accumulated benefit obligation	154,950	155,876	$ 71,571	$ 68,033
Fair value of plan assets	128,342	108,633	47,890	39,937

Net Periodic Benefit Cost.

Net periodic benefit cost for the years ended December 31, 2007, 2006 and 2005 includes the components noted in the table below. The table below has been reclassified for all prior periods to present net periodic benefit cost included in operating expenses from continuing operations, and excludes the net periodic benefit cost of the Company's discontinued operations. Net periodic pension cost for discontinued operations totaled $50.4 million and $7.9 million for the years ended December 31, 2006 and 2005, respectively. Net periodic other postretirement benefit costs for discontinued operations totaled $(13.8) million and $2.9 million for the years ended December 31, 2006 and 2005, respectively. See *Note 19 – Discontinued Operations* for additional related information.

	Pension Benefits Years Ended December 31, 2007	2006	2005	Other Postretirement Benefits Years Ended December 31, 2007	2006	2005
	(In thousands)					
Net Periodic Benefit Cost:						
Service cost	$ 2,715	$ 2,599	$ 2,550	$ 1,788	$ 1,890	$ 2,908
Interest cost	9,388	8,899	9,355	4,053	3,615	4,908
Expected return on plan assets	(9,619)	(8,909)	(8,728)	(2,858)	(1,871)	(1,375)
Prior service cost amortization	623	584	782	(2,809)	(3,011)	(551)
Actuarial (gain) loss amortization	8,029	7,236	5,364	(768)	(145)	(163)
Curtailment recognition	-	-	3,172	-	-	-
Settlement recognition	-	-	(644)	-	-	-
Transfer of assets in excess of obligations	-	-	-	1,915	-	-
	11,136	10,409	11,851	1,321	478	5,727
Regulatory adjustment (1)	(1,578)	(7,710)	(7,521)	2,665	2,665	2,665
Net periodic benefit cost	$ 9,558	$ 2,699	$ 4,330	$ 3,986	$ 3,143	$ 8,392

(1) In the Distribution segment, the Company recovers certain qualified pension benefit plan and other postretirement benefit plan costs through rates charged to utility customers. Certain utility commissions require that the recovery of these costs be based on the Employee Retirement Income Security Act or other utility commission specific guidelines. The difference between these amounts and periodic benefit cost calculated pursuant to Statement No. 87 is initially deferred as a regulatory asset and subsequently amortized to periodic benefit cost over periods, promulgated by the applicable utility commission, in which this difference will be recovered in rates.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The estimated net actuarial loss (gain) and prior service cost (credit) for pension plans that will be amortized from *Accumulated other comprehensive loss* into net periodic benefit cost during 2008 are $6.9 million and $552,000, respectively. The estimated net actuarial loss (gain) and prior service cost (credit) for other postretirement plans that will be amortized from *Accumulated other comprehensive loss* into net periodic benefit cost during 2008 are ($1.2) million and ($2.4) million, respectively.

Assumptions.

The weighted-average assumptions used in determining benefit obligations are shown in the table below:

	Pension Benefits Years Ended December 31,			Other Postretirement Benefits Years Ended December 31,		
	2007	**2006**	**2005**	**2007**	**2006**	**2005**
Discount rate	6.24%	5.77%	5.50%	6.34%	5.78%	5.50%
Rate of compensation increase (average)	3.47%	3.24%	3.24%	N/A	N/A	N/A

The weighted-average assumptions used in determining net periodic benefit cost are shown in the table below. The table has been reclassified for all prior periods to present discount rate data for plans relating to continuing operations, and excludes the discount rate data of the plans that relate to the Company's discontinued operations. See *Note 19 – Discontinued Operations* for additional related information.

	Pension Benefits Years Ended December 31,			Other Postretirement Benefits Years Ended December 31,		
	2007	**2006**	**2005**	**2007**	**2006**	**2005**
Discount rate	5.77%	5.50%	5.75%	5.78%	5.50%	5.75%
Expected return on assets:						
Tax exempt accounts	8.75%	8.75%	9.00%	7.00%	7.00%	7.00%
Taxable accounts	N/A	N/A	N/A	5.00%	5.00%	5.00%
Rate of compensation increase	3.24%	3.24%	3.40%	N/A	N/A	N/A

The Company employs a building block approach in determining the expected long-term rate of return on the plans' assets, with proper consideration of diversification and rebalancing. Historical markets are studied and long-term historical relationships between equities and fixed-income are preserved consistent with the widely accepted capital market principle that assets with higher volatility generate a greater return over the long run. Current market factors such as inflation and interest rates are evaluated before long-term market assumptions are determined. Peer data and historical returns are reviewed to ensure reasonableness and appropriateness.

The assumed health care cost trend rates used for measurement purposes are shown in the table below:

	December 31,	
	2007	**2006**
Health care cost trend rate assumed for next year	10.00%	11.00%
Ultimate trend rate	5.13%	4.80%
Year that the rate reaches the ultimate trend rate	2017	2013

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Assumed health care cost trend rates have a significant effect on the amounts reported for health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	One Percentage Point Increase	One Percentage Point Decrease
	(In thousands)	
Effect on total of service and interest cost	$ 733	$ (587)
Effect on accumulated postretirement benefit obligation	$ 7,082	$ (5,754)

Plan Assets.

The assets of the pension plans are invested in accordance with several investment practices that emphasize long-term investment fundamentals with an investment objective of long-term growth, taking into consideration risk tolerance and asset allocation strategies.

The broad goal and objective of the investment of the pension plans' assets is to ensure that future growth of the assets is sufficient to offset normal inflation plus liability requirements of the plans' beneficiaries. Pension plan assets should be invested in such a manner to minimize the necessity of net contributions to the plans to meet the plans' commitments. The contributions will also be affected by the applicable discount rate that is applied to future liabilities. The discount rate will affect the net present value of the future liability and, therefore, the funded status.

The assets of the postretirement health care and life insurance plans are invested in accordance with sound investment practices that emphasize long-term investment fundamentals. The Investment Committee of the Company's Board of Directors has adopted an investment objective of income and growth for the postretirement plans. This investment objective (i) is a risk-averse balanced approach that emphasizes a stable and substantial source of current income and some capital appreciation over the long-term; (ii) implies a willingness to risk some declines in value over the short-term, so long as the postretirement plans are positioned to generate current income and exhibit some capital appreciation; (iii) is expected to earn long-term returns sufficient to keep pace with the rate of inflation over most market cycles (net of spending and investment and administrative expenses), but may lag inflation in some environments; (iv) diversifies the postretirement plans in order to provide opportunities for long-term growth and to reduce the potential for large losses that could occur from holding concentrated positions; and (v) recognizes that investment results over the long-term may lag those of a typical balanced portfolio since a typical balanced portfolio tends to be more aggressively invested. Nevertheless, the postretirement plans are expected to earn a long-term return that compares favorably to appropriate market indices.

It is expected that these objectives can be obtained through a well-diversified portfolio structured in a manner consistent with the investment policy.

The Company's weighted average asset allocation by asset category for the measurement periods presented is as follows:

	Pension Benefits At September 30,		Other Postretirement Benefits At September 30,	
Asset Category	**2007**	**2006**	**2007**	**2006**
Equity securities	61%	76%	31%	24%
Debt securities	24%	10%	62%	66%
Other - cash equivalents	15%	14%	7%	10%
Total	100%	100%	100%	100%

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Based on the pension plan objectives, target asset allocations are as follows: equity of 50 percent to 80 percent, fixed income of 20 percent to 50 percent and cash and cash equivalents of 0 percent to 10 percent.

Based on the other postretirement plan objectives, target asset allocations are as follows: equity of 25 percent to 35 percent, fixed income of 65 percent to 75 percent and cash and cash equivalents of 0 percent to 10 percent.

The above referenced target asset allocations for pension and other postretirement benefits are based upon guidelines established by the Company's Investment Policy and is monitored by the Investment Committee of the board of directors in conjunction with an external investment advisor. On occasion, the asset allocations may fluctuate as compared to these guidelines as a result of Investment Committee actions.

Contributions.

The Company expects to contribute approximately $14.3 million to its pension plans and approximately $10 million to its other postretirement plans in 2008. The Company funds the cost of the plans in accordance with federal regulations, not to exceed the amounts deductible for income tax purposes.

Benefit Payments.

The Company's estimate of expected benefit payments, which reflect expected future service, as appropriate, in each of the five succeeding years and in the aggregate for the five years thereafter are shown in the table below:

Years	Pension Benefits	Other Postretirement Benefits (Gross, Before Medicare Part D)	Other Postretirement Benefits (Medicare Part D Subsidy Receipts)
		(In thousands)	
2008	$ 10,172	$ 4,093	$ 607
2009	10,774	4,083	684
2010	10,929	4,296	763
2011	10,854	4,831	855
2012	12,084	5,467	809
2013-2017	61,034	37,394	5,533

The Medicare Prescription Drug Act was signed into law December 8, 2003. This act provides for a prescription drug benefit under Medicare (*Medicare Part D*) as well as a federal subsidy, which is not taxable, to sponsors of retiree health care benefit plans that provide a prescription drug benefit that is at least actuarially equivalent to Medicare Part D.

Defined Contribution Plan. The Company sponsors a defined contribution savings plan (*Savings Plan*) that is available to all employees. The Company provides maximum matching contributions based upon certain Savings Plan provisions ranging from 2 percent to 6.25 percent to the participant's compensation paid into the Savings Plan. Company contributions are 100 percent vested after five years of continuous service for all plans other than Missouri Gas Energy union employees and employees of the Fall River operation, which are 100 percent vested after six years of continuous service. Company contributions to the Savings Plan during the years ended December 31, 2007, 2006 and 2005 were $3.8 million, $5.1 million and $4.5 million, respectively.

In addition, the Company makes employer contributions to separate accounts, referred to as Retirement Power Accounts, within the defined contribution plan. The contribution amounts are determined as a percentage of compensation and range from 2.5 percent to 11 percent. Company contributions to Retirement Power Accounts during the years ended December 31, 2007, 2006 and 2005 were $6.6 million, $5.1 million and $4.8 million, respectively.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Common Stock Held in Trust. From time to time, Southern Union purchases outstanding shares of its common stock to fund certain Company employee stock-based compensation plans. At December 31, 2007 and 2006, 783,445 and 863,458 shares, respectively, of common stock were held by various rabbi trusts for certain of those Company's benefit plans.

Benefit Plan Termination. Effective June 30, 2005, the Company terminated its 1997 Supplemental Retirement Plan (*Supplemental Plan*), which was a non-contributory cash balance retirement plan for certain current and former executive employees of the Company. As a result, the Company had an estimated pension net loss of $1.3 million comprised of a $1.6 million loss on pension curtailment, recognized in the second quarter of 2005, and a $251,000 gain on pension settlement, recognized in the third quarter of 2005. Prior to the termination of the Supplemental Plan, the Company also recorded a $1.1 million loss on pension curtailment in the second quarter of 2005 that was triggered by pension payments made to a former executive of the Company under this plan.

Also effective June 30, 2005, the Company terminated its 2000 Executive Deferred Stock Plan, which was a defined contribution deferred compensation plan for certain management and highly compensated employees. The plan's assets were held in a rabbi trust and were distributed to participants during the fourth quarter of 2005. The termination of this plan did not have a material effect on the Company's consolidated financial statements.

15. Taxes on Income

The following table provides a summary of the current and deferred components of income tax expense from continuing operations for the periods presented:

Income Tax Expense	Years Ended December 31, 2007	2006	2005
		(In thousands)	
Current:			
Federal	$ 18,458	$ 19,798	$ 168
State	5,654	2,251	1,062
	24,112	22,049	1,230
Deferred:			
Federal	62,502	74,563	43,110
State	8,645	12,635	5,712
	71,147	87,198	48,822
Total federal and state income tax expense from continuing operations	$ 95,259	$ 109,247	$ 50,052
Effective tax rate	29.4%	33.5%	24.6%

Unconsolidated investments	5,443	11,530
Other	19,621	27,936
Total deferred income tax assets	69,523	79,127
Deferred income tax liabilities:		
Property, plant and equipment	(693,350)	(624,797)
Investment in CCE Holdings (Citrus)	(34,113)	(18,700)
Goodwill	(15,665)	(14,592)
Regulatory liability	(2,020)	(2,989)
Other	(16,077)	(35,738)
Total deferred income tax liabilities	(761,225)	(696,816)
Net deferred income tax liability	(691,702)	(617,689)
Less current income tax assets (liabilities)	1,303	(512)
Accumulated deferred income taxes	$ (693,005)	$ (617,177)

Deferred credits in the accompanying Consolidated Balance Sheet includes $87,000 and $133,000 of unamortized deferred investment tax credit as of December 31, 2007 and 2006, respectively.

The Company completed an analysis of its deferred tax accounts in 2005. As a result of the 2005 analysis and expiring statute of limitations in 2006, federal and state income tax expense for the years ending December 31, 2006 and 2005 was decreased $8.4 million and $6.4 million, respectively, primarily due to adjustments related to bad debt reserves and PP&E. The decrease in income tax expense for the years ended December 31, 2006 and 2005 is comprised of federal income taxes of $7.5 million and $4.8 million, respectively, and state income taxes of $900,000 and $1.6 million, respectively.

In November 2006, the Internal Revenue Service (*IRS*) completed its examination of the Company's federal income tax return for the fiscal year ended June 30, 2003. The Company reached a favorable settlement regarding the like-kind exchange structure under Section 1031 of the Internal Revenue Code related to the sale of the assets of its Southern Union Gas natural gas operating division and related assets to ONEOK Inc. for approximately $437 million in January 2003 and the acquisition of Panhandle in June 2003.

The Company was successful in sustaining all but $26.3 million of the original estimated $90 million of income tax deferral associated with the like-kind structure. However, the Company's net tax due to the IRS was reduced to $11.6 million, plus interest, primarily due to alternative minimum tax credits and other favorable audit results. As a result of the IRS examination, the Company paid $12.6 million of income tax to the IRS in November 2006, received a refund of $1 million from the IRS and paid $1.4 million to state and local jurisdictions in 2007. The Company also paid $2.4 million ($1.5 million net of tax) in 2007 representing interest payable to the IRS, state and local jurisdictions as a result of the IRS examination of the year ended June 30, 2003. No penalties were assessed to the Company in this IRS examination.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company will be entitled to recover a corresponding $26.3 million of income tax benefit over time from additional depreciation deductions from the Panhandle assets due to higher tax basis in such assets as a result of the reduction of income tax benefits from the like-kind exchange.

The differences between the Company's effective income tax rate (*EITR*) and the U.S. federal income tax statutory rate are as follows:

	Years Ended December 31,		
Effective Income Tax Rate Analysis	**2007**	**2006**	**2005**
		(In thousands)	
Computed statutory income tax expense from continuing operations at 35%	$ 113,389	$ 114,215	$ 71,102
Changes in income taxes resulting from:			
Valuation allowance	-	-	(11,942)
Dividend received deduction	(28,994)	(10,696)	(8,732)
Executive compensation, non deductible	491	5,063	-
State income taxes, net of federal income tax benefit	9,295	9,411	4,403
Analysis of deferred tax accounts	-	(7,490)	(4,757)
Other	1,078	(1,256)	(22)
Actual income tax expense from continuing operations	$ 95,259	$ 109,247	$ 50,052

The Company adopted FIN 48 on January 1, 2007. The implementation of FIN 48 did not have a material impact on the consolidated financial statements and did not require an adjustment to *Retained earnings (deficit)*. The amount of unrecognized tax benefits at January 1, 2007 was $600,000, all of which would impact the Company's EITR if recognized. There are no changes to the Company's unrecognized tax benefits during 2007. The remaining amount of unrecognized tax benefits should be reduced to nil based on anticipated statute of limitations expirations in 2008.

The Company's policy is to classify and accrue interest expense and penalties on income tax underpayments (overpayments) as a component of income tax expense in its Consolidated Statement of Operations, which is consistent with the recognition of these items in prior reporting periods. At January 1, 2007, the Company recorded a liability of $2.4 million ($1.5 million, net of tax) representing interest payable to the IRS, state and local jurisdictions as a result of the IRS examination of the year ended June 30, 2003. All of the interest liability was paid in 2007. At December 31, 2007, the Company had no remaining federal, state and local interest liabilities. There were no federal penalties assessed as a result of this examination and no significant state penalties associated with the amended tax return filings.

The Company is no longer subject to U.S. federal, state or local examinations for the tax year ended June 30, 2002 and prior years. Although the Company settled the IRS examination of the year ended June 30, 2003 in 2006, the statute did not expire until December 31, 2007. The state impact of the federal change remains subject to state and local examination for a period of up to one year after formal notification to the state and local jurisdictions. The Company filed all required amended state tax returns in 2007 as a result of the federal change. Therefore, the state and local statutes will expire with respect to the tax year ended June 30, 2003 in 2008.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

16. Regulation and Rates

Panhandle. The Company has commenced construction of an enhancement at its Trunkline LNG terminal. This infrastructure enhancement project, which was originally expected to cost approximately $250 million, plus capitalized interest, will increase send out flexibility at the terminal and lower fuel costs. Recent cost projections indicate the construction costs will likely be approximately $365 million, plus capitalized interest. The revised costs reflect increases in the quantities and cost of materials required, higher contract labor costs and an allowance for additional contingency funds, if needed. The negotiated rate with the project's customer, BG LNG Services, will be adjusted based on final capital costs pursuant to a contract-based formula. The project is now expected to be in operation in the second quarter of 2009. In addition, Trunkline LNG and BG LNG Services agreed to extend the existing terminal and pipeline services agreements through 2028, representing a five-year extension. Approximately $178.3 million and $40.8 million of costs are included in the line item *Construction work-in-progress* at December 31, 2007 and 2006, respectively.

The Company has received approval from FERC to modernize and replace various compression facilities on PEPL. Such replacements are ultimately expected to be made at eleven compressor stations, with three stations completed as of December 31, 2007. Three additional stations are in progress and planned to be completed by the end of 2009, with the remaining cost for these stations estimated at approximately $100 million, plus capitalized interest. Planning for the other five compressor stations on which construction has not yet begun is continuing, with the timing and scope of the work on these stations being evaluated on an individual station basis. The Company is also replacing approximately 32 miles of existing pipeline on the east end of the PEPL system at a current estimated cost of approximately $125 million, plus capitalized interest, which will further improve system integrity and reliability. The revised higher cost relates to various construction issues and delays which have resulted in current estimated in-service dates for the related facilities around the end of the first quarter of 2008 or in the second quarter of 2008. Approximately $124.7 million and $57.9 million of costs related to these projects are included in the line item *Construction work-in-progress* at December 31, 2007 and 2006, respectively.

Trunkline has completed construction on its field zone expansion project. The expansion project included the north Texas expansion and creation of additional capacity on Trunkline's pipeline system in Texas and Louisiana to increase deliveries to Henry Hub. Trunkline has increased the capacity along existing rights-of-way from Kountze, Texas to Longville, Louisiana by approximately 625 MMcf/d with the construction of approximately 45 miles of 36-inch diameter pipeline. The project included horsepower additions and modifications at existing compressor stations. Trunkline has also created additional capacity to Henry Hub with the construction of a 13.5-mile, 36-inch diameter pipeline loop from Kaplan, Louisiana directly into Henry Hub. The Henry Hub lateral provides capacity of 1 Bcf/d from Kaplan, Louisiana to Henry Hub. The majority of the project was put into service in late December 2007 with the remainder placed in-service in February 2008. The Company currently estimates the final project costs will total approximately $250 million, plus capitalized interest. The estimated costs include a $40 million contribution in aid of construction to a subsidiary of Energy Transfer, which was paid in January 2008 and is expected to be amortized over the life of the facilities. Approximately $26.4 million and $12.5 million of costs for this project are included in the line item *Construction work-in-progress* at December 31, 2007 and 2006, respectively, with $178.3 million closed to *Plant in service* in December 2007.

Table of Contents

FERC is responsible under the Natural Gas Act for assuring that rates charged by interstate pipelines are "just and reasonable." To enforce that requirement, FERC applies a ratemaking methodology that determines an allowed rate of return on common equity for the companies it regulates. On October 25, 2006, a group including producers and various trade associations filed a complaint under Section 5 of the Natural Gas Act against Pan Gas Storage, LLC (d.b.a. *Southwest Gas Storage*) requesting that FERC initiate an investigation into Southwest Gas Storage's rates, terms and conditions of service and grant immediate interim rate relief. FERC initiated a Section 5 proceeding on December 21, 2006, setting this issue for hearing. Pursuant to FERC order, Southwest Gas Storage filed a cost and revenue study with FERC on February 20, 2007. On August 1, 2007, Southwest Gas Storage filed a Section 4 rate case requesting an increase in rates. On August 31, 2007, the FERC accepted Southwest Gas Storage's rate increase to become effective on February 1, 2008, subject to refund. This order also consolidated the Section 5 proceeding with the Section 4 rate case. On November 28, 2007, Southwest Gas Storage filed a settlement with FERC. The settlement was approved by FERC on February 12, 2008, which settlement resulted in Southwest Gas Storage's rates remaining substantially similar to its rates that were in effect prior to the Section 4 and Section 5 proceedings.

On January 26, 2007, Southwest Gas Storage filed an abandonment application to reduce the certificated storage capacity of its North Hopeton field by approximately 6 Bcf and to acquire 3 Bcf of additional base gas to maintain storage field operations. This filing brings the certificated capacity in line with operational performance of the field. On September 7, 2007, FERC approved Southwest Gas Storage's North Hopeton field modifications. Southwest Gas Storage has entered into a third-party agreement to replace this storage capacity, effective April 1, 2007, with an initial term of two years.

Sea Robin Pipeline Company, LLC (*Sea Robin*) filed a rate case with FERC in June 2007, requesting an increase in its maximum rates. Several parties have submitted protests to the rate increase filing with FERC. On July 30, 2007, FERC suspended the effectiveness of the filed rate increase until January 1, 2008. The filed rates were put into effect January 1, 2008, subject to refund. The final outcome of the rate case has many variables and potential outcomes and it is impossible to predict its timing or materiality at this time.

On December 15, 2003, the U.S. Department of Transportation issued a final rule requiring pipeline operators to develop integrity management programs to comprehensively evaluate their pipelines, and take measures to protect pipeline segments located in what the rule defines as HCAs. This rule resulted from the enactment of the Pipeline Safety Improvement Act of 2002. The rule requires operators to have identified HCAs along their pipelines by December 2004, and to have begun baseline integrity assessments, comprised of in-line inspection (smart pigging), hydrostatic testing or direct assessment, by June 2004. Operators must rank the risk of their pipeline segments containing HCAs and must complete assessments on at least 50 percent of the segments using one or more of these methods by December 2007. Assessments will generally be conducted on the higher risk segments first, with the balance being completed by December 2012. In addition, some system modifications will be necessary to accommodate the in-line inspections. As of December 31, 2007, the Company had completed 80 percent of the risk assessments. All systems operated by the Company will be compliant with the rule; however, while identification and location of all HCAs has been completed, it not practicable to determine with certainty the total scope of required remediation activities prior to completion of the assessments and inspections. The required modifications and inspections are currently estimated to be in the range of approximately $20 million to $28 million per year through 2012.

Missouri Gas Energy. On September 21, 2004, the Missouri Public Service Commission (*MPSC*) issued a rate order authorizing Missouri Gas Energy to increase base revenues by $22.4 million, effective October 2, 2004. Missouri Gas Energy filed various appeals related to this matter seeking increased base revenues in addition to those contained in the MPSC's order on grounds that the capital structure and 10.5 percent return on equity used by the MPSC in determining such increase did not provide an adequate rate of return. On April 11, 2006, the Missouri Supreme Court denied a hearing on this matter, effectively concluding the Company's appeal.

On May 1, 2006, Missouri Gas Energy announced the filing of a proposal with the MPSC to increase annual revenues by approximately $41.7 million, or 6.8 percent. A hearing on this matter with the MPSC was held in January 2007. The MPSC issued a Report and Order on March 22, 2007, authorizing an annual revenue increase of $27.2 million, or 4.5 percent. In its order, the MPSC calculated the revenue increase using a return

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

on equity of 10.5 percent and set residential rates using a straight fixed-variable rate design, thereby eliminating the impact of weather and conservation on residential margin revenues and related earnings. The new rates went into effect on April 3, 2007. This rate order has been appealed by Missouri Gas Energy and the Office of the Public Counsel, with Missouri Gas Energy challenging the authorized return as too low and the Office of the Public Counsel challenging the residential rate design. A final ruling in the appeal is not expected until 2009.

Through filings made on various dates, the staff of the MPSC recommended the MPSC disallow a total of approximately $47.7 million in gas costs incurred during the period July 1, 1997 through June 30, 2005. By order issued August 2, 2007, the MPSC adopted the MPSC staff's formal withdrawal of disallowance recommendations totaling approximately $35.3 million in response to a January 2007 Missouri Supreme Court ruling. By orders issued on August 2, 2007 and October 2, 2007, the MPSC also rejected the MPSC staff's recommendations regarding $8 million of the remaining gas cost disallowance. In a filing made with the MPSC on November 2, 2007, the MPSC staff withdrew from consideration the remaining $4.4 million in disallowance recommendations. By orders issued on November 8, 2007, the MPSC accepted the withdrawal of these remaining disallowance recommendations and closed these cases. There was no impact to the Company's consolidated financial statements related to the withdrawal of these gas cost disallowance recommendations.

New England Gas Company. On June 8, 2007, New England Gas Company filed with the Massachusetts Department of Public Utilities (*MDPU*) a proposed rate settlement with respect to its Massachusetts operations. The settlement agreement provides, among other things, for an overall revenue increase of $4.6 million phased in over an eight-month period, including the implementation of adjustment mechanisms for the recovery of pension costs, other postretirement benefit costs and gas cost-related uncollectible expense effective August 1, 2007, and a base rate increase of $2 million on April 1, 2008. The MDPU issued an order on July 31, 2007 approving the rate settlement agreement effective August 1, 2007.

17. Leases

The Company leases certain facilities, equipment and office space under cancelable and non-cancelable operating leases. The minimum annual rentals under operating leases for the next five years ending December 31 are as follows: 2008— $16.4 million; 2009—$19.2 million; 2010—$18.3 million; 2011— $18.2 million; 2012—$13.9 million and thereafter $57.8 million. Rental expense was $19.9 million, $18.7 million and $20.1 million for the years ended December 31, 2007, 2006 and 2005, respectively.

18. Commitments and Contingencies

Environmental

The Company's operations are subject to federal, state and local laws and regulations regarding water quality, hazardous and solid waste management, air quality control and other environmental matters. These laws and regulations require the Company to conduct its operations in a specified manner and to obtain and comply with a wide variety of environmental registrations, licenses, permits, inspections and other approvals. Failure to comply with environmental requirements may expose the Company to significant fines, penalties and/or interruptions in operations. The Company's environmental policies and procedures are designed to achieve compliance with such laws and regulations. These evolving laws and regulations and claims for damages to property, employees, other persons and the environment resulting from current or past operations may result in significant expenditures and liabilities in the future. The Company engages in a process of updating and revising its procedures for the ongoing evaluation of its operations to identify potential environmental exposures and enhance compliance with regulatory requirements. The Company follows the provisions of American Institute of Certified Public Accountants Statement of Position 96-1, *Environmental Remediation Liabilities*, for recognition, measurement, display and disclosure of environmental remediation liabilities.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company is allowed to recover environmental remediation expenditures through rates in certain jurisdictions within its Distribution segment. Although significant charges to earnings could be required prior to rate recovery for jurisdictions that do not have rate recovery mechanisms, management does not believe that environmental expenditures will have a material adverse effect on the Company's financial position, results of operations or cash flows. The table below reflects the amount of accrued liabilities recorded in the Consolidated Balance Sheet at December 31, 2007 and 2006 to cover probable environmental response actions:

	December 31, 2007	December 31, 2006
	(In thousands)	
Current	$ 6,772	$ 5,098
Noncurrent	15,209	18,632
Total Environmental Liabilities	$ 21,981	$ 23,730

During the year ended December 31, 2007, the Company had $9.3 million of expenditures related to environmental cleanup programs.

Transportation and Storage Segment Environmental Matters.

Gas Transmission Systems. Panhandle is responsible for environmental remediation at certain sites on its gas transmission systems for contamination resulting from the past use of lubricants containing polychlorinated biphenyls (*PCBs*) in compressed air systems; the past use of paints containing PCBs; and the prior use of wastewater collection facilities and other on-site disposal areas. Panhandle has developed and is implementing a program to remediate such contamination. Remediation and decontamination has been completed at each of the 35 compressor station sites where auxiliary buildings that house the air compressor equipment were impacted by the past use of lubricants containing PCBs. At some locations, PCBs have been identified in paint that was applied many years ago. A program has been implemented to remove and dispose of PCB impacted paint during painting activities. At one location on the Trunkline system, PCBs were discovered on the painted surfaces of equipment in a building that is outside of the scope of the compressed air system program and the existing PCB impacted paint program. The estimated cost to remediate the painted surfaces at this location is approximately $300,000. An initial assessment program was undertaken at seven locations to determine whether this condition exists at any of the other 78 similar buildings on the PEPL, Trunkline and Southwest Gas systems. At the seven locations assessed, which comprised a total of 15 buildings, preliminary analysis identified PCBs at regulated levels in a small number of samples at two locations. An expanded assessment program has been developed and is currently underway. As of December 31, 2007, 19 of 37 total locations have been assessed indicating PCBs at regulated levels in a small number of samples at a total of five locations. Until the results of the expanded assessment program are available, the costs associated with remediation of the painted surfaces cannot be reasonably estimated.

Other remediation typically involves the management of contaminated soils and may involve remediation of groundwater. Activities vary with site conditions and locations, the extent and nature of the contamination, remedial requirements, complexity and sharing of responsibility. The ultimate liability and total costs associated with these sites will depend upon many factors. If remediation activities involve statutory joint and several liability provisions, strict liability, or cost recovery or contribution actions, Panhandle could potentially be held responsible for contamination caused by other parties. In some instances, such as the Pierce Waste Oil sites described below, Panhandle may share liability associated with contamination with other potentially responsible parties (*PRPs*). Panhandle may also benefit from contractual indemnities that cover some or all of the cleanup costs. These sites are generally managed in the normal course of business or operations. The Company believes the outcome of these matters will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

PEPL and Trunkline, together with other non-affiliated parties, have been identified as potentially liable for conditions at three former waste oil disposal sites in Illinois – the Pierce Oil Springfield site, the Dunavan Waste

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Oil site and the McCook site (collectively, the *Pierce Waste Oil sites*). PEPL and Trunkline received notices of potential liability from the U.S. EPA for the Dunavan site by letters dated September 30, 2005. The notices demanded reimbursement to the U.S. EPA for costs incurred as of that date in the amount of approximately $1.8 million and encouraged each PRP to voluntarily negotiate an administrative settlement agreement with the U.S. EPA within certain limited time frames providing for the PRPs to conduct or finance the response activities required at the site. The demand was declined in a joint letter dated December 15, 2005 by the major PRPs, including PEPL and Trunkline. Although no formal notice has been received for the Pierce Oil Springfield site, special notice letters are anticipated and the process of listing the site on the National Priority List has begun. No formal notice has been received for the McCook site. The Company believes the outcome of these matters will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

On June 16, 2005, PEPL experienced a release of liquid hydrocarbons near Pleasant Hill, Illinois. The release occurred in the form of a mist at a valve that was in use to reduce the pressure in the pipeline as part of maintenance activities. The hydrocarbon mist affected several acres of adjacent agricultural land and a nearby marina. Approximately 27 gallons of hydrocarbons reached the Mississippi River. PEPL contacted appropriate federal and state regulatory agencies and the U.S. EPA took the lead role in overseeing the subsequent cleanup activities, which have been completed. PEPL has resolved claims of affected boat owners and the marina operator. PEPL received a violation notice from the Illinois Environmental Protection Agency (*IEPA*) alleging that PEPL was in apparent violation of several sections of the Illinois Environmental Protection Act by allowing the release. The violation notice did not propose a penalty. Responses to the violation notice were submitted and the responses were discussed with the agency. On December 14, 2005, the IEPA notified PEPL that the matter might be considered for referral to the Office of the Attorney General, the State's Attorney or the U.S. EPA for formal enforcement action and the imposition of penalties. By letter dated November 22, 2006, PEPL received a follow-up information request from the IEPA on the status of certain measures PEPL had agreed to undertake in connection with the original responses to the violation notice. On January 5, 2007, PEPL submitted a response. There has been no further contact from the IEPA on this matter. The Company believes the outcome of this matter will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Air Quality Control. The U.S. EPA issued a final rule on regional ozone control (*NOx SIP Call*) in April 2004 that affected 20 large internal combustion engines on Panhandle's system in Illinois and Indiana. Panhandle has substantially completed the required capital improvements of approximately $23 million as of December 31, 2007. Indiana has promulgated state regulations to address the requirements of the NOx SIP Call rule that essentially follow the U.S. EPA guidance.

In early April 2007, the IEPA proposed a rule to the Illinois Pollution Control Board (*IPCB*) for adoption to control NOx emissions from reciprocating engines and turbines, including a provision applying the rule beyond issues addressed by federal provisions, pursuant to a blanket statewide application. As originally proposed, the Illinois rule required controls on engines regulated under the U.S. EPA NOx SIP Call by May 1, 2007 and the remaining engines by January 1, 2011. A pipeline consortium including PEPL and Trunkline filed an objection to the rule requesting the IPCB to bifurcate and address separately the statewide applicability provision, which was the primary driver of costs to PEPL and Trunkline. On May 17, 2007, the IPCB ruled in favor of the pipeline consortium by bifurcating the statewide applicability provision from the rest of the proposed rule. On September 20, 2007 the IPCB approved the rule that applies to the engines regulated under the NOx SIP Call rule, which the pipeline consortium was not contesting. Due to delayed approval of the rule, the compliance deadline was changed from May 1, 2007 to January 1, 2008. On August 23, 2007, the IEPA filed a motion to cancel hearings and pre-filing deadlines for the bifurcated statewide portion of the proposed Illinois engine rule, which was later granted. On December 20, 2007, the IEPA filed an amended proposal withdrawing the statewide applicability provisions of the current proposed rule and apply the rule requirements to non-attainment areas. The amended proposal was approved on January 10, 2008. No controls on PEPL and Trunkline stations are required under the most recent proposal. However, the IEPA indicated in earlier industry discussions that it was reserving the right to make future proposals for statewide controls. In the event the IEPA proposes a statewide rule again, preliminary estimates indicate the cost of compliance would require minimum capital expenditures of approximately $45 million for emission controls.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In 2002, the Texas Commission on Environmental Quality (*TCEQ*) enacted the Houston/Galveston SIP regulations requiring reductions in NOx emissions in an eight-county area surrounding Houston. Trunkline's Cypress compressor station is affected and required the installation of emission controls. Regulations also require certain grandfathered facilities in East Texas to enter into the new source permit program, which may require the installation of emission controls at one additional facility owned by Panhandle. Management estimates capital improvements of $17.1 million will be needed at the two affected East Texas locations. The approximately $17 million of the required capital expenditures for the two affected East Texas locations have been substantially completed as of December 31, 2007. Permit limits were placed on grandfathered engines at two facilities in West Texas that are owned by PEPL. An estimated $1.9 million in capital expenditures will be required to comply with permit limitations for the West Texas facilities.

The U.S. EPA promulgated various Maximum Achievable Control Technology (*MACT*) rules in February 2004. The rules require that PEPL and Trunkline control Hazardous Air Pollutants (*HAPs*) emitted from certain internal combustion engines at major HAPs sources. Most PEPL and Trunkline compressor stations are major HAPs sources. The HAPs pollutant of concern for PEPL and Trunkline is formaldehyde. The rule, with which PEPL and Trunkline are in compliance and which had a final implementation date of June 2007, seeks to reduce formaldehyde emissions by 76 percent from these engines by requiring use of catalytic controls. PEPL has one engine fully regulated under this rule. For the other PEPL and Trunkline engines potentially subject to the engine MACT rule, emission controls and operating restrictions have been used to lower emissions below MACT thresholds. Compliance with these regulations necessitated an estimated expenditure of $1.4 million for capital improvements.

Spill Prevention, Control and Countermeasure Rules. In May 2007, the U.S. EPA extended the SPCC rule compliance dates until July 1, 2009 permitting owners and operators of facilities to prepare or amend and implement SPCC Plans in accordance with previously enacted modifications to the regulations. In October 2007, the U.S. EPA proposed amendments to the SPCC rules with the stated intention of providing greater clarity, tailoring requirements, and streamlining requirements. The Company is currently reviewing the impact of the modified regulations on its operations and may incur costs for tank integrity testing, alarms and other associated corrective actions as well as potential upgrades to containment structures. Costs associated with such activities cannot be estimated with certainty at this time, but the Company believes such costs will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Gathering and Processing Segment Environmental Matters.

Gathering and Processing Systems. SUGS is responsible for environmental remediation at certain sites on its gathering and processing systems, resulting primarily from releases of hydrocarbons. SUGS has a program to remediate such contamination. The remediation typically involves the management of contaminated soils and may involve remediation of groundwater. Activities vary with site conditions and locations, the extent and nature of the contamination, remedial requirements and complexity. The ultimate liability and total costs associated with these sites will depend upon many factors. These sites are generally managed in the normal course of business or operations. The Company believes the outcome of these matters will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Air Quality Control. On June 16, 2006, SUGS, as the facility operator and holder of a 50 percent interest in the Grey Ranch facility, submitted information to the TCEQ in connection with a request to permit its Grey Ranch, Texas facility to continue its current level of emissions. The State of Texas requires all previously grandfathered emission sources to obtain permits or shut down by March 1, 2008. By letter dated September 5, 2007, the TCEQ issued a permit extending current emission levels to March 1, 2009. At the conclusion of the extension period, SUGS must implement an emission control strategy that achieves specific maximum allowable emissions rates. At this time, it is anticipated that the Company will not bear any of the costs associated with an emissions control strategy.

Spill Prevention, Control and Countermeasure Rules. In May 2007, the U.S. EPA extended the SPCC rule compliance dates until July 1, 2009 permitting owners and operators of facilities to prepare or amend and implement SPCC Plans in accordance with previously enacted modifications to the regulations. In October 2007, the U.S. EPA proposed amendments to the SPCC rules with the stated intention of providing greater

Table of Contents

clarity, tailoring requirements, and streamlining requirements. The Company is currently reviewing the impact of the modified regulations on its operations and may incur costs for tank integrity testing, alarms and other associated corrective actions as well as potential upgrades to containment structures. Costs associated with such activities cannot be estimated with certainty at this time, but the Company believes such costs will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Distribution Segment Environmental Matters.

The Company is responsible for environmental remediation at various contaminated sites that are primarily associated with former manufactured gas plants (*MGPs*) and sites associated with the operation and disposal activities of former MGPs that produced a fuel known as "town gas". Some byproducts of the historic manufactured gas process may be regulated substances under various federal and state environmental laws. To the extent these byproducts are present in soil or groundwater at concentrations in excess of applicable standards, investigation and remediation may be required. The sites include properties that are part of the Company's ongoing operations, sites formerly owned or used by the Company and sites owned by third parties. Remediation typically involves the management of contaminated soils and may involve removal of old MGP structures and remediation of groundwater. Activities vary with site conditions and locations, the extent and nature of the contamination, remedial requirements, complexity and sharing of responsibility; some contamination may be unrelated to former MGPs. The ultimate liability and total costs associated with these sites will depend upon many factors. If remediation activities involve statutory joint and several liability provisions, strict liability, or cost recovery or contribution actions, the Company could potentially be held responsible for contamination caused by other parties. In some instances, the Company may share liability associated with contamination with other PRPs, and may also benefit from insurance policies or contractual indemnities that cover some or all of the cleanup costs. These sites are generally managed in the normal course of business or operations. The Company believes the outcome of these matters will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

North Attleborough MGP Site in Massachusetts. In November 2003, the Massachusetts Department of Environmental Protection (*MADEP*) issued a Notice of Responsibility to New England Gas Company, acknowledging receipt of prior notifications and investigative reports submitted by New England Gas Company, following the discovery of suspected coal tar material at the site. Subsequent sampling in the adjacent river channel revealed sediment impacts necessitating the investigation of off-site properties. The Company, working with the MADEP, is in the process of performing assessment work at these properties. In a September 2006 report filed with MADEP, the Company proposed a remedy for the upland portion of the site by means of an engineered barrier, construction of which is anticipated in 2008. Assessment activities continue both on- and off-site to define the nature and extent of the impacts. It is estimated that the Company will spend approximately $8.3 million over the next several years to complete the investigation and remediation activities at this site, as well as maintain the engineered barrier. As New England Gas Company is allowed to recover environmental remediation expenditures through rates associated with its Massachusetts operations, the estimated costs associated with this site have been included in *Regulatory assets* in the Consolidated Balance Sheet.

Litigation

The Company is involved in legal, tax and regulatory proceedings before various courts, regulatory commissions and governmental agencies regarding matters arising in the ordinary course of business, some of which involve substantial amounts. Where appropriate, the Company has made accruals in accordance with FASB Statement No. 5, *Accounting for Contingencies*, in order to provide for such matters. The Company believes the final disposition of these proceedings will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Bay Street, Tiverton, Rhode Island Site. On March 17, 2003, the Rhode Island Department of Environmental Management (*RIDEM*) sent the Company's New England Gas Company division a letter of responsibility pertaining to soils allegedly impacted by historic MGP residuals in a residential neighborhood in Tiverton, Rhode Island. Without admitting responsibility or accepting liability, New England Gas Company began assessment work in June 2003 and has continued to perform assessment field work since that time. On September 19,

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2006, RIDEM filed an Amended Notice of Violation seeking an administrative penalty of $1,000/day, which as of the date of RIDEM's filing totaled $258,000 and continues to accrue. In June 2007, the Rhode Island Legislature considered, but failed to adopt, legislation that would have increased the maximum administrative penalty under a Notice of Violation to $50,000/day on a prospective basis. In that RIDEM administrative proceeding, RIDEM has moved to extend to April 2008 the date for the completion of discovery, which motion has not yet been ruled upon by the Hearing Officer. On April 19, 2007, the Company filed a complaint, and an accompanying preliminary injunction motion, against RIDEM in Rhode Island Superior Court, seeking, among other things, a declaratory judgment that RIDEM's Amended Notice of Violation is premised on an unlawful application of RIDEM's regulations and that RIDEM's pending administrative proceeding against the Company is invalid. On July 13, 2007, the Superior Court dismissed the Company's suit, finding that RIDEM's Administrative Adjudication Division (*AAD*) has original jurisdiction to determine "responsible party" status and finding premature the Company's challenge to RIDEM's unlawful application of its own regulations because the Company did not first seek a ruling on that issue from RIDEM's AAD. The Company has appealed from part of the Superior Court's ruling, and has also filed a motion for summary judgment in the AAD proceeding seeking dismissal of same based on RIDEM's unlawful application of its own regulations. Briefing on the summary judgment motion is now complete. The Hearing Officer in the AAD proceeding has not yet issued a ruling on that motion. The Company will continue to vigorously defend itself in the AAD proceedings.

During 2005, four lawsuits were filed against New England Gas Company in Rhode Island regarding the Tiverton neighborhood. The plaintiffs seek to recover damages for the diminution in value of their property, lost use and enjoyment of their property and emotional distress in an unspecified amount. The Company removed the lawsuits to federal court and filed motions to dismiss. On November 3, 2006, the Court dismissed plaintiffs' claims relating to gross negligence, private nuisance, infliction of emotional distress and violation of the Rhode Island Hazardous Waste Management Act. The Court denied the Company's motion to dismiss as to claims relating to negligence, strict liability and public nuisance, as well as plaintiffs' request for punitive damages. In September and October 2007, the court granted the Company's motion to serve third-party complaints on a total of nine PRPs. Among the PRPs the Company impleaded is the Town of Tiverton, which asserted a counterclaim against the Company under CERCLA. On January 30, 2008, the Court denied the Company's motion for partial judgment on the pleadings seeking dismissal of plaintiffs' claims for remediation, finding, contrary to the Company's contention, that RIDEM does not have exclusive jurisdiction to determine the responsibility for and extent of remediation of plaintiffs' properties. On February 13, 2008, the Court entered a "Trial Order" superseding several prior orders, and directing that (1) on or about April 24, 2008, the Court will conduct a "Phase I" trial on claims asserted by plaintiffs and by Tiverton against the Company; (2) the Phase I trial will be bifurcated into a liability stage, and, if necessary, a damages stage, with both stages to be tried before the same jury; (3) the discovery cutoff date for the Phase I trial is extended from February 29 to March 21, 2008; (4) if necessary, a "Phase II" trial shall address the Company's third-party claims against the PRPs it has impleaded; and (5) the parties to the Phase II trial shall have 120 days after the Phase I trial to conduct discovery related thereto. The Company subsequently filed a motion seeking extension of the discovery and trial date. The Company will continue to vigorously defend itself against all four lawsuits, which have now been consolidated for trial. Based upon its current understanding of the facts, the Company does not believe the outcome of these matters will have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Mercury Release. In October 2004, New England Gas Company discovered that one of its facilities had been broken into and that mercury had been released both inside a building and in the immediate vicinity, including a parking lot in a neighborhood several blocks away. Mercury from the parking lot was apparently tracked into nearby apartment units, as well as other buildings. Cleanup was completed at the property and nearby apartment units. The vandals who broke into the facility were arrested and convicted. On October 16, 2007, the U.S. Attorney in Rhode Island filed a three-count indictment against the Company in the U.S. District Court for the District of Rhode Island alleging violation of permitting requirements under the federal Resource Conservation and Recovery Act and notification requirements under the federal Emergency Planning and Community Right to Know Act relating to the 2004 incident. The Company entered a not guilty plea on October 29, 2007 and will vigorously defend itself in such action. On January 17, 2008, the Court granted the Company's motion to extend the deadline for completion of discovery to March 13, 2008, and to extend the deadline for the filing of certain motions to April 8, 2008. The Court has not yet set a trial date. The Company

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1934 of 2431

Table of Contents

believes the outcome of this matter will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

On January 20, 2006, a complaint was filed against the Company in the Superior Court in Providence, Rhode Island regarding the mercury release from the Pawtucket facility, asserting claims for personal injury and property damage as a result of the release. The suit was removed to Rhode Island federal court on January 27, 2006. A motion to remand the case to state court filed by plaintiffs was denied on April 16, 2007. The Company thereafter moved to dismiss plaintiffs' amended complaint, which motion was granted in part, dismissing claims for public nuisance, private nuisance and violation of Rhode Island's Hazardous Waste Management Act, leaving plaintiffs with claims for negligence and strict liability. The Court has set December 1, 2008 as the Closure Date for all discovery. On October 18, 2007, an attorney representing other Pawtucket residents filed suit against the Company in the Superior Court in Providence asserting claims similar to those pending in the above-described federal court suit for personal injury and property damage. An additional complaint alleging personal injury arising out of the mercury release was filed on behalf of three plaintiffs with the District Court for the Sixth District, Providence County, Rhode Island, on January 22, 2008. The Company will vigorously defend all such suits. The Company believes the outcome of this matter will not have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Hope Land. Hope Land Mineral Corporation (*Hope Land*) claimed trespass and unjust enrichment in respect of the storage rights to property that contains a portion of the Company's Howell storage field. The Company filed an action for condemnation to obtain the storage rights from Hope Land. Trial before the Michigan Circuit Court commenced in April 2007, and on May 2, 2007, the jury awarded Hope Land total compensation of approximately $91,000 in respect of condemnation and trespass and no recovery in respect of unjust enrichment. Following the verdict, the matter was settled and an Order of Dismissal was entered in the Court on July 3, 2007. The settlement of this matter had no material impact on the Company's consolidated financial position, results of operations or cash flows.

Jack Grynberg. Jack Grynberg, an individual, filed actions for damages against a number of companies, including Panhandle, now transferred to the U.S. District Court for the District of Wyoming, alleging mis-measurement of gas volumes and Btu content, resulting in lower royalties to mineral interest owners. Among the defendants are Panhandle, Citrus, Florida Gas and certain of their affiliates (*Company Defendants*). On October 20, 2006, the District Judge adopted in part the earlier recommendation of the Special Master in the case and ordered the dismissal of the case against the Company Defendants. Grynberg is appealing that action to the Tenth Circuit Court of Appeals. Grynberg's opening brief was filed on July 31, 2007. Respondents filed their brief rebutting Grynberg's arguments on November 21, 2007. A similar action, known as the Will Price litigation, also has been filed against a number of companies, including Panhandle, in U.S. District Court for the District of Kansas. Panhandle is currently awaiting the decision of the trial judge on the defendants' motion to dismiss the Will Price action. Panhandle and the other Company Defendants believe that their measurement practices conformed to the terms of their FERC gas tariffs, which were filed with and approved by FERC. As a result, the Company believes that it has meritorious defenses to these lawsuits (including FERC-related affirmative defenses, such as the filed rate/tariff doctrine, the primary/exclusive jurisdiction of FERC, and the defense that Panhandle and the other Company Defendants complied with the terms of their tariffs) and will continue to vigorously defend against them, including any appeal from the dismissal of the Grynberg case. The Company does not believe the outcome of these cases will have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Southwest Gas Litigation. During 1999, several actions were commenced in federal courts by persons involved in competing efforts to acquire Southwest Gas Corporation. All of these actions eventually were transferred to the U.S. District Court for the District of Arizona (*District Court*). The trial of the Company's claims against the sole remaining defendant, former Arizona Corporation Commissioner James Irvin, was concluded on December 18, 2002, with a jury award to the Company of nearly $400,000 in actual damages and $60 million in punitive damages against former Commissioner Irvin. Following appeal to the Ninth Circuit Court of Appeals and remand to the District Court, the District Court reconsidered the punitive damages award and entered an order of remittitur on November 21, 2006, reducing the punitive damages amount to $4 million, plus interest. Irvin has appealed to the Ninth Circuit Court of Appeals. The Company anticipates that the Court's opinion will be issued in 2008. The Company intends to continue to vigorously pursue its case against former

Page 1934

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Commissioner Irvin, including seeking to collect all damages ultimately determined to lie against him. There can be no assurance, however, as to the amount of such damages, or as to the amount, if any, that the Company ultimately will collect.

GP II Energy Litigation. On October 23, 2006, landowners filed suit against the Company in the 109th District Court of Winkler County, Texas. Plaintiffs are seeking money damages, equitable relief and punitive damages alleging continuing pollution to underground aquifers underlying the plaintiffs' approximately 16,000 acre property. SUGS operated the Halley Plant, a hydrocarbon processing facility, which is located on a limited portion of the plaintiff landowners' ranch pursuant to a lease. On February 15, 2008, the Company learned that plaintiffs significantly revised their claims to include approximately $40 million in economic damages and approximately $85 million in punitive damages. The trial date has been postponed to June 10, 2008. The Company will continue to vigorously defend the suit. The Company does not believe the outcome of this case will have a material adverse effect on its consolidated financial position, results of operations or cash flows.

Other Commitments and Contingencies.

Hurricane Damage. Late in the third quarter of 2005, Hurricanes Katrina and Rita came ashore along the Upper Gulf Coast. These hurricanes caused damage to property and equipment owned by Sea Robin, Trunkline, and Trunkline LNG. As of December 31, 2007, the Company has incurred $35 million of capital expenditures related to the hurricanes, primarily for replacement or abandonment of damaged property and equipment at Sea Robin and construction project delays at the Trunkline LNG terminal.

The Company anticipates reimbursement from its property insurance carriers for a significant portion of damages from the hurricanes in excess of its $5 million deductible. Such reimbursement is currently estimated by the Company's property insurance carrier ultimately to be limited to 70 percent of the portion of the claimed damages accepted by the insurance carrier, but the amount is subject to the level of total ultimate claims from all companies relative to the carrier's $1 billion total limit on payout per event. As of December 31, 2007, the Company has received payments of $7.6 million from its insurance carriers. No receivables due from the insurance carriers have been recorded as of December 31, 2007.

In addition, after the 2005 hurricanes, the U.S. MMS mandated inspections by leaseholders and pipeline operators along the hurricane tracks. The Company has detected exposed pipe and other facilities on Trunkline and Sea Robin that must be re-covered to comply with applicable regulations. Capital expenditures of approximately $3.7 million have been incurred as of December 31, 2007 to address these issues. The Company will seek recovery of these expense and capital amounts as part of the hurricane-related claims.

Panhandle Capital Expenditures. The Company estimates remaining expenditures associated with its Trunkline field zone expansion and LNG terminal enhancement projects will be approximately $245 million, with approximately $200 million to be incurred in 2008, plus capitalized interest. These estimates were developed for budgeting purposes and are subject to revision.

Purchase Commitments. At December 31, 2007, the Company had purchase commitments for natural gas transportation services, storage services and certain quantities of natural gas at a combination of fixed, variable and market-based prices that have an aggregate value of approximately $1.1 billion. The Company's purchase commitments may be extended over several years depending upon when the required quantity is purchased. The Company has purchase gas tariffs in effect for all its utility service areas that provide for recovery of its purchase gas costs under defined methodologies and the Company believes that all costs incurred under such commitments will be recovered through its purchase gas tariffs.

TIF Debt Guarantee. The Company has a guaranty with a bank whereby the Company unconditionally guaranteed payment of financing obtained for the development of PEI Power Park. In March 1999, the Borough of Archbald, the County of Lackawanna, and the Valley View School District (collectively the *Taxing Authorities*) approved a Tax Incremental Financing Plan (*TIF Plan*) for the development of PEI Power Park. The TIF Plan requires that: (i) the Redevelopment Authority of Lackawanna County raise $10.6 million of funds to be used for infrastructure improvements of the PEI Power Park; (ii) the Taxing Authorities create a tax increment district and use incremental tax revenues generated from new development to service the $10.6 million debt; and (iii) PEI

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Power Corporation, a subsidiary of the Company, guarantee the debt service payments. In May 1999, the Redevelopment Authority of Lackawanna County borrowed $10.6 million from a bank under a promissory note (*TIF Debt*), which was refinanced and modified in May 2004. Beginning May 15, 2004 the TIF Debt bears interest at a variable rate equal to three-quarters percent (0.75 percent) lower than the National Prime Rate of Interest with no interest rate floor or ceiling. The TIF Debt matures on June 30, 2011. Interest-only payments were required until June 30, 2003, and semi-annual interest and principal payments are required thereafter. As of December 31, 2007, the balance outstanding on the TIF Debt was $4.6 million with an interest rate of 6.5 percent. Estimated incremental tax revenues are expected to cover approximately 51 percent of the 2008 annual debt service. Based on information available at this time, the Company believes that the $2.1 million amount provided for the potential shortfall in estimated future incremental tax revenues is adequate as of December 31, 2007.

Missouri Safety Program. Pursuant to a 1989 MPSC order, Missouri Gas Energy is engaged in a major gas safety program in its service territories (*Missouri Safety Program*). This program includes replacement of Company and customer-owned gas service and yard lines, the movement and resetting of meters, the replacement of cast iron mains and the replacement and cathodic protection of bare steel mains. In recognition of the significant capital expenditures associated with this safety program, the MPSC initially permitted the deferral and subsequent recovery through rates of depreciation expense, property taxes and associated carrying costs over a 10-year period. On August 28, 2003, the state of Missouri passed certain statutes that provided Missouri Gas Energy the ability to adjust rates periodically to recover depreciation expense, property taxes and carrying costs associated with the Missouri Safety Program, as well as investments in public improvement projects. The continuation of the Missouri Safety Program will result in significant levels of future capital expenditures. The Company incurred capital expenditures of $11.4 million in 2007 related to this program and estimates incurring approximately $141.3 million over the next 12 years, after which all service lines, representing about 40 percent of the annual safety program investment, will have been replaced.

Other. Effective May 28, 2006, PEPL agreed to a three-year contract with a bargaining unit representing its employees.

Of the Company's employees represented by unions, Missouri Gas Energy employs 61 percent, New England Gas Company employs 10 percent and Panhandle employs 29 percent. No employees of SUGS are currently represented by bargaining units.

The Company had standby letters of credit outstanding of $18.5 million and $8.7 million at December 31, 2007 and 2006, respectively, which guarantee payment of insurance claims and other various commitments.

19. Discontinued Operations

On August 24, 2006, the Company completed the sale of the assets of its PG Energy natural gas distribution division to UGI Corporation for $580 million in cash, excluding certain working capital adjustment reductions of approximately $24.4 million, which were paid in the first quarter of 2007. Additionally, on August 24, 2006, the Company completed the sale of the Rhode Island operations of its New England Gas Company natural gas distribution division to National Grid USA for $575 million in cash, less the assumption of approximately $77 million of debt and excluding certain working capital adjustment reductions of approximately $24.9 million, which were paid in the first quarter of 2007.

The results of operations of these divisions have been segregated and reported as *Discontinued operations* in the Consolidated Statement of Operations for all periods presented. The PG Energy natural gas distribution division and Rhode Island operations of the New England Gas Company natural gas distribution division were historically reported within the Distribution segment.

Loss from discontinued operations before income taxes in the Consolidated Statement of Operations includes a loss for 2006 of $56.8 million recorded by the Company upon the sale of the assets of its PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division. Significant components contributing to the loss include $19.4 million of asset impairment charges related to increases in PP&E during 2006, selling costs of $4.7 million, and charges associated with pre-closing

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1937 of 2431

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

arrangements between the Company and the buyers, principally consisting of $15.1 million of pension funding requirements and $5.8 million of premiums related to the early retirement of debt. An additional factor related to higher PP&E balances is the cessation of recording depreciation expense subsequent to approval of the Company's Board of Directors in January 2006 to dispose of the applicable assets.

The Company incurred $142.4 million of income tax expense in 2006 resulting from $379.8 million of non-deductible goodwill that had no tax basis. Additionally, the Company incurred $17.6 million of income tax expense as a result of the write-off of a tax-related regulatory asset.

See *Note 7 – Goodwill* for information related to the $175 million goodwill impairment charge recorded in 2005 related to the Company's discontinued operations.
The following table summarizes the combined results of operations that have been segregated and reported as discontinued operations in the Consolidated Statement of Operations.

	Years Ended December 31, 2006 (2)	2005
	(In thousands,except per share amounts)	
Operating revenues	$ 512,935	$ 752,549
Operating income (loss)	54,662	(106,073)
Loss from discontinued operations (1)	(152,952)	(132,413)
Net loss available from discontinued operations per share:		
Basic	$ (1.33)	$ (1.21)
Diluted	$ (1.30)	$ (1.17)

(1) Loss from discontinued operations does not include any allocation of corporate interest expense or other corporate costs.
(2) Represents results of operations for year 2006 through August 24, 2006.

20. Asset Retirement Obligations

Statement No. 143 requires an ARO to be recorded when a legal obligation to retire the asset exists. FIN No. 47 clarifies that an ARO should be recorded for all assets with legal retirement obligations, even if the enforcement of the obligation is contingent upon the occurrence of events beyond the company's control (*Conditional ARO*). The fair values of the AROs were calculated using an expected present value technique. This technique reflects assumptions such as removal and remediation costs, inflation and profit margins that third parties would demand to settle the amount of the future obligation. The Company did not include a market risk premium for unforeseeable circumstances in its fair value estimates because such a premium could not be reliably estimated.

Although a number of other assets in the Company's system are subject to agreements or regulations that give rise to an ARO or a Conditional ARO upon the Company's discontinued use of these assets, AROs were not recorded for most of these assets because the fair values of these AROs were not reliably estimable. The principal reason the fair values of these AROs were not subject to reliable estimation was because the lives of the underlying assets are indeterminate. Management has concluded that the Panhandle pipeline system, as a whole, and the SUGS natural gas gathering and processing system, as a whole, have indeterminate lives. In reaching this conclusion, management considered its intent for operating the systems, the economic life of the underlying assets, its past practices and industry practice.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company intends to operate the pipeline and the natural gas gathering and processing systems indefinitely as a going concern. Individual component assets have been and will continue to be replaced, but the pipeline and the natural gas gathering and processing systems will continue in operation as long as supply and demand for natural gas exists. Based on the widespread use of natural gas in industrial and power generation activities and current estimates of recoverable reserves, management expects supply and demand to exist for the foreseeable future.

The Company has in place a rigorous repair and maintenance program that keeps the pipeline and the natural gas gathering and processing systems in good working order. Therefore, although some of the individual assets on the systems may be replaced, the pipeline and the natural gas gathering and processing systems themselves will remain intact indefinitely. AROs generally do not arise unless a pipeline or a facility (or portion thereof) is abandoned. The Company does not intend to make any such abandonments as long as supply and demand for natural gas remains relatively stable.
The following table is a general description of ARO and associated long-lived assets at December 31, 2007.

ARO Description	In Service Date	Long-Lived Assets	Amount
			(In thousands)
Retire offshore lateral lines	Various	Offshore lateral lines	$ 5,539
Other	Various	Mainlines, compressors and gathering plants	1,446

The following table is a reconciliation of the carrying amount of the ARO liability for the periods presented.

	Years Ended December 31, 2007	2006	2005
		(In thousands)	
Beginning balance	$ 10,535	$ 8,200	$ 5,657
Addition from Sid Richardson Energy Services acquisition	-	885	-
Incurred	2,314	1,189	2,371
Settled	(907)	(414)	(285)
Accretion expense	820	675	457
Ending balance	$ 12,762	$ 10,535	$ 8,200

21. Reportable Segments

The Company's reportable business segments are organized based on the way internal managerial reporting presents the results of the Company's various businesses to its executive management for use in determining the performance of the businesses and in allocating resources to the businesses, as well as based on similarities in economic characteristics, products and services, types of customers, methods of distribution and regulatory environment. The Company operates in three reportable segments.

The Transportation and Storage segment operations are conducted through Panhandle and the investment in Citrus. Through Panhandle, the Company is primarily engaged in the interstate transportation and storage of natural gas from the Gulf of Mexico, South Texas and the Panhandle regions of Texas and Oklahoma to major U.S. markets in the Midwest and Great Lakes regions. Panhandle also provides LNG terminalling and regasification services. Through its investment in Citrus, the Company has an interest in and operates Florida Gas. Florida Gas is primarily engaged in the interstate transportation of natural gas from South Texas through

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

the Gulf Coast region to Florida. See the related discussion of the change in ownership interests of CCE Holdings on December 1, 2006 applicable to Florida Gas and Transwestern in *Note 3 – Acquisitions and Sales – CCE Holdings Transactions.*

The Company acquired Sid Richardson Energy Services on March 1, 2006, which represents the Gathering and Processing reportable segment. The Gathering and Processing segment is primarily engaged in connecting wells of natural gas producers to its gathering system, treating natural gas to remove impurities to meet pipeline quality specifications, processing natural gas for the removal of NGLs, and redelivering natural gas and NGLs to a variety of markets. Its operations are conducted through SUGS throughout Texas and in the southwestern United States. See *Note 3 – Acquisition and Sales – Acquisition of Sid Richardson Energy Services*.

The Distribution segment is primarily engaged in the local distribution of natural gas in Missouri and Massachusetts. The Company's discontinued operations relate to its PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division. During the first quarter of 2006, the Company entered into definitive agreements to sell the assets of its PG Energy natural gas distribution division and the Rhode Island operations of its New England Gas Company natural gas distribution division. The Company completed the sales in August 2006. See *Note 19 – Discontinued Operations*.

Revenue included in the Corporate and other category is primarily attributable to PEI Power Corporation, which generates and sells electricity. PEI Power Corporation does not meet the quantitative threshold for segment reporting.

The Company evaluates operational and financial segment performance based on several factors, of which the primary financial measure is earnings before interest and taxes (*EBIT*), which is a non-GAAP measure. The Company defines EBIT as *Net earnings available for common stockholders*, adjusted for the following:

- items that do not impact net earnings from continuing operations, such as extraordinary items, discontinued operations and the impact of changes in accounting principles;
- income taxes;
- interest; and
- dividends on preferred stock.

EBIT may not be comparable to measures used by other companies and should be considered in conjunction with net earnings and other performance measures such as operating income or operating cash flow.

Sales of products or services between segments are billed at regulated rates or at market rates, as applicable. There were no material intersegment revenues during the years ended December 31, 2007, 2006 and 2005.

The following table sets forth certain selected financial information for the Company's segments for the years ended December 31, 2007, 2006 and 2005. Financial information for the Gathering and Processing segment reflects operations of SUGS beginning on its acquisition date of March 1, 2006. The Consolidated Statement of Operations segment information for all periods presented has been reclassified to distinguish between results of operations from continuing and discontinued operations. Segment information presented for expenditures of long-lived assets for the year ended December 31, 2005 has not been adjusted for discontinued operations.

23. Related Party Transactions

See *Note 9 – Unconsolidated Investments – Dividends* for information related to dividends received by the Company from its unconsolidated investments.

On November 5, 2004, SU Pipeline Management LP (*Manager*), a wholly-owned subsidiary of Southern Union, and PEPL entered into an

Administrative Services Agreement (*Management Agreement*) with CCE Holdings.

Table of Contents

Pursuant to the Management Agreement, Manager provided administrative services to CCE Holdings and its subsidiaries from November 17, 2004 to December 1, 2006. The Management Agreement was terminated on December 1, 2006 following the redemption of Transwestern as more fully discussed in *Note 3 – Acquisitions and Sales – CCE Holdings Transactions*.

Pursuant to the Management Agreement, Southern Union billed CCE Holdings $4.3 million in 2005 for management fees. No billings were made for management fees in 2006 under the Management Agreement. In years 2006 and 2005, Southern Union billed CCE Holdings $14 million and $12 million, respectively, for certain corporate costs provided under the Management Agreement prior to its termination on December 1, 2006 in conjunction with the transactions contemplated by the Redemption Agreement.

24. Stock-Based Compensation

Stock Options. Effective January 1, 2006, the Company adopted Statement No. 123R, using the modified prospective application method of transition, as defined in Statement No. 123R. Since the adoption of Statement No. 123R, the Company has recorded the grant date fair value of share-based payment arrangements, net of estimated forfeitures, as compensation expense using a straight-line basis over the awards' requisite service period. Under the modified prospective application method, Statement No. 123R applies to new awards and to awards modified, repurchased, or cancelled after December 31, 2005. Compensation cost for the portion of awards for which the requisite service has not been rendered that are outstanding as of December 31, 2005 is recognized as the requisite service is rendered on or after January 1, 2006. Additionally, no transition adjustment is generally permitted for the deferred tax assets associated with outstanding equity instruments, as these deferred tax assets will be recorded as a credit to *Premium on capital stock* when realized. No cumulative effect of a change in accounting principle was recognized upon adoption of Statement No. 123R.

The Company previously disclosed the fair value of stock options granted and the assumptions used in determining fair value pursuant to Statement No. 123, *Accounting for Stock-Based Compensation.* The Company historically used a Black-Scholes valuation model to determine the fair value of stock options granted. Stock options (either incentive stock options or non-qualified options) and SARs generally vest over a three-, four- or five-year period from the date of grant and expire ten years after the date of grant. The adoption of Statement No. 123R in 2006 reduced *Operating Income, Earnings from continuing operations before income taxes* and *Net earnings* by $2.4 million, $2.4 million and $1.9 million, respectively, or $0.02 per basic share and $0.02 per diluted share for the year ended December 31, 2006.

The fair value of each option award is estimated on the date of grant using a Black-Scholes option pricing model. The Company's expected volatilities are based on historical volatility of the Company's stock. To the extent that volatility of the Company's stock price increases in the future, the estimates of the fair value of options granted in the future could increase, thereby increasing share-based compensation expense in future periods. Additionally, the expected dividend yield is considered for each grant on the date of grant. The Company's expected term of options granted was derived from the average midpoint between vesting and the contractual term. In the future, as information regarding post-vesting termination becomes more accessible, the Company may change the method of deriving the expected term. This change could impact the fair value of options granted in the future. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant.

The following table represents the Black-Scholes estimated ranges under the Company plans for grants issued in the periods presented:

	Years ended December 31,		
	2007	2006	2005
Expected volatility	30.11% to 32.12%	32.90%	20.57% to 37.61%
Expected dividend yield	2.10%	1.43%	1.67%
Risk-free interest rate	3.70% to 3.89%	4.69%	3.76% to 4.63%
Expected life	6.00 to 7.50 years	6.00 years	0.75 to 6.50 years

Forfeited	(77,385)	16.83	(473,584)	12.45
Outstanding December 31, 2005	1,289,510	$ 20.62	1,259,624	$ 13.15
Granted	- (1)	-	-	-
Exercised	(121,137)	17.31	(521,289)	13.92
Forfeited	(157,894)	18.23	(23,139)	12.92
Outstanding December 31, 2006	1,010,479	$ 21.39	715,196	$ 12.60
Granted	717,098 (2)	28.48	-	-
Exercised	(98,027)	19.32	(176,515)	10.51
Forfeited	(97,875)	22.95	(1,979)	13.03
Outstanding December 31, 2007	1,531,675	$ 24.74	536,702	$ 13.28
Exercisable December 31, 2005	355,259	21.85	1,147,902	13.06
Exercisable December 31, 2006	533,363	22.38	715,196	12.60
Exercisable December 31, 2007	565,560	22.25	536,702	13.28

(1) Excludes 133,610 SARs which vest in equal increments on December 27, 2007 through 2009. Each SAR entitles the holder to shares of Southern Union's common stock equal to the fair market value of Southern Union's common stock in excess of $28.07 for each SAR on the applicable vesting date.
(2) Excludes 282,163 SARs which vest in equal increments on December 17, 2008 through 2010. Each SAR entitles the holder to shares of Southern Union's common stock equal to the fair market value of Southern Union's common stock in excess of $28.48 for each SAR on the applicable vesting date.

Table of Contents

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table summarizes information about stock options outstanding under the Second Amended 2003 Plan and the 1992 Plan at December 31, 2007:

	Options Outstanding			Options Exercisable	
Range of Exercise Prices	Number of Options	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Second Amended 2003 Plan:					
16.82 - 20.00	242,135	6.11 years	$ 16.83	105,800	$ 16.83
20.01 - 25.00	572,442	7.70 years	23.41	459,760	23.50
25.01 - 28.48	717,098	9.97 years	28.48	-	-
	1,531,675	8.51 years	$ 24.74	565,560	$ 22.25
1992 Plan:					
12.63 - 14.66	536,702	1.50 years	$ 13.28	536,702	$ 13.28
	536,702	1.50 years	$ 13.28	536,702	$ 13.28

The weighted average remaining contractual life of options and SARs outstanding under the Second Amended 2003 Plan and the 1992 Plan at December 31, 2007 was 8.75 and 1.50 years, respectively. The weighted average remaining contractual life of options and SARs exercisable under the Second Amended 2003 Plan and the 1992 Plan at December 31, 2007 was 7.49 and 1.50 years, respectively. The aggregate intrinsic value of total options and SARs outstanding and exercisable at December 31, 2007 was $16.6 million and $12.9 million, respectively.

As of December 31, 2007, there was $11.1 million of total unrecognized compensation cost related to non-vested stock options and SARs compensation arrangements granted under the stock option plans. That cost is expected to be recognized over a weighted-average contractual period of 3.4 years. The total fair value of options and SARs vested as of December 31, 2007 was $8.2 million. Compensation expense recognized related to stock options and SARs totaled $1.5 million ($1.2 million, net of tax) for the year ended December 31, 2007 and $2.4 million ($1.9 million, net of tax) for the year ended December 31, 2006. Cash received from the exercise of stock options was $3.7 million for the year ended December 31, 2007.

The intrinsic value of options exercised during the year ended December 31, 2007 was approximately $4.9 million. The Company realized an additional tax benefit of approximately $1.7 million for the excess amount of deductions related to stock options over the historical book compensation expense multiplied by the statutory tax rate in effect, which has been reported as an increase in financing cash flows in the Consolidated Statement of Cash Flows.

Restricted Stock. The Company's Second Amended 2003 Plan also provides for grants of restricted stock equity units and restricted stock liability units. The Company settles restricted stock equity units with shares of common stock, and restricted stock liability units with cash. The restrictions associated with a grant of restricted stock equity units under the Second Amended 2003 Plan generally expire equally over a period of three years or in total after five years. Restrictions on certain grants made to non-employee directors and senior executives of the Company expire over a shorter time period, in certain cases less than one year, and may be subject to accelerated expiration over a shorter term if certain criteria are met. The restrictions associated with a grant of restricted stock liability units expire equally over a period of three years and are payable in cash at the vesting date.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

A summary of the activity of non-vested restricted stock equity awards as of December 31, 2007 is presented below:

Nonvested Restricted Stock Equity Units	Number of Restricted Shares Outstanding	Weighted-Average Grant-Date Fair-Value
Nonvested restricted shares at January 1, 2005	-	$ -
Granted	209,903	24.15
Vested	-	-
Forfeited	-	-
Nonvested restricted shares at December 31, 2005	209,903	$ 24.15
Granted	137,036	26.50
Vested	(146,335)	24.17
Forfeited	(31,820)	24.44
Nonvested restricted shares at December 31, 2006	168,784	$ 25.98
Granted	156,044	28.99
Vested	(111,322)	26.67
Forfeited	(12,336)	24.96
Nonvested restricted shares at December 31, 2007	201,170	$ 28.00

A summary of the activity of nonvested restricted stock unit liability awards as of December 31, 2007 is presented below:

Nonvested Restricted Stock Liability Units	Number of Restricted Stock Liability Units Outstanding	Weighted-Average Grant-Date Fair-Value
Nonvested restricted shares at December 31, 2005	-	$ -
Granted	108,869	28.07
Vested	-	-
Forfeited	-	-
Nonvested restricted shares at December 31, 2006	108,869	$ 28.07
Granted	143,460	28.49
Vested	(36,283)	28.07
Forfeited	(2,744)	28.07
Nonvested restricted shares at December 31, 2007	213,302	$ 28.35

As of December 31, 2007, there was $10.1 million of total unrecognized compensation cost related to non-vested, restricted stock equity units and restricted stock liability units compensation arrangements granted under the restricted stock plans. That cost is expected to be recognized over a weighted-average contractual period of 3 years. The total fair value of restricted stock equity and liability units that vested during the year ended December 31, 2007 was $4 million. Compensation expense recognized related to restricted stock equity and liability units totaled $3 million ($1.9 million, net of tax) for the year ended December 31, 2007, and $4.3 million ($2.7 million, net of tax) for the year ended December 31, 2006.

The Company settled the restricted stock liability awards vesting in 2007 with cash payments of $1.1 million.

SOUTHERN UNION COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

25. Subsequent Event

On February 8, 2008, the Company remarketed the 4.375% Senior Notes. The interest rate on the Senior Notes was reset to 6.089 percent per annum effective on and after February 19, 2008. The Senior Notes will mature on February 16, 2010. On February 19, 2008, the Company issued 3,693,240 shares of common stock for $100 million in conjunction with the remarketing of its 4.375% Senior Notes. For additional information, see *Note 10 – Stockholder's Equity – 2005 Equity Issances.*

26. Quarterly Operations (Unaudited)

The following table presents the operating results for each quarter of the year ended December 31, 2007:

	Quarters Ended			
	March 31	June 30	September 30	December 31
	(In thousands, except per share amounts)			
Operating revenues	$ 780,232	$ 588,049	$ 525,473	$ 722,911
Operating income	129,594	87,400	96,980	113,111
Earnings from continuing operations	78,721	50,975	45,283	53,732
Net earnings available for common stockholders	74,380	46,634	40,941	49,391
Diluted net earnings per share available for common stockholders:				
Continuing operations	$ 0.62	$ 0.39	$ 0.34	$ 0.41
Available for common stockholders	$ 0.62	$ 0.39	$ 0.34	$ 0.41

The following table presents the operating results for each quarter of the year ended December 31, 2006:

	Quarters Ended			
	March 31	June 30	September 30	December 31
	(In thousands, except per share amounts)			
Operating revenues	$ 547,166	$ 552,355	$ 564,418	$ 676,205
Operating income	102,847	69,792	69,961	112,485
Earnings from continuing operations	73,418	16,321	11,829	115,515
Net earnings (loss) from discontinued operations	24,529	(2,587)	(174,473)	(421)
Net earnings (loss) available for common stockholders	93,606	9,393	(166,985)	110,752
Diluted net earnings (loss) per share available for common stockholders:				
Continuing operations	$ 0.60	$ 0.10	$ 0.06	$ 0.92
Available for common stockholders	$ 0.82	$ 0.08	$ (1.42)	$ 0.92

The sum of EPS by quarter in the above tables may not equal the net earnings per common and common share equivalents for the applicable year due to variations in the weighted average common and common share equivalents outstanding used in computing such amounts.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
of Southern Union Company:

In our opinion, the accompanying consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Southern Union Company and its subsidiaries (the "Company") at December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 15 to the consolidated financial statements, the Company adopted the provisions of FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109", as of January 1, 2007. As discussed in Notes 2 and 14 to the consolidated financial statements, the Company adopted the recognition and disclosure provisions of FASB Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of FASB Statement No. 87, 88, 106 and 132(R)", as of December 31, 2006.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

with Report of Independent Registered Public Accounting Firm

Consolidated Financial Statements

Years ended December 31, 2007, 2006 and 2005

TABLE OF CONTENTS

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Citrus Corp.:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income, of stockholders' equity, of comprehensive income and of cash flows present fairly, in all material respects, the financial position of Citrus Corp. and subsidiaries (the "Company") at December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007 in conformity with the accounting principles generally accepted in the United States of America. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Notes 2 and 6 to the consolidated financial statements, the Company adopted the recognition and disclosure provisions of FASB Statement No. 158 "Employers' Accounting for Defined Pension and Other Postretirement Plans - an amendment of FASB Statements No. 87, 88, 106 and 132(R)," as of December 31, 2006.

The accompanying notes are an integral part of these consolidated financial statements.

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) Corporate Structure

Citrus Corp. (Citrus, the Company), a holding company formed in 1986, owns 100 percent of the membership interest in Florida Gas Transmission Company, LLC (Florida Gas), and 100 percent of the stock of Citrus Trading Corp. (Trading) and Citrus Energy Services, Inc. (CESI), collectively the Company. At December 31, 2007, the stock of Citrus was owned 50 percent by El Paso Citrus Holdings, Inc. (EPCH), a wholly-owned subsidiary of El Paso Corporation (El Paso), and 50 percent by CrossCountry Citrus, LLC (CCC), a wholly-owned subsidiary of CrossCountry Energy, LLC (CrossCountry). In November 2007, Southern Natural Gas Company (Southern), whose parent is El Paso, distributed EPCH to El Paso. CrossCountry was a wholly-owned subsidiary of Enron Corp. (Enron) and certain of its subsidiary companies. Effective November 17, 2004, CrossCountry became a wholly-owned subsidiary of CCE Holdings, LLC (CCE Holdings), which was a joint venture owned by subsidiaries of Southern Union Company (Southern Union) (50 percent), GE Commercial Finance Energy Financial Services (GE) (approximately 30 percent) and four minority interest owners (approximately 20 percent in the aggregate).

On December 1, 2006, a series of transactions were completed which resulted in Southern Union increasing its indirect ownership interest in Citrus from 25 percent to 50 percent. On September 14, 2006, Energy Transfer Partners, L.P. (Energy Transfer), an unaffiliated company, entered into a definitive purchase agreement to acquire the 50 percent interest in CCE Holdings from GE and other investors. At the same time, Energy Transfer and CCE Holdings entered into a definitive redemption agreement, pursuant to which Energy Transfer's 50 percent ownership interest in CCE Holdings would be redeemed in exchange for 100 percent of the equity interest in Transwestern Pipeline Company, LLC (TW) (Redemption Agreement). Upon closing of the Redemption Agreement on December 1, 2006, Southern Union became the indirect owner of 100 percent of CCE Holdings, whose principal remaining asset was its 50 percent interest in Citrus, with the remaining 50 percent of Citrus continuing to be owned by EPCH.

Florida Gas, an interstate natural gas pipeline extending from South Texas to South Florida, is engaged in the interstate transmission of natural gas and is subject to the jurisdiction of the Federal Energy Regulatory Commission (FERC).

On September 1, 2006, Florida Gas converted its legal entity type from a corporation to a limited liability company, pursuant to the Delaware Limited Liability Company Act.

(2) Significant Accounting Policies

Basis of Presentation – The Company's consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America *(GAAP)*.

Regulatory Accounting **–** Florida Gas' accounting policies generally conform to Financial Accounting Standards Board (*FASB*) Statement No. 71, *Accounting for the Effects of Certain Types of Regulation (Statement No. 71)*. Accordingly, certain assets and liabilities that result from the regulated ratemaking process are recorded that would not be recorded under GAAP for non-regulated entities.

Revenue Recognition – Revenues consist primarily of fees earned from gas transportation services. Reservation revenues are based on contracted rates and capacity reserved by the customers and are recognized monthly. For interruptible or volumetric based services, commodity revenues are recorded upon the delivery of natural gas to the agreed upon delivery point. Revenues for all services are generally based on the thermal quantity of gas delivered or subscribed at a rate specified in the contract.

Because Florida Gas is subject to FERC regulations, revenues collected during the pendency of a rate proceeding may be required by the FERC to be refunded in the final order. Florida Gas establishes reserves for such potential refunds, as appropriate. There were no reserves for potential rate refund at December 31, 2007 and 2006, respectively.

Derivative Instruments – The Company follows FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended, (Statement No. 133) to account for derivative and hedging activities. In accordance with this statement, all derivatives are recognized on the Consolidated Balance Sheets

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

at their fair value. On the date the derivative contract is entered into, the Company designates the derivative as (i) a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (*a fair value hedge*); (ii) a hedge of a forecasted transaction or the variability of cash flows to be received or paid in conjunction with a recognized asset or liability (*a cash flow hedge*); or (iii) an instrument that is held for trading or non-hedging purposes (*a trading or non-hedging instrument*). For derivatives treated as a fair value hedge, the effective portion of changes in fair value is recorded as an adjustment to the hedged item. The ineffective portion of a fair value hedge is recognized in earnings if the short cut method of assessing effectiveness is not used. Upon termination of a fair value hedge of a debt instrument, the resulting gain or loss is amortized to earnings through the maturity date of the debt instrument. For derivatives treated as a cash flow hedge, the effective portion of changes in fair value is recorded in *Accumulated Other Comprehensive Loss* until the related hedge items impact earnings. Any ineffective portion of a cash flow hedge is reported in current period earnings. For derivatives treated as trading or non-hedging instruments, changes in fair value are reported in current-period earnings. Fair value is determined based upon quoted market prices and mathematical models using current and historical data. As of December 31, 2007, the Company does not have any hedges in place as it is only amortizing previously terminated hedges.

Property, Plant and Equipment – Property, Plant and Equipment consists primarily of natural gas pipeline and related facilities and is recorded at its original cost. Florida Gas capitalizes direct costs, such as labor and materials, and indirect costs, such as overhead and cost of funds, both interest and an equity return component (see third following paragraph). Costs of replacements and renewals of units of property are capitalized. The original cost of units of property retired are charged to accumulated depreciation, net of salvage and removal costs. Florida Gas charges to maintenance expense the costs of repairs and renewal of items determined to be less than units of property.

The Company amortized that portion of its investment in Florida Gas property which is in excess of historical cost (acquisition adjustment) on a straight-line basis at an annual composite rate of 1.6 percent based upon the estimated remaining useful life of the pipeline system.

Florida Gas has provided for depreciation of assets, on a straight-line basis, at an annual composite rate of 2.77 percent, 2.78 percent and 2.56 percent for the years ended December 31, 2007, 2006 and 2005, respectively.

The recognition of an allowance for funds used during construction (AFUDC) is a utility accounting practice with calculations under guidelines prescribed by the FERC and capitalized as part of the cost of utility plant. It represents the cost of capital invested in construction work-in-progress. AFUDC has been segregated into two component parts – borrowed funds and equity funds. The allowance for borrowed and equity funds used during construction, including related gross up, totaled $10.3 million, $3.4 million and $1.4 million for the years ended December 31, 2007, 2006 and 2005, respectively. AFUDC borrowed is included in Interest Expense and AFUDC equity is included in Other Income in the accompanying statements of income.

Asset Retirement Obligations – The Company applies the provisions of *FASB Statement No. 143, Accounting for Asset Retirement Obligations* to record a liability for the estimated removal costs of assets where there is a legal obligation associated with removal. Under this standard, the liability is recorded at its fair value, with a corresponding asset that is depreciated over the remaining useful life of the long-lived asset to which the liability relates. An ongoing expense will also be recognized for changes in the value of the liability as a result of the passage of time.

FASB Interpretation No. 47, Accounting for Conditional Asset Retirement Obligations (FIN No. 47) issued by the FASB in March 2005 clarifies that the term “conditional asset retirement obligation” as used in FASB Statement No. 143, *Accounting for Asset Retirement Obligations*, refers to a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. Accordingly, an entity is required to recognize a liability for the fair value of a conditional asset retirement obligation (ARO) when incurred, if the fair value of the liability can be reasonably estimated. FIN No. 47 provides guidance for assessing whether sufficient information is available to record an estimate. This interpretation was effective for the Company beginning on December 31, 2005. Upon adoption of FIN No. 47, Florida Gas recorded an increase in plant in service and a liability for an ARO of $0.5 million. This new asset and liability related to obligations associated with the removal and disposal of asbestos and asbestos containing materials on Florida Gas’ pipeline system. The ARO asset at December 31, 2007 had a net book value of $0.5 million.

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The table below provides a reconciliation of the carrying amount of the ARO liability for the period indicated:

	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
		(In thousands)	
Beginning balance	$ 481	$ 493	$ -
Incurred	-	-	493
Settled	(37)	(36)	-
Accretion Expense	27	24	-
Ending balance	$ 471	$ 481	$ 493

Asset Impairment – The Company applies the provisions of *FASB No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets,* to account for impairments on long-lived assets. Impairment losses are recognized for long-lived assets used in operations when indicators of impairment are present and the undiscounted cash flows are not sufficient to recover the assets' carrying value. The amount of impairment is measured by comparing the fair value of the asset to its carrying amount.

Exchange Gas – Gas imbalances occur as a result of differences in volumes of gas received and delivered by a pipeline system. These imbalances due to or from shippers and operators are valued at an appropriate index price. Imbalances are settled in cash or made up in-kind subject to terms of Florida Gas' tariff, and generally do not impact earnings.

Environmental Expenditures (Note 12) – Expenditures that relate to an existing condition caused by past operations, and do not contribute to current or future generation, are expensed. Environmental expenditures relating to current or future revenues are expensed or capitalized as appropriate based on the nature of the cost incurred. Liabilities are recorded when environmental assessments and/or clean ups are probable and the cost can be reasonably estimated. Remediation obligations are not discounted because the timing of future cash flow streams is not predictable.

Cash and Cash Equivalents – Cash equivalents consist of highly liquid investments with original maturities of three months or less. The carrying amount of cash and cash equivalents approximates fair value because of the short maturity of these investments.

Materials and Supplies – Materials and supplies are valued at the lower of cost or market value. Materials transferred out of warehouses are priced at average cost. Materials and supplies include spare parts which are critical to the pipeline system operations and are valued at the lower of cost or market.

Fuel Tracker – A liability is recorded for net volumes of gas owed to customers collectively. Whenever fuel is due from customers from prior under recovery based on contractual and specific tariff provisions an asset is recorded. Gas owed to or from customers is valued at market. Changes in the balances have no effect on the consolidated income of the Company.

Income Taxes (Note 4) – Income taxes are accounted for under the asset and liability method in accordance with the provisions of FASB Statement No. 109, *Accounting for Income Taxes*. Under this method, deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts more likely than not to be realized.

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The determination of the Company's provision for income taxes requires significant judgment, use of estimates, and the interpretation and application of complex tax laws. Significant judgment is required in assessing the timing and amounts of deductible and taxable items. Reserves are established when, despite management's belief that the Company's tax return positions are fully supportable, management believes that certain positions may be successfully challenged. When facts are circumstances change, these reserves are adjusted through the provision for income taxes.

Accounts Receivable – The Company establishes an allowance for doubtful accounts on accounts receivable based on the expected ultimate recovery of these receivables. The Company considers many factors including historical customer collection experience, general and specific economic trends and known specific issues related to individual customers, sectors and transactions that might impact collectibility. Unrecovered accounts receivable charged against the allowance for doubtful accounts were $0.3 million, nil and nil in the years ended December 31, 2007, 2006 and 2005, respectively.

Pensions and Postretirement Benefits – Effective December 31, 2006, the Company adopted the recognition and disclosure provisions of FASB Statement No. 158, *"Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans – an amendment of FASB Statements No. 87, 88, 106, and 132(R)" (Statement No. 158)*. Statement No. 158 requires employers to recognize in their balance sheets the overfunded or underfunded status of defined benefit postretirement plans, measured as the difference between the fair value of the plan assets and the benefit obligation. Each overfunded plan is recognized as an asset and each underfunded plan is recognized as a liability. Employers must recognize the change in the funded status of the plan in the year in which the change occurs through *Accumulated Other Comprehensive Loss* in stockholders' equity. Effective for years beginning after December 15, 2008 (with early adoption permitted), Statement No. 158 also requires plan assets and benefit obligations to be measured as of the employers' balance sheet date. The Company has not yet adopted the measurement provisions of Statement No. 158.

Prior to adoption of the recognition provisions of Statement No. 158, the Company accounted for its defined benefit postretirement plans under FASB Statement No. 106, *"Employers' Accounting for Postretirement Benefits Other Than Pensions (Statement No. 106)."* Statement No. 106 required that the liability recorded should represent the actuarial present value of all future benefits attributable to an employee's service rendered to date. Under Statement No. 106, changes in the funded status were not immediately recognized; rather they were deferred and recognized ratably over future periods. Upon adoption of the recognition provisions of Statement No. 158, the Company recognized the amounts of these prior changes in the funded status of its postretirement benefit plans. The Company's plan is in an overfunded position as of December 31, 2007. As the plan assets are derived through rates charged to customers, under Statement No. 71, to the extent the Company has collected amounts in excess of what is required to fund the plan, the Company has an obligation to refund the excess amounts to customers through rates. As such, the Company recorded the previously unrecognized changes in the funded status (i.e., actuarial gains) as a regulatory liability and not as an adjustment to *Accumulated Other Comprehensive Loss*.

Use of Estimates – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

New Accounting Principles

Accounting Principles Not Yet Adopted.

FIN 48," Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement 109" (FIN 48 or the Interpretation): Issued by the FASB in June 2006, this Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 prescribes a recognition and measurement threshold attributable for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006, for public enterprises and December 15, 2007, for nonpublic enterprises,

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

such as Citrus. The Company has determined the implementation of this Statement will not have a material impact on its consolidated financial statements.

FSP No. FIN 48-1, "Definition of 'Settlement' in FASB Interpretation No. 48" (FIN 48-1): Issued by the FASB in May 2007, FIN 48-1 provides guidance on how an enterprise should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits.

FASB Statement No. 157, "Fair Value Measurements" (FASB Statement No. 157 or the Statement)**:** Issued by the FASB in September 2006, this Statement defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Where applicable, this Statement simplifies and codifies related guidance within GAAP. Except for certain non financial assets and liabilities more fully discussed in FSP No. FAS 157-2, "*Effective Date of FASB Statement No. 157*" (*FSP No. FAS 157*-2) which was issued by the FASB in February 2008, this Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. For those non financial assets and liabilities deferred pursuant to FSP No. FAS 157-2, this Statement is effective for financial statements for fiscal years beginning after November 15, 2008. The Company is currently evaluating the impact of this Statement on its consolidated financial statements.

FASB Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115": Issued by the FASB in February 2007, this Statement permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. The Statement does not affect any existing accounting literature that requires certain assets and liabilities to be carried at fair value. The Statement is effective for fiscal years beginning after November 15, 2007. At January 1, 2008, the Company did not elect the fair value option under the Statement and, therefore, there was no impact to the Company's consolidated financials statements.

FASB Statement No. 141 (revised), "*Business Combinations".* Issued by the FASB in December 2007, this Statement changes the accounting for business combinations including the measurement of acquirer shares issued in consideration for a business combination, the recognition of contingent consideration, the accounting for preacquisition gain and loss contingencies, the recognition of capitalized in-process research and development costs, the accounting for acquisition-related restructuring cost accruals, the treatment of acquisition related transaction costs and the recognition of changes in the acquirer's income tax valuation allowance. The Statement is effective for fiscal years beginning after December 15, 2008, with early adoption prohibited.

FASB Statement No. 160, "*Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51".* Issued by the FASB in December 2007, this Statement changes the accounting for noncontrolling (minority) interests in consolidated financial statements including the requirements to classify noncontrolling interests as a component of consolidated stockholders' equity, and the elimination of minority interest accounting in results of operations with earnings attributable to noncontrolling interests reported as part of consolidated earnings. Additionally, the Statement revises the accounting for both increases and decreases in a parent's controlling ownership interest. The Statement is effective for fiscal years beginning after December 15, 2008, with early adoption prohibited. The Company is currently evaluating the impact of this statement on its consolidated financial statements.

CITRUS CORP. AND SUBSIDIARIES

Unamortized Debt Discount and Swap Loss		(1,590)		(2,118)	
Total long-term debt		$ 909,810		$ 836,882	

Annual maturities of long-term debt outstanding as of the date indicated were as follows:

Year	December 31, 2007 (In thousands)
2008	$ 44,000
2009	51,500
2010	346,500
2011	21,500
2012	387,900
Thereafter	104,000
	$ 955,400

On August 13, 2004 Florida Gas entered into a Revolving Credit Agreement (“2004 Revolver”) with an initial commitment level of $50 million, subsequently increased by $125 million to $175 million. Since that time, Florida Gas has routinely utilized the 2004 Revolver to fund working capital needs. On December 31, 2006, the amount drawn under the 2004 Revolver was $40 million, with a weighted average interest rate of 6.08 percent (based on LIBOR plus 0.70 percent). Additionally, a commitment fee of 0.15 percent is payable quarterly on the unused portion of the commitment balance. The 2004 Florida Gas Revolver terminated in August 2007 and was replaced by a new revolving credit agreement at Florida Gas in the amount of $300 million (“2007 Florida Gas Revolver”), which will mature on August 16, 2012. The 2007 Florida Gas Revolver

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

requires interest based on LIBOR plus a margin tied to the debt rating of the Company's senior unsecured debt, currently 0.28 percent, and has a facility fee of 0.07 percent. As of December 31, 2007, the amount drawn under the 2007 Florida Gas Revolver was $54 million with a weighted average interest rate of 5.30 percent (based on LIBOR plus 0.28 percent).

Also on August 16, 2007, Citrus entered into a revolving credit facility in the amount of $200 million ("2007 Citrus Revolver"), which will mature on August 16, 2012. This facility will enable Citrus to meet its funding needs and repay its debt maturities. As of December 31, 2007, the amount drawn under the 2007 Citrus Revolver was $62.4 million with a weighted average interest rate of 5.22 percent (based on LIBOR plus 0.28 percent), and has a facility fee of 0.07 percent. Issuance costs for the 2007 Florida Gas Revolver and 2007 Citrus Revolver were $0.3 million and $0.2 million, respectively at December 31, 2007.

The book value of the 2004 Revolver, 2007 Florida Gas Revolver, and 2007 Citrus Revolver approximates their market value given the variable rate of interest. Estimated fair value amounts of other long-term debt were obtained from independent parties, and are based upon market quotations of similar debt at interest rates currently available. Judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, the estimates determined as of December 31, 2007 and 2006 are not necessarily indicative of the amounts the Company could have realized in current market exchanges.

The agreements relating to Florida Gas' debt include, among other things, restrictions as to the payment of dividends and maintaining certain restrictive financial covenants, including a required ratio of consolidated funded debt to total capitalization.

Under the terms of its debt agreements, Florida Gas may incur additional debt to refinance maturing obligations if the refinancing does not increase aggregate indebtedness, and thereafter, if Citrus' and Florida Gas' consolidated debt does not exceed specific debt to total capitalization ratios, as defined in certain debt instruments. Incurrence of additional indebtedness to refinance the current maturities would not result in a debt to capitalization ratio exceeding these limits.

All of the debt obligations of Citrus and Florida Gas have events of default that contain commonly used cross-default provisions. An event of default by either Citrus or Florida Gas on any of their borrowed money obligations, in excess of certain thresholds which is not cured within defined grace periods, would cause the other debt obligations of Citrus and Florida Gas to be accelerated.

(4) Income Taxes

The principal components of the Company's net deferred income tax liabilities as of the dates indicated were as follows:

	December 31, 2007	December 31, 2006
	(In thousands)	
Deferred income tax asset		
Regulatory and other reserves	$ 5,554	$ 8,595
	5,554	8,595
Deferred income tax liabilities		
Depreciation and amortization	759,576	742,566

State	2,254	2,766	1,661
	(12,277)	18,629	12,740
Total income tax expense	$ 92,224	$ 75,960	$ 75,086

The differences between taxes computed at the U.S. federal statutory rate of 35 percent and the Company's effective tax rate for the periods indicated are as follows:

	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
		(In thousands)	
Statutory federal income tax provision	$ 87,261	$ 70,712	$ 69,661
State income taxes, net of federal benefit	4,986	5,176	6,813
Other	(23)	72	(1,388)
Income tax expense	$ 92,224	$ 75,960	$ 75,086
Effective Tax Rate	37.0%	37.6%	37.7%

The Company files a consolidated federal income tax return separate from that of its stockholders.

(5) Employee Benefit Plans

The employees of the Company were covered under Enron's employee benefit plans until November 2004.

Enron maintained a pension plan that was a noncontributory defined benefit plan, the Enron Corp. Cash Balance Plan (the Cash Balance Plan), covering certain Enron employees in the United States and certain employees in foreign countries. The basic benefit accrual was 5 percent of eligible annual base pay. In 2003 the Company recognized its portion of the expected Cash Balance Plan settlement by recording a $9.6 million current liability, which was cash settled in 2005 (Note 7), and a charge to operating expense. In 2004, with the settlement of the rate case (Note 8), Florida Gas recognized a regulatory asset for its portion, $9.3 million, with a reduction to operating expense. Per the rate case settlement Florida Gas will amortize, over five years retroactive to April 1, 2004, its allocated share of costs to fully fund and terminate the Cash Balance Plan. Amortization recorded was $1.9 million, $1.8 million and $1.9 million for the years ended December 31, 2007,

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2006 and 2005, respectively. At December 31, 2007 and 2006 the remaining regulatory asset balance was \$2.3 million and \$4.2 million, respectively (Note 10).

Effective November 1, 2004 all employees of the Company were transferred to an affiliated entity, CrossCountry Energy Services, LLC (CCES) and during November 2004, employee insurance coverage migrated (without lapse) from Enron plans to new CCES welfare and benefit plans. Effective March 1, 2005 essentially all such employees were transferred to Florida Gas and became eligible at that time to participate in employee welfare and benefit plans adopted by Florida Gas.

Effective March 1, 2005 Florida Gas adopted the Florida Gas Transmission Company 401(k) Savings Plan (the Plan). All employees of Florida Gas are eligible to participate and, within one Plan, may contribute up to 50 percent of pre-tax compensation, subject to IRS limitations. This Plan allows additional "catch-up" contributions by participants over age 50, and allows Florida Gas to make discretionary profit sharing contributions for the benefit of all participants. Florida Gas matched 50 percent of participant contributions under this Plan up to a maximum of four percent of eligible compensation through December 31, 2007. The matching was increased effective January 1, 2008 to 100 percent of the first two percent and 50 percent of the next three percent of the participant's compensation paid into the Plan. Participants vest in such matching and any profit sharing contributions at the rate of 20 percent per year, except that participants with five years of service at the date of adoption of the Plan were immediately vested. Administrative costs of the Plan and certain asset management fees are paid from Plan assets. Florida Gas' expensed its contribution of \$0.3 million, \$0.4 million, and \$0.3 million for the years ended December 31, 2007, 2006, and 2005 respectively.

Other Post – Employment Benefits

Prior to December 1, 2004 Florida Gas was a participating employer in the Enron Gas Pipelines Employee Benefit Trust (the Trust), a voluntary employees' beneficiary association (VEBA) under Section 501(c)(9) of the Internal Revenue Code of 1986, as amended (Tax Code), which provided certain post-retirement medical, life insurance and dental benefits to employees of Florida Gas and certain other Enron affiliates pursuant to the Enron Corp. Medical Plan and the Enron Corp. Medical Plan for Inactive Participants. Enron has made the determination that it will partition the Trust and distribute the assets and liabilities of the Trust among the participating employers of the Trust on a pro rata basis according to the contributions and liabilities associated with each participating employer. The Trust Committee has final approval on allocation methodology for the Trust assets. It is estimated that Florida Gas will receive approximately \$6.8 million from the Trust, including an estimated investment return as early as first quarter 2008. Enron filed a motion in the Enron bankruptcy proceedings on July 22, 2003 which was stayed and then refiled and amended on June 17, 2005 and again refiled and amended on December 1, 2006 which provides that each participating employer expressly assumes liability for its allocable portion of retiree benefits and releases Enron from any liability with respect to the Trust in order to receive the assets of the Trust. On June 7, 2005 a class action suit captioned *Lou Geiler et al v. Robert W. Jones*, *et al.,* was filed in United States District Court for the District of Nebraska by, among others, former employees of Northern Natural Gas Company (Northern) on behalf of the participants in the Northern Medical and Dental Plan for Retirees and Surviving Spouses against former and present members of the Trust Committee, the Trustee and the participating employers of the Trust, including Florida Gas, claiming the Trust Committee and the Trustee have violated their fiduciary duties under ERISA and seeking a declaration from the Court binding on all participating employers of an accounting and distribution of the assets held in the Trust and a complete and accurate listing of the individuals properly allocated to Northern from the Enron Plan. On the same date essentially the same group filed a motion in the Enron bankruptcy proceedings to strike the Enron motion from further consideration. On February 6, 2006 the Nebraska action was dismissed. The plaintiffs filed an appeal of the dismissal on March 8, 2006. An agreement was reached on the conditions of the partition of the Trust among the VEBA participating employers, Enron and the Trust Committee and approved by the Enron bankruptcy court on December 21, 2006. As a result, the Nebraska action appeal was dismissed on January 25, 2007.

During the period December 1, 2004 through February 28, 2005, following Florida Gas' November 17, 2004 acquisition by CCE Holdings, coverage to eligible employees and their eligible dependents was provided by CrossCountry Energy Retiree Health Plan, which provides only medical benefits. Florida Gas continues to provide certain retiree benefits through employer contributions to a qualified contribution plan, with the amounts generally varying based on age and years of service.

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Effective March 1, 2005 such benefits are provided under an identical plan sponsored by Florida Gas as a single employer post-retirement benefit plan.

With regard to its sponsored plan, Florida Gas has entered into a VEBA trust (the "VEBA Trust") agreement with JPMorgan Chase Bank Trust Company as trustee. The VEBA Trust has established or adopted plans to provide certain post-retirement life, health, accident and other benefits. The VEBA Trust is a voluntary employees' beneficiary association under Section 501(c)(9) of the Tax Code, which provides benefits to employees of the Company. Florida Gas contributed $0.5 million and $1.2 million to the VEBA Trust for the years ended December 31, 2007 and 2006, respectively. Upon settlement of the Trust, the anticipated distribution of assets to Florida Gas from the Trust will be contributed to the VEBA Trust.

Prior to 2005, Florida Gas' general policy was to fund accrued post-retirement health care costs as allocated by Enron. As a result of Florida Gas' change in 2005 from a participant in a multi employer plan to a single employer plan, Florida Gas now accounts for its OPEB liability and expense on an actuarial basis, recording its health and life benefit costs over the active service period of employees to the date of full eligibility for the benefits. At December 31, 2005 Florida Gas recognized its OPEB liability by recording a deferred credit of $2.2 million and a corresponding regulatory asset of $2.2 million.

The Company has postretirement health care plans which cover substantially all employees. The health care plans generally provide for cost sharing in the form of retiree contributions, deductibles, and coinsurance between the Company and its retirees, and a fixed cost cap on the amount the Company pays annually to provide future retiree health care coverage under certain of these plans.

The following table summarizes the impact of adopting Statement No. 158 on the Company's postretirement plan reported in the Consolidated Balance Sheet at December 31, 2006:

	Pre-FASB 158	FASB 158 adoption adjustment	Post-FASB 158
		(in thousands)	
Prepaid postretirement benefit cost (non-current) (Note 10)	$ (721)	$ 3,423	$ 2,702
Regulatory asset	1,951	(1,951)	-
Regulatory liability	-	(1,472)	(1,472)

The adoption of Statement No. 158 had no effect on the Consolidated Statements of Income for the years ended December 31, 2007 and December 31, 2006, or for any prior period presented, has not negatively impacted any financial covenants, and is not expected to affect the Company's operating results in future periods.

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Postretirement benefit liabilities are accrued on an actuarial basis during the years an employee provides services. The following table represents a reconciliation of Florida Gas' OPEB plan for the periods indicated:

	Year Ended December 31, 2007	Year Ended December 31, 2006
	(In thousands)	
Change in Benefit Obligation		
Benefit obligation at the beginning of period	$ 5,795	$ 6,665
Service cost	37	46
Interest cost	296	312
Actuarial gain	(320)	(691)
Retiree premiums	415	427
Benefits paid	(1,029)	(964)
CMS Medicare Part D Subsidies Received	108	-
Benefit obligation at end of year	5,302	5,795
Change in Plan Assets		
Fair value of plan assets at the beginning of period	8,497	7,840
Return on plan assets	336	(37)
Employer contributions	380	1,231
Retiree premiums	415	427
Benefits paid	(1,029)	(964)
Fair value of plan assets at end of year (1)	8,599	8,497
Funded Status		
Funded status at the end of the year	$ 3,297	$ 2,702
Amount recognized in the Consolidated Balance Sheets		
Other assets - other (Note 10)	$ 3,297	$ 2,702
Regulatory liability (Note 11)	(3,390)	(1,472)
Net asset (liability) recognized	$ (93)	$ 1,230

(1) Plan assets at December 31, 2007 and 2006 include the amounts of assets expected to be received from the Enron Trust of $6.8 million and $6.5 million, respectively, including a 5 percent annual investment return based on estimate.

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The weighted-average assumptions used to determine Florida Gas' benefit obligations for the periods indicated were as follows:

	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
Discount rate	6.09%	5.68%	5.50%
Health care cost trend rates	10.00% graded to 5.20% by 2017	11.00% graded to 4.85% by 2013	12.00% graded to 4.65% by 2012

Florida Gas' net periodic (benefit) costs for the periods indicated consisted of the following:

	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
		(In thousands)	
Service cost	$ 37	$ 46	$ 71
Interest cost	296	312	490
Expected return on plan assets	(414)	(402)	(352)
Recognized actuarial gain	(230)	(223)	(174)
Net periodic (benefit) cost	$ (311)	$ (267)	$ 35

The weighted-average assumptions used to determine Florida Gas' net periodic benefit costs for the periods indicated were as follows:

	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
Discount rate	5.68%	5.50%	5.75%
Rate of compensation increase	N/A	N/A	N/A
Expected long-term return on plan assets	5.00%	5.00%	5.00%
Health care cost trend rates	11.00% graded to 4.85% by 2013	12.00% graded to 4.65% by 2012	12.00% graded to 4.75% by 2012

Florida Gas employs a building block approach in determining the expected long-term rate on return on plan assets. Historical markets are studied and long-term historical relationships between equities and fixed-income are preserved consistent with the widely accepted capital market principle that assets with higher volatility generate a greater return over the long run. Current market factors such as inflation and interest rates are evaluated before long-term market assumptions are determined. The long-term portfolio return is established via a building block approach with proper consideration of diversification and rebalancing. Peer data and historical returns are reviewed to check for reasonability and appropriateness.

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Assumed health care cost trend rates have a significant effect on the amounts reported for health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	One Percentage Point Increase	One Percentage Point Decrease
	(In thousands)	
Effect on total service and interest cost components	$ 15	$ (13)
Effect on postretirement benefit obligation	$ 240	$ (215)

Discount Rate Selection - The discount rate for each measurement date has been determined consistent with the discount rate selection guidance in Statement No. 106 (as amended by Statement No. 158) using the Citigroup Pension Discount Curve as published on the Society of Actuaries website as the hypothetical portfolio of high-quality debt instruments that would provide the necessary cash flows to pay the benefits when due.

Plan Asset Information - The plan assets shall be invested in accordance with sound investment practices that emphasize long-term investment fundamentals. An investment objective of income and growth for the plan has been adopted. This investment objective: (i) is a risk-averse balanced approach that emphasizes a stable and substantial source of current income and some capital appreciation over the long-term; (ii) implies a willingness to risk some declines in value over the short-term, so long as the plan is positioned to generate current income and exhibits some capital appreciation; (iii) is expected to earn long-term returns sufficient to keep pace with the rate of inflation over most market cycles (net of spending and investment and administrative expenses), but may lag inflation in some environments; (iv) diversifies the plan in order to provide opportunities for long-term growth and to reduce the potential for large losses that could occur from holding concentrated positions; and (iv) recognizes that investment results over the long-term may lag those of a typical balanced portfolio since a typical balanced portfolio tends to be more aggressively invested. Nevertheless, this plan is expected to earn a long-term return that compares favorably to appropriate market indices.

It is expected that these objectives can be obtained through a well-diversified portfolio structure in a manner consistent with the investment policy.

Florida Gas' OPEB weighted-average asset allocation by asset category for the $1.8 million and $2.0 million of assets actually in the VEBA Trust at December 31, 2007 and 2006, respectively, were approximately as follows:

	December 31, 2007	December 31, 2006
Equity securities	31%	0%
Debt securities	69%	0%
Cash and cash equivalents	0%	100%
Total	100%	100%

Based on the postretirement plan objectives, asset allocations should be maintained as follows: equity of 25 percent to 35 percent, fixed income of 65 percent to 75 percent, and cash and cash equivalents of 0 percent to 10 percent.

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The above referenced asset allocations for postretirement benefits are based upon guidelines established by Florida Gas' Investment Policy and is monitored by the Investment Committee of the board of directors in conjunction with an external investment advisor.

Florida Gas expects to contribute approximately $1.1 million to its post-retirement benefit plan in 2008 and approximately $1.1 million annually thereafter until modified by rate case proceedings.

The estimated employer portion of benefit payments, which reflect expected future service, as appropriate, that are projected to be paid are as follows:

Years	Expected Benefits Before Effect of Medicare Part D	Payments Medicare Part D	Net
		(In thousands)	
2008	$ 551	$ 96	$ 455
2009	594	99	495
2010	614	101	513
2011	625	101	524
2012	624	100	524
2013 - 2017	2,935	454	2,481

The Medicare Prescription Drug Act was signed into law December 8, 2003. The Act introduces a prescription drug benefit under Medicare (*Medicare Part D*) as well as a federal subsidy, which is not taxable, to sponsors of retiree healthcare benefit plans that provide a prescription drug benefit that is at least actuarially equivalent to Medicare Part D.

(6) Major Customers and Concentration of Credit Risk

Revenues from individual third party and affiliate customers exceeding 10 percent of total revenues for the periods indicated were approximately as listed below, and in total represented 56%, 58% and 54% of total revenue, respectively.

	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
		(In thousands)	
Florida Power & Light Company	$ 195,622	$ 200,592	$ 181,486
TECO Energy, Inc.	80,815	80,192	76,059

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company had the following transportation receivables from these customers at the dates indicated:

	December 31, 2007	December 31, 2006
	(In thousands)	
Florida Power & Light Company	$ 15,130	$ 15,065
TECO Energy, Inc.	6,201	6,161

The Company has a concentration of customers in the electric and gas utility industries. These concentrations of customers may impact the Company's overall exposure to credit risk, either positively or negatively, in that the customers may be similarly affected by changes in economic or other conditions. Credit losses incurred on receivables in these industries compare favorably to losses experienced in the Company's receivable portfolio as a whole. The Company also has a concentration of customers located in the southeastern United States, primarily within the state of Florida. Receivables are generally not collateralized. From time to time, specifically identified customers having perceived credit risk are required to provide prepayments, deposits, or other forms of security to the Company. Florida Gas sought additional assurances from customers due to credit concerns, and had customer deposits totaling $1.6 million and $1.6 million, and prepayments of $43,000 and $0.2 million at December 31, 2007 and 2006, respectively. The Company's management believes that the portfolio of Florida Gas' receivables, which includes regulated electric utilities, regulated local distribution companies, and municipalities, is of minimal credit risk.

(7) Related Party Transactions

In December 2001 Enron and certain of its subsidiaries filed voluntary petitions for Chapter 11 reorganization with the U.S. Bankruptcy court. At December 31, 2004 Florida Gas and Trading had aggregate outstanding claims with the Bankruptcy Court against Enron and affiliated bankrupt companies of $220.6 million. Of these claims, Florida Gas and Trading filed claims totaling $68.1 and $152.5 million, respectively. Florida Gas and Trading claims pertaining to contracts rejected by ENA were $21.4 and $152.3 million, respectively. In March 2005, ENA filed objections to Trading's claim. In September 2006 the judge issued an order rejecting certain of Trading's arguments and ruling that a contract under which ENA had an in the money position against Trading may be offset against a related contract under which Trading had an in the money position against ENA. The result of the order was a reduction in the allowable amount of Trading's initial claim to $22.7 million. The parties reached a settlement which was approved by the Bankruptcy Court in March 2007 (See Note 14).

Florida Gas' claims against ENA on transportation contracts were reduced by approximately $21.2 million when a third party took assignment of ENA's transportation contracts. In 2004 Florida Gas settled the amount of all of its claims against Enron and a subsidiary debtor. Total allowed claims (including debtor set-offs) were $13.3 million. After approval of the settlement by the Bankruptcy Court, in June 2005 Florida Gas sold its claims, received $3.4 million and recorded Other Income of $0.9 million.

Florida Gas had a construction reimbursement agreement with ENA under which amounts owed to Florida Gas were delinquent. These obligations totaled approximately $7.4 million and were included in Florida Gas' filed bankruptcy claims. These receivables were fully reserved by Florida Gas prior to 2003. Under the Settlement filed by Florida Gas on August 13, 2004 and approved by the FERC on December 21, 2004 Florida Gas will recover the under-recovery on this obligation by rolling in the costs of the facilities constructed, less the recovery from ENA, in its tariff rates (see Note 8). As part of the June 2005 sale of its claims, Florida Gas received $2.1 million for this part of the claim.

The Company provided natural gas sales and transportation services to El Paso affiliates at rates equal to rates charged to non-affiliated customers in the same class of service. Revenues related to these transportation services were approximately nil, $1.0 million and $4.5 million in the years ended December 31, 2007, 2006 and 2005, respectively. The Company's gas sales were immaterial in the years ended December 31, 2007, 2006 and 2005. Florida Gas also purchased transportation services from Southern in connection with its Phase III

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Expansion completed in early 1995. Florida Gas contracted for firm capacity of 100,000 Mcf/day on Southern's system for a primary term of 10 years, to be continued for successive terms of one year each year thereafter unless cancelled by either party, by giving 180 days notice to the other party prior to the end of the primary term or any yearly extension thereof. The amount expensed for these services totaled $6.8 million, $6.6 million and $6.3 million in the years ended December 31, 2007, 2006 and 2005, respectively.

Effective April 1, 2004 services previously provided by bankrupt Enron affiliates to the Company pursuant to the allocation methodology ordered by the Bankruptcy Court were covered and charged under the terms of the Transition Services Agreement / Transition Supplemental Services Agreement (TSA/TSSA). This agreement between Enron and CrossCountry was administered by CrossCountry Energy Services, LLC (CCES), a subsidiary of CCE Holdings, which allocated to the Company its share of total costs. Effective November 17, 2004 an Amended TSA/TSSA agreement was put into effect. This agreement expired on July 31, 2005. The total costs are not materially different from those previously charged. The amount expensed for the seven month-period ended July 31, 2005 was approximately $1.5 million.

On November 5, 2004, CCE Holdings entered into an Administrative Services Agreement (*ASA*) with SU Pipeline Management LP (Manager), a Delaware limited partnership and a wholly-owned subsidiary of Southern Union. Pursuant to the ASA, Manager was responsible for the operations and administrative functions of the enterprise, CCE Holdings and Manager shared certain operations of Manager and its affiliates, and CCE Holdings was obligated to bear its share of costs of Manager and its affiliates. Costs are allocated by Manager and its affiliates to the operating subsidiaries and investees, based on relevant criteria, including time spent, miles of pipe, total assets, labor allocations, or other appropriate methods. Manager provided services to CCE Holdings from November 17, 2004 to December 1, 2006. Following the closing of the Redemption Agreement on December 1, 2006, services continue to be provided by Southern Union affiliates to Florida Gas, and costs allocated using allocation methods consistent with past practices.

The Company has related party activities for operational and administrative services performed by CCES, Panhandle Eastern Pipe Line Company, LP (PEPL), an indirect wholly-owned subsidiary of Southern Union, and other related parties, on behalf of the Company, and corporate service charges from Southern Union. Expenses are generally charged based on either actual usage of services or allocated based on estimates of time spent working for the benefit of the various affiliated companies. Amounts expensed by the Company were $21.5 million, $20.6 million and $20.2 million in the years ended December 31, 2007, 2006 and 2005, respectively, and included corporate service charges from Southern Union of $5.9 million, $4.0 million and $1.6 million in the years ended December 31, 2007, 2006 and 2005, respectively. Additionally, the Company receives allocated costs of certain shared business applications from PEPL and Southern Union. At December 31, 2007 and 2006, the Company had current accounts payable to affiliated companies of $8.4 million and $2.8 million, respectively, relating to these services.

In 2005, the Company paid a subsidiary of CCE Holdings $9.6 million to settle the Cash Balance Plan obligation, which CCE Holdings effectively paid in conjunction with the 2004 acquisition of the Company.

The Company paid cash dividends to its shareholders of $207.1 million, $125.4 million and $121.2 million in the years ended December 31, 2007, 2006, and 2005, respectively. The Company also declared a dividend in December 2007 of $42.6 million, payable in January, 2008 and which was paid on January 18, 2008.

(8) Regulatory Matters

On August 13, 2004 Florida Gas filed a Stipulation and Agreement of Settlement ("Rate Case Settlement") in its Section 4 rate proceeding in Docket No. RP04-12, which established settlement rates and resolved all issues. The settlement rates were approved and became effective on April 1, 2004 for all Florida Gas services and again on April 1, 2005 for Rate Schedule FTS-2 when the basis for rates on Florida Gas incremental facilities changed from a levelized cost of service to a traditional cost of service.

On December 15, 2003 the U.S. Department of Transportation issued a Final Rule requiring pipeline operators to develop integrity management programs to comprehensively evaluate their pipelines, and take measures to protect pipeline segments located in what the regulation defines as "high consequence areas" ("HCA"). This rule resulted from the enactment of the Pipeline Safety Improvement Act of 2002. The rule

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

requires operators to identify HCAs along their pipelines by December 2004 and to have begun baseline integrity assessments, comprised of in-line inspection (smart pigging), hydrostatic testing, or direct assessment, by June 2004. Operators were required to rank the risk of their pipeline segments containing HCAs and to complete assessments on at least 50 percent of the segments using one or more of these methods by December 2007. Assessments will generally be conducted on the higher risk segments first with the balance being completed by December 2012. As of December 31, 2007, Florida Gas completed 62 percent of the risk assessments. In addition, some system modifications will be necessary to accommodate the in-line inspections. All systems operated by the Company will be compliant with the rule; however, while identification and location of all the HCAs has been completed, it is impossible to determine with certainty the total scope of required remediation activities prior to completion of the assessments and inspections. The required modifications and inspections are currently estimated to be in the range of approximately $21 million to $28 million per year through 2012. Pursuant to the August 13, 2004 Rate Case Settlement, Florida Gas has the right to make limited sections 4 filings to recover, via a surcharge during the settlement's term, depreciation and return on up to approximately $40 million of such costs, as well as security, and Florida Turnpike relocation and modification costs. A reservation surcharge of $0.02 per MMBtu has been in effect since April 1, 2007, subject to refund and further review by the FERC.

In June 2005 FERC issued an order Docket No. AI05-1-000 that expands on the accounting guidance in the proposed accounting release issued in November 2004 on mandated pipeline integrity programs. The order interprets the FERC's existing accounting rules and standardizes classifications of expenditures made by pipelines in connection with an integrity management program. The order is effective for integrity management expenditures incurred on or after January 1, 2006. Florida Gas capitalizes all pipeline assessment costs pursuant to its August 13, 2004 Rate Case Settlement. The Rate Case Settlement contained no reference to the FERC Docket No. AI05-1-000 regarding pipeline assessment costs and provided that the final FERC order approving the Rate Case Settlement constituted final approval of all necessary authorizations to effectuate its provisions. The Rate Case Settlement provisions became effective on March 1, 2005 and new tariff sheets to implement these provisions were filed on March 15, 2005. FERC issued an order accepting the tariff sheets on May 20, 2005. In the years ended December 31, 2007 and 2006, Florida Gas completed and capitalized $9.5 million and $6.7 million, respectively on pipeline assessment projects, as part of the integrity programs.

On October 5, 2005 Florida Gas filed an application with FERC for the Company's proposed Phase VII expansion project. The project will expand Florida Gas' existing pipeline infrastructure in Florida and provide the growing Florida energy market access to additional natural gas supply from the Southern LNG Elba Island liquefied natural gas import terminal near Savannah, Georgia. The Phase VII project calls for Florida Gas to build approximately 17 miles of 36-inch diameter pipeline looping in several segments along an existing right of way and install 9,800 horsepower of compression in a first phase with the possibility of a future second phase. The expansion as currently planned will provide about 100 million cubic feet per day (MMcf/d) of additional capacity to transport natural gas from a connection with Southern Natural Gas Company's Cypress Pipeline project in Clay County, Florida. The FERC issued an order approving the project on June 15, 2006 and construction commenced on November 6, 2006. The first phase was partially placed in service in May 2007 while certain modifications at compressor station 26 are expected to be in service by the end of March, 2008. The updated estimated cost of the expansion is approximately $62 million, including AFUDC. Approximately $12.6 million and $39.3 million is recorded in the line item Construction work in progress at December 31, 2007 and December 31, 2006, respectively.

On October 20, 2005, Florida Gas filed an application with FERC for the Company's State Road 91 Relocation Project. The proposed project will consist of the abandonment of approximately 11.15 miles of 18-inch diameter pipeline and 10.75 miles of 24-inch diameter pipeline in Broward, County Florida. The replacement pipeline will consist of approximately 11.15 miles of 36-inch diameter pipeline. The abandonment and replacement is being performed to accommodate the widening of State Road 91 by the Florida Department of Transportation/Florida Turnpike Enterprise (FDOT/FTE). The estimated cost of the pipeline relocation project is estimated at $110 million, including AFUDC, and Florida Gas is seeking recovery of the construction costs from the FDOT/FTE. The FERC issued an order approving the project on May 3, 2006. Florida Gas notified the FERC that construction commenced on April 25, 2007.

Florida Gas plans to seek FERC approval to construct an expansion to increase its natural gas capacity into Florida by approximately 800 MMcf/d (*Phase VIII Expansion*). The Phase VIII Expansion includes

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

construction of approximately 500 miles of additional large diameter pipeline and the installation of approximately 170,000 horsepower of additional compression. Pending FERC approval, which is expected in 2009, Florida Gas anticipates an in-service date of 2011, at an approximate cost of $2 billion. Florida Gas has signed a 25-year agreement with Florida Power and Light Company, (*FPL*), a wholly-owned subsidiary of FPL Group, Inc., for 400 MMcf/d of capacity.

(9) Property, Plant and Equipment

The principal components of the Company's property, plant and equipment at the dates indicated were as follows:

	December 31, 2007	December 31, 2006
	(In thousands)	
Transmission plant	$ 2,970,560	$ 2,859,920
General plant	28,540	24,970
Intangibles	31,196	25,726
Construction work-in-progress	133,824	85,746
Acquisition adjustment	1,252,466	1,252,466
	4,416,586	4,248,828
Less: Accumulated depreciation and amortization	(1,401,638)	(1,304,133)
Property, Plant and Equipment, net	$ 3,014,948	$ 2,944,695

(10) Other Assets

The principal components of the Company's regulatory assets at the dates indicated were as follows:

	December 31, 2007	December 31, 2006
	(In thousands)	
Ramp-up assets, net (1)	$ 11,616	$ 11,928
Fuel Tracker	2,295	11,747
Cash balance plan settlement (Note 5)	2,326	4,185
Environmental non-PCB clean-up cost (Note 12)	1,147	1,000
Other miscellaneous	1,823	2,147
Total Regulatory Assets	$ 19,207	$ 31,007

(1) Ramp-up assets are regulatory assets which Florida Gas was specifically allowed to establish in the FERC certificates authorizing the Phase IV and V Expansion projects.

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The principal components of the Company's other assets at the dates indicated were as follows:

	December 31, 2007	December 31, 2006
	(In thousands)	
Long-term receivables (Note 14)	$ 2,859	$ 71,648

Taxes Payable	3,116	1,664
Asset retirement obligation (Note 2)	471	481
Other miscellaneous	1,703	1,398
Total Deferred Credits - other	$ 9,202	$ 8,129

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(12) Environmental Reserve

The Company is subject to extensive federal, state and local environmental laws and regulations. These laws and regulations require expenditures in connection with the construction of new facilities, the operation of existing facilities and for remediation at various operating sites. The implementation of the Clean Air Act Amendments resulted in increased operating expenses. These increased operating expenses did not have a material impact on the Company's consolidated financial statements.

Florida Gas conducts assessment, remediation, and ongoing monitoring of soil and groundwater impact which resulted from its past waste management practices at its Rio Paisano and Station 11 facilities. The anticipated costs over the next five years are: 2008 - $0.3 million, 2009 - $0.1 million, 2010 - $0.2 million, 2011 - $0.3 million and 2012 – $0.1 million. The expenditures thereafter are estimated to be $0.6 million for soil and groundwater remediation. The liability is recognized in other current liabilities and in other deferred credits and in total amounted to $1.6 million and $1.6 million at December 31, 2007 and 2006, respectively. Costs of $0.2 million, $0.1 million and $0.8 million were expensed during the years ended December 31, 2007, 2006 and 2005, respectively. Florida Gas recorded the estimated costs of remediation to be spent after April 1, 2010 of $1.1 million and $1.0 million at December 31, 2007 and 2006, respectively (Note 10), as a regulatory asset based on the probability of recovery in rates in its next rate case.

Prior to December 31, 2005, no such liability was recognized since it was previously estimated to be less than $1.0 million, and therefore, considered not to be material. Amounts incurred for environmental assessment and remediation were expensed as incurred.

(13) Accumulated Other Comprehensive Loss

Deferred gains and losses in connection with the termination of the following derivative instruments which were previously accounted for as cash flow hedges form part of other comprehensive income. Such amounts are being amortized over the terms of the hedged debt.

The table below provides an overview of comprehensive income for the periods indicated:

	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
		(In thousands)	
Interest rate swap loss on 7.625% $325 million note due 2010	$ 1,873	$ 1,872	$ 1,872
Interest rate swap loss on 7.0% $250 million note due 2012	1,228	1,228	1,228
Interest rate swap gain on 9.19% $150 million note due 2005-2024	(462)	(462)	(462)
Total	$ 2,639	$ 2,638	$ 2,638

CITRUS CORP. AND SUBSIDIARIES

Total				$ (7,885)	$ (10,524)

(14) Commitments and Contingencies

From time to time, in the normal course of business, the Company is involved in litigation, claims or assessments that may result in future economic detriment. Where appropriate, Citrus has made accruals in accordance with *FASB Statement No. 5, Accounting for Contingencies,* in order to provide for such matters. Management believes the final disposition of these matters will not have a material adverse effect on the Company's' results of operations or financial position.

Florida Gas plans to seek FERC approval to construct an expansion to increase its natural gas capacity into Florida by approximately 800 MMcf/d. The Phase VIII Expansion includes construction of approximately 500 miles of additional large diameter pipeline and the installation of approximately 170,000 horsepower of additional compression. Pending FERC approval, which is expected in 2009, Florida Gas anticipates an in-service date of 2011, at an approximate cost of $2 billion. Florida Gas has signed a 25-year agreement with FPL for 400 MMcf/d of capacity.

On February 5, 2008, Citrus entered into a $500 million unsecured construction and term loan agreement (*Citrus Credit Agreement*) with a wholly owned subsidiary of FPL Group Capital Inc., which is a wholly-owned subsidiary of FPL Group, Inc. Citrus will contribute the proceeds of this loan to Florida Gas in order to finance a portion of the Phase VIII Expansion. The Citrus Credit Agreement provides for a single $500 million draw after Florida Gas' receipt of a certificate from the FERC authorizing construction of the Phase VIII Expansion and Citrus' satisfaction of customary conditions precedent. On or before the Phase VIII Expansion in-service date, the construction loan will convert to an amortizing 20-year term loan with a $300 million balloon payment at maturity. The loan requires semi-annual payments of principal beginning five years and six months after the conversion to a term loan. The Citrus Credit Agreement provides for interest on the outstanding principal amount at the rate of six-month LIBOR plus 535 basis points prior to conversion to a term loan and at the twenty-year treasury rate plus 535 basis points after conversion to a term loan. The loan is not guaranteed by Florida Gas and does not include a prepayment option. The Citrus Credit Agreement contains certain customary representations, warranties and covenants and requires the execution of a negative pledge agreement by Florida Gas.

The Florida Department of Transportation, Florida's Turnpike Enterprise (*FDOT/FTE*) has various turnpike widening projects that have or may, over time, impact one or more of Florida Gas' mainline pipelines co-located in FDOT/FTE rights-of-way. The first phase of the turnpike project includes replacement of approximately 11.3 miles of its existing 18- and 24-inch pipelines located in FDOT/FTE right-of-way in Florida. The estimated cost of such replacement is approximately $110 million, including AFUDC. Florida Gas is also in discussions with the FDOT/FTE related to additional projects that may affect Florida Gas' 18- and 24-inch pipelines within FDOT/FTE right-of-way. The total miles of pipe that may ultimately be affected by all of the FDOT/FTE widening projects, and any associated relocation and/or right-of-way costs, cannot be determined at this time.

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 1987 of 2431

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Under certain conditions, existing agreements between Florida Gas and the FDOT/FTE require the FDOT/FTE to provide any new right-of-way needed for relocation of the pipelines and for Florida Gas to pay for rearrangement or relocation costs. Under certain other conditions, Florida Gas may be entitled to reimbursement for the costs associated with relocation, including construction and right-of-way costs. On January 25, 2007, Florida Gas filed a complaint against FDOT/FTE in the Seventeenth Judicial Circuit, Broward County, Florida, to seek relief for three specific sets of FDOT widening projects in Broward County. The complaint seeks damages for breach of easement and relocation agreements for the one set of projects on which construction has already commenced, and injunctive relief as well as damages for the two other sets of projects upon which construction has yet to commence. On April 24, 2007 the FDOT/FTE filed a complaint against Florida Gas in the Ninth Judicial Circuit, Orange County, Florida, to seek a declaratory judgment that under the existing agreements Florida Gas is liable for the costs of relocation associated with such projects and is not entitled to certain other rights. On August 7, 2007 the Orange County Court granted a motion by Florida Gas to abate and stay the Orange County action. The FDOT/FTE filed an amended answer and counterclaim against Florida Gas on February 8, 2008 in the Broward County action. The counterclaim alleges Florida Gas is subject to estoppel and breach of contract regarding removal from service of the existing pipelines on the project currently under construction and seeks a declaratory judgment that Florida Gas is responsible for all relocation costs and is not entitled to workspace and uniform minimum area precluding FDOT/FTE activity. On February 14, 2008 the case was transferred to the Broward County Complex Business Civil Division 07. As a result, the March 10, 2008 hearing on the motion by Florida Gas for a temporary injunction enjoining the FDOT/FTE interference with the pipelines of Florida Gas will be rescheduled.

On October 24, 2007, Florida Gas filed a complaint in the US District Court of the Northern District of Florida, Tallahassee Division, against Stephanie C. Kopelousos (*Kopelousos*) in her official capacity as the Secretary of the Florida Department of Transportation, seeking to enjoin Kopelousos from violating federal law in connection with construction of the FDOT/FTE Golden Glades project, a new toll plaza in Miami-Dade County, Florida. Florida Gas seeks a declaratory judgment that certain Florida statutes are preempted by federal law to the extent such state statutes purport to regulate the abandonment or relocation schedule for the federally regulated pipelines of Florida Gas and prospective preliminary and permanent injunctive relief enjoining Kopelousos from proceeding with construction on the Golden Glades project over and around such pipelines. Kopelousos has filed a motion to dismiss the complaint and Florida Gas has responded. Based upon representations by the FDOT/FTE that the Golden Glades project has been moved to 2013, the parties entered into a joint stipulation of dismissal without prejudice on February 15, 2008.

Should Florida Gas be denied reimbursement by the FDOT/FTE for any possible relocation expenses, such costs are expected to be covered by operating cash flows and additional borrowings. Florida Gas expects to seek rate recovery at FERC for all reasonable and prudent costs incurred in relocating its pipelines to accommodate the FDOT/FTE to the extent not reimbursed by the FDOT/FTE. There can be no assurance that Florida Gas will be successful in obtaining complete reimbursement for any such relocation costs from the FDOT/FTE or from its customers or that the timing of reimbursement will fully compensate Florida Gas for its costs.

Florida Gas and Trading previously filed bankruptcy-related claims against Enron and other affiliated bankrupt companies totaling $220.6 million. Of these claims, Florida Gas and Trading filed claims totaling $68.1 and $152.5 million, respectively. Florida Gas and Enron agreed on the amount of the claim at $13.3 million, and Florida Gas assigned its claims to a third party and received $3.4 million in June 2005. Trading's claim was for rejection damages on two physical/financial swaps and a gas sales contract, as well as certain delinquent amounts owed pre-petition. In March 2005, Enron North America Corp. (ENA) filed objections to Trading's claim. In September 2006 the judge issued an order which rejected certain of Trading's arguments and ruled that a contract under which ENA had an in the money position against Trading could be offset against a related contract under which Trading had an in the money position against ENA. The result of the order was a reduction in the allowable amount of Trading's initial claim to $22.7 million. The parties reached a settlement on the amount of the allowed claim which was approved by the bankruptcy court in March 2007. Citrus fully reserved for the amounts in 2001 and sold the receivable claim in the second quarter of 2007 to a third party for a pre-tax gain on $11.4 million. The gain has been reported in *Other, net* in the accompanying Consolidated Statements of Income, which is consistent with the presentation of the original write-off recorded in 2001.

CITRUS CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

On March 7, 2003, Trading filed an action, requesting the court to declare that Duke Energy LNG Sales, Inc. (Duke) breached a natural gas trading contract by failing to provide sufficient volumes of gas to Trading. Duke sent Trading a notice of termination of the contract and answered and filed a counterclaim, arguing that Trading failed to timely increase the amount of a letter of credit that was required of Trading under the contract, and that Trading had breached a "resale restriction" on the gas. On June 2, 2003, Trading notified Duke that, because Duke had defaulted on the contract and failed to cure, Trading was terminating the contract effective as of June 5, 2003. On August 8, 2003, Trading sent its final "termination payment" invoice to Duke in the amount of $187 million, and recorded a receivable of $75 million (subsequently reduced by $6.5 million to $68.5 million, reflected in *Other Assets* at December 31, 2006, to provide for a related settlement, see below). After denying motions for summary judgment by both parties, the judge ordered the parties to attempt to narrow the scope of the issues to be tried. Pre-trial conferences were held in January 2007, a jury was selected and opening arguments were scheduled. Following the judge's rulings on certain matters, on January 29, 2007, Trading, Citrus, Southern Union and El Paso (collectively, Citrus Parties) entered into a settlement regarding litigation with Spectra Energy LNG Sales, Inc., formerly known as Duke Energy LNG Sales, Inc. (Duke), and its parent company Spectra Energy Corporation (collectively, Spectra), whereby Spectra agreed to pay $100 million to Trading, which was received on January 30, 2007. Citrus recorded a pre-tax gain of $24 million in the first quarter of 2007. This gain has been reported in *Other, net* in the accompanying Consolidated Statements of Income, which is consistent with the historical results of Trading's activities.

In June 2004 the Company recorded an accrual for a contingent obligation of up to $6.5 million to terminate a gas sales contract with a third party. The contingent obligation was extinguished with a payment to the third party on February 6, 2007 of $6.5 million from proceeds resulting from the settlement of the Duke litigation.

Jack Grynberg, an individual, filed actions for damages against a number of companies, including Florida Gas and Citrus, now transferred to the U.S. District Court for the District of Wyoming, alleging mismeasurement of gas volumes and Btu content, resulting in lower royalties to mineral interest owners. On October 20, 2006, the District Judge adopted in part the earlier recommendation of the Special Master in the case and ordered the dismissal of the case against the defendants. Grynberg is appealing that action to the Tenth Circuit Court of Appeals. Grynberg's opening brief was filed on July 31, 2007. Respondents filed their brief rebutting Grynberg's arguments on November 21, 2007. Florida Gas believes that its measurement practices conformed to the terms of its FERC gas tariffs, which were filed with and approved by FERC. As a result, Florida Gas believes that it has meritorious defenses to these lawsuits (including FERC-related affirmative defenses, such as the filed rate/tariff doctrine, the primary/exclusive jurisdiction of FERC, and the defense that Florida Gas complied with the terms of its tariffs) and will continue to vigorously defend against them, including any appeal from the dismissal of the Grynberg case. The Company does not believe the outcome of this case will have a material adverse effect on its financial position, results of operations or cash flows.

(1) TC PipeLines, LP uses derivatives to assist in managing its exposure to interest rate risk. Based on interest rates at September 30, 2008, the amount of losses related to cash flow hedges reported in accumulated other comprehensive income that will be reclassified to net income in the next 12 months is $3.8 million, which will be offset by a reduction to interest expense of a similar amount.

See accompanying notes to the consolidated financial statements.

TC PipeLines, LP
Notes to Consolidated Financial Statements

Note 1 Organization and Significant Accounting Policies
TC PipeLines, LP and its subsidiaries are collectively referred to herein as “TC PipeLines” or “the Partnership”. In this report, references to “we”, “us” or “our” refer to TC PipeLines or the Partnership.

The preparation of financial statements in conformity with United States of America (U.S.) generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although management believes these estimates are reasonable, actual results could differ from these estimates. In the opinion of management, these consolidated financial statements have been properly prepared within reasonable limits of materiality and include all adjustments (consisting of normal recurring accruals) necessary for a fair presentation of the financial results for the interim periods presented.

The results of operations for the three and nine months ended September 30, 2008 and 2007 are not necessarily indicative of the results that may be expected for a full fiscal year. The unaudited interim financial statements should be read in conjunction with the financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2007. Our significant accounting policies are consistent with those disclosed in Note 2 of the financial statements in our annual report on Form 10-K for the year ended December 31, 2007. Certain comparative figures have been reclassified to conform to the current period’s presentation.

Note 2 Investment in Great Lakes
On February 22, 2007, we acquired a 46.45 per cent partner interest in Great Lakes Gas Transmission Limited Partnership (Great Lakes). On the same day, a wholly-owned subsidiary of TransCanada Corporation (TransCanada) acquired 100 per cent ownership of the operator of Great Lakes. Great Lakes is regulated by the Federal Energy Regulatory Commission (FERC).

We use the equity method of accounting for our interest in Great Lakes. Great Lakes had no undistributed earnings for either the nine months ended September 30, 2008 or the period February 23, 2007 to September 30, 2007.

The following tables contain summarized financial information for Great Lakes:

Summarized Consolidated Great Lakes Income Statement *(unaudited)* *(millions of dollars)*	**Three months ended September 30,** **2008**	2007	**Nine months ended September 30,** **2008**	For the period February 23 to September 30, 2007

Note 3 Investment in Northern Border

We own a 50 per cent general partner interest in Northern Border Pipeline Company (Northern Border). Effective April 1, 2007, TransCanada Northern Border Inc. (TCNB), a wholly-owned subsidiary of TransCanada, became the operator of Northern Border. Northern Border is regulated by the FERC.

We use the equity method of accounting for our interest in Northern Border. Northern Border had no undistributed earnings for the nine months ended September 30, 2008 and 2007.

The following tables contain summarized financial information for Northern Border:

Note 4 Investment in Tuscarora

As of December 31, 2007, we acquired the remaining two per cent general partner interest in Tuscarora Gas Transmission Company (Tuscarora), thereby making it a wholly-owned subsidiary. Tuscarora is operated by TCNB and is regulated by the FERC.

We use the consolidation method of accounting for our ownership of Tuscarora.

The following tables contain summarized financial information for Tuscarora:

Summarized Tuscarora Income Statement *(unaudited)* *(millions of dollars)*	**Three months ended September 30,** **2008**	2007	**Nine months ended September 30,** **2008**	2007

Note 5 Credit Facility and Long-Term Debt

(unaudited) *(millions of dollars)*	**September 30, 2008**	December 31, 2007
Senior Credit Facility	**482.0**	507.0
7.13% Series A Senior Notes due 2010	**52.9**	54.5
7.99% Series B Senior Notes due 2010	**5.3**	5.5
6.89% Series C Senior Notes due 2012	**5.9**	6.4
	546.1	573.4

The Senior Credit Facility consists of a $475.0 million senior term loan and a $250.0 million senior revolving credit facility. At September 30, 2008, $7.0 million was outstanding under our senior revolving credit facility, leaving $243.0 million available for future borrowings. The interest rate on the Senior Credit Facility averaged 3.31 per cent for the three months ended September 30, 2008 (2007 – 5.97 per cent), while for the nine months ended September 30, 2008 the interest rate on the Senior Credit Facility averaged 3.93 per cent (2007 – 6.02 per cent). After hedging activity, the interest rate incurred on the Senior Credit Facility averaged 5.23 per cent for the three months ended September 30, 2008 (2007 – 5.70 per cent) and 5.18 per cent for the nine months ended September 30, 2008 (2007 – 5.52 per cent). Prior to hedging activities, the interest rate was 3.36 per cent at September 30, 2008 (December 31, 2007 – 5.62 per cent). At September 30, 2008, we were in compliance with our financial covenants.

Annual maturities are as follows: 2008 - $2.3 million; 2009 - $4.4 million; 2010 - $53.5 million; 2011 - $482.8 million; and, thereafter - $3.1 million.

Note 6 Net Income per Common Unit

Net income per common unit is computed by dividing net income, after deduction of the general partner's allocation, by the weighted average number of common units outstanding. The general partner's allocation is equal to an amount based upon the general partner's two per cent interest, plus an amount equal to incentive distributions. Incentive distributions are received by the general partner if quarterly cash distributions on the common units exceed levels specified in the partnership agreement. Net income per common unit was determined as follows:

(unaudited)	**Three months ended September 30,**		**Nine months ended September 30,**	
(millions of dollars except per unit)	**2008**	2007	**2008**	2007
Net income	**28.3**	24.6	**81.1**	62.3
Net income allocated to general partner				
General partner interest	**(0.6)**	(0.4)	**(1.6)**	(1.2)
Incentive distribution income allocation	**(2.6)**	(1.8)	**(7.0)**	(4.1)
	(3.2)	(2.2)	**(8.6)**	(5.3)
Net income allocable to common units	**25.1**	22.4	**72.5**	57.0
Weighted average common units outstanding *(millions)*	**34.9**	34.9	**34.9**	31.5
Net income per common unit	**$ 0.72**	$ 0.64	**$ 2.08**	$ 1.81

Note 7 Cash Distributions

For the three and nine months ended September 30, 2008, we distributed $0.705 and $2.07 per common unit (2007 – $0.655 and $1.905 per common unit). The distributions for the three and nine months ended September 30, 2008 included incentive distributions to the general partner of $2.6 million and $7.0 million (2007 - $1.8 million and $4.1 million).

Note 8 Related Party Transactions

The Partnership does not have any employees. The management and operating functions are provided by the general partner. The general partner does not receive a management fee in connection with its management of the Partnership. The Partnership reimburses the general partner for all costs of services provided, including the costs of employee, officer and director compensation and benefits, and all other expenses necessary or appropriate to the conduct of the business of, and allocable to, the Partnership. Such costs include (i) overhead costs (such as office space and equipment) and (ii) out-of-pocket expenses related to the provision of such services. The Partnership Agreement provides that the general partner will determine the costs that are allocable to the Partnership in any reasonable manner determined by the general partner in its sole discretion. Total costs charged to the Partnership by the general partner were $0.5 million and $1.6 million for the three and nine months ended September 30, 2008 (2007 - $0.5 million and $1.4 million).

TCNB became the operator of Northern Border effective April 1, 2007. The operator of Great Lakes became a wholly-owned subsidiary of TransCanada through TransCanada's acquisition of Great Lakes Gas Transmission Company on February 22, 2007. TCNB also became the operator of Tuscarora, as part of the December 19, 2006 acquisition of an additional 49 per cent general partner interest in Tuscarora. TransCanada and its affiliates provide capital and operating services to Great Lakes, Northern Border and Tuscarora (together, "our pipeline systems"). TransCanada and its affiliates incur costs on behalf of our pipeline systems, including, but not limited to, employee salary and benefit costs, property and liability insurance costs, and transition costs. Total costs charged to our pipeline systems during the three and nine months ended September 30, 2008 and 2007 by TransCanada and its affiliates and amounts owed to TransCanada and its affiliates at September 30, 2008 and December 31, 2007 are summarized in the following tables:

(unaudited)	**Three months ended September 30,**		**Nine months ended September 30,**	
(millions of dollars)	**2008**	2007	**2008**	2007 [(1)]
Costs charged by TransCanada and its affiliates:				
Great Lakes	**8.2**	5.2	**23.4**	22.2
Northern Border	**7.5**	7.4	**23.5**	14.9
Tuscarora	**0.9**	0.8	**2.9**	1.7
Impact on the Partnership's net income:				
Great Lakes	**3.6**	2.4	**10.1**	10.3
Northern Border	**3.2**	3.7	**9.6**	7.5
Tuscarora	**0.7**	0.8	**2.0**	1.7

[(1)] The amounts disclosed for Great Lakes are for the period February 23 to September 30, 2007. The amounts disclosed for Northern Border are for the period April 1 to September 30, 2007.

(unaudited) *(millions of dollars)*	**September 30, 2008**	December 31, 2007
Amount owed to TransCanada and its affiliates:		
Great Lakes	**8.1**	1.9
Northern Border	**5.1**	3.0
Tuscarora	**0.5**	3.5

Great Lakes earns transportation revenues from TransCanada and its affiliates under fixed price contracts with remaining terms ranging from one to ten years. Great Lakes earned $40.5 million of transportation revenues under these contracts for the three months ended September 30, 2008 (2007 - $32.4 million). This amount represents 61 per cent of total revenues earned by Great Lakes for the three months ended September 30, 2008 (2007 - 50 per cent). $18.8 million of this transportation revenue is included in our equity income from Great Lakes for the three months ended September 30, 2008 (2007 - $15.1 million).

Great Lakes earned $108.7 million of transportation revenues from TransCanada and its affiliates for the nine months ended September 30, 2008 (February 23, 2007 to September 30, 2007 - $81.5 million). This amount represents 51 per cent of total revenues earned by Great Lakes for the nine months ended September 30, 2008 (February 23, 2007 to September 30, 2007 - 50 per cent). $50.5 million of this transportation revenue is included in our equity income from Great Lakes for the nine months ended September 30, 2008 (February 23, 2007 to September 30, 2007 - $37.9 million). At September 30, 2008, $13.4 million is included in Great Lakes' receivables in regards to the transportation contracts with TransCanada and its affiliates (December 31, 2007 - $10.0 million).

In August 2008, Northern Border sold its wholly-owned subsidiary, Bison Pipeline LLC, to TransCanada for $20.0 million. In connection with this transaction, Northern Border recorded a gain on sale of $16.1 million, of which the Partnership's share is $8.1 million. The proposed 297-mile, 24-inch diameter Bison pipeline system would extend from natural gas gathering facilities located in the Powder River Basin in Wyoming to a point of interconnection with the Northern Border pipeline system in Morton County, North Dakota.

Northern Border's Des Plaines Project consists of the construction, ownership and operation of interconnect facilities, including a 1,600 horsepower compressor facility near Joliet, Illinois. In June 2008, in connection with the Des Plaines Project, Northern Border and ANR Pipeline Company (ANR), a wholly-owned subsidiary of TransCanada, have entered into an Interconnect Agreement, which provides that Northern Border will reimburse ANR for the cost of the interconnect facilities to be owned by ANR. In June, Northern Border paid ANR $0.5 million and it is estimated that additional costs to complete the interconnect will be $0.1 million. Northern Border will be responsible for the final costs to construct the interconnect and any difference between the final actual costs and the estimated amounts paid will be remitted by or refunded to Northern Border.

Note 9 Derivative Financial Instruments

The interest rate swaps and options are structured such that the cash flows match those of the Senior Credit Facility. The notional amount hedged was $475.0 million at September 30, 2008 (December 31, 2007 - $400.0 million). At September 30, 2008, the fair value of the interest rate swaps and options accounted for as hedges was negative $11.5 million (December 31, 2007 – negative $9.8 million). Effective January 1, 2008, we adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements* (SFAS 157). Under SFAS 157, these financial assets and liabilities that are recorded at fair value on a recurring basis are categorized into one of three categories based upon a fair value hierarchy. We have classified all of our derivative financial instruments as level II where the fair value is determined by using valuation techniques that refer to observable market data or estimated market prices. During the three and nine months ended September 30, 2008, we recorded interest expense of $2.4 million and $4.7 million, respectively, in regards to the interest rate swaps and options. We recorded interest income of $0.4 million and $0.8 million for the three and nine months ended September 30, 2007, respectively, in regards to the interest rate swaps and options.

Note 10 Changes in Working Capital

(unaudited) *(millions of dollars)*	**Nine months ended September 30,** **2008**	2007
Decrease/(increase) in accounts receivable and other	**0.5**	(2.4)

	(3.0)	0.5

Note 11 Accounting Pronouncements

In May 2008, the Financial Accounting Standards Board (FASB) issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (SFAS No. 162) which codifies the sources of accounting principles and the related framework to be utilized in preparing financial statements in conformity with GAAP. The requirements of this standard are not expected to have a material impact on our results of operations or financial position.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (SFAS No. 161) as an amendment to SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*.

SFAS No. 161 requires that objectives for using derivative instruments be disclosed in terms of underlying risk and accounting designation. SFAS No. 161 is effective for our fiscal year beginning January 1, 2009, and we are currently evaluating its applicability to our results of operations and financial position.

Note 12 Subsequent Events

On October 17, 2008, the Board of Directors of the general partner declared the Partnership's third quarter 2008 cash distribution in the amount of $0.705 per common unit, payable on November 14, 2008, to unitholders of record on October 31, 2008. The cash distribution represents an annual cash distribution of $2.82 per common unit.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discusses the results of operations and liquidity and capital resources of TC PipeLines, LP, along with those of Great Lakes Gas Transmission Limited Partnership (Great Lakes), Northern Border Pipeline Company (Northern Border) and Tuscarora Gas Transmission Company (Tuscarora), (together "our pipeline systems"), as a result of the Partnership's ownership interests.

FORWARD-LOOKING STATEMENTS

The statements in this report that are not historical information, including statements concerning plans and objectives of management for future operations, economic performance or related assumptions, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act. Forward-looking statements may include words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "forecast" and other words and terms of similar meaning. The absence of these words, however, does not mean that the statements are not forward-looking.

These statements reflect our current views with respect to future events, based on what we believe are reasonable assumptions. Certain factors that could cause actual results to differ materially from those contemplated in the forward-looking statements include:

- the ability of Great Lakes and Northern Border to continue to make distributions at their current levels;
- the impact of unsold capacity on Great Lakes and Northern Border being greater or less than expected;
- competitive conditions in our industry and the ability of our pipeline systems to market pipeline capacity on favorable terms, which is affected by:
    - future demand for and prices of natural gas;
    - competitive conditions in the overall natural gas and electricity markets;
    - availability of supplies of Canadian and United States (U.S.) natural gas;
    - the oversupply of natural gas in the Mid-continent market;
    - availability of additional storage capacity and current storage levels;
    - weather conditions;
    - competitive developments by Canadian and U.S. natural gas transmission companies, including the construction of the Eastern segment of the Rockies Express Pipeline (REX East) to Clarington, Ohio; and
    - development of newly discovered natural gas plays such as the Horn River and Montney shale gas plays in Western Canada, the Louisiana Haynesville shale gas play, and the Marcellus shale gas play in West Virginia, Pennsylvania, and New York.
- the Alberta (Canada) government's decision to implement a new royalty regime effective January 2009 may affect the amount of exploration and drilling in the Western Canada Sedimentary Basin (WCSB);
- the decision by TransCanada to advance the Pathfinder Pipeline Project or the Bison Pipeline Project and the regulatory, financing and construction risks related to construction of interstate natural gas pipelines;
- the successful completion, timing, cost, scope and future financial performance of our pipeline systems' expansion projects could differ materially from our expectations due to availability of contractors or equipment, weather, difficulties or delays in obtaining regulatory approvals or denied applications, land owner opposition, the lack of adequate materials, labor difficulties or shortages, expansion costs that are higher than anticipated and numerous other factors beyond our control;
- performance of contractual obligations by customers of our pipeline systems;
- the imposition of state income taxes on partnerships;
- operating hazards, natural disasters, weather-related delays, casualty losses and other matters beyond our control;
- the impact of current and future laws, rulings and governmental regulations, particularly Federal Energy Regulatory Commission (FERC) regulations, on us and our pipeline systems;
- our ability to control operating costs; and
- prevailing economic conditions, including the current uncertainty in the global economic markets, that impact the capital and equity markets and our ability to access these markets.

Other factors described elsewhere in this document, or factors that are unknown or unpredictable, could also have material adverse effects on future results. Please also read Item 1A. “Risk Factors” in our annual report on Form 10-K for the year ended December 31, 2007 and Item 1A. “Risk Factors” of this report. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these factors. The forward-looking statements and information is made only as of the date of the filing of this report, and except as required by applicable law, we undertake no obligation to update these forward-looking statements and information to reflect new information, subsequent events or otherwise.

The following discussion and analysis should be read in conjunction with our 2007 Annual Report on Form 10-K and the unaudited financial statements and notes thereto included in Item 1. “Financial Statements” of this Quarterly Report on Form 10-Q. All amounts are stated in U.S. dollars.

PARTNERSHIP OVERVIEW

TC PipeLines, LP was formed in 1998 as a Delaware limited partnership by TransCanada PipeLines Limited, a wholly-owned subsidiary of TransCanada Corporation (collectively referred to herein as TransCanada), to acquire, own and participate in the management of energy infrastructure assets in North America. Our strategic focus is on delivering stable, sustainable cash distributions to our unitholders and finding opportunities to increase cash distributions while maintaining a low risk profile.

TC PipeLines, LP and its subsidiaries are collectively referred to herein as “TC PipeLines” or “the Partnership.” In this report, references to “we”, “us” or “our” collectively refer to TC PipeLines or the Partnership. The general partner of the Partnership is TC PipeLines GP, Inc., a wholly-owned subsidiary of TransCanada.

We own a 46.45 per cent partner interest in Great Lakes, which we acquired on February 22, 2007 from El Paso Corporation. The other 53.55 per cent general partner interest in Great Lakes is held by TransCanada.

We own a 50 per cent general partner interest in Northern Border, while the other 50 per cent interest is held by ONEOK Partners, L.P., a publicly traded limited partnership that is controlled by ONEOK, Inc.

As of December 31, 2007, we acquired the remaining two per cent general partner interest in Tuscarora, thereby making it a wholly-owned subsidiary.

Our partner interests in Great Lakes, Northern Border and Tuscarora represent our only material assets at September 30, 2008. As a result, we are dependent upon our pipeline systems for all of our available cash. Our pipeline systems derive their operating revenue from transportation of natural gas.

Great Lakes Overview

Great Lakes is a Delaware limited partnership formed in 1990. Great Lakes was originally constructed as an operational loop of the TransCanada Mainline Northern Ontario system. Great Lakes receives natural gas from TransCanada at the Canadian border near Emerson, Manitoba and extends across Minnesota, Northern Wisconsin and Michigan, and redelivers gas to TransCanada at the Canadian border at Sault Ste. Marie, Michigan and St. Clair, Michigan.

Northern Border Overview

Northern Border is a Texas general partnership formed in 1978. Northern Border transports natural gas from the Canadian border near Port of Morgan, Montana to a terminus near North Hayden, Indiana. Additionally, Northern Border transports natural gas produced in the Williston Basin of Montana and North Dakota and the Powder River Basin of Wyoming and Montana and synthetic gas produced at the Dakota Gasification plant in North Dakota.

Tuscarora Overview

Tuscarora is a Nevada general partnership formed in 1993. Tuscarora originates at an interconnection point with existing facilities of Gas Transmission Northwest Corporation, a wholly-owned subsidiary of TransCanada, near Malin, Oregon and runs southeast through Northeastern California and Northwestern Nevada. Tuscarora’s pipeline system terminates near Wadsworth, Nevada. Along its route, deliveries are made in Oregon, Northern California and Northwestern Nevada.

FACTORS THAT IMPACT THE BUSINESS OF OUR PIPELINE SYSTEMS

Key factors that impact the business of our pipeline systems are the supply of and demand for natural gas in the markets in which our pipeline systems operate; the customers of our pipeline systems and the mix of services they require; competition; and government regulation of natural gas pipelines.

Supply and Demand of Natural Gas

Our pipeline systems depend upon the WCSB for the majority of the natural gas that they transport. Overall flows out of the WCSB were lower for the nine months ended September 30, 2008 as compared to the same period last year, due mainly to a decrease in production, and an increase in Canadian demand. WCSB exports are expected to be lower for the remainder of the year. Factors which may mitigate declines related to WCSB production in the future include strengthening gas prices, decreases in oil prices as they affect demand from Alberta oil sands operations, continued clarification of the Alberta Royalty Regime to take effect January 1, 2009 as it affects natural gas production, and announcements regarding potential natural gas supply discoveries in the Horn River and Montney shale gas plays in Western Canada. Reduced supplies available for Canadian export affects all U.S. pipelines that import natural gas from Canada, but the impact on our pipeline systems will depend upon competitive factors and prevailing market conditions in each of the markets that our pipeline systems serve. Flows on Great Lakes' pipeline system in the third quarter of 2008 were consistent with flows in the third quarter of 2007 due to annual contracts and reduced storage inventories which resulted in strong demand for transportation to Michigan and Ontario storage locations. As expected, flows on Northern Border's pipeline system in the third quarter of 2008 were lower than the third quarter of 2007.

The Rockies Express Pipeline is a proposed 1,679-mile natural gas pipeline system from Rio Blanco County, Colorado, to Monroe County, Ohio. The Western segment of the Rockies Express Pipeline (REX West) from Weld County, Colorado to Audrain County, Missouri went into full service in May 2008. REX West has had a minimal impact on Great Lakes; however, it has caused excess natural gas supply from the Rockies Basin to flow into the Mid-Continent market, which is the market served by Northern Border. Consequently, there is less demand for WCSB supply in the Mid-Continent market which has had a negative impact on Northern Border's flows and sales of available capacity in the second and third quarters of 2008. It is anticipated that increased winter demand will dampen the impact of REX West deliveries into the Mid-Continent that has increased supply in Northern Border's market region.

REX East is planned to extend from Audrain County, Missouri to Clarington, located in Monroe County, Ohio. Once in-service, REX East should improve the competitive position of Canadian supply with gas sourced from other supply basins, including the Rockies Basin, into the Mid-Continent, which may potentially mitigate some of the excess supply in the Mid-Continent market. REX East will compete with Great Lakes in some markets, but will also potentially create demand for Great Lakes' transportation of natural gas from REX East seeking access to and from storage locations in Michigan. It is now anticipated that the partial in-service and full in-service of REX East will occur in the second and fourth quarters of 2009, respectively. Although there can be no assurance on the timing or impact of REX East, we believe that any positive impact on the market Northern Border serves will not occur until 2010.

There are many proposed natural gas pipeline projects that, if built, would impact the markets served by our pipeline systems. Two proposed projects, the Pathfinder Pipeline Project (Pathfinder Project) and the Bison Pipeline Project (Bison Project), if built, would diversify Northern Border's natural gas supply sources and provide another transportation source for shippers to export natural gas supply from the Rockies Basin. Please see the Recent Developments disclosure in this section for information on the Bison Project and the Pathfinder Project.

Reduced storage inventories in Eastern Canada and the U.S. supported demand for Great Lakes' transportation, as customers utilized Great Lakes' transportation to access and fill storage locations adjacent to its pipeline in the last quarter.

Great Lakes' future transportation values have continued to increase throughout this year, partially due to the increase in TransCanada Mainline tolls, and partially because of strong spread values between Alberta and Dawn, Ontario. As a result, Great Lakes sold new and renewed long and short haul contracts at maximum tariff rates for the next two years. However, now that Michigan and Ontario storage fill is approaching capacity, as expected for this time of year, daily and short term transportation values are decreasing.

Discoveries of new gas fields, such as the Horn River Basin and Montney gas plays in Western Canada may increase the amount of Canadian natural gas available for export. Recently, TransCanada gauged interest for new natural gas transportation service connecting the Horn River and Montney areas to its Alberta System. TransCanada received requests for gas transmission service exceeding one billion cubic feet per day (Bcf/d) for each area by 2012. Following this, TransCanada launched two binding open seasons seeking requests for firm transportation service from customers for the Groundbirch Project (a pipeline project designed to connect the Montney area of North East British Columbia to TransCanada's Alberta System) and the Horn River Project (a pipeline project designed to connect the Horn River area of North East British Columbia to TransCanada's Alberta system). The Groundbirch Project has an estimated in-service date of late 2010, while the Horn River Project has an estimate in-service date of early 2011. These gas plays, as well as the development of the Louisiana Haynesville shale gas play and the discovery of the Marcellus shale gas play in West Virginia, Pennsylvania, and New York in the U.S. will affect competitive factors and market conditions in the natural gas industry.

Contracting

Great Lakes – Great Lakes' average contracted capacity for the quarter ended September 30, 2008 was 98 per cent of its design capacity (2007 – 98 per cent). For the nine months ended September 30, 2008, Great Lakes' average contracted capacity was 104 per cent of its design capacity (period of March 1, 2007 to September 30, 2007 - 100 per cent). At September 30, 2008, 103 per cent of capacity was contracted on a firm basis for the remainder of the year and the weighted average remaining life of firm transportation contracts was 2.1 years.

In the third quarter of 2008, Great Lakes sold all of its available long haul capacity beginning November 1, 2008 for one year at maximum rates, sold available annual short haul capacity in Michigan at maximum rates for one to two year terms, and sold its available winter seasonal long haul capacity at maximum rates.

Northern Border – Northern Border's average contracted capacity for the quarter ended September 30, 2008 was 79 per cent of its design capacity (2007 - 102 per cent). For the nine months ended September 30, 2008, Northern Border's average contracted capacity was 86 per cent of its design capacity (2007 - 96 per cent). At September 30, 2008, approximately 78 per cent of Northern Border's design capacity was contracted on a firm basis for the remainder of the year and the weighted average remaining contract life of firm transportation contracts was 2.0 years.

At January 1, 2009, Northern Border's total amount of available transportation capacity is expected to be approximately 800 million cubic feet per day (MMcf/d). Northern Border's capacity to Chicago remains attractive and continues to be fully contracted and legacy contracts set to expire in the near term have been renewed. Additionally, related to a proposed expansion project, Northern Border renewed approximately 350 MMcf/d at maximum and discounted rates, for terms ranging from five to twelve years for various transportation paths to Chicago. See additional information below in Recent Developments – Chicago IV Project for more information.

Prevailing market conditions and increasing competitive factors in North America, including REX West, have caused Northern Border to experience a reduction in its revenues due to lower capacity sales and greater discounting of its rates. These factors, as well as expirations of certain long term contracts, will continue to impact Northern Border's ability to market its available capacity into 2009. Northern Border expects to continue to discount transportation capacity as needed to optimize revenue.

Northern Border has executed long-term contracts of approximately 400 MMcf/d sold at a discounted rate from Port of Morgan, Montana to Ventura, Iowa contingent upon either the Bison Project or Pathfinder Project going forward. These contracts would be effective at the successful project's in-service date projected for late 2010.

Tuscarora - Tuscarora's average contracted capacity for the quarter ended September 30, 2008 was 98 per cent of its design capacity (2007 – 95 per cent). For the nine months ended September 30, 2008, Tuscarora's average contracted capacity was 98 per cent of its design capacity (2007 – 96 per cent). At September 30, 2008, approximately 99 per cent of Tuscarora's design capacity was contracted on a firm basis for the remainder of the year and the weighted average remaining contract life of firm transportation contracts was 12.0 years.

RECENT DEVELOPMENTS

Northern Border

Bison Project – On September 3, 2008, Northern Border announced the sale of its wholly-owned subsidiary, Bison Pipeline LLC, to TransCanada Pipeline USA Ltd., a wholly-owned subsidiary of TransCanada for $20.0 million. Distributions paid by Northern Border to its partners in the third quarter included a special distribution in the amount of $16.4 million, of which the Partnership's share was $8.2 million. As a part of the transaction, TransCanada has assumed the obligations of Northern Border related to the Bison Project, and is continuing to solicit commercial support for the Bison Project.

The assets and obligations of Bison Pipeline LLC included executed precedent agreements subject to certain shipper contingencies, as well as regulatory, environmental and engineering activities completed to date on the Bison Project. Shippers on the Bison Project have executed contracts for capacity on the Northern Border system from Port of Morgan, Montana, to Ventura, Iowa, subject to the in-service date of the Bison Project. Project subscription that is subject to the upstream capacity condition is approximately 400 MMcf/d.

The proposed 297-mile, 24-inch diameter Bison pipeline system would extend from natural gas gathering facilities located in the Powder River Basin in Wyoming to a point of interconnection with the Northern Border pipeline system in Morton County, North Dakota. The initial capacity of the Bison Project is anticipated to be approximately 400 MMcf/d. The projected in-service date is late 2010.

The proposed Pathfinder Project is an approximately 673-mile, 36-inch diameter interstate pipeline that would transport natural gas northeast from Meeker, Colorado, through Montana to the Northern Border pipeline system in North Dakota for delivery into the Ventura and Chicago-area markets. The capacity is between 1.2 to 1.6 Bcf/d. In September 2008, Enterprise Product Partners L.P. terminated their previously-announced commitment to become a 50 per cent partner in Pathfinder with a 500 MMcf/d shipping commitment. TransCanada is continuing to work with prospective Pathfinder shippers to advance this project.

The success of either the Bison or Pathfinder Projects is dependent upon many factors, and there is no certainty that either of these projects will be constructed. For further information regarding the risks related to the construction projects, please refer to the Risk Factors sections in our 2007 Annual Report on Form 10-K and in this report.

Proposed Expansion Project (Chicago IV) – Northern Border conducted a binding open season seeking interest in an expansion project from Harper, Iowa to Manhattan, Illinois and received binding shipper commitments. The proposed expansion capacity was subject to a one-time adjustment right to reduce the Chicago IV commitments resulting from the right of first refusal (ROFR) process in current shipper contracts. During a ROFR process, its bidders are able to obtain existing capacity with similar terms. If the Chicago IV bidders reduce their commitments, it could eliminate the need for an expansion project. Northern Border renewed approximately 350 MMcf/d at maximum and discount rates, for terms ranging from 5 to 12 years for various transportation paths to Chicago.

Des Plaines Project – In February 2008, Northern Border filed with the FERC to construct, own and operate interconnect facilities, including a 1,600 horsepower compressor facility near Joliet, Illinois. It is estimated that the Des Plaines Project will cost approximately $18 million and will be financed by a combination of debt and equity. In June 2008, the FERC issued its environmental assessment report for the Des Plaines Project and no comments were filed during the comment period. A certificate order by FERC authorizing construction of the Des Plaines Project was received on July 25, 2008. Northern Border commenced construction on the Des Plaines Project on September 8, 2008, and it is now expected the facilities will be placed into service by early 2009.

Tuscarora

Compressor Station Expansion Project – Tuscarora's compressor station expansion project to support Sierra Pacific Power Company's Tracy Combined Cycle Power Plant went into service on April 1, 2008, with a final cost within the original cost estimate. The new contract for 40,000 Dth/d for a term of 22-1/2 years will generate approximately $5.8 million of annual revenue.

REGULATORY DEVELOPMENTS

Composition of Proxy Groups for Rates of Return Determinations – On July 19, 2007, the FERC issued a policy statement proposing to update its standards regarding the composition of proxy groups for determining the appropriate returns on equity (ROE) for natural gas and oil pipelines, which is used by pipelines to establish rates for services. On April 17, 2008, the FERC issued a policy statement (2008 Policy Statement) that allows master limited partnerships (MLPs) to be included in a proxy group used to determine a pipeline's ROE. The 2008 Policy Statement is effective immediately and provides that there should be no cap on the level of distributions included in the current Discounted Cash Flow (DCF) methodology for MLPs, but there should be an adjustment to the long-term growth rate used to calculate DCF for an MLP (halving the long-term GDP factor which has a one-third weighting in the total growth rate computation in the DCF methodology).

The impact of applying this new policy to our pipeline systems will not be known until one of our pipeline systems files a rate case.

Promotion of a More Efficient Capacity Release Market Docket No. RM08-1 – On June 19, 2008, the FERC issued a Final Rule to modify capacity release regulations (Capacity Release Final Rule). The Capacity Release Final Rule, in addition to other items, allows market-based pricing for short-term capacity releases by shippers through a permanent lifting of the maximum rate cap on short-term capacity releases (of one year or less terms). The Capacity Release Final Rule was effective July 30, 2008.

While implementation of the Capacity Release Final Rule is not expected to have a significant impact on our pipeline systems, the Interstate Natural Gas Association of America (INGAA), of which our pipeline systems are members, filed on July 21, 2008 a request for rehearing of the Capacity Release Final Rule, contending that as the FERC removed the rate cap for short-term released capacity, it should also remove the rate cap for short-term pipeline capacity. INGAA notes that short-term released capacity and short-term pipeline capacity compete in the same market, and argues that removing the rate cap for short-term released capacity and maintaining the cap for short-term pipeline capacity results in a bifurcated and distorted short-term capacity market. On August 15, 2008, the FERC agreed to further consider the issues raised in the rehearing request. A FERC Order is pending on this matter.

Homeland Security – The Department of Homeland Security Appropriations Act of 2007 required the Transportation Security Administration (TSA) to issue regulations establishing risk-based performance standards for the security of chemical and industrial facilities, including oil and gas facilities that were deemed to present high levels of security risk. The TSA will conduct a critical facility identification process, which will include our pipeline systems, anticipated in 2009 or 2010. The TSA has also released a draft of the Pipeline Security Guidelines, which is likely to become regulation in 2009 or 2010. These guidelines distinguish between baseline security requirements for all pipeline facilities and enhanced measures for identified critical facilities. Based on the draft guidelines it is not anticipated that if our pipeline systems are deemed to be critical facilities that there would be a significant additional costs related to compliance.

RESULTS OF OPERATIONS OF TC PIPELINES

Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with Generally Accepted Accounting Principles (GAAP) requires us to make estimates and assumptions with respect to values or conditions which cannot be known with certainty, that affect the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Such estimates and assumptions also affect the reported amounts of revenue and expenses during the reporting period. Although we believe these estimates and assumptions are reasonable, actual results could differ. There were no significant changes to our critical accounting policies and estimates during the nine months ended September 30, 2008.

Information about our critical accounting estimates is included under Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in our Annual Report on Form 10-K for the year ended December 31, 2007.

Recent Accounting Pronouncements

In May 2008, the Financial Accounting Standards Board (FASB) issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (SFAS No. 162) which codifies the sources of accounting principles and the related framework to be utilized in preparing financial statements in conformity with GAAP. The requirements of this standard are not expected to have a material impact on our results of operations or financial position.

In March 2008, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (SFAS No. 161) as an amendment to SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*. SFAS No. 161 requires that objectives for using derivative instruments be disclosed in terms of underlying risk and accounting designation. SFAS No. 161 is effective for our fiscal year beginning January 1, 2009, and we are currently evaluating its applicability to our results of operations and financial position.

Net Income

To supplement our financial statements, we have presented a comparison of the earnings contribution components from each of our investments. We have presented net income in this format in order to enhance investors' understanding of the way management analyzes our financial performance. We believe this summary provides a more meaningful comparison of our net income to prior periods, as we account for our partially owned pipeline systems using the equity method. The presentation of this additional information is not meant to be considered in isolation or as a substitute for results prepared in accordance with GAAP.

The shaded areas in the tables below disclose the results from Great Lakes and Northern Border, representing 100 per cent of each entity's operations for the given period.

(1) The Partnership owns a 100 per cent general partner interest in Tuscarora Gas Transmission Company (Tuscarora or TGTC) following the acquisition of an additional two per cent interest on December 31, 2007.

(2) The Partnership acquired a 46.45 per cent partner interest in Great Lakes Gas Transmission Limited Partnership (Great Lakes or GLGT) on February 22, 2007.

(3) The Partnership owns a 50 per cent general partner interest in Northern Border Pipeline Company (Northern Border or NBPC). Equity income from Northern Border includes amortization of a $10.0 million transaction fee paid to the operator of Northern Border at the time of the additional 20 per cent acquisition in April 2006.

Third Quarter 2008 compared with Third Quarter 2007

Net income increased $3.7 million, or 15 per cent, to $28.3 million in the third quarter of 2008, compared to $24.6 million in the third quarter of 2007. This increase was primarily due to higher equity income from Northern Border, increased Tuscarora transmission revenues and lower financial charges, net and other, partially offset by decreased equity income from Great Lakes.

Equity income from Great Lakes was $12.0 million in the third quarter of 2008, a decrease of $2.2 million or 15 per cent, compared to $14.2 million for the same period last year. The decrease in equity income was primarily due to increased operating expenses and Michigan business tax (a partnership level tax that was instituted in 2008), partially offset by increased transmission revenues. At Great Lakes' level, operating expenses increased $4.5 million for the three months ended September 30, 2008 compared to the same period last year primarily due to higher taxes other than income, costs related to system integration expenditures and increased pipeline maintenance costs. Michigan business tax of $1.2 million was recorded for the three months ended September 30, 2008. Great Lakes' transmission revenues increased $1.1 million for the three months ended September 30, 2008 compared to the same period last year due primarily to higher short-term revenues from increased sales of daily transport capacity.

Equity income from Northern Border was $19.9 million in the third quarter of 2008, an increase of $3.7 million or 23 per cent, compared to $16.2 million in the same period last year. This is primarily due to a $16.1 million gain on sale of Bison Pipeline LLC and decreased operating expenses, partially offset by lower transmission revenues. At Northern Border's level, operating expenses decreased $2.3 million for the three months ended September 30, 2008 compared to the same period last year primarily due to decreased maintenance costs, decreased electric compressor charges related to lower capacity utilization and decreased taxes other than income. Northern Border's transmission revenues decreased $11.9 million, or 15 per cent, for the three months ended September 30, 2008 compared to the same period last year due primarily to a decrease in system utilization mainly related to natural gas supply from the Rockies Basin into the Mid-Continent market from the in-service of REX West.

Tuscarora's net income was $3.9 million in the third quarter of 2008, an increase of $1.0 million or 34 per cent, compared to $2.9 million in the same period last year. The increase in net income is primarily due to increased transmission revenues resulting from a new firm transportation service contract which supported the Likely compressor station expansion project that went into service on April 1, 2008.

Financial charges, net and other were $7.7 million in the third quarter of 2008, a decrease of $1.0 million or 11 per cent, compared to $8.7 million in the same period last year. This decrease relates primarily to lower interest rates and lower average debt outstanding, partially offset by losses on interest rate derivatives over the same period in 2007.

Nine Months Ended September 30, 2008 compared with Nine Months Ended September 30, 2007

Net income increased $18.8 million, or 30 per cent, to $81.1 million for the nine months ended September 30, 2008, compared to $62.3 million in the same period of 2007. The increase in net income was primarily due to increased equity income from Great Lakes and Northern Border, higher Tuscarora transmission revenues and lower financial charges, net and other.

Equity income from Great Lakes was $44.4 million for the nine months ended September 30, 2008, an increase of $10.1 million or 29 per cent, compared to $34.3 million for the period February 23 to September 30, 2007. The increase in equity income was primarily due to a full first quarter of income contribution in 2008 as compared to 37 days in the first quarter of 2007. In addition, Great Lakes' transmission revenues increased primarily due to increased sales of short term transport capacity, partially offset by costs related to system integration expenditures and increased pipe integrity costs. In the nine months ended September 30, 2008, Great Lakes recorded Michigan business tax of $4.2 million, which is a new partnership level tax that was instituted in 2008.

Equity income from Northern Border was $48.1 million for the nine months ended September 30, 2008, an increase of $3.8 million or 9 per cent, compared to $44.3 million in the same period of 2007. The increase in equity income is primarily due to a $16.1 million gain on sale of Bison Pipeline LLC, and decreased operating expenses, partially offset by lower transmission revenues. At Northern Border's level, operating expenses decreased by $4.2 million in the nine months ended September 30, 2008 compared to the same period last year. This decrease in operating expenses is primarily due to decreased taxes other than income and a $2.3 million transition related charge in 2007 related to the reimbursement for shared equipment and furnishings, partially offset by increased general and administrative expenses and electric compressor charges. Northern Border's transmission revenues decreased by $15.2 million in the nine months ended September 30, 2008 compared to the same period in 2007. This decrease was primarily due to a decrease in contracted capacity mainly related to natural gas supply from the Rockies Basin into the Mid-Continent market from the in-service of REX West.

Tuscarora's net income was $11.4 million for the nine months ended September 30, 2008, an increase of $2.9 million or 34 per cent, compared to $8.5 million in the same period of 2007. The increase in net income is primarily due to increased Tuscarora transmission revenues resulting from a new firm transportation service contract which supported the Likely compressor station expansion that went into service on April 1, 2008.

Financial charges, net and other were $22.8 million for the nine months ended September 30, 2008, a decrease of $2.7 million, or 11 per cent, compared to $25.5 million for the same period of 2007. This decrease relates primarily to lower interest rates and lower average debt outstanding, partially offset by losses on interest rate derivatives over the same period in 2007.

Partnership Cash Flows

The Partnership uses the non-GAAP financial measures 'Partnership cash flows' and 'Partnership cash flows allocated to common units' as financial performance measures. As the Partnership's financial performance underpins the availability of cash flows to fund the cash distributions that the Partnership pays to its unitholders, the Partnership believes these are key measures of the available cash flows to its unitholders. The following Partnership cash flows information is presented to enhance investors' understanding of the way that management analyzes the Partnership's financial performance. Partnership cash flows and Partnership cash flows allocated to common units are provided as a supplement to financial results and are not meant to be considered in isolation or as substitutes for financial results prepared in accordance with GAAP.

(1) Partnership cash flows allocated to general partner represents the cash distributions paid to the general partner with respect to its two per cent interest plus an amount equal to incentive distributions.

(2) Cash distributions declared per common unit and cash distributions paid per common unit are computed by dividing cash distributions, after the deduction of the general partner's allocation, by the number of common units outstanding. The general partner's allocation is computed based upon the general partner's two per cent interest plus an amount equal to incentive distributions.

Third Quarter 2008 compared with Third Quarter 2007

Partnership cash flows increased $13.5 million, or 48 per cent, to $41.6 million for the third quarter of 2008, compared to $28.1 million for the same period last year. This increase was primarily due to higher cash distributions received from Great Lakes and Northern Border, increased cash flows provided by Tuscarora’s operating activities and lower costs at the Partnership level. Cash distributions from Great Lakes and Northern Border increased by $9.7 million in total for the three months ended September 30, 2008 compared with the same period last year. This increase in cash distributions was primarily due to the special distribution of $8.2 million received from Northern Border in relation to the gain on sale of Bison Pipeline LLC. Cash flows provided by Tuscarora’s operating activities increased by $2.6 million for the quarter ended September 30, 2008 compared with the same period last year primarily due to higher transmission revenues resulting from the Likely compressor station expansion project that went into service on April 1, 2008. Costs at the Partnership level decreased by $1.2 million for the quarter ended September 30, 2008 compared with the same period last year primarily due to lower interest rates and lower average debt outstanding, partially offset by losses on interest rate derivatives over the same period in 2007.

During the three months ended September 30, 2008, Tuscarora made capital expenditures of $1.0 million related to the compressor station expansion project in Likely, California compared to $0.9 million for the same period last year. In the third quarter of 2007, a net $1.8 million was received related to the Great Lakes acquisition closing adjustments.

The Partnership paid distributions of $27.8 million in the third quarter of 2008, an increase of $2.7 million, or 11 per cent, compared to $25.1 million for the same period in the prior year due to increases in quarterly per common unit distribution amounts. We repaid a net $3.0 million of the outstanding balance on our debt during the third quarter of 2008 compared to a net issuance of debt of $1.0 million during the same period last year.

Nine Months Ended September 30, 2008 compared with Nine Months Ended September 30, 2007

Partnership cash flows increased $29.3 million, or 32 per cent, to $121.5 million for the nine months ended September 30, 2008, compared to $92.2 million for the same period last year. This increase was primarily a result of increased cash distributions from Great Lakes and Northern Border, increased cash flows provided by Tuscarora's operating activities and decreased costs at the Partnership level.

Cash distributions from Great Lakes were $55.0 million for the nine months ended September 30, 2008, an increase of $14.0 million compared to $41.0 million for the same period last year. The increase in cash distributions from Great Lakes is due primarily to a full nine months of ownership in 2008 compared to the period of February 23 to September 30 for 2007. Cash distributions from Northern Border increased $9.5 million for the nine months ended September 30, 2008 compared to the same period in the prior year due primarily to the special distribution of $8.2 million received from Northern Border in relation to the gain on sale of Bison Pipeline LLC. Cash flows provided by Tuscarora's operating activities increased $3.8 million for the nine months ended September 30, 2008 compared to the same period in the prior year primarily due to the financial results from the Likely compressor station expansion project that went into service on April 1, 2008. Costs at the Partnership level decreased by $2.0 million for the nine months ended September 30, 2008 compared with the same period last year primarily due to lower average debt outstanding and lower interest rates, partially offset by losses on interest rate derivatives and increased general and administrative costs.

During the nine months ended September 30, 2008, Tuscarora made capital expenditures of $6.4 million related to the compressor station expansion project in Likely, California compared to $4.4 million for the same period last year. In February 2007, the Partnership acquired a 46.45 per cent interest in Great Lakes from El Paso Corporation for $733.0 million in cash. In April 2007, the Partnership made a contribution of $7.5 million to Northern Border, representing the Partnership's 50 per cent share of a $15.0 million cash call issued by Northern Border.

The Partnership paid distributions of $80.8 million for the nine months ended September 30, 2008, an increase of $19.5 million, or 32 per cent, compared to $61.3 million for the same period in the prior year due to the increase in the number of common units outstanding, in addition to increases in quarterly per common unit distribution amounts. We repaid a net $27.3 million of the outstanding balance on our debt during the nine months ended September 30, 2008. In 2007, net equity issuances provided $607.0 million, including the general partner's contribution to maintain its two per cent interest, to acquire Great Lakes. The Partnership funded the balance of the acquisition cost with a draw on its senior credit facility.

LIQUIDITY AND CAPITAL RESOURCES OF TC PIPELINES

Overview

Our principal sources of liquidity include distributions received from our investments in Great Lakes and Northern Border, operating cash flows from Tuscarora and our bank credit facility. The Partnership funds its operating expenses, debt service and cash distributions primarily with operating cash flow. Long-term capital needs may be met through the issuance of long-term debt and/or equity.

The Partnership's Debt and Credit Facility

The following table summarizes our debt and credit facility outstanding as of September 30, 2008:

	Payments Due by Period		
(unaudited) *(millions of dollars)*	Total	Less Than 1 Year	Long-term Portion
Senior Credit Facility	482.0	-	482.0
7.13% Series A Senior Notes due 2010	52.9	3.2	49.7
7.99% Series B Senior Notes due 2010	5.3	0.5	4.8
6.89% Series C Senior Notes due 2012	5.9	0.8	5.1
Total	546.1	4.5	541.6

The Senior Credit Facility consists of a $475.0 million senior term loan and a $250.0 million senior revolving credit facility. The interest rate on the Senior Credit Facility averaged 3.31 per cent for the three months ended September 30, 2008 (2007 – 5.97 per cent), while for the nine months ended September 30, 2008 the interest rate on the Senior Credit Facility averaged 3.93 per cent (2007 – 6.02 per cent). After hedging activity, the interest rate incurred on the Senior Credit Facility averaged 5.23 per cent for the three months ended September 30, 2008 (2007 – 5.70 per cent) and 5.18 per cent for the nine months ended September 30, 2008 (2007 – 5.52 per cent). Prior to hedging activities, the interest rate was 3.36 per cent at September 30, 2008 (December 31, 2007 – 5.62 per cent). At September 30, 2008, we were in compliance with our financial covenants.

In spite of the current volatility in the capital markets, neither the Partnership nor its pipeline systems have experienced significant impacts to liquidity or access to the credit markets, although continued volatility in the capital markets may increase costs associated with borrowing.

The Partnership views its core banking group as high quality and has a well-established relationship with these institutions. As of November 3, 2008, the Partnership had no outstanding borrowings under the $250.0 million revolving portion of the Senior Credit Facility. The Partnership has an existing $250.0 million debt and equity shelf expiring December 1, 2008 which it expects to renew in the fourth quarter 2008. This will supplement the $250.0 million of capacity available under the Partnership's existing revolving credit and term loan facility which expires on December 12, 2011.

Interest Rate Swaps and Options

We use derivatives to assist in managing our exposure to interest rate risk. The interest rate swaps and options are structured such that the cash flows match those of the Senior Credit Facility. The notional amount hedged was $475.0 million at September 30, 2008 (December 31, 2007 - $400.0 million). At September 30, 2008, the fair value of the interest rate swaps and options accounted for as hedges was negative $11.5 million (December 31, 2007 – negative $9.8 million). Effective January 1, 2008, we adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements* (SFAS 157). Under SFAS 157, these financial assets and liabilities that are recorded at fair value on a recurring basis are categorized into one of three categories based upon a fair value hierarchy. We have classified all our derivative financial instruments as level II where the fair value is determined by using valuation techniques that refer to observable market data or estimated market prices. During the three and nine months ended September 30, 2008, we recorded interest expense of $2.4 million and $4.7 million, respectively, in regards to the interest rate swaps and options. We recorded interest income of $0.4 million and $0.8 million for the three and nine months ended September 30, 2007, respectively, in regards to the interest rate swaps and options.

2008 Third Quarter Cash Distribution

On October 17, 2008, the Board of Directors of the general partner declared the Partnership's 2008 third quarter cash distribution. The third quarter cash distribution will be paid on November 14, 2008 to unitholders of record as of October 31, 2008, totaling $27.8 million and will be paid in the following manner: $24.6 million to common unitholders (including $1.4 million to the general partner as holder of 2,035,106 common units and $6.1 million to TransCan Northern Ltd. as holder of 8,678,045 common units), $2.6 million to the general partner as holder of the incentive distribution rights, and $0.6 million to the general partner in respect of its two per cent general partner interest.

2009 Capital Requirements

Northern Border's distribution policy adopted in 2006 defines minimum equity to total capitalization to be used by the Management Committee to establish the timing and amount of required equity contributions. In accordance with this policy and in anticipation of the equity financing of Northern Border's Des Plaines Project, Northern Border currently estimates an equity contribution of approximately $85 million in the upcoming year, of which the Partnership's share would be approximately $43 million. The Partnership expects to finance this equity contribution with a combination of debt and operating cash flows.

LIQUIDITY AND CAPITAL RESOURCES OF OUR PIPELINE SYSTEMS

Overview

Our pipeline systems’ principal source of liquidity is cash generated from operating activities and bank credit facilities. Our pipeline systems fund their operating expenses, debt service and cash distributions to partners primarily with operating cash flow.

Capital expenditures are funded by a variety of sources, including cash generated from operating activities, borrowings under bank credit facilities, issuance of senior notes or equity contributions from our pipeline systems’ partners. The ability of our pipeline systems to access capital markets for debt under reasonable terms depends on their financial condition, credit ratings and market conditions.

Our pipeline systems believe that their ability to obtain financing at reasonable rates and their history of consistent cash flow from operating activities provide a solid foundation to meet their future liquidity and capital resource requirements. The Partnership’s pipeline systems monitor the creditworthiness of their customers and have credit provisions included in their tariffs, which allow them to request credit support as circumstances dictate. Additionally, Northern Border has established relationships with high-quality banks, which are involved in its revolving credit facility and provide liquidity for Northern Border’s operating needs.

Debt of Great Lakes

The following table summarizes Great Lakes’ debt outstanding as of September 30, 2008:

	Payments Due by Period		
(unaudited) *(millions of dollars)*	Total	Less than 1 year	Long-term Portion
8.74% series Senior Notes due 2008 to 2011	40.0	10.0	30.0
6.73% series Senior Notes due 2009 to 2018	90.0	9.0	81.0
9.09% series Senior Notes due 2012 to 2021	100.0	-	100.0
6.95% series Senior Notes due 2019 to 2028	110.0	-	110.0
8.08% series Senior Notes due 2021 to 2030	100.0	-	100.0
Total	440.0	19.0	421.0

Great Lakes is required to comply with certain financial, operational and legal covenants. Under the most restrictive covenants in the Senior Note Agreements, approximately $237.0 million of Great Lakes’ partners’ capital was restricted as to distributions as of September 30, 2008. At September 30, 2008, Great Lakes was in compliance with all of its financial covenants.

Debt, Credit Facility and Contractual Obligations of Northern Border

The following table summarizes Northern Border's debt and credit facility outstanding as of September 30, 2008:

	Payments Due by Period		
(unaudited) *(millions of dollars)*	Total	Less than 1 year	Long-term Portion
7.75% senior notes due 2009	200.0	200.0	-
7.50% senior notes due 2021	250.0	-	250.0
$250 million credit agreement due 2012[a]	172.0	-	172.0
Total	622.0	200.0	422.0

[a] Northern Border is required to pay a facility fee of 0.05% on the principal commitment amount of its credit agreement.

Revolving Credit Agreement
As of September 30, 2008, Northern Border had outstanding borrowings of $172.0 million under its $250 million revolving credit agreement and was in compliance with the covenants of the agreement. The weighted average interest rate related to the borrowings on the credit agreement was 2.99 per cent at September 30, 2008.

Senior Notes due 2009
On September 1, 2009, the $200.0 million 7.75 per cent senior notes will mature. As market conditions dictate, Northern Border will finance the repayment by use of fixed-rate debt, variable-rate debt or a combination of fixed-rate and variable-rate debt.

Interest Rate Collar Agreement
At September 30, 2008, Northern Border's balance sheet reflected an unrealized loss of approximately $2.2 million with a corresponding increase to accumulated other comprehensive loss related to the changes in fair value of its zero cost interest rate collar agreement (the "Collar Agreement") since inception. During the three and nine months ended September 30, 2008, Northern Border recorded interest expense of $0.5 million and $1.3 million, respectively, under the Collar Agreement. Hedge ineffectiveness had no impact on income for the three and nine months ended September 30, 2008.

Contractual Obligations
Northern Border has commitments totaling approximately $2.2 million in relation to the Des Plaines Project at September 30, 2008, with total expected costs to be approximately $18 million. Half of the project costs will be financed under Northern Border's credit facility and the other half by equity contributions from its partners. See section entitled "Recent Developments" in Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" for further discussion of this project.

RELATED PARTY TRANSACTIONS

Great Lakes earns transportation revenues from TransCanada and its affiliates under fixed price contracts with remaining terms ranging from one to ten years. Great Lakes earned $40.5 million of transportation revenues under these contracts for the three months ended September 30, 2008 (2007 - $32.4 million). This amount represents 61 per cent of total revenues earned by Great Lakes for the three months ended September 30, 2008 (2007 - 50 per cent). $18.8 million of this transportation revenue is included in our equity income from Great Lakes for the three months ended September 30, 2008 (2007 - $15.1 million).

Great Lakes earned $108.7 million of transportation revenues from TransCanada and its affiliates for the nine months ended September 30, 2008 (February 23, 2007 to September 30, 2007 - $81.5 million). This amount represents 51 per cent of total revenues earned by Great Lakes for the nine months ended September 30, 2008 (February 23, 2007 to September 30, 2007 - 50 per cent). $50.5 million of this transportation revenue is included in our equity income from Great Lakes for the nine months ended September 30, 2008 (February 23, 2007 to September 30, 2007 - $37.9 million). At September 30, 2008, $13.4 million is included in Great Lakes' receivables in regards to the transportation contracts with TransCanada and its affiliates (December 31, 2007 - $10.0 million).

Please read Note 8 within Item 1. "Financial Statements" for additional information regarding related party transactions.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

OVERVIEW

Our exposure to market risk discussed below includes forward-looking statements and represents an estimate of possible changes in future earnings that would occur assuming hypothetical future movements in interest rates. Our views on market risk are not necessarily indicative of actual results that may occur and do not represent the maximum possible gains and losses that may occur, since actual gains and losses will differ from those estimated, based on actual fluctuations in interest rates and the timing of transactions.

We are exposed to market risk due to interest rate fluctuations. Market risk is the risk of loss arising from adverse changes in market rates. We utilize financial instruments to manage the risks of certain identifiable or anticipated transactions to achieve a more predictable cash flow. Our risk management function follows established policies and procedures to monitor interest rates to ensure our hedging activities mitigate market risks. We do not use financial instruments for trading purposes.

In accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* we record financial instruments on the balance sheet as assets and liabilities based on fair value. We estimate the fair value of financial instruments using available market information and appropriate valuation techniques. Changes in financial instruments' fair value are recognized in earnings unless the instrument qualifies as a hedge under SFAS No. 133 and meets specific hedge accounting criteria. Qualifying financial instruments' gains and losses may offset the hedged items' related results in earnings for a fair value hedge or be deferred in accumulated other comprehensive income for a cash flow hedge.

INTEREST RATE RISK

Our interest rate exposure results from our Senior Credit Facility, which is subject to variability in London Interbank Offered Rate (LIBOR) interest rates. We regularly assess the impact of interest rate fluctuations on future cash flows and evaluate hedging opportunities to mitigate our interest rate risk. The notional amount hedged at September 30, 2008 was $475.0 million. The interest rate swaps and options are structured such that the cash flows match those of the Senior Credit Facility. The fair value of interest rate derivatives has been calculated using period-end market rates. At September 30, 2008, the fair value of our interest rate swaps and options accounted for as hedges was negative $11.5 million.

At September 30, 2008, we had $482.0 million outstanding on our Senior Credit Facility. Utilizing the conditions of the interest rate swaps and options, if LIBOR interest rates hypothetically increased by one per cent (100 basis points) compared to the rates in effect as of September 30, 2008, our annual interest expense would have increased and our net income would have decreased by $0.1 million; and if LIBOR interest rates hypothetically decreased by one per cent (100 basis points) compared to the rates in effect as of September 30, 2008, our annual interest expense would have decreased and our net income would have increased by $0.1 million. This amount has been determined by considering the impact of the hypothetical interest rates on variable rate borrowings outstanding as of September 30, 2008.

Northern Border utilizes both fixed-rate and variable-rate debt and is exposed to market risk due to the floating interest rates on its credit facility. Northern Border regularly assesses the impact of interest rate fluctuations on future cash flows and evaluates hedging opportunities to mitigate its interest rate risk. As of September 30, 2008, 72 per cent of Northern Border's outstanding debt was at fixed rates. Northern Border utilizes its Collar Agreement to limit the variability of the interest rate on $140.0 million of variable-rate borrowings.

Utilizing the conditions of the Collar Agreement, if interest rates hypothetically increased one per cent (100 basis points) compared with rates in effect as of September 30, 2008, Northern Border's annual interest expense would increase and its net income would decrease by approximately $0.3 million; and if interest rates hypothetically decreased one per cent (100 basis points) compared with rates in effect as of September 30, 2008, Northern Border's annual interest expense would decrease and its net income would increase by approximately $0.3 million.

Great Lakes and Tuscarora utilize fixed-rate debt; therefore, they are not exposed to market risk due to floating interest rates.

OTHER RISKS

The Partnership is influenced by the same factors that influence our pipeline systems. None of our pipeline systems own any of the natural gas they transport; therefore, they do not assume any of the related natural gas commodity price risk.

The state of Minnesota currently requires Great Lakes to pay use tax on the value of the shipper provided compressor fuel burned in its Minnesota compressor engines. Great Lakes is subject to primarily commodity price volatility and some volume volatility in determining the amount of use tax owed. If natural gas prices changed by $1 per million British thermal units, Great Lakes' annual use tax expense would change by approximately $0.7 million.

The Partnership does not have any material foreign currency exchange risks.

Item 4. Controls and Procedures

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Based on their evaluation of the Partnership's disclosure controls and procedures as of the end of the period covered by this quarterly report, the principal executive officer and principal financial officer of the general partner of the Partnership have concluded that the Partnership's disclosure controls and procedures were effective in ensuring that the information required to be disclosed by the Partnership in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's (SEC's) rules and forms and that information required to be disclosed by the Partnership in the reports that the Partnership files or submits under the Exchange Act is accumulated and communicated to the management of the general partner of the Partnership, including the principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

During the quarter ended September 30, 2008, there has been no change in the Partnership's internal control over financial reporting that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1A. Risk Factors

Our business is subject to the risks described below and the risk factors disclosed in Part I, Item 1A. "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2007.

The following new risk factor should be read in conjunction with the risk factors disclosed in Part I, Item 1A. "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2007:

The current capital and credit market conditions may adversely affect the Partnership or our pipeline systems' access to capital and cost of capital.

Access to capital markets is important to the Partnership to enable it to execute its business strategies, which include seeking opportunities to undertake accretive acquisitions and organic growth projects, and maximize the value of our existing portfolio of pipeline systems. Access to capital markets is important to our pipeline systems' ability to operate and Northern Border expects to refinance $200 million of Senior Notes in 2009. In October 2008, the general economic and capital market conditions in the United States and other parts of the world have deteriorated significantly and have adversely affected access to capital and increased the cost of capital. If these conditions continue or become worse, the Partnership's and our pipeline systems' future cost of debt and equity capital, and future access to capital markets could be adversely affected.

The following updated risk factors should be read in conjunction with the risk factors disclosed in Part I, Item 1A. "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2007:

The long-term financial conditions of our pipeline systems are dependent on the continued availability of Western Canadian natural gas for import into the U.S. and the market demand for these volumes. Competition from pipelines that deliver natural gas from other supply sources to our pipeline systems' market areas could cause our pipeline systems to discount their rates or otherwise experience a reduction in their revenues.

The development of additional natural gas reserves requires significant capital expenditures by others for exploration and development drilling and the installation of production, gathering, storage, transportation and other facilities that permit natural gas to be produced and delivered to pipelines that interconnect with our pipeline systems. High exploration and production costs, low prices for natural gas, regulatory limitations such as royalty frameworks, or the lack of available capital for these projects could adversely affect the development of additional reserves in Western Canada and the production in the WCSB.

Volumes available for export out of the WCSB depend in part on the internal demand for Canadian natural gas which may increase as a result of increased demand for electricity generation and other industrial requirements, including the development of oil sands projects, which may require substantial amounts of natural gas. This higher internal demand may reduce the amount of gas available for import into the U.S. In the longer term, a portion of the Alberta hub gas supply may come from proposed gas pipelines from the North Slope of Alaska and the Mackenzie Delta of Canada and from the continued growth of coal bed methane projects. Cancellation or delays in the construction of such pipelines or such projects could adversely affect the volumes available for export in the long term.

If the availability of Alberta hub natural gas was to decline, existing shippers on our pipeline systems may be unlikely to extend their contracts and our pipeline systems may be unable to find replacement shippers for lost capacity. Furthermore, additional natural gas reserves may not be developed in commercial quantities and in sufficient amounts to fill the capacities of each of our pipeline systems.

In addition, existing customers may not extend their contracts if the cost of delivered natural gas from other producing regions into the markets served by our pipeline systems is lower than the cost of natural gas delivered by our pipeline systems. Our pipeline systems face increased competition from other pipelines that provide access for our shippers to capacity from the U.S. Rocky Mountain Region. The Rockies Express Pipeline owned by Rockies Express Pipeline LLC is being constructed in two phases and the planned terminus is in Clarington, Ohio. REX West is completed and is currently delivering gas to interconnects in the Midwestern region. The full in-service of REX West in May 2008 has resulted in significant downward pressure on natural gas prices in the Mid-continent Region, and is having a negative impact on demand for Northern Border's transport and may have an impact on Great Lakes in the future.

REX East is planned to extend from Audrain County, Missouri to Clarington in Monroe County, Ohio. Once in-service, REX East should improve the competitive position of Canadian supply with Mid-Continent sourced gas, potentially mitigating some of the excess supply in the Mid-Continent market. REX East will compete in some of Great Lakes' markets, but will also potentially create demand for Great Lakes' transportation of natural gas from REX East seeking access to and from storage locations in Michigan. It is now anticipated that the partial in-service and full in-service of REX East will occur in the second and fourth quarters of 2009, respectively. Although there can be no assurance on the timing or impact of REX East, we believe that any positive impact on the market Northern Border serves will not occur until 2010.

An increase in competition in the key markets served by our pipeline systems could arise from new ventures or expanded operations from existing competitors. Our financial performance depends to a large extent on the capacity contracted on our pipeline systems. Decreases in the volumes transported by our pipeline systems, whether caused by supply or demand factors in the markets these pipeline systems serve, competition or otherwise, can directly and adversely affect our revenues and results of operations.

Our pipeline systems may undertake expansion and build projects which involve significant risks that could adversely affect our business. Additionally, the Bison Project and the Pathfinder Project have inherently similar risks that may impact their success and therefore the potential volumes to be delivered to Northern Border.

Our pipeline systems have expansion and new build projects planned or underway, including Northern Border's $18 million Des Plaines Project. Additionally, expansion and new build projects, such as the Bison and/or Pathfinder Projects that would potentially deliver gas to Northern Border, are subject to a variety of factors outside their control, such as weather, natural disasters, delays in obtaining key materials and difficulties in obtaining permits and rights-of-way or other regulatory approvals, as well as the performance by third party contractors may result in increased costs or delays in construction. Cost overruns or delays in completing a project could result in reduced transportation rates and liquidated damages to customers, as well as lost revenue opportunities. In addition, we cannot be certain that, if completed, these projects will perform in accordance with our expectations. Each of these risks could have a material adverse effect on our results of operations and cash flows.

If our pipeline systems were to become subject to a material amount of entity level taxation for state tax purposes, then our pipeline systems' operating cash flow and cash available for distribution to us and for other business needs would be reduced.

Our pipeline systems are partnerships or tax flow through entities, and as such they generally have not been subject to income tax at the entity level. Several states have either adopted or are evaluating a variety of ways to subject partnerships to entity level taxation. For example, in the nine months ended September 30, 2008, Great Lakes recorded a Michigan business tax of $4.2 million relating to a new partnership level tax, of which the Partnership's share of the tax was $2.0 million. Imposition of such taxes on our pipeline systems will reduce the cash available for distribution to us and for other business needs by our pipeline systems.

Unitholders will likely be subject to state and local taxes as a result of an investment in units.

In addition to federal income taxes, unitholders will likely be subject to other taxes, including state and local taxes, unincorporated business taxes and estate, inheritance or intangible taxes that are imposed by the various jurisdictions in which we do business or own property. We may be required to withhold income taxes with respect to income allocable or distributions made to our unitholders. In addition, unitholders may be required to file state and local income tax returns and pay state and local income taxes in some or all of the jurisdictions in which we do business or own property and may be subject to penalties for failure to comply with those requirements. It is the unitholders' responsibility to file all required United States federal, state and local tax returns. Counsel has not rendered an opinion on the state or local tax consequences of an investment in us.

Item 6. Exhibits

No.	Description
10.1	Membership Interest Purchase Agreement as of August 28, 2008, by and between Northern Border Pipeline Company and TransCanada Pipeline USA Ltd.
10.2	First Amendment to Amended and Restated Revolving Credit Agreement dated as of July 31, 2008 between Northern Border Pipeline Company and the lenders named therein.
31.1	Certification of Principal Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of Principal Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification of Principal Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification of Principal Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities and Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

TABLE OF CONTENTS

MEMBERSHIP INTEREST PURCHASE AGREEMENT

THIS MEMBERSHIP INTEREST PURCHASE AGREEMENT (this "Agreement") is made and entered into as of August 28, 2008, by and between **Northern Border Pipeline Company**, a Texas general partnership ("Seller"), and **TransCanada PipeLine USA Ltd.**, a Nevada corporation ("Purchaser").

RECITALS

WHEREAS, Seller is the sole member of Bison Pipeline LLC, a Delaware limited liability company ("Bison"), and desires to sell its 100% membership interest in Bison (the "Interest") to Purchaser on the terms and conditions set forth herein; and

WHEREAS, Purchaser desires to purchase the Interest from Seller on the terms and conditions set forth herein; and

NOW, THEREFORE, in consideration of the foregoing recitals and the mutual promises, representations, warranties, and covenants hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto, intending to be legally bound, hereby agree as follows:

AGREEMENT

ARTICLE I

DEFINITIONS

For purposes of this Agreement, the following terms have the meanings specified or referred to in this Article I.

"Affiliate" means, with respect to any Person, (a) each Person controlled by such Person, (b) each Person that controls such Person and (c) each Person that is under common control with such Person.

"Alternate Agreements" has the meaning given to such term in Section 2.1.

"Anadarko" means Anadarko Energy Services Company, a Delaware corporation.

"Approval Date" has the meaning given to such term in Section 5.2.

"Bison" has the meaning given to such term in the recitals.

"Bison Agreement" has the meaning given to such term in Section 3.2.

"Bison Open Season" means the terms and conditions defining the service to be provided on the Bison Project and posted on the Seller's website.

"Bison Project" means the pipeline project being developed by Bison to transport natural gas from the Powder River Basin to the Seller's pipeline system and having FERC Docket No. PF08-23-000.

"Closing" has the meaning given to such term in Section 2.2.

"Closing Date" has the meaning given to such term in Section 2.2.

"Code" means the Internal Revenue Code of 1986, as amended.

"Consent" means any approval, consent, permit, ratification, waiver, order or other authorization.

"Contemplated Transactions" means the purchase and sale of the Interest and the performance by Seller and Purchaser of their other obligations under this Agreement.

"Damages" means all damages, penalties, fines, costs, amounts paid in settlement, Liabilities, obligations, Taxes, liens, losses, expenses and fees (including court costs and costs of investigation, defense and reasonable attorneys' fees and expenses) actually incurred, but specifically excluding special, incidental, consequential and punitive damages, as reduced by any insurance recoveries received in respect thereof.

"Dollars" means United States Dollars.

"FERC' means the Federal Energy Regulatory Commission.

"Governmental Body" means any:

(a) nation, state, county, city, town, district or other jurisdiction of any nature;

(b) federal, state, local, municipal, foreign or other government;

(c) governmental or quasi-governmental authority of any nature (including any governmental agency, branch, department, official or entity and any court or other tribunal); or

(d) body exercising, or entitled to exercise, any administrative, executive, judicial, legislative, police, regulatory or taxing authority or power of any nature.

"Indemnity Period" has the meaning given to such term in Section 6.1.

"Initial Payment" has the meaning given to such term in Section 2.1.

"Interest" has the meaning given to such term in the recitals.

"Knowledge" means, with respect an individual's knowledge of a particular fact or other matter, that such individual is actually aware of such fact or other matter, and with respect to the knowledge of a Person other than an individual of a particular fact or other matter, that any individual who is serving as a director, manager or executive officer of such Person is actually aware of such fact or other matter.

"Legal Requirement" means any federal, state, local, municipal, foreign, international or other administrative order, constitution, law, ordinance, regulation, statute or treaty applicable to a Person.

"Liability" means any liability (whether absolute or contingent, liquidated or unliquidated, or due or to become due, or otherwise), including any liability for Taxes.

"Lien" has the meaning given to such term in Section 3.4.

"MERC" means Minnesota Energy Resources Corporation, a Delaware corporation.

"MMBtu" means one million British thermal units.

"MMcf" means one million cubic feet of natural gas.

"Pathfinder Project" means the pipeline construction and development project proposed by Purchaser that upon completion will transport natural gas from Meeker, Colorado and/or Wamsutter, Wyoming to the Seller's pipeline system, terminating at a point near the Seller's compression station in Morton County, North Dakota and that has FERC Docket No. PF08-22-000.

"Person" means any individual, corporation (including any non-profit corporation), general or limited partnership, limited liability company, joint stock company, joint venture, estate, trust, association, organization, other entity or Governmental Body.

"Post-Closing Payment" has the meaning given to such term in Section 2.1.

"Post-Effective Date Development Costs" has the meaning given to such term in Section 2.3.

"Pre-Effective Date Development Costs" has the meaning given to such term in Section 2.3.

"Proceeding" means any action, arbitration, audit, hearing, investigation, litigation or suit (whether civil, criminal, or administrative) commenced, brought, conducted or heard by or before, or otherwise involving, any Governmental Body or arbitrator.

"Purchase Price" has the meaning given to such term in Section 2.1.

"Purchaser" has the meaning given to such term in the preamble.

"Representative" means, with respect to a particular Person, any director, officer, manager, employee, agent, consultant, advisor or other representative of such Person, including legal counsel, accountants and financial advisors.

"Securities Act" has the meaning given to such term in Section 4.6.

"Seller" has the meaning given to such term in the preamble.

"Tax" means any federal, state, local, or foreign income, gross receipts, license, payroll, employment, excise, severance, stamp, occupation, premium, windfall profits, environmental, customs duties, capital stock, franchise, profits, withholding, social security (or similar), unemployment, disability, real property, personal property, sales, use, transfer, registration, value added, alternative or add-on minimum, estimated or other tax of any kind whatsoever, including any interest, penalty or addition thereto, whether disputed or not.

"Tax Return" means any return, declaration, report, claim for refund, or information return or statement relating to Taxes filed or required to be filed with any taxing authority, including any schedule or attachment thereto, and including any amendment thereof.

"Threatened" means that a demand or statement has been made in writing, or any notice has been given in writing, asserting that a claim, Proceeding, dispute, action or other matter may be commenced or taken in the future.

"Transfer Taxes" has the meaning given to such term in Section 5.6(b).

"Williams" means Williams Gas Marketing, Inc., a Delaware corporation

ARTICLE II

AGREEMENT TO SELL AND PURCHASE

2.1 Sale and Purchase.

Subject to the terms and conditions hereof, at the Closing Seller hereby agrees to sell the Interest to Purchaser, and Purchaser agrees to purchase the Interest from Seller, for a total purchase price of Twenty Million Dollars (US$20,000,000) (the "Purchase Price"). Purchaser agrees that it will pay the Purchase Price as follows: (a) Thirteen Million Five Hundred Thousand Dollars (US$13,500,000) (the "Initial Payment") shall be paid by Purchaser to Seller at the Closing by wire transfer of immediately available funds to an account designated in writing to Purchaser by Seller and (b) Six Million Five Hundred Thousand Dollars (US$6,500,000) (the "Post-Closing Payment") shall be paid by Purchaser to Seller, by wire transfer of immediately available funds to an account designated in writing to Purchaser by Seller, within ten (10) days of the earlier to occur of (i) the satisfaction, expiration, termination or waiver by MERC, by August 29, 2008, of the contingency set forth in MERC's Anchor Shipper Offer Sheet, which is attached to Exhibit B to the Precedent Agreement for Firm Natural Gas Transportation Service dated May 22, 2008 by and between MERC and Bison or (ii) the execution, on or before the Approval Date, of one or more third-party firm transportation precedent agreements with an aggregate maximum delivery quantity of at least 50 MMcf per day from the Powder River Basin on terms and conditions no less favorable than those offered to shippers in the Bison Open Season and having no material conditions outstanding or not otherwise satisfied, other than conditions that are within the control of Purchaser (the "Alternate Agreements"); *provided* that such Alternate Agreements may include a firm transportation precedent agreement by MERC to transport at least 50 MMcf per day on either the Bison Project or the Pathfinder Project that is a substitute arrangement for that described in clause (i) of this sentence if such agreement by MERC contains terms and conditions no less favorable than those offered to shippers in the Bison Open Season and has no material conditions outstanding or not otherwise satisfied, other than conditions that are within the control of Purchaser. For the avoidance of doubt, it is acknowledged and agreed that Purchaser will only be required to pay the Post-Closing Payment upon satisfaction of the conditions set forth in either of clauses (b)(i) or (ii) of this Section 2.1, and that if the conditions set forth in neither of such clauses are satisfied, the Purchase Price will consist only of the Initial Payment.

2.2 Closing.

The closing of the sale and purchase of the Interest under this Agreement (the "Closing") shall take place at 10:00 a.m. Omaha, Nebraska time on August 29, 2008, at the offices of Seller, 13710 FNB Parkway, Omaha, Nebraska 68154, or at such other time or place as Seller and Purchaser may mutually agree (such date is hereinafter referred to as the "Closing Date"). At the Closing, subject to the terms and conditions hereof, Seller and Purchaser will deliver an executed Bill of Sale and Assignment and Assumption Agreement substantially in the form of Exhibit A hereto with respect to the Interest to be purchased at the Closing by Purchaser, upon payment of the Initial Payment by wire transfer of immediately available funds to an account designated in writing to Purchaser by Seller.

2.3 Effective Date; Development Costs.

Regardless of the Closing Date, the Contemplated Transactions shall have an effective date of July 31, 2008. Seller shall assume and pay all development costs and expenses relating to the Bison Project that are incurred by Bison or by Seller on behalf of Bison at any time prior to 12:00 a.m. CDT on August 1, 2008 ("Pre-Effective Date Development Costs"). Purchaser shall assume and pay all reasonable and documented development costs and expenses relating to the Bison Project that are incurred by Bison or by Seller on behalf of Bison at any time commencing after 12:00 a.m. CDT on August 1, 2008 ("Post-Effective Date Development Costs"), provided that the Closing occurs. On or before the date that is ninety (90) days after the Closing Date, Seller shall provide to Purchaser a written accounting of all Pre-Effective Date Development Costs and Post-Effective Date Development Costs, and shall identify those Post-Effective Date Development Costs already paid by Bison or by Seller on behalf of Bison. Purchaser shall reimburse Seller, by wire transfer of immediately available funds to an account designated in writing to Purchaser by Seller, for all Post-Effective Date Development Costs paid by Bison or by Seller on behalf of Bison within ten (10) days of Seller's receipt of such written accounting.

2.4 Conditions to Obligations of Purchaser.

Purchaser's obligation to purchase the Interest at the Closing is subject to the satisfaction or waiver, at or prior to the Closing Date, of the following conditions:

(a) Approval by Purchaser. The Board of Directors of Purchaser shall have authorized and approved (a) the execution, delivery and performance by Purchaser of this Agreement and the Contemplated Transactions and (b) the Bison Project. Purchaser acknowledges that this condition has been satisfied.

(b) Certain Proceedings. No Proceeding shall have been commenced against Seller or Bison that challenges, or may have the effect of preventing, delaying, making illegal or otherwise interfering with, any of the Contemplated Transactions.

(c) ONEOK Letter. Seller shall have delivered to Purchaser a letter from ONEOK Partners Intermediate Limited Partnership in the form of Exhibit B attached hereto.

(d) Closing Documents. Seller shall have delivered to Purchaser, at the Closing, (i) an Assistant Secretary's Certificate, reasonably satisfactory to Purchaser, certifying the approvals described in Section 2.5(a), (ii) an Officers' Certificate, signed by two duly authorized officers of the operator of Seller, stating that the representations and warranties of Seller contained herein are true and correct as of the Closing Date as if made on the Closing Date and that Seller has performed all of its covenants and obligations set forth herein that are to be performed by it at or before the Closing, and (iii) pursuant to Section 1445 of the Code, a tax certificate that (1) states that Seller is not a foreign corporation, foreign partnership, foreign trust or foreign estate and (2) provides Seller's employer identification number and address.

2.5 Conditions to Obligations of Seller.

Seller's obligation to sell the Interest at the Closing is subject to the satisfaction or waiver, on or prior to the Closing Date, of the following conditions:

(a) Approval by Seller. The Management Committee of Seller shall have authorized and approved the execution, delivery and performance by Seller of this Agreement and the Contemplated Transactions.

(b) Certain Proceedings. No Proceeding shall have been commenced against Purchaser that challenges, or may have the effect of preventing, delaying, making illegal or otherwise interfering with, any of the Contemplated Transactions.

(c) Closing Documents. Purchaser shall have delivered to Seller, at the Closing, (i) a Certificate, reasonably satisfactory to Seller, certifying the approvals described in Section 2.4(a) and (ii) an Officers' Certificate, signed by two duly authorized officers of Purchaser, stating that the representations and warranties of Purchaser contained herein are true and correct as of the Closing Date as if made on the Closing Date and that Purchaser has performed all of its covenants and obligations set forth herein that are to be performed by it at or before the Closing.

2.6 Purchase Price Allocation for Tax Purposes.

Within one hundred eighty (180) days after the Closing Date, Purchaser shall provide to Seller a copy of Internal Revenue Service Form 8594 and any required exhibits thereto with Purchaser's prepared allocation of the Purchase Price. Purchaser and Seller agree to make all reasonable efforts to file all Tax Returns of both Purchaser and Seller consistently with this allocation.

ARTICLE III

REPRESENTATIONS AND WARRANTIES OF SELLER

Seller represents and warrants to Purchaser that:

3.1 Organization.

Seller is a general partnership duly formed, validly existing and in good standing under the laws of the State of Texas.

3.2 Organization and Qualification of Bison.

Bison is a limited liability company duly formed, validly existing and in good standing under the laws of the State of Delaware and is duly authorized to conduct business, duly registered or qualified and in good standing under the laws of each jurisdiction where the nature of its assets or business requires it to be so authorized, registered or qualified, except where the failure to be so authorized, registered or qualified would not reasonably be expected to impair Seller's ability to consummate the Contemplated Transactions. Bison has the full limited liability company power and authority to own or hold its properties and assets and to carry on its business as currently conducted. Seller has delivered to Purchaser correct and complete copies of the Certificate of Formation of Bison, the Limited Liability Company Agreement, dated March 27, 2008, of Bison (the "Bison Agreement"), and any other organizational documents of Bison.

3.3 Authority.

Seller has the full partnership power and authority to enter into this Agreement and to perform its obligations hereunder. The execution, delivery and performance of this Agreement by Seller have been duly and validly authorized by all necessary partnership action. Assuming the due and valid authorization, execution and delivery of this Agreement by Purchaser, this Agreement constitutes the legal, valid and binding obligation of Seller, enforceable against Seller in accordance with its terms, except as such enforceability may be limited by (a) applicable bankruptcy, insolvency, reorganization, moratorium and other laws of general application affecting enforcement of creditors' rights generally and (b) laws relating to the availability of equitable remedies.

3.4 Ownership.

Seller is the sole member of Bison and the legal and beneficial owner of the Interest, which has been duly and validly authorized and issued in accordance with the Bison Agreement; Seller owns such membership interest free and clear of all liens, encumbrances, security interests, equities, charges or claims (collectively, "Liens"); and at the Closing, upon payment of the Purchase Price, Seller will deliver to Purchaser good, valid and marketable title to the Interest, free and clear of any Liens. Except (a) as provided in the Bison Agreement, (b) as provided in Anadarko's Precedent Agreement for Firm Natural Gas Transportation Service, dated May 23, 2008, with Bison and (c) for the Contemplated Transactions, there are no outstanding or authorized options, warrants, purchase rights, conversion rights, preemptive rights, exchange rights or other contracts or commitments to sell, subscribe for or purchase any equity interest in Bison, and there are no restrictions upon the transfer of the Interest.

3.5 No Conflicts or Violations; Consents.

Neither the execution and delivery of this Agreement by Seller nor the performance by Seller of its obligations hereunder (a) conflicts or will conflict with, or constitutes or will constitute a violation of, the general partnership agreement of Seller, certificate of formation of Seller or Bison, limited liability company agreement of Bison or other organizational document of Seller or Bison, (b) conflicts or will conflict with, constitutes or will constitute a breach of or default under (or an event that, with notice or lapse of time or both, would constitute such a breach of or default under), or provides or will provide any party the right to accelerate, terminate, modify or cancel, any indenture, mortgage, deed of trust, loan agreement, lease or other agreement or instrument to which Seller or Bison is a party, by which either of them is bound or to which any of their properties or assets is subject, (c) violates or will violate any statute, law, ordinance, regulation, order, judgment, decree or injunction of any court or Governmental Body to which Seller, Bison or any of their properties or assets may be subject or (d) will result in the creation or imposition of any Lien upon the Interest or any of the property or assets of Seller or Bison. Neither Seller nor Bison is required to provide any notice to or obtain any Consent from any Person in connection with the consummation of the Contemplated Transactions, except for such notices or Consents where the failure to provide such notice or obtain such Consent would not reasonably be expected to impair its ability to consummate the Contemplated Transactions.

3.6 Certain Proceedings.

There is no pending Proceeding that has been commenced against Seller or Bison that challenges, or may have the effect of preventing, delaying, making illegal or otherwise interfering with, any of the Contemplated Transactions. To the Knowledge of Seller, no such Proceeding has been Threatened.

3.7 Brokers or Finders.

Seller and its officers and agents have incurred no obligation or liability, contingent or otherwise, for brokerage or finders' fees or agents' commissions or other similar payment in connection with this Agreement.

3.8 Taxes.

Except as would not reasonably be expected to have a material adverse effect, (a) Seller has filed, or caused to be filed, all Tax Returns required to be filed by Bison or with respect to its assets or operations on a timely basis (taking into account all extensions of due dates), (b) all such Tax Returns were complete and correct, (c) all Taxes owed by Bison which are or have become due have been timely paid in full, (d) there are no Liens on the Interest or any of Bison's assets that arose in connection with any failure (or alleged failure) to pay any Tax on any such assets or with respect to the Interest, other than Liens for Taxes not yet due and payable, (e) there is no pending action, proceeding or, to the Knowledge of Seller, investigation for assessment or collection of Taxes and no Tax assessment, deficiency or adjustment has been asserted or proposed with respect to Bison or its assets, (f) Bison, since its inception, has been disregarded as an entity separate from Seller for federal income tax purposes under Treasury Regulations 3017701-2 and -3 and any comparable provisions of state and local jurisdictions that permit such treatment and (g) there is no tax allocation agreement or tax sharing agreement to which Bison is a party.

ARTICLE IV

REPRESENTATIONS AND WARRANTIES OF PURCHASER

Purchaser represents and warrants to Seller as follows:

4.1 Organization.

Purchaser is a corporation duly organized, validly existing, and in good standing under the laws of the State of Nevada.

4.2 Authority.

Purchaser has the full corporate power and authority to enter into this Agreement and to perform its obligations hereunder. The execution, delivery and performance of this Agreement by Purchaser have been duly and validly authorized by all necessary corporate action. Assuming the due and valid authorization, execution and delivery of this Agreement by Seller, this Agreement constitutes the legal, valid and binding obligation of Purchaser, enforceable against Purchaser in accordance with its terms, except as such enforceability may be limited by (a) applicable bankruptcy, insolvency, reorganization, moratorium and other laws of general application affecting enforcement of creditors' rights generally and (b) laws relating to the availability of equitable remedies.

4.3 No Conflicts or Violations; Consents.

Neither the execution and delivery of this Agreement by Purchaser nor the performance by Purchaser of its obligations hereunder (a)conflicts or will conflict with, or constitutes or will constitute a violation of, the certificate or articles of incorporation, bylaws or other organizational document of Purchaser, (b) conflicts or will conflict with, constitutes or will constitute a breach of or default under (or an event that, with notice or lapse of time or both, would constitute such a breach of or default under), or provides or will provide any party the right to accelerate, terminate, modify or cancel, any indenture, mortgage, deed of trust, loan agreement, lease or other agreement or instrument to which Purchaser is a party, by which Purchaser is bound or to which any of its properties or assets is subject, (c) violates or will violate any statute, law, ordinance, regulation, order, judgment, decree or injunction of any court or Governmental Body to which Purchaser or any of its properties or assets may be subject or (d) will result in the creation or imposition of any Lien upon any of the property or assets of Purchaser. Purchaser is not required to provide any notice to or obtain any Consent from any Person in connection with the consummation of the Contemplated Transactions, except for such notices or Consents where the failure to provide such notice or obtain such Consent would not reasonably be expected to impair its ability to consummate the Contemplated Transactions.

4.4 Certain Proceedings.

There is no pending Proceeding that has been commenced against Purchaser that challenges, or may have the effect of preventing, delaying, making illegal or otherwise interfering with, any of the Contemplated Transactions. To the Knowledge of Purchaser, no such Proceeding has been Threatened.

4.5 Brokers or Finders.

Purchaser and its officers and agents have incurred no obligation or liability, contingent or otherwise, for brokerage or finders' fees or agents' commissions or other similar payment in connection with this Agreement.

4.6 Investment Intent; Access.

Purchaser acknowledges that (a) the Interest has not been registered under the Securities Act of 1933, as amended (the "Securities Act"), or any state securities laws, and (b) Seller has disclosed to Purchaser that the Interest may not be resold absent such registration or unless an exemption from registration is available. Purchaser is acquiring the Interest for its own account, for investment purposes only and not with a view to its distribution within the meaning of the Securities Act. Purchaser has such knowledge and experience in financial and business matters that it is capable of evaluating the merits and risks of the Contemplated Transactions. Seller has made available to Purchaser and its Representatives the opportunity to ask questions of the officers and Representatives of Seller, to engage in diligence and to acquire such additional information about the business, assets and financial condition of Seller as Purchaser has requested, and all such requested information has been received by Purchaser.

ARTICLE V

COVENANTS OF THE PARTIES

5.1 Expenses.

Except as contemplated by Section 2.3, each party shall bear its own expenses incurred in connection with the preparation, execution and performance of this Agreement and the Contemplated Transactions, including all fees and expenses of agents, counsel, accountants and other Representatives.

5.2 Pathfinder Project.

Provided that (a) Bison has entered into firm transportation precedent agreements with respect to the Bison Project with an aggregate maximum delivery quantity of at least 405 MMcf per day and that have no material conditions outstanding or not otherwise satisfied by August 31, 2008 (unless otherwise extended by Purchaser), other than conditions that are within the control of Purchaser, and (b) Purchaser has not, by September 30, 2008 (or such other later date agreed to by the Bison and Pathfinder shippers) (the "Approval Date"), received management approval to proceed with the Pathfinder Project, Purchaser will, subject to the rights and obligations of Bison set forth in the Precedent Agreements for Firm Natural Gas Transportation Service executed with the Bison shippers, use commercially reasonable efforts to complete the Bison Project and place it in-service during the fourth quarter of 2010.

5.3 Northern Border Pipeline Company Capacity.

Subject to Seller's tariff and applicable law, Seller shall use commercially reasonable efforts to assist Purchaser after the Closing by marketing existing capacity on Seller's pipeline system and the potential expansion of its pipeline system to shippers, including, but not limited to, shippers on the Bison Project and/or the Pathfinder Project. Commercially reasonable efforts shall consist of (a) the continuation at least until September 30, 2008 of the offer to all shippers of a discounted reservation rate on Seller's pipeline system of US$0.23 per MMBtu for transportation from Port of Morgan to Ventura for a ten (10) year commitment, (b) initiating the applicable right of first refusal process for capacity on Seller's pipeline system to Chicago during the month of September 2008 and (c) Seller offering the market, including, but not limited to, shippers on the Bison Project and/or the Pathfinder Project, an open season having a bid period during the month of August 2008 proposing the expansion of Seller's pipeline system for transportation on Seller's pipeline system to Chicago for a ten (10) year commitment with a targeted in-service date of the fourth quarter of 2010, or as soon as practicable thereafter. Such capacity shall be offered at a rate that the Seller reasonably believes to be marketable; *provided* that Seller's obligation under this Agreement to undertake any such expansion shall be subject to a fair and reasonable return analysis by Seller relating to the expected economics of any such expansion and the approval of its Management Committee.

5.4 Discussions with Shippers.

Seller shall assist Purchaser in discussions with the existing shippers on the Bison Project in order to assist with the satisfaction of the outstanding conditions precedent under such shippers' firm transportation precedent agreements and encourage their participation in the Pathfinder Project; *provided* that Seller's obligations pursuant to this Section 5.4 shall be expressly limited to participating in conversations and shall not include any obligation to undertake or incur any liabilities or expenses or to make concessions of any kind to shippers.

5.5 Further Assurances.

Each party agrees (a) to furnish upon request to the other party such further information, (b) to execute and deliver to the other party such other documents and (c) to do such other acts and things, in each case as the other party may reasonably request for the purpose of carrying out the intent of this Agreement and the Contemplated Transactions.

5.6 Tax Matters.

The following provisions shall govern the allocation of responsibility between Seller and Purchaser for certain Tax matters following the Closing Date:

(a) Tax Returns.

(i) Seller shall prepare or cause to be prepared and file or cause to be filed all Tax Returns for Bison for periods ending on or before the Closing Date that are required to be filed after the Closing Date, and shall be responsible for the timely payment (and entitled to any refund) of Taxes due with respect to the period covered by such Tax Returns.

(ii) Seller shall prepare or cause to be prepared and file or cause to be filed any Tax Returns of Bison for periods which begin before the Closing Date and end after the Closing Date, shall furnish a copy of such Tax Return to Purchaser. Seller shall be responsible for the timely payment of Taxes due with respect to the period covered by such Tax Return allocable to the period prior to and including the Closing Date, and Purchaser shall be responsible for the timely payment of Taxes due with respect to the period after the Closing Date.

(iii) To the extent permitted by law or administrative practice, the taxable year of Bison shall end on and include the Closing Date. Whenever it is necessary to determine the liability for Taxes of Bison for a portion of a taxable year or period that begins before and ends after the Closing Date, the determination of the Taxes for the portion of the year or period ending on, and the portion of the year or period beginning after, the Closing Date shall be determined by assuming that the taxable year or period ended on and included the Closing Date, except that exemptions, allowances or deductions that are calculated on an annual basis and annual property taxes shall be prorated on the basis of the number of days in the annual period elapsed through the Closing Date as compared to the number of days in the annual period elapsing after the Closing Date.

(iv) Any Tax Return to be prepared pursuant to the provisions of this Section 5.6 shall be prepared in a manner consistent with practices followed in prior years with respect to similar Tax Returns, except for changes required by changes in law or fact. Purchaser shall not file an amended Tax Return for any period ending on or prior to the Closing Date without the consent of Seller, which consent shall not be unreasonably withheld or delayed.

(b) Transfer Taxes. Purchaser shall be responsible for the payment of all excise, sales, use, transfer (including real property transfer or gains), stamp, documentary, filing, recordation and other similar taxes, together with any interest, additions or penalties with respect thereto and any interest in respect of such additions or penalties, resulting directly from the Contemplated Transactions (collectively, "Transfer Taxes").

(c) Access to Information. After the Closing Date, Seller shall grant to Purchaser (or its designees) access at all reasonable times to all of the information, books, and records relating to Bison within the possession of Seller (including work papers and correspondence with taxing authorities), and shall afford Purchaser (or its designees) the right (at Purchaser's expense) to take extracts therefrom and to make copies thereof, to the extent reasonably necessary to permit Purchaser (or its designees) to prepare Tax Returns and to conduct negotiations with taxing authorities. After the Closing Date, Purchaser shall grant or cause Bison to grant to Seller (or its designees) access at all reasonable times to all of the information, books and records relating to Bison within the possession of Purchaser or Bison (including work papers and correspondence with taxing authorities), and shall afford Seller (or its designees) the right (at Seller's expense) to take extracts therefrom and to make copies thereof, to the extent reasonably necessary to permit Seller (or its designees) to prepare Tax Returns and to conduct negotiations with taxing authorities.

(d) Survival. Anything to the contrary in this Agreement notwithstanding, the representations, warranties, covenants, agreements, rights and obligations of the parties with respect to any Tax matter covered by this Agreement shall survive the Closing and shall not terminate until ninety (90) days after the expiration of the applicable statutes of limitations (including all periods of extension and tolling) applicable to such Tax matter.

(e) Conflict. In the event of a conflict between the provisions of this Section 5.6 and any other provisions of this Agreement, the provisions of this Section 5.6 shall control.

(f) Tax Indemnity.

(i) Seller shall be liable for, and shall indemnify and hold Bison and Purchaser and its Affiliates harmless from, any Taxes (other than Transfer Taxes) (1) imposed on or incurred by or with respect to Bison or its assets with respect to the period prior to and including the Closing Date, (2) attributable to a breach by Seller of any covenant with respect to Taxes in this Agreement or (3) attributable to a breach of Seller's representations and warranties in Section 3.8.

(ii) Purchaser shall be liable for, and shall indemnify and hold Seller and its Affiliates harmless from, any Taxes (including Transfer Taxes) attributable to a breach by Purchaser of any covenant with respect to Taxes in this Agreement.

(iii) If Purchaser or its Affiliates receive a refund of any Taxes that Seller is responsible for hereunder, or if Seller or its Affiliates receive a refund of any Taxes that Purchaser is responsible for hereunder, the party receiving such refund shall, within ninety (90) days after receipt of such refund, remit it to the party who has responsibility for such Taxes hereunder. The parties shall cooperate in order to take all necessary steps to claim any such refund.

ARTICLE VI

INDEMNIFICATION; REMEDIES

6.1 Survival of Representations, Warranties and Covenants.

The representations, warranties and covenants set forth in this Agreement shall survive until the expiration of the period (the "Indemnity Period") that commences on the Closing Date and terminates on the date that is one hundred eighty (180) days after the Closing Date, at which time they will expire; *provided*, *however*, that the Indemnity Period with respect to the covenant set forth in Section 5.2 shall extend until January 15, 2011; and *provided*, *further*, that the Indemnity Period with respect to the representations and warranties set forth in Section 3.8 and the covenants set forth in Section 5.6 shall extend until ninety (90) days after the expiration of the applicable statute of limitations. Neither party shall have any liability (for indemnification or otherwise) with respect to any representation or warranty, or any covenant or obligation to be performed or complied with by it hereunder, unless on or before the expiration or termination of the Indemnity Period, the other party notifies such party of a claim, specifying the factual basis of that claim in reasonable detail to the extent then known by it.

6.2 Indemnification and Payment of Damages by Seller.

Subject to the limitations set forth in this Article VI, Seller shall indemnify Purchaser and its Representatives and Affiliates for, shall hold Purchaser and its Representatives and Affiliates harmless from, and shall pay to Purchaser and its Representatives and Affiliates the amount of, any Damages arising from or in connection with (a) any inaccuracy in or breach of any representation or warranty made by Seller in this Agreement or (b) any breach of any covenant or agreement of Seller in this Agreement.

6.3 Indemnification and Payment of Damages by Purchaser.

Subject to the limitations set forth in this Article VI, Purchaser shall indemnify Seller and its Representatives and Affiliates for, shall hold Seller and its Representatives and Affiliates harmless from, and shall pay to Seller and its Representatives and Affiliates the amount of, any Damages arising from or in connection with (a) any inaccuracy in or breach of any representation or warranty made by Purchaser in this Agreement or (b) any breach of any covenant or agreement of Purchaser in this Agreement.

6.4 Limitations on Indemnification.

Neither party shall have any liability (for indemnification or otherwise) with respect to any representation, warranty, covenant or agreement made in this Agreement until the total of all Damages asserted by the other party with respect to all such matters exceeds $500,000 in the aggregate, and then the liable party shall be liable for such Damages only to the extent they exceed such amount. The limitations set forth in the preceding sentence shall not apply to a breach of the representations and warranties set forth in Section 3.8 or the covenants set forth in Section 5.6, any fraudulent representations and warranties made in this Agreement or any willful breach of any covenant or agreement made in this Agreement, and the liable party shall be liable for all Damages with respect thereto. In no event shall the aggregate liability of either party for breach of its representations, warranties, covenants and agreements exceed fifteen percent (15%) the Purchase Price, except in the case of fraud or a breach of representations and warranties set forth in Section 3.8 or the covenants set forth in Section 5.6.

6.5 No Security Holder Liability.

The parties acknowledge that the stockholders, members, and other security holders of Purchaser and Seller are not parties to this Agreement and that the representations, warranties, covenants and agreements made in this Agreement are provided only by Seller or Purchaser, as the case may be, to the other. The parties agree that neither party shall have recourse (including for indemnification or otherwise) against any officer, director, stockholder, member, manager or security holder of the other party under or in connection with this Agreement.

ARTICLE VII

GENERAL PROVISIONS

7.1 Public Announcements.

The initial press release or releases to be issued in connection with the Contemplated Transactions shall be agreed upon by the parties prior to the issuance thereof. Otherwise, prior to the Closing, neither party shall, without the other party's prior written consent (which shall not be unreasonably withheld or delayed) or unless permitted by the Confidentiality Agreement, dated July 18, 2008, between the parties or any amendments thereto or waivers therefrom, make any disclosure concerning this Agreement or the Contemplated Transactions to any Person other than (a) their respective members, managers, officers, directors or employees who have a need to know in connection with this Agreement or (b) their respective counsel, public accountants and financial advisors.

7.2 Confidentiality.

. Each party hereto shall hold, and shall cause its Representatives to hold, in strict confidence, unless compelled to disclose by judicial or administrative process or, in the opinion of its counsel, by other Legal Requirements, and not use for its own advantage, any information about the other provided in or pursuant to this Agreement, except to the extent that such information can be shown to have been generally available to the public other than as a result of a disclosure by such party or its Representatives.

7.3 Notices.

All notices, consents, waivers and other communications under this Agreement must be in writing and shall be deemed to have been duly given when (a) delivered by hand (with written confirmation of receipt), (b) sent by facsimile transmission (with written confirmation of receipt), provided that a copy is also mailed or (c) received by the addressee, if sent by a nationally recognized overnight delivery service (receipt requested), in each case to the addresses and facsimile numbers set forth below (or to such other addresses and facsimile numbers as a party may designate by notice to the other party):

7.4 Waiver.

Neither the failure to exercise, nor any delay in exercising, any right, power or privilege by either party under this Agreement shall operate as a waiver of such right, power, or privilege, and no single or partial exercise of any such right, power or privilege shall preclude any other or further exercise of such right, power or privilege or the exercise of any other right, power, or privilege. To the maximum extent permitted by applicable law, except as otherwise expressly provided herein, (a) no claim or right arising out of this Agreement can be discharged by one party, in whole or in part, by a waiver or renunciation of the claim or right unless in writing signed by the other party, (b) no waiver that may be given by a party shall be applicable except in the specific instance for which it is given and (c) no notice to or demand on one party shall be deemed to be a waiver of any obligation of such party or of the right of the party giving such notice or demand to take further action without notice or demand as provided in this Agreement.

7.5 Entire Agreement and Modification.

This Agreement supersedes all prior agreements between the parties with respect to its subject matter and constitutes a complete and exclusive statement of the terms of the agreement between the parties with respect to its subject matter. This Agreement may not be amended except by a written agreement executed by each of the parties.

7.6 Assignments; Successors; No Third-Party Rights.

Neither party may assign any of its rights under this Agreement without the prior consent of the other party; *provided* that Purchaser may assign its rights to any Affiliate of Purchaser without Seller's consent so long as Purchaser remains obligated to Seller pursuant to the terms and conditions of this Agreement and such Affiliate expressly assumes the obligations of Purchaser hereunder. Any attempted assignment of this Agreement or any of the rights hereunder in violation of the foregoing shall be voidable by the non-assigning party. Subject to the preceding sentences, this Agreement will apply to, be binding in all respects upon, and inure to the benefit of the successors and permitted assigns of the parties. Nothing expressed or referred to in this Agreement will be construed to give any Person other than the parties to this Agreement any legal or equitable right, remedy or claim under or with respect to this Agreement or any provision of this Agreement. This Agreement and all of its provisions and conditions are for the sole and exclusive benefit of the parties to this Agreement and their successors and permitted assigns.

7.7 Severability.

If any provision of this Agreement is held invalid or unenforceable by any court of competent jurisdiction, the other provisions of this Agreement shall remain in full force and effect. Any provision of this Agreement held invalid or unenforceable only in part or degree shall remain in full force and effect to the extent not held invalid or unenforceable.

7.8 Article and Section Headings; Construction.

The headings of Articles and Sections in this Agreement are provided for convenience only and will not affect its construction or interpretation. All references to "Article" or "Section" refer to the corresponding Article or Section of this Agreement. All words used in this Agreement will be construed to be of such gender or number as the circumstances require. Unless otherwise expressly provided, the word "including" does not limit the preceding words or terms. The terms and provisions of this Agreement represent the results of negotiations between the parties, each of which has been represented by counsel of its own choosing, and none of which has acted under duress or compulsion, whether legal, economic or otherwise. Accordingly, the terms and provisions of this Agreement shall be interpreted and construed in accordance with their usual and customary meanings, and the parties hereby waive the application, in connection with the interpretation and construction of this Agreement, of any rule of law to the effect that ambiguous or conflicting terms or provisions contained in this Agreement shall be interpreted or construed against the party whose attorney prepared the executed draft or any earlier draft of this Agreement.

7.9 Time of Essence.

With regard to all dates and time periods set forth or referred to in this Agreement, time is of the essence.

7.10 Enforcement.

Each party agrees that it will not bring any action against the other party hereto relating to this Agreement in any court other than the United States District Court for the District of Delaware or a Delaware state court located in Wilmington, Delaware. Each party (a) submits unconditionally to the exclusive jurisdiction of the state and federal courts located in Wilmington, Delaware, (b) waives and agrees not to assert any objection to the venue of any proceeding in any such court and agrees not to assert that any such court provides an inconvenient forum and (c) waives any right to trial by jury with respect to any claim or proceeding related to or arising out of this Agreement.

7.11 Governing Law.

This Agreement shall be governed by, and construed and enforced in accordance with, the laws of the State of Delaware without regard to conflicts of laws principles that would apply any other law.

7.12 Counterparts.

This Agreement may be executed in one or more counterparts, each of which shall be deemed to be an original copy of this Agreement and all of which, when taken together, shall be deemed to constitute one and the same agreement.

7.13 No Other Representations; Disclaimers.

NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED IN THIS AGREEMENT, IT IS THE EXPLICIT INTENT AND AGREEMENT OF EACH PARTY HERETO THAT SELLER IS MAKING NO REPRESENTATION OR WARRANTY WHATSOEVER, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED REPRESENTATION OR WARRANTY AS TO CONDITION, MERCHANTABILITY, USAGE, SUITABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE, WITH RESPECT TO THE INTEREST, BISON, ITS ASSETS, OR ANY PART THEREOF, EXCEPT THOSE REPRESENTATIONS AND WARRANTIES OF SELLER CONTAINED IN ARTICLE III HEREOF. IN PARTICULAR, SELLER MAKES NO REPRESENTATION OR WARRANTY TO PURCHASER WITH RESPECT TO ANY FINANCIAL PROJECTION, FORECAST OR FORWARD-LOOKING STATEMENT.

7.14 Waiver of Certain Damages.

IN NO EVENT WILL EITHER PARTY OR ITS SECURITY HOLDERS, DIRECTORS, OFFICERS, EMPLOYEES, MEMBERS, MANAGERS, AGENTS OR REPRESENTATIVES BE LIABLE TO THE OTHER PARTY OR ITS SECURITY HOLDERS, DIRECTORS, OFFICERS, EMPLOYEES, MEMBERS, MANAGERS, AGENTS OR REPRESENTATIVES UNDER THIS AGREEMENT AT ANY TIME FOR PUNITIVE, CONSEQUENTIAL, SPECIAL, OR INDIRECT LOSSES OR DAMAGES, INCLUDING LOSS OF PROFIT, LOSS OF REVENUE OR ANY OTHER SPECIAL OR INCIDENTAL DAMAGES, WHETHER IN CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY OR OTHERWISE.

Section 3: EX-10.2 (FIRST AMENDMENT TO AMENDED AND RESTATED REVOLVING CREDIT AGREEMENT)

Exhibit 10.2

FIRST AMENDMENT TO AMENDED AND RESTATED REVOLVING CREDIT AGREEMENT

THIS FIRST AMENDMENT TO AMENDED AND RESTATED REVOLVING CREDIT AGREEMENT (this "***Amendment***"), is made and entered into as of July 31, 2008, by and among NORTHERN BORDER PIPELINE COMPANY, a Texas general partnership (the "***Borrower***"), the several banks and other financial institutions from time to time party hereto (collectively, the "***Lenders***"), SUNTRUST BANK, in its capacity as Administrative Agent for the Lenders (the "***Administrative Agent***"), as issuing bank (the "***Issuing Bank***") and as swingline lender (the "***Swingline Lender***"), WACHOVIA BANK, NATIONAL ASSOCIATION, as syndication agent (the "***Syndication Agent***") and BMO CAPITAL MARKETS, CITIBANK, N.A., and MIZUHO CORPORATE BANK, LTD., as Co-Documentation Agents.

W I T N E S S E T H:

WHEREAS, the Borrower, the Lenders, the Swingline Lender, the Issuing Bank, the Administrative Agent and the other agents party thereto are parties to a certain Amended and Restated Revolving Credit Agreement, dated as of April 27, 2007 (as amended, restated, supplemented or otherwise modified from time to time, the "***Credit Agreement***"; capitalized terms used herein and not otherwise defined shall have the meanings assigned to such terms in the Credit Agreement), pursuant to which the Lenders and the Issuing Bank have made certain financial accommodations available to the Borrower;

WHEREAS, the Borrower has requested that the Lenders, the Swingline Lender, the Issuing Bank and the Administrative Agent amend certain provisions of the Credit Agreement, and subject to the terms and conditions hereof, the Lenders are willing to do so;

NOW, THEREFORE, for good and valuable consideration, the sufficiency and receipt of all of which are acknowledged, the Borrower, the Lenders, the Swingline Lender, the Issuing Bank and the Administrative Agent agree as follows:

1. **Amendments**.

(a) Section 1.1of the Credit Agreement is hereby amended by adding the following definition of Bison Pipeline Acquisition Agreement in the appropriate alphabetical order:

> "Bison Pipeline Acquisition Agreement" shall mean that certain acquisition agreement between the Borrower and TransCanada Pipeline USA Ltd. or its wholly owned subsidiary in form and substance satisfactory to the Administrative Agent and on terms substantially similar to those set out in the indication of interest letter dated as of July 28, 2008 between the Borrower and TransCanada Pipeline USA Ltd., pursuant to which the Borrower sells all of the membership interests it owns in Bison Pipeline LLC to TransCanada Pipeline USA Ltd. or its wholly owned subsidiary.

(b) Section 7.3(b) of the Credit Agreement is hereby amended by replacing subsection B of such Section in its entirety with the following:

(b) The Borrower shall not lease, sell or otherwise dispose of its assets to any other Person except: (i) sales of inventory and other assets in the ordinary course of business, (ii) leases, sales or other dispositions of its assets that, together with all other assets of Borrower previously leased, sold or disposed of (other than disposed of pursuant to this Section 7.3(b)) during the twelve-month period ending with the month in which any such lease, sale or other disposition occurs, do not constitute a substantial portion of the assets of Borrower, (iii) sales of assets which are concurrently leased back, (iv) dispositions of assets which are obsolete or no longer used or useful in the business of Borrower, (v) as permitted pursuant to Section 14 or Section 15 (to the extent it applies to a merger pursuant to Section 14) of the Borrower Partnership Agreement, and (vi) the sale of membership interests in Bison Pipeline LLC pursuant to the Bison Pipeline Acquisition Agreement.

(c) Section 7.5 of the Credit Agreement is hereby amended by replacing such Section in its entirety with the following:

Section 7.5 Restricted Payments. The Borrower will not, and will not permit its Subsidiaries to, declare or make, or agree to pay or make, directly or indirectly, any dividend on any class of its stock, or make any payment on account of, or set apart assets for a sinking or other analogous fund for, the purchase, redemption, retirement, defeasance or other acquisition of, any shares of common stock or Indebtedness subordinated to the Obligations of the Borrower or any Guarantee thereof or any options, warrants, or other rights to purchase such common stock or such Indebtedness, whether now or hereafter outstanding (each, a "Restricted Payment"), except for (i) dividends payable by the Borrower solely in shares of any class of its common stock, (ii) Restricted Payments made by any Subsidiary to the Borrower or to another Subsidiary, on at least a pro rata basis with any other shareholders if such Subsidiary is not wholly owned by the Borrower and other wholly owned Subsidiaries, (iii) if no Event of Default has occurred or would result therefrom, distributions on the partnership interests in accordance with the Borrower Partnership Agreement and (iv) if no Event of Default has occurred or would result therefrom, distributions of proceeds from the Bison Pipeline Acquisition Agreement.

(d) Section 7.7 of the Credit Agreement is hereby amended by replacing such Section in its entirety with the following:

Section 7.7 Transactions with Affiliates. Except as set forth in Schedule 7.7, the Borrower will not, and will not permit any of its Subsidiaries to, sell, lease or otherwise transfer any property or assets to, or purchase, lease or otherwise acquire any property or assets from, or otherwise engage in any other transactions with, any of its Affiliates, except (a) in the ordinary course of business at prices and on terms and conditions not less favorable to the Borrower or such Subsidiary than could be obtained on an arm's-length basis from unrelated third parties, (b) any Restricted Payment permitted by Section 7.5 and (c) pursuant to the Bison Pipeline Acquisition Agreement.

2. **Conditions to Effectiveness of this Amendment.** Notwithstanding any other provision of this Amendment and without affecting in any manner the rights of the Lenders hereunder, it is understood and agreed that this Amendment shall not become effective, and the Borrower shall have no rights under this Amendment, until the Administrative Agent shall have received each of the following documents:

(a) executed counterparts to this Amendment from the Borrower, each of the Guarantors and the Lenders; and

(b) the indication of interest letter dated as of July 28, 2008 between the Borrower and TransCanada Pipeline USA Ltd. substantially setting out the terms of the Bison Pipeline Acquisition Agreement.

3. **Representations and Warranties.** To induce the Lenders and the Administrative Agent to enter into this Amendment, the Borrower hereby represents and warrants to the Lenders and the Administrative Agent:

(a) The Borrower, each of its Subsidiaries and the Operator (i) is duly organized, validly existing and in good standing as a corporation, partnership or limited liability company under the laws of the jurisdiction of its organization, (ii) has all requisite power and authority to carry on its business as now conducted, and (iii) is duly qualified to do business, and is in good standing, in each jurisdiction where such qualification is required, except where a failure to be so qualified could not reasonably be expected to result in a Material Adverse Effect.

(b) The execution, delivery and performance by the Borrower of the Loan Documents are within such Person's organizational powers and have been duly authorized by all necessary organizational, and if required, shareholder, partner or member, action;

(c) The execution, delivery and performance by the Borrower of this Agreement and the other Loan Documents (i) do not require any consent or approval of, registration or filing with, or any action by, any Governmental Authority, except those as have been obtained or made and are in full force and effect, (ii) will not violate any Requirements of Law applicable to the Borrower and any of its Subsidiaries, or any judgment, order or ruling of any Governmental Authority, (iii) will not violate or result in a default under any indenture, agreement or other instrument binding on the Borrower or any of its Subsidiaries or any of its assets or give rise to a right thereunder to require any payment to be made by the Borrower or any of its Subsidiaries, in each case other than violations, defaults or rights which could not reasonably be expected to result in a Material Adverse Effect, and (iv) will not result in the creation or imposition of any Lien on any asset of the Borrower or any of its Subsidiaries, except Liens (if any) created under the Loan Documents;

(d) This Amendment has been duly executed and delivered by the Borrower, and constitutes valid and binding obligations of the Borrower, enforceable against it in accordance with its terms, except as may be limited by applicable bankruptcy, insolvency, reorganization, moratorium, or similar laws affecting the enforcement of creditors' rights generally and by general principles of equity; and

(e) After giving effect to this Amendment, the representations and warranties contained in the Credit Agreement and the other Loan Documents are true and correct in all material respects, and no Default or Event of Default has occurred and is continuing as of the date hereof.

4. **Effect of Amendment.** Except as set forth expressly herein, all terms of the Credit Agreement, as amended hereby, and the other Loan Documents shall be and remain in full force and effect and shall constitute the legal, valid, binding and enforceable obligations of the Borrower to the Lenders and the Administrative Agent. The execution, delivery and effectiveness of this Amendment shall not, except as expressly provided herein, operate as a waiver of any right, power or remedy of the Lenders under the Credit Agreement, nor constitute a waiver of any provision of the Credit Agreement. This Amendment shall constitute a Loan Document for all purposes of the Credit Agreement.

5. **Governing Law.** This Amendment shall be governed by, and construed in accordance with, the internal laws of the State of New York and all applicable federal laws of the United States of America.

6. **No Novation.** This Amendment is not intended by the parties to be, and shall not be construed to be, a novation of the Credit Agreement or an accord and satisfaction in regard thereto.

7. **Costs and Expenses**. The Borrower agrees to pay on demand all costs and expenses of the Administrative Agent in connection with the preparation, execution and delivery of this Amendment, including, without limitation, the reasonable fees and out-of-pocket expenses of outside counsel for the Administrative Agent with respect thereto.

8. **Counterparts.** This Amendment may be executed by one or more of the parties hereto in any number of separate counterparts, each of which shall be deemed an original and all of which, taken together, shall be deemed to constitute one and the same instrument. Delivery of an executed counterpart of this Amendment by facsimile transmission or by electronic mail in pdf form shall be as effective as delivery of a manually executed counterpart hereof.

9. **Binding Nature.** This Amendment shall be binding upon and inure to the benefit of the parties hereto, their respective successors, successors-in-titles, and assigns.

10. **Entire Understanding.** This Amendment sets forth the entire understanding of the parties with respect to the matters set forth herein, and shall supersede any prior negotiations or agreements, whether written or oral, with respect thereto.

[*Signature Pages To Follow*]

IN WITNESS WHEREOF, the parties hereto have caused this Amendment to be duly executed, under seal in the case of the Borrower and the Guarantors, by their respective authorized officers as of the day and year first above written.

Section 4: EX-31.1 (CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER PURSUANT TO SECTION 302)

Exhibit 31.1

CERTIFICATION

I, Russell K. Girling, certify that:

1. I have reviewed this quarterly report on Form 10-Q for the quarter ended September 30, 2008 of TC PipeLines, LP;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluations; and

   d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation, of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

FORWARD-LOOKING STATEMENTS

The statements in this report that are not historical information, including statements concerning plans and objectives of management for future operations, economic performance or related assumptions, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act. Forward-looking statements may include words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "forecast" and other words and terms of similar meaning. The absence of these words, however, does not mean that the statements are not forward-looking.

These statements reflect our current views with respect to future events, based on what we believe are reasonable assumptions. Certain factors that could cause actual results to differ materially from those contemplated in the forward-looking statements include:

- the ability of Great Lakes and Northern Border to continue to make distributions at their current levels;
- the impact of unsold capacity on Great Lakes and Northern Border being greater or less than expected;
- competitive conditions in our industry and the ability of our pipeline systems to market pipeline capacity on favorable terms, which is affected by:
  - future demand for and prices of natural gas;
  - competitive conditions in the overall natural gas and electricity markets;
  - availability of supplies of Canadian and U.S. natural gas;
  - availability of additional storage capacity;
  - weather conditions; and
  - competitive developments by Canadian and U.S. natural gas transmission companies;
- the Alberta (Canada) government's decision to implement a new royalty regime effective January 2009 may affect the amount of exploration and drilling in the Western Canada Sedimentary Basin;
- performance of contractual obligations by customers of our pipeline systems;
- operating hazards, natural disasters, weather-related delays, casualty losses and other matters beyond our control;
- the impact of current and future laws, rulings and governmental regulations, particularly FERC regulations, on us and our pipeline systems;
- our ability to control operating costs; and
- prevailing economic conditions, including conditions of the capital and equity markets and our ability to access these markets.

Other factors described elsewhere in this document, or factors that are unknown or unpredictable, could also have material adverse effects on future results. Please also read Item 1A. "Risk Factors." All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these factors. These forward-looking statements and information is made only as of the date of the filing of this report, and except as required by applicable law, we undertake no obligation to update these forward-looking statements and information to reflect new information, subsequent events or otherwise.

Item 1. Business

OVERVIEW

We are a publicly traded Delaware limited partnership formed in 1998 by TransCanada PipeLines Limited, a wholly-owned subsidiary of TransCanada Corporation (collectively referred to as TransCanada), to acquire, own and participate in the management of United States (U.S.) based pipeline systems. We have broadened our initial scope to energy infrastructure assets in North America. To date, our primary focus has been in the transportation of natural gas from the Western Canada Sedimentary Basin (WCSB) to a variety of downstream markets.

TC PipeLines, LP and its subsidiary limited partnerships and subsidiary limited liability company, including, TC PipeLines Intermediate Limited Partnership (TC PipeLines ILP), TC Tuscarora Intermediate Limited Partnership (TC Tuscarora ILP), TC GL Intermediate Limited Partnership (TC GL ILP) and TC Pipelines Tuscarora LLC (TC Tuscarora LLC), are collectively referred to herein as "TC PipeLines" or "the Partnership." In this report, references to "we", "us" or "our" collectively refer to TC PipeLines or the Partnership. The general partner of the Partnership is TC PipeLines GP, Inc. (TC PipeLines GP), a wholly-owned subsidiary of TransCanada.

Our strategic focus is on delivering stable, sustainable cash distributions to our unitholders and finding opportunities to increase cash distributions while maintaining a low risk profile. Our current portfolio of pipeline investments in the U.S. consists of:

- A 100 per cent general partner interest in Tuscarora Gas Transmission Company (Tuscarora).
- A 46.45 per cent general partner interest in Great Lakes Gas Transmission Limited Partnership (Great Lakes). The remaining 53.55 per cent interest in Great Lakes is held by TransCanada.
- A 50 per cent general partner interest in Northern Border Pipeline Company (Northern Border). The other 50 per cent interest is held by ONEOK Partners, L.P. (ONEOK Partners), a publicly traded limited partnership that is controlled by ONEOK, Inc.

We account for our interests in both Great Lakes and Northern Border as equity investments; therefore, we do not consolidate their financial results. TransCanada operates Great Lakes, Northern Border and Tuscarora (collectively, "our pipeline systems"). See Item 13. "Certain Relationships and Related Transactions, and Director Independence".

Recent Developments

Tuscarora 100 per cent Ownership - On December 31, 2007, we purchased the remaining two per cent interest in Tuscarora, increasing our ownership interest to 100 per cent. One per cent was purchased from a wholly-owned subsidiary of TransCanada, while the other one per cent was purchased from Tuscarora Gas Pipeline Co., a wholly-owned subsidiary of Sierra Pacific Resources, for a combined purchase price of $3.9 million.

Northern Border Operatorship - On April 1, 2007, TransCanada Northern Border Inc. (TCNB), a wholly-owned subsidiary of TransCanada, became the operator of Northern Border, pursuant to an operating agreement entered into with Northern Border in April 2006.

Great Lakes Acquisition - On February 22, 2007, the Partnership acquired a 46.45 per cent general partner interest in Great Lakes from El Paso Corporation. The total purchase price was $942.4 million, subject to certain closing adjustments, and included the indirect assumption of approximately $209.0 million of debt. The acquisition was partially financed through a private placement of 17,356,086 common units at $34.57 per common unit for gross proceeds of $600.0 million which closed concurrently with the acquisition. TransCan Northern Ltd. (TransCan Northern), a wholly-owned subsidiary of TransCanada, purchased 8,678,045 of the 17,356,086 common units issued for gross proceeds of $300.0 million. In addition, TC PipeLines GP maintained its two per cent general partner interest in the Partnership by contributing $12.6 million to the Partnership in connection with the private placement.

The Partnership funded the balance of the total consideration with a draw on its senior credit facility, which was amended and restated in connection with this transaction. TransCanada, which previously held a 50 per cent interest in Great Lakes, acquired the remaining 3.55 per cent interest simultaneously with the Partnership's acquisition of its interest. A wholly-owned subsidiary of TransCanada also became the operator of Great Lakes.

Other Developments

Tuscarora Increased Ownership – On December 19, 2006, the Partnership acquired an additional 49 per cent general partnership interest in Tuscarora for approximately $99.8 million. In connection with this transaction, TCNB became the operator of Tuscarora.

Implementation of New Rates, Northern Border – In November 2006, the Federal Energy Regulatory Commission (FERC) approved the uncontested settlement of Northern Border's rate case. Beginning January 1, 2007, Northern Border's overall rates were reduced compared with rates prior to the filing, by approximately 5 per cent. The settlement also provided for seasonal rates for short-term transportation service.

Tuscarora Cost and Revenue Study – The Public Utilities Commission of Nevada (PUCN) approved Tuscarora's rate adjustment, which was subsequently approved by the FERC on July 3, 2006. The settlement resulted in a firm transportation rate of $0.40/decatherm per day (dth-day) beginning June 1, 2006, or a 17 per cent reduction to the previous rates of $0.481/dth-day.

Northern Border Increased Ownership – In April 2006, TC PipeLines purchased a 20 per cent partnership interest in Northern Border from ONEOK Partners. After the transaction, TC PipeLines and ONEOK Partners each own a 50 per cent interest in Northern Border.

Business Strategies

Our strategic focus is on delivering stable, sustainable cash distributions to our unitholders and finding opportunities to increase cash distributions while maintaining a low risk profile.

Our business strategies to achieve these objectives are to seek opportunities to undertake accretive acquisitions and organic growth projects, and maximize the value of our existing portfolio of pipeline systems. Working with our partners, if any, in our pipeline systems, we seek to pursue policies that:

- Maximize the utilization of our pipeline systems;
- Expand our pipeline systems to meet market demand; and
- Continue to promote safe and efficient operations.

In addition, we intend to support the execution of our business strategies by:

- Maintaining a strong and balanced financial position to:
    - maintain a prudent level of available cash for distribution to unitholders;
    - fund future growth; and
    - broaden our asset base in a disciplined and focused manner;
- Investing in North American energy infrastructure assets that are underpinned by strong business fundamentals and provide stable cash flows; and
- Maximizing the benefits of our relationship with TransCanada.

Competitive Strengths

We believe that we are well positioned to execute our business strategies successfully because of the following competitive strengths:

- Our pipeline systems hold strategic market positions and comprise critical transportation links for the transportation of natural gas from the Alberta Hub to U.S. markets. The Alberta Hub is one of the largest natural gas hubs in North America. Additional Canadian natural gas supply sources may be available in the future if new pipeline projects associated with the Mackenzie Delta in Northern Canada and Alaska are constructed;
- With TransCanada as operator of our pipeline systems, we believe they are well positioned to continue to operate as trusted and experienced transportation providers to our customers; and
- The senior management team and the board of directors of our general partner have extensive industry experience and include some of the most senior officers of TransCanada. The management team plays a significant role in developing the strategic direction of our pipeline systems and their associated operations, and we believe our ability to execute our business strategies is enhanced by our affiliation with TransCanada.

Our Relationship with TransCanada Corporation

One of our principal strengths is our relationship with TransCanada. TransCanada is a major North American energy infrastructure company with approximately 36,500 miles of wholly-owned natural gas pipelines, interests in an additional 4,800 miles of natural gas pipelines, approximately 360 billion cubic feet (Bcf) of storage capacity and, including facilities that are under construction or in development, also owns, operates, and/or controls approximately 7,700 megawatts of power generation. TransCanada, a Canadian corporation, was founded in 1951 with the objective of transporting natural gas from Alberta to distant markets. Today, TransCanada is engaged in numerous aspects of the energy industry but is primarily focused on natural gas transmission and power generation services.

TransCanada provides access to a significant pool of management talent and strong relationships throughout the energy industry. We expect to pursue strategic acquisitions in a disciplined manner and to have the opportunity to participate jointly with TransCanada in reviewing potential acquisitions, including transactions that we would be unable to pursue on our own. Additionally, we may have the opportunity to make acquisitions directly from TransCanada in the future. TransCanada, however, is under no obligation to allow us to participate in any of its pipeline or energy infrastructure acquisitions, nor is TransCanada required to offer any of its assets to us.

As of December 31, 2007, we had 34,856,086 common units outstanding, of which 24,142,935 were held by the public and 10,713,151 were held by wholly-owned subsidiaries of TransCanada. In addition, TransCanada owns the Partnership's general partner which holds a two per cent general partner interest in the Partnership. As such, TransCanada receives distributions as a common unitholder, distributions related to its two per cent general partner interest, as well as general partner incentive distributions if quarterly cash distributions on the common units exceed levels specified in the partnership agreement. See Item 5. "Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities".

Our Pipeline Systems

All of our pipeline systems are rate regulated by the FERC. Operating revenue is derived from the transportation of natural gas. The maximum transportation rates that our pipeline systems may charge are approved by the FERC, and in most cases, established in a FERC proceeding known as a rate case. During a rate case, a determination is reached by the FERC, either through a hearing or a settlement, on the maximum rates permissible for transportation service that include the recovery of cost-based investment, operating expenses and a reasonable return for its investors. Once maximum rates are set, the pipeline system is not permitted to adjust the maximum rates to reflect changes in costs or contract demand until new rates are approved by the FERC, usually after a rate case has been filed. Each pipeline system's tariff is approved by the FERC and specifies the maximum rates, as well as the general terms and conditions for natural gas transportation service on its pipeline. The tariff also allows for services to be provided under negotiated and discounted rates. As a result, earnings and cash flow of each pipeline system depend on costs incurred; contracted capacity and transportation path; the volume of gas transported; and the ability of each system to sell capacity at acceptable rates.

Our pipeline systems' transportation contracts include specifications regarding the receipt and delivery of natural gas at points along the pipeline system. The type of transportation contract, either for firm or interruptible service, determines the basis upon which each customer is charged. Customers with firm service transportation agreements pay a fee known as a reservation charge to reserve pipeline capacity, regardless of use, for the term of their contracts. On the Great Lakes and Northern Border systems, firm service transportation customers also pay a variable usage fee known as a commodity charge or utilization fee that is based on distance and the volume of natural gas they transport. Transportation customers on the Northern Border system also pay a compressor usage surcharge, effective with the settlement of the 2005 rate case, resulting in new rates which were implemented January 1, 2007. Customers with interruptible service transportation agreements may utilize available capacity on a pipeline system after firm service transportation requests are satisfied. Interruptible service customers are assessed commodity charges (or utilization fees) based on distance and the volume of natural gas they transport. The table below provides information with respect to tariff revenue composition for each of our investments for the year ended December 31, 2007. The weighted average remaining contract life is determined as at January 31, 2008.

		Tariff Revenue Composition			
		Firm Contracts		Interruptible	
	Our Ownership Interest	Capacity Reservation Charges	Variable Usage Fees (1)	Contracts & Other Services	Weighted Average Remaining Contract Life (in years) (2)
Great Lakes	46.45%	97%	3%	0%	2.4
Northern Border	50%	91%	7%	2%	1.3
Tuscarora	100%	100%	n/a	0%	10.4

(1) Variable usage fees for Northern Border include a compressor usage surcharge which relate to both, firm and interruptible contracts. Tuscarora does not have any variable usage fees as part of their tariff.

(2) Weighted average remaining contract life is weighted based upon maximum daily quantity (MDQ) in the contracts.

The table below provides information on the average throughput of our pipeline systems:

Average Throughput (MMcf/d)	2007	2006	2005
Great Lakes (1)	2,270	2,236	2,360
Northern Border	2,247	2,246	2,277
Tuscarora	77	77	69

(1) The average throughput for Great Lakes includes periods prior to the February 22, 2007 acquisition by us of a 46.45 per cent general partner interest in Great Lakes.

Business of Great Lakes

Great Lakes is a Delaware limited partnership formed in 1990 and holds the assets formerly held by Great Lakes Transmission Company. The FERC certificate to construct its initial facilities was issued in 1967. Great Lakes is owned 46.45 per cent by us, with the remainder owned by TransCanada. Additionally, Great Lakes is operated by TransCanada.

The major policies of Great Lakes are established by the management committee of Great Lakes (GL Management Committee), which consists of up to six members, three of whom are designated by us and three of whom are designated by TransCanada. The GL Management Committee consists of four appointed members, two of whom are designated by us and two of whom are designated by TransCanada. All decisions by the GL Management Committee require unanimous consent. For the day to day management of Great Lakes' business, the GL Management Committee established an executive committee, which consists of up to three members: one Partnership GL Management Committee Member, one TransCanada GL Management Committee Member and the president of Great Lakes, who is a non-voting member (GL Executive Committee). The GL Executive Committee currently consists of two appointed members: one Partnership GL Management Committee member, and one TransCanada GL Management Committee member, who also serves as the president of Great Lakes. The GL Executive Committee has all of the powers of the GL Management Committee in the management of Great Lakes' business.

Great Lakes was originally constructed as an operational loop of the TransCanada Mainline Northern Ontario system. Great Lakes receives natural gas from TransCanada at the Canadian border near Emerson, Manitoba. Great Lakes' pipeline system extends across Minnesota, Northern Wisconsin and Michigan, and redelivers gas to TransCanada at the Canadian border at Sault Ste. Marie, Michigan and St. Clair, Michigan.

The Great Lakes mainline transmission pipeline has diameters ranging from 10 inches to 36 inches. The Great Lakes system consists of approximately 2,115 miles of pipeline with a design capacity of 2.3 Bcf per day at the Emerson Inlet. Great Lakes has 14 compressor stations with a total of 438,000 horsepower and measurement facilities to support the 55 receipt and delivery points for gas.

The original construction of Great Lakes' system occurred in 1967 and 1968. There have been numerous capacity system expansions since its original construction, the last one completed in 1998.

Business of Northern Border

Northern Border is a Texas general partnership formed in 1978. TC PipeLines, through its subsidiary TC PipeLines ILP, and ONEOK Partners, through its subsidiary ONEOK Partners Intermediate Limited Partnership, each own a 50 per cent interest in Northern Border.

Northern Border is managed by a management committee that consists of four members. Each partner designates two members, and we designate one of our members as Chairman. Each partner holds a 50 per cent voting interest on the management committee.

Northern Border extends from the Canadian border near Port of Morgan, Montana to a terminus near North Hayden, Indiana. Northern Border's transportation system provides pipeline access to the Midwestern U.S. from natural gas reserves in the WCSB. Additionally, Northern Border transports natural gas produced in the Williston Basin of Montana and North Dakota and the Powder River Basin of Wyoming and Montana and synthetic gas produced at the Dakota Gasification plant in North Dakota.

The pipeline system consists of 1,249 miles of pipeline with diameters ranging from 30 to 42 inches and a design capacity on the largest segment of the pipeline of 2,374 MMcf/d. Along the pipeline are 17 compressor stations with a total of 515,000 horsepower, measurement facilities to support the receipt and delivery of gas at ten receipt and 50 delivery points, four field offices and a microwave communication system with 50 tower sites.

Construction of Northern Border's system was initially completed in 1982, followed by expansions or extensions in 1991, 1992, 1998, 2001 and 2006.

Des Plaines Project – In February 2008, Northern Border filed with the FERC to construct, own and operate interconnect facilities, including a 1,600 horsepower compressor facility near Joliet, Illinois. It is estimated that this project will cost approximately $17 million. The targeted in-service date included in Northern Border's FERC certificate application is November 1, 2008; however, this schedule is dependent upon the receipt of timely regulatory approvals. The Des Plaines Project will be fully subscribed under long-term compression and transportation contracts, per the executed precedent agreement.

Business of Tuscarora

Tuscarora is a Nevada general partnership formed in 1993. We own 100 per cent of Tuscarora through two subsidiaries: TC Tuscarora ILP owns a 99 per cent general partner interest in Tuscarora, with TC Pipelines Tuscarora LLC owning the remaining one per cent general partner interest.

The Tuscarora system originates at an interconnection point with existing facilities of Gas Transmission Northwest Corporation (GTN), a wholly-owned subsidiary of TransCanada, near Malin, Oregon and runs Southeast through Northeastern California and Northwestern Nevada. The Tuscarora pipeline system terminates near Wadsworth, Nevada. Along its route, deliveries are made in Oregon, Northern California and Northwestern Nevada.

Tuscarora owns a 240-mile, 20-inch diameter, pipeline system with a design capacity of approximately 190 MMcf/d. Tuscarora has two compressor stations with a total of 11,400 horsepower, and measurement facilities at one receipt point and 16 delivery points.

The Tuscarora pipeline system was initially placed into service in 1995. Expansions or extensions were completed in 2001, 2002 and 2005.

2008 Expansion Project - In July 2007, Tuscarora received FERC approval for the construction of a compressor station and related facilities (Tuscarora 2008 Expansion Project). This approximately $20 million project is underpinned by a 22.5 year long-term contract to transport a maximum of 39 MMcf/d to Sierra Pacific Power Company (Sierra Pacific Power), a subsidiary of Sierra Pacific Resources, to supply its Tracy Combined Cycle Power Plant. The project is expected to be in service in March 2008.

NATURAL GAS INDUSTRY OVERVIEW

North American Demand

Over the last fifteen years, natural gas demand in North America has increased by approximately 15 Bcf/d. Demand for natural gas is expected to continue to grow across North America in 2008 and beyond. Demand for natural gas transportation service on a pipeline system is directly related to demand for natural gas in the markets served by that system. Factors that may impact demand for natural gas include:

- weather conditions;
- economic conditions;
- government regulation;
- the availability and price of alternative energy sources versus natural gas;
- natural gas storage inventories for the markets served;
- fuel conservation measures; and
- technological advances in fuel economy and energy generation devices.

Furthermore, factors that may impact demand for natural gas transportation service on any one system include:

- availability of natural gas supply at the pipeline system's receipt points;
- the ability and willingness of natural gas shippers to utilize the pipeline system over alternative pipelines;
- relative transportation rates; and
- the volume of natural gas delivered to markets from other supply sources and storage facilities.

The primary exposure to business risk for our pipeline systems occurs when our pipeline systems are marketing their available capacity, such as when existing transportation contracts expire and are subject to renegotiation. Customers with competitive alternatives analyze the market price spread or basis differential between receipt and delivery points along the pipeline to determine their expected gross margin. The anticipated margin and its variability are important determinants of the transportation rate customers are willing to pay. The customers on our pipelines include local distribution companies (LDCs), industrial companies, electric generation companies, natural gas producers, other natural gas pipelines and natural gas marketing and trading companies.

Our Pipeline Systems

Demand for transportation on Great Lakes has remained relatively constant over the last five years from LDCs and industrial customers, as well as for transportation of volumes back into Canada. Great Lakes' customer profile is becoming more heavily weighted towards natural gas marketing and trading companies and less towards producers and end users, such as industrial customers and LDCs.

Northern Border's contract life has been declining with a customer profile over the past five years mainly comprised of producers and natural gas marketing and trading companies. Northern Border delivers gas to highly competitive markets including interconnections with other major interstate natural gas pipelines and major market centers that serve winter heating and summer cooling demand, industrial load and storage areas to replenish inventory.

Demand on Tuscarora has steadily increased over the last several years due to increased demand from electric generation companies and LDCs.

Seasonality

North America

North American demand for natural gas is seasonal. In general, demand tends to be higher in the winter months for heating requirements and in the summer for power generation demand in support of cooling requirements. This effect can be somewhat mitigated in the spring and fall by the need for industries to replenish the amount of gas held in storage for future use.

The amount of uncontracted transportation capacity as well as transportation capacity under short term contracts on a pipeline system determines the extent that seasonal demand will impact a pipeline system's revenue. Pipeline systems that have a higher ratio of long-term contracts (contracts with a duration longer than one year) will be impacted less by seasonal demand. Conversely, for those pipeline systems with more available capacity, or operating under short term contracts, fluctuations in demand between seasons can impact revenue. Pipeline systems which have a tariff that includes seasonal rates for short term service may be able to mitigate the potential negative impact of seasonal fluctuations in demand.

Great Lakes - As a turbine based pipeline system, Great Lakes' design day capacity at the Emerson inlet is approximately 2.45 Bcf/day during the winter and 2.3 Bcf/day during the summer (system fuel requirements utilize a portion of this capacity). Though the winter flow capability is higher than the summer capability, the market demand for Great Lakes' long haul service can be higher in the summer when Great Lakes' system has less transportation capacity.

The demand for Great Lakes' long haul service is at its highest when natural gas is being delivered to natural gas storage areas. This is due to the approximate 880 Bcf of working gas storage located at the end of the Great Lakes system in Michigan and Ontario. The high demand period usually begins in the spring and extends through most of the summer. The transportation value across the Great Lakes pipeline system is at its highest in conjunction with storage fill requirements and electric power generation demand.

During the winter, there is also strong demand for Great Lakes services to meet the peak winter demand requirements of Northern Minnesota, Northern Wisconsin, and Michigan. These deliveries are met through Great Lakes short haul, long haul, and backhauls from storage. In fact, the aggregated peak day of all short haul and long haul flows occurs during the winter. Approximately ten per cent of Great Lakes' flows were contracted on a short-term basis in 2007.

Great Lakes experiences significant winter volatility in the utilization of its long haul contracts due to downstream constraints on the Union Gas Limited and TransCanada systems. As the demand for storage withdrawals from the Dawn, Ontario storage facility increases to serve points east, so does the level of downstream constraints which may reduce shippers' ability to use Great Lakes' transportation services to serve Eastern markets. This constraint may reduce demand for Great Lakes' capacity during certain winter periods.

Northern Border - Seasonal supply and demand fundamentals are a growing influence on Northern Border's system throughput due to increased competition for WCSB supply and growing competition from alternate sources of supply, such as the Rockies, in the markets served by Northern Border. Demand for Northern Border's transportation has traditionally been the strongest during peak winter months to serve heating demand and peak summer months to serve electric cooling demand and storage injection. Demand conditions in other market regions for Canadian supply can impact the transportation value of Northern Border's system. For example, the Western U.S. market is sensitive to precipitation levels, which impact hydroelectric power generation. During the summer, high temperatures combined with low hydroelectric power generation levels can increase demand for Canadian natural gas in this region and shift supply away from Northern Border's system.

Northern Border's rate case settlement established seasonal rates for short-term service of less than one year that provide for higher maximum rates during anticipated peak usage periods and lower maximum rates during anticipated periods of reduced demand. Approximately 34 per cent of Northern Border's design capacity was contracted on a short-term basis in 2007.

Tuscarora **-** Tuscarora is almost fully contracted under long-term contracts (approximately 97 per cent contracted with a weighted average remaining contract life of 10.4 years) at December 31, 2007. As a result, fluctuations in revenue due to seasonality are minimal.

Supply

North American Supply

The primary source of natural gas transported by all of our pipeline systems is the WCSB. For this reason, the continuous supply of Canadian natural gas is crucial to the long-term financial condition of our pipeline systems.

As of December 2006, the WCSB had remaining discovered natural gas reserves of approximately 57 trillion cubic feet and a reserves-to-production ratio of approximately nine years at current levels of production. Historically, additional reserves have continually been discovered to maintain the reserves-to-production ratio at close to nine years. It is expected that producers will continue to explore and develop new fields, particularly in the Northeastern and West central foothills regions of Alberta, Canada. There will also be significant activity aimed at unconventional resources such as coal bed methane.

The amount of WCSB natural gas available for export is the most significant factor affecting the volume of natural gas transported by our pipeline systems. The amount of WCSB natural gas available for export is determined by:

- WCSB natural gas production levels;
- demand for WCSB natural gas; and
- storage capacity for WCSB natural gas and demand for storage injection.

The extent to which WCSB natural gas available for export will be transported on each pipeline system is affected by:

- demand for WCSB natural gas in different U.S. consumer markets;
- available transportation capacity and related market pricing options on our competitors' pipelines;
- natural gas from other supply sources that can be transported to our customer markets;
- the natural gas market price spread between Alberta, Canada and the applicable market which reflects the relative supply and demand for WCSB natural gas in Canada and in the U.S.; and
- storage capacity in the U.S. and Canada and the related demand for storage injection.

Our Pipeline Systems

In 2007, approximately 84 per cent, 82 per cent and 92 per cent of the natural gas transported by Great Lakes, Northern Border and Tuscarora, respectively, was produced in Canada.

Great Lakes receives natural gas from interconnections with the TransCanada Mainline, ANR and from storage facilities. Gas received from the interconnection with the TransCanada Mainline at Emerson, Manitoba is WCSB supply. ANR is connected with numerous other pipelines, sourcing gas from virtually all North American basins as well as imported LNG.

Northern Border is also connected directly with other natural gas supplies. Natural gas produced in the Williston Basin of Montana and North Dakota and the Powder River Basin of Wyoming and Montana accounted for approximately 12 per cent of the natural gas Northern Border transported in 2007. The remaining natural gas transported by Northern Border was synthetic gas produced at the Dakota Gasification plant in North Dakota.

Tuscarora receives natural gas from its interconnection with GTN. GTN is interconnected with WCSB supply as well as natural gas from the Rockies and other U.S. basins.

CUSTOMERS, COMPETITION AND CONTRACTING

Customers

Great Lakes - The largest customer for Great Lakes' capacity is TransCanada, through its mainline pipeline system. This capacity is used by TransCanada customers to transport Western Canadian gas to Eastern Canadian and U.S. markets. ANR also holds capacity on Great Lakes to integrate its Michigan storage locations with its Wisconsin pipeline system. Various local distribution companies in Minnesota, Wisconsin and Michigan contract for transportation on Great Lakes to add Canadian gas to their supply mix. In addition, natural gas marketing and trading companies and producers hold transportation capacity on Great Lakes, either directly or through the capacity release program, and use Great Lakes' flexibility to deliver gas to markets, interconnecting pipelines and storage facilities along its system to maximize the value of their transportation contracts.

For the year ended December 31, 2007, TransCanada and ANR contracts represented approximately 45 per cent and three per cent, respectively, of Great Lakes' revenue. Great Lakes did not have any other customers contributing more than 10 per cent of their 2007 revenues.

Although Great Lakes has traditionally operated under long-term contracts, in response to changing market conditions, it markets its capacity on a shorter-term basis to a wide variety of customers, including producers, natural gas marketing and trading companies and LDCs in the U.S. and Canada.

Northern Border - Northern Border serves Midwestern U.S. markets for customers located throughout North America. Northern Border's customers include natural gas producers, marketing and trading companies, industrial facilities, local distribution companies and electric power generating plants.

For the year ended December 31, 2007, contracts with BP Canada Energy Marketing Corp., Nexen Marketing, U.S.A., Inc. and Cargill Inc. represented approximately 16 per cent, 14 per cent and 14 per cent, respectively, of Northern Border's revenue.

Tuscarora - Tuscarora serves markets in Oregon, Northern California and Northern Nevada. Deliveries are also made directly to the local gas distribution system of Sierra Pacific Power. Tuscarora's customers include power generation companies, local distribution companies, and a variety of industrial, commercial, and other companies.

For the year ended December 31, 2007, contracts with Sierra Pacific Power, Southwest Gas Company and Barrick Goldstrike Mines represented approximately 72 per cent, 13 per cent and 11 per cent, respectively, of Tuscarora's revenue.

Competition

Competition among natural gas pipelines is based primarily on transportation charges and proximity to natural gas supply areas and markets. Our pipeline systems face competition at both the supply and market ends of their pipeline systems where other pipelines access the same supply basins and/or deliver to markets served by our respective pipelines. Other pipelines access the WCSB supply basin and provide alternative routes for shippers to access markets served by our systems. Additionally, other pipelines bring supply sourced from other U.S. supply basins into our market areas.

Great Lakes - Great Lakes' principal business comes from its position as a link in the chain of pipelines that facilitate the transportation of natural gas from Western Canada to Eastern Canadian markets. Natural gas is transported by TransCanada from Western Canada to near Emerson, Manitoba, from Emerson to St. Clair, Michigan by Great Lakes, and from St. Clair to Dawn, Ontario and points further east by TransCanada. The primary competition for Great Lakes is the alternate route from Western Canada to Dawn on TransCanada's Mainline. Other routes from Western Canada to Ontario, Canada, are the Foothills Pipeline to Northern Border to Vector Pipeline route and the Alliance Pipeline to Vector Pipeline route. In addition, gas sourced from the U.S. Rockies, U.S. Mid-Continent and U.S. Gulf Coast can be delivered to Chicago and then to Ontario via the Vector Pipeline.

Northern Border - Northern Border's system competes for natural gas supply with other pipelines that transport Western Canadian natural gas to markets in the West, Midwest and East in North America, including TransCanada and Alliance Pipeline. Northern Border also competes for demand for transportation services with other pipelines that provide the markets it serves with access to natural gas storage facilities, and with alternate sources of supply, such as the Rockies, the Mid-Continent, the Permian Basin and the Gulf Coast, and LNG. A new competitor is the REX-West segment of the 1,679 mile Rockies Express Pipeline system from Rio Blanco County, Colorado to Monroe County, Ohio, which is increasing supply competition in Midwestern markets and could cause Northern Border to discount their rates or otherwise experience a reduction in their revenues.

Tuscarora - Shippers of natural gas from the WCSB have other options for transporting Canadian natural gas to markets throughout Canada and the U.S.

Tuscarora's primary competition in the Northern Nevada natural gas transmission market is with Paiute Pipeline Company (Paiute), owned by Southwest Gas Co. of Las Vegas, Nevada. Paiute interconnects with Northwest Pipeline Corp. at the Nevada-Idaho border and transports natural gas from British Columbia and the U.S. Rocky Mountain Basin to the Northern Nevada market.

Contracting

As existing contracts on our pipeline systems approach their expiration dates, efforts are made to extend and/or renew the contracts. The ability to extend and/or renew expiring contracts will depend upon competitive alternatives, the regulatory environment, and market and supply factors. The duration of new or renegotiated contracts will be affected by current market price spreads, transportation rates, competitive conditions, and judgments concerning future market trends and volatility. If market conditions are not favorable at the time of renewal, then transportation capacity may be uncontracted until market conditions become more favorable. Subject to regulatory requirements, our pipeline systems attempt to recontract or remarket their capacity at the maximum rates allowed under their tariffs. However, a pipeline system may discount capacity under certain circumstances in order to maximize revenue.

Great Lakes - Existing transportation contracts mature at varying times and in varying amounts of throughput capacity. Approximately four per cent of Great Lakes' contracted capacity expired in 2007 and 15 per cent will expire by December 31, 2008 in the absence of extensions or renewals of this capacity. In addition, ANR holds over 1,100 Mdth/d of capacity on Great Lakes that is expected to be renewed annually. For the year ended December 31, 2007, Great Lakes' average contracted capacity compared was 106 per cent.

Northern Border - Northern Border contracted 97 per cent of its design capacity on a firm basis in 2007, some of which was sold at a discount to maximize overall revenue on the Port of Morgan, Montana to Harper, Iowa portion of the pipeline. As of January 31, 2008, Northern Border had 37 per cent of its design capacity uncontracted beginning in the second quarter of 2008 and 48 per cent uncontracted by the end of 2008. Refer to Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" for further discussion.

Tuscarora **–** Tuscarora's average contracted capacity for the year ended December 31, 2007 was 96 per cent. Tuscarora has firm transportation contracts for 97 per cent of its available contracted capacity, as at January 31, 2008. This includes contracts held by Sierra Pacific Power for 69 per cent of the total available capacity, the majority of which expire on October 31, 2017.

REGULATORY ENVIRONMENT

Government Regulation

Great Lakes, Northern Border, and Tuscarora are regulated under the Natural Gas Act of 1938, Natural Gas Policy Act of 1978, and Energy Policy Act of 2005, which give the FERC jurisdiction to regulate virtually all aspects of their business, including:

- transportation of natural gas;
- rates and charges;
- terms of service and service contracts with customers, including creditworthiness requirements;
- certification and construction of new facilities;
- extension or abandonment of service and facilities;
- accounts and records;
- depreciation and amortization policies;
- the acquisition and disposition of facilities;
- initiation and discontinuation of services; and

- standards of conduct for business relations with certain affiliates.

Rate Case, Great Lakes – Great Lakes' last rate settlement expired on October 31, 2005 with no requirement to file a new rate proceeding or settlement.

Rate Case, Northern Border - In November 2006, the FERC approved the settlement with Northern Border's customers of its 2005 rate case to be effective January 1, 2007. The settlement established maximum long-term mileage-based rates and charges for transportation on Northern Border's system. Northern Border's overall rates were reduced, compared with rates prior to the filing, by approximately 5 per cent. The settlement also provided for seasonal rates for short-term transportation services. The settlement included a three-year moratorium on filing rate cases and participants challenging Northern Border's rates and requires that Northern Border file a rate case within six years from the date the new rates went into effect.

Cost and Revenue Study, Tuscarora - As a result of an obligation to file a cost and revenue study with the FERC pursuant to an agreement with the PUCN, Tuscarora, Sierra Pacific Power and the PUCN entered into settlement discussions with respect to a potential rate adjustment in 2006. In April 2006, the PUCN and Sierra Pacific Power agreed to a settlement with Tuscarora, which was subsequently approved by the FERC in July 2006. The settlement resulted in a firm transportation rate of $0.40/decatherm per day (dth-day) beginning June 1, 2006, or a 17 per cent reduction to the previous rate of $0.481/dth-day. The settlement also included a moratorium on all rate actions before the FERC by any party to the settlement until May 31, 2010, including rate actions related to expansion projects where Tuscarora proposes to price the expansion at the settlement rate.

Income Tax Allowance – In May 2005, the FERC issued a policy statement permitting the inclusion of an income tax allowance in the rates for partnership interests held by partners with an actual or potential income tax liability. On December 16, 2005, the FERC issued an order (the "December 16 Order") in its first case-specific review of the income tax allowance issue, reaffirming its tax allowance policy and directing the pipeline to provide certain evidence necessary to determine the income tax allowance. The FERC's new policy and the December 16 Order were appealed; however, the United States Court of Appeals for the D.C. Circuit subsequently denied the petitions for review and upheld the FERC's income tax allowance policy.

On December 26, 2007, the FERC issued an order (the "December 26 Order") which upheld and clarified its methodology for determining a partnership's income tax allowance in a rate case. In the future, partnerships will be required to prove (1) that its partners have an actual or potential income tax liability, which is determined by the partner's obligation to file a return that recognizes either a taxable gain or loss; (2) its partners' marginal Federal income tax rates, if higher than the commission's default rates of 28 per cent for individuals and 34 per cent for corporations, and (3) the partners' marginal state income tax rates. If the FERC were to disallow a portion of the income tax allowance for one of our pipeline systems in a rate case, it may cause its recourse rate to be set at a level that is different, or lower, than the level otherwise in effect.

Composition of Proxy Groups for Rates of Return Determinations - On July 19, 2007, the FERC issued a policy statement proposing to update its standards regarding the composition of proxy groups for determining the appropriate returns on equity for natural gas and oil pipelines. The proposed policy statement would permit the inclusion of master limited partnerships (MLPs) in the proxy group for purposes of calculating returns on equity under the Discounted Cash Flow (DCF) analysis. This is a change from its prior view that MLPs should not be included in the proxy group. Specifically, the FERC proposes that MLPs may be included in the proxy group provided that the distributions used in the DCF analysis are capped at the pipeline's reported earnings level. According to the proposed policy statement, the return on equity under the DCF analysis is calculated by adding the dividend or distribution yield (dividends divided by share/unit price) to the projected future growth rate of dividends or distributions. The future growth rate is weighted based on the long-term growth of the economy and the short-term growth for the pipeline. Additionally, the decision as to whether an MLP is included in the proxy group will be made on a case by case basis and will be based on stability of the MLP's earnings over a number of years. The FERC is currently evaluating the merit of the new policy statement through comments, reply comments and technical conferences. The FERC's proposed policy statement is subject to change based on comments filed and the outcome of the technical conference and therefore we cannot predict the impact or timing of the final policy statement.

Energy Affiliates – In November 2003, the FERC adopted revised standards of conduct which govern the relationships between regulated interstate natural gas pipelines and their energy affiliates. The new standards of conduct were designed to prevent interstate natural gas pipelines from giving any undue preference to their energy affiliates and ensure that transmission service is provided on a nondiscriminatory basis. In November 2006, the United States Court of Appeals for the District of Columbia vacated the FERC's order regarding standards of conduct for energy affiliates of natural gas pipelines and remanded the matter back to the FERC. On January 9, 2007, the FERC issued Order No. 690, Standards of Conduct for Transmission Providers (the Interim Rule) as the Commission's interim response to the Appeals Court decision. The Interim Rule reduced the application of the standards of conduct for interstate natural gas pipelines to the relationship between the pipelines and their marketing affiliates as defined in the FERC's rules that were in effect prior to the current regulations and made certain other revisions that were subject to the appeal. Requests for clarifications and in the alternative rehearing of the Interim Rule have been filed. On January 18, 2007, the FERC issued a Notice of Proposed Rulemaking, which if accepted as the final rule, will make permanent the Interim Rule's applicability of the standards of conduct to govern the relationship between interstate natural gas pipelines and their marketing affiliates.

Market Manipulation – In January 2006, the FERC issued a final rule making it unlawful for any entity subject to its jurisdiction that directly or indirectly purchases or sells natural gas, transportation services or electric energy to defraud, using any device, scheme or artifice; make untrue statements of a material fact or omit a material fact; or engage in any act, practice or course of business that operates as a fraud. The maximum civil penalty under these statutes is $1 million per day, per violation.

Environmental and Safety Matters

All of our pipeline systems' operations are subject to stringent and complex federal, state, and local laws and regulations governing environmental protection, including air emissions, water quality, wastewater discharges, and solid waste management. Such laws and regulations generally require natural gas pipelines to obtain and comply with a wide variety of environmental registrations, licenses, permits, and other approvals. These laws and regulations also can restrict or impact business activities in many ways, such as restricting the way wastes are handled or disposed of; requiring remedial action to mitigate pollution conditions that may be caused by its operations or that are attributable to former operators; and enjoining some or all of the operations of facilities deemed in non-compliance with permits issued pursuant to such environmental laws and regulations. Failure to comply with these laws and regulations may result in the assessment of administrative, civil and/or criminal penalties, the imposition of remedial requirements, and the issuance of orders enjoining future operations.

Pipeline Safety – Our pipeline systems are subject to U.S. Department of Transportation pipeline integrity management regulations. The Pipeline Safety Improvement Act requires pipeline companies to perform integrity assessments on pipeline segments that exist in densely populated areas or near specifically identified sites that are designated as high consequence areas. Pipeline companies are required to perform the integrity assessments within ten years of the date of enactment and perform subsequent integrity assessments on a seven-year cycle. All of our pipeline systems had performed the required assessments of 50 per cent of the highest priority high consequence areas by the end of 2007.

Waste Management – The operations of our pipeline systems generate hazardous and non-hazardous solid wastes that are subject to the federal Resource Conservation and Recovery Act (RCRA) and comparable state laws, which impose detailed requirements for the handling, storage, treatment and disposal of hazardous and non-hazardous solid wastes. For instance, RCRA prohibits the disposal of certain hazardous wastes on land without prior treatment, and requires generators of wastes subject to land disposal restrictions to provide notification of pre-treatment requirements to disposal facilities that are in receipt of these wastes. Generators of hazardous wastes also must comply with certain standards for the accumulation and storage of hazardous wastes, as well as with recordkeeping and reporting requirements applicable to hazardous waste storage and disposal activities.

Site Remediation - The Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), also known as "Superfund," and comparable state laws and regulations impose liability, without regard to fault or the legality of the original conduct, on certain classes of persons considered to be responsible for the release of hazardous substances into the environment. These persons include the current and past owner or operator of the site where the release occurred, and anyone who disposed or arranged for the disposal of a hazardous substance released

at the site. Under CERCLA, such persons may be subject to joint and several liability for the costs of cleaning up the hazardous substances that have been released into the environment, for damages to natural resources and for the costs of certain health studies.

Our pipeline systems currently own or lease properties that for many years have been used for the transportation and compression of natural gas. These properties and the substances released on them may be subject to CERCLA, RCRA and analogous state laws. Under such laws, our pipeline systems could be required to remove any previously disposed wastes, including waste disposed of by prior owners or operators; remediate contaminated property, including groundwater contamination, whether from prior owners or operators or other historic activities or spills; or perform remedial closure operations to prevent future contamination.

Air Emissions - The Clean Air Act (CAA) and comparable state laws regulate emissions of air pollutants from various industrial sources, including compressor stations, and also impose various monitoring and reporting requirements. Such laws and regulations may require pre-approval for the construction or modification of certain projects or facilities expected to produce air emissions or result in an increase of existing air emissions; application for, and strict compliance with, air permits containing various emissions and operational limitations; or the utilization of specific emission control technologies to limit emissions.

Water Discharges - The Clean Water Act (CWA) and analogous state laws impose strict controls with respect to the discharge of pollutants, including spills and leaks of oil and other substances, into waters of the United States. The discharge of pollutants into regulated waters is prohibited, except in accordance with the terms of a permit issued by the Environmental Protection Agency (EPA) or an analogous state agency. The CWA and regulations implemented thereunder also prohibit the discharge of dredge and fill material into regulated waters, including wetlands, unless authorized by an appropriately issued permit. Federal and state regulatory agencies may impose administrative, civil and criminal penalties for non-compliance with discharge permits or other requirements of the CWA and analogous state laws and regulations.

Activities on Federal Lands - Natural gas transportation activities are subject to the National Environmental Policy Act (NEPA). NEPA requires federal agencies, including the Department of the Interior, to evaluate major agency actions having the potential to significantly impact the environment. In the course of such evaluations, an agency will prepare an Environmental Assessment that assesses the potential direct, indirect and cumulative impacts of a proposed project and, if necessary, will prepare a more detailed Environmental Impact Statement that may be made available for public review and comment. The current activities of our pipeline systems, as well as any proposed plans for future activities, on federal lands are subject to the requirements of NEPA.

Other Laws and Regulations - Recent scientific studies have suggested that emissions of certain gases, commonly referred to as “greenhouse gases” and including carbon dioxide and methane, may be contributing to warming of the Earth’s atmosphere. In response to such studies, the U.S. Congress is actively considering legislation to reduce emissions of greenhouse gases. In addition, several states have declined to wait on Congress to develop and implement climate control legislation and have already taken legal measures to reduce emissions of greenhouse gases.

The Department of Homeland Security Appropriations Act of 2007 requires the Department of Homeland Security (DHS) to issue regulations establishing risk-based performance standards for the security of chemical and industrial facilities, including oil and gas facilities that are deemed to present “high levels of security risk.” The DHS is currently in the process of adopting regulations that will determine whether some of our pipeline facilities or operations will be subject to additional DHS-mandated security requirements.

Title to Properties

Our pipeline systems hold all rights, titles and interests in their pipeline system. With respect to real property, our pipeline systems own sites for compressor stations, meter stations, pipeline field offices, microwave towers and a corporate office. Our pipeline systems also derive interests from leases, easements, rights-of-way, permits and licenses from landowners or governmental authorities permitting land use for construction and operation of their pipelines.

Great Lakes - Approximately 74 miles of Great Lakes’ pipeline system are located within the boundaries of three Indian reservations: the Leech Lake Chippewa Indian Reservation and the Fond du Lac Chippewa Indian Reservation in Minnesota, and Bad River Chippewa Indian Reservation in Wisconsin. In 1968, Great Lakes obtained right-of-way across allotted lands located within each of the reservations boundaries. All of the allotted lands are subject to a 50 year easement granted by the Bureau of Indian Affairs (BIA) for and on behalf of the individual Indian owners or the reservations. These tracts are subject to right-of-way permits issued by the BIA that expire in 2018. Also, the Great Lakes pipeline crosses approximately 1000 ft. in two tracts in Lower Michigan, which are located within the Chippewa Indian Reservation, under perpetual easements.

Northern Border - Approximately 90 miles of Northern Border’s pipeline system are located within the boundaries of the Fort Peck Indian Reservation in Montana. In 1980, Northern Border entered into a pipeline right-of-way lease with the Fort Peck Tribal Executive Board on behalf of the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation. This pipeline right-of-way lease granted Northern Border the right to construct and operate its pipeline on certain tribal lands. The pipeline right-of-way lease expires in 2011, although Northern Border has an option to renew the pipeline right-of-way lease through 2061. In conjunction with obtaining a right-of-way across tribal lands located within the exterior boundaries of the Fort Peck Indian Reservation, Northern Border also obtained right-of-way across allotted lands located within the reservation boundaries. Most of the allotted lands are subject to a perpetual easement granted by the BIA for and on behalf of the individual Indian owners or obtained through condemnation. Several tracts are subject to a right-of-way grant that expires in 2015.

Insurance

The Partnership’s operations and activities are insured under TransCanada insurance programs, including property insurance, liability, automobile liability and workers compensation, in amounts which management believes are reasonable and appropriate.

Employees

The Partnership does not have any employees. In addition, none of our pipeline systems directly employ any of the persons responsible for managing or operating the pipeline systems or for providing them with services related to their day-to-day business affairs. Subsidiaries of TransCanada are the operators of all of our systems.

AVAILABLE INFORMATION

Our website is www.tcpipelineslp.com. We make available free of charge, on or through our website, our annual, quarterly and current reports, and any amendments to those reports, as soon as reasonably practicable after electronically filing or furnishing such reports with the SEC. Information contained on our web site is not part of this report.

Item 1A. Risk Factors

Cautionary Statement Regarding Forward-Looking Information

A number of statements made by TC PipeLines, LP in this Form 10-K filing are forward-looking and relate to, among other things, anticipated financial performance, business prospects, strategies, market forces and commitments. Much of this information appears in "Management's Discussion and Analysis of Financial Condition and Results of Operations" found herein. All forward-looking statements are based on the Partnership's current beliefs as well as assumptions made by and information currently available to the Partnership. These statements reflect the Partnership's current views with respect to future events. The Partnership assumes no obligation to update any such forward looking statements to reflect events or circumstances occurring after the date hereof. Words such as "anticipate," "believe," "estimate," "expect," "plan," "intend," "forecast," and similar expressions, identify forward-looking statements. By its nature, such forward-looking information is subject to various risks and uncertainties, including the risk factors discussed under Item 1A. "Risk Factors", which could cause TC PipeLines' actual results and experience to differ materially from the anticipated results or other expectations expressed in this

Form 10-K. Readers are cautioned not to place undue reliance on this forward-looking information, which is as of the date of this Form 10-K.

Each of the risks and uncertainties described below could lead to events or circumstances that may have a material adverse effect on our business, financial condition, results of operations and cash flows, including our ability to make distributions to our unitholders.

All of the information included in this report and any subsequent reports we may file with the SEC or make available to the public should be carefully considered and evaluated before investing in any securities issued by us.

The risks referred to herein refer to risks inherent in the Partnership and our pipeline systems.

RISKS INHERENT IN OUR BUSINESS

Cash distributions are dependent primarily on our cash flow, financial reserves and working capital borrowings.

Cash distributions are not dependent solely on our profitability, which is affected by non-cash items. Therefore, we may make cash distributions during periods when losses are reported and may not make cash distributions during periods when we report profits.

Factors that affect the actual amount of cash that we will have available for distribution to our unitholders include the following:

- the amount of cash set aside and the adjustment in reserves made by our general partner in its sole discretion;
- the level of capital expenditures made by our pipeline systems;
- the required principal and interest payments on our debt, retirement of debt and other liabilities including cost of acquisitions;
- the amount of cash distributed to us by the entities in which we own a non-controlling interest;
- our ability to borrow funds and access capital markets including the issuance of debt and equity securities; and
- restrictions on distributions contained in debt agreements.

We are dependent on our pipeline systems to generate sufficient cash to enable us to pay distributions.

The amount of cash we have quarterly to distribute to our common unitholders depends upon numerous factors, most of which are beyond our control and the control of our general partner, including:

- the rates charged and the volumes under contract for the transportation services of our pipeline systems;
- the quantities of natural gas available for transport and the demand for natural gas;
- legislative or regulatory action affecting demand for and supply of natural gas, and the rates our pipeline systems are allowed to charge in relation to their operating costs;
- the level of our pipeline systems' operating costs; and
- the creditworthiness of our pipeline systems' shippers.

If we do not identify opportunities for accretive growth through organic projects or acquisitions, or our pipeline systems do not successfully

complete expansion projects or make and integrate acquisitions that are accretive, our future growth may be limited.

A principal focus of our strategy is to continue to grow the cash distributions on our units by expanding our business. Our ability to grow depends on our ability to undertake acquisitions and organic growth projects, and the ability of our pipelines systems to complete expansion projects and make acquisitions that result in an increase in cash per unit generated from operations.

The long-term financial conditions of our pipeline systems are dependent on the continued availability of Western Canadian natural gas for import into the U.S. and the market demand for these volumes. Competition from pipelines that deliver natural gas from other supply sources to our pipeline systems' market areas could cause our pipeline systems to discount their rates or otherwise experience a reduction in their revenues.

The development of additional natural gas reserves requires significant capital expenditures by others for exploration and development drilling and the installation of production, gathering, storage, transportation and other facilities that permit natural gas to be produced and delivered to pipelines that interconnect with our pipeline systems. High exploration and production costs, low prices for natural gas, regulatory limitations such as royalty frameworks, or the lack of available capital for these projects could adversely affect the development of additional reserves in Western Canada and the production in the WCSB.

Volumes available for export out of the WCSB depend in part on the internal demand for Canadian natural gas which may increase as a result of increased demand for electricity generation and other industrial requirements, including the development of oil sands projects, which may require substantial amounts of natural gas. This higher internal demand may reduce the amount of gas available for import into the U.S. In the longer term, a portion of the Alberta hub gas supply may come from proposed gas pipelines from the North Slope of Alaska and the Mackenzie Delta of Canada and from the continued growth of coal bed methane projects. Cancellation or delays in the construction of such pipelines or such projects could adversely affect the volumes available for export in the long term.

If the availability of Alberta hub natural gas was to decline, existing shippers on our pipeline systems may be unlikely to extend their contracts and our pipeline systems may be unable to find replacement shippers for lost capacity. Furthermore, additional natural gas reserves may not be developed in commercial quantities and in sufficient amounts to fill the capacities of each of our pipeline systems.

In addition, existing customers may not extend their contracts if the cost of delivered natural gas from other producing regions into the markets served by our pipeline systems is lower than the cost of natural gas delivered by our pipeline systems. Our pipeline systems face increased competition from other pipelines that provide access for our shippers to capacity from the U.S. Rocky Mountain Region. The Rockies Express Pipeline owned by Rockies Express Pipeline LLC is being constructed in three phases and the planned terminus is in Clarington, Ohio. The first phase of The Rockies Express Pipeline is completed and currently delivering gas to interconnects in the Midwestern region. The Rockies Express Pipeline could result in significant downward pressure on natural gas prices in the Mid-continent Region, which could have an impact on Northern Border or Great Lakes.

An increase in competition in the key markets served by our pipeline systems could arise from new ventures or expanded operations from existing competitors. Our financial performance depends to a large extent on the capacity contracted on our pipeline systems. Decreases in the volumes transported by our pipeline systems, whether caused by supply or demand factors in the markets these pipeline systems serve, competition or otherwise, can directly and adversely affect our revenues and results of operations.

Our pipeline systems may not be able to maintain existing customers or acquire new customers when the current shipper contracts expire or customers may choose to recontract for shorter periods or at less than maximum rates.

The ability to extend and replace contracts on terms comparable to prior contracts or on any terms at all, could be adversely affected by factors, including:

- the supply of natural gas in Canada and the U.S.;
- competition from alternative sources of supply in the U.S.;
- competition from other pipelines, including their transportation rates or through their access to upstream supplies, as well as the proposed construction by other companies of additional pipeline capacity;
- the price of, and demand for, natural gas in markets served by our pipeline systems; and
- regulatory actions.

Ongoing changes in these factors and customers' ability to adjust to changing market conditions may cause Great Lakes and Northern Border to sell a significant portion of available capacity on a short-term basis. The weighted average life of Great Lakes' and Northern Border's contracts has generally declined over time. As of January 31,

2008, the weighted average remaining lives of Great Lakes' and Northern Border's contracts were 2.4 years and 1.3 years, respectively. Additionally, if the forward natural gas basis differentials do not support maximum rates, they may sell portions of their capacity at discounted rates. Any inability by Great Lakes and Northern Border to renew existing contracts at maximum rates or at all may have an adverse impact on their revenues and, as a result, cash distributions made to us.

If any significant shipper fails to perform its contractual obligations, our pipeline systems' respective cash flows and financial condition could be adversely impacted.

As of December 31, 2007, each of our pipeline systems has customers that account for more than ten per cent of their revenue. The loss of all or even a portion of the revenues associated with these customers, as a result of competition, creditworthiness or otherwise, could have a material adverse effect on the financial condition, results of operations and cash flows of our pipeline systems, unless they were able to contract for comparable volumes from other customers at favorable rates.

Sierra Pacific Power is Tuscarora's largest shipper, with firm contracts for approximately 69 per cent of its capacity. Sierra Pacific Resources and Sierra Pacific Power have non-investment grade credit ratings.

Our pipeline systems' transportation rates are subject to review and possible adjustment by federal regulators. If the FERC requires that our pipeline systems' tariff be changed, their respective cash flows may be adversely affected.

Under the Natural Gas Act (NGA), interstate transportation rates must be just and reasonable and not unduly discriminatory. Our pipeline systems are subject to extensive regulation by the FERC. The FERC's regulatory authority is not limited to but extends to matters including:

- transportation of natural gas;
- rates and charges;
- operating terms and conditions of service including creditworthiness requirements;
- types of services our pipeline systems may offer to their customers;
- construction of new facilities;
- extension or abandonment of service and facilities;
- accounts and records;
- depreciation and amortization policies;
- the acquisition and disposition of facilities;
- initiation and discontinuation of services; and
- standards of conduct business relations with certain affiliates.

Given the extent of regulation by the FERC and potential changes to regulations, we cannot predict:

- the likely federal regulations under which our pipeline systems will operate in the future;
- the effect that regulation will have on financial position, results of operations and cash flows of our pipeline systems and ourselves; or
- whether our cash flow will be adequate to make distributions to unitholders.

Great Lakes' last rate settlement expired on October 31, 2005 with no requirement to file a new rate proceeding or settlement. Northern Border and Tuscarora are currently operating under rate settlements which precludes a party to the rate settlements from bringing any rate actions prior to December 31, 2009 and May 31, 2010, respectively.

Action by the FERC on currently pending matters as well as matters arising in the future could adversely affect our pipeline systems' ability to establish or charge rates that would cover future increase in their costs, or even to continue to collect rates that cover current costs, including a reasonable return. We cannot assure unitholders that our pipeline systems will be able to recover all of their costs through existing or future rates.

Should our pipeline systems fail to comply with all applicable FERC administered statutes, rules, regulations and orders, our pipeline systems could be subject to substantial penalties and fines. Under the Energy Policy Act of 2005, the FERC has civil penalty authority under the NGA to impose penalties for current violations of up to $1 million per day for each violation.

Finally, we cannot give any assurance regarding the future regulations under which our pipeline systems will operate their natural gas transportation businesses, or the effect such regulations could ultimately have on our financial condition, results of operations and cash flows.

If our pipeline systems do not maintain their respective rate bases, the amount of revenue attributable to the return on the rate base they collect from their shippers will decrease over time.

Our pipeline systems are generally allowed to collect from their customers a return on their assets or "rate base" as reflected in their financial records as well as recover that rate base through depreciation. In the absence of additions to the rate base through capital expenditures, the amount they may collect from customers decreases as the rate base declines as a result of, among other things, depreciation and amortization.

Our pipeline systems' pipeline integrity programs may impose significant costs and liabilities.

The U.S. Department of Transportation rules require pipeline operators to develop integrity management programs to comprehensively evaluate their pipelines, and take measures to protect pipeline segments located in what the rules refer to as "high consequence areas." The final rule resulted from the enactment of the Pipeline Safety Improvement Act of 2002. At this time, we cannot predict the total costs of compliance with this rule because those costs will depend on the extent of the pipeline testing and any subsequent repairs found to be necessary. Our pipeline systems completed the required 50 per cent inspection of their respective pipelines highest priority highest consequence segments of lines by the end of 2007. The remaining 50 per cent of each pipeline's highest priority highest consequence segments of pipeline is required to be inspected, and repaired if necessary, by 2012. After that point, the inspection is required to reoccur every seven years. Once 100 per cent of our pipeline systems have been inspected, we will have a better understanding of the total ongoing costs. Our pipeline systems will continue their pipeline integrity testing programs to assess and maintain the integrity of the pipelines. The results of this work could cause our pipeline systems to incur significant and unanticipated capital and operating expenditures for repairs or upgrades deemed necessary to ensure the continued safe and reliable operation of their pipelines.

Our pipeline systems' operations are regulated by federal, state and local agencies responsible for environmental protection and operational safety.

Risks of substantial costs and liabilities are inherent in pipeline operations and each of our pipeline systems may incur substantial costs and liabilities in the future as a result of stricter environmental and safety laws, regulations, and enforcement policies and claims for personal or property damages resulting from our pipeline systems' operations. Moreover, new, stricter environmental laws, regulations or enforcement policies could be implemented that significantly increase our pipeline systems' compliance costs or the cost of any remediation of environmental contamination that may become necessary, and these costs could be material. For instance, the U.S. Congress is actively considering federal legislation to reduce emissions of "greenhouse gases" (including carbon dioxide and methane). Several states of the U.S. have already taken legal measures to reduce emissions of greenhouse gases, and many other nations, not including the U.S., have also already agreed to regulate emissions of greenhouse gases. As a result of the regulation of greenhouse gases in the U.S., we may incur increased compliance costs to (i) operate and maintain our facilities; (ii) install new emission controls on our facilities; and (iii) administer and manage any greenhouse gas emissions reduction program that may be applicable to our operations. In addition, laws and regulations to reduce emissions of greenhouse gases could affect the consumption of natural gas and consequently, adversely affect the demand for our pipeline services and the rates we are able to collect for those services. If our pipeline systems are not able to recover these costs, cash distributions to unitholders could be adversely affected.

Our pipeline systems' indebtedness may limit their ability to borrow additional funds, make distributions to us or capitalize on business opportunities.

As of December 31, 2007, Great Lakes, Northern Border and Tuscarora had $440 million, $616 million and $66 million of debt outstanding, respectively. Their respective levels of debt could have important consequences to Great Lakes, Northern Border and Tuscarora, including the following:

- their ability to obtain additional financing, if necessary, for working capital, capital expenditures, acquisitions or other purposes may be impaired or such financing may not be available on favorable terms;
- they will need a portion of their cash flow to make interest payments on the debt, reducing the funds that would otherwise be available for operations, future business opportunities and distributions to us, which will reduce our ability to make distributions to our unitholders;
- their debt level may make them more vulnerable to competitive pressures or a downturn in our business or the economy generally; and
- their debt level may limit their flexibility in responding to changing business and economic conditions.

Our pipeline systems' ability to service their debt will depend upon, among other things, future financial and operating performance, which will be affected by prevailing economic conditions and financial, business, regulatory and other factors, some of which are beyond their control.

In addition, under the terms of these financing arrangements, our pipeline systems are prohibited from making cash distributions during an event of default under their debt instruments. Under Great Lakes' debt instruments, Great Lakes has limitations on the level of indebtedness and has other restrictions, including a general prohibition against liens on pipeline facilities. Provisions in Northern Border's debt instruments limit its ability to incur indebtedness and engage in specific transactions. This could reduce its ability to capitalize on business opportunities that arise in the course of its business. Under Tuscarora's debt instruments, Tuscarora has granted a security interest in certain of its transportation contracts, which is available to noteholders upon an event of default. In addition, the Partnership's third party credit facility requires us to maintain certain financial ratios and contains restrictions on incurring additional debt and making distributions to partners.

We do not own a controlling interest in Great Lakes or Northern Border and we may be unable to cause certain actions to take place unless the other partner agrees. As a result, we will be unable to control the amount of cash we will receive from those operations and we could be required to contribute significant cash to fund our share of their operations. If we fail to make these contributions our ownership interest would be diluted.

The major policies of Great Lakes and Northern Border are established by each of their Management Committees.

Great Lakes' Management Committee consists of up to six members, three of whom are designated by us and three of whom are designated by TransCanada. Currently the committee consists of four appointed members, two of whom are designated by us and two of whom are designated by TransCanada. All decisions by the Management Committee require unanimous consent. An Executive Committee which consists of up to three members: one Partnership Committee Member, one TransCanada Committee Member and the Great Lakes' President, a non-voting member. Currently this committee consists of two appointed members: one Partnership Committee Member and one TransCanada Committee Member, who also serves as the Great Lakes president. The Executive Committee has all of the powers of the Management Committee in the management of Great Lakes' business. Because of these provisions, without the concurrence of TransCanada, we may be unable to cause Great Lakes to take or not to take certain actions, even though those actions may be in the best interest of us or Great Lakes.

Northern Border's Management Committee consists of four members, two of whom are designated by us and two of whom are designated by an affiliate of ONEOK. The Management Committee requires the affirmative vote of a majority of the partners' ownership interests to act on most activities. Certain activities require the unanimous consent of the committee, such as the filing of the application for regulatory authority to construct and operate new facilities and any changes to the cash distribution policy. Because of these provisions, without the concurrence of ONEOK, we may be unable to cause Northern Border to take or not to take certain actions, even though those actions may be in the best interest of us or Northern Border.

Great Lakes and Northern Border may require us to make additional capital contributions. Our funding of these capital contributions would reduce the amount of cash otherwise available for distribution to our unitholders. Additionally, in the event we elect not to, or are unable to, make a required capital contribution to Great Lakes or Northern Border, our ownership interest would be diluted.

Our pipeline systems' operations are subject to operational hazards and unforeseen interruptions, which could adversely affect their businesses and for which they may not be adequately insured.

Our pipeline systems' operations are subject to all of the risks and hazards typically associated with the operation of natural gas transportation pipeline systems. Operating risks include, but are not limited to, leaks, pipeline ruptures, the breakdown or failure of equipment or processes, and the performance of pipeline facilities below expected levels of capacity and efficiency. Other operational hazards and unforeseen interruptions include adverse weather conditions, accidents, the collision of equipment with our pipeline systems' pipeline facilities (which may occur if a third party were to perform excavation or construction work near these facilities), and catastrophic events such as explosions, fires, earthquakes, floods or other similar events beyond our pipeline systems' control. It is also possible that our pipeline systems' infrastructure facilities could be direct targets or indirect casualties of an act of terrorism. A casualty occurrence might result in injury or loss of life, extensive property damage or environmental damage. Liabilities incurred, and interruptions to the operation of our pipeline systems' facilities, for short or extended durations, caused by such an event, could reduce revenues generated by our pipeline systems and increase expenses, thereby impairing their ability to meet their obligations. Insurance proceeds may not be adequate to cover all liabilities or expenses incurred or revenues lost. Should one of our pipeline systems experience such an event, it may have an adverse impact on our results of operations and cash flow.

Our pipeline systems do not own all of the land on which their pipelines and facilities are located, which could disrupt their operations.

Our pipeline systems do not own all of the land on which their pipelines and facilities are located, and they are, therefore, subject to the risk of increased costs to maintain necessary land use. They obtain the rights to construct and operate certain of our pipelines and related facilities on land owned by third parties and governmental agencies for a specific period of time. Their loss of these rights, through their inability to renew right-of-way contracts or otherwise, or increased costs to renew such rights, could have a material adverse effect on their financial condition, results of operations and cash flows.

If we were to lose TransCanada's management expertise, we would not have sufficient stand-alone resources to operate.

TransCanada, through wholly-owned subsidiaries, is the operator of all our pipeline systems. We do not presently have sufficient stand-alone management resources to operate without services provided by TransCanada. Further, we would not be able to evaluate potential growth opportunities and successfully complete acquisitions without TransCanada's resources.

RISKS INHERENT IN AN INVESTMENT IN THE PARTNERSHIP

The Partnership's indebtedness may limit its ability to borrow additional funds, make distributions or capitalize on business opportunities.

As of December 31, 2007, the Partnership had $573 million of debt outstanding. This substantial level of debt could have important consequences to the Partnership including the following:

- our ability to obtain additional financing, if necessary, for working capital, acquisitions or other purposes may be impaired or such financing may not be available on favorable terms;
- we will need a portion of our cash flow to make interest payments on the debt, reducing the funds that would otherwise be available for operations, future business opportunities and distributions to our unitholders; and
- our debt level may limit our flexibility in responding to changing business and economic conditions.

Our ability to service our debt will depend upon, among other things, the future financial and operating performance of our pipeline systems, which will be affected by prevailing economic conditions and financial, business, regulatory and other factors, some of which are beyond our control.

In addition, our credit facilities contain restrictive covenants that may prevent us from engaging in certain transactions that we deem beneficial. These agreements require us to comply with various affirmative and negative covenants and maintaining certain financial ratios. There are restrictions and covenants with respect to:

- entering into mergers, consolidations and sales of assets;
- granting liens;
- material amendments to TC PipeLines' partnership agreement;
- incurring additional debt; and
- distributions to partners.

Any future debt may contain similar restrictions.

Increases in interest rates could materially adversely affect our business, results of operations, cash flows and financial condition.

As of December 31, 2007, TC PipeLines had approximately $507 million outstanding under the Senior Credit Facility, all of which was at variable interest rates. As a result, our results of operations, cash flows and financial condition could be materially adversely affected by significant increases in interest rates. From time to time, we may enter into interest rate swap arrangements, which decrease our exposure to variable interest rates. At December 31, 2007, approximately 80 per cent of the variable interest rate exposure related to the Partnership's $507 million of debt outstanding under the Senior Credit Facility was mitigated by fixed interest rate swap arrangements.

An increase in interest rates may also cause a corresponding decline in demand for equity investments, in general, and in particular for yield-based equity investments such as our common units. Any such reduction in demand for our common units resulting from other more attractive investment opportunities may cause the trading price of our common units to decline.

We do not have the same flexibility as other types of organizations to accumulate cash and equity to protect against illiquidity in the future.

Unlike a corporation, our partnership agreement requires us to make quarterly distributions to our unitholders of all available cash reduced by any amounts of reserves for commitments and contingencies, including capital and operating costs and debt service requirements. The value of our units and other limited partner interests may decrease in direct correlation with decreases in the amount we distribute per unit. Accordingly, if we experience a liquidity problem in the future, we may not be able to recapitalize by issuing more equity.

Unitholders have limited voting rights and do not control our general partner.

The general partner is our manager and operator. Unlike the holders of common stock in a corporation, holders of common units have only limited voting rights on matters affecting our business. Unitholders have no right to elect our general partner on an annual or other continuing basis. Our general partner may not be removed except by the vote of the holders of at least 66-$^{2}/_{3}$ per cent of the outstanding units and upon the election of a successor general partner by the vote of the holders of a majority of the outstanding common units. These required votes would include the votes of units owned by our general partner and its affiliates. The ownership of an aggregate of approximately 32 per cent of the outstanding units by our general partner and its affiliates has the practical effect of making removal of our general partner difficult.

In addition, the partnership agreement contains some provisions that may have the effect of discouraging a person or group from attempting to remove our general partner or otherwise change our management. If our general partner is removed as our general partner under circumstances where cause does not exist and units held by our general partner and its affiliates are not voted in favor of that removal:

- any existing arrearages in the payment of the minimum quarterly distributions on the common units will be extinguished; and
- our general partner will have the right to convert its general partner interests and its incentive distribution rights into common units or to receive cash in exchange for those interests.

These provisions may diminish the price at which the common units will trade under some circumstances.The partnership agreement also contains provisions limiting the ability of unitholders to call meetings of unitholders or to acquire information about our operations, as well as other provisions limiting the unitholders' ability to influence the manner or direction of management. Further, if any person or group other than our general partner or its affiliates or a direct transferee of our general partner or its affiliates acquires beneficial ownership of 20 per cent or more of any class of units then outstanding, that person or group will lose voting rights with respect to all of its units. As a result, unitholders will have limited influence on matters affecting our operations, and third parties may find it difficult to attempt to gain control of us, or influence our activities.

We may issue additional common units without unitholder approval, which would dilute existing unitholders' interest. In addition, issuance of additional common units may increase the risk that we will be unable to pay the full minimum quarterly distribution on all common units.

Our general partner can cause us to issue additional common units, without the approval of unitholders, in the following circumstances:

- under employee benefit plans, if any;
- upon conversion of the general partner interests and incentive distribution rights into common units as a result of the withdrawal of our general partner; or
- in connection with acquisitions or capital improvements that are accretive to our cash flow on a per unit basis.

In addition, we may issue an unlimited number of limited partner interests of any type without the approval of the unitholders. Based on the circumstances of each case, the issuance of additional common units or securities ranking senior to or on a parity with the common units may dilute the value of the interests of the then-existing holders of common units in the net assets of TC PipeLines and dilute the interests of unitholders in distributions by TC PipeLines. Our partnership agreement does not give the unitholders the right to approve the issuance by us of equity securities ranking junior to the common units at any time.

Any increase in the number of outstanding common units will increase the percentage of the aggregate minimum quarterly distribution payable to the common unitholders, which will in turn have the effect of increasing the risk that we will be unable to pay the minimum quarterly distribution in full on all the common units.

Unitholders may not have limited liability in some circumstances.

The limitations on the liability of holders of limited partner interests for the obligations of a limited partnership have not been clearly established in some states. If it were to be determined that:

- TC PipeLines had been conducting business in any state without compliance with the applicable limited partnership statute, or
- the right or the exercise of the right by the unitholders as a group to remove or replace our general partner, to approve some amendments to the partnership agreement or to take other action under the partnership agreement constituted participation in the “control” of TC PipeLines’ business,

then unitholders could be held liable in some circumstances for TC PipeLines’ obligations to the same extent as a general partner. In addition, under some circumstances a unitholder may be liable to TC PipeLines for the amount of a distribution for a period of three years from the date of the distribution.

Our general partner has a limited call right that may require unitholders to sell their common units at an undesirable time or price.

If our general partner and its affiliates, who currently own an aggregate of approximately 30.7 per cent of our common units, come to own 80 per cent or more of the common units, the general partner will have the right, which it may assign to any of its affiliates or us, to acquire all of the remaining common units held by unaffiliated persons at a price generally equal to the then current market price of the common units. As a consequence, unitholders may be required to sell their common units at a time when they may not desire to sell them or at a price that is less than the price they would desire to receive upon sale. Unitholders may also incur a tax liability upon a sale of their units.

Without the consent of each unitholder, Great Lakes, Northern Border or Tuscarora might be converted into a corporation, which would result in Great Lakes, Northern Border or Tuscarora, as the case may be, being subject to corporate income taxes.

If it becomes unlawful to conduct the business of Great Lakes, Northern Border or Tuscarora as a partnership and some other conditions are satisfied, the business and assets of Great Lakes, Northern Border or Tuscarora, as the case may be, will automatically be transferred to a corporation without the vote or consent of unitholders. Therefore, unitholders would not receive a proxy or consent solicitation statement in connection with that transaction. However, we believe that it is unlikely that circumstances requiring an automatic transfer will occur. A transfer to corporate form would result in Great Lakes, Northern Border or Tuscarora being subject to corporate income taxes and would likely be materially adverse to their, and therefore, our results of operations and financial condition.

TransCanada controls our general partner, which has sole responsibility for conducting our business and managing our operations. TC PipeLines GP, our general partner, and its affiliates have limited fiduciary responsibilities and may have conflicts of interest with respect to our partnership, and they may favor their own interests to the detriment of our unitholders.

The directors and officers of TC PipeLines GP and its affiliates have duties to manage TC PipeLines GP in a manner that is beneficial to its stockholders. At the same time, TC PipeLines GP has duties to manage our partnership in a manner that is beneficial to us. Therefore, TC PipeLines GP’s duties to us may conflict with the duties of its officers and directors to its stockholders. Such conflicts may include, among others, the following:

- decisions of TC PipeLines GP regarding the amount and timing of asset purchases and sales, cash expenditures, borrowings, issuances of additional common units and reserves in any quarter may affect the level of cash available to pay quarterly distributions to unitholders and TC PipeLines GP;
- under our partnership agreement, TC PipeLines GP determines which costs incurred by it and its affiliates are reimbursable by us;
- affiliates of TC PipeLines GP may compete with us in certain circumstances;
- TC PipeLines GP may limit our liability and reduce our fiduciary duties, while also restricting the remedies available to our unitholders for actions that might, without the limitations, constitute breaches of fiduciary duty. As a result of purchasing our units, unitholders are deemed to consent to some actions and conflicts of interest that might otherwise constitute a breach of fiduciary or other duties under applicable law;
- we do not have any employees and we rely solely on TC PipeLines GP and its affiliates to conduct our business, and
- TransCanada, through wholly-owned subsidiaries, is the operator of all of our pipeline systems. This operator role along with their ownership interest in Great Lakes may put TransCanada in a position to have to make decisions that may conflict as operator and/or owner of these systems.

Cost reimbursements due to our general partner may be substantial and could reduce our cash available for distribution.

Prior to making any distribution on the common units, we will reimburse our general partner and its affiliates, including officers and directors of the general partner, for all expenses incurred by our general partner and its affiliates on our behalf. During the year ended December 31, 2007, we paid fees and reimbursements to our general partner in the amount of $1.9 million. Our general partner in its sole discretion will determine the amount of these expenses. In addition, our general partner and its affiliates may provide us services for which we will be charged reasonable fees as determined by the general partner. The reimbursement of expenses and the payment of fees could adversely affect our ability to make distributions.

If we were found to be an "investment company" under the Investment Company Act of 1940, our contracts may be voidable and our offers of securities may be subject to rescission.

If we were deemed to be an unregistered "investment company" under the Investment Company Act, our contracts may be voidable and our offers of securities may be subject to rescission, and we may also be subject to other materially adverse consequences.

Our assets include a 46.45 per cent general partner interest in Great Lakes and a 50 per cent general partner interest in Northern Border. We could be deemed to be an "investment company" under the Investment Company Act if

these general partner interests constituted an "investment security", as defined in the Investment Company Act. If we were deemed to be an "investment company", then we would be required to be registered as an investment company under the Investment Company Act. In that case, there would be a substantial risk that we would be in violation of the Investment Company Act because of the practical inability to register under the Investment Company Act.

Tax Risks

The Internal Revenue Service ("IRS") could treat us as a corporation, which would substantially reduce the cash available for distribution to unitholders.

The anticipated after-tax benefit of an investment in us depends largely on our classification as a partnership for federal income tax purposes. We have not requested, and do not plan to request, a ruling from the IRS on this or any other matter affecting us.

If we were treated as a corporation for federal income tax purposes, we would pay federal income tax on our income at the corporate tax rate, which is currently a maximum of 35 per cent. Distributions would generally be taxed again to unitholders as corporate distributions, and no income, gains, losses, deductions or credits would flow through to unitholders. Because a tax would be imposed upon us as an entity, the cash available for distribution to unitholders would be substantially reduced. Our treatment as a corporation would result in a material reduction in the anticipated cash flow and after-tax return to unitholders and thus would likely result in a substantial reduction in the value of the common units.

Current law may change so as to cause us to be taxable as a corporation for federal income tax purposes or otherwise to be subject to entity level taxation. Our partnership agreement provides that, if a law is enacted or existing law is modified or interpreted in a manner that subjects us to taxation as a corporation or otherwise subjects us to entity level taxation for federal, state or local income tax purposes, then specified provisions of the partnership agreement relating to distributions will be subject to change. These changes would include a decrease in distributions to reflect the impact of that law on us.

If our pipeline systems were to become subject to a material amount of entity level taxation for state tax purposes, then our pipeline systems' operating cash flow and cash available for distribution to us and for other business needs would be reduced.

Our pipeline systems are partnerships or tax flow through entities, and as such they generally are not subject to income tax at the entity level. Several states are evaluating a variety of ways to subject partnerships to entity level taxation. One prevalent form of such taxation is a tax on gross receipts apportioned to a state. Imposition of such a tax on our pipeline systems by any state will reduce the cash available for distribution to us and for other business needs by our pipeline systems.

We have not requested an IRS ruling with respect to our tax treatment.

We have not requested a ruling from the IRS with respect to any matter affecting us. The IRS may adopt positions that differ from the positions we take. It may be necessary to resort to administrative or court proceedings in an effort to sustain some or all of our counsel's conclusions or the positions we take. Any contest with the IRS may materially and adversely impact the market for our common units and the price at which the common units trade. In addition, the costs of any contest with the IRS will be borne directly or indirectly by some or all of the unitholders and the general partner.

Unitholders may be required to pay taxes on income from us even if they receive no cash distributions.

Unitholders may be required to pay federal income taxes and, in some cases, state and local income taxes on their allocable share of our income, whether or not they receive cash distributions from us. Unitholders may not receive cash distributions equal to their allocable share of our taxable income or even the tax liability that results from that income.

Tax gains or losess on the disposition of common units could be different than expected.

If unitholders sell their common units, they will recognize a gain or loss equal to the difference between the amount realized and their tax basis in those common units. Prior distributions in excess of the total net taxable income that unitholders were allocated for a common unit which decreased their tax basis in that common unit will, in effect, become taxable income if the common unit is sold at a price greater than their tax basis in that common unit, even if the price is less than the original cost. A substantial portion of the amount realized, whether or not representing a gain, may be ordinary income to unitholders. If the IRS successfully contests some conventions we use, unitholders could recognize more gain on the sale of common units than would be the case under those conventions without the benefit of decreased income in prior years.

Investors other than individuals who are U.S. residents may have adverse tax consequences from owning common units.

An investment in common units by tax-exempt entities, regulated investment companies and foreign persons raises issues unique to these persons. For example, virtually all of our income allocated to organizations exempt from federal income tax, including individual retirement accounts and other retirement plans, will be unrelated business taxable income and will be taxable to them. Net income derived from the ownership of certain publicly traded partnerships is treated as qualifying income to a regulated investment company. Distributions to foreign persons will be reduced by withholding taxes. Foreign persons will be required to file federal income tax returns and pay tax on their share of our taxable income.

We have registered as a "tax shelter." This may increase the risk of an IRS audit of TC PipeLines or a unitholder.

We have registered as a "tax shelter" with the Secretary of the Treasury. As a result, we may be audited by the IRS and tax adjustments could be made. Any unitholder owning less than a one per cent interest in us has a very limited right to participate in the income tax audit process. Further, any adjustments in our tax returns will lead to adjustments in unitholders' tax returns and may lead to audits of their tax returns and adjustments of items unrelated to us. Unitholders would bear the cost of any expenses incurred in connection with an examination of their personal tax return.

We treat a purchaser of common units as having the same tax benefits as the seller. A successful IRS challenge could adversely affect the value of the common units.

Because we cannot match transferors and transferees of common units, we have adopted depreciation and amortization conventions that do not conform to all aspects of specified Treasury regulations. A successful challenge to those conventions by the IRS could adversely affect the amount of tax benefits available to unitholders or could affect the timing of tax benefits or the amount of gain from the sale of common units and could have a negative impact on the value of the common units or result in audit adjustments to unitholders' tax returns.

We have adopted certain valuation methodologies that may result in a shift of income, gain, loss and deduction between the general partner and the unitholders. The IRS may challenge this treatment, which could adversely affect the value of the common units.

For income tax purposes and pursuant to the Partnership Agreement, when we issue additional units or engage in certain other transactions, we determine the fair market value of our assets and allocate any unrealized gain or loss attributable to our assets to the capital accounts of our unitholders and our general partner. If our valuation methodology were not sustained upon an IRS challenge, there may be a shift of income, gain, loss and deduction between certain unitholders and the general partner, which may be unfavorable to such unitholders. Our valuation methodology is also used in certain computations and allocations relating to Section 743(b) adjustments and Section 751 deemed sale tax effects.

A successful IRS challenge to these methods, calculations or allocations could adversely affect the amount of taxable income or loss being allocated to our unitholders. It also could affect the amount of gain from our

unitholders' sale of common units and could have a negative impact on the value of the common units or result in audit adjustments to our unitholders' tax returns without the benefit of additional deductions.

The sale or exchange of 50 per cent or more of the total interest in our capital and profits will result in the termination of our partnership for federal income tax purposes.

We will be considered to have terminated for federal income tax purposes if there is a sale or exchange of 50 per cent or more of the total interests in our capital and profits within a 12-month period. Our termination would, among other things, result in the closing of our taxable year for all unitholders and could result in a deferral of depreciation deductions allowable in computing our taxable income.

Unitholders will likely be subject to state and local taxes as a result of an investment in units.

In addition to federal income taxes, unitholders will likely be subject to other taxes, including state and local taxes, unincorporated business taxes and estate, inheritance or intangible taxes that are imposed by the various jurisdictions in which we do business or own property. Unitholders may be required to file state and local income tax returns and pay state and local income taxes in some or all of the jurisdictions in which we do business or own property and may be subject to penalties for failure to comply with those requirements. It is the unitholders' responsibility to file all required United States federal, state and local tax returns. Counsel has not rendered an opinion on the state or local tax consequences of an investment in us.

Item 1B. Unresolved Staff Comments

None.

Item 2 Properties

Excluding properties held directly by Tuscarora, TC PipeLines does not hold the right, title or interest in any properties.

Properties of Great Lakes Gas Transmission Limited Partnership, Northern Border Pipeline Company and Tuscarora Gas Transmission Company

See Item 1. "Business " for a description of our pipeline systems' properties, their utilization, and how each property is held.

Item 3. Legal Proceedings

Our pipeline systems are parties to various legal actions arising in the normal course of business. Management believes the disposition of all known outstanding legal actions will not have a material adverse impact on the Partnership's financial condition, results of operations or cash flows.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of security holders, through solicitation of proxies or otherwise, during the year ended December 31, 2007.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The common units representing limited partner interests in the Partnership were issued pursuant to an initial public offering on May 28, 1999 and a private placement on February 22, 2007. The common units are quoted on the NASDAQ Global Select Market and trade under the symbol "TCLP."

On February 22, 2007, the Partnership completed a private placement of 17,356,086 common units at $34.57 per common unit for gross proceeds of $600.0 million. Net of issuing costs, the proceeds from the private placement were $594.4 million, which were used to fund a portion of the cash consideration for the Partnership's acquisition of a 46.45 per cent general partner interest in Great Lakes that closed concurrently with the private placement. TransCanada Northern purchased 8,678,045 of the 17,356,086 common units issued for gross proceeds of $300.0 million. In addition, TC PipeLines GP maintained its two per cent general partner interest in the Partnership by contributing $12.6 million to the Partnership in connection with the private placement.

The following table sets forth, for the periods indicated, the high and low sale prices per common unit, as reported by the NASDAQ Global Select Market, and the amount of cash distributions per common unit declared with respect to the corresponding periods. Cash distributions are paid within 45 days after the end of each quarter to unitholders of record as of the record date.

	Price Range		Cash Distributions Declared per Common Unit
	High	Low	
2007			
First Quarter	**$ 37.54**	**$ 35.29**	**$ 0.600**
Second Quarter	**$ 42.83**	**$ 36.34**	**$ 0.650**
Third Quarter	**$ 40.69**	**$ 32.98**	**$ 0.655**
Fourth Quarter	**$ 37.35**	**$ 35.50**	**$ 0.660**
2006			
First Quarter	$ 35.14	$ 32.60	$ 0.575
Second Quarter	$ 34.65	$ 31.54	$ 0.575
Third Quarter	$ 33.50	$ 30.41	$ 0.575
Fourth Quarter	$ 36.00	$ 30.00	$ 0.600

As of February 28, 2008, there were 96 registered holders of common units and approximately 13,800 beneficial owners of common units, including common units held in street name.

The Partnership currently has 34,856,086 common units outstanding, of which 24,142,935 are held by the public, 8,678,045 are held by TransCan Northern, and 2,035,106 are held by TC PipeLines GP. The common units represent an aggregate 98 per cent limited partner interest and the general partner interest represents an aggregate two per cent general partner interest in the Partnership.

The general partner receives two per cent of all cash distributions in regards to its general partner interest and is also entitled to incentive distributions as described below. The holders of common units (collectively referred to as unitholders) receive the remaining portion of the cash distribution. The Partnership's quarterly cash distributions to its unitholders comprise all of its Available Cash. Available Cash is defined in the partnership agreement and generally means, with respect to any quarter of the Partnership, all cash on hand at the end of a quarter less the amount of cash reserves that are necessary or appropriate, in the reasonable discretion of the general partner, to:

- provide for the proper conduct of the business of the Partnership (including reserves for future capital expenditures and for anticipated credit needs);
- comply with applicable laws or any Partnership debt instrument or agreement; or
- provide funds for cash distributions to unitholders and the general partner in respect of any one or more of the next four quarters.

The general partner receives incentive distributions if the amount distributed with respect to any quarter exceeds the minimum quarterly distribution of $0.45 per common unit. Under the incentive distribution provisions, the general partner receives 15 per cent of amounts distributed in excess of $0.45 per common unit, 25 per cent of amounts distributed in excess of $0.5275 per common unit, and 50 per cent of amounts distributed in excess of $0.69 per common unit, provided the balance has been first distributed to unitholders on a pro rata basis. The amounts that trigger incentive distributions at various levels are subject to adjustment in certain events, as described in the partnership agreement.

In 2007, the Partnership made cash distributions to unitholders and the general partner that amounted to $86.7 million compared to $43.5 million in 2006. These payments represented $0.60 per common unit for the quarter ended December 31, 2006, $0.65 per common unit for the quarter ended March 31, 2007, $0.655 for the quarter ended June 30, 2007 and $0.66 per common unit for the quarter ended September 30, 2007. On February 14, 2008, the Partnership paid a cash distribution of $25.6 million to unitholders and the general partner, representing a cash distribution of $0.665 per common unit for the quarter ended December 31, 2007. The distribution was allocated in the following manner: $23.2 million to the holders of common units as of the close of business on January 31, 2008 (including $1.4 million to the general partner as holder of 2,035,106 common units and $5.8 million to TransCan Northern as holder of 8,678,045 common units), $1.9 million to the general partner as holder of incentive distribution rights, and $0.5 million to the general partner in respect of its two per cent general partner interest.

Item 6. Selected Financial Data

The selected financial data should be read in conjunction with the financial statements, including the notes thereto, and Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations."

	Year Ended December 31				
(millions of dollars, except per unit amounts)	**2007(1)**	**2006(2)**	**2005**	**2004**	**2003**
Income Data					
Equity income from investment in Great Lakes	**49.0**	—	—	—	—
Equity income from investment in Northern Border	**61.2**	56.6	45.7	50.0	44.5
Equity income from investment in Tuscarora	—	5.9	7.5	7.5	5.3
Transmission revenues	**27.2**	0.9	—	—	—
Financial charges, net and other	**(33.8)**	(15.8)	(1.0)	(0.5)	(0.1)
Net income	**89.0**	44.7	50.2	55.1	48.0
Basic and diluted net income per unit	**$ 2.51**	$ 2.39	$ 2.70	$ 2.99	$ 2.63
Cash Flow Data					
Cash distribution paid per unit	**$ 2.565**	$ 2.325	$ 2.300	$ 2.275	$ 2.175
Balance Sheet Data (at December 31)					
Total assets	**1,492.6**	777.8	315.7	332.1	288.1
Long-term debt (including current maturities)	**573.4**	468.1	13.5	36.5	5.5
Partners' equity	**900.1**	303.9	301.6	294.9	282.0

(1) TC PipeLines acquired a 46.45 per cent interest in Great Lakes on February 22, 2007. The equity method is used to account for the Partnership's investment in Great Lakes.

(2) TC PipeLines accounted for its investment in Tuscarora using the equity method until December 19, 2006 and began consolidating Tuscarora's operations upon acquisition of the additional 49 per cent general partner interest.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discusses the results of operations and liquidity and capital resources of TC PipeLines, along with those of Great Lakes, Northern Border and Tuscarora (together "our pipeline systems") as a result of the Partnership's ownership interests.

The following discussions of the financial condition and results of operations of the Partnership and its pipeline systems should be read in conjunction with the financial statements and notes thereto of the Partnership, Great Lakes and Northern Border included elsewhere in this report. See Item 8. "Financial Statements and Supplementary Data". For more detailed information regarding the basis of presentation for the following financial information, see the notes to the financial statements of the Partnership, Great Lakes and Northern Border. All amounts are stated in U.S. dollars.

PARTNERSHIP OVERVIEW

TC PipeLines was formed in 1998 as a Delaware limited partnership. TC PipeLines was formed by TransCanada PipeLines Limited, a wholly-owned subsidiary of TransCanada Corporation (collectively referred to herein as TransCanada), to acquire, own and participate in the management of energy infrastructure assets in North America. Our strategic focus is on delivering stable, sustainable cash distributions to our unitholders and finding opportunities to increase cash distributions while maintaining a low risk profile.

TC PipeLines, LP and its subsidiaries are collectively referred to herein as "TC PipeLines" or "the Partnership." In this report, references to "we", "us" or "our" collectively refer to TC PipeLines or the Partnership. The general partner of the Partnership is TC PipeLines GP, Inc., a wholly-owned subsidiary of TransCanada.

We own a 46.45 per cent general partner interest in Great Lakes, which we acquired on February 22, 2007 from El Paso Corporation. The remaining 53.55 per cent general partner interest in Great Lakes is held by TransCanada.

We own a 50 per cent general partner interest in Northern Border, including a 20 per cent interest acquired on April 6, 2006. The remaining 50 per cent general partner interest in Northern Border is held by ONEOK Partners, a publicly traded limited partnership that is controlled by ONEOK, Inc.

We also own 100 per cent of Tuscarora. The Partnership acquired a 49 per cent interest from a wholly-owned subsidiary of TransCanada in September 2000. An additional 49 per cent was acquired from Tuscarora Gas Pipeline Co., a wholly-owned subsidiary of Sierra Pacific Resources, on December 19, 2006. On December 31, 2007, the Partnership acquired the remaining two per cent general partner interest in Tuscarora, with one per cent purchased from a wholly-owned subsidiary of TransCanada and the other one per cent purchased from Tuscarora Gas Pipeline Co.

The Partnership's general partner interests in Great Lakes, Northern Border and Tuscarora represent its only material assets at December 31, 2007. As a result, the Partnership is dependent upon Great Lakes, Northern Border and Tuscarora for all of its available cash.

Great Lakes Overview

Great Lakes is a Delaware limited partnership formed in 1990. Great Lakes' operating revenue is derived from transportation of natural gas. Great Lakes was originally constructed as an operational loop of the TransCanada Mainline Northern Ontario system. Great Lakes receives natural gas from TransCanada at the Canadian border near Emerson, Manitoba and extends across Minnesota, Northern Wisconsin and Michigan, and redelivers gas to TransCanada at the Canadian border at Sault Ste. Marie, Michigan and St. Clair, Michigan.

Northern Border Overview

Northern Border is a Texas general partnership formed in 1978. Northern Border's operating revenue is derived from transportation of natural gas. Northern Border transports natural gas from the Montana-Saskatchewan border near Port of Morgan, Montana to a terminus near North Hayden, Indiana. Additionally, Northern Border transports natural gas produced in the Williston Basin of Montana and North Dakota and the Powder River Basin of Wyoming and Montana and synthetic gas produced at the Dakota Gasification plant in North Dakota.

Tuscarora Overview

Tuscarora is a Nevada general partnership formed in 1993. Tuscarora's operating revenue is derived from transportation of natural gas. Tuscarora's U.S. interstate pipeline system originates at an interconnection point with existing facilities of Gas Transmission Northwest Corporation (GTN), a wholly-owned subsidiary of TransCanada, near Malin, Oregon and runs Southeast through Northeastern California and Northwestern Nevada. The Tuscarora pipeline system terminates near Wadsworth, Nevada. Along its route, deliveries are made in Oregon, Northern California and Northwestern Nevada. Deliveries are also made directly to the local gas distribution system of Sierra Pacific Power Company (Sierra Pacific Power), a subsidiary of Sierra Pacific Resources.

FACTORS THAT IMPACT OUR BUSINESS

Key factors that impact our business are the ability of Great Lakes and Northern Border to make distributions to us and of Tuscarora to generate positive operating cash flows and our ability to maintain a strong and balanced financial position. Partnership cash flows from our investments are necessary to generate sufficient cash to make distributions to our unitholders. A strong and balanced financial position will ensure that we are able to maintain a prudent level of available cash to make distributions to our unitholders.

FACTORS THAT IMPACT THE BUSINESS OF OUR PIPELINE SYSTEMS

Key factors that impact the business of our pipeline systems are the supply of and demand for natural gas in the markets in which our pipeline systems operate; the customers of our pipeline systems and the mix of services they require; competition; and government regulation of natural gas pipelines. These factors are discussed in more detail below.

Supply and Demand of Natural Gas

Our pipeline systems depend upon the continued availability of natural gas production and reserves in the regions we access, primarily the WCSB. Our pipeline systems provide their customers with natural gas transportation services to market demand areas. The amount of WCSB natural gas available for export is dependent upon natural gas production levels, demand for natural gas in Canada, and storage capacity for Canadian natural gas and demand for storage injection. Additional Canadian natural gas supply sources may be available in the future if new pipeline projects associated with the Mackenzie Delta in Northern Canada and the North Slope of Alaska are constructed.

Demand for natural gas transportation service on our pipeline systems is directly related to demand for natural gas in the markets served by these systems. Factors which may impact the overall demand for natural gas include weather conditions, economic conditions, government regulation, availability and price of alternative energy sources, fuel conservation measures, and technological advances in fuel economy and energy generation devices. Additionally, factors that may impact demand for transportation service on any one system include the ability and willingness of natural gas shippers to utilize one system over alternative pipelines, transportation rates, and the volume of natural gas delivered to markets from other supply sources and storage facilities.

Our pipeline systems depend upon the WCSB for the majority of the natural gas that they transport. There has been a decline in the flows out of WCSB over the last year. However, as discussed above, the impact of this decline on any given pipeline is dependent upon market conditions in the markets those pipelines serve. The decline in WCSB gas available for export did not negatively impact throughput on our pipeline systems in 2007. We cannot predict the impact of any export declines on 2008 throughput which will depend on WCSB natural gas available for export in the future and market conditions in the markets our pipeline systems serve.

The 2006-2007 winter was unusually warm in the markets served by Great Lakes. The low winter demand drove gas prices in the WCSB down and made it attractive to source gas in the supply area and move it to market instead of drawing storage gas. This increased utilization on the Great Lakes pipeline system. It also left Midwest storage levels at record highs, but in the post-Katrina environment when markets were disrupted by the hurricane, Great Lakes had sold its 2007 summer (and some winter 2006-2007) capacity on a firm basis so revenues were not adversely affected by lower than normal storage injection. Finally, with storage inventories at or near maximum, system demand was maintained late in the year by aggressively discounting to move available supply to markets.

Increased drilling and production activity in the Powder River Basin of Wyoming and Montana and the Williston Basin of Montana and North Dakota may present opportunities for Northern Border to pursue additional connections with this supply area. Future opportunities for potential additional supply include the construction of proposed coal gasificiation plants. A proposed coal gasification plant in North Dakota by Great Northern Power Development LP and Allied Syngas Corporation may also be a potential future supply source for Northern Border.

The GTN system is one of the U.S. transporters of Canadian natural gas from the WCSB, effectively the sole source of gas on Tuscarora. Tuscarora serves a number of markets along its route through Southern Oregon, Northern California and Northern Nevada. However, Tuscarora’s largest customers are in the Reno-Sparks area of Washoe County, Storey County and downstream of the Paiute system, where gas consumption related to industrial use, population growth and increased gas-fired power generation has grown significantly and is expected to continue.

Customers

Our pipeline systems transport natural gas for a variety of customers including other natural gas pipelines, natural gas distribution companies, electric generation companies, natural gas producers, and natural gas marketing and trading companies. Each type of customer has a different reason for using certain natural gas transportation services and routes. Natural gas distribution companies and electric generation companies typically require a secure and reliable supply of natural gas over a sustained period of time to meet the needs of their customers. These types of customers typically enter into long-term firm transportation contracts to ensure a ready supply of natural gas and sufficient transportation capacity over the life of their contracts. Natural gas producers typically enter into firm transportation contracts to ensure that they will have sufficient capacity to deliver their product to market centers. Natural gas marketing and trading companies typically use transportation services to capitalize on natural gas price volatility.

Competition

Our pipeline systems compete primarily with other interstate and intrastate pipelines in the transportation of natural gas. Additionally, supply competition from other natural gas sources can impact demand for transportation on our pipeline systems. Growth in supplies available from other natural gas producing regions can impact prices for natural gas delivered to some of the markets our pipeline systems serve relative to other market regions. An increase in the number of new pipeline projects in the U.S. has led to rising costs, both labor and materials, associated with new pipeline projects. These rising costs may impact our pipeline systems’ ability to pursue expansion projects.

Great Lakes competes directly with Northern Border, Alliance/Vector, Viking and the TransCanada Mainline. In addition, supply competition from other natural gas sources can impact demand for transportation on Great Lakes. Great Lakes anticipates that further growth in supplies from the Rocky Mountain region will create additional supply in the markets Great Lakes serves. Anticipated additional supplies from the Eastern segment of the Rockies Express Pipeline, discussed below, may provide opportunities for Great Lakes to market its Eastern zone capacity for storage injection and withdrawal, which has historically gone underutilized.

Northern Border serves natural gas markets in the Midwestern U.S. through major interconnects with other interstate natural gas pipelines. Northern Border also delivers natural gas directly to LDCs in Iowa, Illinois and Indiana. Two of Northern Border’s major interconnections are with

Northern Natural Gas at Ventura, Iowa and Natural Gas Pipeline at Harper, Iowa. Northern Border provides its customers with access to the Chicago market area, which is the third largest market area hub in North America. Supply competition from other natural gas sources in these markets can adversely impact demand for transportation on Northern Border's system. Northern Border has seen

growth in supplies from the Rocky Mountain region creating additional supply in the markets Northern Border serves, including Ventura, Harper and Chicago. Additional supply competition deliveries from other supply sources may impact Northern Border's ability to contract available capacity at Ventura and Harper beginning in April 2008 when approximately 37 per cent of its design capacity becomes uncontracted. Additional supply in the Chicago market may impact Northern Border's ability to contract available capacity in 2009 as long-term transportation contracts expire.

The Western segment of the Rockies Express Pipeline is increasing supply competition in Midwestern markets and could cause Northern Border to discount their rates or otherwise experience a reduction in their revenues. The Eastern segment of the Rockies Express Pipeline, from Missouri to Ohio, is expected to be placed in service by June 2009 (pending regulatory approvals), and is anticipated to transport natural gas further east, potentially mitigating excess supply in Northern Border's market region.

There are several other pipeline projects that have been announced, mostly moving gas from the U.S. Rocky Mountain Region to various regions of the U.S. Should any of these projects be built, they will have an impact on the U.S. natural gas markets, including the markets served by Northern Border and Great Lakes.

Tuscarora maintains a very strong competitive position relative to other sources of gas in the markets it serves. Tuscarora is one of only two pipelines that serves the Northern Nevada market, the other being Paiute Pipeline. Tuscarora can economically expand to meet the future gas transportation needs of the region by adding additional compression, which offers the greatest volume and pressure flexibility. Tuscarora also has access to supply regions as its upstream pipelines have excess capacity.

Government Regulation

Natural gas transportation is regulated by the FERC and other federal and state regulatory agencies, including the Department of Transportation. FERC regulatory policies govern the rates that pipelines are permitted to charge customers for interstate transportation of natural gas. The operation and maintenance of our pipeline systems are also impacted by the federal and state regulatory agencies.

The FERC-approved rate designs used by our pipeline systems are based upon firm service and interruptible services. Customers with firm service transportation agreements pay a fee known as a reservation charge to reserve pipeline capacity, regardless of use, for the term of their contracts. Firm service transportation customers may also pay a variable fee that is based on the distance and volume of natural gas they transport. Customers with interruptible service transportation agreements may utilize available capacity on a pipeline system after firm service transportation requests are satisfied. Interruptible service customers are assessed a variable fee based on distance and the volume of natural gas they transport. The majority of our pipeline systems' revenue is generated by firm service transportation agreements.

HOW WE EVALUATE OUR OPERATIONS

We evaluate our business primarily on the basis of the underlying operating results for each of our pipeline systems, along with a measure of Partnership cash flows. Partnership cash flows, a non-generally accepted accounting principle (GAAP) financial measure, is the sum of cash distributions received from Northern Border and Great Lakes, and cash flows from Tuscarora's operating activities less Partnership costs.

RESULTS OF OPERATIONS OF TC PIPELINES, LP

The general partner interests in Great Lakes, Northern Border and Tuscarora were our only material sources of income in 2007; therefore, our results of operations were influenced by and reflect the same factors that influenced the financial results of Great Lakes, Northern Border and Tuscarora. See Item 1. "Business".

Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with U.S. GAAP requires us to make estimates and assumptions, with respect to values or conditions which cannot be known with certainty, that affect the reported

amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Such estimates and assumptions also affect the reported amounts of revenue and expenses during the reporting period. Although we believe these estimates and assumptions are reasonable, actual results could differ from our estimates. The following summarizes the Partnership's and our pipeline systems' accounting policies and estimates, which should be read in conjunction with Note 2 of the Partnership's Financial Statements included elsewhere in this report.

We account for our investments in Great Lakes and Northern Border using the equity method of accounting. The equity method of accounting is appropriate where the investor does not control an investee, but rather is able to exercise significant influence over the operating and financial policies of an investee. We are able to exercise significant influence over our investments in Great Lakes and Northern Border because of our ownership interests and our representation on the Great Lakes and Northern Border management committees.

We used the equity method to account for our investment in Tuscarora until December 19, 2006. On this date, we acquired an additional 49 per cent general partner interest in Tuscarora and, as a result of acquiring a controlling interest in Tuscarora, began to consolidate its operations. The consolidation method of accounting is appropriate where the investor controls the investee.

Regulatory Assets

Our pipeline systems' accounting policies conform to Statement of Financial Accounting Standards (SFAS) No. 71, *Accounting for the Effects of Certain Types of Regulation*. Our pipeline systems consider several factors to evaluate their continued application of the provisions of SFAS No. 71 such as potential deregulation of their pipelines; anticipated changes from cost-based ratemaking to another form of regulation; increasing competition that limits their ability to recover costs; and regulatory actions that limit rate relief to a level insufficient to recover costs.

Certain assets that result from the ratemaking process are reflected on Northern Border's balance sheet as regulatory assets. If Northern Border determines future recovery of these assets is no longer probable as a result of discontinuing application of SFAS No. 71 or other regulatory actions, Northern Border would be required to write off the regulatory assets at that time. As of December 31, 2007, Northern Border reflected regulatory assets of $20.6 million on its balance sheet. These assets are being amortized as directed by the FERC in Northern Border's previous regulatory proceedings over varying time periods up to 43 years.

As at December 31, 2007, Great Lakes and Tuscarora did not have any regulatory assets or liabilities recorded on their respective balance sheets.

Contingencies

Our pipeline systems' accounting for contingencies covers a variety of business activities, including contingencies for legal and environmental liabilities. Our pipeline systems accrue for these contingencies when their assessments indicate that it is probable that a liability has been incurred or an asset will not be recovered and an amount can be reasonably estimated in accordance with SFAS No. 5, "Accounting for Contingencies." Our pipeline systems base their estimates on currently available facts and their estimates of the ultimate outcome or resolution. Actual results may differ from our pipeline systems' estimates resulting in an impact, positive or negative, on earnings.

Impairment of Long-Lived Assets and Goodwill

We assess our long-lived assets for impairment based on SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. A long-lived asset is tested for impairment whenever events or changes in circumstances indicate that its carrying amount may exceed its fair value. Fair values are based on the sum of the undiscounted future cash flows expected to result from the use and eventual disposition of the assets.

We assess our goodwill for impairment at least annually, based on SFAS No. 142, *Goodwill and Other Intangible Assets.* An initial assessment is made by comparing the fair value of the operations with goodwill, as determined in accordance with SFAS No. 142, to the book value of each reporting unit. If the fair value is less than the book value, an impairment is indicated, and we must perform a second test to measure the amount of the impairment. In the second test, we calculate the implied fair value of the goodwill by deducting the fair value of all tangible and intangible net assets of the operations with goodwill from the fair value determined in step one of the assessment. If the carrying value of the goodwill exceeds this calculated implied fair value of the goodwill, we will record an impairment charge. At December 31, 2007, we had $81.7 million of goodwill recorded on our balance sheet related to the Tuscarora acquisitions.

Impact of New Accounting Standards

In 2006, the Financial Accounting Standards Board issued SFAS No. 157, *Fair Value Measurements,* and during 2007, issued SFAS No. 141(R), *Business Combinations - revised*, SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities – including an amendment of FASB Statement No. 115*, and SFAS No. 160, *Noncontrolling Interests in Consolidated financial Statements*.

SFAS No. 157 establishes a framework for measuring fair value and requires additional disclosures about fair value measurements. The effect of adopting SFAS No. 157 is not expected to be material to our results of operations or financial position.

SFAS No. 141(R) replaces SFAS No. 141, *Business Combinations*. SFAS No. 141 (R) retains the fundamental requirements of SFAS No. 141 that the acquisition method of accounting be used for all business combinations and for an acquirer to be identified for each business combination, with the objective of improving the relevance and comparability of the information that a reporting entity provides in its financial reports about a business combination and its effects. The requirements of this standard will not have a material impact on the results of the Partnership.

SFAS No. 159 permits entities to choose to measure selected financial assets and financial liabilities at fair value. The fair value option established by SFAS No. 159 permits all entities to choose to measure eligible items at fair value at specified election dates. The effect of adopting SFAS No. 159 is not expected to be material to our results of operations or financial position.

SFAS No. 160 clarifies the classification of noncontrolling interests in consolidated statements of financial position and the accounting for and reporting of transactions between the reporting entity and holders of such noncontrolling interests. The Partnership does not have noncontrolling interests and therefore, is not affected by the changes resulting from this standard.

In June 2007 the Emerging Issues Task Force of the FASB issued EITF 07-4, "Application of the Two-Class Method under FASB Statement No. 128, *Earnings per Share,* to Master Limited Partnerships". EITF 07-4 addresses how current period earnings of a Master Limited Partnership (MLP) should be allocated to the general partner, limited partners and when applicable, incentive distribution rights when applying the two-class method under Statement 128. A tentative conclusion was ratified by the FASB in December 2007. We are currently reviewing the applicability of EIFT 07-4 to our results of operations and financial position.

YEAR IN REVIEW

TC PipeLines

Acquisition of Interest in Great Lakes

On February 22, 2007, the Partnership acquired a 46.45 per cent general partner interest in Great Lakes from El Paso Corporation (El Paso). TransCanada, which previously held a 50 per cent interest in Great Lakes, acquired the other 3.55 per cent general partner interest simultaneously with the Partnership's acquisition of its interest. In connection with these transactions, a wholly-owned subsidiary of TransCanada became the operator of Great Lakes.

Equity Issuance

On February 22, 2007, the Partnership completed a private placement of 17,356,086 common units at $34.57 per common unit for gross proceeds of $600.0 million which closed concurrently with the Great Lakes acquisition. TransCan Northern purchased 8,678,045 of the 17,356,086 common units issued for gross proceeds of $300.0 million. In addition, TC PipeLines GP maintained its two per cent general partner interest in the Partnership by contributing $12.6 million to the Partnership in connection with the private placement.

Acquisition of Remaining Interest in Tuscarora

On December 31, 2007, TC PipeLines acquired the remaining two per cent general partner interest in Tuscarora, with one per cent purchased from a wholly-owned subsidiary of TransCanada and the other one per cent purchased from Tuscarora Gas Pipeline Co. TC PipeLines now owns 100 per cent of Tuscarora.

Great Lakes

Operating Revenues

For the period of March 1, 2007 to December 31, 2007, Great Lakes' average contracted capacity was 104 per cent. As of January 31, 2008, the weighted average remaining life of Great Lakes' contracts was 2.4 years.

Operating Data	**For the period February 23 to December 31, 2007**
MMcf delivered	**693,017**
MMcf/d average throughput	**2,221**

Regulatory Deferred Income Taxes

Income taxes are the responsibility of the partners and are not reflected in Great Lakes' financial statements prepared in accordance with GAAP. On the balance sheet prepared for regulatory accounting purposes, partners' capital is reduced by the amount equivalent to accumulated deferred income taxes.

The sale of El Paso's partnership interest, and a corresponding Internal Revenue Code Section 754 election, resulted in Great Lakes' pre-acquisition amounts equivalent to net deferred income tax liability balances being reduced by 46.45 per cent. In addition, Great Lakes' amounts equivalent to net deferred tax liabilities for pre-acquisition retirement plans were eliminated. Great Lakes' regulated partners' capital and amounts equivalent to net deferred tax liabilities were adjusted on February 22, 2007, by approximately $135 million as approved by the FERC.

Michigan Business Tax

In the third quarter of 2007, the state of Michigan enacted the Michigan Business Tax (MBT), which replaced the Michigan Single Business Tax (SBT), effective January 1, 2008. The MBT is an income tax levied at the partnership level. The MBT is expected to result in an annual income tax expense of approximately $4 to $5 million and to provide a property tax credit of approximately $1 million, for a net annual impact of $3 to $4 million to Great Lakes beginning in 2008. In September 2007, Great Lakes eliminated its deferred SBT amounts consistent with the elimination of the SBT tax. This resulted in an increase of $1.6 million to Great Lakes' net income.

Northern Border

Operating Revenues

Long-term rates were reduced and short-term seasonal rates were implemented effective January 1, 2007 as a result of Northern Border's rate case settlement, discussed later in this section. 2007 revenues were comparable to 2006 primarily due to the implementation of seasonal rates and a favorable contracting experience for 2007. Northern Border's average throughput and contracted capacity remained consistent from 2007 to 2006 as shown in the table below. The trend toward shorter term contracts and discounted transportation rates continued on Northern Border's system. The weighted average life of Northern Border's contracts declined from 1.8 years at December 31, 2006 to 1.3 years at January 31, 2008.

Operating Data	2007	2006
MMcf delivered	**799,637**	799,301
MMcf/d average throughput	**2,247**	2,246
Average contracted capacity	**97**%	97%

Settlement of Rate Case

The settlement of Northern Border's 2005 rate case was approved by the FERC in November 2006. The settlement established maximum long-term mileage-based rates and charges for transportation on Northern Border's system. Beginning January 1, 2007, overall rates were reduced, compared with rates prior to the filing, by approximately five per cent. For the full transportation route from Port of Morgan, Montana to the Chicago area, the previous charge of approximately $0.46 per Dth is now approximately $0.44 per Dth, which is comprised of a reservation rate, commodity rate and a compressor usage surcharge rate. The factors used in calculating depreciation expense for transmission plant were increased from 2.25 per cent to 2.40 per cent. The settlement also provided for seasonal rates for short-term transportation services. Seasonal maximum rates vary on a monthly basis from approximately $0.54 per Dth to approximately $0.29 per Dth for the full transportation route from Port of Morgan, Montana to the Chicago area.

Change in Operator

TransCanada Northern Border Inc. (TCNB), a wholly-owned subsidiary of TransCanada, became Northern Border's operator effective April 1, 2007 under a new operating agreement.

Tuscarora

Operating Revenues

Long-term rates were reduced effective June 1, 2006 as a result of Tuscarora's rate settlement, discussed later in this section. 2007 revenues were lower when compared to 2006 primarily due to the reduction of rates effective June 1, 2006. Tuscarora's average throughput and contracted capacity remained consistent from 2007 to 2006 as shown in the table below. The weighted average remaining life of Tuscarora's contracts declined from 11.4 years at December 31, 2006 to 10.4 years at December 31, 2007.

Operating Data	2007	2006
MMcf delivered	**28,257**	28,067
MMcf/d average throughput	**77**	77
Average contracted capacity	**96**%	96%

Cost and Revenue Study

On August 7, 2006, the FERC approved a settlement reached by Tuscarora, the PUCN and Sierra Pacific Power that resulted in a firm transportation rate of $0.40/decatherm per day (dth-day) effective June 1, 2006. This was a 17 per cent reduction to the previous rate of $0.4811/dth-day, or an approximate $5 million reduction in Tuscarora's annual revenues. In addition, the settlement resulted in a moratorium on all rate actions before the FERC by any party to the settlement for a period of 48 months to May 31, 2010, including rate actions related to expansion projects where Tuscarora proposes to price the expansion at the settlement rate.

2008 Expansion Project

Tuscarora filed an application with the FERC on November 20, 2006 for approval to construct the compressor station and related facilities (Tuscarora 2008 Expansion Project). This project is to transport a maximum of 39 MMcf/d to Sierra Pacific Power to supply its Tracy combined cycle power plant. The project is expected to cost approximately $20 million which will be recovered from rates charged to Sierra Pacific Power under the Transportation Service Agreement (TSA) signed with Sierra Pacific Power. The TSA is for a period of 22.5 years from the commencement date.

The FERC issued a Certificate of Public Convenience and Necessity for Tuscarora's 2008 Expansion Project on July 24, 2007 in response to Tuscarora's November 2006 application for approval to construct the compressor station and related facilities. The expansion is currently expected to go into service in March of 2008.

Net Income

To supplement our financial statements we have presented a comparison of the earnings contribution components from each of our investments. We have presented net income in this format in order to enhance investors' understanding of the way management analyzes the Partnership's financial performance. We believe this summary

provides a more meaningful comparison of the Partnership's net income to prior years, as we account for our partially owned pipeline systems using the equity method. The presentation of this additional information is not meant to be considered in isolation or as a substitute for results prepared in accordance with GAAP.

The shaded areas in the tables below disclose the results from Great Lakes, Northern Border and Tuscarora, representing 100 per cent of each entity's operations for the given period.

2007 (millions of dollars)	**Partnership**	**Tuscarora[(1)]**	**Corporate**	**Great Lakes[(2)] Feb 23 - Dec 31**	**Northern Border[(3)]**
Transmission revenues	**27.2**	27.2	—	236.2	309.4
Operating expenses	**(8.3)**	(4.9)	(3.4)	(53.7)	(83.5)
	18.9	22.3	(3.4)	182.5	225.9
Depreciation	**(6.3)**	(6.3)	—	(49.4)	(60.7)
Financial charges, net and other	**(33.8)**	(4.4)	(29.4)	(27.6)	(41.1)
				105.5	124.1
Equity income	**110.2**	—	—	49.0	61.2
Net income	**89.0**	11.6	(32.8)	49.0	61.2

(1) TC PipeLines owns a 100 per cent general partner interest in Tuscarora following the acqusition of an additional two per cent interest on December 31, 2007.

(2) TC PipeLines acquired a 46.45 per cent general partner interest in Great Lakes on February 22, 2007.

(3) TC PipeLines owns a 50 per cent general partner interest in Northern Border. Equity income from Northern Border includes amortization of a $10 million transaction fee paid to the operator of Northern Border at the time of the additional 20 per cent acquisition in April 2006.

2006 (millions of dollars)	**Partnership**	**Tuscarora[(4)] Dec 20 - Dec 31**	**Corporate**	**Tuscarora[(4)] Jan 1 - Dec 19**	**Northern Border[(5)]**
Transmission revenues	**0.9**	0.9	—	28.6	310.9
Operating expenses	**(2.7)**	(0.1)	(2.6)	(4.6)	(81.0)
	(1.8)	0.8	(2.6)	24.0	229.9
Depreciation	**(0.2)**	(0.2)	—	(6.0)	(58.7)
Financial charges, net and other	**(15.8)**	(0.2)	(15.6)	(5.1)	(41.3)
				12.9	129.9
Equity income	**62.5**	—	—	5.9	56.6
Net income	**44.7**	0.4	(18.2)	5.9	56.6

(4) With the acquisition of an additional 49 per cent general partner interest in Tuscarora on December 19, 2006, TC PipeLines changed its method of accounting for this investment from equity accounting to consolidation.

(5) Equity income from TC PipeLines' investment in Northern Border was based upon its 30 per cent ownership to April 5, 2006 and 50 per cent ownership following the acquisition of an additional 20 per cent general partner interest on April 6, 2006. Equity income from Northern Border includes amortization of a $10 million transaction fee paid to the operator of Northern Border at the time of the acquisition.

2005 (millions of dollars)	**Partnership**	**Corporate**	**Tuscarora[(6)]**	**Northern Border[(7)]**
Transmission revenues	—	—	32.3	321.7
Operating expenses	**(2.0)**	(2.0)	(4.4)	(70.8)
	(2.0)	(2.0)	27.9	250.9
Depreciation	—	—	(6.2)	(58.1)
Financial charges, net and other	**(1.0)**	(1.0)	(5.6)	(40.5)
			16.1	152.3

Equity income	**53.2**	—	7.5	45.7
Net income	**50.2**	(3.0)	7.5	45.7

(6) TC PipeLines owned a 49 per cent general partner interest in Tuscarora. Equity income from Tuscarora includes an acquisition allocation amortization related to the initial purchase of the Partnership's general partner interest in Tuscarora.

(7) TC PipeLines owned a 30 per cent general partner interest in Northern Border.

Year Ended December 31, 2007 Compared with the Year Ended December 31, 2006

Net income increased $44.3 million, or 99 per cent, to $89.0 million in 2007, compared to $44.7 million in 2006. This increase was due primarily to acquisition activities in 2007 and 2006. Equity income in 2007 included $49.0 million from our investment in Great Lakes, which we acquired on February 22, 2007. The Partnership's earnings increased $4.6 million in 2007 as a result of its ownership interest in Northern Border. Of this increase, $7.1 million is due to the additional 20 per cent general partner interest in Northern Border acquired on April 6, 2006, offset by a $2.5 million decrease due to a reduction in Northern Border's net income. The Partnership's earnings increased $5.1 million in 2007 as a result of its ownership interest in Tuscarora. Tuscarora contributed $11.4 million to the Partnership's earnings in 2007, including a $0.2 million non-controlling interest recorded by the Partnership. The Partnership's earnings increased by $6.0 million due to the additional 49 per cent general partner interest in Tuscarora acquired on December 19, 2006, offset by a $0.9 million decrease due to a reduction in Tuscarora's net income. The increase in the Partnership's earnings as a result of acquisitions is partially offset by a $13.8 million increase in the Partnership's financing costs.

Great Lakes' net income for the period from acquisition to December 31, 2007 was $105.5 million, in line with our expectations. The Partnership completed the acquisition of Great Lakes on February 22, 2007 and included 46.45 per cent of its earnings from this date. Great Lakes' revenues are primarily derived from its interstate natural gas transmission service. In 2007, approximately 91 per cent of Great Lakes' transportation revenues was derived from long-term firm service contracts.

Northern Border's net income decreased $5.8 million, or four per cent, to $124.1 million in 2007 compared to $129.9 million in 2006. Slight increases in depreciation and operating expenses, along with a small reduction in transmission revenues contributed to the decrease in net income. Depreciation expense increased by $2.0 million over the prior year primarily due to the change in depreciation rates effective January 1, 2007 as a result of the 2005 rate case settlement. Operating expenses increased $2.5 million over the prior year primarily due to a $2.3 million transition related charge in 2007 related to the reimbursement for shared equipment and furnishings acquired by ONEOK Partners and previously used to support Northern Border's operations. Increases in electric compression charges due to increased usage and electric rates were mostly offset by decreased taxes other than income. Excluding the positive impact of the higher ownership interest, the $5.8 million decrease in Northern Border's net income resulted in a $2.5 million decrease to the Partnership's net income.

Tuscarora's net income decreased $1.7 million, or 13 per cent, to $11.6 million in 2007. This decrease was mainly due to a full year impact of the settlement transportation rates that went into effect on June 1, 2006. The decrease in Tuscarora's net income contributed to a $0.9 million decrease to the Partnership's net income.

Year Ended December 31, 2006 Compared with the Year Ended December 31, 2005

Net income decreased $5.5 million, or 11 per cent, to $44.7 million in 2006, compared to $50.2 million in 2005. Net income of Northern Border and Tuscarora decreased in 2006 when compared to 2005 which contributed to an $8.1 million decrease in Partnership's earnings; however, this decrease was partially offset by an increased earnings contribution resulting from the 2006 acquisitions net of financing charges. The Partnership's earnings increased $17.6 million and $0.2 million in 2006 due to the acquisition of the additional 20 per cent interest in Northern Border and the additional 49 per cent general interest in Tuscarora, respectively. An increased outstanding debt balance resulted in increased financial charges of $14.8 million that partially offset the increases in earnings as a result of acquisitions.

Northern Border's net income decreased $22.4 million to $129.9 million in 2006, compared to $152.3 million in 2005. A one-time revenue amount related to the sale of the bankruptcy claims held against Enron by Northern Border in 2005 contributed $9.4 million to Northern Border's 2005 revenues. Decreased firm demand revenue and commodity charges were partially offset by additional revenue from transportation contracts related to the Chicago III Expansion Project. Increased operating expenses due to increased general and administrative expenses and electric compression charges associated with the Chicago III Expansion Project contributed $10.2 million to the decrease in net income at Northern Border. The $22.4 million decrease in Northern Border's net income contributed to a $6.7 million decrease to the Partnership's net income.

Tuscarora's net income decreased $2.8 million to $13.3 million in 2006, compared to $16.1 million in 2005, primarily due to lower net revenues resulting from settlement transportation rates that went into effect on June 1, 2006. The decrease in Tuscarora's net income contributed to a $1.4 million decrease to the Partnership's net income.

Partnership Cash Flows

To supplement our financial statements, we disclose "Partnership cash flows". We have presented this additional information to enhance investors' understanding of the way that management analyzes the Partnership's financial performance. We believe this summary provides a more meaningful comparison of the Partnership's financial performance to prior years, as Partnership cash flows fund the cash distributions that the Partnership pays to its unitholders. The presentation of this additional information is not meant to be considered in isolation or as a substitute for results prepared in accordance with GAAP.

(millions of dollars except per common unit amounts)	2007	2006	2005
Total cash distributions received[(a)]	**147.6**	88.1	69.2
Cash flows from Tuscarora's operating activities[(b)]	**19.9**	—	—
Partnership costs[(c)]	**(32.8)**	(18.2)	(3.0)
Partnership cash flows[(c)]	**134.7**	69.9	66.2
Partnership cash flows per common unit	**$ 4.17**	$ 3.99	$ 3.78
Cash distributions paid	**86.7**	43.5	43.0
Cash distributions paid per common unit	**$ 2.565**	$ 2.325	$ 2.300

[(a)] Reconciliation of non-GAAP financial measure: Total cash distributions received is a non-GAAP financial measure which is the sum of equity income from investment in Great Lakes, return of capital from Great Lakes, equity income from investment in Northern Border, return of capital from Northern Border and up until December 19, 2006, equity income from investment in Tuscarora and return of capital from Tuscarora. It is provided as a supplement to results reported in accordance with GAAP. Management believes that this is a meaningful measure to assist investors in evaluating the levels of cash distributions from the Partnership's investments. Below is a reconciliation of total cash distributions received to GAAP financial measures:

(millions of dollars)	2007	2006	2005
Equity income from investment in Great Lakes	**49.0**	—	—
Return of capital from Great Lakes	**12.3**	—	—
Cash distributions from Great Lakes	**61.3**	—	—
Equity income from investment in Northern Border	**61.2**	56.6	45.7
Return of capital from Northern Border	**25.1**	23.8	15.2
Cash distributions from Northern Border	**86.3**	80.4	60.9
Equity income from investment in Tuscarora	**—**	5.9	7.5
Return of capital from Tuscarora	—	1.8	0.8
Cash distributions from Tuscarora	—	7.7	8.3
Total cash distributions received	**147.6**	88.1	69.2

[(b)] Refer to Note 5 of the Partnership's financial statements for cash flows from Tuscarora's operating activities for the year ended December 31, 2007. TC PipeLines accounted for its investment in Tuscarora using the equity method until December 19, 2006 and began consolidating Tuscarora's operations upon acquisition of an additional 49 per cent general partner interest. Cash flows from Tuscarora's operating activities for 2006 have not been included in the above analysis as the Partnership effectively accounted for Tuscarora on a consolidated basis for only the last 11 days of the year.

[(c)] Reconciliation of non-GAAP financial measure: Partnership cash flows is a non-GAAP financial measure which is the sum of cash distributions received and cash flows from Tuscarora's operating activities less Partnership costs. We exclude Tuscarora's costs from the Partnership costs so that investors may evaluate our costs independent of costs directly attributable to our investments. Management believes that this is a useful measure to assist investors in evaluating the Partnership's cash flow from its operating activities. A reconciliation of Partnership costs is summarized below:

(millions of dollars)	2007	2006	2005
Operating expenses	**8.3**	2.7	2.0

Year Ended December 31, 2007 Compared with the Year Ended December 31, 2006

Partnership cash flows increased $64.8 million, or 93 per cent, to $134.7 million in 2007, compared to $69.9 million in 2006. This increase was primarily a result of cash flows received from acquisitions made in 2007 and 2006. Partnership cash flows in 2007 included cash distributions received of $61.3 million resulting from the acquisition of Great Lakes. Cash distributions received from Northern Border increased $5.9 million in 2007 compared to the prior year due primarily to the additional 20 per cent interest in Northern Border. The Partnership began consolidating Tuscarora's operations on December 19, 2006, when it acquired a controlling interest in Tuscarora. Cash flows from Tuscarora's operating activities in 2007 were $19.9 million, while the distributions received from Tuscarora in 2006 were $7.7 million. Partnership costs increased $14.6 million to $32.8 million, compared to $18.2 million in 2006 primarily due to increased financial charges related to higher outstanding debt balances.

Excluding the returns of capital from our investments, the Partnership used $758.8 million of cash flows for investing activities in 2007 compared to $407.6 million used in 2006. In 2007, the Partnership acquired a 46.45 per cent general partner interest in Great Lakes from El Paso Corporation for $733.4 million in cash. In 2006, the Partnership incurred costs of $308.0 million to acquire an additional 20 per cent interest in Northern Border and $97.2 million related to its acquisition of the additional 49 per cent interest in Tuscarora. The Partnership made equity contributions of $7.5 million to Northern Border in 2007, compared to $3.1 million made in 2006. Tuscarora made capital expenditures of $13.2 million in 2007, of which $12.2 million related to the compressor station expansion project in Likely, California.

The Partnership generated $625.6 million of net cash flows from financing activities in 2007 compared to $337.6 million in 2006. The acquisition of a 46.45 per cent general partner interest in Great Lakes was partially financed through a private placement of 17,356,086 common units at $34.57 per common unit for gross proceeds of $600.0 million. In addition, TC PipeLines GP maintained its two per cent general partner interest in the Partnership by contributing $12.6 million to the Partnership in connection with the private placement. The Partnership funded the balance of the total consideration with a draw on its senior credit facility, which was amended and restated in connection with this transaction. The Partnership incurred $1.2 million of costs associated with the amended senior credit facility. The Partnership incurred debt of $171.5 million in 2007, which included $126.0 million in connection with the Great Lakes acquisition. The Partnership repaid $66.2 million of the outstanding balance on its senior credit facility and senior notes throughout the year.

Distributions paid by the Partnership increased $43.2 million, or 99 per cent, to $86.7 million in 2007 compared to $43.5 million in 2006 due to the increased number of common units outstanding and increases in quarterly per common unit distribution amounts declared in each of the last three quarters of 2007. In 2007, the Partnership paid the $86.7 million in distributions in the following manner: $79.0 million to common unitholders (including $5.2 million to the general partner as holder of 2,035,106 common units and $17.1 million to a TransCan Northern as holder of 8,678,045 common units), $5.9 million to the general partner as holder of the incentive distribution rights, and $1.8 million to the general partner in respect of its two per cent general partner interest.

Year Ended December 31, 2006 Compared with the Year Ended December 31, 2005

Partnership cash flows increased $3.7 million, or 6 per cent, to $69.9 million in 2006, compared to $66.2 million in 2005. Cash distributions received from Northern Border increased $19.5 million in 2006 compared to 2005. The additional 20 per cent ownership interest in Northern Border resulted in an additional $26.7 million in distributions received partially offset by a $7.2 million reduction in distributions attributable to the Partnerships' original 30 per cent interest in Northern Border. The Partnership's cash flows were also impacted by an increase in Partnership financial charges of $14.6 million due to the higher outstanding debt balance. Distributions made by Northern Border were higher in 2005 mainly due to higher revenues and $9.4 million realized on the sale of its unsecured bankruptcy claims held against Enron.

Excluding the returns of capital from our investments, the Partnership used $407.6 million of cash flows for investing activities in 2006 compared to $0.3 million used in 2005. In 2006, the Partnership incurred costs of $308.0 million to acquire an additional 20 per cent interest in Northern Border, and in addition, made equity contributions of $3.1 million which were used by Northern Border to repay indebtedness. The Partnership made a $0.3 million contribution to Tuscarora in 2005 related to construction of the Barrick Lateral.

The Partnership generated $337.6 million of cash flows from financing activities in 2006 compared to $66.0 million in cash flows used for financing activities in 2005. The increase in financing was to support the acquisition activities in 2006. To finance the 2006 acquisitions, the Partnership borrowed a net $383.5 million from bridge, term and revolving credit facilities. Tuscarora repaid $2.4 million of the outstanding balance on its senior secured notes in December 2006.

Distributions paid increased $0.5 million to $43.5 million in 2006 compared to $43.0 million in 2005. The increase was due to an increase in the Partnership's quarterly cash distribution from $0.575 per common unit to $0.60 per common unit beginning in the fourth quarter of 2006.

LIQUIDITY AND CAPITAL RESOURCES OF TC PIPELINES, LP

Overview

Our principal sources of liquidity include distributions received from our investments in Great Lakes and Northern Border, operating cash flow from Tuscarora and our bank credit facility. The Partnership funds its operating expenses, debt service and cash distributions primarily with operating cash flow. Long-term capital needs may be met through the issuance of long-term debt and/or equity.

Summary of the Partnership's Contractual Obligations

The Partnership's contractual obligations as of December 31, 2007 included the following:

	Payments Due by Period				
(millions of dollars)	**Total**	**Less Than 1 Year**	**2-3 Years**	**4-5 Years**	**After 5 Years**
Senior Credit Facility due 2011	507.0	—	—	507.0	—
Series A Senior Notes due 2010	54.5	3.3	51.2	—	—

Series B Senior Notes due 2010	5.5	0.5	5.0		—
Series C Senior Notes due 2012	6.4	0.8	1.7	3.9	—
Interest payments on Senior Credit Facility [(a)]	102.5	25.1	50.6	26.8	—
Interest payments on Senior Notes	13.4	4.7	8.4	0.3	—
Operating leases	0.1	0.1	—	—	—
Capital commitments [(b)]	3.0	3.0	—	—	—
	692.4	37.5	116.9	538.0	—

[(a)] Interest payments on Senior Credit Facility include the hedging effect of the derivative financial instruments placed on $475 million of the outstanding debt.

[(b)] Capital commitments relate to the Likely Compressor Station construction.

The Partnership's Debt and Credit Facilities

On March 31, 2006, the Partnership entered into an unsecured credit agreement for a $310.0 million credit facility (Bridge Loan Credit Facility) with a banking syndicate. Borrowings under the Bridge Loan Credit Facility bore interest, at the option of the Partnership, at the LIBOR or the base rate plus an applicable margin. On April 5, 2006, the Partnership borrowed $307.0 million under the Bridge Loan Credit Facility to finance the acquisition of an additional 20 per cent general partner interest in Northern Border. The remaining $3.0 million commitment under the Bridge Loan Credit Facility was terminated. On December 12, 2006, the Bridge Loan Credit Facility was refinanced through a $297.0 million draw on a $410.0 million credit agreement (Senior Credit Facility) with a banking syndicate and the use of $10.0 million cash on hand. The interest rate on the Bridge Loan Credit Facility averaged 6.29 per cent for the year ended December 31, 2006.

On December 12, 2006, the Partnership entered into a credit agreement for the Senior Credit Facility. On December 19, 2006, TC PipeLines borrowed an additional $100.0 million under the Senior Credit Facility to finance the acquisition of an additional 49 per cent interest in Tuscarora.

On February 13, 2007, the Senior Credit Facility was amended and restated in connection with the Great Lakes acquisition. The amount available under the Senior Credit Facility increased from $410.0 million to $950.0 million, consisting of a $700.0 million senior term loan and a $250.0 million senior revolving credit facility, with $194.0 million of the senior term loan available being terminated upon closing of the Great Lakes acquisition. In accordance with the Senior Credit Facility agreement, once repaid, a senior term loan cannot be re-borrowed. On November 29, 2007, $18.0 million of the senior term loan was repaid, and hence terminated, leaving $488.0 million available and outstanding under the senior term loan. At December 31, 2007, $19.0 million is outstanding under the senior revolving credit facility, leaving $231.0 million available for future borrowings.

The Senior Credit Facility matures on December 12, 2011, subject to two one-year extensions at the option of the Partnership and with the approval of a majority of the lenders thereunder. Amounts borrowed may be repaid in part or in full prior to that time without penalty. Borrowings under the Senior Credit Facility will bear interest based, at the Partnership's election, on the LIBOR or the prime rate plus, in either case, an applicable margin. There was $507.0 million outstanding under the Senior Credit Facility at December 31, 2007 (2006 - $397.0 million). The

interest rate on the Senior Credit Facility averaged 6.01 per cent for the year ended December 31, 2007 (2006 – 6.16 per cent). After hedging activity, the interest rate incurred on the Senior Credit Facility averaged 5.75 per cent for the year ended December 31, 2007. Prior to hedging activities, the interest rate was 5.62 per cent at December 31, 2007 (2006 – 6.07 per cent).

The Senior Credit Facility requires the Partnership to maintain a leverage ratio (debt to adjusted cash flow) of not more than 4.75 to 1.00 at the end of any fiscal quarter. The permitted leverage ratio will increase to 5.50 to 1.00 for the first three fiscal reporting periods during any 12-month period immediately following the consummation of specified material acquisitions. At December 31, 2007, the Partnership was in compliance with all of its financial covenants.

In 1995, Tuscarora issued $91.7 million of 7.13 per cent senior secured notes, which mature on December 21, 2010 (Series A). In 2000, Tuscarora issued $8.0 million of 7.99 per cent senior secured notes, which mature on December 21, 2010 (Series B). In 2002, Tuscarora issued $10.0 million of 6.89 per cent senior secured notes, which mature on December 21, 2012 (Series C). Series C proceeds were used to finance the construction of Tuscarora's expansion facilities. The Series A, Series B and Series C notes (collectively, the Notes) have a final payment at maturity of $46.7 million, $4.1 million and $2.7 million, respectively. The Notes are secured by Tuscarora's transportation contracts, supporting agreements and substantially all of Tuscarora's property. The credit agreement for the Notes contains certain provisions that include, among other items, limitations on additional indebtedness and distributions to partners. On December 31, 2007, $54.5 million, $5.5 million and $6.4 million were outstanding on the Series A, Series B and Series C Senior Notes, respectively. On December 31, 2006, $57.9 million, $6.0 million and $7.2 million were outstanding on the Series A, Series B and Series C Senior Notes, respectively.

Interest Rate Swaps and Options

The Partnership uses derivatives to assist in managing its exposure to interest rate risk. At December 31, 2007, the fair value of the interest rate swaps and options accounted for as hedges was negative $9.8 million (2006 - positive $1.6 million). The fair value of interest rate swaps and options have been calculated using year-end market rates. The notional amount hedged was $475 million. $300.0 million of variable-rate debt is hedged by an interest rate swap during the period from March 12, 2007 through December 12, 2011, where the weighted average fixed interest rate paid is 4.89 per cent. $100.0 million of variable-rate debt is hedged by an interest rate option during the period from May 22, 2007 through May 22, 2009 to an interest rate range between a weighted average floor of 4.09 per cent and a cap of 5.35 per cent. $75.0 million of variable-rate debt is hedged by an interest rate swap during the period from February 29, 2008 through February 28, 2011, where the fixed interest rate paid will be 3.86 per cent. In addition to these fixed rates, the Partnership pays an applicable margin in accordance with the Senior Credit Facility agreement. The interest rate swaps and options are structured such that the cash flows match those of the Senior Credit Facility.

Capital Requirements

In 2007, the Partnership made an equity contribution of $7.5 million to Northern Border, representing the Partnership's 50 per cent share of a $15.0 million cash call issued by Northern Border, which fulfilled the previously approved 2007 equity cash calls. The proceeds were used by Northern Border to repay indebtedness. In 2006, the Partnership made an equity contribution of $3.1 million, representing the Partnership's then 30 per cent share of a $10.3 million cash call issued by Northern Border, where the proceeds were used to fund a portion of the Chicago III Expansion Project capital costs.

In 2007, Tuscarora incurred $13.2 million of capital expenditures, of which $12.2 million related to its compressor station expansion in Likely, California. These capital expenditures were funded with operating cash flows. In 2005, the Partnership made an equity contribution of $0.3 million to Tuscarora, representing the Partnership's then 49 per cent share of a $0.7 million cash call issued by Tuscarora. Those proceeds were used to fund the construction of the Barrick Lateral that went into service June 2005.

To the extent the Partnership has any additional capital requirements with respect to our pipeline systems or makes acquisitions in 2008, we expect to fund these requirements with operating cash flows, debt and/or equity.

Cash Distribution Policy of TC PipeLines

The Partnership makes distributions of Available Cash, as defined in the Partnership Agreement, in the following manner:

- First, 98 per cent to the common units, pro rata, and two per cent to the general partner, until there is distributed for each outstanding common unit an amount equal to the minimum quarterly distribution for that quarter; and
- Thereafter, in a manner whereby the general partner has rights (referred to as incentive distribution rights) to receive increasing percentages of excess quarterly cash distributions over specified cash distribution thresholds calculated in the following manner:
  - First, 85 per cent to all units, pro rata, and 15 per cent to the general partner, until each unitholder has received a total of $0.5275 for that quarter;
  - Second, 75 per cent to all units, pro rata, and 25 per cent to the general partner, until each unitholder has received a total of $0.6900 for that quarter; and
  - Third, 50 per cent to all units, pro rata, and 50 per cent to the general partner.

The distribution to the general partner described above, other than in its capacity as a holder of 2,035,106 common units that are in excess of its aggregate two per cent general partner interest, represent the incentive distribution rights.

2007 Fourth Quarter Cash Distribution

On January 17, 2008, the Board of Directors of the general partner declared the Partnership's 2007 fourth quarter cash distribution. The fourth quarter cash distribution which was paid on February 14, 2008 to unitholders of record as of January 31, 2008, totaled $25.6 million and was paid in the following manner: $23.2 million to common unitholders (including $1.4 million to the general partner as holder of 2,035,106 common units and $5.8 million to TransCan Northern as holder of 8,678,045 common units), $1.9 million to the general partner as holder of the incentive distribution rights, and $0.5 million to the general partner in respect of its two per cent general partner interest.

LIQUIDITY AND CAPITAL RESOURCES OF OUR PIPELINE SYSTEMS

Overview

Our pipeline systems' principal source of liquidity is cash generated from operating activities and bank credit facilities. Our pipeline systems fund their operating expenses, debt service and cash distributions to partners primarily with operating cash flow.

Capital expenditures are funded by a variety of sources, including cash generated from operating activities, borrowings under bank credit facilities, issuance of senior notes or equity contributions from our pipeline systems' partners. The ability of our pipeline systems to access capital markets for debt under reasonable terms depends on their financial condition, credit ratings and market conditions.

Our pipeline systems believe that their ability to obtain financing at reasonable rates and their history of consistent cash flow from operating activities provide a solid foundation to meet their future liquidity and capital resource requirements.

Summary of Great Lakes' Contractual Obligations

Great Lakes' contractual obligations related to debt as of December 31, 2007 included the following:

	Payments Due by Period				
(millions of dollars)	**Total**	**Less Than 1 Year**	**2-3 Years**	**4-5 Years**	**After 5 Years**
8.74% series Senior Notes due 2008 to 2011	40.0	10.0	20.0	10.0	—
9.09% series Senior Notes due 2012 to 2021	100.0	—	—	10.0	90.0
6.73% series Senior Notes due 2009 to 2018	90.0	—	18.0	18.0	54.0
6.95% series Senior Notes due 2019 to 2028	110.0	—	—	—	110.0
8.08% series Senior Notes due 2021 to 2030	100.0	—	—	—	100.0
Interest payments on debt	390.0	34.2	64.3	58.3	233.2
	830.0	44.2	102.3	96.3	587.2

Long-Term Financing

All of Great Lakes' outstanding debt securities are senior unsecured notes with similar terms except for interest rates, maturity dates and prepayment premiums.

Great Lakes is required to comply with certain financial, operational and legal covenants. Under the most restricted covenants in the Senior Note Agreements, approximately $237.0 million of Great Lakes' partners' capital was restricted as to distributions as of December 31, 2007. In addition, Great Lakes is required to maintain a minimum consolidated tangible net worth of $175 million. At December 31, 2007, Great Lakes was in compliance with all of its financial covenants.

The aggregate estimated fair value of long-term debt was $525 million for 2007. The aggregate annual required repayments of senior notes are $10 million in 2008 and $19 million for each year 2009 through 2012. In 2007, interest expense related to Great Lakes' senior notes was $35 million.

Summary of Northern Border's Contractual Obligations

Northern Border's contractual obligations related to debt, operating leases and other long-term obligations as of December 31, 2007, included the following:

	Payments Due by Period				
(millions of dollars)	**Total**	**Less Than 1 Year**	**2-3 Years**	**4-5 Years**	**After 5 Years**
7.75% senior notes due 2009	200.0	—	200.0	—	—
7.50% senior notes due 2021	250.0	—	—	—	250.0
$250 million credit agreement due 2012	166.0	—	—	166.0	—
Interest payments on debt	321.3	43.1	65.6	49.3	163.3
Operating leases	72.1	2.5	4.7	3.8	61.1
Other long-term obligations	3.1	0.8	1.5	0.8	—
	1,012.5	46.4	271.8	219.9	474.4

Operating Leases

Northern Border is required to make future minimum payments for office space and rights-of-way under non-cancelable operating leases.

Other

Northern Border is required to pay $3.6 million over a five year period under a transition services agreement between ONEOK Partners GP and TransCanada Northern Border, related to the reimbursement for shared assets acquired by ONEOK Partners. In 2007, a charge of $2.3 million was recorded in operations and maintenance expense and $1.3 million was recorded as plant, property and equipment.

Amended and Restated Credit Agreement

On April 27, 2007, Northern Border entered into a $250 million amended and restated revolving credit agreement (the "2007 Credit Agreement") with certain financial institutions. The 2007 Credit Agreement was used to refinance the outstanding indebtedness under Northern Border's $175 million revolving credit agreement dated as of May 16, 2005 and was used to repay all of the $150 million of its 6.25 per cent Senior Notes due May 1, 2007. The 2007 Credit Agreement can also be used to finance permitted acquisitions, pay related fees and expenses, issue letters of credit and provide for ongoing working capital needs and for other general business purposes, including capital expenditures.

Northern Border may, at its option, so long as no default or event of default has occurred and is continuing, elect to increase the capacity under its 2007 Credit Agreement by an aggregate amount not to exceed $100 million, provided that lenders are willing to commit additional amounts. At

Northern Border's option, the interest rate on the outstanding borrowings may be the lenders' base rate or the LIBOR plus a spread that is based on its long-term unsecured credit ratings. The 2007 Credit Agreement permits Northern Border to specify the portion of the borrowings to be covered by specific interest rate options and to specify the interest rate period. Northern Border is required to pay a facility fee of 0.05 per cent based on the principal amount of the commitment of $250 million. The term of the agreement is five years, with options for two one-year extensions.

Under the 2007 Credit Agreement, Northern Border is required to comply with certain financial, operational and legal covenants. Among other things, Northern Border is required to maintain a ratio of total debt to EBITDA (net income plus interest expense, income taxes, depreciation and amortization and all other non-cash charges) of no more than 4.75 to 1. Pursuant to the 2007 Credit Agreement, if one or more acquisitions are consummated in which the aggregate purchase price is $25 million or more, the allowable ratio of total debt to EBITDA is increased to 5.50 to 1 for the first three full calendar quarters following the acquisition. Upon any breach of these covenants, amounts outstanding under the 2007 Credit Agreement may become immediately due and payable. At December 31, 2007, Northern Border was in compliance with all of its financial covenants.

The fair value of Northern Border's variable rate debt was approximately the carrying value since the interest rates are periodically adjusted to reflect current market conditions. As of December 31, 2007, Northern Border's outstanding borrowings under its credit agreement were $166 million. The average interest rate on Northern Border's credit agreement at December 31, 2007 was 5.35 per cent.

Interest Rate Collar Agreement

In August 2007, Northern Border entered into a zero cost interest rate collar agreement (the "Collar Agreement") to limit the variability of the interest rate on $140 million of variable-rate borrowings during the period from October 30, 2007 through October 30, 2009 to a range between a floor of 4.35 per cent and a cap of 5.36 per cent. Northern Border has designated the Collar Agreement as a cash flow hedge. At December 31, 2007, Northern Border's balance sheet reflected an unrealized loss of approximately $1.9 million with a corresponding decrease to accumulated other comprehensive income (loss) related to the changes in fair value of the Collar Agreement since inception. Since inception, Northern Border has not recognized any amounts in income due to ineffectiveness of the Collar Agreement.

Long-Term Financing - Debt Securities

Northern Border periodically issues long-term debt securities to meet its capital resource requirements. All of Northern Border's outstanding debt securities are senior unsecured notes with similar terms except for interest rates, maturity dates and prepayment premiums.

Northern Border's senior notes issuances of $200 million due in 2009 and $250 million due in 2021 are borrowed at fixed interest rates of 7.75 per cent and 7.50 per cent, respectively. Northern Border intends to maintain the current schedule of maturities, which will result in no gains or losses on their respective repayments. Northern Border intends to refinance the senior notes due in 2009 with a mix of long-term fixed rate debt and short-term variable rate debt. The indentures of the notes do not limit the amount of unsecured debt Northern Border may incur but do restrict secured indebtedness. In 2007, Northern Border repaid all of the $150 million of its 6.25 per cent senior notes due May 1, 2007 with borrowings under the 2007 Credit Agreement. At December 31, 2007, the aggregate fair value of the outstanding senior notes was approximately $493 million. In 2007, interest expense related to the senior notes was $37.4 million.

CASH FROM OUR PIPELINE SYSTEMS

Cash Distribution Policies of Great Lakes and Northern Border

Distributions to partners are made on a pro rata basis according to each general partner's ownership percentage, approximately one month following the end of a quarter. Great Lakes' and Northern Border's respective Management Committees determine the amount and timing of cash distributions, where the amount of such distributions is based on available cash flow as determined by a prescribed formula. Any changes to, or suspension of, Great Lakes' or Northern Border's cash distribution policy requires the unanimous approval of its respective Management Committee.

Northern Border's Management Committee changed its cash distribution policy effective in January 2004 to distribute 100 per cent of the distributable cash flow based on earnings before interest, taxes, depreciation and amortization less interest expense and maintenance capital expenditures. In 2006, upon the closing of the purchase and sale of the 20 per cent interest in Northern Border, the Northern Border Management Committee adopted certain changes to the Northern Border cash distribution policy related to financial ratio targets and equity contributions. The change defined minimum equity to total capitalization ratios to be used by the Northern Border Management Committee to establish the timing and amount of required equity contributions. In addition, any shortfall due to the inability to refinance maturing debt will be funded by equity contributions.

On February 1, 2008, a cash distribution of $46.3 million was declared and paid by Northern Border for the fourth quarter of 2007, of which TC PipeLines' 50 per cent share was $23.2 million. On February 1, 2008, a cash distribution of $25.0 million was declared and paid by Great Lakes for the fourth quarter of 2007, of which TC PipeLines' 46.45 per cent share was $11.6 million.

Investing Activities for our Pipeline Systems

Capital spending for maintenance of existing facilities and growth projects were as follows for each of our investments:

(millions of dollars)	2007	2006	2005

Great Lakes[a] :			
Maintenance	**16.7**		
Growth	**—**		
Great Lakes' capital spending	**16.7**		
Northern Border:			
Maintenance	**10.6**	10.4	18.3
Growth	**—**	10.5	10.3
Northern Border's capital spending	**10.6**	20.9	28.6
Tuscarora:			
Maintenance	**0.1**	0.3	0.2
Growth	**13.1**	1.3	0.7
Tuscarora's capital spending	**13.2**	1.6	0.9

[a] Great Lakes' capital spending information includes only capital expenditures from the date of acquisition.

Our pipeline systems fund their investing activities primarily with operating cash, issuances of new debt or additional borrowings under existing facilities, and equity contributions from general partners.

In 2008, Great Lakes expects to invest approximately $20.3 million for maintenance capital expenditures. No significant growth capital expenditures are planned for 2008.

Northern Border's maintenance capital expenditures decreased $7.9 million in 2006 compared with 2005 due to a decrease in expenditures related to compressor station overhauls. Growth capital expenditures in 2006 and 2005 were primarily related to spending for the Chicago III Expansion project. In 2008, Northern Border expects to spend approximately $30 million for capital expenditures of which $13 million relates to maintenance capital and $17 million relates to growth capital in regards to the Des Plaines project, subject to receipt of the required regulatory approvals. Northern Border intends to finance half of its growth capital expenditures with equity contributions from its general partners.

$12.2 million of Tuscarora's growth capital expenditures in 2007 relate to the compressor station expansion project in Likely, California. In 2008, Tuscarora expects to spend an additional $7.0 million to fund the completion of the compressor station expansion. Tuscarora expects to fund these capital expenditures with operating cash flow.

CONTINGENCIES

Legal

Various legal actions or governmental proceedings that have arisen in the ordinary course of business are pending. Our pipeline systems believe that the resolution of these issues will not have a material adverse impact on their results of operations or financial position.

Environmental

Our pipeline systems are not aware of any material contingent liabilities with respect to compliance with applicable environmental laws and regulations.

RELATED PARTY TRANSACTIONS

Great Lakes earns transportation revenues from TransCanada and its affiliates under fixed priced contracts with remaining terms ranging from one to ten years. Great Lakes earned $113.9 million of transportation revenues under these contracts for the period February 23, 2007 to December 31, 2007. This amount represents 48.2 per cent of total revenues earned by Great Lakes for the period February 23, 2007 to December 31, 2007. $52.9 million of transportation revenue is included in the Partnership's equity income from Great Lakes during the same period. Please read Item 1. "Business", Item 1A. "Risk Factors", and Item 13. "Certain Relationships and Related Transactions" for additional information regarding Great Lakes' transportation agreements with TransCanada and ANR.

OUTLOOK

Great Lakes

At January 31, 2008, the remaining weighted average contract life of Great Lakes' contracts was 2.4 years and substantially all of its design capacity was contracted on a firm basis for the first quarter of 2008. As of January 31, 2008, Great Lakes had approximately ten per cent of its design capacity uncontracted beginning in the second quarter of 2008. Dependent on competitive factors and prevailing market conditions, Great Lakes may discount transportation capacity as needed to optimize revenue.

Northern Border

At January 31, 2008, the weighted average contract life of Northern Border's contracts was 1.3 years and substantially all of its design capacity was contracted on a firm basis for the first quarter of 2008. As of January 31, 2008, Northern Border had approximately 890 MMcf/d or 37 per cent of its design capacity uncontracted beginning in the second quarter of 2008 and 48 per cent uncontracted by the end of 2008. Prevailing market conditions and increasing competitive factors in North America, including the Rockies Express Pipeline, could cause Northern Border to discount their rates or otherwise experience a reduction in their revenues. These factors will continue to impact Northern Border's ability to market this available capacity. Northern Border expects to continue to discount transportation capacity as needed to optimize revenue.

Tuscarora

At January 31, 2008, the weighted average remaining contract life of Tuscarora's contracts was 10.4 years. As of January 31, 2008, Tuscarora has approximately five MMcf/d or two per cent of its design capacity uncontracted beginning in the second quarter of 2008.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

OVERVIEW

Our exposure to market risk discussed below includes forward-looking statements and represents an estimate of possible changes in future earnings that would occur assuming hypothetical future movements in interest rates. Our views on market risk are not necessarily indicative of actual results that may occur and do not represent the maximum possible gains and losses that may occur, since actual gains and losses will differ from those estimated, based on actual fluctuations in interest rates and the timing of transactions.

TC PipeLines is exposed to market risk due to interest rate fluctuations. Market risk is the risk of loss arising from adverse changes in market rates. We utilize financial instruments to manage the risks of certain identifiable or anticipated transactions and achieve a more predictable cash flow. Our risk management function follows established policies and procedures to monitor interest rates to ensure our hedging activities mitigate market risks. We do not use financial instruments for trading purposes.

In accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* we record financial instruments on the balance sheet as assets and liabilities based on fair value. We estimate the fair value of financial instruments using available market information and appropriate valuation techniques. Changes in financial instruments' fair value are recognized in earnings unless the instrument qualifies as a hedge under SFAS No. 133 and meets specific hedge accounting criteria. Qualifying financial instruments' gains and losses may offset the hedged items' related results in earnings for a fair value hedge or be deferred in accumulated other comprehensive income for a cash flow hedge.

INTEREST RATE RISK

TC PipeLines' interest rate exposure results from its Senior Credit Facility, which is subject to variability in LIBOR interest rates. The Partnership regularly assesses the impact of interest rate fluctuations on future cash flows and evaluates hedging opportunities to mitigate its interest rate risk. The notional amount hedged at December 31, 2007 was $475.0 million. $300.0 million of variable-rate debt is hedged by an interest rate swap during the period from March 12, 2007 through December 12, 2011, where the weighted average fixed interest rate paid is 4.89 per cent. $100.0 million of variable-rate debt is hedged by an interest rate option during the period from May 22, 2007 through May 22, 2009 to an interest rate range between a weighted average floor of 4.09 per cent and a cap of 5.35 per cent. $75.0 million of variable-rate debt is hedged by an interest rate swap during the period from February 29, 2008 through February 28, 2011, where the fixed interest rate paid will be 3.86 per cent. The interest rate swaps and options are structured such that the cash flows match those of the Senior Credit Facility. The fair value of interest rate derivatives has been calculated using year-end market rates. At December 31, 2007, the fair value of the Partnership's interest rate swaps and options accounted for as hedges was negative $9.8 million.

At December 31, 2007, TC PipeLines had $507.0 million outstanding on its Senior Credit Facility. Utilizing the conditions of the interest rate swaps and options, if LIBOR interest rates hypothetically increased by one per cent compared to the rates in effect as of December 31, 2007, the Partnership's interest expense for the year ended December 31, 2007 would have increased by $1.4 million; and if LIBOR interest rates hypothetically decreased one per cent compared to the rates in effect as of December 31, 2007, the Partnership's interest expense for the year would have decreased by $2.0 million. These amounts have been determined by considering the impact of the hypothetical interest rates on variable rate borrowings outstanding as of December 31, 2007.

Northern Border utilizes both fixed-rate and variable-rate debt and is exposed to market risk due to the floating interest rates on its credit facility. Northern Border regularly assesses the impact of interest rate fluctuations on future cash flows and evaluates hedging opportunities to mitigate its interest rate risk. As of December 31, 2007, 73 per cent of Northern Border's outstanding debt was at fixed rates. In August 2007, Northern Border entered into a Collar Agreement to limit the variability of the interest rate on $140.0 million of variable-rate borrowings during the period from October 30, 2007 through October 30, 2009 to a range between a floor of 4.35 per cent and a cap of 5.36 per cent.

Utilizing the conditions of the Collar Agreement, if interest rates hypothetically increased one per cent compared with rates in effect as of December 31, 2007, Northern Border's annual interest expense would increase and its net income would decrease by approximately $0.8 million; and if interest rates hypothetically decreased one per cent compared with rates in effect as of December 31, 2007, Northern Border's annual interest expense would decrease and its net income would increase by approximately $1.1 million.

Great Lakes and Tuscarora utilize fixed-rate debt; therefore, they are not exposed to market risk due to floating interest rates.

OTHER RISKS

The Partnership is influenced by the same factors that influence our pipeline systems. None of our pipeline systems own any of the natural gas they transport; therefore, they do not assume any of the related natural gas commodity price risk.

The state of Minnesota currently requires Great Lakes to pay use tax on the value of the shipper provided compressor fuel burned in its Minnesota compressor engines. Great Lakes is subject to primarily commodity price volatility and some volume volatility in determining the amount of use tax owed. If natural gas prices changed by $1 per million British thermal units, Great Lakes' annual use tax expense would change by approximately $0.7 million.

The Partnership does not have any material foreign exchange risks.

Item 8. Financial Statements and Supplementary Data

The information required hereunder is included in this report as set forth in the "Index to Financial Statements" on page F-1.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Based on their evaluation of the Partnership's disclosure controls and procedures as of the end of the year covered by this annual report, the principal executive officer and principal financial officer of the general partner of the Partnership have concluded that the Partnership's disclosure controls and procedures were effective in ensuring that the information required to be disclosed by the Partnership in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the

SEC's rules and forms and that information required to be disclosed by the Partnership in the reports that the Partnership files or submits under the Exchange Act is accumulated and communicated to the management of the general partner of the Partnership, including the principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

During the quarter ended December 31, 2007, there has been no change in the Partnership's internal control over financial reporting that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934. Internal control over financial reporting, no matter how well designed, has inherent limitations and can only provide reasonable assurance with respect to the preparation and fair presentation of published financial statements. Under the supervision and with the participation of our management, including our chief executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on our assessment according to the above criteria, management has concluded that our internal control over financial reporting was effective as of December 31, 2007 to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. There were no material weaknesses.

Our independent registered public accounting firm, KPMG LLP, independently assessed the effectiveness of the Partnership's internal control over financial reporting. KPMG has issued an attestation report concurring with management's assessment, which is included on page F-3 of the financial statements included in this Form 10-K.

Item 9B. Other Information

None.

Part III

Item 10. Directors, Executive Officers and Corporate Governance

TC PipeLines is a limited partnership and as such has no officers, directors or employees. Set forth below is certain information concerning the directors and officers of the general partner who manage the operations of TC PipeLines. Each director holds office for a one-year term or until his or her successor is earlier appointed. All officers of the general partner serve at the discretion of the Board of Directors of the general partner which is a wholly-owned subsidiary of TransCanada.

Name	Age	Position with General Partner
Russell K. Girling	45	Chairman, Chief Executive Officer and Director
Mark A.P. Zimmerman	43	President
Jack F. Jenkins-Stark	57	Independent Director
David L. Marshall	68	Independent Director
Walentin (Val) Mirosh	62	Independent Director
Gregory A. Lohnes	51	Director
Kristine L. Delkus	50	Director
Steven D. Becker	57	Director
Terry C. Ofremchuk	57	Vice-President, Taxation
Sean M. Brett	42	Vice-President and Treasurer
Donald J. DeGrandis	59	Secretary
Amy W. Leong	40	Controller, Principal Financial Officer

Mr. Girling was appointed a director of the general partner in April 1999 and Chief Executive Officer of the general partner in June 2006. Mr. Girling's principal occupation is President, Pipelines Division of TransCanada, a position he has held since June 2006. From March 2003 to June 2006, he was Executive Vice-President, Corporate Development and Chief Financial Officer of TransCanada. Prior to March 2003, Mr. Girling was Executive Vice-President and Chief Financial Officer of TransCanada. Mr. Girling is also a director of Agrium Inc.

Mr. Zimmerman was appointed President of the general partner in January 2007. Mr. Zimmerman's principal occupation is Vice-President, Commercial Transactions of TransCanada, a position he has held since June 2006. From September 2003 to June 2006, he was Director, Project Finance for TransCanada, and prior to September 2003, he was Director, Corporate Evaluations and Planning for TransCanada.

Mr. Jenkins-Stark was appointed a director of the general partner in July 1999. Mr. Jenkins-Stark's principal occupation is Chief Financial Officer of BrightSource Energy Inc. (designs and builds large scale solar plants that deliver solar energy in the form of steam and/or electricity), a position he has held since April 2007. Mr. Jenkins-Stark was Chief Financial Officer of Silicon Valley Bancshares (offering financial products and services, including commercial, investment, merchant and private banking and private equity services) from April 2004 to April 2007. Prior to that he was Vice-President, Business Operations and Technology at Itron Inc. (a manufacturer of automated meter reading technology and a developer of energy management software), a position he held from January 2004 to March 2004. In March 2003, Mr. Jenkins-Stark was named a Managing Director at Itron Inc. following the purchase of Silicon Energy Corp. (internet-based energy and data management software) by Itron Inc. Prior to the acquisition, Mr. Jenkins-Stark was Chief Financial Officer of Silicon Energy.

Mr. Marshall was appointed a director of the general partner in July 1999. Mr. Marshall is a corporate director.

Mr. Mirosh was appointed a director of the general partner in September 2004. Mr. Mirosh's principal occupation is Vice-President of NOVA Chemicals Corporation and President of Olefins and Feedstocks, division of NOVA Chemicals Corporation (commodity chemical company), a position he has held since July 2003. Mr. Mirosh was Partner, MacLeod, Dixon (law firm) from January 2002 to July 2003. Mr. Mirosh is also a director of Taylor NGL Limited Partnership and Superior Plus Income Fund.

Mr. Lohnes was appointed a director of the general partner in January 2007. Mr. Lohnes' principal occupation is Executive Vice-President and Chief Financial Officer of TransCanada, a position he has held since June 2006. Prior to June 2006, he was President and Chief Executive Officer of Great Lakes Gas Transmission Company.

Ms. Delkus was appointed a director of the general partner in November 2003. Ms. Delkus' principal occupation is Deputy General Counsel, Pipelines and Regulatory Affairs of TransCanada, a position she has held since September 2006. From June 2006 to September 2006, she was Vice-President, Pipeline Law and Regulatory Affairs of TransCanada. From December 2005 to June 2006, she was Vice-President, Law, Gas Transmission of TransCanada. Prior to December 2005, she was Vice-President, Law, Power and Regulatory.

Mr. Becker was appointed a director of the general partner in January 2007 and appointed Vice-President, Business Development of the general partner in September 2003. Mr. Becker's principal occupation is Vice-President, Pipeline Development of TransCanada, a position he has held since June 2006. From April 2003 to June 2006, he was Vice-President, Gas Development of TransCanada. Prior to April 2003, Mr. Becker was Vice-President, Market Development and Vice-President, Gas Strategy of TransCanada.

Mr. Ofremchuk was appointed Vice-President, Taxation of the general partner in July 2007. Mr. Ofremchuk's principal occupation is Manager, Corporate Taxation of TransCanada.

Mr. Brett was appointed Vice-President and Treasurer of the general partner in January 2007. Mr. Brett's principal occupation is Assistant

Treasurer for TransCanada, a position he has held since January 2007. Prior to January 2007, he was Director, Capital Markets for TransCanada.

Mr. DeGrandis was appointed Secretary of the general partner in April 2005. Mr. DeGrandis' principal occupation is Corporate Secretary of TransCanada, a position he has held since June 2006. From June 2004 to June 2006, he was Associate General Counsel, Corporate, Corporate Secretarial of TransCanada. Prior to June 2004, Mr. DeGrandis was Director of Corporate Legal Services and Senior Legal Counsel of TransCanada.

Ms. Leong was appointed principal financial officer of the general partner in January 2007 and Controller of the general partner in September 2003. Ms. Leong's principal occupation is Director, Pipeline Accounting of TransCanada, a position she has held since January 2005. From April 2003 until January 2005, Ms. Leong was Manager, Gas Transmission Accounting of TransCanada. Prior to April 2003, Ms. Leong was Manager, Regulatory Accounting and Capital Accounting of TransCanada.

AUDIT COMMITTEE FINANCIAL EXPERT

The Board of Directors has determined that David Marshall and Jack Jenkins-Stark are "audit committee financial experts", are "independent" and are "financially sophisticated" as defined under applicable SEC and NASDAQ Stock Market Corporate Governance rules. The Board's affirmative determination for both David Marshall and Jack Jenkins-Stark was based on their respective education and extensive experience as chief financial officers for corporations that presented a breadth and level of complexity of accounting issues that are generally comparable to those of TC PipeLines.

IDENTIFICATION OF THE AUDIT COMMITTEE

The general partner of the Partnership has a separately designated audit committee consisting of three independent board members. The members of the committee are David Marshall, as Chair, Jack Jenkins-Stark and Walentin (Val) Mirosh. All members of the Audit Committee meet the criteria for independence as set forth under the rules of the SEC and those of the NASDAQ Stock Market. None of the Audit Committee members have participated in the preparation of the financial statements of the Partnership or any of its subsidiaries at any time during the past three years. In addition, all members of the audit committee are able to read and understand fundamental financial statements, including a company's balance sheet, income statement, and cash flow statement.

CODE OF ETHICS

TC PipeLines believes that director, management and employee honesty and integrity are important factors in ensuring good corporate governance. The employees of the general partner, as employees of TransCanada, are subject to TransCanada's code of business ethics. In addition, the general partner has adopted a code of business ethics for its Chief Executive Officer, President and Principal Financial Officer and one which applies to its independent directors, being the code of business ethics for directors. All codes are published on its website at www.tcpipelineslp.com. If any substantive amendments are made to the code for senior officers or if any waivers are granted, the amendment or waiver will be published on TC PipeLines' website or filed in a report on Form 8-K.

CORPORATE GOVERNANCE

The Audit Committee has adopted a charter which specifically provides that it is responsible for the appointment, compensation, retention and oversight of the work of the independent public accountants engaged in preparing or issuing TC PipeLines' audit report, that the committee has the authority to engage independent counsel and other advisors as it determines necessary to carry out its duties and for the committee to be responsible for establishing procedures for the receipt, retention and treatment of complaints regarding accounting, internal accounting controls or auditing matters, including procedures for the confidential, anonymous submission by employees of the general partner concerns regarding questionable accounting or auditing matters. The committee has adopted TransCanada's Ethics help line in fulfillment of its responsibility to establish a confidential and anonymous whistle blowing process. The toll free Ethics Help-Line number and the audit committee's charter are published on TC PipeLines' website at www.tcpipelineslp.com.

SECTION 16(a) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE

Section 16(a) of the Exchange Act requires the Partnership's directors and executive officers, and persons who own more than ten per cent of the common units, to file initial reports of ownership and reports of changes in ownership (Forms 3, 4, and 5) of the common units with the SEC and the NASDAQ Global Market. Executive officers, directors and greater than ten per cent unitholders are required by SEC regulation to furnish the Partnership with copies of all such forms that they file.

Based solely upon a review of reports on Forms 3 and 4 and amendments thereto furnished to the Partnership during its most recent fiscal year and reports on Form 5 and amendments thereto furnished to the Partnership with respect to its most recent fiscal year, and written representations from officers and directors of the general partner that no Form 5 was required, the Partnership believes that all filing requirements applicable to its officers, directors and beneficial owners under Section 16(a) were complied with during the year ended December 31, 2007.

Item 11. Executive Compensation

COMPENSATION DISCUSSION AND ANALYSIS

We are a master limited partnership and we do not directly employ any of the individuals responsible for managing or operating our business nor do we have any directors. We are managed by the executive officers of our general partner who are also our executive officers. The executive officers of our general partner are compensated directly by TransCanada.

The compensation policies and philosophy of TransCanada govern the types and amount of compensation granted each of the named executive officers. Since these policies and philosophy are those of TransCanada, we refer you to a discussion of those items as set forth in the Executive Compensation section of the TransCanada "Management Proxy Circular" on the TransCanada website at www.transcanada.com. The TransCanada "Management Proxy Circular" is produced by TransCanada pursuant to Canadian securities regulations and is not incorporated into this document by reference or deemed furnished or filed by us under the Securities Exchange Act of 1934, as amended; rather the reference is to provide our investors with an understanding of the compensation policies and philosophy of the ultimate parent of our general partner.

The board of directors of our general partner does not have a separate compensation committee, nor does it make any determination with respect to the amount of compensation to be paid to our executive officers. The board of our general partner does have responsibility for evaluating and determining the reasonableness of the total amount we are charged for managerial, administrative and operational support provided by TransCanada, and its affiliates, including our general partner. The board specifically approves the allocation of the salary of the CEO to the Partnership on an annual basis. Please read Item 13. "Certain Relationships and Related Transactions" for more information regarding this arrangement.

In addition to base salary, we also reimburse our general partner for certain benefit and incentive compensation expenses related to the officers of our general partner and employees of an affiliate of our general partner who perform services on our behalf. The base salaries that are allocable to us vary for each officer or employee of an affiliate of our general partner performing services on our behalf and are based on the amount of time an employee devotes to matters related to our business as compared to the amount of time such employee devotes to matters related to the business of TransCanada and its other affiliates. We are allocated and reimburse the general partner for

each officer's salary expense. Other benefit and incentive compensation expenses related to our officers are reimbursed to the general partner based upon an agreed upon calculation.

The following table summarizes the salary allocated to and paid by us in 2006 and 2007 for our principal executive officer, president and principal financial officers. None of the other executive officers of our general partner allocated to us more than $100,000 related to their salary.

Summary Compensation Table

		Base Salary Allocated to the Partnership		
Name and Principal Position	**Year**	**Canadian Dollars**	**United States Dollar Equivalent (1)**	**Total (1)**
Russell K. Girling, Chief Executive Officer	2007	60,250	60,973	60,973
	2006	49,835	42,763	42,763
Mark A.P. Zimmerman, President	2007	102,500	103,729	103,729
Gregory A. Lohnes, Chief Financial Officer	2007	—	—	—
	2006	—	—	—
Amy W. Leong, Controller and Principal Financial Officer	2007	16,475	16,673	16,673
	2006	15,500	13,301	13,301

(1) The compensation of executive officers of the general partner is paid by TransCanada in Canadian dollars. The United States dollar equivalents have been calculated using the applicable December 31, 2007 and 2006 noon buying rates of 1.0120 and 0.8581, respectively, as reported by the Bank of Canada.

We reimburse our general partner for benefit and incentive compensation expenses based on a set formula, which expenses are attributable to additional compensation paid to each of them and other compensation and employment-related expenses, including TransCanada's restricted stock unit and stock option awards, retirement plans, health and welfare plans, employer-related payroll taxes, matching contributions made under a TransCanada's employee savings plan, and premiums for health and life insurance. This reimbursement is determined monthly and calculated based on total monthly base salary allocated to us multiplied by a factor of .38 for benefits and a factor of .30 for incentive compensation. The total amount reimbursed for benefits and incentive compensation were $334,678 in 2006 and $548,665 in 2007.

Director Compensation

Each director who is not an employee of TransCanada, the general partner or its affiliates (independent director) is entitled to a directors' retainer fee of $20,000 per annum. The independent director appointed as Lead Director and chair of the Conflicts Committee is entitled to an additional fee of $6,000 per annum, while the independent director appointed as chair of the Audit Committee is entitled to an additional fee of $4,000 per annum. These fees are paid by the Partnership on a semi-annual basis. Each independent director is also paid a fee of $1,500 for attendance at each meeting of the Board of Directors and a fee of $1,500 for attendance at each meeting of a committee of the Board. The independent directors are reimbursed for out-of-pocket expenses incurred in the course of attending such meetings.

Director Compensation Table

Name	Fees Earned or Paid in Cash	Total
David L. Marshall	60,000	60,000
Jack F. Jenkins-Stark	64,500	64,500
Walentin (Val) Mirosh	53,000	53,000

In October 2007, a revised compensation plan was approved for independent directors. Effective January 1, 2008, the directors' retainer fee was increased to $30,000 per annum from $20,000 per annum and directors will receive an annual grant of Partnership units under the Deferred Share Unit (DSU) Plan with a value of $20,000, as an equity

component of the annual retainer. No adjustments were made to meeting attendance fees or retainers for the Lead Director and chair of Conflicts Committee or chair of Audit Committee.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The following table sets forth the beneficial ownership of the voting securities of the Partnership as of February 25, 2008 by the general partner's directors, officers and certain beneficial owners. Executive officers of the general partner own shares of TransCanada, which in the aggregate amount to less than one per cent of TransCanada's issued and outstanding shares. Other than as set forth below, no person is known by the general partner to own beneficially more than five per cent of the voting securities of the Partnership.

	Amount and Nature of Beneficial Ownership		
Name and Business Address	Number of Common Units[1]	Number of DSUs[2]	Per cent of Class[3]
TransCan Northern Ltd. [4] 450 1st Street SW Calgary, Alberta T2P 5H1	8,678,045	—	24.9
TC Pipelines GP, Inc. [5] [6] 450 1st Street SW Calgary, Alberta T2P 5H1	2,035,106	—	5.8
David L. Marshall [7] 450 1st Street SW Calgary, Alberta T2P 5H1	450	550	*
Walentin (Val) Mirosh [8] 10th Floor, 1000-7th Avenue SW Calgary, Alberta T2P 5L5	—	550	*
Jack F. Jenkins-Stark [9] 1999 Harrison Street, Suite 500 Oakland, CA 94612	4,933	550	*
Gregory A. Lohnes 450 1st Street SW Calgary, Alberta T2P 5H1	—	—	—
Steven D. Becker 450 1st Street SW Calgary, Alberta T2P 5H1	—	—	—
Russell K. Girling 450 1st Street SW Calgary, Alberta T2P 5H1	6,000	—	*
Kristine L. Delkus 450 1st Street SW Calgary, Alberta T2P 5H1	—	—	—
Directors and Executive officers as a Group [10] [11] (12 persons)	—	—	*

(1) A total of 34,856,086 common units are issued and outstanding.

(2) A deferred share unit is a bookkeeping entry, equivalent to the value of a TC Pipelines common unit, and does not entitle the holder to voting or other shareholder rights, other than the accrual of additional deferred share units for the value of dividends. A director cannot redeem deferred share units until the director ceases to be a member of the Board. Directors can then redeem their units for cash or shares.

(3) Any deferred share units shall be deemed to be outstanding for the purpose of computing the percentage of outstanding common units owned by such person, but shall not be deemed to be outstanding for the purpose of computing the percentage of common units by any other person.

(4) TransCan Northern Ltd. is a wholly-owned indirect subsidiary of TransCanada.

(5) TC PipeLines GP, Inc. is a wholly-owned indirect subsidiary of TransCanada.

(6) TC PipeLines GP, Inc. owns an aggregate of two per cent general partner interest of TC PipeLines.

(7) 450 common units are held directly by Mr. Marshall.

(8) No common units are currently held by Mr. Mirosh.

(9) 4,933 common units are held by the Jenkins-Stark Family Trust dated June 16, 1995.

(10) With the exception of the two named directors above and Russell K. Girling, none of the other directors and executive officers hold any common units of TC PipeLines.

(11) Walentin (Val) Mirosh holds 726 shares of TransCanada, Russell K. Girling holds 394,108 options and 13,674 shares of TransCanada; Kristine L. Delkus holds 91,784 options and 3,874 shares of TransCanda; Steven D. Becker holds 103,275 options and 2,620 shares of TransCanada; Terry C. Ofremchuk holds 6,750 options and 5,216 shares of TransCanada; Gregory A. Lohnes holds 48,497 options and 9,880 shares of TransCanada; Amy W. Leong holds 5,600 options and 3,327 shares of TransCanada; Donald J. DeGrandis holds 17,300 options and 528 shares of TransCanada; Mark A.P. Zimmerman holds 20,413 options and 380 shares of TransCanada and Sean M. Brett holds 15,500 options of TransCanada, 9,713 shares of TransCanada and 500 Series U preferred shares of TransCanada PipeLines Limited, a wholly-owned subsidiary of TransCanada. The directors and executive officers as a group hold 703,227 options of TransCanada, 49,938 shares of TransCanada and 500 Series U preferred shares of TransCanada PipeLines Limited. All options listed above are exercisable within 60 days from February 28, 2008.

* Less than one per cent.

Item 13. Certain Relationships and Related Transactions, and Director Independence

At February 28, 2008, TransCan Northern owns 8,678,045 common units and the Partnership's general partner owns 2,035,106 common units, representing an aggregate 30.1 per cent limited partner interest in the Partnership. In addition, the general partner owns an aggregate two per cent general partner interest in the Partnership through which it manages and operates the Partnership. As a result, TransCanada's aggregate ownership interest in the Partnership is 32.1 per cent by virtue of its indirect ownership of the general partner and 30.1 per cent aggregate limited partner interest.

The general partner is accountable to TC PipeLines and the unitholders as a fiduciary. Neither the Delaware Revised Uniform Limited Partnership Act (Delaware Act) nor case law defines with particularity the fiduciary duties owed by general partners to limited partners of a limited partnership. The Delaware Act does provide that Delaware limited partnerships may, in their partnership agreements, restrict or expand the fiduciary duties owed by a general partner to limited partners and the partnership.

In order to induce the general partner to manage the business of TC PipeLines, the partnership agreement contains various provisions restricting the fiduciary duties that might otherwise be owed by the general partner. The following is a summary of the material restrictions of the fiduciary duties owed by the general partner to the limited partners:

- The partnership agreement permits the general partner to make a number of decisions in its "sole discretion." This entitles the general partner to consider only the interests and factors that it desires and it shall have no duty or obligation to give any consideration to any interest of, or factors affecting, TC PipeLines, its affiliates or any limited partner. Other provisions of the partnership agreement provide that the general partner's actions must be made in its reasonable discretion.
- The partnership agreement generally provides that affiliated transactions and resolutions of conflicts of interest not involving a required vote of unitholders must be "fair and reasonable" to TC PipeLines. In determining whether a transaction or resolution is "fair and reasonable" the general partner may consider

interests of all parties involved, including its own. Unless the general partner has acted in bad faith, the action taken by the general partner shall not constitute a breach of its fiduciary duty.
- The partnership agreement specifically provides that it shall not be a breach of the general partner's fiduciary duty if its affiliates engage in business interests and activities in competition with, or in preference or to the exclusion of, TC PipeLines. Further, the general partner and its affiliates have no obligation to present business opportunities to TC PipeLines.
- The partnership agreement provides that the general partner and its officers and directors will not be liable for monetary damages to TC PipeLines, the limited partners or assignees for errors of judgment or for any acts or omissions if the general partner and those other persons acted in good faith.

TC PipeLines is required to indemnify the general partner and its officers, directors, employees, affiliates, partners, members, agents and trustees (collectively referred to hereafter as the General Partner and others), to the fullest extent permitted by law, against liabilities, costs and expenses incurred by the General Partner and others. This indemnification is required if the General Partner and others acted in good faith and in a manner they reasonably believed to be in, or (in the case of a person other than the general partner) not opposed to, the best interests of TC PipeLines. Indemnification is required for criminal proceedings if the General Partner and others had no reasonable cause to believe their conduct was unlawful.

The Partnership does not have any employees. The management and operating functions are provided by the general partner. The general partner does not receive a management fee or other compensation in connection with its management of the Partnership. The Partnership reimburses the general partner for all costs of services provided, including the costs of employee, officer and director compensation and benefits, and all other expenses necessary or appropriate to the conduct of the business of, and allocable to, the Partnership. Such costs include (i) overhead costs (such as office space and equipment) and (ii) out-of-pocket expenses related to the provision of such services. The Partnership Agreement provides that the general partner will determine the costs that are allocable to the Partnership in any reasonable manner determined by the general partner in its sole discretion. Total costs charged to the Partnership by the general partner were $1.9 million for the year ended December 31, 2007.

Pursuant to our Partnership agreement, whenever a potential conflict of interest exists or arises between the general partner or any of its affiliates and the Partnership, any resolution or course of action by the general partner or its affiliates in respect of such conflict of interest shall be permitted if the resolution or course of action is deemed to be fair and reasonable to the Partnership. As such, the general partner has established a Conflicts Committee, of not less than two independent directors, to oversee all matters relating to the resolution of conflicts of interest and to provide to our Board of Directors recommendation for such resolution of conflicts of interest.

On February 22, 2007, the Partnership acquired a 46.45 per cent general partner interest in Great Lakes from El Paso Corporation. The acquisition was partially financed through a private placement of common units for gross proceeds of $600.0 million which closed concurrently with the acquisition. TransCan Northern purchased 8,678,045 of the 17,356,086 common units issued for gross proceeds of $300 million. In addition, TC PipeLines GP maintained its two per cent general partner interest in the Partnership by contributing $12.6 million to the Partnership in connection with the private placement. TransCanada, which previously held a 50 per cent interest in Great Lakes, acquired the other 3.55 per cent interest simultaneously with the Partnership's acquisition of its interest. A wholly-owned subsidiary of TransCanada became the operator of Great Lakes through TransCanada's acquisition of Great Lakes Gas Transmission Company.

TCNB became the operator of Northern Border effective April 1, 2007. On December 19, 2006, the Partnership acquired an additional 49 per cent general partner interest in Tuscarora. In connection with this transaction, TCNB became the operator of Tuscarora. TransCanada and its affiliates provide capital and operating services to our pipeline systems. TransCanada and its affiliates also incur costs on behalf of our pipeline systems, including, but not limited to, employee benefit costs, property and liability insurance costs, and transition costs. Total costs charged to our pipeline systems in 2007 by TransCanada and its affiliates and amounts owed to TransCanada and its affiliates at December 31, 2007 are summarized in the following table:

(millions of dollars)	Great Lakes	Northern Border	Tuscarora
Costs charged by TransCanada and its affiliates	25.6	22.5	1.8
Impact on the Partnership's net income	11.2	11.0	0.9
Amount owed to TransCanada and its affiliates	1.9	3.0	3.5

Great Lakes earns transportation revenues from TransCanada and its affiliates under fixed priced contracts with remaining terms ranging from one to ten years. Great Lakes earned $113.9 million of transportation revenues under these contracts for the period February 23, 2007 to December 31, 2007. This amount represents 48.2 per cent of total revenues earned by Great Lakes for the period February 23, 2007 to December 31, 2007. $52.9 million of transportation revenue is included in the Partnership's equity income from Great Lakes during the same period. At December 31, 2007, $10.0 million is included in Great Lakes' receivables in regards to the transportation contracts with TransCanada and its affiliates.

For the year ended December 31, 2007, the Partnership recorded transmission revenues of $19.4 million in regards to various contracts with Sierra Pacific Power Company, a wholly-owned subsidiary of Sierra Pacific Resources.

On May 8, 2007, the Partnership reimbursed TransCanada $2.8 million for third party costs related to the Partnership's acquisition of its interest in Great Lakes. On September 26, 2007, the Partnership reimbursed TransCanada $1.2 million for a working capital adjustment related to the Partnership's acquisition of its interest in Great Lakes.

On December 31, 2007, the Partnership acquired a one per cent general partner interest in Tuscarora from a wholly-owned subsidiary of TransCanada for $2.0 million. The purchase price of this acquisition was derived from the formula used to calculate the purchase price of a different one per cent general partner interest in Tuscarora which was purchased from Tuscarora Gas Pipeline Co, a wholly-owned subsidiary of Sierra Pacific Resources on the same day.

Item 14. Principal Accounting Fees and Services

The following table sets forth, for the periods indicated, the fees billed by the principal accountants.

	2007	2006
Audit Fees [(1)]	**310,745**	217,803
Audit Related Fees [(2)]	**170,014**	26,500

Tax Fees [3]	—	—
All Other Fees [3]	—	—

[(1)] Audit Fees include services performed related to Sarbanes-Oxley Act reporting requirements.

[(2)] The increase in Audit Related Fees is primarily due to prospectus work in connection with the Great Lakes acquisition.

[(3)] The Partnership has not engaged its external auditors for any tax or other services in 2007 or 2006.

AUDIT FEES

Audit fees include fees for the audit of annual GAAP financial statements, reviews of the related quarterly financial statements and related consents and comforts letters for documents filed with the SEC. Before our independent principal accountant is engaged each year for annual audit and other audit and any non-audit services, these services and fees are reviewed and approved by our Audit Committee.

PART IV

Item 15. Exhibits, Financial Statement Schedules

a) (1) and (2) Financial Statements and Financial Statement Schedules
The financial statements filed as part of this report are listed in the "Index to Financial Statements" on page F-1.
(3) Exhibits

No.	Description
*+2.1	Partnership Interest Purchase and Sale Agreement dated as of December 31, 2005 by and between Northern Border Intermediate Limited Partnership and TC PipeLines Intermediate Limited Partnership (Exhibit 2.1 to TC PipeLines, LP's Form 8-K filed on February 15, 2006 (File No. 000-26091)).
*+2.2	General Partnership Interest Purchase Agreement dated as of November 1, 2006 by and between Tuscarora Gas Pipeline Co. and TC Tuscarora Intermediate Limited Partnership (Exhibit 2.1 to TC PipeLines, LP's Form 8-K filed on November 7, 2006 (File No. 000-26091)).
*+2.3	General Partner Interest Holder Agreement dated as of November 1, 2006 by and between Tuscarora Gas Pipeline Co. and TC Tuscarora Intermediate Limited Partnership (Exhibit 2.2 to TC PipeLines, LP's Form 8-K filed on November 7, 2006 (File No. 000-26091)).
*+2.4	Purchase and Sale Agreement among El Paso Great Lakes Company, L.C.C., as Seller, and TC GL Intermediate Limited Partnership and TransCanada PipeLine USA Ltd., as Buyers dated as of December 22, 2006 (Exhibit 2.1 to TC PipeLines, LP's Form 8-K filed on December 26, 2006 (File No. 000-26091)).
2.5	General Partnership Interest Purchase Agreement dated as of December 20, 2007 by and between TCPL Tuscarora Ltd. and TC Pipelines Tuscarora LLC.
*3.1	Amended and Restated Agreement of Limited Partnership of TC PipeLines, LP dated May 28, 1999 (Exhibit 3.1 to TC PipeLines, LP's Form 10-K filed on March 28, 2000 (File No. 333-69947)).
3.1.1	Amendment to the Amended and Restated Agreement of Limited Partnership of TC PipeLines, LP dated November 19, 2007.
*3.2	Certificate of Limited Partnership of TC PipeLines, LP (Exhibit 3.2 to TC PipeLines, LP's Form S-1 Registration Statement, Registration No. 333-69947 filed on December 30, 1998).
*4.1	Indenture, dated as of August 17, 1999 between Northern Border Pipeline Company and Bank One Trust Company, NA, successor to The First National Bank of Chicago, Trustee (Exhibit 4.1 to Northern Border Pipeline Company's Form S-4 Registration Statement, Registration No. 333-88577 filed on October 7, 1999).
*4.2	Indenture, Assignment and Security Agreement dated December 21, 1995 between Tuscarora Gas Transmission Company and Wilmington Trust Company, as trustee (Exhibit 99.1 to TC PipeLines, LP's Form 10-Q filed on November 13, 2000 (File No.333-69947)).
*4.3	Indenture dated September 17, 2001, between Northern Border Pipeline Company and Bank One Trust Company, N.A., Trustee (Exhibit 4.2 to Northern Border Pipeline Company's Form S-4 Registration Statement, Registration No. 333-73282 filed on November 13, 2001).
*4.4	Registration Rights Agreement between TC PipeLines, LP, TransCan Northern Ltd., Kayne Anderson MLP Investment Company, Kayne Anderson Energy Total Return Fund, Inc., Kayne Anderson MLP Fund, L.P., Kayne Anderson Capital Income Partners (QP), L.P., Strome MLP Fund, LP, Royal Bank of Canada, Tortoise Energy Infrastructure Corporation, Tortoise Energy Capital Corporation, Tortoise North American Energy Corporation, GPS Income Fund LP, GPS High Yield Equities Fund, HFR RVAGPS Master Trust, GPS New Equity Fund LP, TPG-Axon Partners, LP, Lehman Brothers Inc., Structured Finance Americas, LLC, The Cushing MLP Opportunity Fund I, LP, Swank MLP Convergence Fund, LP, and Citigroup Global Markets, Inc.

	dated February 22, 2007 (Exhibit 4.1 to TC PipeLines, LP's Form 8-K filed on February 23, 2007 (File No. 000-26091)).
*10.1	Contribution, Conveyance and Assumption Agreement among TC PipeLines, LP and certain other parties dated May 28, 1999 (Exhibit 10.2 to TC PipeLines, LP's Form 10-K filed on March 28, 2000 (File No. 333-69947)).
*10.2	First Amended and Restated General Partnership Agreement of Northern Border Pipeline Company dated April 6, 2006, by and between Northern Border Intermediate Limited Partnership and TC Pipelines Intermediate Limited Partnership (Exhibit 3.1 to Northern Border Pipeline Company's Form 8-K filed on April 12, 2006 (File No. 333-87753)).

INDEX TO FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors of TC PipeLines GP, Inc., General Partner of TC PipeLines, LP:

We have audited the accompanying consolidated balance sheets TC PipeLines, LP (a Delaware limited partnership) and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of income, comprehensive income, cash flows and changes in partners' equity for each of the years in the three-year period ended December 31, 2007. These consolidated financial statements are the responsibility of the General Partner's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of TC PipeLines, LP and subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), TC PipeLines, LP's internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 27, 2008 expressed an unqualified opinion on the effectiveness of the Partnership's internal control over financial reporting.

Calgary, Canada
February 27, 2008

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors of TC PipeLines GP, Inc., General Partner of TC PipeLines, LP:

We have audited TC PipeLines, LP's internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Management of the General Partner of TC PipeLines, LP is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Controls over Financial Reporting. Our responsibility is to express an opinion on the Partnership's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

An entity's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. An entity's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and directors of the entity; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the entity's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, TC PipeLines, LP maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of TC PipeLines, LP as of December 31, 2007 and 2006, and the related consolidated statements of income, comprehensive income, cash flows and changes in partners' equity for each of the years in the three-year period ended December 31, 2007, and our report dated February 27, 2008 expressed an unqualified opinion on those consolidated financial statements.

TC PIPELINES, LP
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 ORGANIZATION

TC PipeLines, LP and its subsidiary limited partnerships and limited liability company, including TC PipeLines Intermediate Limited Partnership, TC Tuscarora Intermediate Limited Partnership and TC GL Intermediate Limited Partnership, all Delaware limited partnerships, and TC Pipelines

Tuscarora LLC, are collectively referred to herein as TC PipeLines or the Partnership. TC PipeLines was formed by TransCanada PipeLines Limited, a wholly-owned subsidiary of TransCanada Corporation (collectively referred to herein as TransCanada), to acquire, own and participate in the management of energy infrastructure assets in North America.

TC PipeLines, through TC GL Intermediate Limited Partnership, owns a 46.45 per cent general partner interest in Great Lakes Gas Transmission Limited Partnership (Great Lakes), a Delaware limited partnership. Great Lakes owns a 2,115-mile pipeline that transports natural gas serving markets in Minnesota, Wisconsin, Michigan and Eastern Canada.

TC PipeLines, through TC PipeLines Intermediate Limited Partnership, owns a 50 per cent general partner interest in Northern Border Pipeline Company (Northern Border), a Texas general partnership. Northern Border owns a 1,249-mile U.S. interstate pipeline system that transports natural gas from the Montana-Saskatchewan border to markets in the Midwestern U.S.

TC PipeLines also, through TC Tuscarora Intermediate Limited Partnership and TC Pipelines Tuscarora LLC, wholly-owns Tuscarora Gas Transmission Company (Tuscarora), a Nevada general partnership. Tuscarora owns a 240-mile U.S. interstate pipeline system that transports natural gas from Oregon, where it interconnects with facilities of Gas Transmission Northwest Corporation (GTN), a wholly-owned subsidiary of TransCanada, to Northern Nevada.

TC PipeLines is managed by its general partner, TC PipeLines GP, Inc. (TC PipeLines GP), a wholly-owned subsidiary of TransCanada. The general partner provides administrative services for the Partnership and is reimbursed for its costs and expenses. In addition to its aggregate two per cent general partner interest in TC PipeLines, on a combined basis, the general partner owns 2,035,106 common units, representing an effective 7.7 per cent limited partner interest in the Partnership at December 31, 2007. TransCanada also indirectly holds 8,678,045 common units representing an effective 24.4 per cent limited partner interest in the Partnership at December 31, 2007.

NOTE 2 SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Presentation

The accompanying financial statements and related notes present the financial position of the Partnership as of December 31, 2007 and 2006 and the results of its operations, cash flows and changes in partners' equity for the years ended December 31, 2007, 2006 and 2005. The Partnership uses the equity method of accounting for its investments in Great Lakes and Northern Border, over which it is able to exercise significant influence. TC PipeLines accounted for its investment in Tuscarora using the equity method until December 19, 2006. On this date, the Partnership acquired an additional 49 per cent general partner interest in Tuscarora and as a result of acquiring a controlling interest in Tuscarora, began to consolidate Tuscarora's operations. Amounts are stated in U.S. dollars. Certain comparative figures have been reclassified to conform to the current year's presentation.

(b) Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although management believes these estimates are reasonable, actual results could differ from these estimates.

(c) Cash and Short-Term Investments

The Partnership's short-term investments with original maturities of three months or less are considered to be cash equivalents and are recorded at cost, which approximates market value.

(d) Plant, Property and Equipment

Plant, property and equipment relates solely to Tuscarora and is stated at original cost. Costs of restoring the land above and around the pipeline are capitalized to pipeline facilities and depreciated over the remaining life of the related pipeline facilities. Depreciation of pipeline facilities and compression equipment is provided on a straight-line composite basis over the estimated useful life of the pipeline of 30 years and of the compression equipment of 25 years. Metering and other is depreciated on a straight-line basis over the estimated useful lives of the equipment, which range from 3 to 30 years. Repair and maintenance costs are expensed as incurred. Costs that are considered a betterment are capitalized. An allowance for funds used during construction, using the rate of return on rate base approved by the Federal Energy Regulatory Commission (FERC), is capitalized and included in the cost of plant, property and equipment.

Long-lived assets are assessed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability is assessed by comparing the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amounts of such assets exceed the fair value of the assets.

(e) Partners' Equity

Costs incurred in connection with the issuance of units are deducted from the proceeds received.

(f) Revenue Recognition

Transmission revenues are recognized in the period in which the service is provided. When rate cases are pending final FERC approval, a portion of revenue collected is subject to possible refund. As of December 31, 2007, the Partnership has not recognized any transmission revenue that is subject to refund.

(g) Income Taxes

As a partnership, TC PipeLines is not subject to Federal or state income tax. The tax effect of the Partnership's activities accrues to its partners. The Partnership's taxable income or loss, which may vary substantially from the net income or loss reported in the consolidated statement of income, is includable in the federal income tax returns of each partner. The aggregate difference in the basis of the Partnership's net assets for financial and income tax purposes cannot be readily determined because all information regarding each partner's tax attributes related to the partnership is not available.

(h) Acquisitions and Goodwill

The Partnership accounts for business acquisitions using the purchase method of accounting and accordingly the assets and liabilities of the acquired entities are recorded at their estimated fair values at the date of acquisition. The excess of the purchase price over the fair value of net assets acquired is attributed to goodwill. Goodwill is not amortized for accounting purposes; however, it is tested on an annual basis for impairment, or more frequently if any indicators of impairment are evident.

(i) Derivative Financial Instruments and Hedging Activities

The Partnership utilizes derivative and other financial instruments to manage its exposure to changes in interest rates. Derivatives and other instruments must be designated as hedges and be effective to qualify for hedge accounting. Derivatives are recorded at their fair value at each balance sheet date. For cash flow hedges, unrealized gains or losses relating to derivatives are recognized as other comprehensive income. In the event that a derivative does not meet the designation or effectiveness criteria, any unrealized gain or loss on the instrument is recognized immediately in earnings.

If a derivative that previously qualified as a hedge is settled, de-designated or ceases to be effective, the gain or loss at that date is deferred and recognized in the same period and in the same financial statement category as the corresponding hedged transactions. If a hedged anticipated transaction is no longer probable to occur, related gains or losses are immediately recognized in earnings and amounts previously recognized in other comprehensive income

are reclassified to earnings prospectively. Costs associated with the purchase of certain hedging instruments are deferred and amortized against interest expense.

(j) Asset Retirement Obligation

Statement of Financial Accounting Standards (SFAS) No. 143, *Accounting for Asset Retirement Obligations,* provides accounting requirements for the recognition and measurement of liabilities associated with the retirement of tangible long-lived assets. Under the standard, these liabilities are recognized at fair value as incurred and capitalized as part of the cost of the related tangible long-lived assets. Accretion of the liabilities due to the passage of time is classified as an operating expense. Retirement obligations associated with long-lived assets included within the scope of SFAS No. 143 are those for which a legal obligation exists under enacted laws, statutes, ordinances, or written or oral contracts, including obligations arising under the doctrine of promissory estoppel.

FIN 47, *Accounting for Conditional Asset Retirement Obligations – an interpretation of SFAS No. 143,* clarifies the term "conditional asset retirement obligation," as used in SFAS No. 143 and the circumstances under which an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation. No amount is recorded for asset retirement obligations relating to the assets as it is not possible to make a reasonable estimate of the fair value of the liability due to the inability to determine the scope and timing of the asset retirements. Management believes it is reasonable to assume that all retirement costs associated with the pipeline system will be recovered through rates in future periods.

(k) Government Regulation

Tuscarora, our wholly-owned pipeline system, is subject to regulation by the FERC. The Partnership's accounting policies conform to SFAS No. 71, *Accounting for the Effects of Certain Types of Regulation.* Accordingly, certain assets or liabilities that result from the regulated ratemaking process are recorded that would not be recorded under generally accepted accounting principles for non-regulated entities. The Partnership regularly evaluates the continued applicability of SFAS No. 71, considering such factors as regulatory changes, the impact of competition, and the ability to recover regulatory assets. As of December 31, 2007 and 2006, the Partnership has no regulatory assets or liabilities.

NOTE 3 INVESTMENT IN GREAT LAKES

On February 22, 2007, the Partnership acquired a 46.45 per cent general partner interest in Great Lakes. TransCanada, which previously held a 50 per cent interest in Great Lakes, acquired the other 3.55 per cent interest concurrent with the Partnership's acquisition of its interest. Effective February 22, 2007, a wholly-owned subsidiary of TransCanada became the operator of Great Lakes. Great Lakes is regulated by the FERC.

TC GL Intermediate Limited Partnership, as one of the general partners, may be exposed to the commitments and contingencies of Great Lakes. TC PipeLines, LP holds a 98.9899 per cent limited partnership interest in TC GL Intermediate Limited Partnership.

The Partnership uses the equity method of accounting for its investment in Great Lakes. TC PipeLines' equity income from its investment in Great Lakes amounted to $49.0 million for the period February 23, 2007 to December 31, 2007. Great Lakes had no undistributed earnings for the year ended December 31, 2007.

The following sets out summarized financial information for Great Lakes as at December 31, 2007 and for the period February 23, 2007 to December 31, 2007:

Summarized Consolidated Great Lakes Balance Sheet

December 31 (millions of dollars)	2007
Assets	
Cash and short-term investments	32.0
Other current assets	55.5
Plant, property and equipment, net	969.2
	1,056.7
Liabilities and Partners' Equity	
Current liabilities	50.7
Deferred credits	0.4
Long-term debt, including current maturities	440.0
Partners' capital	565.6
	1,056.7

Summarized Consolidated Great Lakes Income Statement

For the period February 23 to December 31 (millions of dollars)	2007
Transmission revenues	236.2
Operating expenses	(53.7)
Depreciation	(49.4)
Financial charges, net and other	(27.6)
Net income	105.5

NOTE 4 INVESTMENT IN NORTHERN BORDER

The Partnership owns a 50 per cent general partner interest in Northern Border. The remaining 50 per cent partnership interest in Northern Border is held by ONEOK Partners, L.P. (ONEOK), a publicly traded limited partnership. The Northern Border system was operated by ONEOK Partners GP, LLC (ONEOK Partners GP), a wholly-owned subsidiary of ONEOK, Inc. during the three months ended March 31, 2007. Effective April 1, 2007, TransCanada Northern Border Inc. (TCNB), a wholly-owned subsidiary of TransCanada, became the operator of Northern Border. Northern Border is regulated by the FERC.

TC PipeLines Intermediate Limited Partnership, as one of the general partners, may be exposed to the commitments and contingencies of Northern Border. TC PipeLines, LP holds a 98.9899 per cent limited partnership interest in TC PipeLines Intermediate Limited Partnership.

On April 6, 2006, the Partnership acquired an additional 20 per cent general partner interest in Northern Border. The Partnership uses the equity method of accounting for its investment in Northern Border. TC PipeLines' equity income for the year ended December 31, 2006 includes 30 per cent of the net income of Northern Border up to April 6, 2006 and 50 per cent thereafter. Equity income from Northern Border includes amortization of a $10 million transaction fee paid to the operator of Northern Border as an inducement to become operator at the time of the additional 20 per cent acquisition in April 2006. TC PipeLines' equity income from its investment in Northern Border amounted to $61.2 million for the year ended December 31, 2007 (2006 - $56.6 million; 2005 - $45.7 million). Northern Border had no undistributed earnings for the years ended December 31, 2007, 2006 and 2005.

The following sets out summarized financial information for Northern Border as at December 31, 2007 and 2006 and for the years ended December 31, 2007, 2006 and 2005:

Summarized Northern Border Balance Sheet

December 31 (millions of dollars)	2007	2006

Financial charges, net and other	**(41.1)**	(41.3)	(40.5)
Net income	**124.1**	129.9	152.3

NOTE 5 INVESTMENT IN TUSCARORA

As of December 31, 2007, the Partnership wholly-owns Tuscarora. On December 19, 2006, the Partnership acquired an additional 49 per cent general partner interest in Tuscarora from Tuscarora Gas Pipeline Co., a wholly-owned subsidiary of Sierra Pacific Resources. Prior to this acquisition, the Partnership used the equity method of accounting for its investment in Tuscarora. Subsequent to this acquisition, the Partnership used the consolidation method of accounting for its investment in Tuscarora. On December 31, 2007, the Partnership acquired the remaining two per cent general partner interest in Tuscarora, with one per cent purchased from a wholly-owned subsidiary of TransCanada and the other one per cent purchased from Tuscarora Gas Pipeline Co. Tuscarora is operated by TCNB. Tuscarora is regulated by the FERC.

The Partnership recorded net income from Tuscarora under the consolidation method of $11.4 million and $0.4 million for the year ended December 31, 2007 and the period December 20, 2006 to December 31, 2006, respectively. TC PipeLines' equity income from its investment in Tuscarora amounted to $5.9 million and $7.5 million for the period January 1, 2006 to December 19, 2006 and the year ended December 31, 2005, respectively. Tuscarora had no undistributed earnings for the years ended December 31, 2007, 2006 and 2005. For the year ended December 31, 2007, the following customers contributed to more than 10 per cent of Tuscarora's revenue: Sierra Pacific Power Company (72 per cent), Southwest Gas Company (13 per cent) and Barrick Goldstrike Mines (11 per cent).

The following sets out summarized financial information for Tuscarora as at December 31, 2007 and 2006 and for the years ended December 31, 2007, 2006 and 2005:

Summarized Tuscarora Balance Sheet

December 31 (millions of dollars)	2007	2006

NOTE 7 ACQUISITIONS

Great Lakes

On February 22, 2007, the Partnership acquired a 46.45 per cent general partner interest in Great Lakes from El Paso Corporation (El Paso). The total purchase price was $942.4 million, subject to certain closing adjustments, and included the indirect assumption of $209.0 million of debt. The acquisition was partially financed through a private placement of common units for gross proceeds of $600.0 million which closed concurrently with the acquisition. In addition, TC PipeLines GP maintained its two per cent general partner interest in the Partnership by contributing $12.6 million to the Partnership in connection with the private placement. The Partnership funded the balance of the total consideration with a draw on its senior credit facility, which was amended and restated in connection with the acquisition.

The acquisition was accounted for using the purchase method of accounting. The purchase price was allocated using an estimate of fair value of the net assets at the date of acquisition. The difference between the purchase price and the estimated fair value of net assets of $457.5 million, being goodwill, was recorded as part of the Partnership's investment in Great Lakes.

Great Lakes' business is subject to rate regulation based on historical costs which do not change with market conditions or change of ownership. Accordingly, upon acquisition, the assets and liabilities of Great Lakes were determined to have a fair value equal to the rate regulated historical costs. No intangibles other than goodwill were identified in the acquisition.

TransCanada, which previously held a 50 per cent interest in Great Lakes, acquired the other 3.55 per cent general partner interest simultaneously with the Partnership's acquisition of its interest. In connection with these transactions, a wholly-owned subsidiary of TransCanada became the operator of Great Lakes.

Northern Border

On April 6, 2006, the Partnership acquired an additional 20 per cent general partner interest in Northern Border for $298.0 million plus a $10.0 million transaction fee payable to TCNB, bringing the Partnership's total interest to 50 per cent. Through the acquisition, TC PipeLines indirectly assumed $121.7 million of debt. The Partnership funded the transaction through a Bridge Loan Credit Facility (see note 8). In connection with this transaction, TCNB became the operator of Northern Border in April 2007.

The acquisition was accounted for using the purchase method of accounting. The purchase price was allocated using an estimate of fair value of the net assets at the date of acquisition. The difference between the purchase price and the fair value of net assets of $115.0 million, being goodwill, was recorded as part of the Partnership's investment in Northern Border. The $10.0 million transaction fee payable to the operator has been recorded as part of the Partnership's investment in Northern Border and is being amortized over the term of the related operating agreement.

Northern Border's business is subject to rate regulation based on historical costs which do not change with market conditions or change of ownership. Accordingly, upon acquisition, the assets and liabilities of Northern Border were determined to have a fair value equal to the rate regulated historical costs. No intangibles other than goodwill were identified in the acquisition.

Tuscarora

On December 19, 2006, the Partnership acquired an additional 49 per cent general partnership interest in Tuscarora for $99.8 million. Through the acquisition TC PipeLines indirectly assumed $37.5 million of Tuscarora debt. The Partnership funded the transaction through the Senior Credit Facility (see note 8). In connection with this transaction, TCNB became the operator of Tuscarora.

The acquisition was accounted for using the purchase method of accounting. The purchase price was allocated as follows using an estimate of fair value of the assets acquired and liabilities assumed at the date of acquisition:

Purchase Price Allocation (millions of dollars)	Acquisition of additional 49% interest
Current assets	4.7
Plant, property and equipment	56.6
Other non-current assets	0.7
Goodwill	79.1
Current liabilities	(2.6)
Long-term debt	(37.5)
Non-controlling interests	(1.2)
	99.8

On December 31, 2007, the Partnership acquired the other two per cent general partner interest in Tuscarora. One per cent was purchased from a wholly-owned subsidiary of TransCanada, while the other one per cent was purchased from Tuscarora Gas Pipeline Co. for a total purchase price of $3.9 million. The acquisitions were accounted for using the purchase method of accounting. The difference between the combined purchase prices and the non-controlling interest recorded on the Partnership's balance sheet of $2.6 million was recorded as goodwill.

Tuscarora's business is subject to rate regulation based on historical costs which do not change with market conditions or change of ownership. Accordingly, upon acquisition, the assets and liabilities of Tuscarora were determined to have a fair value equal to the rate regulated historical costs. No intangibles other than goodwill were identified in the acquisitions.

Pro forma financial information for the Great Lakes, Northern Border and Tuscarora acquisitions

The following unaudited Partnership pro forma financial information for the years ended December 31, 2007 and 2006 has been prepared as if the significant acquisitions mentioned above occurred on January 1, 2006:

Year ended December 31 (millions of dollars except per unit amounts)	2007	2006
Equity income from investment in Great Lakes	**59.6**	56.8
Equity income from investment in Northern Border	**61.2**	64.1
Transmission revenues	**27.2**	29.5
Net income	**98.3**	99.9
Net income per common unit	**$ 2.58**	$ 2.70

NOTE 8 CREDIT FACILITIES AND LONG-TERM DEBT

(millions of dollars)	2007	2006
Senior Credit Facility	**507.0**	397.0
Series A Senior Notes	**54.5**	57.9
Series B Senior Notes	**5.5**	6.0
Series C Senior Notes	**6.4**	7.2
	573.4	468.1

On February 28, 2006, the Partnership renewed a $20.0 million unsecured credit facility (Revolving Credit Facility). In 2006, TC PipeLines repaid the Revolving Credit Facility in full and it was terminated. The interest rate on the Revolving Credit Facility averaged 5.60 per cent for the year ended December 31, 2006.

On March 31, 2006, the Partnership entered into an unsecured credit agreement for a $310.0 million credit facility (Bridge Loan Credit Facility) with a banking syndicate. Borrowings under the Bridge Loan Credit Facility bore interest, at the option of the Partnership, at the LIBOR or the base rate plus an applicable margin. On April 5, 2006, the Partnership borrowed $307.0 million under the Bridge Loan Credit Facility to finance the purchase price and a $10.0 million transaction fee payable in connection with the acquisition of an additional 20 per cent general partner interest in Northern Border. The remaining $3.0 million commitment under the Bridge Loan Credit Facility was terminated. On December 12, 2006, the Bridge Loan Credit Facility was refinanced through a $297.0 million draw on a $410.0 million credit agreement (Senior Credit Facility) with a banking syndicate and the use of $10.0 million cash on hand. The interest rate on the Bridge Loan Credit Facility averaged 6.29 per cent for the year ended December 31, 2006.

On December 12, 2006, the Partnership entered into a credit agreement for the Senior Credit Facility. On December 19, 2006, TC PipeLines borrowed an additional $100.0 million under the Senior Credit Facility to finance the purchase price of an additional 49 per cent general partner interest in Tuscarora.

On February 13, 2007, the Senior Credit Facility was amended and restated in connection with the Great Lakes acquisition. The amount available under the Senior Credit Facility increased from $410.0 million to $950.0 million, consisting of a $700.0 million senior term loan and a $250.0 million senior revolving credit facility, with $194.0 million of the senior term loan available being terminated upon closing of the Great Lakes acquisition. In accordance with the Senior Credit Facility agreement, once repaid, a senior term loan cannot be re-borrowed. On November 29, 2007, $18.0 million of the senior term loan was repaid and hence terminated, leaving $488.0 million available and outstanding under the senior term loan. At December 31, 2007, $19.0 million is outstanding under the senior revolving credit facility, leaving $231.0 million available for future borrowings.

The Senior Credit Facility matures on December 12, 2011, at which time all amounts outstanding will be due and payable. Amounts borrowed may be repaid in part or in full prior to that time without penalty. Borrowings under the Senior Credit Facility will bear interest based, at the Partnership’s election, on the LIBOR or the prime rate plus, in either case, an applicable margin. There was $507.0 million outstanding under the Senior Credit Facility at December 31, 2007 (2006 - $397.0 million). The interest rate on the Senior Credit Facility averaged 6.01 per cent for the year ended December 31, 2007 (2006 – 6.16 per cent). After hedging activity, the interest rate incurred on the Senior Credit Facility averaged 5.75 per cent for the year ended December 31, 2007. Prior to hedging activities, the interest rate was 5.62 per cent at December 31, 2007 (2006 – 6.07 per cent). At December 31, 2007, the Partnership was in compliance with its financial covenants.

In 1995, Tuscarora issued $91.7 million of 7.13 per cent senior secured notes, which mature on December 21, 2010 (Series A). In 2000, Tuscarora issued $8.0 million of 7.99 per cent senior secured notes, which mature on December 21, 2010 (Series B). In 2002, Tuscarora issued $10.0 million of 6.89 per cent senior secured notes, which mature on December 21, 2012 (Series C). The Series A, Series B and Series C notes (collectively, the Notes) have a final payment at maturity of $46.7 million, $4.1 million and $2.7 million, respectively. The Notes are secured by Tuscarora’s transportation contracts, supporting agreements and substantially all of Tuscarora’s property. The credit agreement for the Notes contains certain provisions that include, among other items, limitations on additional indebtedness and distributions to partners.

Annual maturities of the Senior Credit Facility and the Notes are summarized as follows:

(millions of dollars)	
2008	4.6
2009	4.4
2010	53.5
2011	507.8
2012	3.1
	573.4

NOTE 9 PARTNERS’ EQUITY

On February 22, 2007, the Partnership completed a private placement of 17,356,086 common units at $34.57 per common unit for gross proceeds of $600.0 million which closed concurrently with the Great Lakes acquisition. TransCan Northern Ltd. (TransCan Northern), a wholly-owned subsidiary of TransCanada, purchased 8,678,045 of

the 17,356,086 common units issued for gross proceeds of $300.0 million. In addition, TC PipeLines GP maintained its two per cent general partner interest in the Partnership by contributing $12.6 million to the Partnership in connection with the private placement.

At December 31, 2007, Partners’ equity consists of 34,856,086 common units representing an aggregate 98 per cent limited partner interest in the Partnership (including 2,035,106 common units held by the general partner and 8,678,045 common units held by TransCan Northern) and an aggregate two per cent general partner interest. In aggregate, the general partner’s interests represent an effective 7.7 per cent ownership in the Partnership at December 31, 2007 (December 31, 2006 — 13.4 per cent).

NOTE 10 FINANCIAL CHARGES, NET AND OTHER

Year ended December 31 (millions of dollars)	2007	2006	2005

Interest expense on short-term debt	**0.3**	0.3	1.1
Interest income	**(0.9)**	(0.4)	(0.1)
Amortization of other assets	**0.4**	0.9	—
Other	**(0.9)**	0.2	—
	33.8	15.8	1.0

NOTE 11 NET INCOME PER COMMON UNIT

Net income per common unit is computed by dividing net income, after deduction of the general partner's allocation, by the weighted average number of common units outstanding. The general partner's allocation is equal to an amount based upon the general partner's two per cent interest, adjusted to reflect an amount equal to incentive distributions. Incentive distributions are received by the general partner if quarterly cash distributions on the common units exceed levels specified in the partnership agreement. Net income per common unit was determined as follows:

Year ended December 31 (millions of dollars except per unit amounts)	2007	2006	2005
Net income	**89.0**	44.7	50.2
Net income allocated to general partner			
General partner interest	**(1.8)**	(0.9)	(1.0)
Incentive distribution income allocation	**(5.9)**	(2.0)	(1.9)
	(7.7)	(2.9)	(2.9
Net income allocable to common units	**81.3**	41.8	47.3
Weighted average common units outstanding *(millions)*	**32.3**	17.5	17.5
Net income per common unit	**$ 2.51**	$ 2.39	$ 2.70

NOTE 12 CASH DISTRIBUTIONS

The Partnership makes cash distributions to its partners with respect to each calendar quarter within 45 days after the end of each quarter. Distributions are based on available cash, which includes all cash and cash equivalents of the Partnership and working capital borrowings less reserves established by the general partner. The Unitholders currently receive a quarterly distribution of $0.665 per unit if and to the extent there is sufficient available cash.

As an incentive, the general partner's percentage interest in quarterly distributions is increased after certain specified target levels are met. The incremental incentive distributions payable to the General Partner are 15 per cent, 25 per cent, and 50 per cent of all quarterly distributions of Available Cash that exceed target levels of $0.45, $0.5275 and $0.69, respectively, per unit. For the year ended December 31, 2007, the Partnership distributed $2.565 per unit (2006 - $2.325 per unit; 2005 - $2.30 per unit). The distributions for the year ended December 31, 2007 included

incentive distributions to the general partner in the amount of $5.9 million (2006 - $2.0 million; 2005 - $1.9 million). Partnership income is allocated to the general partner and the limited partners in accordance with their respective partnership percentages, after giving effect to any priority income allocations for incentive distributions that are allocated 100 per cent to the general partner.

NOTE 13 RELATED PARTY TRANSACTIONS

The Partnership does not have any employees. The management and operating functions are provided by the general partner. The general partner does not receive a management fee or other compensation in connection with its management of the Partnership. The Partnership reimburses the general partner for all costs of services provided, including the costs of employee, officer and director compensation and benefits, and all other expenses necessary or appropriate to the conduct of the business of, and allocable to, the Partnership. Such costs include (i) overhead costs (such as office space and equipment) and (ii) out-of-pocket expenses related to the provision of such services. The Partnership Agreement provides that the general partner will determine the costs that are allocable to the Partnership in any reasonable manner determined by the general partner in its sole discretion. Total costs charged to the Partnership by the general partner were $1.9 million for the year ended December 31, 2007 (2006 - $1.2 million; 2005 - $1.1 million).

A wholly-owned subsidiary of TransCanada became the operator of Great Lakes through TransCanada's acquisition of Great Lakes Gas Transmission Company on February 22, 2007. On December 19, 2006, the Partnership acquired an additional 49 per cent general partner interest in Tuscarora. In connection with this transaction, TCNB became the operator of Tuscarora. TransCanada and its affiliates provide capital and operating services to our pipeline systems. TransCanada and its affiliates incur costs on behalf of our pipeline systems, including, but not limited to, employee benefit costs, property and liability insurance costs, and transition costs. Total costs charged to our pipeline systems in 2007 by TransCanada and its affiliates and amounts owed to TransCanada and its affiliates at December 31, 2007 are summarized in the following table:

(millions of dollars)	Great Lakes	Northern Border	Tuscarora
Costs charged by TransCanada and its affiliates	25.6	22.5	1.8
Impact on the Partnership's net income	11.2	11.0	0.9
Amount owed to TransCanada and its affiliates	1.9	3.0	3.5

Great Lakes earns transportation revenues from TransCanada and its affiliates under fixed priced contracts with remaining terms ranging from one to ten years. Great Lakes earned $113.9 million of transportation revenues under these contracts for the period February 23, 2007 to December 31, 2007. This amount represents 48.2 per cent of total revenues earned by Great Lakes for the period February 23, 2007 to December 31, 2007. $52.9 million of transportation revenue is included in the Partnership's equity income from Great Lakes during the same period. At December 31, 2007, $10.0 million is included in Great Lakes' receivables in regards to the transportation contracts with TransCanada and its affiliates.

For the year ended December 31, 2007, the Partnership recorded transmission revenues of $19.4 million in regards to various contracts with Sierra

Pacific Power Company, a wholly-owned subsidiary of Sierra Pacific Resources.

On April 6, 2006, the Partnership acquired an additional 20 per cent general partner interest in Northern Border. At the time of this transaction, the Partnership paid a $10.0 million transaction fee to TransCanada Northern Border related to the assumption of operatorship. This fee has been recorded as part of the Partnership's investment in Northern Border and is being amortized over the term of the related operating agreement partially offsetting equity income.

On May 8, 2007, the Partnership reimbursed TransCanada $2.8 million for third party costs related to the Partnership's acquisition of its interest in Great Lakes. On September 26, 2007, the Partnership reimbursed

TransCanada $1.2 million for a working capital adjustment related to the Partnership's acquisition of its interest in Great Lakes.

On December 31, 2007, the Partnership acquired a one per cent general partner interest in Tuscarora from a wholly-owned subsidiary of TransCanada for $2.0 million. The purchase price of this acquisition was derived from the formula used to calculate the purchase price of a separate one per cent general partner interest in Tuscarora which was purchased from Tuscarora Gas Pipeline Co. on the same day.

NOTE 14 QUARTERLY FINANCIAL DATA (unaudited)

The following sets forth selected financial data for the four quarters of each of 2007 and 2006.

Quarter ended (millions of dollars except per unit amounts)	Mar 31	Jun 30	Sep 30	Dec 31
2007				
Equity income	**24.8**	**23.4**	**30.4**	**31.6**
Transmission revenues	**6.9**	**6.7**	**6.7**	**6.9**
Net income	**20.0**	**17.7**	**24.6**	**26.7**
Net income per common unit	**$ 0.73**	**$ 0.45**	**$ 0.64**	**$ 0.70**
Cash distributions paid	**11.3**	**24.9**	**25.1**	**25.4**
2006				
Equity income	13.2	13.9	17.9	17.5
Transmission revenues	—	—	—	0.9
Net income	12.4	9.0	12.0	11.3
Net income per common unit	$ 0.67	$ 0.47	$ 0.65	$ 0.60
Cash distributions paid	10.7	10.8	10.7	11.3

NOTE 15 CAPITAL REQUIREMENTS

On April 30, 2007, the Partnership made a contribution of $7.5 million to Northern Border, representing the Partnership's 50 per cent share of a $15.0 million cash call issued by Northern Border. The funds were used by Northern Border to repay indebtedness.

Tuscarora incurred $13.2 million of capital expenditures during 2007, of which $12.2 million related to its compressor station expansion in Likely, California. These capital expenditures were funded with operating cash flows.

The Partnership contributed $3.1 million to Northern Border during 2006, representing its then 30 per cent share of a $10.3 million cash call issued by Northern Border. The funds were used by Northern Border to fund an expansion project.

NOTE 16 DERIVATIVE FINANCIAL INSTRUMENTS

The carrying value of cash and short-term investments, accounts receivable and other, accounts payable and accrued interest approximate their fair values because of the short maturity or duration of these instruments, or because the instruments carry a variable rate of interest or a rate that approximates current rates. The fair value of the Partnership's long-term debt is estimated by discounting the future cash flows of each instrument at current borrowing rates.

The estimated fair values of the Partnership's and its subsidiary's long-term debt as of December 31, 2007 and 2006 are as follows:

	2007		2006	
(millions of dollars)	Carrying Value	Fair Value	Carrying Value	Fair Value
Senior Credit Facility	**507.0**	**507.0**	397.0	397.0
Series A Senior Notes	**54.5**	**58.7**	57.9	60.9
Series B Senior Notes	**5.5**	**6.0**	6.0	6.4
Series C Senior Notes	**6.4**	**7.0**	7.2	7.5

	573.4	**578.7**	468.1	471.8

The Partnership's short-term and long-term debt results in exposures to changing interest rates. The Partnership uses derivatives to assist in managing its exposure to interest rate risk.

At December 31, 2007, the fair value of the interest rate swaps and options accounted for as hedges was negative $9.8 million (2006 - positive $1.6 million). The fair value of interest rate swaps and options have been calculated using year-end market rates. The notional amount hedged was $475.0 million as at December 31, 2007 (2006 - $200.0 million). $300.0 million of variable-rate debt is hedged by an interest rate swap during the period from March 12, 2007 through December 12, 2011, where the weighted average fixed interest rate paid is 4.89 per cent. $100.0 million of variable-rate debt is hedged by an interest rate option during the period from May 22, 2007 through May 22, 2009 to an interest rate range between a weighted average floor of 4.09 per cent and a cap of 5.35 per cent. $75.0 million of variable-rate debt is hedged by an interest rate swap during the period from February 29, 2008 through February 28, 2011, where the fixed interest rate paid will be 3.86 per cent. In addition to these fixed rates, the Partnership pays an applicable margin in accordance with the Senior Credit Facility agreement. The interest rate swaps and options are structured such that the cash flows match those of the Senior Credit Facility.

NOTE 17 ACCOUNTING PRONOUNCEMENTS

In 2006, the Financial Accounting Standards Board issued SFAS No. 157, *Fair Value Measurements,* and during 2007,issued SFAS No. 141(R), *Business Combinations - revised*, SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities – including an amendment of FASB Statement No. 115*, and SFAS No. 160, *Noncontrolling Interests in Consolidated financial Statements*.

SFAS No. 157 establishes a framework for measuring fair value and requires additional disclosures about fair value measurements. The effect of adopting SFAS No. 157 is not expected to be material to our results of operations or financial position.

SFAS No. 141(R) replaces SFAS No. 141, *Business Combinations*. SFAS No. 141 (R) retains the fundamental requirements of SFAS No. 141 that the acquisition method of accounting be used for all business combinations and for an acquirer to be identified for each business combination, with the objective of improving the relevance and comparability of the information that a reporting entity provides in its financial reports about a business combination and its effects. The requirements of this standard will not have a material impact on the results of the Partnership.

SFAS No. 159 permits entities to choose to measure selected financial assets and financial liabilities at fair value. The fair value option established by SFAS No. 159 permits all entities to choose to measure eligible items at fair value at specified election dates. The effect of adopting SFAS No. 159 is not expected to be material to our results of operations or financial position.

SFAS No. 160 clarifies the classification of noncontrolling interests in consolidated statements of financial position and the accounting for and reporting of transactions between the reporting entity and holders of such noncontrolling interests. The Partnership does not have noncontrolling interests and therefore, is not affected by the changes resulting from this standard.

In June 2007 the Emerging Issues Task Force of the FASB issued EITF 07-4, "Application of the Two-Class Method under FASB Statement No. 128, *Earnings per Share,* to Master Limited Partnerships". EITF 07-4 addresses how current period earnings of a Master Limited Partnership (MLP) should be allocated to the general partner, limited partners and when applicable, incentive distribution rights when applying the two-class method under Statement 128. A tentative conclusion was ratified by the FASB in December 2007. We are currently reviewing the applicability of EIFT 07-4 to our results of operations and financial position.

NOTE 18 SUBSEQUENT EVENTS

On January 17, 2008, the Board of Directors of the general partner declared the Partnership's 2007 fourth quarter cash distribution. The fourth quarter cash distribution which was paid on February 14, 2008 to unitholders of record as of January 31, 2008, totaled $25.6 million and was paid in the following manner: $23.2 million to common unitholders (including $1.4 million to the general partner as holder of 2,035,106 common units and $5.8 million to TransCan Northern as holder of 8,678,045 common units), $1.9 million to the general partner as holder of the incentive distribution rights, and $0.5 million to the general partner in respect of its two per cent general partner interest.

Great Lakes declared and paid a distribution of $25.0 million on February 1, 2008, of which the Partnership received its 46.45 per cent share or $11.6 million.

Northern Border declared and paid a distribution of $46.3 million on February 1, 2008, of which the Partnership received its 50 per cent share or $23.2 million.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Partners and Management Committee
Great Lakes Gas Transmission Limited Partnership:

We have audited the accompanying consolidated balance sheets of Great Lakes Gas Transmission Limited Partnership and subsidiary (partnership) as of December 31, 2007 and 2006, and the related consolidated statements of income and partners' capital, and cash flows for each of the years in the three-year period ended December 31, 2007. These consolidated financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Partnership's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Great Lakes Gas Transmission Limited Partnership and subsidiary as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007 in conformity with U.S. generally accepted accounting principles.

The Partnership's consolidated financial statements for 2006 and 2005 were previously prepared as though the Partnership was a corporation and current income taxes and amounts equivalent to deferred income taxes were recorded in those financial statements. As more fully described in note 2 to the consolidated financial statements, the Partnership adopted a policy to exclude income taxes from the consolidated financial statements at the beginning of the current year. Consequently, the Partnership's consolidated financial statements for 2006 and 2005 have been restated to exclude income taxes.

GREAT LAKES GAS TRANSMISSION LIMITED PARTNERSHIP
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. ORGANIZATION AND MANAGEMENT

Great Lakes Gas Transmission Limited Partnership (Partnership) is a Delaware limited partnership that owns and operates an interstate natural gas pipeline system. The Partnership transports natural gas for delivery to wholesale customers in the Midwestern and northeastern United States and eastern Canada. The partners, their parent companies, and partnership ownership percentages at December 31 are as follows:

Partner (Parent Company)	Ownership % 2007	2006
General Partners:		
El Paso Great Lakes Company, LLC (El Paso Corporation)	—	46.45
TransCanada GL, Inc. (TransCanada Pipelines Limited)	**46.45**	46.45
TC GL Intermediate Limited Partnership (TC PipeLines, LP)	**46.45**	—
Limited Partner:		
Great Lakes Gas Transmission Company (TransCanada Pipelines Limited - 2007 and El Paso Corporation and TransCanada Pipelines Limited - 2006)	**7.10**	7.10

On February 22, 2007 (acquisition date), TC PipeLines, LP (TCPL) and TransCanada Corporation (TransCanada) acquired El Paso Corporation's (El Paso) 46.45% ownership interest in the Partnership and 50% interest in Great Lakes Gas Transmission Company (Company), respectively.

The day-to-day operation of the Partnership activities is the responsibility of the Company pursuant to the Partnership's Operating Agreement with the Company. As of the acquisition date, the Company uses TransCanada and its affiliates to provide operating services. The Partnership is charged for the salaries, benefits and expenses of TransCanada and its affiliates for services attributable to its operations.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation and Basis of Presentation

The consolidated financial statements include the accounts of the Partnership and GLGT Aviation Company, a wholly owned subsidiary. GLGT Aviation Company owns a fractional interest in a transport aircraft used principally for pipeline operations. Intercompany amounts have been eliminated.

For purposes of reporting cash flows, the Partnership considers all liquid investments with original maturities of three months or less to be cash equivalents. Under the Partnership's cash management system, the bank notifies the Partnership daily of checks presented for payment against its disbursement account. The Company transfers funds from short-term investments to cover the checks presented for payment. This system results in a book cash overdraft in the disbursement account as a result of checks outstanding. The book overdraft, which was reclassified to accounts payable, was $5.8 million and $0.3 million at December 31, 2007 and 2006, respectively.

The fair value of long term debt is discussed in footnote 4. All other financial instruments approximate fair value due to the short maturity of these instruments.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect the amounts reported as assets, liabilities, revenues and expenses and the disclosures in these financial statements. Although management believes these estimates are reasonable, actual results could differ from those estimates.

GREAT LAKES GAS TRANSMISSION LIMITED PARTNERSHIP
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Regulation

The Partnership is subject to the rules, regulations and accounting procedures of the Federal Energy Regulatory Commission (FERC). The Partnership's accounting policies follow regulatory accounting principles prescribed under Statement of Financial Accounting Standards (SFAS) No. 71, *Accounting for the Effects of Certain Types of Regulation*. There are no regulatory assets or liabilities reflected in these consolidated financial statements.

Revenue and Accounts Receivable

The Partnership generates transportation revenues based on transportation service contracts under a tariff regulated by the FERC. The tariff specifies maximum transportation rates and the contracts' general terms and conditions of service. The majority of the service contracts are for firm service in which the customers pay a reservation fee for capacity on the pipeline system regardless of whether they actually utilize their reserved capacity. The Partnership recognizes reservation revenues on firm contracted capacity ratably over the contract period regardless of the amount of natural gas that is transported. In addition to the reservation fee, a utilization fee is charged and the related revenue is recognized based on the volume of natural gas transported.

Accounts receivable are reported at the invoiced amount. The Partnership establishes an allowance for losses on accounts receivable if it is determined that all or a portion of the outstanding balance will not be collected. The Partnership also considers historical industry data and customer credit trends. Account balances are charged against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote.

Natural Gas Imbalances

Natural gas imbalances occur when the actual amount of natural gas delivered or received differs from the scheduled amount of natural gas delivered or received. The Partnership values these imbalances due to or from customers and interconnecting pipelines at fair value. Imbalances are made up in kind, in accordance with the terms of the tariff.

Imbalances due from others are reported on the consolidated balance sheet as either accounts receivable or receivable from affiliates. Imbalances owed to others are reported on the consolidated balance sheet as either accounts payable or payable to affiliates. Imbalances are expected to settle within a year.

Materials and Supplies

Materials and supplies are valued at the lower of cost or market value with cost determined using the average cost method.

Gas Utility Plant and Depreciation

Gas utility plant is stated at cost and includes certain administrative and general expenses, plus an allowance for funds used during construction. The Partnership capitalizes major units of property replacements or improvements and expenses minor items. Planned major maintenance is accrued when, and only when, an obligating event occurs, and is recorded using the direct expensing method or the deferral method. The cost of plant retired is charged to accumulated depreciation net of salvage and cost of removal. Depreciation of gas utility plant is computed using the composite (group) method. Under this method, assets with similar lives and characteristics are grouped and depreciated as one asset. The Partnership's principal operating assets, which comprise approximately 98% of total property, plant and

---

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

equipment, are depreciated at an annual rate of 2.75%. The remaining assets are depreciated at an annual rate ranging from 4% to 20%.

The allowance for funds used during construction represents the debt and equity costs of capital funds applicable to utility plant under construction, calculated in accordance with a uniform formula prescribed by the FERC. The rates used were 10.25%, 10.37%, and 10.50% for years 2007, 2006, and 2005, respectively.

Asset Retirement Obligations

In the fourth quarter of 2005, the Partnership adopted Financial Accounting Standards Board Interpretation (FIN) No. 47, *Accounting for Conditional Asset Retirement Obligations.* FIN No. 47 requires companies to record a liability for those asset retirement obligations in which the timing and/or amount of settlement of the obligations are uncertain. These conditional obligations were not addressed by SFAS No. 143, *Accounting for Asset Retirement Obligations,* which the Partnership adopted on January 1, 2003. FIN No. 47 requires accrual of a liability when a range of scenarios indicates that the potential timing and/or settlement amounts of conditional asset retirement obligations can be determined. The Partnership has asset retirement obligations if it were to permanently retire all or part of the pipeline system; however, the amount of asset retirement obligations cannot be reasonably estimated due to the inability to determine the scope and timing of asset retirements.

Impairment of Long-Lived Assets

The Partnership assesses its long-lived assets for impairment based on SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. A long-lived asset is tested for impairment whenever events or changes in circumstances indicate that its carrying amount may exceed the undiscounted cash flows expected to be generated by the asset. If the carrying amount exceeds the undiscounted cash flows, an impairment is recognized to the extent the carrying amount exceeds its fair value.

Accounting for Pipeline Integrity Costs

Prior to January 1, 2006, the Partnership capitalized certain costs incurred related to its pipeline integrity assessment programs as part of property, plant and equipment.

In June 2005, the FERC issued an order on *Accounting for Pipeline Assessment Costs* which generally requires that pipeline inspections and assessments incurred after January 1, 2006 be expensed. The Partnership expensed $3.3 million and $2.4 million of pipeline integrity costs in 2007 and 2006, respectively.

Change in Accounting Principle

In previously issued financial statements, the Partnership accounted for income taxes as if it were a corporation and recorded current income taxes and amounts equivalent to deferred income taxes in those financial statements. In 2007, the Partnership has concluded that a preferable accounting method is to exclude income taxes from its consolidated financial statements, as federal and most state income taxes are the responsibility of the partners.

The change in accounting principle is reported through retrospective application in accordance with SFAS No. 154, *Accounting Changes and Error Corrections*. The change in accounting principle increased 2007, 2006 and 2005 Operating Income and Net Income by $46 million, $44 million and $43 million, respectively. Cash flows from Operating Activities/Financing Activities increased/decreased by $41 million, $39 million and $33 million in 2007, 2006 and 2005, respectively. In addition, amounts equivalent to deferred income tax liabilities were removed and Partners' Capital was increased by approximately $254

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

million as of January 1, 2005, $264 million as of December 31, 2005, $269 million as of December 31, 2006, and $139 million as of December 31, 2007.

Income Taxes

Income taxes are the responsibility of our partners and are not reflected in these consolidated financial statements. The Partnership is required, for FERC regulatory purposes, to account for income taxes as if it were a corporation. As a result, for purposes of determining Partners' capital for regulatory accounting purposes, it is reduced by the amounts equivalent to the net deferred income tax liability balances.

As a result of the sale of the partnership interest, and a corresponding Internal Revenue Code Section 754 election, the pre-acquisition amounts equivalent to net deferred income tax liability balances were reduced by 46.45%. In addition, amounts equivalent to net deferred tax liabilities for pre-acquisition retirement plans were eliminated. As a result, Partners' Capital and amounts equivalent to net deferred tax liabilities were adjusted on the acquisition date by approximately $135 million as approved by the FERC. Amounts equivalent to net deferred income tax liabilities were approximately $139 million and $269 million at December 31, 2007 and 2006, respectively, and are primarily related to accelerated depreciation on utility plant.

In the third quarter of 2007, the state of Michigan enacted the Michigan Business Tax (MBT), which replaces the Michigan Single Business Tax effective January 1, 2008. The MBT is an income tax levied at the partnership level. The MBT is expected to result in an annual income tax expense of approximately $4 to $5 million and to provide a property tax credit of approximately $1 million, for a net annual impact of $3 to $4 million beginning in 2008.

Fair Value Measurements

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements", which provides guidance on measuring the fair value of assets and liabilities in the financial statements. Certain provisions are effective in 2008 and others in 2009. The effect of adopting SFAS No. 157 is not expected to be material to the consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, "Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115," which permits entities to choose to measure selected financial assets and financial liabilities at fair value. The fair value option established by SFAS No. 159 permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity shall report unrealized gains and losses in earnings, on items for which the fair value option has been elected, at each subsequent reporting date. SFAS No. 159 is effective for our fiscal year beginning January 1, 2008. The effect of adopting SFAS No. 159 is not expected to be material to the consolidated financial statements.

Reclassifications

Certain reclassifications have been made to the consolidated financial statements for prior years to conform to the current year presentation.

GREAT LAKES GAS TRANSMISSION LIMITED PARTNERSHIP
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

3. AFFILIATED COMPANY TRANSACTIONS

Affiliated company amounts included in the Partnership's consolidated financial statements, not otherwise disclosed, are as follows:

Transportation Revenues (In thousands)	2007	2006	2005
TransCanada and affiliates	$ **135,629**	150,067	156,561
El Paso and affiliates	**1,537**	11,538	17,235

Affiliated transportation revenues are primarily provided under fixed priced contracts with remaining terms ranging from 1 to 10 years.

The Partnership reimbursed the Company and affiliates for salaries, benefits and other administrative and operating incurred expenses. Benefits include pension, defined contribution plans, and other post-retirement benefits. Operating expenses charged by the Company and affiliates in 2007, 2006, and 2005 were $26,836,000, $18,022,000 and $23,913,000, respectively.

The Company participated in El Paso sponsored pension and defined contribution plans until February 28, 2007. The Company also participated in a post-retirement health care plan. After the acquisition date, the Partnership is charged for benefit plan expenses and other benefits by a TransCanada affiliate through a benefit rate on labor costs.

4. DEBT

(In thousands)	2007	2006
Senior Notes, unsecured, interest due semiannually, principal due as follows:		
8.74% series, due 2008 to 2011	$ **40,000**	50,000
9.09% series, due 2012 to 2021	**100,000**	100,000
6.73% series, due 2009 to 2018	**90,000**	90,000
6.95% series, due 2019 to 2028	**110,000**	110,000
8.08% series, due 2021 to 2030	**100,000**	100,000
	440,000	450,000
Less current maturities	**10,000**	10,000
Total long term debt less current maturities	$ **430,000**	440,000

The aggregate estimated fair value of long term debt was $525,104,000 and $516,698,000 for 2007 and 2006, respectively. The fair value is determined using discounted cash flows based on the Partnership's estimated current interest rates for similar debt.

The aggregate annual required repayments of Senior Notes is $10,000,000 in 2008 and $19,000,000 for each year 2009 through 2012.

Under the most restrictive covenants in the Senior Note Agreements, approximately $237,000,000 of partners' capital is restricted as to distributions as of December 31, 2007.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Management Committee
Northern Border Pipeline Company:

We have audited the accompanying balance sheets of Northern Border Pipeline Company (the Company) as of December 31, 2007 and 2006, and the related statements of income, comprehensive income, cash flows, and changes in partners' equity for each of the years in the three-year period ended December 31, 2007. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Northern Border Pipeline Company as of December 31, 2007 and 2006, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2007 in conformity with U.S. generally accepted accounting principles.

NORTHERN BORDER PIPELINE COMPANY
NOTES TO FINANCIAL STATEMENTS

1. ORGANIZATION AND MANAGEMENT

In this report, references to "we, "us" or "our" collectively refer to Northern Border Pipeline Company.

We are a Texas general partnership formed in 1978. We own a 1,249-mile natural gas transmission pipeline system extending from the United States-Canadian border near Port of Morgan, Montana, to a terminus near North Hayden, Indiana. In April 2006, ONEOK Partners Intermediate Limited Partnership (ONEOK Partners) completed the sale of a 20 percent partnership interest in us to TC PipeLines Intermediate Limited

Partnership (TC PipeLines). As a result of the transaction, our General Partnership Agreement was amended and restated effective April 6, 2006.

The ownership and voting percentages of our partners at December 31, 2007 and 2006 are as follows:

Partner	Ownership
ONEOK Partners	50 %
TC PipeLines	50 %

We are managed by a Management Committee that consists of four members. Each partner designates two members, and TC PipeLines designates one of its members as chairman. The Management Committee designates the members of the Audit Committee, which consists of three members. One member is selected by the members of the Management Committee designated by the partner whose affiliate is the operator and two members are selected by the members of the Management Committee designated by the other partner.

The day-to-day management of our affairs is the responsibility of TransCanada Northern Border, Inc., (TransCanada Northern Border) pursuant to an operating agreement between us and TransCanada Northern Border effective April 1, 2007. TransCanada Northern Border utilizes the services of TransCanada Corporation (TransCanada) and its affiliates for management services related to us. We are charged for the salaries, benefits and expenses of TransCanada and its affiliates attributable to our operations. For the year ended December 31, 2007, our charges from TransCanada and its affiliates totaled approximately $22.5 million.

Prior to April 1, 2007, the day-to-day management of our affairs was the responsibility of ONEOK Partners GP, L.L.C. (ONEOK Partner GP) pursuant to an operating agreement between us and ONEOK Partners GP. ONEOK Partners GP also utilized ONEOK, Inc. (ONEOK) and its affiliates for management services related to us. We were charged for the salaries, benefits and expenses of ONEOK Partners GP, ONEOK and its affiliates attributable to our operations. For the years ended December 31, 2007, 2006, and 2005, our charges from ONEOK Partners GP and its current and former affiliates totaled approximately $9.3 million, $26.2 million and $20.1 million, respectively. Our 2007 charges include $3.6 million for transition related costs. See Note 8 for further discussion of transition related costs.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make assumptions and use estimates that affect the reported amounts of assets, liabilities, revenue and expenses as well as the disclosure of contingent assets and liabilities during the reporting period. Actual results could differ from these estimates if the underlying assumptions are incorrect.

Government Regulation

We are subject to regulation by the Federal Energy Regulatory Commission (FERC). Our accounting policies conform to Statement of Financial Accounting Standards (SFAS) No. 71, “Accounting for the Effects of Certain Types of Regulation.” Accordingly, certain assets and liabilities that result from the regulated ratemaking process are reflected on the balance sheets as regulatory assets and regulatory liabilities.

At December 31, 2007 and 2006, we have reflected regulatory assets of approximately $20.6 million and $19.1 million, respectively, on the balance sheets. These assets are being amortized, as directed by the FERC, over varying time periods up to 43 years.

The following table presents a summary of regulatory assets, net of amortization, at December 31, 2007, and 2006.

	December 31,	
	2007	2006
	(In thousands)	
Fort Peck lease option	$ 10,797	$ 9,507
Pipeline extension project	6,459	6,920
Unamortized loss on reacquired debt	308	376
Deferred rate case expenditures	1,953	2,341
Compressor usage surcharge tracker	1,121	—
Total regulatory assets	$ 20,638	$ 19,144

At December 31, 2007, we have reflected a regulatory liability of $2.4 million on the balance sheet related to negative salvage accrued for estimated net costs of removal of transmission plant. See the Property, Plant and Equipment and Related Depreciation and Amortization policy in this note for further discussion of negative salvage.

We assess the recoverability of costs recognized as regulatory assets and liabilities and the ability to continue to account for our activities based on the criteria set forth in SFAS No. 71, which includes such factors as regulatory changes and the impact of competition. Our review of these criteria currently supports the continuing application of SFAS No. 71. If we cease to meet the criteria of SFAS No. 71, a write-off of related regulatory assets and liabilities could be required.

Revenue Recognition

We transport gas for shippers under a tariff regulated by the FERC. The tariff specifies the maximum rates we may charge shippers and the general terms and conditions of transportation service on our pipeline system. We recognize revenue according to each transportation contract for transportation service that is provided to our customers. Customers with firm service transportation agreements pay a reservation fee for capacity on the pipeline system known as a reservation charge regardless of whether they actually utilize their reserved capacity. Firm service transportation customers also pay a fee known as a commodity charge that is based on the mileage and the volume of natural gas they transport. Customers with interruptible service transportation agreements may utilize available capacity on our pipeline after firm service transportation requests are satisfied. Interruptible service customers are assessed commodity charges based on mileage and the volume of natural gas they transport. An allowance for doubtful accounts is recorded in situations where collectibility is not reasonably assured. We had no allowance for doubtful accounts at December 31, 2007 and 2006. We do not own the gas that we transport, and therefore we do not assume the related natural gas commodity price risk.

Income Taxes

Income taxes are the responsibility of our partners and are not reflected in these financial statements. Our FERC tariff, through December 31, 2006, established the method of accounting for and calculating income taxes which would have been paid or accrued if we were organized during the period as a corporation. Pursuant to the terms of the settlement of our 2005 rate case, during the time period that the rates effective January 1, 2007 are in effect, the treatment historically accorded income taxes will be observed by us for regulatory accounting purposes.

Cash and Cash Equivalents

Cash equivalents consist of highly liquid investments with original maturities of three months or less. The carrying amount of cash and cash equivalents approximates fair value due to the short maturity of these investments.

Property, Plant and Equipment and Related Depreciation and Amortization

Property, plant and equipment is stated at original cost. During periods of construction, we are permitted to capitalize an allowance for funds used during construction, which represents the estimated costs of funds used for construction purposes. The original cost of property retired is charged to accumulated depreciation and amortization. No retirement gain or loss is included in income except in the case of retirements or sales of entire regulated operating units or systems.

Maintenance and repairs are charged to operations in the period incurred. The provision for depreciation and amortization of the transmission line is an integral part of our FERC tariff. As a result of the settlement of our 2005 rate case, the effective depreciation rate applied to our transmission plant in 2007 is 2.40 percent. The effective depreciation rate applied to our transmission plant in 2006 and 2005 was 2.25 percent. The transmission plant depreciation rate in 2007 of 2.40 percent is comprised of two components: one based on economic service life or capital recovery and one based on cost of removal, net of salvage value received, or negative salvage. We accrue the estimated net costs of removal of transmission plant as a regulatory liability, which does not represent an existing legal obligation. The net cost of removal incurred on retirements of transmission plant is recorded as a reduction to the regulatory liability. As of December 31, 2007, $2.4 million for accrued negative salvage is included as a regulatory liability on the accompanying balance sheet. Composite rates are applied to all other functional groups of property having similar economic characteristics. See Note 4 for discussion of our 2005 rate case settlement.

Natural Gas Imbalances

Natural gas imbalances occur when the actual amount of natural gas delivered or received by a pipeline system or storage facility differs from the contractual amount of natural gas scheduled to be delivered or received. We value these imbalances due to or from shippers and interconnecting parties at an appropriate index price. Imbalances are made up in-kind, subject to the terms of our tariff.

Imbalances due from others are reported on the balance sheets as accounts receivable. Imbalances owed to others are reported on the balance sheets as accounts payable. All imbalances are classified as current.

Risk Management

We use financial instruments in the management of our interest rate exposure. A control environment has been established which includes policies and procedures for risk assessment and the approval, reporting and monitoring of financial instrument activities. We do not use these instruments for trading purposes. SFAS No. 133, “Accounting for Derivative Instruments and Hedging Activities,” as amended by SFAS No. 137 and SFAS No. 138, requires that all derivative instruments (including certain derivative instruments embedded in other contracts) be recorded on the balance sheet as either an asset or liability measured at their fair value. We determine the fair value of a derivative instrument by the present value of its future cash flows based on market prices from third party sources. We record changes in the derivative’s fair value currently in earnings unless specific hedge accounting criteria are met. Accounting for qualifying hedges allows a derivative’s gains and losses to offset related results on the hedged item in the income statement, and requires us to formally document, designate and assess the effectiveness of transactions that receive hedge accounting. See Note 7 for a discussion of our derivative instruments and hedging activities.

Unamortized Debt Premium, Discount and Expense

We amortize premiums, discounts and expenses incurred in connection with the issuance of debt consistent with the terms of the respective debt instrument.

Operating Leases

We have non-cancelable operating leases for office space and rights-of-way. We record rent expense over the lease term as it becomes payable. If operating leases include escalating rental payments, we determine the cumulative rental payments anticipated and recognize rent expense on a straight-line basis over the term of the lease.

Impairment of Long-Lived Assets

We assess our long-lived assets for impairment based on SFAS No. 144, “Accounting for the Impairment or Disposal of Long-Lived Assets.” A long-lived asset is tested for impairment whenever events or changes in circumstances indicate that its carrying amount may exceed its fair value. Fair values are based on the sum of the undiscounted future cash flows expected to result from the use and eventual disposition of the assets.

Contingencies

Our accounting for contingencies covers a variety of business activities including contingencies for legal exposures and environmental exposures. We accrue these contingencies when our assessments indicate that it is probable that a liability has been incurred or an asset will not be recovered and an amount can be reasonably estimated in accordance with SFAS No. 5, “Accounting for Contingencies.” We base our estimates on currently available facts and our estimates of the ultimate outcome or resolution. Actual results may differ from our estimates resulting in an impact, positive or negative, on earnings.

Reclassifications

Certain reclassifications have been made to the financial statements for prior years to conform to the current year presentation. These reclassifications did not impact previously reported net income or partners’ equity.

3. ASSET RETIREMENT OBLIGATIONS

Effective January 1, 2003, we adopted SFAS No. 143, “Accounting for Asset Retirement Obligations.” SFAS No. 143 requires entities to record the fair value of a liability for an asset retirement obligation during the period in which the liability is incurred, if a reasonable estimate of fair value can be made. Effective December 31, 2005, we adopted FIN 47, “Accounting for Conditional Asset Retirement Obligations–an interpretation of SFAS No. 143.” FIN 47 clarifies the term “conditional asset retirement obligation,” as used in SFAS No. 143 and the circumstances under which an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation. We have determined that asset retirement obligations exist for certain of our transmission assets; however, the fair value of the obligations cannot be determined because the end of the transmission system life is not determinable with the degree of accuracy necessary to currently establish a liability for the obligations.

4. RATES AND REGULATORY ISSUES

The FERC regulates the rates and charges for transportation of natural gas in interstate commerce. Natural gas companies may not charge rates that have been determined to be unjust and unreasonable by the FERC. Generally, rates for interstate pipelines are based on the cost of service, including recovery of and a return on the pipeline’s actual prudent historical cost investment. The rates and terms and conditions for service are found in each pipeline’s FERC-approved tariff. Under its tariff, an interstate pipeline is allowed to charge for its services on the basis of stated transportation rates. Transportation rates are established periodically in FERC proceedings known as rate cases. The tariff also allows the interstate pipeline to provide services under negotiated and discounted rates.

As required by the provisions of the settlement of our 1999 rate case, on November 1, 2005 we filed a rate case with the FERC. In December 2005, the FERC issued an order that identified issues that were raised in the proceeding and accepted the proposed rates, but suspended their effectiveness until May 1, 2006. Beginning May 1, 2006, the new rates were collected subject to refund through September 30, 2006. Based on the settlement, discussed below, we refunded $10.8 million to our customers in the fourth quarter of 2006.

The settlement of our 2005 rate case was approved by the FERC in November 2006. The settlement established maximum long-term mileage-based rates and charges for transportation on our system. Beginning in 2007, overall rates were reduced, compared with rates prior to the filing, by approximately 5 percent. For the full transportation route from Port of Morgan, Montana to the Chicago area, the previous charge of approximately $0.46 per Dekatherm (Dth) is now approximately $0.44 per Dth, which is comprised of a reservation rate, commodity rate and a compressor usage surcharge. The factors used in calculating depreciation expense for transmission plant were increased from 2.25 percent to 2.40 percent. The settlement also provided for seasonal rates for short-term transportation services. Seasonal maximum rates vary on a monthly basis from approximately $0.54 per Dth to approximately $0.29 per Dth for the full transportation route from Port of Morgan, Montana to the Chicago area. The settlement included a three-year moratorium on filing rate cases and participants challenging these rates, and requires that we file a rate case within six years from the date the new rates went into effect.

The compressor usage surcharge rate is designed to recover the actual costs of electricity at our electric compressors and any compressor fuel use taxes imposed on our pipeline system. Any difference between the compressor usage surcharge collected and the actual costs for electricity and compressor fuel use taxes is recorded as either an increase to expense for an over recovery of actual costs or as a decrease to expense for an under recovery of actual costs, and is included in operations and maintenance expense on the income statement and as either a regulatory liability or a regulatory asset, respectively, on the balance sheet. The compressor usage surcharge rate is adjusted annually. The regulatory liability or regulatory asset will reflect the net over or under recovery of actual compressor usage related costs at the date of the balance sheet. As of December 31, 2007, we had recorded $1.1 million as a regulatory asset on the accompanying balance sheet for the net under recovery of compressor usage related costs.

5. TRANSPORTATION SERVICE AGREEMENTS

Operating revenues are collected pursuant to the FERC tariff through transportation service agreements. Our firm service agreements at December 31, 2007, extend for various terms with termination dates that range from one day to approximately eight years. We also have interruptible transportation service agreements and other transportation service agreements with numerous shippers. Under the capacity release provisions of our FERC tariff, shippers under firm contracts are allowed to release all or part of their capacity either permanently for the full term of the contract or temporarily. A temporary capacity release does not relieve the original contract shipper from its payment obligations if the replacement shipper fails to pay for the capacity temporarily released to it.

At December 31, 2007, our largest shippers, Cargill Inc. (Cargill) and BP Canada Energy Marketing Corp. (BP Canada) were obligated for approximately 15 percent and 14 percent of summer day design capacity, respectively. The Cargill and BP Canada firm service agreements extend for various terms with termination dates ranging from March 2008 to December 2008 and January 2008 to April 2014, respectively.

For the year ended December 31, 2007, shippers providing significant operating revenues were BP Canada, Nexen Marketing U.S.A. Inc. (Nexen) and Cargill with revenues of $49.7 million, $44.1 million, and $42.0 million, respectively. For the year ended December 31, 2006, shippers providing significant operating revenues were BP Canada and Cargill with revenues of $66.7 million and $43.0 million, respectively. For the year ended December 31, 2005, shippers providing significant operating revenues were BP Canada, Nexen, EnCana Marketing (USA) Inc. and Cargill with revenues of $56.1 million, $38.1 million, $37.9 million and $34.1 million, respectively.

For the years ended December 31, 2007, 2006 and 2005, we had contracted firm capacity held by one shipper affiliated with one of our general partners. ONEOK Energy Services Company, LP (ONEOK Energy), a subsidiary of ONEOK, holds firm service agreements representing approximately 3 percent of summer day design capacity at December 31, 2007. The firm service agreements with ONEOK Energy extend for various terms with termination dates that range from March 2008 to November 2011. Revenue from ONEOK Energy for 2007, 2006 and 2005 was $5.1 million, $7.0 million and $7.7 million, respectively. At December 31, 2007 and 2006, we had outstanding receivables from ONEOK Energy of $0.8 million and $0.3 million, respectively.

6. CREDIT FACILITIES AND LONG-TERM DEBT

Detailed information on long-term debt is as follows:

	December 31, 2007	December 31, 2006
	(In thousands)	
2007 Credit Agreement - average interest rate of 5.35% at December 31, 2007 due 2012	$ 166,000	$ —
2005 Credit Agreement - average interest rate of 6.33% at December 31, 2006 refinanced in 2007	—	20,000
1999 Senior Notes – 7.75%, due 2009	200,000	200,000
2001 Senior Notes – 7.50%, due 2021	250,000	250,000
2002 Senior Notes – 6.25%, due 2007	—	150,000
Unamortized debt discount, net of premium	(714)	(156)
Subtotal	615,286	619,844
Current maturities	—	(170,000)
Long-term debt	$ 615,286	$ 449,844

On April 27, 2007, we entered into a $250 million amended and restated revolving credit agreement (2007 Credit Agreement) with certain financial institutions. The 2007 Credit Agreement was used to refinance the outstanding indebtedness under our $175 million revolving credit agreement dated as of May 16, 2005 (2005 Credit Agreement) and was used to repay all of the $150 million of our 6.25 percent Senior Notes due May 1, 2007. The 2007 Credit Agreement can also be used to finance permitted acquisitions, pay related fees and expenses, issue letters of credit and provide for ongoing working capital needs and for other general business purposes, including capital expenditures.

At December 31, 2007, based on the principal commitment amount of $250 million, available capacity under the 2007 Credit Agreement was $84 million. We may, at our option, so long as no default or event of default has occurred and is continuing, elect to increase the capacity under our 2007 Credit Agreement by an aggregate amount not to exceed $100 million, provided that lenders are willing to commit additional amounts. At our option, the interest rate on the outstanding borrowings may be the lenders' base rate or the London Interbank Offered Rate plus a spread that is based on our long-term unsecured credit ratings. The 2007 Credit Agreement permits us to specify the portion of the borrowings to be covered by specific interest rate options and to specify the interest rate period. We are required to pay a facility fee of 0.05 percent based on the principal amount of the commitment of $250 million. The term of the agreement is five years, with options for two one-year extensions.

Certain of our long-term debt arrangements contain certain covenants that restrict the incurrence of secured indebtedness or liens upon property by us. Under the 2007 Credit Agreement, we are required to comply with certain financial, operational and legal covenants. Among other things, we are required to maintain a ratio of total debt to EBITDA (net income plus interest expense, income taxes, depreciation and amortization and all other non-cash charges) of no more than 4.75 to 1. Pursuant to the 2007 Credit Agreement, if one or more acquisitions are consummated in which the aggregate purchase price is $25

million or more, the allowable ratio of total debt to EBITDA is increased to 5.50 to 1 for the first three full calendar quarters following the acquisition. Upon any breach of these covenants, amounts outstanding under the 2007 Credit Agreement may become immediately due and payable. At December 31, 2007, we were in compliance with all of our financial covenants.

Aggregate required repayments of long-term debt for the next five years are $200 million in 2009 and $166 million in 2012. Aggregate required repayments of long-term debt thereafter total $250 million. There are no required repayment obligations for 2008, 2010 or 2011.

The following estimated fair values of financial instruments represent the amount at which each instrument could be exchanged in a current transaction between willing parties. Based on quoted market prices for similar issues with similar terms and remaining maturities, the estimated fair value of the aggregate of the senior notes outstanding at December 31, 2007 and 2006, was approximately $493 million and $623 million, respectively. We presently intend to maintain the current schedule of maturities for the 1999 Senior Notes and the 2001 Senior Notes, which will result in no gains or losses on their respective repayments. The fair value of the 2007 Credit Agreement approximates the carrying value since the interest rates are periodically adjusted to reflect current market conditions.

7. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Prior to the anticipated issuance of fixed rate debt, we entered into forward starting interest rate swap agreements. The interest rate swap agreements were designated as cash flow hedges as they hedged the fluctuations in Treasury rates and spreads between the execution date of the swap agreements and the issuance of the fixed rate debt. The notional amount of the interest rate swap agreements did not exceed the expected principal amount of fixed rate debt to be issued. Upon issuance of the fixed rate debt, the swap agreements were terminated and the proceeds received or amounts paid to terminate the swap agreements were recorded in accumulated other comprehensive income and amortized to interest expense over the term of the debt.

During the years ended December 31, 2007, 2006, and 2005, respectively, we amortized approximately $1.6 million, $1.3 million, and $1.5 million related to the terminated interest rate swap agreements as a reduction to interest expense from accumulated other comprehensive income. We expect to amortize approximately $1.5 million as a reduction to interest expense in 2008.

We record in long-term debt amounts received or paid related to terminated interest rate swap agreements for fair value hedges and amortize these amounts to interest expense over the remaining original term of the interest rate swap agreements. During the years ended December 31, 2007, 2006, and 2005, we amortized approximately $0.7 million, $2.1 million and $2.1 million, respectively, as a reduction to interest expense. Amounts received or paid related to terminated interest rate swap agreements for fair value hedges were fully amortized at June 30, 2007.

In August 2007, we entered into a zero cost interest rate collar agreement (the “Collar Agreement”) to limit the variability of the interest rate on $140 million of variable-rate borrowings during the period from October 30, 2007 through October 30, 2009 to a range between a floor of 4.35 percent and a cap of 5.36 percent. We have designated the Collar Agreement as a cash flow hedge. At December 31, 2007, the balance sheet reflected an unrealized loss of approximately $1.9 million with a corresponding decrease to accumulated other comprehensive income (loss) related to the changes in fair value of the Collar Agreement since inception. Since inception, no amounts have been recognized in income due to ineffectiveness or amounts received or paid under the Collar Agreement.

8. COMMITMENTS AND CONTINGENCIES

Operating Leases

Future minimum lease payments under non-cancelable operating leases on office space and rights-of-way are as follows:

	(In thousands)
Year ending December 31,	
2008	2,540
2009	2,541
2010	2,194
2011	1,889
2012	1,889
Thereafter	61,072
	$ 72,125

Expenses incurred related to these lease obligations for the years ended December 31, 2007, 2006 and 2005 were $1.5 million, $0.7 million, and $0.6 million, respectively.

In August 2004, we signed an Option Agreement and Expanded Facilities Lease (Option Agreement) with the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation. The Option Agreement documented the settlement of certain pipeline and right-of-way lease and taxation issues.

The Option Agreement grants to us, among other things: (i) an option to renew the pipeline right-of-way lease upon agreed terms and conditions on or before April 1, 2011, for a term of 25 years with a renewal right for an additional 25 years; (ii) a right to use additional tribal lands for expanded facilities; and (iii) release and satisfaction of all tribal taxes against us. In consideration of this option and other benefits, we paid a lump sum amount of $7.4 million and will make additional annual option payments of approximately $1.5 million through March 31, 2011.

Transition Related Costs

We are required to pay $3.6 million over a five year period under a transition services agreement between ONEOK Partners GP and TransCanada Northern Border, related to the reimbursement for shared equipment and furnishings acquired by ONEOK Partners and previously used or currently in use for our operations. During the second quarter of 2007 a charge of $2.3 million was recorded in operations and maintenance expense and $1.3 million was recorded as natural gas transmission plant for the shared equipment and furnishings previously used or currently in use by us, respectively. Amounts related to this obligation are included in related party payables on the balance sheet. Future remaining payments for this obligation are as follows:

Year ending December 31,	(In thousands)
2008	753
2009	753
2010	753
2011	753
	$ 3,012

Environmental Matters

We are not aware of any material contingent liabilities with respect to compliance with applicable environmental laws and regulations.

Other

Various legal actions that have arisen in the ordinary course of business are pending. We believe that the resolution of these issues will not have a material adverse impact on our results of operations or financial position.

9. CASH DISTRIBUTION POLICY

Our General Partnership Agreement provides that distributions to our partners are to be made on a pro rata basis according to each partner's capital account balance. Our Management Committee determines the amount and timing of the distributions to our partners including equity contributions and the funding of growth capital expenditures. Any changes to, or suspension of, our cash distribution policy requires the unanimous approval of the Management Committee. Our cash distributions are equal to 100 percent of our distributable cash flow as determined from our financial statements based upon earnings before interest, taxes, depreciation and amortization less interest expense and maintenance capital expenditures. In 2006, upon the closing of the sale of a 20 percent general partnership interest in us from ONEOK Partners to TC PipeLines, our Management Committee adopted certain changes to our cash distribution policy related to financial ratio targets and equity contributions. The change defined minimum equity to total capitalization ratios to be used by the Management Committee to establish the timing and amount of required equity contributions. In addition, any shortfall due to the inability to refinance maturing debt will be funded by equity contributions.

For the years ended December 31, 2007, 2006 and 2005, we paid distributions to our general partners of $172.7 million, $178.8 million and $202.9 million, respectively. In 2007, we issued an equity cash call to our general partners in the amount of $15.0 million for the previously approved 2007 equity cash call. The proceeds were used to repay indebtedness. We issued an equity cash call to our general partners of $10.3 million in 2006 to fund approximately 50 percent of our growth capital expenditures.

10. OTHER INCOME (EXPENSE)

Other income (expense) on the statements of income includes such items as investment income, nonoperating revenues and expenses, and nonrecurring other income and expense items. For the years ended December 31, 2007, 2006 and 2005, other income (expense) included:

	Years Ended December 31,		
	2007	2006	2005
		(In thousands)	
Other income			
Nonoperating revenue	$ 1,638	$ 1,086	$ 1,134
Investment income	691	627	487
Bad debt expense adjustment	—	—	408
Other	98	505	367
Other income	$ 2,427	$ 2,218	$ 2,396
Other expense			
Depreciation and amortization for non-regulated property	$ (382)	$ (604)	$ (351)
Other	(106)	(18)	(181)
Other expense	$ (488)	$ (622)	$ (532)

11. ACCOUNTING PRONOUNCEMENTS

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements," which establishes a framework for measuring fair value and requires additional disclosures about fair value measurements. SFAS No. 157 is effective for our fiscal year beginning January 1, 2008. The effect of adopting SFAS No. 157 is not expected to be material to our results of operations or financial position.

In February 2007, the FASB issued SFAS No. 159 "The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115," which permits entities to choose to measure selected financial assets and financial liabilities at fair value. The fair value option established by SFAS No. 159 permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity shall report unrealized gains and losses in earnings, on items for which the fair value option has been elected, at each subsequent reporting date. SFAS No. 159 is effective for our fiscal year beginning January 1, 2008. The effect of adopting of SFAS No. 159 is not expected to be material to our results of operations or financial position.

12. SUBSEQUENT EVENTS

We make distributions to our general partners approximately one month following the end of the quarter. A cash distribution of approximately $46.3 million was declared and paid on February 1, 2008 for the fourth quarter of 2007.

(Back To Top)

Section 2: EX-2.5 (GENERAL PARTNERSHIP INTEREST PURCHASE AGREEMENT DATED AS OF DECEMBER 20, 2007)

Exhibit 2.5

GENERAL PARTNERSHIP INTEREST

PURCHASE AGREEMENT

BY AND BETWEEN

TCPL TUSCARORA LTD.

AND

TC PIPELINES TUSCARORA LLC

December 20, 2007

INDEX OF DEFINED TERMS

GENERAL PARTNERSHIP INTEREST PURCHASE AGREEMENT

This GENERAL PARTNERSHIP INTEREST PURCHASE AGREEMENT, dated as of December 20, 2007 (this "**Agreement**"), is made and entered into by and between TCPL Tuscarora Ltd., a Nevada corporation ("**Seller**"), and TC Pipelines Tuscarora LLC, a Delaware limited partnership ("**Buyer**").

WHEREAS, Seller owns a 1% general partnership interest in Tuscarora Gas Transmission Company, a Nevada general partnership (the "**Partnership**");

WHEREAS, Seller desires to sell its 1% general partnership interest in the Partnership (the "**Interest**");

WHEREAS, on the terms and subject to the conditions contained in this Agreement, Buyer desires to purchase the Interest from Seller, and Seller desires to sell the Interest to Buyer;

NOW THEREFORE, in consideration of the mutual covenants, representations, warranties and agreements contained herein, and of other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound hereby, the parties hereto hereby agree as follows:

ARTICLE I
DEFINITIONS

1.1 Definitions. As used in this Agreement, the following terms have the meanings specified or referred to in this Section 1.1:

(1) "**Affiliate**" means a Person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, a specified Person. A Person shall be deemed to control another Person if such first Person possesses, directly or indirectly, the power to direct, or cause the direction of, the management and policies of such other Person, whether through the ownership of voting securities, by Contract or otherwise.

(2) "**Agreement**" shall have the meaning set forth in the preamble to this Agreement.

(3) "**Balance Sheet**" means the audited balance sheet of the Partnership as of December 31, 2006 included in the Financial Statements.

(4) "**Balance Sheet Date**" means December 31, 2006.

(5) "**Base Claim**" shall have the meaning set forth in Section 9.2(b).

(6) "**Basket**" shall have the meaning set forth in Section 9.2(b).

(7) "**Business**" means the business of the Partnership as conducted on the date of this Agreement.

(8) "**Business Day**" means any day other than Saturday, Sunday and any day which is a legal holiday or a day on which banking institutions in the State of New York and Calgary, Alberta are authorized by law or other governmental action to close.

(9) "**Buyer**" shall have the meaning set forth in the preamble to this Agreement.

(10) "**Buyer Claim**" shall have the meaning set forth in Section 9.2(b).

(11) "**Buyer Disclosure Schedule**" means the disclosure schedule of Buyer referred to in, and delivered pursuant to, this Agreement.

(12) "**Buyer Indemnified Parties**" shall have the meaning set forth in Section 9.2(a).

(13) "**Buyer Required Regulatory Approvals**" shall have the meaning set forth in Section 5.3(b).

(14) "**Ceiling**" shall have the meaning set forth in Section 9.2(b).

(15) "**CERCLA**" means the Comprehensive Environmental Response, Compensation and Liability Act of 1980, 42 U.S.C. §9601, et seq., as amended.

(16) "**Claim Notice**" shall have the meaning set forth in Section 9.4(a).

(17) "**Closing**" shall have the meaning set forth in Section 3.1.

(18) "**Closing Consideration**" shall have the meaning set forth in Section 2.2.

(19) "**Closing Date**" shall have the meaning set forth in Section 3.1.

(20) "**Code**" means the Internal Revenue Code of 1986, as amended.

(21) "**Contract**" means any written contract, agreement, indenture, note, bond, mortgage, loan, instrument, lease or license.

(22) “**Current Assets**” with respect to the Partnership, means, as of the applicable date, without duplication, the sum of the following items, each as set forth on the relevant balance sheet of the Partnership, (i) accounts receivable, (ii) other current assets and (iii) prepaid expenses (excluding, for the avoidance of doubt, cash and cash equivalents (including money market funds) and customer deposits), in each case, in accordance with GAAP and as such terms are used in, and calculated on a basis consistent with the Interim Balance Sheet.

(23) “**Current Liabilities**” with respect to the Partnership, means, as of the applicable date, without duplication, the sum of the following items, each as set forth on the relevant balance sheet of the Partnership, (i) accounts payable, (ii) payable to partners, (iii) accrued taxes other than income taxes, (iv) accrued interest and (v) current portion of long-term debt (excluding, for the avoidance of doubt, customer deposits (which are referred to as “other accrued liabilities” in the Interim Balance Sheet)), in each case, in accordance with GAAP and as such terms are used in, and calculated on a basis consistent with the Interim Balance Sheet.

(24) “**Encumbrances**” means any mortgages, deeds of trust, pledges, liens, security interests, conservation easements, deed restrictions, charges and other encumbrances, other than any Permitted Encumbrances.

(25) “**Environmental Laws**” means all federal, state and local laws, including the common law, regulations, rules, ordinances, codes, decrees, judgments, directives, or judicial or administrative orders relating to pollution or protection of the environment, natural resources or human health and safety, including laws relating to Hazardous Substances (including ambient air, surface water, groundwater, land, surface and subsurface strata) or otherwise relating to the manufacture, processing, distribution, use, treatment, storage, transport or handling of Hazardous Substances, laws relating to record keeping, notification, disclosure and reporting requirements respecting Hazardous Substances, and laws relating to the management and use of natural resources.

(26) “**Environmental Permits**” shall have the meaning set forth in Section 4.13(a).

(27) “**FERC**” means the Federal Energy Regulatory Commission or any successor thereto.

(28) “**Financial Statements**” means (i) the Balance Sheet and the audited statement of income, partners’ capital and cash flows of the Partnership for the fiscal year ended December 31, 2006 and (ii) the Interim Balance Sheet and the unaudited statement of income, partners’ capital and cash flows of the Partnership for the nine (9) months ended September 30, 2007, including the notes thereto.

(29) “**GAAP**” means generally accepted accounting principles as used in the United States in effect from time to time.

(30) “**Governmental Authority**” means any executive, legislative, judicial, regulatory or administrative agency, body, commission, department, board, court, tribunal, arbitrating body or authority of the United States or any foreign country, or any state, local or other governmental subdivision thereof.

(31) “**Hazardous Substances**” means (i) any petrochemical or petroleum products, radioactive materials, asbestos in any form that is or could become friable, urea formaldehyde foam insulation and transformers or other equipment that contain dielectric fluid which may contain levels of polychlorinated biphenyls, (ii) any chemicals, materials or substances defined as or included in the definition of “hazardous substances,” “hazardous wastes,” “hazardous materials,” “restricted hazardous materials,” “extremely hazardous substances,” “toxic substances,” “contaminants” or “pollutants” or words of similar meaning and regulatory effect under Environmental Laws or (iii) any other chemical, material or substance, exposure to which is prohibited, limited or regulated by or which could give rise to liability under any applicable Environmental Law.

(32) “**Indemnified Party**” shall have the meaning set forth in Section 9.4(a).

(33) “**Indemnifying Party**” shall have the meaning set forth in Section 9.4(a).

(34) “**Independent Accounting Firm**” means a mutually acceptable nationally recognized firm of independent chartered accountants that has not provided services to either Seller or Buyer or any of their Affiliates in the preceding three (3) years, or if no such firm is available and willing to serve, then a mutually acceptable expert in public accounting, in each case, upon which Buyer and Seller shall have mutually agreed.

(35) “**Intellectual Property**” means all: (i) patents and patent applications, registrations and disclosures and all related continuations, divisionals, continuations-in-part, reissues, reexaminations, utility models, certificates of invention and design patents, (ii) trademarks, service marks, trade dress, logos, corporate names, trade names and internet domain names, together with the goodwill associated with any of the foregoing, and all applications and registrations therefor, (iii) copyrights and registrations and applications therefor, copyrightable works of authorship and moral rights, (iv) confidential and proprietary information, including trade secrets, discoveries, concepts, ideas, research and development, financial, marketing and business data, pricing and cost information, business and marketing plans, algorithms, know-how, formulae, inventions (whether or not patentable), processes, techniques, technical data,

designs, drawings, specifications, databases, and customer and supplier lists and information, in each case to the extent confidential and proprietary, excluding any rights in respect of any of the items described in this clause (iv) that comprise or are protected by patents or otherwise by clauses (i)-(iii) and (v) of this definition, and (v) Software.

(36) “**Interest**” shall have the meaning set forth in the recitals to this Agreement.

(37) “**Losses**” shall have the meaning set forth in Section 9.2(a).

(38) “**Material Adverse Effect**” means a material adverse effect on the business, results of operations, ownership, operation, or financial condition of the Partnership or the Business taken as a whole, or that materially impedes the ability of Seller to consummate the transactions contemplated by this Agreement, except for any such effect or impediment (to the extent, in the case of clauses (i), (ii) or (iii), such effect or impediment does not have a disproportionate impact on the Partnership or the Business relative to other entities operating similar businesses) arising out of or relating to (i) any change or effect resulting from the general state of the industries in which the Partnership operates (including (A) changes in pricing levels, (B) changes in the international, national, regional or local wholesale or retail markets for natural gas, (C) changes in the North American, national, regional or local interstate natural gas pipeline systems, or (D) changes in applicable laws, rules, regulations or decisions of the FERC or judgments, orders or decrees of courts affecting the interstate natural gas transmission industry, or rate orders, motions, complaints or other actions affecting the Partnership), (ii) any change or effect resulting from changes in the international, national, regional or local markets for any supplies used by the Business, (iii) any change or effect resulting from changes in general economic, political or business conditions (including changes in interest rates or debt, equity, financial, banking or currency markets), (iv) any change or effect resulting from any change in GAAP, (v) any change or effect resulting from the negotiation, execution, announcement, pendency or consummation of the transactions contemplated by this Agreement, including the impact thereof on relationships, contractual or otherwise, with customers, suppliers, distributors, partners, joint owners or venturers, or employees, other than Sierra Pacific Resources and its Affiliates, (vi) any change or effect resulting from any action taken by Seller, the Partnership, Buyer or any of their respective Representatives or Affiliates or other action required, contemplated or permitted by this Agreement or consented to by Buyer, (vii) any change or effect resulting from acts of war, armed hostilities or terrorism, (viii) any change or effect resulting from changes in weather or climate, (ix) any materially adverse change in or effect on the Business which is cured (including by the payment of money) before the Termination Date, or (x) any circumstance, matter or condition described in the Seller Disclosure Schedule.

(39) “**Material Contracts**” shall have the meaning set forth in Section 4.15 of this Agreement

---

(40) “**Material Leases**” shall mean, as of the date of this Agreement, all leases under which the Partnership is a lessee, lessor or under which the Partnership otherwise has any interest (i) with annual payments greater than $250,000 or (ii) which are otherwise material to the Business.

(41) “**New York Courts**” shall have the meaning set forth in Section 10.5(e).

(42) “**Notice Period**” shall have the meaning set forth in Section 9.4(a).

(43) “**Operating Agreement**” means the Operating Agreement, dated as of the 19th day of December, 2006 by and between the Partnership and TransCanada Northern Border Inc., (formerly TransCan Northwest Border Ltd.), as amended by the First Amendment to Operating Agreement dated June 21, 2007.

(44) “**Partnership**” shall have the meaning set forth in the recitals to this Agreement.

(45) “**Partnership Agreement**” means the Tuscarora Gas Transmission Company General Partnership Agreement, dated as of June 11, 1993, by and between Seller and Buyer, as amended by that First Amendment to General Partnership Agreement, dated as of September 1, 2000, as amended by that Second Amendment to General Partnership Agreement, dated as of December 17, 2003, as amended by that Third Amendment to General Partnership Agreement, dated as of November 22, 2006, as amended by that Fourth Amendment to General Partnership Agreement, dated as of December 21, 2006 and as may be further amended from time to time.

(46) “**Permits**” shall have the meaning set forth in Section 4.17.

(47) “**Permitted Encumbrances**” means (i) all exceptions, restrictions, easements, covenants, charges, permits, servitudes, rights of way and Encumbrances of record or that are set forth in an applicable FERC project license or title insurance policy, provided that Seller has provided or made available a copy of such license or insurance policy to Buyer, (ii) all matters of record and any state of facts that a current survey or inspection of the Real Property would disclose and which do not materially and adversely affect the ability of the Partnership to conduct the Business as presently conducted, (iii) mortgages, liens, pledges, charges, Encumbrances and restrictions incurred in connection with the Partnership’s purchase of properties and assets after the Balance Sheet Date securing all or a portion of the purchase price therefor, (iv) statutory Encumbrances for Taxes, assessments or other governmental charges not yet due and payable or that may be subsequently paid without penalty or interest or that are being contested in good faith in (if then appropriate) appropriate proceedings, (v) mechanics’, carriers’, workers’, repairman’s, materialman’s,

---

warehousemen’s, employees’, landlord’s, construction and other similar Encumbrances arising or incurred in the ordinary course of business consistent with past practice relating to obligations that are not yet due and payable or that are being contested in good faith in (if then appropriate) appropriate proceedings, (vi) requirements and restrictions under zoning, planning, building, entitlement, conservation, land use and environmental laws and regulations (including municipal bylaws and permits, consents and authorizations under such laws and regulations), and development, site plan, subdivision or other agreements with municipalities which do not materially and adversely affect the ability of the Partnership to conduct the Business as presently conducted, (vii) Encumbrances contemplated by or set forth in the Partnership Agreement or the Operating Agreement, (viii) the rights of lessors, lessees, licensors and licensees under leases or licenses of the Real Property, and (ix) such other liens, defects, irregularities, imperfections in or failure of title, charges, easements, restrictions and other Encumbrances which would not, individually or in the aggregate, have a Material Adverse Effect.

(48) "**Person**" means any individual, partnership, joint venture, corporation, limited liability company, limited liability partnership, trust, unincorporated organization or Governmental Authority or any department or agency thereof.

(49) "**Prime Rate**" means the U.S. prime rate of interest published in the "Money Rates" column of the Eastern Edition of The Wall Street Journal on the Closing Date.

(50) **"Purchase Price"** shall have the meaning set forth in Section 2.2.

(51) "**Real Property**" has the meaning set forth in Section 4.9.

(52) "**Representatives**" means with respect to a particular Person, any agent, consultant, advisor, accountant, financial advisor, legal counsel or other representative of that Person.

(53) "**Seller**" shall have the meaning set forth in the preamble to this Agreement.

(54) "**Seller Claim**" shall have the meaning set forth in Section 9.3(b).

(55) "**Seller Disclosure Schedule**" means the disclosure schedule of Seller referred to in, and delivered pursuant to, this Agreement.

(56) "**Seller Indemnified Parties**" shall have the meaning set forth in Section 9.3(a).

(57) "**Seller's Knowledge**" means the actual knowledge of Jeffrey R. Rush, Vice-President and General Manager and Jay G. Story, General Manager, after reasonable inquiry of each of their respective direct reports.

(58) "**Seller Required Regulatory Approvals**" shall have the meaning set forth in Section 4.3(b).

(59) "**Software**" means any and all (i) computer programs, including any and all software implementations of algorithms, models and methodologies, whether in source code or object code, (ii) databases and compilations, including any and all data and collections of data, whether machine readable or otherwise, (iii) descriptions, flow-charts and other work product used to design, plan, organize and develop any of the foregoing, screens, user interfaces, report formats, firmware, development tools, templates, menus, buttons and icons, and (iv) all documentation, including user manuals and other training documentation, related to any of the foregoing.

(60) "**Subsidiary**" of any Person (the "Subject Person") means any Person, whether incorporated or unincorporated, of which (i) at least 50% of the securities or ownership interests having by their terms ordinary voting power to elect a majority of the board of directors or other Persons performing similar functions, (ii) a general partner interest or (iii) a managing member interest, is directly or indirectly owned or controlled by the Subject Person or by one or more of its respective Subsidiaries.

(61) "**Survival Period**" shall have the meaning set forth in Section 9.1(c).

(62) "**Tax**" means any tax, charge, fee, levy, penalty or other assessment imposed by any U.S. federal, state, local or foreign Taxing Authority, including any excise, property, income, sales, transfer, franchise, payroll, withholding, social security or other tax, including any interest, penalties or additions attributable thereto.

(63) "**Tax Return**" means any return, report, information return, declaration, claim for refund or other document (including any related or supporting information) supplied or required to be supplied to any authority with respect to Taxes and including any supplement or amendment thereof.

(64) "**Taxing Authority**" means the Internal Revenue Service and any other Governmental Authority responsible for the administration of any Tax.

(65) "**Termination Date**" shall have the meaning set forth in Section 8.1(b).

(66) "**Third Party Claim**" shall have the meaning set forth in Section 9.4(a).

(67) "**Transfer Taxes**" means any and all transfer Taxes, including sales, use, excise, stock, stamp, documentary, filing, recording, permit, license, authorization and similar Taxes, fees, duties, levies, customs, tariffs, imposts, assessments, obligations and charges.

ARTICLE II
PURCHASE AND SALE OF GENERAL PARTNERSHIP INTEREST

2.1 Purchase and Sale. Upon the terms and subject to the satisfaction (or waiver, if permitted) of the conditions contained in this Agreement, Buyer agrees to purchase from Seller and Seller agrees to sell, assign, convey, transfer and deliver to Buyer, the Interest.

2.2 Purchase Price. Pursuant to Article III, at the Closing, Buyer shall pay, in consideration for the purchase of the Interest pursuant to Section 2.1, in cash the sum of (i) (A) the purchase price paid by TC Tuscarora Intermediate Limited Partnership to Tuscarora Gas Pipeline Co. ("TGP"), December 19, 2006 for TGP's 49% interest in the Partnership, divided by (B) 0.98, multiplied by (C) 0.02, plus (ii) the aggregate amount of any capital contributions in respect of the Interest paid by Seller from and after the December 19, 2006 and prior to the Closing, minus (iii) the aggregate amount of any distributions paid by the Partnership to Seller in respect of the Interest from and after December 19, 2006 and prior to the Closing, (the "Closing Consideration").

ARTICLE III
THE CLOSING

3.1 Time and Place of Closing. Upon the terms and subject to the satisfaction (or waiver, if permitted) of the conditions contained in this Agreement, the closing of the transactions contemplated by this Agreement (the "**Closing**") shall take place at the offices of TransCanada Corporation, 450 – 1st Street SW Calgary, Alberta, at 10:00 a.m., local time, no later than the third Business Day following the date on which all of the conditions to each party's obligations hereunder have been satisfied or waived (other than those conditions that by their nature have to be satisfied at the Closing (but subject to the satisfaction or waiver (if permitted) of those conditions)), or at such other place or time as the parties may agree. The date and time at which the Closing actually occurs is hereinafter referred to as the "**Closing Date**."

3.2 Deliveries by Seller . At the Closing, Seller shall deliver to Buyer the following:

(a) An assignment and assumption agreement duly executed by Seller in respect of the Interest;

(b) The certificate referred to in Section 7.2(c);

(c) An affidavit of non-foreign status from Seller that complies with Section 1445 of the Code; and

(d) Such other agreements, documents, instruments and writings as are required to be delivered by Seller at or prior to the Closing Date pursuant to this Agreement or otherwise required in connection herewith.

3.3 Deliveries by Buyer. At the Closing, Buyer shall deliver to Seller the following:

(a) An assignment and assumption agreement duly executed by Buyer in respect of the Interest;

(b) The Closing Consideration by wire transfer of immediately available funds or by such other means as may be mutually agreed to by Seller and Buyer;

(c) The certificate referred to in Section 7.3(c); and

(d) Such other agreements, documents, instruments and writings as are required to be delivered by Buyer at or prior to the Closing Date pursuant to this Agreement or otherwise required in connection herewith.

ARTICLE IV
REPRESENTATIONS AND WARRANTIES OF SELLER

Except as set forth in the Seller Disclosure Schedule, Seller hereby represents and warrants to Buyer, as of the date of this Agreement, as follows:

4.1 Organization; Qualification. The Partnership is a general partnership duly organized, validly existing and in good standing under the laws of the State of Nevada and has all requisite general partnership power and authority to own, lease, and operate its properties and to carry on the Business as it is now being conducted. The Partnership is duly qualified or licensed to do business as a foreign general partnership and is in good standing in each jurisdiction set forth in Section 4.1 of the Seller Disclosure Schedule, which are the only jurisdictions in which the property owned, leased or operated by it or the nature of the Business conducted by it makes such qualification necessary, except where the failure to be so duly qualified or licensed and in good standing would not have or be reasonably expected to have, individually or in the aggregate, a Material Adverse Effect. A complete and correct copy of the Partnership Agreement as currently in effect has been made available to Buyer.

4.2 Authority Relative to this Agreement. Seller has the corporate power and authority to execute and deliver this Agreement and to consummate the transactions contemplated hereby. The execution, delivery and performance by Seller of this Agreement and the consummation by Seller of the transactions contemplated hereby have been duly and validly authorized by Seller and no other corporate proceedings on the part of Seller are necessary to authorize this Agreement or to consummate the transactions contemplated hereby. This Agreement has been duly executed and delivered by Seller and, assuming that this Agreement constitutes legal, valid and binding agreement of Buyer, constitutes a legal, valid and binding agreement of Seller,

and is enforceable against Seller in accordance with its terms, except that such enforceability may be limited by applicable bankruptcy, insolvency, moratorium or other similar laws affecting or relating to enforcement of creditors' rights generally or general principles of equity.

4.3 Consents and Approvals; No Violation.

(a) Except as set forth in Section 4.3(a) of the Seller Disclosure Schedule, and other than obtaining the Seller Required Regulatory Approvals and the Buyer Required Regulatory Approvals, the execution, delivery and performance of this Agreement by Seller and the consummation by Seller of the transactions contemplated hereby will not (i) conflict with or result in any breach of any provision of the articles of incorporation or bylaws of Seller, (ii) result in a violation or default (with or without notice or lapse of time, or both) or give rise to any right of termination, cancellation or acceleration of any obligation or to loss of a benefit under any of the terms, conditions or provisions of any Permit, Contract or other instrument or obligation to which Seller or the Partnership is a party or by which their respective assets may be bound or (iii) violate or breach any law, order, injunction, decree, statute, rule or regulation applicable to Seller or the Partnership, except, in the case of clauses (ii) and (iii) above, for violations, defaults, or rights of termination, cancellation or acceleration, losses of benefits or breaches which would not have or be reasonably expected to have, individually or in the aggregate, a Material Adverse Effect.

(b) Except as set forth in Section 4.3(b) of the Seller Disclosure Schedule (the filings and approvals referred to in Section 4.3 (b) of the Seller Disclosure Schedule are collectively referred to as the "**Seller Required Regulatory Approvals**"), no material declaration, filing or registration with, or notice to, or authorization, consent or approval of any Governmental Authority (other than the Permits and Environmental Permits) is necessary for the consummation by Seller of the transactions contemplated by this Agreement.

4.4 Capitalization. Section 4.4 of the Seller Disclosure Schedule sets forth all of the outstanding and authorized general partnership interests of the Partnership and all such interests are owned by the Persons as described in such Section of the Seller Disclosure Schedule. The Interest has been duly authorized and validly issued, and is fully paid and nonassessable, and is held of record and beneficially owned by Seller. Except as set forth in Section 4.4 of the Seller Disclosure Schedule or in the Partnership Agreement, there are no preemptive rights, rights of first refusal or any outstanding subscriptions, options, warrants or similar agreements of any kind to which Seller or the Partnership is party or by which the Partnership is bound obligating it to issue, deliver or sell additional general partnership interests or any securities convertible or exchangeable into general partnership interests, or obligating the Partnership to grant, extend or enter into any such subscription, option, warrant or agreement. At the Closing, Seller will transfer to Buyer good title to the Interest, free and clear of Encumbrances (other than Encumbrances created by Buyer or arising under applicable securities laws). The Partnership does not own, directly or indirectly, any capital stock or equity securities of any Person.

4.5 Financial Statements. Seller has delivered or made available copies to Buyer of the Financial Statements. The Financial Statements were prepared in accordance with GAAP, consistently applied (except as disclosed in the notes thereto), and fairly present, in all material respects, the financial position and results of operations of the Partnership as of the dates thereof and for the periods covered thereby.

4.6 Undisclosed Liabilities. Except as set forth in Section 4.6 of the Seller Disclosure Schedule, the Partnership has no material liability relating to the Business of a nature required by GAAP to be reflected in a balance sheet of the Partnership or the notes thereto) except for those liabilities (a) accrued or reserved against in the Interim Balance Sheet or disclosed in the notes thereto, (b) incurred in the ordinary course of business consistent with past practice after the Balance Sheet Date or (c) incurred in accordance with Section 6.1 after the date of this Agreement.

4.7 Absence of Certain Changes or Events. Except as set forth in Section 4.7 of the Seller Disclosure Schedule, since the Balance Sheet Date to the date of this Agreement, (a) there has not been any event, change, occurrence or circumstances that has had, or would reasonably be expected to have, a Material Adverse Effect, (b) the Partnership has conducted the Business only in the ordinary course consistent with past practice and (c) the Partnership has not suffered any loss, damage, destruction or other casualty to any of its property, plant, equipment or inventories (whether or not covered by insurance) in excess of $500,000.

4.8 Compliance with Law. Except for Environmental, Permits and Tax matters, which are the subject of Section 4.13, Section 4.17 and Section 4.18, respectively, and except as set forth in Section 4.8 of the Seller Disclosure Schedule, since January 1, 2006, each of Seller (solely with respect to the Business) and the Partnership has complied with all laws, statutes, ordinances, rules and regulations of any Governmental Authority applicable to its properties, assets and Business, except where such noncompliance would not have or be reasonably expected to have, individually or in the aggregate, a Material Adverse Effect. Since January 1, 2006, neither Seller (solely with respect to the Business) nor the Partnership has received notice of any material violation of any such law, statute, ordinance, rule or regulation. To Seller's Knowledge, neither Seller (solely with respect to the Business) nor the Partnership is under any investigation by any Governmental Authority with respect to the material violation of any such laws, statutes, ordinances, rules and regulations of any Governmental Authority.

4.9 Title to Real Property. Except as set forth in Section 4.9 of the Seller Disclosure Schedule, the Partnership has valid and indefeasible title to or holds a valid, binding and enforceable leasehold, license or other interest in, or right-of-way or easement through, all real property used by the Partnership in the ordinary course of business consistent with past practice (the "**Real Property**"), in each case free and clear of all Encumbrances.

4.10 Intellectual Property. Section 4.10 of the Seller Disclosure Schedule sets forth an accurate and complete list of all material registrations or applications for registration for United States copyrights, patents, or trademarks or

servicemarks (including Internet domain names) owned by the Partnership, including the jurisdiction and record owner of each application or registration. Except as would not have or reasonably be expected to have, individually or in the aggregate, a Material Adverse Effect, or as set forth on Section 4.11 of the Seller Disclosure Schedule, to Seller's Knowledge, (a) the Partnership owns or has valid rights to use all Intellectual Property necessary to operate the Business as currently conducted and (b) there are no pending or threatened written claims that (i) the Partnership is in violation of, infringing upon, diluting or misappropriating any Intellectual Property rights of any third Person or (ii) challenge the validity, enforceability or ownership of any material Intellectual Property owned by the Partnership. To Seller's Knowledge, no third Person is infringing, violating, diluting, or misappropriating any of the material Intellectual Property owned by the Partnership.

4.11 Material Leases. Section 4.11 of the Seller Disclosure Schedule sets forth a list of all Material Leases, including the name of the third party and the date of the lease or sublease and all amendments thereto, as of the date of this Agreement. Except as set forth in Section 4.11 of the Seller Disclosure Schedule, (a) each Material Lease is valid, binding and enforceable in accordance with its terms, and is in full force and effect, (b) the Partnership has not received any notice of material default of the Partnership under any Material Lease in the 12-month period prior to the date of this Agreement and (c) to Seller's Knowledge, there are no uncured defaults of the Partnership under any Material Lease that would give the counterparty thereof the right to terminate such Material Lease.

4.12 Insurance. Section 4.12 of the Seller Disclosure Schedule sets forth a list of all insurance policies and all fidelity bonds held by or applicable to Seller (solely with respect to the Business) and the Partnership setting forth, in respect of each such policy, the policy name, policy number, carrier, term, type and amount of coverage and annual premium. Except as set forth in Section 4.12 of the Seller Disclosure Schedule, all material policies of fire, liability, workers' compensation and other forms of insurance purchased or held by and insuring the Partnership or the Business are in full force and effect, all premiums with respect thereto have been paid, and no written notice of cancellation or termination has been received with respect to any such policy which was not replaced on substantially similar terms prior to the date of such cancellation.

4.13 Environmental Matters. (a) Except as set forth in Section 4.13(a) of the Seller Disclosure Schedule, the Partnership holds, and is in substantial compliance with, all material permits, licenses and governmental authorizations (the "**Environmental Permits**") required for the Partnership to operate the Business under applicable Environmental Laws, and the Partnership is otherwise in compliance with applicable Environmental Laws with respect to the Business except for such failures to hold or comply with required Environmental Permits, or such failures to be in compliance with applicable Environmental Laws, which would not have or be reasonably expected to have, individually or in the aggregate, a Material Adverse Effect.

(b) Except as set forth in Section 4.13(b) of the Seller Disclosure Schedule, the Partnership has not received any written request for information, or been

notified in writing that it is a potentially responsible party, under CERCLA or any similar state law with respect to the Business.

(c) Except as set forth in Section 4.13(c) of the Seller Disclosure Schedule, the Partnership has not entered into or agreed to any material consent, decree or order, and is not subject to any judgment, decree, or judicial order relating to compliance with any Environmental Law or the investigation or cleanup of Hazardous Substances under any Environmental Law which is outstanding and imposes material obligations on the Partnership.

(d) To Seller's Knowledge, no facts, circumstances or conditions exist that would reasonably be expected to result in liability under any Environmental Law having a Material Adverse Effect.

(e) Seller has delivered or made available to Buyer copies of all reports, assessments, investigations, or correspondence related to the Partnership in each case that relate to environmental matters and are material to the extent in the possession, custody, or control of Seller.

(f) Save and except for those representations and warranties in Section 4.3, the representations and warranties made in this Section 4.13 are Seller's exclusive representations and warranties relating to environmental matters.

4.14 Employee Matters. There are no employees of the Partnership and no employee or employee-benefit related liabilities of the Partnership.

4.15 Material Contracts. (a) Section 4.15(a) of the Seller Disclosure Schedule sets forth a list of all Contracts to which the Seller (solely with respect to the Business) or the Partnership, as applicable, is a party as of the date of this Agreement (excluding, for the avoidance of doubt, any such Contracts that are no longer in effect):

(i) for joint ventures, strategic alliances, partnerships, material licensing agreements (excluding licenses of generally available or commercial Software), or sharing of profits;

(ii) containing (i) covenants of the Partnership not to compete with any Person in any line of business or in any geographical area or (ii) covenants of any other Person not to compete with the Partnership in any line of business or in any geographical area;

(iii) with respect to all price swaps, hedges, futures or similar instruments;

(iv) with any current or former officer, director, stockholder, member, partner (or immediate family member thereof) of Seller, any Seller Affiliate or the Partnership;

(v) for the sale of any of the material assets of the Partnership other than in the ordinary course of business consistent with past practice or for the grant to any Person of any preferential rights to purchase any of its material assets;

(vi) for the acquisition (by merger, purchase of stock or assets or otherwise) by the Partnership of any operating business or the capital stock of any other Person;

(vii) for the incurrence, assumption or guarantee of any indebtedness for borrowed money of the Partnership or imposing an Encumbrance on any of the assets of the Partnership in connection therewith, including indentures, guarantees, loan or credit agreements, sale and leaseback agreements, purchase money obligations incurred in connection with the acquisition of property, mortgages, pledge agreements, security agreements, or conditional sale or title retention agreements;

(viii) providing for payments by or to the Partnership in excess of $250,000 in any fiscal year or $500,000 in the aggregate during the term thereof; provided that the calculation of the aggregate payments for any such Contract shall not include payments attributable to any renewal periods or extensions for which the Partnership may exercise an option in its sole discretion to approve or disapprove;

(ix) under which the Partnership has made advances or loans to any other Person;

(x) providing for severance, retention, change in control or other similar payments; and

(xi) providing for the guaranty, surety or indemnification, direct or indirect, by the Partnership, which reasonably could be expected to result in liability to the Partnership in excess of $500,000 (each document set forth on Section 4.16-A of the Seller Disclosure Schedule, being a "**Material Contract**").

(b) Except as disclosed in <u>Section 4.15 of the Seller Disclosure Schedule</u>, (a) each Material Contract is valid, binding and enforceable in accordance with its terms, and is in full force and effect, (b) neither Seller nor the Partnership has received or is aware of any notice of its default under any Material Contract in the 12-month period prior to the date of this Agreement, (c) there are no uncured defaults of Seller or the Partnership under any Material Contract that would give the counterparty thereof the right to terminate such Material Contract, (d) no party to any of the Material Contracts has exercised any termination rights with respect thereto and (e) no party has given written notice of any significant dispute with respect to any Material Contract. Seller has delivered or made available to Buyer correct and complete copies of all of the Material

---

Contracts, together with all amendments, modifications or supplements thereto. Neither Seller (solely with respect to the Business) nor the Partnership is a party to any material oral contract, agreement or arrangement.

4.16 <u>Legal Proceedings, etc</u>. Except as set forth in <u>Section 4.16 of the Seller Disclosure Schedule</u>, there are no material claims, actions, or proceedings pending or, to Seller's Knowledge, threatened against Seller or the Partnership relating to the Business, or any of their respective officers, directors or employees with respect to their business activities on behalf of the Partnership, by or before any Governmental Authority, including any claims, actions or proceedings relating to this Agreement or the transactions contemplated hereby, which, if adversely determined, would have or be reasonably expected to have, individually or in the aggregate, a Material Adverse Effect. Except as set forth in <u>Section 4.16 of the Seller Disclosure Schedule</u>, neither Seller (solely with respect to the Business) nor the Partnership is (a) subject to any outstanding judgment, rule, order, writ, injunction or decree of any Governmental Authority relating to the Business which would have or be reasonably expected to have, individually or in the aggregate, a Material Adverse Effect or (b) engaged in any legal action to recover monies due it or for damages sustained by it.

4.17 <u>Permits</u>. The Partnership has all permits, licenses, franchises and other governmental authorizations, consents and approvals, other than with respect to Environmental Laws, necessary to operate the Business as presently operated (collectively, "**Permits**"), except where the failure to have such Permits would not have or be reasonably expected to have, individually or in the aggregate, a Material Adverse Effect. Except as set forth in <u>Section 4.17(b) of the Seller Disclosure Schedule</u>, (a) neither Seller (solely with respect to the Business) nor the Partnership has received any notification that it is in material violation of any Permits, (b) the Partnership is in compliance with all Permits and (c) all material Permits are in good standing, have not expired, are final and non-appealable and, to Seller's Knowledge, are not subject to any threat of revocation, amendment or modification, except, in the case of clause (b) and (c), as would not have or be reasonably expected to have, individually or in the aggregate, a Material Adverse Effect.

4.18 Taxes. (a) To Seller's Knowledge, (i) the Partnership has filed all material Tax Returns required to be filed; (ii) such Tax Returns are true, correct and complete in all material respects; and (iii) the Partnership has fully and timely paid all Taxes shown to be due on such Tax Returns. With respect to any period for which Tax Returns have not yet been filed or for which Taxes are not yet due or owing, the Partnership has made due and sufficient accruals for such Taxes in the Financial Statements and its books and records. To Seller's Knowledge, no claim has been made in writing by a Taxing Authority in a jurisdiction in which the Partnership does not currently file a Tax Return that the Partnership is or may be subject to taxation by that jurisdiction. Neither Seller nor, to Seller's Knowledge, the Partnership has received any written notice of deficiency or assessment from any Taxing Authority with respect to (i) liabilities for material Taxes of the Partnership, which have not been fully and timely paid or finally settled, unless such liabilities are being diligently contested in good faith through appropriate proceedings and provided adequate reserves have been established in

accordance with GAAP in the Financial Statements of the Partnership, or (ii) adjustments to taxable income of the Partnership which have not been finally resolved. To Seller's Knowledge, no Tax Return of the Partnership is currently being audited or examined by any Taxing Authority, and neither Seller nor, to Seller's Knowledge, the Partnership has received any written notice that any Taxing Authority intends to conduct an audit or investigation with respect to any such Tax Return. There are no outstanding (i) agreements or waivers extending the applicable statutory periods of limitation for Taxes of the Partnership, (ii) extensions for the assessment or collection of Taxes of the Partnership, which Taxes have not since been paid, or (iii) powers of attorney that are currently in force with respect to any Tax matter with respect to the Partnership, for any period. The Partnership has qualified as, and has been treated as, a partnership for U.S. federal income Tax purposes at all times since the date of its formation.

(b) The Partnership has complied in all material respects with all applicable laws relating to the payment and withholding of Taxes and has duly and timely withheld and paid over to the appropriate Taxing Authority all amounts required to be so withheld and paid under all applicable laws.

(c) Neither Seller nor, to Seller's Knowledge, the Partnership has executed or entered into any written agreement with, or obtained or applied for any written consents or written clearances or any other Tax rulings from, nor has there been any written agreement executed or entered into on behalf of either of them with, any Taxing Authority, including any IRS closing agreements pursuant to Section 7121 of the Code or any similar provision of law, private letter rulings or comparable rulings of any Taxing Authority.

(d) Seller is not a foreign person within the meaning of Section 1445 of the Code.

4.19 Brokers' Fee. No broker, finder or similar intermediary has acted for or on behalf of, or is entitled to any broker, finder or similar fee or other commission from Seller or any of its Affiliates in connection with this Agreement or the transactions contemplated hereby.

ARTICLE V
REPRESENTATIONS AND WARRANTIES OF BUYER

Except as set forth in the Buyer Disclosure Schedule, Buyer hereby represents and warrants to Seller, as of the date of this Agreement, as follows:

5.1 Organization. Buyer is a limited liability company duly organized, validly existing and in good standing under the laws of the State of Delaware and has all requisite corporate power and authority to own, lease and operate its properties and to carry on its business as now being conducted. Complete and correct copies of Buyer's certificate of formation (or other similar governing documents) as currently in effect have heretofore been delivered or made available to Seller.

5.2 Authority Relative to this Agreement. Buyer has the corporate power and authority to execute and deliver this Agreement and to consummate the transactions contemplated hereby. The execution, delivery and performance by Buyer of this Agreement and the consummation by Buyer of the transactions contemplated hereby have been duly and validly authorized by Buyer and no other corporate proceedings on the part of Buyer are necessary to authorize this Agreement or to consummate the transactions contemplated hereby. This Agreement has been duly executed and delivered by Buyer, and assuming that this Agreement constitutes a legal, valid and binding agreement of Seller, constitutes a legal, valid and binding agreement of Buyer, and is enforceable against Buyer in accordance with its terms, except that such enforceability may be limited by applicable bankruptcy, insolvency, moratorium or other similar laws affecting or relating to enforcement of creditors' rights generally or general principles of equity.

5.3 Consents and Approvals; No Violation. (a) Except as set forth in Section 5.3(a) of the Buyer Disclosure Schedule, and other than obtaining the Buyer Required Regulatory Approvals and the Seller Required Regulatory Approvals, the execution, delivery and performance of this Agreement by Buyer and the consummation by Buyer of the transactions contemplated hereby will not (i) conflict with or result in any breach of any provision of the certificate formation (or similar organizational documents) of Buyer, (ii) result in a violation or default (with or without notice or lapse of time, or both) or give rise to any right of termination, cancellation or acceleration of any obligation or to loss of a benefit under any of the terms, conditions or provisions of any Permit, Contract, or other instrument or obligation to which Buyer is a party or by which its assets may be bound or (iii) violate or breach any law, order, injunction, decree, statute, rule or regulation applicable to Buyer, except, in the case of clauses (ii) and (iii) above, for violations, defaults, or rights of termination, cancellation or acceleration, losses of benefits or breaches which would not or would not be reasonably expected to, individually or in the aggregate, materially impair Buyer's ability to perform its obligations under this Agreement or consummate the transactions contemplated hereby or thereby.

(b) Except as set forth in Section 5.3(b) of the Buyer Disclosure Schedule (the filings and approvals referred to in Section 5.3(b) of the Buyer Disclosure Schedule are collectively referred to as the "**Buyer Required Regulatory Approvals**"), no material declaration, filing or registration with, or notice to, or authorization, consent or approval of any Governmental Authority is necessary for the consummation by Buyer of the transactions contemplated hereby.

5.4 Availability of Funds. On the Closing Date, Buyer will have immediately available funds sufficient to consummate the transactions contemplated by this Agreement.

5.5 Acquisition for Investment; Due Diligence. Buyer is an informed and sophisticated purchaser experienced in financial and business matters and the evaluation and investment in businesses such as the Business as contemplated hereunder. Buyer is acquiring the Interest for investment and not with a view toward or for sale in

connection with any distribution thereof in violation of applicable securities laws. Buyer agrees that the Interest may not be sold, transferred, offered for sale, pledged, hypothecated or otherwise disposed of without registration under the Securities Act of 1933, as amended, except pursuant to an exemption from such registration available under such Act. Buyer has undertaken such investigation and has been provided with and has evaluated such documents and information as it has deemed necessary to enable it, when considered together with the representations and warranties and covenants of Seller set forth herein, to make an informed and intelligent decision with respect to the execution, delivery and performance of this Agreement. Buyer has been furnished the materials relating to Buyer's purchase of the Interest that it has requested, and that Seller has provided Buyer the opportunity to ask questions of the officers and management employees of the Business and to acquire additional information about the Business and financial condition of the Business.

5.6 Brokers' Fee. No broker, finder or similar intermediary has acted for or on behalf of, or is entitled to any broker, finder or similar fee or other commission from Buyer or any of its Affiliates in connection with this Agreement or the transactions contemplated hereby.

ARTICLE VI
COVENANTS OF THE PARTIES

6.1 Conduct of Business of the Partnership. Except as set forth in Section 6.1-A of the Seller Disclosure Schedule, during the period from the date of this Agreement to the Closing Date, Seller shall (i) use its commercially reasonable efforts to cause the Partnership to, and (ii) if applicable, vote all of its general partnership interests in the Partnership in a manner consistent with causing the Partnership to, operate the Business only in the ordinary course of business, consistent with past practice. Without limiting the generality of the foregoing, and, except as contemplated in this Agreement or as described in Section 6.1-B of the Seller Disclosure Schedule, prior to the Closing Date, without the prior written consent of Buyer (such consent not to be unreasonably withheld, delayed or conditioned), Seller shall (i) use its commercially reasonable efforts to cause the Partnership, and (ii) if applicable, vote all of its general partnership interests in the Partnership in a manner consistent with causing the Partnership, not to:

(a) (i) create, incur or assume any material amount of indebtedness for borrowed money, other than in the ordinary course of business consistent with past practice, including obligations in respect of capital leases but excluding purchase money mortgages granted in connection with the acquisition of property in the ordinary course of business, or (ii) assume, guarantee, endorse or otherwise become liable or responsible (whether directly, contingently or otherwise) for the obligations of any other Person except in the ordinary course of business consistent with past practice;

(b) make any material change in the operations of the Business;

(c) sell, lease (as lessor), transfer or otherwise dispose of, any of the material assets of the Business, other than in the ordinary course of business consistent

with past practice, or mortgage or pledge, or impose or suffer to be imposed any Encumbrance on, any of the material assets of the Business;

(d) except as may be contemplated by the capital expenditure budget of the Partnership previously delivered or made available to Buyer, make any capital expenditures in excess of $250,000 individually or $500,000 in the aggregate;

(e) enter into or materially amend any Material Contracts or Permits or waive or release any material right thereunder other than in the ordinary course of business consistent with past practice;

(f) make any change in any material respect to any of the accounting principles, methods, policies or practices used by the Partnership, except for any change required by reason of a concurrent change in GAAP;

(g) make or change any material Tax elections or Tax accounting methods of the Partnership, except as required by applicable law, prepare or file any Tax Return (or amendment thereof) unless prepared in a manner consistent with past practice or settle or compromise any material Tax claim or liability;

(h) amend or change its organizational documents;

(i) (i) transfer, issue, sell, pledge, encumber, dispose or deliver any general partnership interests or any securities convertible or exchangeable into general partnership interests; (ii) grant any rights to purchase or otherwise acquire any general partnership interests or any securities convertible or exchangeable into general partnership interests; or (iii) amend in any material respect any of the terms of any such general partnership interests or any securities convertible or exchangeable into general partnership interests outstanding as of the date hereof;

(j) (i) repurchase or otherwise acquire any general partnership interest of the Partnership; or (ii) adopt a plan of complete or partial liquidation or resolutions providing for or authorizing a liquidation, dissolution, consolidation, restructuring, recapitalization, or other reorganization of the Partnership;

(k) acquire (by merger, consolidation, or acquisition of stock or assets or otherwise) any corporation, partnership, or other business organization or division thereof;

(l) settle or compromise any pending or threatened legal proceeding or any claim or claims for, or that would result in Losses by the Partnership following the Closing of, an amount that could, individually or in the aggregate, reasonably be expected to be greater than $500,000**;**

(m) (i) hire any employees prior to Closing; or (ii) establish, adopt or enter into any collective bargaining agreement or benefits plan, except as required under applicable law; or

(n) agree or otherwise commit to enter into any Contract, whether written or oral, with respect to any of the transactions set forth in the foregoing paragraphs (a) through (m).

6.2 Access to Information. (a) Between the date of this Agreement and the Closing Date, Seller shall (solely with respect to the Business), during ordinary business hours and upon reasonable notice, (i) give Buyer and its Representatives reasonable access to its personnel and all books, records, plants, offices and other facilities and properties constituting and solely related to the Business and the Partnership in Seller's possession and control which Buyer is permitted access by law as Buyer may reasonably request, (ii) permit Buyer to make such reasonable inspections thereof as Buyer may reasonably request; (iii) cause its officers and advisors to as promptly as reasonably practicable furnish Buyer with such financial and operating data and other information with respect to the Business in Seller's possession and control as Buyer may from time to time reasonably request; and (iv) cause its officers and advisors to as promptly as reasonably practicable furnish Buyer a copy of each report, schedule or other document filed or received by them with the FERC with respect to the Business in Seller's possession and control which Buyer is permitted access by law as Buyer may reasonably request; provided, however, that (A) any such investigation shall be conducted in such a manner as not to interfere unreasonably with the operation of the Business or the businesses of Seller or its Affiliates, (B) neither Seller nor the Partnership shall be required to take any action which would constitute a waiver of the attorney-client privilege and (C) neither Seller nor the Partnership shall be required to supply Buyer with any information which is subject to a reasonable legal obligation not to be supplied; provided, further, that in the case of (B) above, Seller will give reasonable access to such information to Buyer upon the execution by Buyer and Seller of a joint defense agreement, the terms of which shall be mutually agreed upon by such parties. Notwithstanding anything in this Section 6.2 to the contrary, (i) Seller and the Partnership shall not be obligated to furnish or provide such access to medical records to the extent prohibited by applicable law and (ii) Buyer shall not have the right to perform or conduct any environmental sampling or testing at, in, on or underneath any of the property used in the operation of the Business.

(b) All information furnished to or obtained by Buyer and its Representatives pursuant to this Section 6.2 shall be treated as confidential information and shall not be disclosed to any Person without the prior written consent of Seller.

(c) For a period of seven (7) years after the Closing Date, Seller and its Representatives shall have reasonable access to, including the right to photocopy, scan, fax or otherwise reproduce, all of the books and records of the Business in Buyer's possession and control to the extent that such access may reasonably be required by Seller in connection with matters relating to or affected by the operation of the Business prior to the Closing Date; provided, however, that any such actions shall be conducted in such a manner as not to interfere unreasonably with the operation of the Business. Such access shall be afforded by Buyer upon receipt of reasonable advance notice and during normal business hours. Seller shall be solely responsible for any costs or expenses incurred by them pursuant to this Section 6.2(c). If Buyer shall desire to dispose of any

such books and records prior to the expiration of such seven-year period, Buyer shall, prior to such disposition, give Seller a reasonable opportunity, at Seller's expense, to segregate and remove such books and records as Seller may select.

6.3 Expenses. Except to the extent otherwise specifically provided herein, whether or not the transactions contemplated hereby are consummated, all costs and expenses incurred in connection with this Agreement and the transactions contemplated hereby shall be borne by the party incurring such costs and expenses.

6.4 Further Assurances. Subject to the terms and conditions of this Agreement, each of the parties hereto shall use all commercially reasonable efforts to take, or cause to be taken, all action, and to do, or cause to be done, all things necessary, proper or advisable under applicable laws and regulations to consummate and make effective the sale of the Interest pursuant to this Agreement. From time to time after the date hereof, without further consideration, Seller shall, at Seller's expense, execute and deliver such documents to Buyer as Buyer may reasonably request in order more effectively to vest in Buyer ownership of the Interest. From time to time after the date hereof, Buyer shall, at Buyer's own expense, execute and deliver such documents to Seller as Seller may reasonably request in order to more effectively consummate the sale of the Interest pursuant to this Agreement. Notwithstanding anything to the contrary in this Section 6.4, no party shall be required to (a) expend funds or assume liabilities beyond those that are reasonable in nature and amount in the context of the transactions contemplated hereunder, (b) divest any of its assets, including its businesses, divisions or properties or (c) agree to restrictions on its businesses, operations or conduct other than those that have been expressly agreed to in this Agreement.

6.5 Public Statements. After the execution of this Agreement, the parties shall consult with each other prior to issuing any public announcement, statement or other disclosure with respect to this Agreement, or the transactions contemplated hereby, and neither party shall issue any such public announcement, statement or other disclosure without having first received the consent of the other party (such consent not to be unreasonably withheld or delayed), except as may be required by law.

6.6 Consents and Approvals. (a) Seller and Buyer shall cooperate with each other and (i) promptly prepare and file all necessary documentation, (ii) effect all necessary applications, notices, petitions and filings, and execute all agreements and documents, and (iii) use all commercially reasonable efforts to obtain all necessary consents, approvals and authorizations of all other Persons, in the case of each of the foregoing clauses (i), (ii), and (iii), necessary or advisable to consummate the transactions contemplated by this Agreement (including the Seller Required Regulatory Approvals and the Buyer Required Regulatory Approvals) or required by the terms of any deed of trust, franchise, Permit, concession, Contract or other instrument to which Seller, the Partnership, or Buyer is a party or by which any of them is bound. Seller shall have the right to review and approve in advance all characterizations of the information relating to the Business, and each of Seller and Buyer shall have the right to review and approve in advance all characterizations of the information relating to the transactions contemplated by this Agreement, which appear in any filing made in connection with the transactions

contemplated hereby. The parties agree that they shall consult with each other with respect to the transferring to Buyer or the obtaining by Buyer of all such necessary Environmental Permits, Permits, consents, approvals and authorizations of all third parties and Governmental Authorities. Seller and Buyer shall designate separate counsel with respect to all applications, notices, petitions and filings (joint or otherwise) relating to this Agreement and the transactions contemplated hereby on behalf of Seller, on the one hand, and Buyer, on the other hand, with all Governmental Authorities.

(b) The parties hereto shall consult with each other prior to proposing or entering into any stipulation or agreement with any Governmental Authority or any third party in connection with any federal, state or local governmental consents and approvals legally required for the consummation of the transactions contemplated hereby and shall not propose or enter into any such stipulation or agreement without the other party's prior written consent, which consent shall not be unreasonably withheld.

(c) Notwithstanding anything to contrary in this Section 6.4, no party shall be required to (i) expend funds or assume liabilities beyond those that are reasonable in nature and amount in the context of the transactions contemplated hereunder, (ii) divest any of its assets, including its businesses, divisions or properties or (iii) agree to restrictions on its businesses, operations or conduct other than those that have been expressly agreed to in this Agreement.

6.7 Tax Matters. (a) Notwithstanding any other provision of this Agreement, all Transfer Taxes incurred in connection with this Agreement and the transactions contemplated hereby shall be borne by Buyer, and Buyer shall, at its own expense, file, to the extent required by law, all necessary Tax Returns and other documentation with respect to all such Transfer Taxes, and, if required by applicable law, Seller shall join in the execution of any such Tax Returns or other documentation.

(b) Each of Buyer and Seller shall provide the other with such assistance as may reasonably be requested by the other party in connection with the preparation of any Tax Return, any audit or other examination by any Taxing Authority, or any judicial or administrative proceedings relating to liability for Taxes of the Partnership or with respect to the assets of the Partnership, and each shall retain and provide the requesting party with any records or information which may be relevant to such return, audit or examination, proceedings or determination. Any information obtained pursuant to this Section 6.7 or pursuant to any other Section hereof providing for the sharing of information or review of any Tax Return or other schedule relating to Taxes shall be kept confidential by the parties hereto.

6.8 Supplements to Schedules. On one or more occasions prior to the Closing Date, Seller may update, supplement or amend the Seller Disclosure Schedule with additional information to reflect events, facts, circumstances or occurrences arising (and, in the case of representation or warranties qualified by Seller's Knowledge, Seller's Knowledge obtained) after the date of this Agreement. Any such update, supplement or amendment shall be given effect and taken into account for purposes of this Agreement (including Article IX); provided, however, that any such update, supplement or

amendment shall be disregarded and not taken into account for purposes of determining whether the conditions set forth in Section 7.2(b) or Section 7.2(d) have been satisfied.

6.9 No Implied Representations. Buyer hereby acknowledges and agrees that none of Seller, the Partnership, their Affiliates or any other Person has made or is making any representation or warranty whatsoever, express or implied, at law or in equity, except those representations and warranties of Seller explicitly set forth in Article IV of this Agreement. Without limiting the generality of the foregoing, except as explicitly set forth in Article IV of this Agreement, none of Seller, the Partnership, their Affiliates or any other Person has made or is making any representation, express or implied, with respect to Seller, the Partnership, their respective businesses or any of their assets, liabilities or operations, their past, current or future financial condition, profitability or performance, the value of any of their assets or any assets of the Business, the merchantability, suitability or fitness for a particular purpose or quality with respect to any of their assets or any assets of the Business or the condition or workmanship thereof or the absence of any defects therein (whether latent or patent), and any such other representations or warranties are hereby expressly disclaimed.

6.10 Financial Statements. During the period from the date hereof to the Closing, upon the reasonable request of Buyer from time to time, Seller shall as promptly as reasonably practicable provide Buyer with a copy of any financial statements and operating or management reports prepared by the Partnership in the ordinary course of business consistent with past practice that are in Seller's possession and control.

ARTICLE VII
CLOSING CONDITIONS

7.1 Conditions to Each Party's Obligations to Effect the Transactions Contemplated Hereby. The respective obligations of each party to effect the transactions contemplated hereby shall be subject to the fulfillment or waiver (other than the conditions set forth in subsections (a) and (b) of this Section 7.1) at or prior to the Closing Date of the following conditions:

(a) No preliminary or permanent injunction or other order or decree by any federal or state court which prevents the consummation of the transactions contemplated hereby shall have been issued and remain in effect (each party agreeing to use its commercially reasonable efforts to have any such injunction, order or decree lifted) and no statute, rule or regulation shall have been enacted by any state or federal government or Governmental Authority in the United States which prohibits the consummation of the transactions contemplated hereby.

7.2 Conditions to Obligations of Buyer. The obligation of Buyer to effect the transactions contemplated by this Agreement shall be subject to the fulfillment at or prior to the Closing Date of the following additional conditions (any or all of which may be waived by Buyer in whole or in part in its sole discretion):

(a) Seller shall have performed and complied in all material respects with the covenants and agreements contained in this Agreement required to be performed and complied with by Seller on or prior to the Closing Date;

(b) The representations and warranties of Seller set forth in Article IV of this Agreement (disregarding any Material Adverse Effect or materiality qualifiers therein) shall be true and correct on and as of the Closing Date with the same force and effect as if made on and as of the Closing Date (except to the extent such representations and warranties shall have been expressly made as of an earlier date, in which case such representations and warranties shall have been true and correct only as of such earlier date), except for such failures to be true and correct which would not have or be reasonably expected to have, individually or in the aggregate, a Material Adverse Effect;

(c) Buyer shall have received a certificate from the authorized officer of Seller, dated the Closing Date, to the effect that to the best of such officer's knowledge, the conditions set forth in Sections 7.2(a) and 7.2(b) have been satisfied;

(d) Since the date of this Agreement, there has not been any event, change, occurrence or circumstances that has had, or would reasonably be expected to have, a Material Adverse Effect; and

(e) Seller shall have made all deliveries required under Section 3.2.

7.3 Conditions to Obligations of Seller. The obligation of Seller to effect the transactions contemplated by this Agreement shall be subject to the fulfillment at or prior to the Closing Date of the following additional conditions (any or all of which may be waived by Seller in whole or in part in its sole discretion):

(a) Buyer shall have performed in all material respects its covenants and agreements contained in this Agreement required to be performed and complied with by Buyer on or prior to the Closing Date;

(b) The representations and warranties of Buyer set forth in Article V of this Agreement (disregarding any materiality qualifiers therein) shall be true and correct on and as of the Closing Date with the same force and effect as if made on and as of the Closing Date (except to the extent such representations and warranties shall have been expressly made as of an earlier date, in which case such representations and warranties shall have been true and correct only as of such earlier date), except for such failures to be true and correct which would not or be reasonably expected to, individually or in the aggregate, materially impair Buyer's ability to perform its obligations under this Agreement or consummate the transactions contemplated hereby or thereby;

(c) Seller shall have received a certificate from an authorized officer of Buyer, dated the Closing Date, to the effect that, to the best of such officer's knowledge, the conditions set forth in Sections 7.3(a) and 7.3(b) have been satisfied; and

(d) Buyer shall have made all deliveries required under Section 3.3.

ARTICLE VIII
TERMINATION

8.1 Termination. (a) This Agreement may be terminated at any time prior to the Closing Date, by mutual written consent of Buyer and Seller.

(b) This Agreement may be terminated by Seller or Buyer if the transactions contemplated hereby shall not have been consummated on or before six (6) months from the date of this Agreement (the "**Termination Date**"); provided, however, that the right to terminate this Agreement under this Section 8.1(b) shall not be available to a party if its failure to fulfill any obligation under this Agreement has been the direct cause of, or directly resulted in, the failure of the Closing Date to occur on or before such date.

(c) This Agreement may be terminated by either Seller or Buyer if (i) any Governmental Authority, the consent of which is a condition to the obligations of Seller and Buyer to consummate the transactions contemplated hereby, shall have determined not to grant its consent and all appeals of such determination shall have been taken and have been unsuccessful, or (ii) any court of competent jurisdiction in the United States or any state shall have issued an order, judgment or decree permanently restraining, enjoining or otherwise prohibiting the transactions contemplated hereby and such order, judgment or decree shall have become final and nonappealable.

(d) This Agreement may be terminated by Buyer, if there has been a material violation or breach by Seller of any agreement, representation or warranty contained in this Agreement which has not been cured within thirty (30) days or which has rendered the satisfaction of any condition to the obligations of Buyer impossible and such violation or breach has not been waived by Buyer.

(e) This Agreement may be terminated by Seller, if there has been a material violation or breach by Buyer of any agreement, representation or warranty contained in this Agreement which has not been cured within thirty (30) days (except with respect to the obligations by Buyer to pay the Closing Consideration pursuant to Section 2.2 after all conditions to Buyer's obligations hereunder have been satisfied or waived, whereby Seller may immediately terminate this Agreement) or which has rendered the satisfaction of any condition to the obligations of Seller impossible and such violation or breach has not been waived by Seller.

8.2 Procedure and Effect of Termination. In the event of termination of this Agreement by Buyer or Seller pursuant to Section 8.1, written notice thereof shall forthwith be given by the terminating party to the other party and this Agreement shall terminate and the transactions contemplated hereby shall be abandoned, without further action by any of the parties hereto. If this Agreement is terminated as provided herein:

(a) such termination shall be the sole remedy of the parties hereto with respect to breaches of any agreement, representation or warranty contained in this Agreement and none of the parties hereto nor any of their respective trustees, directors,

officers, members, general partners, or Affiliates, as the case may be, shall have any liability or further obligation to the other party or any of their respective trustees, directors, officers, members, general partners, or Affiliates, as the case may be, pursuant to this Agreement, except in each case as specifically provided in this Section 8.2 and in Sections 6.2(b) and 6.3 and except in each case such termination shall not relieve (i) any party of any liability for any willful and material breach of this Agreement or (ii) Buyer of any liability for any breach of Section 5.4; and

(b) all filings, applications and other submissions made pursuant to this Agreement, to the extent practicable, shall be withdrawn from the agency or other person to which they were made.

ARTICLE IX
INDEMNIFICATION

9.1 Survival.

(a) The representations and warranties of the parties contained in Articles IV and V shall, subject to Section 9.1(c), survive the Closing until the date that is six (6) months after the Closing Date; provided, however, that any claim arising from a breach of Seller's representations or warranties set forth in Sections 4.2 (Authority), 4.4 (Capitalization) or 4.18 (Taxes) or Buyer's representations or warranties set forth in Section 5.2 (Authority) shall survive until the date that is ninety (90) days following the expiration of the applicable statute of limitations (including extensions thereof).

(b) All covenants and agreements contained herein that by their terms are to be performed in whole or in part, or which prohibit actions, subsequent to the Closing, shall survive the Closing in accordance with their terms. All other covenants and agreements contained herein shall not survive the Closing and shall thereupon terminate.

(c) The period of time a representation or warranty or covenant or agreement survives the Closing pursuant to this Section 9.1 shall be the "**Survival Period**" with respect to such representation or warranty or covenant or agreement. In the event notice of any claim for indemnification under this Article IX shall have been given within the applicable Survival Period and such claim has not been finally resolved by the expiration of such Survival Period, the representations or warranties or covenants or agreements that are the subject of such claim shall survive until such claim is finally resolved.

9.2 Indemnification Obligations of Seller.

(a) From and after the Closing, subject to the terms of this Article IX, Seller shall indemnify and hold harmless Buyer and its Affiliates (other than the Partnership) and their respective directors, officers, employees, stockholders, partners, members, agents, attorneys, representatives, successors and assigns (collectively, the "**Buyer Indemnified Parties**"), from and against any losses, damages, liabilities, costs and expenses (including reasonable costs of investigation and reasonable attorneys' fees),

interest, penalties, judgments, settlements, claims, obligations, deficiencies, demands, damages, fines, claims, suits, actions, causes of action, assessments, awards, whether or not involving a third party claim (collectively, "**Losses**") incurred by any Buyer Indemnified Party by reason of (i) any breach of any of the representations or warranties (in each case, when made) of Seller in Article IV and (ii) any breach of any of the covenants or agreements of Seller in this Agreement that by their terms are to be performed in whole or in part, or which prohibit actions, subsequent to the Closing Date.

(b) Except with respect to Losses incurred by any Buyer Indemnified Party as a result of a breach of Seller's representations or warranties set forth in Section 4.19 (Taxes), the obligation of Seller to indemnify any Buyer Indemnified Party for Losses is subject to the following limitations: (i) no Buyer Indemnified Party shall be entitled to make a claim against Seller for indemnification under Section 9.2(a)(i) ("**Buyer Claim**") unless and until the aggregate amount of Losses incurred by such Buyer Indemnified Party with respect to an event or occurrence and all other events or occurrences arising from the same circumstances **exceeds** $15,000 (a "**Base Claim**"); (ii) Seller shall not be required to provide indemnification to such Buyer Indemnified Party pursuant to Section 9.2(a)(i) unless the aggregate amount of Losses incurred by all the Buyer Indemnified Parties in respect of Buyer Claims constituting Base Claims exceeds 2.5% of the Closing Consideration (the "**Basket**"), and then the Buyer Indemnified Parties shall be entitled to indemnification for only the amount in excess of the Basket; and (iii) in no event shall the aggregate amount of Losses for which Seller is obligated to indemnify the Buyer Indemnified Parties pursuant to Section 9.2(a)(i) exceed 10% of the Closing Consideration (the "**Ceiling**").

9.3 Indemnification Obligations of Buyer.

(a) From and after the Closing, subject to the terms of this Article IX, Buyer shall indemnify and hold harmless Seller and its Affiliates (other than the Partnership) and their respective directors, officers, employees, stockholders, partners, members, agents, attorneys, representatives, successors and assigns (collectively, the "**Seller Indemnified Parties**") from and against Losses incurred by any Seller Indemnified Party by reason of (i) any breach of any of the representations or warranties (in each case, when made) of Buyer in Article V and (ii) any breach in any material respect of any of the covenants or agreements of Buyer in this Agreement that by their terms are to be performed in whole or in part, or which prohibit actions, subsequent to the Closing Date.

(b) The obligation of Buyer to indemnify any Seller Indemnified Party for Losses is subject to the following limitations: (i) no Seller Indemnified Parties shall be entitled to make a claim against Buyer for indemnification under Section 9.3(a)(i) ("**Seller Claim**") unless and until the aggregate amount of Losses incurred by the Seller Indemnified Parties with respect to an event or occurrence and all other events or occurrences caused by the same circumstances constitutes a Base Claim; (ii) Buyer shall not be required to provide indemnification to any Seller Indemnified Party pursuant to Section 9.3(a)(i) unless the aggregate amount of Losses incurred by all the Seller Indemnified Parties in respect of Seller Claims constituting Base Claims exceeds the

Basket, and then the Seller Indemnified Parties shall be entitled to indemnification for only the amount in excess of the Basket; and (iii) in no event shall the aggregate amount of Losses for which Buyer is obligated to indemnify the Seller Indemnified Parties pursuant to Section 9.3(a)(i) of this Agreement exceed the Ceiling.

9.4 Indemnification Procedures and Limitations.

(a) In the event that any action, suit, claim or proceeding is commenced by a third party involving a claim for which a party required to provide indemnification hereunder (an "**Indemnifying Party**") may be liable to a party entitled to indemnification (an "**Indemnified Party**") hereunder (a "**Third Party Claim**"), the Indemnified Party shall promptly notify the Indemnifying Party in writing of such Third Party Claim indicating the nature of such claim and the basis therefore (the "**Claim Notice**"); provided, however, that no delay on the part of the Indemnified Party in giving any such Claim Notice shall relieve the Indemnifying Party of any indemnification obligation hereunder except to the extent that the Indemnifying Party is adversely prejudiced by such delay. Thereafter, the Indemnified Party shall deliver to the Indemnifying Party, promptly following the Indemnified Party's receipt thereof, copies of all notices and documents (including court papers) received by the Indemnified Party relating to the Third-Party Claim. Subject to the provisions related to the settlement of Third-Party Claims set forth in Section 9.4(b), the Indemnifying Party will have the right to defend against, negotiate, settle or otherwise deal with any Third-Party Claim and to select counsel of its choice. If the Indemnifying Party does not, within 30 days from its receipt of the Claim Notice (the "**Notice Period**"), elect to undertake to defend against, negotiate, settle or otherwise deal with any Third Party Claim, the Indemnified Party may, subject to the provisions related to the settlement of Third-Party Claims set forth in Section 9.4(b), defend against, negotiate, settle or otherwise deal with such Third Party Claim. If the Indemnifying Party undertakes to defend against such Third Party Claim, (i) the Indemnifying Party shall not be liable to the Indemnified Party for any legal fees or expenses incurred by the Indemnified Party in connection with such Third Party Claim and (ii) the Indemnified Party may participate and retain counsel, at its own cost and expense, in the defense of such Third Party Claim (it being understood and agreed that the

Indemnifying Party shall control such defense); provided, however, the Indemnified Party will be entitled to participate in any such defense with separate counsel the reasonable fees and expenses of which the Indemnifying Party shall bear if, but only if, (A) so requested by the Indemnifying Party to participate or (B) a conflict of interest exists between the Indemnified Party and the Indemnifying Party that would make it inappropriate in the reasonable judgment of such Indemnified Party (upon and in conformity with the advice of counsel) for the same counsel to represent both the Indemnified Party and the Indemnifying Party; provided, further, that the Indemnifying Party will not be required to pay the reasonable fees and expenses of more than one (1) such counsel for all Indemnified Parties in connection with any Third-Party Claim.

(b) If the Indemnifying Party undertakes to defend against such Third Party Claim, the other party shall (and shall cause the applicable Indemnified Parties to) (i) fully cooperate with the Indemnifying Party and its counsel in the investigation, defense and settlement of such Third Party Claim, including providing all information

and documents available to the Indemnified Party which relate to such Third Party Claim and (ii) consent and agree to any settlement, compromise or discharge of a Third-Party Claim that the Indemnifying Party may recommend and that (A) does not require any payment or admission of liability by any Indemnified Party, (B) releases the Indemnified Party in connection with such Third-Party Claim and (C) does not otherwise have a material and adverse effect on the Business as determined by the Indemnified Party in its reasonable discretion. If the Indemnifying Party elects not to undertake within the Notice Period to defend against a Third-Party Claim, then the Indemnified Party shall not admit any liability with respect to, or settle, compromise or discharge, such Third-Party Claim without the Indemnifying Party's prior written consent (which shall not be unreasonably withheld or delayed).

(c) In calculating amounts payable to an Indemnified Party, the amount of any indemnified Losses shall be determined without duplication of any other Loss for which an indemnification claim has been made or could be made under any other representation, warranty, covenant, or agreement and shall be computed net of (i) payments recovered by the Indemnified Party under any insurance policy with respect to such Losses (it being understood and agreed by the parties that Seller (in the case of Seller Indemnified Parties) and Buyer (in the case of Buyer Indemnified Parties) shall use their commercially reasonable efforts to effect any such recovery), (ii) any prior or subsequent recovery by the Indemnified Party from any Person with respect to such Losses and (iii) any Tax benefit receivable by the Indemnified Party with respect to such Losses.

(d) Notwithstanding any other provision of this Agreement, in no event shall any Indemnified Party be entitled to indemnification pursuant to this Article IX to the extent any Losses were attributable to such Indemnified Party's own gross negligence or willful misconduct.

(e) To the extent that Seller makes any payment pursuant to this Article IX in respect of Losses for which Buyer or any of its Affiliates have a right to recover against a third party (including an insurance company), Seller shall be subrogated to the right of Buyer or any of its Affiliates to seek and obtain recovery from such third party; provided, however, that if Seller shall be prohibited from such subrogation, Buyer shall use its commercially reasonable efforts to seek recovery from such third party on Seller's behalf and shall pay any such recovery to Seller.

(f) Notwithstanding any other provision of this Agreement, in no event shall Seller or Buyer be liable for (i) punitive damages or any special, incidental, indirect or consequential damages of any kind or nature, regardless of the form of action through which such damages are sought or (ii) lost profits or diminution in value resulting from a breach or an alleged breach of any representation, warranty, covenant or other agreement set forth in this Agreement or otherwise in connection with the transactions contemplated hereby, even if under applicable Law, such lost profits or diminution in value would not be considered consequential or special damages.

(g) Except as otherwise provided by applicable law, Buyer and Seller agree to treat any indemnity payment made pursuant to this Article IX as an adjustment to the Purchase Price paid to Seller for all income Tax purposes.

(h) The remedies provided in this Article IX shall be the sole and exclusive remedies of the parties, from and after the Closing Date, with respect to this Agreement and the transactions contemplated hereby.

ARTICLE X
MISCELLANEOUS PROVISIONS

10.1 Amendment and Modification. Subject to applicable law, this Agreement may be amended, modified or supplemented only by written agreement of Seller and Buyer.

10.2 Waiver of Compliance; Consents. Except as otherwise provided in this Agreement, any failure of any of the parties to comply with any obligation, covenant, agreement or condition herein may be waived by the party entitled to the benefits thereof only by a written instrument signed by the party granting such waiver, but such waiver or failure to insist upon strict compliance with such obligation, covenant, agreement or condition shall not operate as a waiver of, or estoppel with respect to, any subsequent or other failure.

10.3 Notices. All notices and other communications hereunder shall be in writing and shall be deemed given if delivered personally or by facsimile transmission, or mailed by a nationally recognized overnight courier or registered or certified mail (return receipt requested), postage prepaid, to the parties at the following addresses (or at such other address for a party as shall be specified by like notice, provided that notices of a change of address shall be effective only upon receipt thereof):

(a) If to Seller, to:

TCPL Tuscarora Ltd.
450 1st Street S.W.
Calgary, Alberta, Canada T2P 5H1
Attention: General Counsel, TransCanada Corporation
Telecopy: (403) 920-2410

(b) if to Buyer, to:

TC PipeLines GP, Inc.
450 1st Street S.W.
Calgary, Alberta, Canada T2P 5H1
Attention: Secretary
Telecopy: (403) 920-2460

10.4 Assignment. This Agreement and all of the provisions hereof shall be binding upon and inure to the benefit of the parties hereto and their respective

successors and permitted assigns, but neither this Agreement nor any of the rights, interests or obligations hereunder shall be assigned by any party hereto, including by operation of law, without the prior written consent of the other party (which may be withheld in its sole discretion); provided, that, without the consent of Seller, but with prior notice to Seller, Buyer may assign all or any portion of its rights and obligations under this Agreement to one or more Affiliates of Buyer (provided, however, that (a) each such assignee shall execute a supplementary agreement pursuant to which it agrees to be bound by the terms and conditions of this Agreement and (b) no assignment of rights or obligations pursuant to this Section 10.4 shall relieve the assigning party of its obligations hereunder).

10.5 Governing Law. This Agreement shall be governed by and construed in accordance with the laws of the State of New York (regardless of the laws that might otherwise govern under applicable New York principles of conflicts of law) as to all matters, including matters of validity, construction, effect, performance and remedies.

10.6 Facsimiles; Counterparts. This Agreement may be executed by facsimile signatures by any party and such signature shall be deemed binding for all purposes hereof, without delivery of an original signature being thereafter required. This Agreement may be executed in one or more counterparts, each of which, when executed, shall be deemed to be an original and all of which together shall constitute one and the same document.

10.7 Interpretation. The article and section headings contained in this Agreement are solely for the purpose of reference, are not part of the agreement of the parties and shall not in any way affect the meaning or interpretation of this Agreement. When a reference is made in this Agreement to an Article, Section, Exhibit or Schedule, such reference shall be to an Article, Section, Exhibit or Schedule of or to this Agreement unless otherwise indicated. References in this Agreement to “dollars” or “$” are to U.S. dollars. Whenever the words “include,” “includes” or “including” are used in this Agreement, they shall be deemed to be followed by the words “without limitation.” When a reference in this Agreement is made to a “party” or “parties,” such reference shall be to a party or parties to this Agreement unless otherwise indicated.

10.8 Entire Agreement. This Agreement constitutes the entire agreement and understanding of the parties with respect to the subject matter hereof and supersedes all prior agreements and understandings between the parties with respect to such subject matter.

10.9 Severability. Whenever possible, each provision or portion of any provision of this Agreement will be interpreted in such manner as to be effective and valid under applicable law but if any provision or portion of any provision of this Agreement is held to be invalid, illegal or unenforceable in any respect under any applicable law or rule in any jurisdiction, such invalidity, illegality or unenforceability will not affect any other provision or portion of any provision in such jurisdiction, and this Agreement will be reformed, construed and enforced in such jurisdiction as if such

invalid, illegal or unenforceable provision or portion of any provision had never been contained herein.

10.10 Third Party Beneficiaries. This Agreement shall be binding upon and inure solely to the benefit of the parties hereto and their respective successors and assigns. None of the provisions of this Agreement shall be for the benefit of or enforceable by any third party, including any creditor of any party or any of their Affiliates. No such third party shall obtain any right under any provision of this Agreement or shall by reasons of any such provision make any claim in respect of any liability (or otherwise) against either party hereto.

IN WITNESS WHEREOF, Seller and Buyer have caused this Agreement to be signed by their respective duly authorized officers as of the date first above written.

TABLE OF CONTENTS

(Back To Top)

Section 3: EX-3.1.1 (AMENDMENT TO THE AMENDED AND RESTATED AGREEMENT OF LIMITED PARTNERSHIP OF TC PIPELINES, LP)

Exhibit 3.1.1

AMENDMENT NO.1
TO THE AMENDED AND RESTATED AGREEMENT
OF LIMITED PARTNERSHIP OF TC PIPELINES, LP

DATED EFFECTIVE NOVEMBER 14, 2007

WHEREAS TC PipeLines, LP (the "Partnership") is a limited partnership initially consisting of TC PipeLines GP, Inc., a Delaware corporation, as General Partner (the "General Partner") and TransCan Northern Ltd., a Delaware Corporation, as the Organizational Limited Partner, both of whom entered into the Amended and Restated Agreement of Limited Partnership of TC Pipelines, LP dated May 28, 1999 ("Partnership Agreement");

WHEREAS, subsequent to the execution of the Partnership Agreement, the Partnership offered common units in the Partnership to the public and now has approximately 34,856,086 common units issued and outstanding;

WHEREAS, the Partnership Agreement provides that the General Partner may adopt a form of certificate other than the form of Certificate currently specified in the Partnership Agreement, as it may wish to adopt in its discretion;

WHEREAS, the NASDAQ Stock Market adopted new rules that require listed companies or securities to be eligible for The Depository Trust Company's direct Registration System ("DRS") by January 1, 2008;

WHEREAS, DRS provides for electronic direct registration of eligible securities in an investor's name on the books of the transfer agent or issuer and allows partnership securities to be transferred between a transfer agent and broker;

WHEREAS, to comply with the rules of the NASDAQ Stock Market, the Partnership wishes to authorize a system of issuance, recordation and transfer of the Partnership's securities by electronic or other means not involving any issuance of certificates;

WHEREAS, Section 13.1(d)(ii)(B) of the Partnership Agreement provides that the General Partner, without the approval of any other partner, may amend any provision of the Partnership Agreement to make a change that, in the discretion of the General Partner, is necessary or advisable to comply with any rule, regulation, guideline or requirement of any National Securities Exchange; and

---

WHEREAS, the General Partner desires to make clear that such "other form of certificate" may include uncertificated securities, by amending the definition of "Certificate" in the Partnership Agreement.

NOW THEREFORE, the General Partner, on behalf of the Partnership, hereby amends the Partnership Agreement as follows:

1. Definitions. Unless otherwise defined herein, capitalized terms shall have the meanings set forth in the Partnership Agreement.

2. Amendment of Partnership Agreement. The Partnership Agreement shall be amended as follows:

(a) Section 1.1 is amended by deleting the definition of "Certificate" it in its entirety and inserting in its place the following:

""Certificate" means a certificate or an uncertificated electronic registration system (i) substantially in the form of Exhibit A to this Agreement, (ii) issued in global form in accordance with the rules and regulations of the Depository, (iii) in such other form as may be adopted by the General Partner in its discretion, evidencing ownership of one or more Common Units, or in such form as may be adopted by the General Partner in its discretion, evidencing ownership of one or more other Partnership Securities."

(b) Section 4.1 is amended by adding the following to the end of the current paragraph:

"Notwithstanding anything in this Section 4.1 or any other provision of this Agreement, at the General Partner's discretion, the Partnership's securities may be issued, recorded and transferred by electronic or other means not involving the issuance of physical Certificates. The provisions of this Agreement shall be interpreted as reasonably required to implement such a system. For example, no signature shall be required with respect to an uncertificated electronic registration system."

3. Except as amended hereby, the terms and provisions of the Partnership Agreement shall remain in full force and effect.

IN WITNESS WHEREOF, the General Partner has executed this Amendment effective as of the 14th day of November, 2007.

Section 4: EX-10.20 (TRANSPORTATION SERVICE AGREEMENT CONTRACT IDENTIFICATION FT4760)

Exhibit 10.20

Great Lakes
Gas Transmission Company

TRANSPORTATION SERVICE AGREEMENT Contract Identification FT4760

This Transportation Service Agreement (Agreement) is entered into by Great Lakes Gas Transmission Limited Partnership (Transporter) and TRANSCANADA PIPELINES LIMITED (Shipper).

WHEREAS, Shipper has requested Transporter to transport Gas on its behalf and Transporter represents that it is willing to transport Gas under the terms and conditions of this Agreement.

NOW, THEREFORE, Transporter and Shipper agree that the terms below constitute the transportation service to be provided and the rights and obligations of Shipper and Transporter.

1. **EFFECTIVE DATE**: December 07, 2007

2. **CONTRACT IDENTIFICATION**: FT4760

3. **RATE SCHEDULE**: FT

4. **SHIPPER TYPE:** Other

5. **STATE/PROVINCE OF INCORPORATION**: Canada

6. **TERM**: November 01, 2005 to October 31, 2009

7. **EFFECT ON PREVIOUS CONTRACTS:**

   This Agreement supersedes, cancels and terminates, as of the effective date stated above, the following contract(s): Service Agreement dated November 30, 2006 with Contract Identification FT4760.

   Shipper's and Transporter's obligations to each other arising for periods prior to the effective date stated above, remain in effect and are not being terminated by any provision of this Agreement.

8. **MAXIMUM DAILY QUANTITY (Dth/Day)**: 25,000

   Please see Appendix A for further detail.

9. **RATES**:

   Unless Shipper and Transporter have agreed to a Discounted Rate, pursuant to Section 19.2 of the General Terms and Conditions, or to a Negotiated Rate, pursuant to Section 4.5 of the Rate Schedule named above, rates shall be Transporter's maximum rates and charges plus all applicable surcharges in effect from time to time under the applicable Rate Schedule (as stated above) on file with the Commission unless otherwise agreed to by the parties in writing. Provisions governing a Discounted Rate shall be set forth in this Paragraph 9. Provisions governing a Negotiated Rate shall be set forth on Appendix B hereto.

Contract ID: FT4760

10. **POINTS OF RECEIPT AND DELIVERY**:

    The primary receipt and delivery points are set forth on Appendix A.

11. **RELEASED CAPACITY**:

N/A

12. **INCORPORATION OF TARIFF INTO AGREEMENT**:

This Agreement shall incorporate and in all respects be subject to the “General Terms and Conditions” and the applicable Rate Schedule (as stated above) set forth in Transporter’s FERC Gas Tariff, Second Revised Volume No. 1, as may be revised from time to time. Transporter may file and seek Commission approval under Section 4 of the Natural Gas Act (NGA) at any time and from time to time to change any rates, charges or provisions set forth in the applicable Rate Schedule (as stated above) and the “General Terms and Conditions” in Transporter’s FERC Gas Tariff, Second Revised Volume No. 1, and Transporter shall have the right to place such changes in effect in accordance with the NGA, and this Agreement shall be deemed to include such changes and any such changes which become effective by operation of law and Commission Order, without prejudice to Shipper’s right to protest the same.

13. **MISCELLANEOUS**:

No waiver by either party to this Agreement of any one or more defaults by the other in the performance of this Agreement shall operate or be construed as a waiver of any continuing or future default(s), whether of a like or a different character

Any controversy between the parties arising under this Agreement and not resolved by the parties shall be determined in accordance with the laws of the State of Michigan.

14. **OTHER PROVISIONS**:

It is agreed that no personal liability whatsoever shall attach to, be imposed on or otherwise be incurred by any Partner, agent, management official or employee of the Transporter or any director, officer or employee of any of the foregoing, for any obligation of the Transporter arising under this Agreement or for any claim based on such obligation and that the sole recourse of Shipper under this Agreement is limited to assets of the Transporter.

Upon termination of this Agreement, Shipper’s and Transporter’s obligations to each other arising under this Agreement, prior to the date of termination, remain in effect and are not being terminated by any provision of this Agreement.

---

15. **NOTICES AND COMMUNICATIONS**:

All notices and communications with respect to this Agreement shall be in writing and sent to the addresses stated below or at any other such address(es) as may be designated in writing:

Section 5: EX-10.21 (TRANSPORTATION SERVICE AGREEMENT CONTRACT IDENTIFICATION FT8742)

Exhibit 10.21

Great Lakes
Gas Transmission Company

TRANSPORTATION SERVICE AGREEMENT
Contract Identification FT8742

This Transportation Service Agreement (Agreement) is entered into by Great Lakes Gas Transmission Limited Partnership (Transporter) and TRANSCANADA PIPELINES LIMITED (Shipper).

WHEREAS, Shipper has requested Transporter to transport Gas on its behalf and Transporter represents that it is willing to transport Gas under the terms and conditions of this Agreement.

NOW, THEREFORE, Transporter and Shipper agree that the terms below constitute the transportation service to be provided and the rights and obligations of Shipper and Transporter.

1. **EFFECTIVE DATE**: December 06, 2007

2. **CONTRACT IDENTIFICATION**: FT8742

3. **RATE SCHEDULE**: FT

4. **SHIPPER TYPE**: Other

5. **STATE/PROVINCE OF INCORPORATION**: Canada

6. **TERM**: November 01, 2008 to October 31, 2010

   Transporter and Shipper agree that Shipper may extend the primary terns of this Agreement by exercising a contractual Right of First Refusal, pursuant to the procedures set forth in section 16 of the General Terms and Conditions of Transporter's FERC Gas Tariff.

7. **EFFECT ON PREVIOUS CONTRACTS**:

   This Agreement supersedes, cancels and terminates, as of the effective date stated above, the following contract(s): N/A

8. **MAXIMUM DAILY QUANTITY (Dth/Day):** 470,000

Please see Appendix A for further detail.

9. **RATES**:

Unless Shipper and Transporter have agreed to a Discounted Rate, pursuant to Section 19.2 of the General Terms and Conditions, or to a Negotiated Rate, pursuant to Section 4.5 of the Rate Schedule named above, rates shall be Transporter's maximum rates and charges plus all applicable surcharges in effect from time to time under the applicable Rate Schedule (as stated above) on file with the Commission unless otherwise agreed to by the parties in writing. Provisions governing a Discounted Rate shall be set forth in this Paragraph 9. Provisions governing a Negotiated Rate shall be set forth on Appendix B hereto.

Shipper and Transporter agree that for service under this Agreement from the point(s) of receipt listed on Appendix A to the point(s) of delivery listed on Appendix A, the Reservation Fee to be charged shall be $9.733 per Dth.

10. **POINTS OF RECEIPT AND DELIVERY**:

The primary receipt and delivery points are set forth on Appendix A.

Contract ID: FT8742

11. **RELEASED CAPACITY**:

N/A

12. **INCORPORATION OF TARIFF INTO AGREEMENT**:

This Agreement shall incorporate and in all respects be subject to the "General Terms and Conditions" and the applicable Rate Schedule (as stated above) set forth in Transporter's FERC Gas Tariff, Second Revised Volume No. 1, as may be revised from time to time. Transporter may file and seek Commission approval under Section 4 of the Natural Gas Act (NGA) at any time and from time to time to change any rates, charges or provisions set forth in the applicable Rate Schedule (as stated above) and the "General Terms and Conditions" in Transporter's FERC Gas Tariff, Second Revised Volume No. 1, and Transporter shall have the right to place such changes in effect in accordance with the NGA, and this Agreement shall be deemed to include such changes and any such changes which become effective by operation of law and Commission Order, without prejudice to Shipper's right to protest the same.

13. **MISCELLANEOUS**:

No waiver by either party to this Agreement of any one or more defaults by the other in the performance of this Agreement shall operate or be construed as a waiver of any continuing or future default(s), whether of a like or a different character.

Any controversy between the parties arising render this Agreement and not resolved by the parties shall be determined in accordance with the laws of the State of Michigan.

14. **OTHER PROVISIONS**:

It is agreed that no personal liability whatsoever shall attach to, be imposed on or otherwise be incurred by any Partner, agent, management official or employee of the Transporter or any director, officer or employee of any of the foregoing, for any obligation of the Transporter arising under this Agreement or for any claim based on such obligation and that the sole recourse of Shipper under this Agreement is limited to assets of the Transporter.

Upon termination of this Agreement, Shipper's and Transporter's obligations to each other arising under this Agreement, prior to the date of termination, remain in effect and are not being terminated by any provision of this Agreement.

---

15. **NOTICES AND COMMUNICATIONS**:

All notices and communications with respect to this Agreement shall be in writing and sent to the addresses stated below or at any other such address(es) as may be designated in writing:

Section 6: EX-10.22 (THE TC PIPELINES GP, INC. SHARE UNIT PLAN FOR NON-EMPLOYEE DIRECTORS (2007), DATED OCTOBER 18, 2007)

Exhibit 10.22

THE TC PIPELINES GP, INC.
SHARE UNIT PLAN
FOR NON-EMPLOYEE DIRECTORS (2007)

Section 1 Purpose

The Share Unit Plan for Non-Employee Directors (2007) (the “Plan”) is intended to enhance the ability of TC PipeLines GP, Inc. (the “General Partner”) to attract and retain high quality individuals to serve as members of the Board and to promote a greater alignment of interests between non-employee members of the Board and unitholders of the Partnership. The Plan is effective as of October 18, 2007.

Section 2 Definitions

For the purposes of the Plan:

(a) “Affiliate” With respect to any person, any other person directly or indirectly controlling or controlled by or under direct or indirect common control with such specified person.

(b) “Agreement” means, with respect to a particular Eligible Director or Participant, the written agreement, as amended from time to time, entered into between the General Partner and such Eligible Director pursuant to Section 5 hereof, substantially in the form of agreement set out in Appendix A attached hereto;

(c) “Aggregate Purchase Price” has the meaning assigned thereto in Section 8.6 hereof;

(d) “Annual Retainer Fee” means the portion, expressed in dollars, of the annual retainer fee, annual committee chair retainer fee and the annual Board and committee attendance fee, which would, but for the Plan, be payable in cash by the General Partner to an Eligible Director for approximately one year of service as a member of the Board beginning on the date of the annual meeting of the General Partner at which the Board is elected and ending on the date immediately preceding the date of the following annual meeting of the General Partner, and for greater certainty, Annual Retainer Fee shall exclude amounts received by an Eligible Director as a reimbursement for expenses incurred in attending meetings and any other fee which may be payable by the General Partner to an Eligible Director;

(e) “Beneficiary” means an individual who, on the date of a Participant’s death, is the person who has been designated in accordance with Section 13.1 hereof and the laws applicable to the Plan, or where no such individual had been validly designated by the Participant, or where the designated individual does not survive the Participant, the Participant’s legal representative;

(f) “Board” means the Board of Directors of the General Partner;

(g) “Broker” has the meaning assigned thereto in Section 11.1 hereof;

(h) “Common Unit” means a common unit representing a limited partnership interest in TC PipeLines, LP (the “Partnership”), or any subsequent security to which the Common Units have been converted, exchanged or changed as reasonably determined by the Board;

(i) “Eligible Director” has the meaning assigned thereto in Section 4 hereof;

(j) “Entitlement Date” has the meaning assigned thereto in Section 8.1 hereof as it may be adjusted pursuant to Section 8.2 hereof;

(k) “Fair Market Value” of a Common Unit means, as of any date, the value of Common Unit determined as follows:

(A) If the Common Unit is listed on any established stock exchange or a national market system, including without limitation the Nasdaq National Market or The Nasdaq SmallCap Market of The Nasdaq Stock Market, its Fair Market Value shall be the closing sales price for such unit (or the closing bid, if no sales were reported) as quoted on such exchange or system for the market trading day on the time of determination (or if that is not a trading day, the most recently concluded trading day) as reported in *The Wall Street Journal* or such other source as the Board deems reliable;

(B) If the Common Unit is regularly quoted by a recognized securities dealer but selling prices are not reported, the Fair Market Value of a Common Unit shall be the mean between the high bid and low asked prices for the Common Unit for the market trading day on the time of determination (or if that is not a trading day, the most recently concluded trading day), as reported in *The Wall Street Journal* or such other source as the Board deems reliable; or

(C) In the absence of an established market for the Common Unit, the Fair Market Value thereof shall be determined in good faith by the Board.

(l) “Participant” means an Eligible Director who has been credited Share Units under the Plan;

(m) “Plan” means The TC PipeLines GP, Inc. Share Unit Plan for Non-Employee Directors (2007), as amended and restated from time to time;

(n) “Price per Common Unit” has the meaning assigned thereto in Section 8.6 hereof;

(o) "Payment Period" means any of the four quarters of any financial year of the General Partner, and which, on the effective date hereof, end on March 31, June 30, September 30 and December 31;

(p) "Quarterly Retainer Fee" means the amount, expressed in dollars, representing up to twenty-five (25%) of the Annual Retainer Fee which would, but for the Plan, be payable in cash on the last day of each Payment Period by the General Partner to an Eligible Director, or if, with respect to any Payment Period, an Eligible Director has served as a member of the Board for a number of days that is less than the full Payment Period, the amount, expressed in dollars, which is the product of: (i) the quotient determined by dividing: (A) the number of days in the particular Payment Period during which the Eligible Director served as a member of the Board, by (B) the aggregate number of days in the particular Payment Period; and (ii) the amount, expressed in dollars, of the quarterly retainer fee which would otherwise have been payable for such Payment Period had the Eligible Director served as a member of the Board for the full Payment Period;

(q) "Reference Date", with respect to any Payment Period, means the date which shall be used to determine, on a quarterly basis, the Fair Market Value of a Common Unit for purposes of determining the number of Share Units to be credited, for such Payment Period, to a Participant's account pursuant to Sections 6 and 7 hereof, which date shall be, unless otherwise determined by the Board, the last trading day of such Payment Period on which the Fair Market Value of a Common Unit may be determined;

(r) "Share Unit" means a unit credited by means of a bookkeeping entry on the books of the Partnership to a Participant's account in accordance with the terms and conditions of the Plan;

(s) "Subsidiary" means any corporation, partnership or joint venture a majority of whose shares or ownership interests normally entitled to vote in electing directors or selecting persons charged with managing the business and affairs of such entity is owned directly or indirectly by the Partnership, the General Partner or its parent, TransCanada Corporation; and

---

(t) "Termination of Board Service" means the earliest date on which both of the following conditions are met: the Participant (1) has ceased to be an Eligible Director, and (2) is neither an employee of the Partnership, the General Partner or any of their Affiliates nor a member of the board of an Affiliate. With respect to a Participant who is a U.S. taxpayer, "Termination of Board Service" shall have the same meaning as a "separation from service" under section 409A of the Internal Revenue Code of 1986, as amended ("Section 409A").

Section 3 Administration of the Plan

Except where otherwise expressly provided herein, the Plan shall be administered by the Board and shall be subject to applicable corporate and securities law and policy requirements. All expenses of administration of the Plan shall be borne by the General Partner, including the purchase price of and any reasonable brokerage fees relating to the purchase of Common Units under the Plan.

Section 4 Eligibility

The Plan shall apply to all members of the Board who, on or at any time after the effective date of the Plan, and for so long as they continue to serve as members of the Board, are not otherwise employees of the General Partner, TransCanada Corporation or any of their Affiliates and have elected to participate in the Plan (each, an "Eligible Director").

Section 5 Execution of Agreement

Each Eligible Director shall, as soon as practicable after the effective date of the Plan or after the date on which such Eligible Director is elected or appointed for the first time, enter into an Agreement with the General Partner substantially in the form of the Agreement set out in Appendix A attached hereto. Such Agreement shall set out certain rights and obligations of the parties thereto with respect to the Share Units which shall, under the Plan, be credited to the account of a Participant and shall remain in full force and effect until all such Share Units shall have been redeemed.

Section 6 Deferral of Annual Retainer Fees and Grants of Additional Share Units

6.1 Each Eligible Director may choose to have credited to his or her account under the Plan, zero to 100 percent of his or her Annual Retainer Fee (or the portion thereof applicable to service of less than an entire term of approximately one year), in the form of Share Units in lieu of being paid such portion of his or her Annual Retainer Fee (or the portion thereof applicable to service of less than an entire term of approximately one year) in cash. In order to exercise this option, each such Eligible Director shall notify the Corporate Secretary of the General Partner before the commencement of the first calendar year for which such option is exercised. Thereafter, such Eligible Director shall remain a Participant in the Plan in respect of his or her Annual Retainer Fee until the election is withdrawn

---

by him or her for a subsequent calendar year. The Corporate Secretary of the General Partner shall make inquiries on this matter to each Eligible Director in November of each year.

6.2 The number of Share Units (including fractional Share Units) to be credited on a quarterly basis to the account of an Eligible Director who has exercised his or her option under Section 6.1 hereof with respect to any particular Payment Period, shall be equal to the quotient determined by the following formula:

$$\frac{\text{Quarterly Retainer Fee}}{\text{Fair Market Value of Common Unit}}$$

where:

i. Quarterly Retainer Fee is all or a portion of the entire amount, expressed in dollars, of the Eligible Director's Quarterly Retainer Fee which would, but for the Plan, have been paid in cash with respect to such Payment Period; and

ii. Fair Market Value of Common Unit is the Fair Market Value of a Common Unit on the Reference Date for such Payment Period.

6.3 The Board may, at any time in satisfaction of fees other than Annual Retainer Fees that may be payable to Eligible Directors in their capacity as members of the Board or otherwise in respect of their service as members of the Board, grant additional Share Units to Eligible Directors who have elected to receive Share Units. In the case of Eligible Directors who have not served a full term of approximately one year, the Board may grant additional Share Units on a pro rata basis to such Eligible Directors. Share Units granted pursuant to this Section 6.3 shall be credited to the applicable Eligible Director's account under the Plan as at the date specified by the Board. Notwithstanding the foregoing, with respect to any Participant who is a U.S. taxpayer, the Board shall exercise this discretion within the time periods required under Section 409A.

6.4 A Participant who becomes an employee of the General Partner or TransCanada Corporation (other than in his or her capacity as a member of the Board) or a Subsidiary, shall no longer be eligible to have Share Units credited to his or her account under the Plan. However, Share Units already credited to such person's account shall remain governed by the Plan and the Agreement.

5

Section 7 Distribution-like Amounts

A Participant's account shall, from time to time during the term of the Participant's Agreement, including the period following Termination of Board Service and until the Entitlement Date referred to in Section 8 hereof (even if the Entitlement Date a Participant elects pursuant to Section 8.1 falls between the record date for a distribution on the Common Units and the related distribution payment date), be credited, effective on each of the payment dates referred to below or on the Entitlement Date, as the case may be, with such number of additional Share Units equal to the quotient determined by the following formula:

$$\frac{\text{(Declared Distributions x Number of Share Units)}}{\text{Fair Market Value of Common Units}}$$

where:

i. Declared Distributions are one hundred percent (100%) of each distribution declared and paid by the Partnership on its Common Units on a per share basis (excluding stock dividends, but including distributions which may be paid in cash or in shares at the option of the unitholder);

ii. Number of Share Units are the number of Share Units recorded in the Participant's account on the record date for the payment of any such distribution; and

iii. Fair Market Value of Common Units is the Fair Market Value of a Common Unit on the payment date for such distribution, or if such payment date is not a trading date, on the preceding trading date, with fractions computed to four decimal places.

Section 8 Redemption of Share Units

8.1 Election of Entitlement Date

Participants shall redeem all of their Share Units on the respective Entitlement Dates elected in accordance with the following provisions:

(a) **Payouts to Participants who are not U.S. Taxpayers**. The value of the Share Units credited to the account under the Plan of each Participant who is not a U.S. taxpayer shall be redeemable by the Participant (or where the Participant has died, his Beneficiary) at the Participant's option (or after the Participant's death, at the option of his Beneficiary) following the Participant's Termination of Board Service by providing written notice of redemption to the Corporate Secretary of the General Partner specifying one of the dates specified in Section 8.1(c). The date so specified shall be the Participant's "Entitlement Date".

(b) **Payouts to Participants who are U.S. Taxpayers.** Participants who are U.S. taxpayers shall provide a written election to the Corporate Secretary of the General Partner prior to the end of each year that they are a Participant, fixing a single payout date following Termination of Board Service with respect to Share Units to be earned in the calendar year commencing immediately following the year in which such election is made. Any applicable payout date applicable to Share Units of a Participant under this Section 8.1 (b) shall be the Participant's "Entitlement Date" with respect to those Share Units. For clarity and as an example, a Participant might make an election in 2007 for Share Units that Participant will earn in 2008 and in 2008, may elect a different Entitlement Date for Share Units that Participant will earn in 2009.

(c) The permitted Entitlement Dates that a Participant elects pursuant to Sections 8.1(a) and (b) above, shall be the end of the first, second, third or fourth calendar quarter following the date of Termination of Board Service. If no payout date is elected with respect to any Share Units, then the payout dates in respect of such Share Units shall be the end of the first calendar quarter following the date of Termination of Board Service. In the case of Section 8.1(a) such notice shall be given within 60 days following the date of Termination of Board Service.

8.2 Adjustments to Entitlement Date

In the event any of the following provisions apply, the Entitlement Date elected by the Participant pursuant to Section 8.1 may be adjusted. In that case, the term 'Entitlement Date' shall mean the adjusted Entitlement Date, adjusted in accordance with this Section 8.2. Notwithstanding anything in this Section 8.2 to the contrary, with respect to Participants who are U.S. taxpayers, the adjusted Entitlement Date shall not be extended to a date beyond that permitted under Section 409A (and the regulations promulgated thereunder).

(a) Unavailable Data. In the event that the General Partner is unable, by a Participant's elected or adjusted Entitlement Date, to compute the final number of Share Units credited to such Participant's account by reason of the fact that any data required in order to compute the Fair Market Value of a Common Unit has not been made available to the General Partner, then the Entitlement Date shall be the trading day next following the date on which such data is made available to the General Partner.

(b) Undisclosed Material Information. Without limiting the generality of Section 14, subject to Section 8.5 and notwithstanding any other provision of the Plan, if, in the opinion of the Board, there is a material fact or a material change concerning the business and affairs of the Partnership, its Affiliates or Common Units (where "material fact" and "material change" have the meanings given under applicable securities legislation) that has not been generally disclosed to the public, on the Participant's Entitlement Date such Participant's Entitlement Date shall be postponed and no Common Units shall be purchased hereunder on behalf of such

Participant until such time as, in the opinion of the Board, such material fact or material change has been generally disclosed to the public or has ceased to exist.

8.3 Receipt of Common Units

If no election is made under Section 8.6, the General Partner shall arrange for a Participant, or a Participant's Beneficiary, as the case may be, to receive Common Units in satisfaction of, and in an number equal to, the number of Share Units recorded in the Participant's account on the Entitlement Date, subject to any adjustments pursuant to Section 17 hereof and reduced as necessary to reflect any applicable withholding taxes and other source deductions required by law to be withheld or deducted by the General Partner in connection with the redemption of the Participant's Share Units. Such Common Units shall be purchased in accordance with Sections 8.4 and Section 11 hereof.

8.4 Purchase of Common Units on Open Market

Prior to 11:00 a.m. on the Entitlement Date, the General Partner shall notify the Broker as to the number of Common Units to be purchased by the Broker on behalf of the Participant on the open market. As soon as practicable thereafter, the Broker shall purchase, on the open market, the number of Common Units which the General Partner has requested the Broker to purchase and shall notify the Participant and the General Partner of: (a) the aggregate purchase price ("Aggregate Purchase Price") of the Common Units, (b) the purchase price per Common Unit or, if the Common Units were purchased at different prices, the average purchase price (computed on a weighted average basis) per Common Unit ("Price per Common Unit"), (c) the amount of any related reasonable brokerage commission, and (d) the settlement date for the purchase of the Common Units, which settlement date shall not be later than the date specified in Section 8.5 hereof. On the settlement date, upon payment of the Aggregate Purchase Price and related reasonable brokerage commissions by the General Partner, the Broker shall deliver to the Participant or to the Participant's representative, the certificate representing the Common Units. Any entitlement to fractional Share Units shall be paid in cash based on the Price per Common Unit.

8.5 Delivery & Payment Date

Notwithstanding any other provision of the Plan, all Common Units to be purchased and delivered and all payments payable to or in respect of a Participant's Share Units hereunder, shall be delivered or paid in accordance with the Participant's election of an Entitlement Date pursuant to Section 8.1, but in no event later than December 31 of the calendar year following the year in which the Participant's Termination of Board Service occurs.

8.6 Election for Cash in Lieu of Common Units.

The Participant or the Participant's Beneficiary may elect, by providing written notice to the Corporate Secretary of the General Partner within 60 days of the Participant's Termination of Board Service, to receive the value of that Participant's Share Unit entitlement, as of the Entitlement Date, which is determined in accordance with Section 8.1(a) or (b) as applicable, in one lump sum cash payment (rather than receive Common Units) less any applicable withholdings, and the General Partner shall be fully discharged in making such cash payment. If the Participant or the Participant's Beneficiary provides the notice contemplated by this Section 8.6, the General Partner shall pay the value of the Share Units credited to the Participant's account under the Plan, computed as of the Entitlement Date. The lump sum cash payment, for the purpose of this Section 8.6, will be equivalent to the product determined by the following formula:

Share Units X Fair Market Value of a Common Unit

where:

Share Units means the number of Share Units standing to the credit of the Participant on the Entitlement Date; and

Fair Market Value of a Common Unit has the meaning given to it in Section 2(k) hereof.

Section 9 Participant's Account

The General Partner shall maintain in its books, an account for each Participant which records the number of Share Units standing to the credit of the Participant. Share Units will be fully vested upon being credited to a Participant's account and the Participant's entitlement to payment of Share Units at the termination date shall not thereafter be subject to satisfaction of any requirements as to any minimum period of service as a member of the Board. Upon redemption of the Share Units by way of receipt of Common Units as provided for under Section 8.3 hereof or a cash payment as provided for under Section 8.6 hereof, such Share Units shall be cancelled and the number of Share Units standing to the credit of the Participant shall be reduced to reflect the cancellation of such Share Units. A written confirmation of the balance in the account shall be mailed by the General Partner to the Participant at least annually.

Section 10 Effective Date of the Plan

The effective date of the Plan shall be October 18, 2007.

Amendments to and Suspension or Termination of the Plan

10.1 The Board may, from time to time, amend, suspend or terminate the Plan in whole or in part; however, any such amendment, suspension or termination shall not adversely affect the rights of any Participant under any Agreement existing at the time of such amendment, suspension or termination without the consent of the affected Participant.

Section 11 Purchases on the Open Market

11.1 Purchases of Common Units pursuant to the Plan shall be made on the open market by a broker who is independent from the Partnership and who is a member of The National Association of Securities Dealers (the "Broker"). The Participant who wishes to redeem his or her Share Units under the Plan, shall designate a Broker to purchase Common Units on the open market and any such designation may be changed by the Participant from time to time. Upon designation of the Broker, or at any time thereafter, the General Partner may elect to provide the designated Broker with a letter agreement to be entered into and executed by the Broker, Participant and General Partner and such letter agreement would set forth, *inter alia*:

(i) the Broker's concurrence to being designated to act for the Participant, to acting for the Participant and dealing with the Participant's account in accordance with customary trade practice with a view to obtaining the best share price for the Participant, and to delivering to the Participant, or his/her representative or Beneficiary as the case may be, the share certificate for the Common Units purchased, upon payment by the General Partner of the purchase price and related reasonable and customary brokerage commission; and

(ii) the Partnership's agreement to notify the Broker of the number of Common Units to be purchased and to pay the purchase price and the related reasonable and customary brokerage commission in connection with the purchase of the Common Units,

provided however, that no terms of said letter agreement shall have the effect of making the Broker or deeming the Broker to be an agent of the Partnership, General Partner or an affiliate of (or not independent from) the Partnership for purposes of any applicable corporate, securities or stock exchange requirement.

11.2 The Share Units, and any related Common Units that may be delivered under the Plan, have not been registered under the *U.S.*

Securities Act of 1933 as of the effective date of the Plan, and the Partnership or General Partner has no obligation to register such units or shares. The said Common Units may not be offered or sold in the United States unless registered or an exemption from registration is available.

Section 12 Rights of Participants

12.1 Except as specifically set out in the Plan or an Agreement, no Eligible Director, Participant or other person shall have any claim or right to any Common Units or any other benefit in respect of Share Units granted pursuant to the Plan.

12.2 Under no circumstances shall Share Units be considered Common Units nor shall they entitle any Participant to exercise voting rights or any other rights attaching to the ownership of the Common Units, nor shall any Participant be considered the owner of the Common Units until after the date of the purchase of such Common Units on the open market.

12.3 Neither the Plan nor any grant thereunder shall be construed as granting a Participant a right to be retained as a director of the General Partner or a claim or right to any future grant of Share Units.

Section 13 Death of Participant

13.1 Subject to the requirements of applicable laws, a Participant may designate in writing, a person who is a dependant or relation of the Participant as a beneficiary to receive any benefits payable or due to the Participant under the Plan, upon the death of such Participant. The Participant may, subject to applicable laws, change such designation from time to time. Such designation or change shall be in such form and executed and filed in such manner as the Board may, from time to time, determine.

13.2 In the event of a Participant's death, any and all payments with respect to Share Units then credited to such Participant's account under the Plan shall become payable to the Participant's Beneficiary in accordance with Section 8 hereof.

Section 14 Compliance with Applicable Laws

Any obligation of the General Partner with respect to the Common Units pursuant to the terms of the Plan, is subject to compliance with all applicable laws and the rules of any stock exchange on which units of the Partnership are listed. Should the General Partner determine that it is not feasible to arrange for purchase and delivery of Common Units to the Participant in accordance with Section 8 in satisfaction of Share Units by reason of any such laws, such obligation shall be satisfied by means of an equivalent cash payment, calculated in accordance with the provisions of Section 8.6. The Participant shall comply with all such laws and furnish the General Partner with any and all information and undertakings as may be required to ensure compliance therewith.

Section 15 Withholding Taxes

The General Partner shall be entitled to deduct any amount of withholding taxes and other withholdings from any amount paid or credited hereunder, which taxes shall reduce the amounts to which the Participant is entitled.

Section 16 Transferability

In no event may the rights or interests of a Participant under the Plan be assigned, encumbered, pledged, transferred or alienated in any way, except to the extent that certain rights may pass to a Beneficiary upon death of a Participant, by will or by the laws of succession and distribution.

Section 17 Alteration of Number of Share Units Subject to the Plan

17.1 In the event that the Common Units are subdivided or consolidated into a different number of Common Units, or a dividend that is payable in Common Units (rather than in cash or in shares at the option of the shareholder) is declared on the Common Units, the number of Share Units then recorded in the Participant's account shall be adjusted to equal the number of Common Units which would be held by the Participant immediately after the dividend, subdivision or consolidation, should the Participant have held a number of Common Units equal to the number of Share Units recorded in the Participant's account on the record date fixed for such dividend, or the effective date of such subdivision or consolidation.

17.2 In the event that the outstanding Common Units are changed into, or exchanged for a different number or kind of securities of the Partnership or of another entity, whether through an arrangement, amalgamation or other similar statutory procedure, or a share recapitalization, then there shall be substituted for each Common Unit referred to in the Plan, the kind of securities into which each outstanding Common Unit shall be so changed or exchanged and an equitable adjustment shall be made, if required, in the number of Share Units then recorded in the Participant's account. Any such adjustment will be reasonably determined by the Board and will be effective and binding for all purposes.

17.3 In the event there is any distribution to all or substantially all the holders of Common Units of:

(i) equity interests of any class other than Common Units and other than equity interests distributed as a dividend which may be paid in shares at the option of the shareholder;

(ii) rights, options or warrants other than rights, options or warrants to subscribe for or purchase Common Units (or securities convertible or exchangeable into Common Units) for a period of not more than 45 days at a price per Common Unit (or having a conversion or exchange price per

Common Unit) of not less than 95% of the current market price of a Common Unit on the record date for such distribution;

(iii) instruments of indebtedness of the Partnership; or

(iv) assets (excluding dividends paid in the ordinary course),

then, in each such case, an equitable adjustment shall be made in the number of Share Units then recorded in a Participant's account, such adjustment will be reasonably determined by the Board and will be effective and binding for all purposes.

17.4 In the case of any substitution, change or adjustment as provided for in this section, the variation shall generally require that the dollar value of the Share Units then recorded in the Participant's account prior to such substitution, change or adjustment will be proportionately and appropriately varied so that it be equal to such dollar value after the variation. The "dollar value" for this purpose means the number of Share Units recorded on the day immediately prior to the date such substitution, change or adjustment is made multiplied by the Fair Market Value of a Common Unit determined on that same day.

17.5 In the event that, at the time contemplated for the purchase of Common Units under the Plan, there is no public market for the Common Units or for securities substituted therefor as provided by this section, the obligations of the General Partner under the Plan shall be met by a payment in cash in such amount as is reasonably determined by the Board to be fair and equitable in the circumstances.

17.6 Notwithstanding any other provision of the Plan, in no event shall any amount be paid to, or in respect of, a Participant under the Plan or pursuant to any other arrangement, and no Share Units will be granted nor will any credit be made to Participant's account under the Plan to compensate for a downward fluctuation in the price of the Common Units, nor will any other form of benefit be conferred upon, or in respect of, a Participant for such purpose.

Section 18 Unfunded Plan

Unless otherwise determined by the Board, the Plan shall be unfunded. To the extent that any person holds any rights by virtue of an election under the Plan, such rights, unless otherwise determined by the Board, shall be no greater than the rights of an unsecured general creditor of the General Partner.

Section 19 Governing Law

The Plan shall be governed by, and interpreted in accordance with, the laws in force in the State of Delaware.

Appendix A

The TC PipeLines GP, Inc.
Share Unit Plan for Non-Employee Directors (2007)

THIS AGREEMENT is made effective this · day of ·, 2007,

BETWEEN:

TC PipeLines GP, Inc. a corporation incorporated under the laws of Delaware having its registered office in Wilmington, Delaware (hereinafter called the "General Partner")

AND

[Name of Participant], residing at
[Address]
[City, State]

(hereinafter called the "Participant")

PURSUANT TO THE TC PIPELINES GP, INC. SHARE UNIT PLAN FOR NON-EMPLOYEE DIRECTORS (2007) OF THE GENERAL PARTNER AS AMENDED FROM TIME TO TIME (THE "PLAN") AND FOR GOOD AND VALUABLE CONSIDERATION, THE RECEIPT AND SUFFICIENCY OF WHICH IS HEREBY ACKNOWLEDGED, THE PARTIES AGREE AS FOLLOWS:

1. This Agreement sets out the terms, conditions and restrictions which, together with the terms, conditions and restrictions set out in the Plan, shall govern the rights and obligations of the parties hereto with respect to all of the Share Units which shall be credited to the Participant's account under the Plan while the Participant remains an Eligible Director, as well as with respect to the delivery of Common Units to the Participant in compliance with the terms of the Plan; defined terms not otherwise defined herein shall have the same meaning as in the Plan, the text of which as at the date of this Agreement is attached hereto under Schedule A.

2. As set out in Section 11 of the Plan, the Broker shall be designated by the Participant by a written notification to the General Partner under Section 3 hereof. Any designation shall include the name and address, telephone and fax numbers of the Broker.

3. Any notices to the General Partner under this Agreement shall be sent to the address indicated below, unless notice of change of address is given by the General Partner to the Participant in accordance with this Section 3. Any notices to the Participant under this

Agreement shall be sent, and delivery of Common Units in respect of Share Units shall be made, to the address indicated below, unless notice of change of address is given by the Participant to the General Partner in accordance with this Section 3. Any notices under this Agreement or the Plan shall be given by registered mail, facsimile, courier service or personal delivery as follows:

With respect to the General Partner:
450 – 1 Street SW
Calgary, Alberta
T2P 5H1
Attention: Corporate Secretary
Facsimile number: (403) 920-2460

With respect to the Participant:
Mr./Ms.[Name]
[Address]
[City, State, Zip Code] United States
Facsimile number: (·) ·

4. In case of any conflict between the text of the Plan and the text of this Agreement, the text of the Plan shall govern.

5. The General Partner and the Participant hereby agree to comply with terms of the Plan as it may be amended from time to time. Within 30 days of the date on which any Plan amendment becomes effective, the General Partner shall provide the Participant with an amended copy of the Plan together with a memo outlining the amendments made. The Participant also agrees to comply with any and all applicable laws and policies of regulatory authorities, to furnish to the General Partner any and all information and undertakings as may be required to permit compliance by the Participant or the General Partner with any such laws and to consent to any revisions of the Plan and this Agreement as may be required to permit compliance by the General Partner with any such laws and policies or as the General Partner determines to be necessary or desirable.

6. The Participant understands that there may be restrictions on the Participant's right to sell the Common Units related to any Share Units within the United States and accordingly, agrees not to do so without prior discussion with, and approval by, the General Partner.

7. This Agreement shall be governed by and interpreted in accordance with the laws in force in the State of Delaware.

8. In connection with the Participant's execution of this Agreement, the Participant provides the confirmations, which are included in Schedule B hereto, which is incorporated in and forms part of this Agreement.

IN WITNESS WHEREOF the Parties hereto have executed these presents as of the day and year first written above.

Schedule B

To
The TC PipeLines GP, Inc.
Share Unit Plan for Non-Employee Directors (2007)

In connection with the Share Units to be credited to the Participant's account and the Participant's receipt of Common Units under the Plan, the Participant confirms that:

(1) The Participant will receive the Share Units and any related Common Units for its own account for investment and not with a view to, or for resale in connection with, any distribution thereof or of any interest therein that would violate the United States Securities Act of 1933 (the "Securities Act").

(2) The Participant agrees that the certificates representing any Common Units delivered under the Plan (and, until the transfer agent for the Common Units is otherwise advised by the General Partner, any certificates issued in exchange or substitution for or on registration of transfer of such securities) shall, at the request of the General Partner, on behalf of the Partnership, bear the following legend:

"THE COMMON UNITS EVIDENCED BY THIS UNIT CERTIFICATE HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933 (THE "SECURITIES ACT"). ACCORDINGLY, THE UNITS MAY NOT BE SOLD, TRANSFERRED, PLEDGED OR OTHERWISE DISPOSED OF, EXCEPT IN COMPLIANCE WITH THE SECURITIES ACT OR AN EXEMPTION THEREFROM."

(3) The Participant has been afforded an opportunity to ask questions and receive answers concerning the terms and condition of the Plan and to obtain such additional information with respect to the Partnership and the Plan as the Participant has requested.

(4) The Participant is an "accredited investor" as defined in Rule 501(a) under the Securities Act.

Section 11: EX-31.1 (CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT)

Exhibit 31.1

CERTIFICATION OF
PRINCIPAL EXECUTIVE OFFICER

I, Russell K. Girling, certify that:

1. I have reviewed this annual report on Form 10-K of TC PipeLines, LP;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15 (f) and 15d-15(f)) for the registrant and have:

   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluations; and

   d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation, of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Index

Certain matters contained in this report include "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements discuss our expected future results based on current and pending business operations. We make these forward-looking statements in reliance on the safe harbor protections provided under the Private Securities Litigation Reform Act of 1995.

All statements, other than statements of historical facts, included in this report which address activities, events or developments that we expect, believe or anticipate will exist or may occur in the future, are forward-looking statements. Forward-looking statements can be identified by various forms of words such as "anticipates," "believes," "could," "may," "should," "continues," "estimates," "expects," "forecasts," "might," "planned," "potential," "projects," "scheduled" or similar expressions. These forward-looking statements include, among others, statements regarding:

- Amounts and nature of future capital expenditures;
- Expansion and growth of our business and operations;
- Financial condition and liquidity;
- Business strategy;
- Estimates of proved gas and oil reserves;
- Reserve potential;
- Development drilling potential;
- Cash flow from operations or results of operations;
- Seasonality of certain business segments;
- Natural gas and natural gas liquids prices and demand.

Table of Contents

Forward-looking statements are based on numerous assumptions, uncertainties and risks that could cause future events or results to be materially different from those stated or implied in this document. Many of the factors that will determine these results are beyond our ability to control or project. Specific factors which could cause actual results to differ from those in the forward-looking statements include:

- Availability of supplies (including the uncertainties inherent in assessing and estimating future natural gas reserves), market demand, volatility of prices, and increased costs of capital;
- Inflation, interest rates, fluctuation in foreign exchange, and general economic conditions;
- The strength and financial resources of our competitors;
- Development of alternative energy sources;
- The impact of operational and development hazards;
- Costs of, changes in, or the results of laws, government regulations including proposed climate change legislation, environmental liabilities, litigation, and rate proceedings;
- Changes in the current geopolitical situation;
- Risks related to strategy and financing, including restrictions stemming from our debt agreements, future changes in our credit ratings and the availability and cost of credit;
- Risks associated with future weather conditions;
- Our ability to successfully manage the risks associated with selling and marketing products in the wholesale energy markets;
- Acts of terrorism;
- Additional risks described in our filings with the Securities and Exchange Commission.

Given the uncertainties and risk factors that could cause our actual results to differ materially from those contained in any forward-looking statement, we caution investors not to unduly rely on our forward-looking statements. We disclaim any obligations to and do not intend to update the above list or to announce publicly the result of any revisions to any of the forward-looking statements to reflect future events or developments.

In addition to causing our actual results to differ, the factors listed above and referred to below may cause our intentions to change from those statements of intention set forth in this report. Such changes in our intentions may also cause our results to differ. We may change our intentions, at any time and without notice, based upon changes in such factors, our assumptions, or otherwise.

Because forward-looking statements involve risks and uncertainties, we caution that there are important factors, in addition to those listed above, that may cause actual results to differ materially from those contained in the forward-looking statements. For a detailed discussion of those factors, see Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2007, and Part II, Item 1A. Risk Factors of this Form 10-Q.

The Williams Companies, Inc.
Notes to Consolidated Financial Statements
(Unaudited)

Note 1. General

Our accompanying interim consolidated financial statements do not include all the notes in our annual financial statements and, therefore, should be read in conjunction with the consolidated financial statements and notes thereto in our Annual Report on Form 10-K. The accompanying unaudited financial statements include all normal recurring adjustments that, in the opinion of our management, are necessary to present fairly our financial position at September 30, 2008, and results of operations for the three and nine months ended September 30, 2008 and 2007 and cash flows for the nine months ended September 30, 2008 and 2007.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Recent Market Events

The recent instability in financial markets has created global concerns about the liquidity of financial institutions and is having overarching impacts on the economy as a whole. In this volatile economic environment, many financial markets, institutions and other businesses remain under considerable stress. In addition, oil and gas prices have recently experienced significant declines. These events are impacting our business. However, we note the following:

- We are reducing our levels of expected capital expenditures.
- As of September 30, 2008, we have approximately $1.5 billion of cash and cash equivalents and nearly $2.6 billion of available capacity under our credit facilities.
- We have no significant debt maturities until 2011.
- Our risk from our net credit exposure to derivative counterparties, considering master netting agreements and collateral support, is not significant. Our net credit exposure as of September 30, 2008, related to derivative assets is $384 million, net of $54 million of collateral support. This exposure is concentrated with investment grade financial institution counterparties.

To the extent that these recent events drive sustained lower energy commodity prices, it will negatively impact our future results of operations and cash flow from operations and could result in a further reduction in capital expenditures. These impacts could also include the future nonperformance of counterparties or impairments of goodwill and long-lived assets.

Note 2. Basis of Presentation

Discontinued Operations

In accordance with the provisions related to discontinued operations within Statement of Financial Accounting Standards (SFAS) No. 144, “Accounting for the Impairment or Disposal of Long-Lived Assets,” the accompanying consolidated financial statements and notes reflect the results of operations and financial position of our former power business as discontinued operations. (See Note 3.) These operations included a 7,500-megawatt portfolio of power-related contracts that was sold in 2007 and our natural-gas fired electric generating plant located in Hazleton, Pennsylvania (Hazleton) that was sold in March 2008, in addition to other power-related assets.

Unless indicated otherwise, the information in the Notes to Consolidated Financial Statements relates to our continuing operations.

Table of Contents

Notes (Continued)

Master Limited Partnerships

We currently own approximately 23.6 percent of Williams Partners L.P., including the interests of the general partner, which is wholly owned by us, and incentive distribution rights. Considering the presumption of control of the general partner in accordance with Emerging Issues Task Force (EITF) Issue No. 04-5, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights," we consolidate Williams Partners L.P. within our Midstream Gas & Liquids (Midstream) segment.

In January 2008, Williams Pipeline Partners L.P. completed its initial public offering of 16.25 million common units at a price of $20 per unit. In February 2008, the underwriters exercised their right to purchase an additional 1.65 million common units at the same price. The initial asset of the partnership is a 35 percent interest in Northwest Pipeline GP (Northwest Pipeline). Upon completion of these transactions, we now own approximately 47.7 percent of the interests in Williams Pipeline Partners L.P., including the interests of the general partner, which is wholly owned by us, and incentive distribution rights. In accordance with EITF Issue No. 04-5, we consolidate Williams Pipeline Partners L.P. within our Gas Pipeline segment due to our control through the general partner.

Note 3. Discontinued Operations

The summarized results of discontinued operations and summarized assets and liabilities of discontinued operations primarily reflect our former power business except where noted otherwise.

Summarized Results of Discontinued Operations

The following table presents the summarized results of discontinued operations for the three and nine months ended September 30, 2008 and 2007.

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
	(Millions)		(Millions)	
Revenues	$ —	$ 703	$ 5	$ 2,210
Income (loss) from discontinued operations before income taxes	(4)	(52)	159	324
(Impairments) and gain (loss) on sales	8	2	8	(124)
(Provision) benefit for income taxes	(7)	20	(68)	(76)
Income (loss) from discontinued operations	$ (3)	$ (30)	$ 99	$ 124

Income (loss) from discontinued operations before income taxes for the nine months ended September 30, 2008, includes $128 million of gains from the favorable resolution of matters involving pipeline transportation rates associated with our former Alaska operations and $54 million of income from a reduction of remaining amounts accrued in excess of our obligation associated with the Trans-Alaska Pipeline System Quality Bank (see Note 12). These gains are partially offset by a $10 million charge from a settlement primarily related to the sale of natural gas liquids pipeline systems in 2002 (see Note 12) and a charge of $10 million associated with an oil purchase contract related to our former Alaska refinery.

Income (loss) from discontinued operations before income taxes for the nine months ended September 30, 2007, includes a gain of $429 million (reported in *revenues* of discontinued operations) associated with the reclassification of deferred net hedge gains from *accumulated other comprehensive income* to earnings in second-quarter 2007. This reclassification was based on the determination that the forecasted transactions related to the derivative cash flow hedges being sold were probable of not occurring. The three and nine months ended September 30, 2007, includes unrealized mark-to-market losses of $49 million and $72 million, respectively.

(Impairments) and gain (loss) on sales for the three and nine months ended September 30, 2008, primarily represents $9 million of final proceeds from the sale of our former power business.

(*Impairments) and gain (loss) on sales* for the nine months ended September 30, 2007, includes impairments of $111 million related to the carrying value of certain derivative contracts for which we had previously elected the normal purchases and normal sales exception under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," and, accordingly, were no longer recording at fair value, and $13 million related to our natural gas-fired electric generating plant near Hazleton, Pennsylvania. These impairments were based on our comparison of the carrying value to the estimate of fair value less cost to sell.

Table of Contents

Notes (Continued)

Summarized Assets and Liabilities of Discontinued Operations

The following table presents the summarized assets and liabilities of discontinued operations as of September 30, 2008 and December 31, 2007. The September 30, 2008, and December 31, 2007, balances for *derivative assets* and *derivative liabilities* represent contracts remaining to be assigned to the purchaser of our former power business, entirely offset by reciprocal positions with that same party. We continue to pursue assignment of the remaining contracts. The December 31, 2007, balance of *property, plant and equipment — net* includes Hazleton. These assets were sold in a March 2008 transaction for $8 million.

	September 30, 2008	December 31, 2007
	(Millions)	
Derivative assets	$ 11	$ 114
Accounts receivable — net	5	55
Other current assets	—	3
Total current assets	16	172
Property, plant and equipment — net	—	8
Other noncurrent assets	—	5
Total noncurrent assets	—	13
Total assets	$ 16	$ 185
Derivative liabilities	$ 11	$ 114
Other current liabilities	2	61
Total current liabilities	13	175
Total liabilities	$ 13	$ 175

Note 4. Asset Sales, Impairments and Other Accruals

The following table presents significant gains or losses from asset sales, impairments and other accruals or adjustments reflected in *other income — net* within *segment costs and expenses*.

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
	(Millions)		(Millions)	
Exploration & Production				
Gain on sale of contractual right to an international production payment	$ —	$ —	$(148)	$ —
Impairment of certain natural gas producing properties	14	—	14	—
Gas Pipeline				
Income from change in estimate related to a regulatory liability	—	—	—	(17)
Income from payments received for a terminated firm transportation agreement on Grays Harbor lateral. Associated with this gain is interest income of $2 million, which is included in *investing income*	—	(12)	—	(18)
Gain on sale of certain south Texas assets	(10)	—	(10)	—

In January 2008, we sold a contractual right to a production payment on certain future international hydrocarbon production for $148 million. In the first quarter of 2008, we received $118 million in cash, with the remainder placed in escrow subject to certain post-closing conditions and adjustments. We recognized a pre-tax gain of $118 million in the first quarter of 2008 related to the initial cash received. In the second quarter of 2008, the remaining cash was received from escrow and recognized as income.

Investing income within our Other segment includes gains from the sales of cost-based investments of $10 million and $15 million for the nine months ended September 30, 2008 and 2007, respectively.

[Table of Contents](#)

Notes (Continued)

Note 5. Provision for Income Taxes

The *provision for income taxes* includes:

	Three months ended September 30, 2008	Three months ended September 30, 2007	Nine months ended September 30, 2008	Nine months ended September 30, 2007
	(Millions)		(Millions)	
Current:				
Federal	$ 33	$ 8	$ 299	$ 5
State	(11)	6	34	7
Foreign	10	12	39	37
	32	26	372	49
Deferred:				
Federal	149	118	312	319
State	22	11	41	33
Foreign	4	5	13	16
	175	134	366	368
Total provision	$ 207	$ 160	$ 738	$ 417

The effective income tax rates for the three and nine months ended September 30, 2008, are greater than the federal statutory rate due primarily to the effect of state income taxes.

The effective income tax rates for the three and nine months ended September 30, 2007, are greater than the federal statutory rate due primarily to the effect of state income taxes and taxes on foreign operations. The higher effective tax rate for the nine months ended September 30, 2007, was partially offset by a benefit recognized based on a favorable private letter ruling received from the Internal Revenue Service concerning our securities litigation settlement and fees, a portion of which were previously treated as nondeductible.

During the next twelve months, we do not expect settlement of any unrecognized tax benefit associated with domestic or international matters under audit to have a material impact on our financial position.

Note 6. Earnings Per Common Share from Continuing Operations

Basic and diluted earnings per common share are computed as follows:

	Three months ended September 30, 2008	Three months ended September 30, 2007	Nine months ended September 30, 2008	Nine months ended September 30, 2007
	(Dollars in millions, except per-share amounts; shares in thousands)			
Income from continuing operations available to common stockholders for basic and diluted earnings per common share (1)	$ 369	$ 228	$ 1,204	$ 641
Basic weighted-average shares (2)	577,448	596,836	582,105	598,124
Effect of dilutive securities:				
Nonvested restricted stock units	1,304	1,769	1,337	1,553
Stock options	3,468	4,726	4,003	4,762
Convertible debentures (3)	6,918	7,320	7,185	7,322
Diluted weighted-average shares	589,138	610,651	594,630	611,761
Earnings per common share from continuing operations:				
Basic	$ .63	$ .38	$ 2.07	$ 1.07
Diluted	$ .62	$ .38	$ 2.02	$ 1.05

(1) The three and nine month periods for both years include \$1 million and \$2 million, respectively, of interest expense, net of tax, associated with our convertible debentures. These amounts have been added back to *income from continuing operations available to common stockholders* to calculate diluted earnings per common share.

(2) Since third-quarter 2007, we have purchased 29 million shares of our common stock under a stock repurchase program (see Note 11).

(3) During third-quarter 2008, we converted $25 million of our 5.5 percent junior subordinated convertible debentures in exchange for 2 million shares of our common stock.

Table of Contents

Notes (Continued)

The table below includes information related to stock options that were outstanding at September 30 of each respective year but have been excluded from the computation of weighted-average stock options due to the option exercise price exceeding the third quarter weighted-average market price of our common shares.

	September 30, 2008	September 30, 2007
Options excluded (millions)	1.9	1.9
Weighted-average exercise prices of options excluded	$ 37.04	$ 37.56
Exercise price ranges of options excluded	$32.05 - $42.29	$33.51 - $42.29
Third quarter weighted-average market price	$ 30.22	$ 32.56

Note 7. Employee Benefit Plans

Net periodic benefit expense for the three and nine months ended September 30, 2008 and 2007 are as follows:

	Pension Benefits			
	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
	(Millions)		(Millions)	
Components of net periodic pension expense:				
Service cost	$ 6	$ 5	$ 17	$ 17
Interest cost	15	13	45	40
Expected return on plan assets	(20)	(18)	(59)	(54)
Amortization of net actuarial loss	3	5	10	14
Net periodic pension expense	$ 4	$ 5	$ 13	$ 17

	Other Postretirement Benefits			
	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
	(Millions)		(Millions)	
Components of net periodic other postretirement benefit expense:				
Service cost	$ 1	$ 1	$ 2	$ 2
Interest cost	5	5	14	13
Expected return on plan assets	(4)	(3)	(10)	(9)
Regulatory asset amortization	1	1	3	4
Net periodic other postretirement benefit expense	$ 3	$ 4	$ 9	$ 10

During the nine months ended September 30, 2008, we contributed $37 million to our pension plans and $11 million to our other postretirement benefit plans. We presently anticipate making additional contributions of approximately $25 million to our pension plans in the remainder of 2008 for a total of approximately $62 million. We presently anticipate making additional contributions of approximately $4 million to our other postretirement benefit plans in 2008 for a total of approximately $15 million.

The assets and liabilities recorded on the Consolidated Balance Sheet at September 30, 2008, representing the funded status of the pension and other postretirement benefit plans, use various assumptions including expected long-term rates of return on plan assets and discount rates. Considering the decline in the overall equity markets during 2008, the expected return on plan assets may not be achieved during 2008. Additionally, the 2008 increase in interest rates on high-quality corporate bonds could result in higher discount rates, resulting in lower plan obligations. As a result, the pension and other postretirement benefit plan assets and liabilities recorded as of September 30, 2008, may not represent the actual funded status of the plans as of that date. The annual measurement of the funded status of the plans will occur as of December 31, 2008. The impact of the differences between actual and assumed outcomes and changes in assumptions will likely cause a significant net actuarial loss and will be recognized in other comprehensive income, net of taxes, and amortized in net periodic benefit expense beginning in 2009.

Table of Contents

Notes (Continued)

Note 8. Inventories

Inventories at September 30, 2008 and December 31, 2007 are as follows:

	September 30, 2008	December 31, 2007
	(Millions)	
Natural gas liquids (NGLs)	$ 146	$ 66
Natural gas in underground storage	74	45
Materials, supplies and other	104	98
	$ 324	$ 209

Note 9. Debt and Banking Arrangements

Long-Term Debt

Revolving credit and letter of credit facilities (credit facilities)

At September 30, 2008, no loans are outstanding under our credit facilities. Letters of credit issued under our facilities are:

	Letters of Credit at September 30, 2008
	(Millions)
$500 million unsecured credit facilities	$ —
$700 million unsecured credit facilities	$ 237
$1.5 billion unsecured credit facility	$ 28

Lehman Commercial Paper Inc., which is committed to fund up to $70 million of our $1.5 billion revolving credit facility, has filed for bankruptcy. Lehman Brothers Commercial Bank, which has not filed for bankruptcy, is committed to fund up to $12 million of Williams Partners L.P.'s $200 million revolving credit facility. We expect that our ability to borrow under these facilities is reduced by these committed amounts. The committed amounts of other participating banks under these agreements remain in effect and are not impacted by the above.

Exploration & Production's credit agreement

In February 2007, Exploration & Production entered into a five-year unsecured credit agreement with certain banks in order to reduce margin requirements related to our hedging activities as well as lower transaction fees. In June 2008, the agreement was extended through December 2013.

Issuances and retirements

On January 15, 2008, Transcontinental Gas Pipe Line Corporation (Transco) retired $100 million of 6.25 percent senior unsecured notes due January 15, 2008, with proceeds borrowed under our $1.5 billion unsecured credit facility.

On April 15, 2008, Transco retired a $75 million adjustable rate unsecured note due April 15, 2008, with proceeds borrowed under our $1.5 billion unsecured credit facility.

On May 22, 2008, Transco issued $250 million aggregate principal amount of 6.05 percent senior unsecured notes due 2018 to certain institutional investors in a Rule 144A private debt placement. A portion of these proceeds was used to repay Transco's $100 million and $75 million loans from January 2008 and April 2008, respectively, under our $1.5 billion unsecured credit facility. In September 2008, Transco completed an exchange of these notes for substantially identical new notes that are registered under the Securities Act of 1933, as amended.

On May 22, 2008, Northwest Pipeline issued $250 million aggregate principal amount of 6.05 percent senior unsecured notes due 2018 to certain institutional investors in a Rule 144A private debt placement. These proceeds were used to repay Northwest Pipeline's $250 million loan from December 2007 under our $1.5 billion unsecured credit facility. In September 2008, Northwest Pipeline completed an exchange of these notes for substantially identical new notes that are registered under the Securities Act of 1933, as amended.

Notes (Continued)

Note 10. Fair Value Measurements

Adoption of SFAS No. 157

SFAS No. 157, "Fair Value Measurements" (SFAS 157), establishes a framework for fair value measurements in the financial statements by providing a definition of fair value, provides guidance on the methods used to estimate fair value and expands disclosures about fair value measurements. On January 1, 2008, we applied SFAS 157 for our assets and liabilities that are measured at fair value on a recurring basis, primarily our energy derivatives. Upon applying SFAS 157, we changed our valuation methodology to consider our nonperformance risk in estimating the fair value of our liabilities. The initial adoption of SFAS 157 had no material impact on our Consolidated Financial Statements. In February 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) FAS 157-2, permitting entities to delay application of SFAS 157 to fiscal years beginning after November 15, 2008, for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). Beginning January 1, 2009, we will apply SFAS 157 fair value requirements to nonfinancial assets and nonfinancial liabilities that are not recognized or disclosed at fair value on a recurring basis. SFAS 157 requires two distinct transition approaches: (1) cumulative-effect adjustment to beginning retained earnings for certain financial instrument transactions and (2) prospectively as of the date of adoption through earnings or other comprehensive income, as applicable, for all other instruments. Upon adopting SFAS 157, we applied a prospective transition as we did not have financial instrument transactions that required a cumulative-effect adjustment to beginning retained earnings.

Fair value is the price that would be received to sell an asset or the amount paid to transfer a liability in an orderly transaction between market participants (an exit price) at the measurement date. Fair value is a market based measurement considered from the perspective of a market participant. We use market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation. These inputs can be readily observable, market corroborated, or unobservable. We apply both market and income approaches for recurring fair value measurements using the best available information while utilizing valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs.

SFAS 157 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). We classify fair value balances based on the observability of those inputs. The three levels of the fair value hierarchy are as follows:

- Level 1 — Quoted prices in active markets for identical assets or liabilities that we have the ability to access. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. Our Level 1 primarily consists of financial instruments that are exchange-traded, including certain instruments that were part of sales transactions in 2007 and remain to be assigned to the purchaser. These unassigned instruments are entirely offset by reciprocal positions entered into directly with the purchaser. These reciprocal positions have also been included in Level 1.

- Level 2 — Inputs are other than quoted prices in active markets included in Level 1, that are either directly or indirectly observable. These inputs are either directly observable in the marketplace or indirectly observable through corroboration with market data for substantially the full contractual term of the asset or liability being measured. Our Level 2 primarily consists of over-the-counter (OTC) instruments such as forwards and swaps.

- Level 3 — Includes inputs that are not observable for which there is little, if any, market activity for the asset or liability being measured. These inputs reflect management's best estimate of the assumptions market participants would use in determining fair value. Our Level 3 consists of instruments valued using industry standard pricing models and other valuation methods that utilize unobservable pricing inputs that are significant to the overall fair value. Instruments in this category primarily include OTC options.

In valuing certain contracts, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. For disclosure purposes, assets and liabilities are classified in their entirety in the fair value hierarchy level based on the lowest level of input that is significant to the overall fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the placement within the fair value hierarchy levels.

Table of Contents

Notes (Continued)

The following table sets forth by level within the fair value hierarchy our assets and liabilities that are measured at fair value on a recurring basis.

Fair Value Measurements at September 30, 2008 Using:

	Quoted Prices in Active Markets for Identical Assets or Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
		(Millions)		
Assets:				
Energy derivatives	$ 1,008	$ 1,705	$ 386	$ 3,099
Other assets	12	—	10	22
Total assets	$ 1,020	$ 1,705	$ 396	$ 3,121
Liabilities:				
Energy derivatives	$ 950	$ 1,916	$ 104	$ 2,970
Total liabilities	$ 950	$ 1,916	$ 104	$ 2,970

Energy derivatives include commodity based exchange-traded contracts and OTC contracts. Exchange-traded contracts include futures and options. OTC contracts include forwards, swaps and options.

Many contracts have bid and ask prices that can be observed in the market. Our policy is to use a mid-market pricing (the mid-point price between bid and ask prices) convention to value individual positions and then adjust on a portfolio level to a point within the bid and ask range that represents our best estimate of fair value. For offsetting positions by location, the mid-market price is used to measure both the long and short positions.

The determination of fair value also incorporates the time value of money and credit risk factors including the credit standing of the counterparties involved, master netting arrangements, the impact of credit enhancements (such as cash deposits and letters of credit) and our nonperformance risk on our liabilities.

Exchange-traded contracts include New York Mercantile Exchange and Intercontinental Exchange contracts and are valued based on quoted prices in these active markets and are classified within Level 1.

Contracts for which fair value can be estimated from executed transactions or broker quotes corroborated by other market data are generally classified within Level 2. These broker quotes are based on observable market prices at which transactions could currently be executed. In certain instances where these inputs are not observable for all periods, relationships of observable market data and historical observations are used as a means to estimate fair value. Where observable inputs are available for substantially the full term of the asset or liability, the instrument is categorized in Level 2.

Certain instruments trade in less active markets with lower availability of pricing information requiring valuation models using inputs that may not be readily observable or corroborated by other market data. These instruments are classified within Level 3 when these inputs have a significant impact on the measurement of fair value. The fair value of options is estimated using an industry standard Black-Scholes option pricing model. Certain inputs into the model are generally observable, such as commodity prices and interest rates, whereas other model inputs, such as implied volatility by location, is unobservable and requires judgment in estimating. The instruments included in Level 3 at September 30, 2008, predominantly consist of options that primarily hedge future sales of production from our Exploration & Production segment, are structured as costless collars and are financially settled.

The following tables set forth a reconciliation of changes in the fair value of net derivatives and other assets classified as Level 3 in the fair value hierarchy.

Included in *other comprehensive income* (See Note 13)	870	—
Purchases, issuances, and settlements	27	—
Transfers in/out of Level 3	4	—
Balance as of September 30, 2008	$ 282	$ 10
Unrealized gains included in *income from continuing operations* relating to instruments still held at September 30, 2008	$ 23	$ —

Level 3 Fair Value Measurements Using Significant Unobservable Inputs
Nine Months Ended September 30, 2008

	Net Derivatives	Other Assets
	(Millions)	
Balance as of January 1, 2008	$ (14)	$ 10
Realized and unrealized gains (losses):		
Included in *income from continuing operations*	(7)	—
Included in *other comprehensive income* (See Note 13)	210	—
Purchases, issuances, and settlements	91	—
Transfers in/out of Level 3	2	—
Balance as of September 30, 2008	$ 282	$ 10
Unrealized losses included in *income from continuing operations* relating to instruments still held at September 30, 2008	$ (21)	$ —

Realized and unrealized gains (losses) included in *income from continuing operations* for the above period are reported in *revenues* in our Consolidated Statement of Income.

Note 11. Stockholders' Equity

During 2008, we purchased 13 million shares of our common stock for $474 million at an average cost of $36.76 per share completing our $1 billion common stock repurchase program. This stock repurchase is recorded in *treasury stock* on our Consolidated Balance Sheet. From the program's inception in third-quarter 2007 to its completion in July 2008, we purchased 29 million shares of our common stock reaching the $1 billion limit (including transaction costs) authorized by our Board of Directors. Our overall average cost per share was $34.74.

At December 31, 2007, we held all of Williams Partners L.P.'s seven million subordinated units outstanding. In February 2008, these subordinated units were converted into common units of Williams Partners L.P. due to the achievement of certain financial targets that resulted in the early termination of the subordination period. While these subordinated units were outstanding, other issuances of partnership units by Williams Partners L.P. had preferential rights and the proceeds from these issuances in excess of the book basis of assets acquired by Williams Partners L.P. were therefore reflected as minority interest on our Consolidated Balance Sheet rather than as equity. Due to the conversion of the subordinated units, these original issuances of partnership units no longer have preferential rights and now represent the lowest level of equity securities issued by Williams Partners L.P. In accordance with our policy regarding the issuance of equity of a consolidated subsidiary, such issuances of nonpreferential equity are accounted for as capital transactions and no gain or loss is recognized. Therefore, as a result of the first-quarter conversion, we recognized a decrease to minority interest and a corresponding increase to stockholders' equity of approximately $1.2 billion.

Notes (Continued)

Note 12. Contingent Liabilities

Rate and Regulatory Matters and Related Litigation

Our interstate pipeline subsidiaries have various regulatory proceedings pending. As a result, a portion of the revenues of these subsidiaries has been collected subject to refund. We have accrued a liability for these potential refunds as of September 30, 2008, which we believe is adequate for any refunds that may be required.

Issues Resulting from California Energy Crisis

Our former power business was engaged in power marketing in various geographic areas, including California. Prices charged for power by us and other traders and generators in California and other western states in 2000 and 2001 were challenged in various proceedings, including those before the U.S. Federal Energy Regulatory Commission (FERC). These challenges included refund proceedings, summer 2002 90-day contracts, investigations of alleged market manipulation including withholding, gas indices and other gaming of the market, new long-term power sales to the State of California that were subsequently challenged and civil litigation relating to certain of these issues. We have entered into settlements with the State of California (State Settlement), major California utilities (Utilities Settlement), and others that substantially resolved each of these issues with these parties.

As a result of a June 2008 U.S. Supreme Court decision, certain contracts that we entered into during 2000 and 2001 may be subject to partial refunds depending on the results of further proceedings at the FERC. These contracts, under which we sold electricity, totaled approximately $89 million in revenue. While we are not a party to the cases involved in the U.S. Supreme Court decision, the buyer of electricity from us is a party to the cases and claims that we must refund to the buyer any loss it suffers due to the FERC's reconsideration of the contract terms at issue in the decision.

Certain other issues also remain open at the FERC and for other nonsettling parties.

Refund proceedings

Although we entered into the State Settlement and Utilities Settlement, which resolved the refund issues among the settling parties, we continue to have potential refund exposure to nonsettling parties, such as the counterparty to the contracts described above and various California end users that did not participate in the Utilities Settlement. As a part of the Utilities Settlement, we funded escrow accounts that we anticipate will satisfy any ultimate refund determinations in favor of the nonsettling parties including interest on refund amounts that we might owe to settling and nonsettling parties. We are also owed interest from counterparties in the California market during the refund period for which we have recorded a receivable totaling approximately $24 million at September 30, 2008. Collection of the interest and the payment of interest on refund amounts from the escrow accounts is subject to the conclusion of this proceeding. Therefore, we continue to participate in the FERC refund case and related proceedings.

Challenges to virtually every aspect of the refund proceedings, including the refund period, continue to be made. Because of our settlements, we do not expect that the final resolution of refund obligations will have a material impact on us. Due to the ongoing proceedings and challenges, the final refund calculation has not been made and aspects of the refund calculation process remain unsettled.

Reporting of Natural Gas-Related Information to Trade Publications

Civil suits based on allegations of manipulating published gas price indices have been brought against us and others, in each case seeking an unspecified amount of damages. We are currently a defendant in:

- State court litigation in California brought on behalf of certain business and governmental entities that purchased gas for their use.
- Class action litigation and other litigation originally filed in state court in Colorado, Kansas, Missouri, Tennessee and Wisconsin brought on behalf of direct and indirect purchasers of gas in those states. On October 29, 2008, the Tennessee appellate court reversed the state court's dismissal of the plaintiffs' claims on federal preemption grounds and sent the case back to the lower court for further proceedings. The Missouri case has been remanded to Missouri state court. The cases in the other jurisdictions have been removed and transferred to the federal court in Nevada. On February 19, 2008, the federal court granted summary judgment in the Colorado case in favor of us and most of the other defendants. We expect that the Colorado plaintiffs will appeal.

Notes (Continued)

Mobile Bay Expansion

In 2002, an administrative law judge at the FERC issued an initial decision in Transco's 2001 general rate case which, among other things, rejected the recovery of the costs of Transco's Mobile Bay expansion project from its shippers on a "rolled-in" basis and found that incremental pricing for the Mobile Bay expansion project is just and reasonable. In 2004, the FERC issued an Order on Initial Decision in which it reversed certain parts of the administrative law judge's decision and accepted Transco's proposal for rolled-in rates. Gas Marketing Services holds long-term transportation capacity on the Mobile Bay expansion project. Certain parties filed appeals in federal court seeking to overturn the FERC's ruling on the rolled-in rates. On April 2, 2008, Gas Marketing Services executed an agreement that settled this matter for $10 million, which was accrued in 2007.

Environmental Matters

Continuing operations

Since 1989, our Transco subsidiary has had studies underway to test certain of its facilities for the presence of toxic and hazardous substances to determine to what extent, if any, remediation may be necessary. Transco has responded to data requests from the U.S. Environmental Protection Agency (EPA) and state agencies regarding such potential contamination of certain of its sites. Transco has identified polychlorinated biphenyl (PCB) contamination in compressor systems, soils and related properties at certain compressor station sites. Transco has also been involved in negotiations with the EPA and state agencies to develop screening, sampling and cleanup programs. In addition, Transco commenced negotiations with certain environmental authorities and other parties concerning investigative and remedial actions relative to potential mercury contamination at certain gas metering sites. The costs of any such remediation will depend upon the scope of the remediation. At September 30, 2008, we had accrued liabilities of $5 million related to PCB contamination, potential mercury contamination, and other toxic and hazardous substances. Transco has been identified as a potentially responsible party at various Superfund and state waste disposal sites. Based on present volumetric estimates and other factors, we have estimated our aggregate exposure for remediation of these sites to be less than $500,000, which is included in the environmental accrual discussed above. We expect that these costs will be recoverable through Transco's rates.

Beginning in the mid-1980s, our Northwest Pipeline subsidiary evaluated many of its facilities for the presence of toxic and hazardous substances to determine to what extent, if any, remediation might be necessary. Consistent with other natural gas transmission companies, Northwest Pipeline identified PCB contamination in air compressor systems, soils and related properties at certain compressor station sites. Similarly, Northwest Pipeline identified hydrocarbon impacts at these facilities due to the former use of earthen pits and mercury contamination at certain gas metering sites. The PCBs were remediated pursuant to a Consent Decree with the EPA in the late 1980s and Northwest Pipeline conducted a voluntary clean-up of the hydrocarbon and mercury impacts in the early 1990s. In 2005, the Washington Department of Ecology required Northwest Pipeline to reevaluate its previous mercury clean-ups in Washington. Consequently, Northwest Pipeline is conducting additional remediation activities at certain sites to comply with Washington's current environmental standards. At September 30, 2008, we have accrued liabilities of $7 million for these costs. We expect that these costs will be recoverable through Northwest Pipeline's rates.

In March 2008, the EPA issued a new air quality standard for ground level ozone. We currently do not know if our interstate gas pipelines will be impacted by the new standard. If they are, we will likely incur additional capital expenditures to comply. At this time we are unable to estimate the cost of these additions that may be required to meet the new regulations. We expect that costs associated with these compliance efforts will be recoverable through rates.

We also accrue environmental remediation costs for natural gas underground storage facilities, primarily related to soil and groundwater contamination. At September 30, 2008, we have accrued liabilities totaling $6 million for these costs.

Williams Production RMT Company performed voluntary audits of its 2006 and 2007 compliance with state and federal air regulations. In June 2007, pursuant to Colorado's audit immunity privilege law, we disclosed to the Colorado Department of Public Health and Environment (CDPHE) that certain aspects of our facilities were not in compliance. We also described corrective actions that had or would be taken to remedy the issues. The CDPHE denied our request for penalty immunity and proposed a penalty. In a separate matter, the CDPHE issued a Notice of Violation (NOV) to Williams Production RMT Company in 2006 related to operating permits for our Roan Cliffs and Hayburn gas plants in Garfield County, Colorado. We settled both of these matters with the CDPHE in June 2008 and paid a $93,300 civil penalty and made a $373,200 contribution to a state environmental program.

Table of Contents

Notes (Continued)

In April 2007, the CDPHE issued an NOV to Williams Production RMT Company related to alleged air permit violations at the Rifle Station natural gas dehydration facility located in Garfield County, Colorado. The Rifle Station facility had been shut down prior to our receipt of the NOV and, except for some minor operations, remains closed. We settled the matter with the CDPHE in June 2008 and paid an $11,200 civil penalty and made a $44,800 contribution to a state environmental program.

In April 2007, the New Mexico Environment Department's Air Quality Bureau (NMED) issued an NOV to Williams Four Corners, LLC (Four Corners) that alleged various emission and reporting violations in connection with our Lybrook gas processing plant's flare and leak detection and repair program. In December 2007, the NMED proposed a penalty of approximately $3 million. In July 2008, the NMED issued an NOV to Four Corners that alleged air emissions permit exceedances for three glycol dehydrators at one of our compressor facilities and proposed a penalty of approximately $103,000. We are discussing the proposed penalties with the NMED.

In March 2008, the EPA proposed a penalty of $370,000 for alleged violations relating to leak detection and repair program delays at our Ignacio gas plant in Colorado and for alleged permit violations at a compressor station. We met with the EPA and are exchanging information in order to resolve the issues.

In September 2007, the EPA requested, and our Transco subsidiary later provided, information regarding natural gas compressor stations in the states of Mississippi and Alabama as part of the EPA's investigation of our compliance with the Clean Air Act. On March 28, 2008, the EPA issued NOVs alleging violations of Clean Air Act requirements at these compressor stations. We met with the EPA in May 2008 and submitted our response denying the allegations in June 2008.

Former operations, including operations classified as discontinued

In connection with the sale of certain assets and businesses, we have retained responsibility, through indemnification of the purchasers, for environmental and other liabilities existing at the time the sale was consummated, as described below.

Agrico

In connection with the 1987 sale of the assets of Agrico Chemical Company, we agreed to indemnify the purchaser for environmental cleanup costs resulting from certain conditions at specified locations to the extent such costs exceed a specified amount. At September 30, 2008, we have accrued liabilities of $9 million for such excess costs.

Other

At September 30, 2008, we have accrued environmental liabilities of $15 million related primarily to our:

- Potential indemnification obligations to purchasers of our former retail petroleum and refining operations;
- Former propane marketing operations, bio-energy facilities, petroleum products and natural gas pipelines;
- Discontinued petroleum refining facilities; and
- Former exploration and production and mining operations.

Certain of our subsidiaries have been identified as potentially responsible parties at various Superfund and state waste disposal sites. In addition, these subsidiaries have incurred, or are alleged to have incurred, various other hazardous materials removal or remediation obligations under environmental laws.

Table of Contents

Notes (Continued)

Summary of environmental matters

Actual costs incurred for these matters could be substantially greater than amounts accrued depending on the actual number of contaminated sites identified, the actual amount and extent of contamination discovered, the final cleanup standards mandated by the EPA and other governmental authorities and other factors, but the amount cannot be reasonably estimated at this time.

Other Legal Matters

Will Price (formerly Quinque)

In 2001, fourteen of our entities were named as defendants in a nationwide class action lawsuit in Kansas state court that had been pending against other defendants, generally pipeline and gathering companies, since 2000. The plaintiffs alleged that the defendants have engaged in mismeasurement techniques that distort the heating content of natural gas, resulting in an alleged underpayment of royalties to the class of producer plaintiffs and sought an unspecified amount of damages. The fourth amended petition, which was filed in 2003, deleted all of our defendant entities except two Midstream subsidiaries. All remaining defendants have opposed class certification and a hearing on plaintiffs' second motion to certify the class was held in April 2005. We are awaiting a decision from the court. The amount of any possible liability cannot be reasonably estimated at this time.

Grynberg

In 1998, the U.S. Department of Justice (DOJ) informed us that Jack Grynberg, an individual, had filed claims on behalf of himself and the federal government, in the United States District Court for the District of Colorado under the False Claims Act against us and certain of our wholly owned subsidiaries. The claims sought an unspecified amount of royalties allegedly not paid to the federal government, treble damages, a civil penalty, attorneys' fees, and costs. In connection with our sales of Kern River Gas Transmission in 2002 and Texas Gas Transmission Corporation in 2003, we agreed to indemnify the purchasers for any liability relating to this claim, including legal fees. The maximum amount of future payments that we could potentially be required to pay under these indemnifications depends upon the ultimate resolution of the claim and cannot currently be determined. Grynberg had also filed claims against approximately 300 other energy companies alleging that the defendants violated the False Claims Act in connection with the measurement, royalty valuation and purchase of hydrocarbons. In 1999, the DOJ announced that it would not intervene in any of the Grynberg cases. Also in 1999, the Panel on Multi-District Litigation transferred all of these cases, including those filed against us, to the federal court in Wyoming for pre-trial purposes. Grynberg's measurement claims remained pending against us and the other defendants; the court previously dismissed Grynberg's royalty valuation claims. In 2005, the court-appointed special master entered a report which recommended that the claims against our Gas Pipeline and Midstream subsidiaries be dismissed but upheld the claims against our Exploration & Production subsidiaries against our jurisdictional challenge. In October 2006, the District Court dismissed all claims against us and our wholly owned subsidiaries. In November 2006, Grynberg filed his notice of appeal with the Tenth Circuit Court of Appeals and the court held oral argument on September 25, 2008.

In August 2002, Jack J. Grynberg, and Celeste C. Grynberg, Trustee on Behalf of the Rachel Susan Grynberg Trust, and the Stephen Mark Grynberg Trust, served us and one of our Exploration & Production subsidiaries with a complaint in state court in Denver, Colorado. The complaint alleges that we have used mismeasurement techniques that distort the British Thermal Unit heating content of natural gas, resulting in the alleged underpayment of royalties to Grynberg and other independent natural gas producers. The complaint also alleges that we inappropriately took deductions from the gross value of their natural gas and made other royalty valuation errors. Under various theories of relief, the plaintiff was seeking actual damages between $2 million and $20 million based on interest rate variations and punitive damages in the amount of approximately $1 million. In 2004, Grynberg filed an amended complaint against one of our Exploration & Production subsidiaries. In 2005, the parties agreed to dismiss mismeasurement claims. In September 2008, the court ruled in our favor on motions for summary judgment dismissing various claims. Trial on the remaining breach of contract and accounting claims has been set for November 2008. The amount of any possible liability cannot be reasonably estimated at this time.

Table of Contents

Notes (Continued)

Securities class actions

Numerous shareholder class action suits were filed against us in 2002 in the United States District Court for the Northern District of Oklahoma. The majority of the suits alleged that we and co-defendants, WilTel, previously an owned subsidiary known as Williams Communications, and certain corporate officers, acted jointly and separately to inflate the stock price of both companies. WilTel was dismissed as a defendant as a result of its bankruptcy. These cases were consolidated and an order was issued requiring separate amended consolidated complaints by our equity holders and WilTel equity holders. The underwriter defendants have requested indemnification and defense from these cases. If we grant the requested indemnifications to the underwriters, any related settlement costs will not be covered by our insurance policies. We covered the cost of defending the underwriters. In 2002, the amended complaints of the WilTel securities holders and of our securities holders added numerous claims. On February 9, 2007, the court gave its final approval to our settlement with our securities holders. We entered into indemnity agreements with certain of our insurers to ensure their timely payment related to this settlement. The carrying value of our estimated liability related to these agreements is immaterial because we believe the likelihood of any future performance is remote.

On July 6, 2007, the court granted various defendants' motions for summary judgment and entered judgment for us and the other defendants in the WilTel matter. The plaintiffs appealed the court's judgment. Any obligation of ours to the WilTel equity holders as a result of a settlement, or as a result of trial in the event of a successful appeal of the court's judgment, will not likely be covered by insurance because our insurance coverage has been fully utilized by the settlement described above. The extent of any such obligation is presently unknown and cannot be estimated, but it is reasonably possible that our exposure could materially exceed amounts accrued for this matter.

TAPS Quality Bank

One of our subsidiaries, Williams Alaska Petroleum, Inc. (WAPI), has been engaged in administrative litigation being conducted jointly by the FERC and the Regulatory Commission of Alaska (RCA) concerning the Trans-Alaska Pipeline System (TAPS) Quality Bank. In 2004, the FERC and RCA presiding administrative law judges rendered their joint and individual initial decisions, and we accrued approximately $134 million based on our computation and assessment of ultimate ruling terms that were considered probable. Our additional potential refund liability terminated on March 31, 2004, when WAPI sold the Alaska refinery and ceased shipping on the TAPS pipeline. We subsequently accrued additional amounts for interest.

In 2006, the FERC entered its final order, which the RCA adopted. On February 15, 2008, the Alaska Supreme Court upheld the RCA's order and on March 16, 2008, the D.C. Circuit Court of Appeals upheld the FERC's order. We have paid substantially all amounts invoiced by the Quality Bank Administrator and third parties, except certain disputed amounts which remain accrued.

We believe that the likelihood of successful appeal by the counterparties is remote, considering the relevant facts and circumstances related to this matter, including the favorable 2008 D.C. Circuit Court of Appeals rulings, and our assessment of the counterparties' limited remaining options. As a result, during the first quarter of 2008 we reduced remaining amounts accrued in excess of our estimated remaining obligation by $54 million.

On August 18, 2008, a counterparty requested a writ of certiorari from the U.S. Supreme Court to appeal the ruling of the D.C. Circuit Court of Appeals.

Redondo Beach taxes

In 2005, we and AES Redondo Beach, L.L.C. received a tax assessment letter from the city of Redondo Beach, California, in which the city asserted that taxes, interest and penalties were owed related to natural gas used at the generating facility operated by AES Redondo Beach. In connection with the sale of our power business (see Note 2), we and AES Redondo Beach agreed to equally share, for periods prior to the closing of the sale, any ultimate tax liability as well as the funding of amounts previously paid to the city under protest. In July, 2008, we settled all disputes with the city and they subsequently refunded all tax payments made under protest plus half of the earned interest on those amounts. We shared this refund with AES Redondo Beach.

Gulf Liquids litigation

Gulf Liquids contracted with Gulsby Engineering Inc. (Gulsby) and Gulsby-Bay for the construction of certain gas processing plants in Louisiana. National American Insurance Company (NAICO) and American Home Assurance Company provided payment and performance bonds for the projects. In 2001, the contractors and sureties filed multiple cases in Louisiana and Texas against Gulf Liquids and us.

Table of Contents

Notes (Continued)

In 2006, at the conclusion of the consolidated trial of the asserted contract and tort claims, the jury returned its actual and punitive damages verdict against us and Gulf Liquids. Based on our interpretation of the jury verdicts, we estimated exposure for actual damages of approximately $68 million plus potential interest of approximately $25 million, all of which have been accrued as of September 30, 2008. In addition, we concluded that it was reasonably possible that any ultimate judgment might have included additional amounts of approximately $199 million in excess of our accrual, which primarily represented our estimate of potential punitive damage exposure under Texas law.

From May through October 2007, the court entered seven post-trial orders in the case (interlocutory orders) which, among other things, overruled the verdict award of tort and punitive damages as well as any damages against us. The court also denied the plaintiffs' claims for attorneys' fees. On January 28, 2008, the court issued its judgment awarding damages against Gulf Liquids of approximately $11 million in favor of Gulsby and approximately $4 million in favor of Gulsby-Bay. Gulf Liquids, Gulsby, Gulsby-Bay, and NAICO are appealing the judgment. If the judgment is upheld on appeal, our liability will be substantially less than the amount of our accrual for these matters.

Wyoming severance taxes

In August 2006, the Wyoming Department of Audit (DOA) assessed our subsidiary, Williams Production RMT Company, for additional severance tax and interest for the production years 2000 through 2002. In addition, the DOA notified us of an increase in the taxable value of our interests for ad valorem tax purposes. We disputed the DOA's interpretation of the statutory obligation and appealed this assessment to the Wyoming State Board of Equalization (SBOE). The SBOE upheld the assessment and remanded it to the DOA to address the disallowance of a credit. The SBOE did not award interest on the assessment. We estimate that the amount of the additional severance and ad valorem taxes to be approximately $4 million. We appealed the SBOE decision to the Wyoming Supreme Court, which heard oral argument on August 12, 2008. If the DOA prevails in its interpretation of our obligation and applies the same basis of assessment to subsequent periods, it is reasonably possible that we could owe a total of approximately $23 million to $25 million in additional taxes and interest from January 1, 2003 through September 30, 2008.

Royalty litigation

In September 2006, royalty interest owners in Garfield County, Colorado, filed a class action suit in Colorado state court alleging that we improperly calculated oil and gas royalty payments, failed to account for the proceeds that we received from the sale of gas and extracted products, improperly charged certain expenses, and failed to refund amounts withheld in excess of ad valorem tax obligations. The plaintiffs claim that the class might be in excess of 500 individuals and seek an accounting and damages. The parties have reached a partial settlement agreement for an amount that was previously accrued. The partial settlement has received preliminary approval by the court, and we anticipate trial in late 2009 on remaining issues related to royalty payment calculation and obligations under specific lease provisions. We are not able to estimate the amount of any additional exposure at this time.

Certain other royalty matters are currently being litigated by other producers with a federal regulatory agency in Colorado and with a state agency in New Mexico. Although we are not a party to these matters, the final outcome of those cases might lead to a future unfavorable impact on our results of operations.

Other Divestiture Indemnifications

Pursuant to various purchase and sale agreements relating to divested businesses and assets, we have indemnified certain purchasers against liabilities that they may incur with respect to the businesses and assets acquired from us. The indemnities provided to the purchasers are customary in sale transactions and are contingent upon the purchasers incurring liabilities that are not otherwise recoverable from third parties. The indemnities generally relate to breach of warranties, tax, historic litigation, personal injury, environmental matters, right of way and other representations that we have provided.

We sold a natural gas liquids pipeline system in 2002, and in 2006, the purchaser of that system filed its complaint against us and our subsidiaries in state court in Houston, Texas. The purchaser alleged that we breached certain warranties under the purchase and sale agreement and sought approximately $18 million in damages and our specific performance under certain guarantees. The dispute was settled in June 2008 and all court cases have been dismissed.

Table of Contents

Notes (Continued)

At September 30, 2008, we do not expect any of the indemnities provided pursuant to the sales agreements to have a material impact on our future financial position. However, if a claim for indemnity is brought against us in the future, it may have a material adverse effect on our results of operations in the period in which the claim is made.

In addition to the foregoing, various other proceedings are pending against us which are incidental to our operations.

Summary

Litigation, arbitration, regulatory matters, and environmental matters are subject to inherent uncertainties. Were an unfavorable ruling to occur, there exists the possibility of a material adverse impact on the results of operations in the period in which the ruling occurs. Management, including internal counsel, currently believes that the ultimate resolution of the foregoing matters, taken as a whole and after consideration of amounts accrued, insurance coverage, recovery from customers or other indemnification arrangements, will not have a material adverse effect upon our future financial position.

Guarantees

In connection with agreements executed to resolve take-or-pay and other contract claims and to amend gas purchase contracts, Transco entered into certain settlements with producers that may require the indemnification of certain claims for additional royalties that the producers may be required to pay as a result of such settlements. Transco, through its agent, Gas Marketing Services, continues to purchase gas under contracts which extend, in some cases, through the life of the associated gas reserves. Certain of these contracts contain royalty indemnification provisions that have no carrying value. Producers have received certain demands and may receive other demands, which could result in claims pursuant to royalty indemnification provisions. Indemnification for royalties will depend on, among other things, the specific lease provisions between the producer and the lessor and the terms of the agreement between the producer and Transco. Consequently, the potential maximum future payments under such indemnification provisions cannot be determined. However, management believes that the probability of material payments is remote.

In connection with the 1993 public offering of units in the Williams Coal Seam Gas Royalty Trust (Royalty Trust), our Exploration & Production segment entered into a gas purchase contract for the purchase of natural gas in which the Royalty Trust holds a net profits interest. Under this agreement, we guarantee a minimum purchase price that the Royalty Trust will realize in the calculation of its net profits interest. We have an annual option to discontinue this minimum purchase price guarantee and pay solely based on an index price. The maximum potential future exposure associated with this guarantee is not determinable because it is dependent upon natural gas prices and production volumes. No amounts have been accrued for this contingent obligation as the index price continues to substantially exceed the minimum purchase price.

We are required by certain lenders to ensure that the interest rates received by them under various loan agreements are not reduced by taxes by providing for the reimbursement of any taxes required to be paid by the lender. The maximum potential amount of future payments under these indemnifications is based on the related borrowings. These indemnifications generally continue indefinitely unless limited by the underlying tax regulations and have no carrying value. We have never been called upon to perform under these indemnifications.

We have provided guarantees in the event of nonpayment by our previously owned communications subsidiary, WilTel, on certain lease performance obligations that extend through 2042. The maximum potential exposure is $42 million at September 30, 2008. Our exposure declines systematically throughout the remaining term of WilTel’s obligations. The carrying value of these guarantees is $38 million at September 30, 2008.

Former managing directors of Gulf Liquids are involved in litigation related to the construction of gas processing plants. Gulf Liquids has indemnity obligations to the former managing directors for legal fees and potential losses that may result from this litigation. Claims against these former managing directors have been settled and dismissed after payments on their behalf by directors and officers insurers. Some unresolved issues remain between us and these insurers, but no amounts have been accrued for any potential liability.

Table of Contents

Notes (Continued)

We have guaranteed the performance of a former subsidiary of our wholly owned subsidiary MAPCO Inc., under a coal supply contract. This guarantee was granted by MAPCO Inc. upon the sale of its former subsidiary to a third party in 1996. The guaranteed contract provides for an annual supply of a minimum of 2.25 million tons of coal. Our potential exposure is dependent on the difference between current market prices of coal and the pricing terms of the contract, both of which are variable, and the remaining term of the contract. Given the variability of the terms, the maximum future potential payments cannot be determined. We believe that our likelihood of performance under this guarantee is remote. In the event we are required to perform, we are fully indemnified by the purchaser of MAPCO Inc.'s former subsidiary. This guarantee expires in December 2010 and has no carrying value.

We have guaranteed commercial letters of credit totaling $20 million on behalf of ACCROVEN, an equity method investee. These expire in January 2009 and have no carrying value.

We have provided guarantees on behalf of certain entities in which we have an equity ownership interest. These generally guarantee operating performance measures and the maximum potential future exposure cannot be determined. There are no expiration dates associated with these guarantees. No amounts have been accrued at September 30, 2008.

Note 13. Comprehensive Income

Comprehensive income is as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
	(Millions)		(Millions)	
Net income	$ 366	$ 198	$ 1,303	$ 765
Other comprehensive income (loss):				
Net unrealized gains on derivative instruments	1,083	131	256	252
Net reclassification into earnings of derivative instrument (gains) losses	62	(32)	142	(476)
Foreign currency translation adjustments	(10)	25	(27)	56
Amortization of pension benefits net actuarial loss	3	5	10	14
Amortization of other postretirement benefits prior service cost	—	—	1	1
Other comprehensive income (loss) before taxes	1,138	129	382	(153)
Income tax benefit (provision) on other comprehensive income (loss)	(434)	(40)	(154)	80
Other comprehensive income (loss) before minority interest	704	89	228	(73)
Allocation of other comprehensive income (loss) to minority interest	(12)	—	(5)	—
Other comprehensive income (loss)	692	89	223	(73)
Comprehensive income	$ 1,058	$ 287	$ 1,526	$ 692

Net unrealized gains on derivative instruments represents changes in the fair value of certain derivative contracts that have been designated as cash flow hedges. The *net unrealized gains on derivative instruments* are as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
	(Millions)		(Millions)	
Net unrealized gains (losses) on:				
Forward natural gas purchases and sales	$ 1,034	$ 132	$ 274	$ 284
Forward natural gas liquids sales	50	(1)	(18)	(1)
Forward power purchases and sales	—	—	—	(31)
Other derivative instruments	(1)	—	—	—
	$ 1,083	$ 131	$ 256	$ 252

Net reclassification into earnings of derivative instrument (gains) losses for the nine months ended September 30, 2007, includes a gain of $429 million. This reclassification was based on the determination that the forecasted transactions related to the derivative cash flow hedges being sold as part of the sale of our power business were probable of not occurring.

Table of Contents

Notes (Continued)

Note 14. Segment Disclosures

Our reportable segments are strategic business units that offer different products and services. The segments are managed separately because each segment requires different technology, marketing strategies and industry knowledge. Our master limited partnerships, Williams Partners L.P. and Williams Pipeline Partners L.P., are consolidated within our Midstream and Gas Pipeline segments, respectively. (See Note 2.) Other primarily consists of corporate operations.

Performance Measurement

We currently evaluate performance based upon *segment profit (loss)* from operations, which includes *segment revenues* from external and internal customers, *segment costs and expenses*, *equity earnings (losses)* and *income (loss) from investments*, including impairments related to investments accounted for under the equity method. Intersegment sales are generally accounted for at current market prices as if the sales were to unaffiliated third parties.

External revenues of our Exploration & Production segment include third-party oil and gas sales, which are more than offset by transportation expenses and royalties due third parties on intersegment sales.

The following tables reflect the reconciliation of *segment revenues* and *segment profit (loss)* to *revenues* and *operating income (loss)* as reported in the Consolidated Statement of Income.

	Exploration & Production	Gas Pipeline	Midstream Gas & Liquids	Gas Marketing Services	Other	Eliminations	Total
				(Millions)			
Three months ended September 30, 2008							
Segment revenues:

The following table reflects *total assets* by reporting segment.

	Total Assets	
	September 30, 2008	December 31, 2007
	(Millions)	
Exploration & Production (1)	$ 10,362	$ 8,692
Gas Pipeline	9,078	8,624
Midstream Gas & Liquids	7,371	6,604
Gas Marketing Services	4,460	4,437
Other	3,524	3,592
Eliminations	(7,918)	(7,073)
	26,877	24,876
Assets of discontinued operations	16	185
Total	$ 26,893	$ 25,061

(1) The increase in Exploration & Production's total assets is due primarily to an increase in derivative assets and an increase in property, plant and equipment — net. The derivative asset increase is primarily due to the impact of changes in commodity prices on existing forward derivative contracts. Exploration & Production's derivative assets are significantly offset by their derivative liabilities. The property, plant and equipment — net increase is primarily due to increased drilling activity.

Note 15. Recent Accounting Standards

Recent Accounting Standards

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS 157). This Statement establishes a framework for fair value measurements in the financial statements by providing a definition of fair value, provides guidance on the methods used to estimate fair value and expands disclosures about fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued FASB Staff Position (FSP) No. FAS 157-2, permitting entities to delay application of SFAS 157 to fiscal years beginning after November 15, 2008, for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). On January 1, 2008, we applied SFAS 157 to our assets and liabilities that are measured at fair value on a recurring basis, primarily our energy derivatives. See Note 10 for discussion of the adoption. Beginning January 1, 2009, we will apply SFAS 157 fair value requirements to nonfinancial assets and nonfinancial liabilities that are not recognized or disclosed on a recurring basis. Application will be prospective when nonrecurring fair value measurements are required. We will assess the impact on our Consolidated Financial Statements of applying these requirements to nonrecurring fair value measurements for nonfinancial assets and nonfinancial liabilities.

Table of Contents

Notes (Continued)

In December 2007, the FASB issued SFAS No. 141(R) "Business Combinations" (SFAS 141(R)). SFAS 141(R) applies to all business combinations and establishes guidance for recognizing and measuring identifiable assets acquired, liabilities assumed, noncontrolling interests in the acquiree and goodwill. Most of these items are recognized at their full fair value on the acquisition date, including acquisitions where the acquirer obtains control but less than 100 percent ownership in the acquiree. SFAS 141(R) also requires expensing of restructuring and acquisition-related costs as incurred and establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS 141(R) is effective for business combinations with an acquisition date in fiscal years beginning after December 15, 2008. We are currently evaluating the changes provided in this Statement.

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements — an amendment of Accounting Research Bulletin No. 51" (SFAS 160). SFAS 160 establishes accounting and reporting standards for noncontrolling ownership interests in subsidiaries (previously referred to as minority interests). Noncontrolling ownership interests in consolidated subsidiaries will be presented in the consolidated balance sheet within stockholders' equity as a separate component from the parent's equity. Consolidated net income will now include earnings attributable to both the parent and the noncontrolling interests. Earnings per share will continue to be based on earnings attributable to only the parent company and does not change upon adoption of SFAS 160. SFAS 160 provides guidance on accounting for changes in the parent's ownership interest in a subsidiary, including transactions where control is retained and where control is relinquished. SFAS 160 also requires additional disclosure of information related to amounts attributable to the parent for income from continuing operations, discontinued operations and extraordinary items and reconciliations of the parent and noncontrolling interests' equity of a subsidiary. SFAS 160 is effective for fiscal years beginning after December 15, 2008, and early adoption is prohibited. The Statement will be applied prospectively to transactions involving noncontrolling interests, including noncontrolling interests that arose prior to the effective date, as of the beginning of the fiscal year it is initially adopted. However, the presentation of noncontrolling interests within stockholders' equity and the inclusion of earnings attributable to the noncontrolling interests in consolidated net income requires retrospective application to all periods presented. We will assess the impact on our Consolidated Financial Statements.

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities — an amendment of FASB Statement No. 133" (SFAS 161). SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," currently establishes the disclosure requirements for derivative instruments and hedging activities. SFAS 161 amends and expands the disclosure requirements of Statement 133 with enhanced quantitative, qualitative and credit risk disclosures. The Statement requires quantitative disclosure in a tabular format about the fair values of derivative instruments, gains and losses on derivative instruments and information about where these items are reported in the financial statements. Also required in the tabular presentation is a separation of hedging and nonhedging activities. Qualitative disclosures include outlining objectives and strategies for using derivative instruments in terms of underlying risk exposures, use of derivatives for risk management and other purposes and accounting designation, and an understanding of the volume and purpose of derivative activity. Credit risk disclosures provide information about credit risk related contingent features included in derivative agreements. SFAS 161 also amends SFAS No. 107, "Disclosures about Fair Value of Financial Instruments," to clarify that disclosures about concentrations of credit risk should include derivative instruments. This Statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. We plan to apply this Statement beginning in 2009. This Statement encourages, but does not require, comparative disclosures for earlier periods at initial adoption. The application of this Statement will increase the disclosures in our Consolidated Financial Statements.

In June 2008, the FASB issued FASB Staff Position No. EITF 03-6-1, "Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities" (FSP EITF 03-6-1). FSP EITF 03-6-1 requires that unvested share-based payment awards containing nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) be considered participating securities and included in the computation of earnings per share (EPS) pursuant to the two-class method of FASB Statement No. 128, "Earnings per Share." FSP EITF 03-6-1 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years. All prior-period EPS data presented shall be adjusted retrospectively to conform to this FSP. Early application is not permitted. This FSP is not anticipated to have a material impact on our EPS attributable to the common stockholders.

Item 2

Management's Discussion and Analysis of Financial Condition and Results of Operations

Recent Market Events

The recent instability in financial markets has created global concerns about the liquidity of financial institutions and is having overarching impacts on the economy as a whole. In this volatile economic environment, many financial markets, institutions and other businesses remain under considerable stress. In addition, oil and gas prices have recently experienced significant declines. These events are impacting our business. However, we note the following:

- We are reducing our levels of expected capital expenditures.
- As of September 30, 2008, we have approximately $1.5 billion of cash and cash equivalents and nearly $2.6 billion of available capacity under our credit facilities. (See further discussion in Management's Discussion and Analysis of Financial Condition — Available Liquidity.)
- We have no significant debt maturities until 2011.
- Considering master netting agreements and collateral support, we do not have significant risk from our net credit exposure to derivative counterparties. (See further discussion in Energy Trading Activities — Counterparty Credit Considerations.)

To the extent that these recent events drive sustained lower energy commodity prices, it will negatively impact our future results of operations and cash flow from operations and could result in a further reduction in capital expenditures. These impacts could also include the future nonperformance of counterparties or impairments of goodwill and long-lived assets. In addition, the overall decline in equity markets in 2008 has negatively impacted our employee benefit plan assets and will likely increase expense in future periods. (See Note 7 of Notes to Consolidated Financial Statements.)

Company Outlook

Our plan for 2008 has been focused on disciplined growth. Our plans for the remainder of 2008 and into 2009 have been adjusted in light of lower energy commodity prices and the disruption in the financial markets. At present, we intend to continue our disciplined growth, but the level of our future investment will be adjusted as required to maintain adequate liquidity. Our objectives include continuing to improve EVA® and invest in our businesses in a way that meets customer needs and enhances our competitive position:

- Continue to increase natural gas production and reserves;
- Increase the scale of our gathering and processing business in key growth basins;
- Continue to invest in expansion projects on our interstate natural gas pipelines.

Potential risks and/or obstacles that could prevent us from achieving these objectives include:

- Availability of capital;
- Counterparty credit and performance risk;
- Volatility of commodity prices;
- Lower than expected levels of cash flow from operations;
- Decreased drilling success at Exploration & Production;
- Decreased drilling success or abandonment of projects by third parties served by Midstream and Gas Pipeline;

Table of Contents

Management's Discussion and Analysis (Continued)

- General economic, financial markets, or industry downturn;
- Changes in the current political and regulatory environment;
- Exposure associated with our efforts to resolve regulatory and litigation issues (see Note 12 of Notes to Consolidated Financial Statements).

We continue to address these risks through utilization of commodity hedging strategies, focused efforts to resolve regulatory issues and litigation claims, disciplined investment strategies, and maintaining at least $1 billion in liquidity from cash and cash equivalents and unused revolving credit facilities. In addition, we utilize master netting agreements and collateral requirements with our counterparties.

Our *income from continuing operations* for the nine months ended September 30, 2008, increased $563 million compared to the nine months ended September 30, 2007. This increase is reflective of:

- Higher net realized average prices and continued strong natural gas production growth at Exploration & Production;
- A pre-tax gain of $148 million at Exploration & Production on the sale of a contractual right to a production payment on certain future international hydrocarbon production;
- Favorable commodity price margins at Midstream.

See additional discussion in Results of Operations.

Our *net cash provided by operating activities* for the nine months ended September 30, 2008, increased $929 million compared to the nine months ended September 30, 2007, primarily due to our improved operating results. See additional discussion in Management's Discussion and Analysis of Financial Condition.

Recent Events

In September 2008, Hurricanes Gustav and Ike impacted our operations, primarily at Midstream. We estimate that our segment profit for third-quarter 2008 was decreased by approximately $50 million to $65 million due to downtime and charges for repairs and property insurance deductibles associated with Hurricanes Gustav and Ike. We also estimate that fourth-quarter 2008 pre-tax results will be reduced by approximately $10 million to $20 million due to downtime and reduced volumes. See additional discussion in Results of Operations — Segments, Gas Pipeline and Midstream Gas & Liquids.

In July 2008, we completed our stock repurchase program by reaching the $1 billion limit authorized by our Board of Directors. (See Note 11 of Notes to Consolidated Financial Statements.)

In 2008, we increased our positions by acquiring undeveloped leasehold acreage, producing properties and gathering facilities in the Piceance basin and undeveloped leasehold acreage and producing properties in the Fort Worth basin. See additional discussion in Results of Operations — Segments, Exploration & Production.

In 2008, we recognized pre-tax income of $172 million in *income from discontinued operations* related to our former Alaska operations. (See Note 3 of Notes to Consolidated Financial Statements.)

In 2008, we recognized income of $148 million related to the sale of a contractual right to a production payment on certain future international hydrocarbon production. See additional discussion in Results of Operations — Segments, Exploration & Production.

In January 2008, Williams Pipeline Partners L.P. completed its initial public offering. See additional discussion in Results of Operations — Segments, Gas Pipeline.

Transco's new rates became effective June 1, 2008. See additional discussion in Results of Operations — Segments, Gas Pipeline.

General

Unless indicated otherwise, the following discussion and analysis of Results of Operations and Financial Condition relates to our current continuing operations and should be read in conjunction with the Consolidated Financial Statements and notes thereto included in Item 1 of this document and our 2007 Annual Report on Form 10-K.

Table of Contents

Fair Value Measurements

On January 1, 2008, we adopted Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" (SFAS 157), for our assets and liabilities that are measured at fair value on a recurring basis, primarily our energy derivatives. See Note 10 of Notes to Consolidated Financial Statements for disclosures regarding SFAS 157, including discussion of the fair value hierarchy levels and valuation methodologies.

Certain of our energy derivative assets and liabilities and other assets are valued using unobservable inputs and included in Level 3. At September 30, 2008, 13 percent of the total assets measured at fair value and four percent of the total liabilities measured at fair value are included in Level 3.

Certain instruments trade in markets with lower availability of pricing information requiring us to use unobservable inputs and are considered Level 3 in the fair value hierarchy. For Level 2 transactions, we do not make significant adjustments to observable prices in measuring fair value as we do not generally trade in inactive markets.

The determination of fair value also incorporates the time value of money and credit risk factors including the credit standing of the counterparties involved, master netting arrangements, the impact of credit enhancements (such as cash deposits and letters of credit) and our nonperformance risk on our liabilities. Considering these factors and that we do not have significant risk from our net credit exposure to derivative counterparties, the impact of credit risk is not significant to the overall fair value of our derivatives portfolio.

The instruments included in Level 3 at September 30, 2008, predominantly consist of options that primarily hedge future sales of production from our Exploration & Production segment, are structured as costless collars and are financially settled. The options are valued using an industry standard Black-Scholes option pricing model. Certain inputs into the model are generally observable, such as commodity prices and interest rates, whereas a significant input, implied volatility by location, is unobservable. The impact of volatility on changes in the overall fair value of the options structured as collars is reduced because of the offsetting nature of the put and call positions. The change in the overall fair value of instruments included in Level 3 primarily results from changes in commodity prices. The hedges are accounted for as cash flow hedges where net unrealized gains and losses from changes in fair value are recorded, to the extent effective, in *other comprehensive income* and subsequently impact earnings when the underlying hedged production is sold.

Exploration & Production has an unsecured credit agreement through December 2013 with certain banks which serves to reduce our usage of cash and other credit facilities for margin requirements related to options included in the facility.

Management's Discussion and Analysis (Continued)

Results of Operations

Consolidated Overview

The following table and discussion is a summary of our consolidated results of operations for the three and nine months ended September 30, 2008, compared to the three and nine months ended September 30, 2007. The results of operations by segment are discussed in further detail following this consolidated overview discussion.

	Three months ended September 30,				Nine months ended September 30,			
	2008	2007	$ Change from 2007*	% Change from 2007*	2008	2007	$ Change from 2007*	% Change from 2007*

*+ = Favorable change to *net income*; – = Unfavorable change to *net income*; NM = A percentage calculation is not meaningful due to change in signs, a zero-value denominator, or a percentage change greater than 200.

Three months ended September 30, 2008 vs. three months ended September 30, 2007

The increase in *revenues* is primarily due to higher production revenues at Exploration & Production resulting from both higher net realized average prices and increased production volumes sold. Midstream also experienced higher natural gas liquid (NGL) and olefin production revenues due primarily to higher prices, partially offset by lower volumes.

The increase in *costs and operating expenses* is primarily due to higher costs associated with our NGL and olefin production businesses at Midstream. Higher depreciation, depletion and amortization and higher operating taxes at Exploration & Production also contributed to our increased expenses.

The increase in *selling, general and administrative expenses (SG&A)* primarily includes the impact of higher staffing and compensation at Exploration & Production in support of increased operational activities.

Other income — net within *operating income* in third-quarter 2008 includes a gain of $10 million on the sale of certain south Texas assets at Gas Pipeline and $8 million of net gains on foreign currency exchanges at Midstream. These gains are partially offset by a $14 million impairment of certain natural gas producing properties at Exploration & Production.

Other income — net within *operating income* in third-quarter 2007 includes income of $12 million associated with a payment received for a terminated firm transportation agreement on Gas Pipeline's Grays Harbor lateral, partially offset by $6 million of net losses on foreign currency exchanges at Midstream.

The increase in *operating income* primarily reflects both higher net realized average prices and continued strong natural gas production growth at Exploration & Production.

Table of Contents

Management's Discussion and Analysis (Continued)

Interest accrued — net decreased primarily due to increased capitalized interest resulting from an increased level of capital expenditures. Additionally, the decrease was impacted by lower interest rates on debt issuances that occurred late in the fourth quarter 2007 and in the first half of 2008 for which the proceeds were primarily used to retire existing debt bearing higher interest rates.

The decrease in *investing income* is due primarily to a $17 million decrease in interest income largely a result of lower average interest rates in 2008 compared to 2007.

Minority interest in income of consolidated subsidiaries increased primarily due to the growth in the minority interest holdings of Williams Partners L.P. and Williams Pipeline Partners L.P.

Provision for income taxes increased primarily due to higher pre-tax income. See Note 5 of Notes to Consolidated Financial Statements for a discussion of the effective tax rates compared to the federal statutory rate for both periods.

See Note 3 of Notes to Consolidated Financial Statements for a discussion of the items in *income (loss) from discontinued operations.*

Nine months ended September 30, 2008 vs. nine months ended September 30, 2007

The increase in *revenues* is primarily due to higher production revenues at Exploration & Production resulting from both higher net realized average prices and increased production volumes sold. Midstream also experienced higher olefin production revenues primarily due to higher prices and volumes as well as increased NGL, olefin and crude marketing and NGL production revenues all due to higher prices, partially offset by lower volumes. In addition, *revenues* increased due to the favorable change in unrealized mark-to-market revenues at Gas Marketing Services primarily as a result of reduced losses in 2008 from legacy derivative contracts that are no longer outstanding.

The increase in *costs and operating expenses* is primarily due to increased NGL, olefin, and crude marketing purchases and increased costs associated with our olefin and NGL production businesses at Midstream. Higher depreciation, depletion and amortization, increased operating taxes and higher lease operating expenses at Exploration & Production also contributed to our increased expenses.

The increase in *SG&A* includes the impact of higher staffing and compensation at our Exploration & Production and Midstream segments in support of increased operational activities. The increase also includes $11 million in bad debt expense primarily at Exploration & Production.

Other income — net within *operating income* in 2008 includes a gain of $148 million on the sale of a contractual right to a production payment on certain future international hydrocarbon production at Exploration & Production, $20 million of net gains on foreign currency exchanges at Midstream, and a gain of $10 million on the sale of certain south Texas assets at Gas Pipeline. These items are partially offset by $21 million higher project development costs at Gas Pipeline and a $14 million impairment of certain natural gas producing properties at Exploration & Production.

Other income — net within *operating income* in 2007 includes income of $18 million associated with payments received for a terminated firm transportation agreement on Gas Pipeline's Grays Harbor lateral and income of $17 million from a change in estimate related to a regulatory liability at Northwest Pipeline.

The increase in *operating income* reflects increased net realized average prices, continued strong natural gas production growth and a gain of $148 million on the sale of a contractual right to a production payment at Exploration & Production, partially offset by higher operating costs. The increase also reflects reduced losses in 2008 from legacy derivative contracts that are no longer outstanding at Gas Marketing Services and continued favorable commodity price margins at Midstream, partially offset by higher operating costs.

Interest accrued — net decreased primarily due to increased capitalized interest resulting from an increased level of capital expenditures. Additionally, the decrease was impacted by lower interest rates on debt issuances that occurred late in the fourth quarter 2007 and in the first half of 2008 for which the proceeds were primarily used to retire existing debt bearing higher interest rates. While our overall debt balances have been relatively comparable, the net effect of these retirements and issuances has resulted in lower rates.

Table of Contents

Management's Discussion and Analysis (Continued)

The decrease in investing income is primarily due to $47 million of decreased interest income largely due to lower average interest rates in 2008 compared to 2007, partially offset by an increase in equity earnings of $31 million, primarily at Midstream.

Minority interest in income of consolidated subsidiaries increased primarily due to the growth in the minority interest holdings of Williams Partners L.P. and Williams Pipeline Partners L.P.

Provision for income taxes increased primarily due to higher pre-tax income. See Note 5 of Notes to Consolidated Financial Statements for a discussion of the effective tax rates compared to the federal statutory rate for both periods.

See Note 3 of Notes to Consolidated Financial Statements for a discussion of the items in *income (loss) from discontinued operations.*

Management's Discussion and Analysis (Continued)

Results of Operations — Segments

Exploration & Production

Overview of Nine Months Ended September 30, 2008

During the first nine months of 2008, we continued our development drilling program in our growth basins. Accordingly, we:

- Benefited from increased domestic net realized average prices, which increased by approximately 42 percent compared to the first nine months of 2007. The domestic net realized average price for the first nine months of 2008 was $7.22 per thousand cubic feet of gas equivalent (Mcfe) compared to $5.09 per Mcfe in 2007. Net realized average prices include market prices, net of fuel and shrink and hedge positions, less gathering and transportation expenses.

- Increased average daily domestic production levels by approximately 21 percent compared to the first nine months of 2007. The average daily domestic production for the first nine months of 2008 was approximately 1,073 million cubic feet of gas equivalent (MMcfe) compared to 890 MMcfe in 2007. The increased production is primarily due to increased development within the Piceance, Powder River, and Fort Worth basins.

- Increased capital expenditures for domestic drilling, development, and acquisition activity in the first nine months of 2008 by $699 million compared to 2007. Capital expenditures for 2008 include acquisitions in the Piceance and Fort Worth basins discussed in *Significant events* below.

The benefits of higher net realized average prices and higher production volumes were partially offset by increased operating costs. The increase in operating costs was primarily due to increased production volumes and higher well service and lease service costs. In addition, higher production volumes coupled with higher capitalized drilling costs increased depletion, depreciation, and amortization expense.

Significant events

In January 2008, we sold a contractual right to a production payment on certain future international hydrocarbon production for $148 million. In the first quarter of 2008, we received $118 million in cash, with the remainder placed in escrow subject to certain post-closing conditions and adjustments. We recognized a pre-tax gain of $118 million in the first quarter of 2008 related to the initial cash received. In the second quarter of 2008, the remaining cash was received from escrow and recognized as income. As a result of the contract termination, we have no further interests associated with the crude oil concession, which is located in Peru. We had obtained these interests through our acquisition of Barrett Resources Corporation in 2001.

In May 2008, we acquired certain undeveloped leasehold acreage, producing properties and gathering facilities in the Piceance basin for $285 million. In July 2008, a third party exercised its contractual option to purchase, on the same terms and conditions, an interest in a portion of the acquired assets for $71 million. We received this $71 million in October 2008.

In September 2008, we increased our position in the Fort Worth basin by acquiring certain undeveloped leasehold acreage and producing properties for $147 million subject to post-closing adjustments. This acquisition is consistent with our growth strategy of leveraging our horizontal drilling expertise by acquiring and developing low-risk properties. The change in purchase price from the $166 million announced in July 2008 relates to the ongoing process of finalizing title work on a small portion of the acquisition package.

Outlook for the Remainder of 2008

Our expectations for the remainder of the year include:

- Maintaining our development drilling program in the Piceance, Powder River, San Juan, Fort Worth and Arkoma basins through our remaining planned capital expenditures projected between $450 million and $550 million.

Table of Contents

Management's Discussion and Analysis (Continued)

- Continuing toward our average daily domestic production level goal of 10 to 20 percent growth compared to 2007.

Risks to achieving our expectations include unfavorable natural gas market price movements which are impacted by numerous factors, including weather conditions, domestic natural gas production and consumption, and rising concerns about the recent volatility in the global economy and the related impact on natural gas prices. Also, achievement of expectations can be affected by costs of services associated with drilling.

In addition, changes in laws and regulations may impact our development drilling program. The Colorado Oil & Gas Conservation Commission (COGCC) has proposed rules that could alter our drilling schedule and increase our costs of permitting and environmental compliance. We continue to actively monitor the situation and provide input to the COGCC staff responsible for rulemaking. The final rules could become effective as early as April 2009.

Declining Natural Gas Prices

As a result of the recent market events and the recent decline in natural gas prices, we plan to deploy fewer drilling rigs in 2009 compared to 2008. This will reduce capital expenditures and the number of wells drilled in 2009 compared to 2008. However, we still expect approximately 8 to 10 percent production growth in 2009 compared to 2008. We continue to utilize certain derivative instruments to hedge our cash flows from the sales of natural gas production.

Hedging Strategy

To manage the commodity price risk and volatility of owning producing gas properties, we enter into derivative forward sales contracts that fix the sales price relating to a portion of our future production using NYMEX and basis fixed-price contracts and collar agreements.

For the remainder of 2008 and total year 2009, we have the following agreements and contracts for our daily domestic production, shown at weighted average volumes and basin-level weighted average prices:

	Remainder of 2008		2009	
	Volume (MMcf/d)	Price ($/Mcf) Floor-Ceiling for Collars	Volume (MMcf/d)	Price ($/Mcf) Floor-Ceiling for Collars
Collar agreements — Rockies	160	$6.08 – $9.04	150	$6.11 – $9.04
Collar agreements — San Juan	220	$6.37 – $9.00	245	$6.58 – $9.62
Collar agreements — Mid-Continent	80	$7.02 – $9.77	95	$7.08 – $9.73
NYMEX and basis fixed-price	70	$4.06	106	$3.67

The following is a summary of our agreements and contracts for daily production for the three and nine months ended September 30, 2008 and 2007:

	2008		2007	
	Volume (MMcf/d)	Price ($/Mcf) Floor-Ceiling for Collars	Volume (MMcf/d)	Price ($/Mcf) Floor-Ceiling for Collars
Third Quarter:				
Collar agreements — NYMEX	—	—	15	$6.50 – $8.25
Collar agreements — Rockies	160	$6.08 – $9.04	50	$5.65 – $7.45
Collar agreements — San Juan	220	$6.37 – $9.00	130	$5.98 – $9.63
Collar agreements — Mid-Continent	80	$7.02 – $9.77	78	$6.82 – $10.73
NYMEX and basis fixed-price	70	$3.90	171	$3.75
Year-to-Date:				
Collar agreements — NYMEX	—	—	15	$6.50 – $8.25
Collar agreements — Rockies	173	$6.18 – $9.18	50	$5.65 – $7.45
Collar agreements — San Juan	196	$6.34 – $8.94	130	$5.98 – $9.63
Collar agreements — Mid-Continent	57	$7.03 – $9.71	76	$6.82 – $10.78
NYMEX and basis fixed-price	70	$3.94	172	$3.82

Period-Over-Period Results

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007

	(Millions)		(Millions)	
Segment revenues	$ 883	$ 499	$ 2,607	$ 1,521
Segment profit	$ 361	$ 169	$ 1,287	$ 566

Table of Contents

Management's Discussion and Analysis (Continued)

Three months ended September 30, 2008 vs. three months ended September 30, 2007

Total *segment revenues* increased $384 million, or 77 percent, primarily due to the following:

- $316 million, or 79 percent, increase in domestic production revenues reflecting $243 million associated with a 52 percent increase in net realized average prices and $73 million associated with a 18 percent increase in production volumes sold. The impact of hedge positions on increased net realized average prices includes the effect of fewer volumes hedged by fixed-price contracts. The increase in production volumes reflects an increase in the number of producing wells primarily from the Piceance, Powder River, and Fort Worth basins. Production revenues in 2008 and 2007 include approximately $32 million and $15 million, respectively, related to natural gas liquids (NGL) and approximately $25 million and $11 million, respectively, related to condensate;

- $53 million increase in revenues for gas management activities related to gas sold on behalf of certain outside parties, which is offset by a similar increase in *segment costs and expenses*. This increase is primarily due to increases in natural gas prices and volumes sold;

- $10 million increase in unrealized gains from hedge ineffectiveness.

Total *segment costs and expenses* increased $187 million, primarily due to the following:

- $53 million increase in expenses for gas management activities related to gas purchased on behalf of certain outside parties, which is offset by a similar increase in *segment revenues*;

- $48 million higher depreciation, depletion and amortization expense primarily due to higher production volumes and increased capitalized drilling costs;

- $35 million higher operating taxes primarily due to higher average market prices and higher production volumes sold;

- $18 million higher lease operating expenses from the increased number of producing wells, primarily within the Piceance, Powder River, and Fort Worth basins, combined with higher well and lease service expenses and facility expenses;

- $14 million higher SG&A expenses primarily due to increased staffing in support of increased drilling and operational activity, including higher compensation. The higher SG&A expenses also include an increase of $4 million in bad debt expense;

- $14 million impairment in 2008 due to recent drilling results in the Caney Shale in the Arkoma basin.

The $192 million increase in s*egment profit* is primarily due to the 52 percent increase in domestic net realized average prices and the 18 percent increase in domestic production volumes sold, partially offset by the increases in *segment costs and expenses*.

Nine months ended September 30, 2008 vs. nine months ended September 30, 2007

Total *segment revenues* increased approximately $1.1 billion, or 71 percent, primarily due to the following:

- $897 million, or 71 percent, increase in domestic production revenues reflecting $633 million associated with a 42 percent increase in net realized average prices and $264 million associated with a 21 percent increase in production volumes sold. The impact of hedge positions on increased net realized average prices includes the

Table of Contents

effect of fewer volumes hedged by fixed-price contracts. The increase in production volumes reflects an increase in the number of producing wells primarily from the Piceance, Powder River, and Fort Worth basins. Production revenues in 2008 and 2007 include approximately $75 million and $34 million, respectively, related to natural gas liquids and approximately $60 million and $26 million, respectively, related to condensate;

- $168 million increase in revenues for gas management activities related to gas sold on behalf of certain outside parties, which is offset by a similar increase in *segment costs and expenses*. This increase is primarily due to increases in natural gas prices and volumes sold.

Total *segment costs and expenses* increased $359 million, primarily due to the following:

- $168 million increase in expenses for gas management activities related to gas purchased on behalf of certain outside parties, which is offset by a similar increase in *segment revenues*;
- $151 million higher depreciation, depletion and amortization expense primarily due to higher production volumes and increased capitalized drilling costs;
- $84 million higher operating taxes primarily due to higher average market prices and higher production volumes sold;
- $46 million higher lease operating expenses from the increased number of producing wells primarily within the Piceance, Powder River, and Fort Worth basins combined with higher well and lease service expenses and facility expenses;
- $27 million higher SG&A expenses primarily due to increased staffing in support of increased drilling and operational activity, including higher compensation. The higher SG&A expenses also include an increase of $9 million in bad debt expense;
- $14 million impairment in 2008 due to recent drilling results in the Caney Shale in the Arkoma basin.

These increases are partially offset by the $148 million gain associated with the previously discussed sale of our Peru interests in 2008.

The $721 million increase in s*egment profit* is primarily due to the 42 percent increase in domestic net realized average prices, the 21 percent increase in domestic production volumes sold, and the $148 million gain associated with the sale of our Peru interests, partially offset by the increases in *segment costs and expenses*.

Gas Pipeline

Overview of Nine Months Ended September 30, 2008

Gas Pipeline master limited partnership

In January 2008, Williams Pipeline Partners L.P. completed its initial public offering of 16.25 million common units at a price of $20 per unit. In February 2008, the underwriters exercised their right to purchase an additional 1.65 million common units at the same price. The initial asset of the partnership is a 35 percent interest in Northwest Pipeline GP. Upon completion of these transactions, we now own approximately 47.7 percent of the interests in Williams Pipeline Partners L.P., including the interests of the general partner, which is wholly owned by us, and incentive distribution rights. In accordance with EITF Issue No. 04-5, we consolidate Williams Pipeline Partners L.P. within our Gas Pipeline segment due to our control through the general partner. (See Note 2 of Notes to Consolidated Financial Statements.) Gas Pipeline's segment profit includes 100 percent of Williams Pipeline Partners L.P.'s segment profit, with the minority interest's share presented below segment profit.

Status of rate case

During 2006, Transco filed a general rate case with the FERC for increases in rates. The new rates were effective, subject to refund, on March 1, 2007. On November 28, 2007, Transco filed a formal stipulation and agreement with the FERC resolving all substantive issues in their pending 2006 rate case. On March 7, 2008, the FERC approved the agreement without modification. The agreement became effective June 1, 2008 and required refunds were issued in July 2008.

Table of Contents

Management's Discussion and Analysis (Continued)

Gulfstream Phase III expansion project

In June 2007, our equity method investee, Gulfstream Natural Gas System, L.L.C. (Gulfstream), received FERC approval to extend its existing pipeline approximately 34 miles within Florida. Construction began in April 2008 and it was placed into service in September 2008. The extension fully subscribed the remaining 345 thousand dekatherms per day (Mdt/d) of firm capacity on the existing pipeline. Gulfstream's estimated cost of this project is $122 million.

Hurricane Ike

In September 2008, Hurricane Ike impacted several onshore and offshore facilities on Transco's interstate natural gas pipeline system resulting in varying degrees of damage. However, Transco has continued to meet its customer commitments while running at lower-than-normal volumes. We expect the majority of associated costs will be recoverable through insurance, with the remainder recoverable through Transco's rates.

Outlook for the Remainder of 2008

Gulfstream Phase IV expansion project

In September 2007, Gulfstream received FERC approval to construct 17.8 miles of 20-inch pipeline and to install a new compressor facility. Construction began in December 2007. The pipeline expansion was placed into service in October 2008, and the compressor facility is expected to be placed into service in January 2009. The expansion will increase capacity by 155 Mdt/d. Gulfstream's estimated cost of this project is $176 million.

Sentinel expansion project

In December 2007, we filed an application with the FERC to construct an expansion in the northeast United States. The cost of the project is estimated to be up to $200 million. The expansion will increase capacity by 142 Mdt/d and is expected to be placed into service in two phases, occurring in November 2008 and November 2009.

Period-Over-Period Results

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
	(Millions)		(Millions)	
Segment revenues	$ 407	$ 392	$ 1,226	$ 1,178
Segment profit	$ 173	$ 183	$ 532	$ 513

Three months ended September 30, 2008 vs. three months ended September 30, 2007

Segment revenues increased $15 million, or 4 percent, due primarily to $22 million higher revenues from transportation imbalance settlements (offset in *costs and operating expenses*) and a $7 million increase in transportation revenue attributable to expansion projects that Transco placed into service in the fourth quarter of 2007. Partially offsetting these increases is a $13 million decrease in revenues associated with a 2007 sale of excess inventory gas (offset in *costs and operating expenses*).

Costs and operating expenses increased $7 million, or 4 percent, due primarily to a $22 million increase in costs of transportation imbalance settlements (offset in *segment revenues*) partially offset by a $13 million decrease associated with a 2007 sale of excess inventory gas (offset in *segment revenues*).

Other income — net changed unfavorably by $13 million primarily due to the absence in 2008 of $12 million of income recognized in the third quarter of 2007 associated with a payment received for a terminated firm transportation agreement on Northwest Pipeline's Grays Harbor lateral and $12 million higher project development costs in 2008. Partially offsetting these unfavorable changes is a $10 million gain on the sale of certain south Texas assets in 2008 by Transco.

Table of Contents

Management's Discussion and Analysis (Continued)

The $10 million, or 5 percent, decrease in *segment profit* is due to the unfavorable change in *other income — net* and a $4 million charge associated with a third-quarter 2008 pipeline rupture, partially offset by the increase in transportation revenue attributable to expansion projects.

Nine months ended September 30, 2008 vs. nine months ended September 30, 2007

Segment revenues increased $48 million, or 4 percent, due primarily to a $56 million increase in transportation revenues resulting primarily from Transco's new rates, which were effective March 2007, and expansion projects that Transco placed into service in the fourth quarter of 2007. In addition, *segment revenues* increased $31 million due to transportation imbalance settlements (offset in *costs and operating expenses*). Partially offsetting these increases is a $37 million decrease associated with a 2007 sale of excess inventory gas (offset in *costs and operating expenses*).

Costs and operating expenses decreased $4 million, or 1 percent, due primarily to a $37 million decrease associated with a 2007 sale of excess inventory gas (offset in *segment revenues*). The decrease is substantially offset by an increase in costs of $31 million associated with transportation imbalance settlements (offset in *segment revenues*).

Other income — net changed unfavorably by $31 million due primarily to the absence in 2008 of $18 million of income recognized in 2007 associated with payments received for a terminated firm transportation agreement on Northwest Pipeline's Grays Harbor lateral and the absence in 2008 of $17 million of income recorded in 2007 for a change in estimate related to a regulatory liability at Northwest Pipeline. In addition, project development costs were $21 million higher in 2008. Partially offsetting these unfavorable changes is a $10 million gain on the sale of certain south Texas assets by Transco in 2008 and a second-quarter 2008 gain of $9 million on the sale of excess inventory gas.

The $19 million, or 4 percent, increase in *segment profit* is due primarily to the increase in transportation revenue, partially offset by the unfavorable change in *other income — net* and a $4 million charge associated with a third-quarter 2008 pipeline rupture.

Midstream Gas & Liquids

Overview of Nine Months Ended September 30, 2008

Midstream's ongoing strategy is to safely and reliably operate large-scale midstream infrastructure where our assets can be fully utilized and drive low per-unit costs. We focus on consistently attracting new business by providing highly reliable service to our customers.

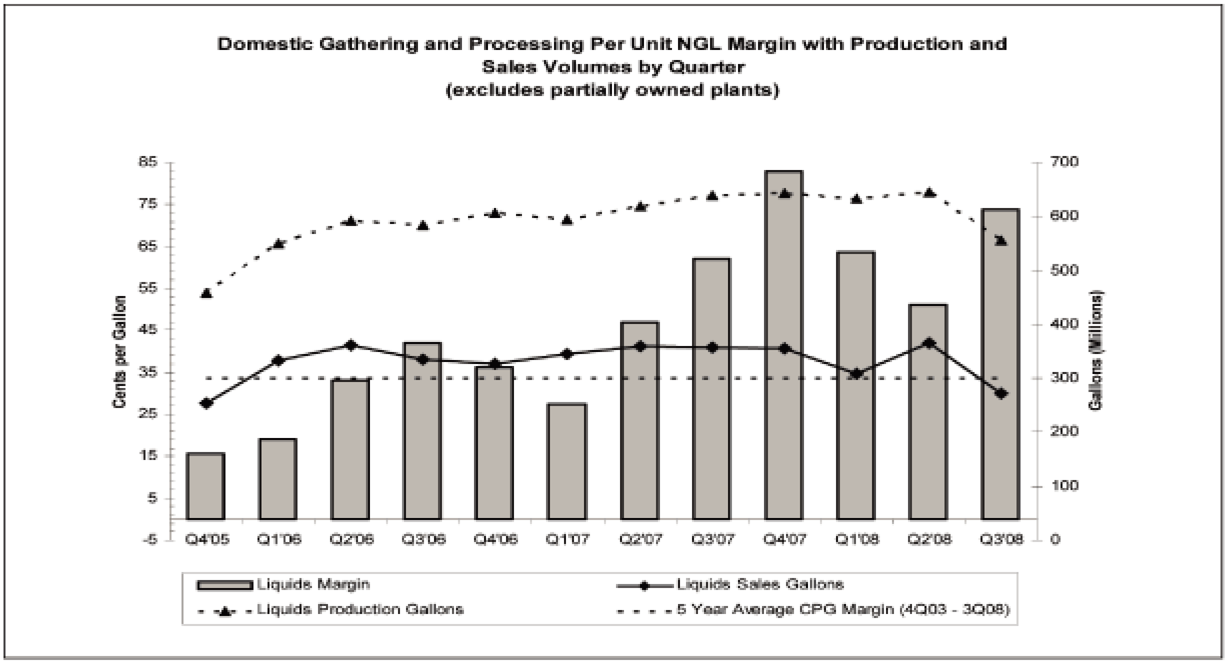
Significant events during 2008 include the following:

Continued favorable commodity price margins

During the first three quarters of 2008, strong per-unit NGL margins driven by higher crude prices, which generally correlate to strong NGL prices, in relationship to natural gas prices have contributed significantly to our realized margins. The geographic diversification of Midstream assets also contributed to realized per-unit margins that were generally greater than that of the industry benchmarks for gas processed in the Henry Hub area and fractionated and sold at Mont Belvieu. Our average realized NGL per-unit margin at our processing plants during the three and nine months ended September 30, 2008 was 74 cents and 62 cents per gallon (cpg), a 19 percent and 35 percent increase over the same periods in 2007. Our NGL per-unit margin also increased during the third quarter of 2008 from the previous quarter due to higher NGL prices and a change in the mix of NGL products sold, partially offset by higher gas prices. Due to third-party NGL pipeline capacity restrictions during the third quarter of 2008, we had to reduce our recoveries of ethane, which typically has lower per-unit margins than non-ethane NGLs. If we had been able to produce the same mix of ethane and non-ethane NGLs during the third quarter of 2008 as we generally have in prior quarters, the increase in the average per-unit margin would have been lower. NGL margins have exceeded our rolling five-year average for the last six quarters, in spite of strong NGL margins over the last year that have significantly increased our rolling five-year average from approximately 22 cpg at the end of the third quarter of 2007 to 34 cpg at the end of the third quarter of 2008. NGL margins are defined as NGL revenues less BTU replacement cost, plant fuel, transportation and fractionation expense and include the impact of our hedging activities, which are discussed in *Outlook for the Remainder of 2008.*

Table of Contents

Management's Discussion and Analysis (Continued)



NGL sales volumes constrained

Primarily during the third quarter of 2008, we experienced restrictions on the volume of NGLs we could deliver to third-party NGL pipelines in our West region. These restrictions were caused by a lack of third-party NGL pipeline transportation capacity which resulted in us lowering our ethane recoveries to accommodate these restrictions. Beginning early in the fourth quarter of 2008, these restrictions were alleviated as we were able to deliver NGL volumes from one of our Wyoming plants into the new Overland Pass NGL pipeline. We expect the remaining NGL volumes from our Wyoming plants to begin flowing into Overland Pass later in the fourth quarter of 2008.

Hurricanes Gustav and Ike

As a result of Hurricanes Gustav and Ike in September 2008, not only did our Gulf Coast region facilities experience reduced volumes and damage, but our West region was also negatively impacted. We estimate that our segment profit for third-quarter 2008 was decreased by approximately $50 million to $65 million due to downtime and charges for repairs and property insurance deductibles associated with Hurricanes Gustav and Ike. We also estimate that fourth-quarter 2008 segment profit will be reduced by $10 million to $20 million due to downtime and reduced volumes associated with the hurricanes. Other than the Cameron Meadows natural gas processing plant and the Discovery offshore gathering system, our major gathering and processing assets in the Gulf of Mexico returned to full operations by the end of the third quarter. However, certain assets continue to run at reduced volumes as producers work to restore their operations to normal levels. The Cameron Meadows plant sustained significant damage from Hurricane Ike. Operations are suspended while we evaluate the timing and extent of the required repairs. The Discovery offshore system, which we operate and own a 60 percent equity interest in, also sustained hurricane damage and is not accepting offshore gas from producers while repairs are being made. The mainline is scheduled to be repaired and returned to service by early December. However, due to further damage assessments, the repair schedule for a lateral is not yet finalized. In the West region, we had to store NGL inventories due to the hurricane-related suspension of operations at a third-party fractionation facility at Mont Belvieu, Texas. We expect to sell most of this excess inventory in the fourth quarter of 2008 and in early 2009.

Major expansion efforts in growth areas

Consistent with our strategy, we continued construction on the following large-scale assets in growth basins.

Table of Contents

Management's Discussion and Analysis (Continued)

Gulf Coast region

The total estimated cost of our major expansion projects in the Gulf Coast region is approximately $810 million, of which approximately $235 million remains to be spent.

- In the deepwater of the Gulf of Mexico, we have completed construction of 37-mile extensions of both of our oil and gas pipelines from our Devils Tower spar to the Blind Faith prospect located in Mississippi Canyon in the eastern deepwater of the Gulf of Mexico. The pipelines have been commissioned and are ready for production to begin flowing. We expect this project to begin contributing to our segment profit in the fourth quarter of 2008.
- We continue construction activities on the Perdido Norte project, which will include an expansion of our Markham gas processing facility and oil and gas lines that will expand the scale of our existing infrastructure in the western deepwater of the Gulf of Mexico. We expect this project to begin contributing to our segment profit at the end of 2009.

West region

We expect to spend approximately $590 million in total on our major expansion projects in the West region, of which approximately $410 million remains to be spent. Our two major expansion projects include the new Willow Creek facility and additional capacity at our Echo Springs facility.

- The new Willow Creek facility is a 450 MMcf/d natural gas processing plant in western Colorado's Piceance basin. Major equipment purchases, vessel fabrication and site clearing and grading are well under way. We expect the new Willow Creek facility to recover 25,000 barrels per day of NGLs at startup in the latter part of 2009.
- In May 2008, we announced that we plan to significantly increase the processing and NGL production capacities at our Echo Springs natural gas processing plant in Wyoming. The addition of a fourth cryogenic processing train will add approximately 350 MMcf/d of processing capacity and 30,000 barrels per day of NGL production capacity, roughly doubling Echo Spring's volumes in both cases. We expect to begin construction on the fourth train at Echo Springs during the second half of 2009 and to bring the additional capacity online during late 2010, subject to all applicable permitting.

Williams Partners L.P.

We currently own approximately 23.6 percent of Williams Partners L.P., including the interests of the general partner, which is wholly owned by us, and incentive distribution rights. Considering the presumption of control of the general partner in accordance with EITF Issue No. 04-5, we consolidate Williams Partners L.P. within the Midstream segment. (See Note 2 of Notes to Consolidated Financial Statements.) Midstream's segment profit includes 100 percent of Williams Partners L.P.'s segment profit, with the minority interest's share presented below segment profit. The debt and equity issued by Williams Partners L.P. to third parties is reported as a component of our consolidated debt balance and minority interest balance, respectively.

Outlook for the Remainder of 2008

The following factors could impact our business in 2008.

- We expect our per-unit NGL margins to continue to exceed our rolling five-year average, although as evidenced by recent events, crude and natural gas prices are highly volatile. We expect lower per-unit margins in the fourth quarter of 2008 compared to the third quarter of 2008 as NGL prices, especially ethane, decline along with crude price declines. We anticipate periods when it will not be economical to recover ethane in the Gulf Coast region, which will reduce our margins. However, we expect continued favorable gas price differentials in the Rocky Mountain area to mitigate per-unit margin declines in the West region. Although NGL products are currently the preferred feedstock for ethylene and propylene production, which are the building blocks of polyethylene or plastics, due to the relative price of alternative crude-based feedstocks, forecasted domestic and global demand for polyethylene has weakened with the recent instability in the economy.

Table of Contents

Management's Discussion and Analysis (Continued)

- We expect a reduction in our segment profit in the fourth quarter of 2008 due to reduced volumes associated with the hurricanes. While we expect business interruption insurance to largely mitigate any losses associated with outages beyond 60 days, the timing to resolve these claims is uncertain. In addition, damage to third-party facilities has idled two of our smaller offshore gathering systems in the Gulf Coast region. If these third-party producers do not or are unable to restore their operations, our assets may become impaired.

- We expect significant savings in certain NGL transportation costs in the West region, which are a component of our per-unit NGL margin, as we transition from our current shipping arrangement to transportation on the Overland Pass pipeline. NGL volumes from one of our Wyoming plants began to flow into the Overland Pass pipeline early in the fourth quarter of 2008, and we expect the remaining NGL volumes from the other plant to begin flowing by the end of this year. We have agreed to dedicate our equity NGL volumes from our two Wyoming plants for transport under a long-term shipping agreement with Overland Pass Pipeline Company, LLC. We currently have a 1 percent interest in Overland Pass Pipeline Company, LLC and have the option to increase our ownership to 50 percent and become the operator within two years of the pipeline becoming operational.

- We entered into various financial hedging contracts during December 2007, and January and February 2008. Of our forecasted domestic NGL sales for the fourth quarter of 2008, approximately 22 percent have been hedged with collar agreements at an expected weighted average sales price that approximates our average 2007 domestic NGL sales price and approximately four percent have been hedged with fixed-price swap contracts. The natural gas shrink requirements associated with the sales under the fixed-price swap contracts have also been hedged through Gas Marketing Services with physical gas purchase contracts, thus effectively hedging the margin on the volumes associated with fixed price swap contracts at a level approximating our 2007 average per-unit margins.

- Based on the cost advantage of our propylene and ethylene production processes compared to other production processes which use crude-based feedstocks and our increased ownership interest in the Geismar olefins facility effective July 2007, we anticipate results from our olefins business for the 2008 year to be above 2007 levels. However, margins in our olefins business are highly dependent upon continued demand within the global economy and our cost advantage diminishes as crude prices decline. The significant slow down in domestic and global economies could further reduce the demand for the petrochemical products we produce in both Canada and the United States.

- Certain of our gas processing contracts contain provisions that allow customers to periodically elect processing services on either a fee-basis or a keep-whole or percent-of-liquids basis. Such elections may affect our future revenues. Fee-based revenues generally reduce our exposure to commodity price risks, but may also reduce our profitability in high margin environments.

- We expect continued expansion of our gathering and processing systems in our Gulf Coast and West regions to keep pace with increased demand for our services. As we pursue these activities, we expect our operating expenses to increase.

- Final resolution of our negotiations with the Jicarilla Apache Nation (JAN) concerning our gathering system assets located on JAN-owned land will impact our future operating results. During the third quarter of 2008, negotiations with the JAN, which have been ongoing since the expiration of our right-of-way agreement with them on December 31, 2006, expanded from an asset sale to discussions of other alternative arrangements. While the ultimate outcome is unknown at this time, the alternative arrangements could allow us to retain revenue associated with these gathering system assets, although it may also increase annual operating costs.

Period-Over-Period Results

	Three months ended September 30,		Nine months ended September 30,

Table of Contents

Management's Discussion and Analysis (Continued)

In order to provide additional clarity, our management's discussion and analysis of operating results separately reflects the portion of general and administrative expense not allocated to an asset group as *indirect general and administrative expense*. These charges represent any overhead cost not directly attributable to one of the specific asset groups noted in this discussion.

Three months ended September 30, 2008 vs. three months ended September 30, 2007

The $76 million, or 6 percent, increase in *segment revenues* is largely due to:

- A $50 million increase in revenues associated with the production of NGLs due primarily to higher NGL prices, partially offset by lower volumes.
- A $31 million increase in revenues in our olefins production business due primarily to higher prices, partially offset by lower volumes.
- A $16 million increase in fee revenues due primarily to higher Venezuelan processing fee revenues and higher storage and fractionation fee revenues.

These increases are partially offset by a $24 million decrease in revenues from the marketing of NGLs, olefins and crude due primarily to lower NGL and crude volumes, partially offset by higher NGL and crude prices.

Segment costs and expenses increased $128 million, or 12 percent, primarily as a result of:

- A $72 million increase in costs associated with the production of NGLs due primarily to higher natural gas prices, partially offset by lower volumes.
- A $48 million increase in costs in our olefins production business due primarily to higher feedstock costs, partially offset by lower volumes.
- A $24 million increase in operating costs driven by higher repair costs and property insurance deductibles related to the hurricanes and higher depreciation.
- A $5 million increase in NGL, olefin and crude marketing purchases due primarily to higher NGL and crude prices and a $14 million write-down of NGL inventories to the lower of cost or market, partially offset by lower volumes.

These increases are partially offset by a $17 million favorable change consisting of $8 million in foreign exchange gains relating to the revaluation of current assets held in U.S. dollars within our Canadian operations, compared to $9 million in losses in 2007.

The $46 million, or 15 percent, decrease in Midstream's *segment profit* primarily reflects the previously described changes in *segment revenues* and *segment costs and expenses*. A more detailed analysis of the segment profit of certain Midstream operations is presented as follows.

Domestic gathering & processing

The $26 million decrease in *domestic gathering & processing segment profit* includes a $19 million decrease in the West region and a $7 million decrease in the Gulf Coast region.

The $19 million decrease in the West region's *segment profit* includes:

- A $26 million decrease in NGL margins due to significantly lower volumes and higher gas prices, partially offset by higher NGL prices. Due to the previously discussed lack of third-party NGL pipeline transportation capacity, it was necessary to lower our ethane recoveries to accommodate restrictions on the volume of NGLs we could deliver into the pipelines. In addition, as previously discussed, sales volumes were lower as the hurricane-related disruptions at a third-party fractionation facility at Mont Belvieu, Texas resulted in an NGL inventory build-up.

Table of Contents

- A $6 million involuntary conversion gain related to insurance recoveries in excess of the carrying value of our Ignacio plant. These insurance recoveries were used to rebuild the plant.

The $7 million decrease in the Gulf Coast region's *segment profit* includes:

- $5 million in operating costs related to hurricane repair and property insurance deductibles.
- A $4 million increase in NGL margins due to higher NGL prices, partially offset by higher gas prices and lower volumes. Volumes are lower due both to the hurricanes and natural declines in some fields, partially offset by new supplies connected in the deepwater.

Other

The significant components of the $26 million decrease in *segment profit* of our other operations include:

- $29 million in lower margins related to the marketing of NGLs and olefins due primarily to a $14 million charge relating to a lower of cost or market adjustment on NGL inventories and greater unfavorable changes in pricing while product was in transit during 2008 as compared to 2007.
- $17 million in lower margins in our olefins production business due primarily to lower volumes as a result of third-party operational issues that reduced off-gas supplies to our plant in Canada and higher feedstock prices, partially offset by higher olefin sales prices.

These decreases are partially offset by a $17 million favorable change consisting of $8 million in foreign exchange gains related to the revaluation of current assets held in U.S. dollars within our Canadian operations, compared to $9 million in losses in 2007.

Nine months ended September 30, 2008 vs. nine months ended September 30, 2007

The $1,142 million, or 32 percent, increase in *segment revenues* is largely due to:

- A $385 million increase in revenues in our olefins production business due primarily to higher prices and higher volumes sold associated with the increase of our ownership interest in the Geismar olefins facility effective July 2007.
- A $375 million increase in revenues from the marketing of NGLs, olefins and crude due primarily to higher NGL and crude prices, partially offset by lower volumes sold.
- A $328 million increase in revenues associated with the production of NGLs due primarily to higher NGL prices, partially offset by lower volumes.
- A $39 million increase in fee-based revenues due primarily to higher fee-based revenues in Venezuela and the West region.

Segment costs and expenses increased $1,068 million, or 36 percent, primarily as a result of:

- A $407 million increase in NGL, olefin and crude marketing purchases due primarily to higher NGL and crude prices, partially offset by lower volumes.
- A $347 million increase in costs in our olefins production business due to both higher feedstock prices and higher volumes produced associated with the increase of our ownership interest in the Geismar olefins facility effective July 2007.
- A $230 million increase in costs associated with the production of NGLs due primarily to higher natural gas prices.
- An $80 million increase in operating costs including higher employee costs, repair costs and property insurance deductibles related to the hurricanes, costs associated with the increase of our ownership interest in the Geismar olefins facility, depreciation and gas transportation expenses in the eastern Gulf of Mexico.

Table of Contents

Management's Discussion and Analysis (Continued)

- A $31 million favorable change consisting of $13 million in foreign exchange gains in the first nine months of 2008 related to the revaluation of current assets held in U.S. dollars within our Canadian operations, compared to $18 million in losses in the first nine months of 2007.

The $105 million, or 15 percent, increase in Midstream's *segment profit* reflects $31 million higher equity earnings and the previously described changes in *segment revenues* and *segment costs and expenses*. A more detailed analysis of the segment profit of certain Midstream operations is presented as follows.

Domestic gathering & processing

The $75 million increase in *domestic gathering & processing segment profit* includes a $35 million increase in the West region and a $40 million increase in the Gulf Coast region.

The $35 million increase in our West region's *segment profit* includes:

- A $33 million increase in NGL margins due to a significant increase in average per-unit NGL prices, partially offset by a significant increase in costs associated with the production of NGLs reflecting higher natural gas prices and lower volumes sold. The decrease in volumes sold is due primarily to forced reductions in ethane recoveries to accommodate restrictions in third-party NGL pipeline transportation capacity, an increase in inventory during the first quarter of 2008 caused by the transition from product sales at the plant to shipping volumes through a pipeline for sale downstream, an increase in inventory during the third quarter of 2008 related to previously discussed hurricane-related disruptions at a third-party fractionation facility, and lower equity volumes as processing agreements change from keep-whole to fee-based. These decreases were partially offset by a full year of production from the fifth train at our Opal processing plant, which began production in the first quarter of 2007.

- A $14 million increase in fee revenues due primarily to new lease revenues from Gas Pipeline for the Parachute lateral transferred to Midstream in December 2007.

- A $9 million involuntary conversion gain related to insurance recoveries in excess of the carrying value of our Ignacio plant. These insurance recoveries were used to rebuild the plant.

- A $29 million increase in operating costs driven by a $14 million increase in operations and maintenance expenses including higher employee costs and turbine and engine overhaul expenses, higher depreciation, and higher gathering fuel expense.

The $40 million increase in the Gulf Coast region's *segment profit* is primarily due to higher NGL margins, partially offset by higher operating costs and other expenses. The significant components of this increase include:

- NGL margins increased $65 million due to significantly higher NGL prices and slightly higher volumes, partially offset by a significant increase in costs associated with the production of NGLs reflecting higher natural gas prices. The volume increase is due primarily to connecting new supplies in the deepwater, offset by reduced volumes related to the hurricanes in the third quarter of 2008.

- Operating costs increased $19 million, including $5 million in hurricane repair and property insurance deductibles and $9 million higher gas transportation expenses in the eastern Gulf of Mexico.

Venezuela

Segment profit for our Venezuela assets increased $6 million. The increase is due primarily to $15 million higher fee revenues resulting from gas compression and injection efficiencies and higher gas reimbursement rates, partially offset by $8 million in lower currency exchange gains.

Table of Contents

Management's Discussion and Analysis (Continued)

Other

The significant components of the $36 million increase in *segment profit* of our other operations include:

- $38 million in higher margins in our olefins production business due primarily to higher propylene margins, higher ethylene volumes associated with the increase of our ownership interest in the Geismar olefins facility effective July 2007, and higher margins on NGL products produced in our Canadian olefins operations, partially offset by lower volumes at our plant in Canada as a result of third-party operational issues that reduced off-gas supplies.
- Higher equity earnings including $15 million higher Discovery Producer Services L.L.C. equity earnings and $12 million higher Aux Sable Liquids Products, L.P. equity earnings primarily due to favorable processing margins.
- A $31 million favorable change consisting of $13 million in foreign exchange gains in the first nine months of 2008 related to the revaluation of current assets held in U.S. dollars within our Canadian operations, compared to $18 million in losses in the first nine months of 2007.

These increases are partially offset by:

- $32 million in lower margins related to the marketing of NGLs and olefins due primarily to a $14 million charge relating to a lower of cost or market adjustment on NGL inventories and unfavorable changes in pricing while product was in transit during 2008 as compared to 2007.
- $35 million higher operating costs including higher costs associated with the increase of our ownership interest in the Geismar olefins facility effective July 2007 and $3 million in repair expense at our Geismar plant which was damaged in Hurricane Gustav.

Gas Marketing Services

Gas Marketing Services (Gas Marketing) primarily supports our natural gas businesses by providing marketing and risk management services, which include marketing and hedging the gas produced by Exploration & Production and procuring fuel and shrink gas and hedging natural gas liquids sales for Midstream. In addition, Gas Marketing manages various natural gas-related contracts such as transportation, storage, related hedges and proprietary trading positions, including certain legacy natural gas contracts and positions. Gas Marketing also provides similar services to third parties, such as producers.

Overview of Nine Months Ended September 30, 2008

Gas Marketing's improved operating results for the first nine months of 2008 compared to the first nine months of 2007 reflect a favorable change in unrealized mark-to-market gains (losses) on derivatives that are not designated as hedges for accounting purposes or do not qualify for hedge accounting. The favorable change was largely the result of reduced losses in 2008 from legacy derivative contracts that are no longer outstanding. Results for 2008 also include favorable price movements on derivative positions executed to hedge the anticipated withdrawals of natural gas from storage. These gains were partially offset by lower-of-cost-or-market adjustments to the carrying value of the natural gas inventories in storage.

Outlook for the Remainder of 2008

For the remainder of 2008, Gas Marketing will focus on providing services that support our natural gas businesses. Certain legacy natural gas contracts and positions from our former Power segment remain in the Gas Marketing segment. Gas Marketing's earnings may continue to reflect mark-to-market volatility from commodity-based derivatives that represent economic hedges but are not designated as hedges for accounting purposes or do not qualify for hedge accounting, primarily those contracts used to hedge the anticipated storage withdrawals.

Table of Contents

Management's Discussion and Analysis (Continued)

Period-Over-Period Results

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
	(Millions)		(Millions)	
Realized revenues	$ 1,687	$ 1,300	$ 5,363	$ 4,084
Net forward unrealized mark-to-market gains (losses)	29	(53)	13	(155)
Segment revenues	1,716	1,247	5,376	3,929
Costs and operating expenses	1,695	1,312	5,369	4,080
Gross margin	21	(65)	7	(151)
Selling, general and administrative expenses	4	2	15	9
Other expense — net	1	—	1	—
Segment profit (loss)	$ 16	$ (67)	$ (9)	$ (160)

Three months ended September 30, 2008 vs. three months ended September 30, 2007

Realized revenues represent (1) revenue from the sale of natural gas or completion of energy-related services and (2) gains and losses from the net financial settlement of derivative contracts. Realized revenues increased $387 million primarily due to an increase in physical natural gas revenue as a result of a 49 percent increase in average prices on physical natural gas sales and an increase in net financial settlements of derivative contracts. The increase is partially offset by a 15 percent decrease in natural gas sales volumes due to increased volumes injected into storage.

Net forward unrealized mark-to-market gains (losses) primarily represent changes in the fair values of certain derivative contracts with a future settlement or delivery date that are not designated as hedges for accounting purposes or do not qualify for hedge accounting. The favorable change of $82 million in unrealized mark-to-market revenues is primarily the result of favorable price movements on derivative positions primarily related to our natural gas storage activity.

The $383 million increase in *cost and operating expenses* is primarily due to a 52 percent increase in average prices on physical natural gas purchases. Partially offsetting this increase is a 14 percent decrease in third-party natural gas purchase volumes. The third quarter of 2008 includes a $24 million lower-of-cost-or-market adjustment to inventory, compared to $21 million in the third quarter of 2007.

The $83 million improvement in *segment profit (loss)* is primarily due to the previously described favorable change in unrealized mark-to-market revenues.

Nine months ended September 30, 2008 vs. nine months ended September 30, 2007

Realized revenues increased $1,279 million primarily due to an increase in physical natural gas revenue as a result of a 39 percent increase in average prices on physical natural gas sales and an increase in net financial settlements of derivative contracts. The increase is partially offset by a 7 percent decrease in natural gas sales volumes.

The favorable change of $168 million in unrealized mark-to-market revenues is primarily the result of reduced losses in 2008 from legacy derivative contracts that are no longer outstanding in addition to favorable price movements on derivative positions primarily related to our natural gas storage activity. This change also includes a $10 million favorable impact in 2008 due to considering our own nonperformance risk in estimating the fair value of our derivative liabilities in accordance with the implementation of SFAS 157. (See Note 10 of Notes to Consolidated Financial Statements.)

The $1,289 million increase in *cost and operating expenses* is primarily due to a 41 percent increase in average prices on physical natural gas purchases. Partially offsetting this increase is a 6 percent decrease in natural gas purchase volumes. Year-to-date 2008 includes a $32 million lower-of-cost-or-market adjustment to inventory, compared to a $25 million adjustment in the prior year.

The $151 million improvement in *segment profit (loss)* is primarily due to the previously described favorable change in unrealized mark-to-market revenues and the favorable impact of applying a credit reserve for nonperformance risk on our own derivative liabilities in accordance with the implementation of SFAS 157. These favorable changes were partially offset by a decrease in realized gross margin.

Energy Trading Activities

Fair Value of Trading and Nontrading Derivatives

The chart below reflects the fair value of derivatives held for trading purposes as of September 30, 2008. We have presented the fair value of assets and liabilities by the period in which they would be realized under their contractual terms and not as a result of a sale. We have reported the fair value of a portion of these derivatives in assets and liabilities of discontinued operations. (See Note 3 of Notes to Consolidated Financial Statements.)

Net Assets (Liabilities) — Trading
(Millions)

To be Realized in 1-12 Months (Year 1)	To be Realized in 13-36 Months (Years 2-3)	To be Realized in 37-60 Months (Years 4-5)	To be Realized in 61-120 Months (Years 6-10)	To be Realized in 121+ Months (Years 11+)	Net Fair Value
$(26)	$(21)	$—	$—	$—	$(47)

We are not materially engaged in trading activities. However, we hold a substantial portfolio of nontrading derivative contracts. Nontrading derivative contracts are those that hedge or could possibly hedge forecasted transactions on an economic basis. We have designated certain of these contracts as cash flow hedges of Exploration & Production's forecasted sales of natural gas production and Midstream's forecasted sales of natural gas liquids under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" (SFAS 133). Of the total fair value of nontrading derivatives, SFAS 133 cash flow hedges had a net asset value of $119 million as of September 30, 2008. The chart below reflects the fair value of derivatives held for nontrading purposes as of September 30, 2008, for Gas Marketing Services, Exploration & Production, Midstream, and nontrading derivatives reported in assets and liabilities of discontinued operations.

Net Assets (Liabilities) — Nontrading
(Millions)

To be Realized in 1-12 Months (Year 1)	To be Realized in 13-36 Months (Years 2-3)	To be Realized in 37-60 Months (Years 4-5)	To be Realized in 61-120 Months (Years 6-10)	To be Realized in 121+ Months (Years 11+)	Net Fair Value
$149	$25	$1	$1	$—	$176

Counterparty Credit Considerations

We include an assessment of the risk of counterparty nonperformance in our estimate of fair value for all contracts. Such assessment considers (1) the credit rating of each counterparty as represented by public rating agencies such as Standard & Poor's and Moody's Investors Service, (2) the inherent default probabilities within these ratings, (3) the regulatory environment that the contract is subject to and (4) the terms of each individual contract.

Risks surrounding counterparty performance and credit could ultimately impact the amount and timing of expected cash flows. We continually assess this risk. We have credit protection within various agreements to call on additional collateral support if necessary. At September 30, 2008, we held collateral support, including letters of credit, of $54 million.

Table of Contents

Management's Discussion and Analysis (Continued)

The gross credit exposure from our derivative contracts, a portion of which is included in assets of discontinued operations (see Note 3 of Notes to Consolidated Financial Statements), as of September 30, 2008, is summarized below.

Counterparty Type	Investment Grade (a)	Total
	(Millions)	
Gas and electric utilities	$ 1	$ 3
Energy marketers and traders	175	1,238
Financial institutions	1,867	1,870
	$ 2,043	3,111
Credit reserves		(1)
Gross credit exposure from derivatives		$ 3,110

We assess our credit exposure on a net basis to reflect master netting agreements with certain counterparties. We offset our credit exposure to each counterparty with amounts we owe the counterparty under derivative contracts. The net credit exposure from our derivatives as of September 30, 2008, is summarized below.

Counterparty Type	Investment Grade (a)	Total
	(Millions)	
Gas and electric utilities	$ 1	$ 3
Energy marketers and traders	71	76
Financial institutions	360	360
	$ 432	439
Credit reserves		(1)
Net credit exposure from derivatives		$ 438

(a) We determine investment grade primarily using publicly available credit ratings. We include counterparties with a minimum Standard & Poor's rating of BBB- or Moody's Investors Service rating of Baa3 in investment grade.

Table of Contents

Management's Discussion and Analysis of Financial Condition

Outlook

We entered 2008 positioned for growth through disciplined investments in our natural gas business. Examples of this planned growth include:

- Exploration & Production will continue to maintain its development drilling program in the Piceance, Powder River, San Juan, Fort Worth, and Arkoma basins.
- Gas Pipeline will continue to expand its system to meet the demand of growth markets.
- Midstream will continue to pursue significant deepwater production commitments and expand capacity in the western United States.

We estimate capital and investment expenditures will total $3.375 billion to $3.575 billion in 2008, with $782 million to $982 million to be incurred over the remainder of the year. Of the total estimated 2008 capital expenditures, $2.35 billion to $2.45 billion is related to Exploration & Production. Also within the total estimated expenditures for 2008 is approximately $170 million to $200 million for compliance and maintenance-related projects at Gas Pipeline, including Clean Air Act compliance. Capital and investment expenditures are expected to range from $2.8 billion to $3.1 billion in 2009.

We believe we have, or have access to, the financial resources and liquidity necessary to meet future requirements for working capital, capital and investment expenditures and debt payments while maintaining a sufficient level of liquidity to reasonably protect against unforeseen circumstances requiring the use of funds. We also expect to maintain our investment grade status. We expect to maintain liquidity of at least $1 billion from cash and cash equivalents and unused revolving credit facilities. We maintain adequate liquidity to manage margin requirements related to significant movements in commodity prices, unplanned capital spending needs, near term scheduled debt payments, and litigation and other settlements. We expect to fund capital and investment expenditures, debt payments, dividends, and working capital requirements primarily through cash flow from operations, which is estimated to be between $3.1 billion and $3.3 billion in 2008, and cash and cash equivalents on hand as needed. Cash flow from operations is expected to range from $2.4 billion to $3.1 billion in 2009. We have also historically provided for additional funding needs through the issuance of debt and sales of units of Williams Partners L.P. and Williams Pipeline Partners L.P. However, as a result of credit market conditions at the time of this filing, these sources of funding are considered economically prohibitive and are unlikely to be utilized in this economic environment.

Potential risks associated with our planned levels of liquidity and the planned capital and investment expenditures discussed above include:

- The impact of the general economic downturn, including associated volatility and our ability to access capital markets (see Recent Market Events).
- Lower than expected levels of cash flow from operations due to commodity pricing volatility. To mitigate this exposure, both our Exploration & Production and Midstream segments utilize hedging programs to manage commodity price risk.
- Sensitivity of margin requirements associated with our marginable commodity contracts. As of September 30, 2008, we estimate our exposure to additional margin requirements through the remainder of 2008 to be no more than $26 million, using a statistical analysis at a 99 percent confidence level.
- Exposure associated with our efforts to resolve regulatory and litigation issues (see Note 12 of Notes to Consolidated Financial Statements).

[Table of Contents](#)

Management's Discussion and Analysis (Continued)

Liquidity

Our internal and external sources of liquidity include cash generated from our operations, bank financings, proceeds from the issuance of long-term debt and equity securities, and proceeds from asset sales. While most of our sources are available to us at the parent level, others are available to certain of our subsidiaries, including equity and debt issuances from Williams Partners L.P. and Williams Pipeline Partners L.P., our master limited partnerships. Our ability to raise funds in the capital markets will be impacted by our financial condition, interest rates, market conditions, and industry conditions.

Available Liquidity

		September 30, 2008 (Millions)
Cash and cash equivalents (1)	$	1,524
Available capacity under our four unsecured revolving and letter of credit facilities totaling $1.2 billion		963
Available capacity under our $1.5 billion unsecured revolving and letter of credit facility (2)		1,402
Available capacity under Williams Partners L.P.'s $450 million five-year senior unsecured credit facility (3)		188
	$	4,077

(1) *Cash and cash equivalents* includes $48 million of funds received from third parties as collateral. The obligation for these amounts is reported as *accrued liabilities* on the Consolidated Balance Sheet. Also included is $598 million of cash and cash equivalents that is being utilized by certain subsidiary and international operations. The remainder of our *cash and cash equivalents* is primarily held in government-backed instruments.

(2) Northwest Pipeline and Transco each have access to $400 million under this facility to the extent not utilized by us. We expect that the ability of both Northwest Pipeline and Transco to borrow under this facility is reduced by approximately $19 million each due to the bankruptcy of a participating bank. We also expect that our consolidated ability to borrow under this facility is reduced by a total of $70 million, including the reductions related to Northwest Pipeline and Transco. The available liquidity in the table above reflects this $70 million reduction. (See Note 9 of Notes to Consolidated Financial Statements.) The committed amounts of other participating banks under this agreement remain in effect and are not impacted by this reduction.

(3) This facility is only available to Williams Partners L.P. We expect that Williams Partners L.P.'s ability to borrow under this facility is reduced by $12 million. The available liquidity in the table above reflects this $12 million reduction. (See Note 9 of Notes to Consolidated Financial Statements.) The committed amounts of other participating banks under this agreement remain in effect and are not impacted by this reduction.

In addition to the above, Northwest Pipeline and Transco have shelf registration statements available for the issuance of up to $350 million aggregate principal amount of debt securities.

Williams Partners L.P. has a shelf registration statement available for the issuance of $1.17 billion aggregate principal amount of debt and limited partnership unit securities.

In addition, at the parent-company level, we have a shelf registration statement that allows us to issue publicly registered debt and equity securities.

Exploration & Production has an unsecured credit agreement with certain banks that serves to reduce our use of cash and other credit facilities for margin requirements related to our hedging activities as well as lower transaction fees. In June 2008, the agreement was extended through December 2013.

The above table does not include a $10 million auction rate security that is classified within *Investments* due to recent auction failures. We have the intent and ability to hold this investment grade security until we are able to realize its face value. We hold no other auction rate securities at September 30, 2008.

Credit ratings

Standard & Poor's rates our senior unsecured debt at BB+ and our corporate credit at BBB- with a stable ratings outlook. With respect to Standard & Poor's, a rating of "BBB" or above indicates an investment grade rating. A rating below "BBB" indicates that the security has significant speculative characteristics. A "BB" rating indicates that Standard & Poor's believes the issuer has the capacity to meet its financial commitment on the obligation, but adverse business conditions could lead to insufficient ability to meet financial commitments. Standard & Poor's may modify its ratings with a "+" or a "–" sign to show the obligor's relative standing within a major rating category.

Moody's Investors Service rates our senior unsecured debt at Baa3 with a stable ratings outlook. With respect to Moody's, a rating of "Baa" or above indicates an investment grade rating. A rating below "Baa" is considered to have speculative elements. The "1", "2" and "3" modifiers show the relative standing within a major category. A "1" indicates that an obligation ranks in the higher end of the broad rating category, "2" indicates a mid-range ranking, and "3" ranking at the lower end of the category.

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 2236 of 2431

Table of Contents

Management's Discussion and Analysis (Continued)

Fitch Ratings rates our senior unsecured debt at BBB- with a stable ratings outlook. With respect to Fitch, a rating of "BBB" or above indicates an investment grade rating. A rating below "BBB" is considered speculative grade. Fitch may add a "+" or a "–" sign to show the obligor's relative standing within a major rating category.

Sources (Uses) of Cash

	Nine months ended September 30, 2008	Nine months ended September 30, 2007
	(Millions)	
Net cash provided (used) by:		
Operating activities	$ 2,606	$ 1,677
Financing activities	(316)	(508)
Investing activities	(2,465)	(1,983)
Decrease in cash and cash equivalents	$ (175)	$ (814)

Operating activities

Our *net cash provided by operating activities* for the nine months ended September 30, 2008, increased from the same period in 2007 due primarily to the improvement in our operating results. Significant transactions impacting our *net cash provided by operating activities* in 2008 include:

- $128 million of cash received related to a favorable ruling from the Alaska Supreme Court (see Note 3 of Notes to Consolidated Financial Statements).
- $144 million of required refunds paid by Transco related to a general rate case with the FERC (see Results of Operations — Segments, Gas Pipeline).

Financing activities

Our *net cash used by financing activities* for the nine months ended September 30, 2008, decreased from the same period in 2007. Significant transactions include:

- $362 million of cash received in 2008 from the completion of the Williams Pipeline Partners L.P. initial public offering (see Note 2 of Notes to Consolidated Financial Statements).
- $474 million of cash payments for the repurchase of our common stock in 2008 (see Note 11 of Notes to Consolidated Financial Statements) compared to $234 million of our common stock repurchased in 2007.
- Net debt proceeds of $40 million in 2008 related primarily to $75 million of net cash received from debt transactions in the Gas Pipeline segment (see Note 9 of Notes to Consolidated Financial Statements). In 2007 we had net debt payments of $134 million.
- Quarterly dividends paid on common stock totaled $186 million in 2008 compared to $174 million in 2007.

Investing activities

Our *net cash used by investing activities* for the nine months ended September 30, 2008, increased from the same period in 2007. Significant transactions include:

- In 2008, capital expenditures totaled $2.6 billion and were largely related to Exploration & Production's drilling activity. This total includes Exploration & Production's acquisitions of certain interests in the Piceance and Fort Worth basins for $285 million and $147 million, respectively (see Results of Operations — Segments — Exploration & Production). In 2007, capital expenditures totaled $2.1 billion and were largely related to Exploration & Production's drilling activity, mostly in the Piceance basin.
- $148 million of cash received in 2008 from Exploration & Production's sale of a contractual right to a production payment (see Note 4 of Notes to Consolidated Financial Statements).

Table of Contents

Management's Discussion and Analysis (Continued)

- We purchased $105 million in investments in 2008, including $82 million related to our Gulfstream equity investment.
- We purchased $304 million and received $353 million from the sale of auction rate securities in 2007. These were utilized as a component of our overall cash management program.

Off-balance sheet financing arrangements and guarantees of debt

We have various guarantees which are disclosed in Note 12 of Notes to Consolidated Financial Statements. We do not believe these guarantees or the possible fulfillment of them will prevent us from meeting our liquidity needs.

Table of Contents

Item 3

Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

Our interest rate risk exposure is primarily associated with our debt portfolio and has not materially changed during the first nine months of 2008. (See Note 9 of Notes to Consolidated Financial Statements.)

Commodity Price Risk

We are exposed to the impact of fluctuations in the market price of natural gas and natural gas liquids, as well as other market factors, such as market volatility and commodity price correlations. We are exposed to these risks in connection with our owned energy-related assets, our long-term energy-related contracts and our proprietary trading activities. We manage the risks associated with these market fluctuations using various derivatives and nonderivative energy-related contracts. The fair value of derivative contracts is subject to changes in energy-commodity market prices, the liquidity and volatility of the markets in which the contracts are transacted, and changes in interest rates. We measure the risk in our portfolios using a value-at-risk methodology to estimate the potential one-day loss from adverse changes in the fair value of the portfolios.

Value at risk requires a number of key assumptions and is not necessarily representative of actual losses in fair value that could be incurred from the portfolios. Our value-at-risk model uses a Monte Carlo method to simulate hypothetical movements in future market prices and assumes that, as a result of changes in commodity prices, there is a 95 percent probability that the one-day loss in fair value of the portfolios will not exceed the value at risk. The simulation method uses historical correlations and market forward prices and volatilities. In applying the value-at-risk methodology, we do not consider that the simulated hypothetical movements affect the positions or would cause any potential liquidity issues, nor do we consider that changing the portfolio in response to market conditions could affect market prices and could take longer than a one-day holding period to execute. While a one-day holding period has historically been the industry standard, a longer holding period could more accurately represent the true market risk given market liquidity and our own credit and liquidity constraints.

We segregate our derivative contracts into trading and nontrading contracts, as defined in the following paragraphs. We calculate value at risk separately for these two categories. Derivative contracts designated as normal purchases or sales under SFAS 133 and nonderivative energy contracts have been excluded from our estimation of value at risk.

Trading

Our trading portfolio consists of derivative contracts entered into for purposes other than economically hedging our commodity price-risk exposure. Our value at risk for contracts held for trading purposes was $.2 million at September 30, 2008, and $1 million at December 31, 2007.

Nontrading

Our nontrading portfolio consists of derivative contracts that hedge or could potentially hedge the price risk exposure from the following activities:

Segment	Commodity Price Risk Exposure
Exploration & Production	• Natural gas sales
Midstream	• Natural gas purchases • NGL sales
Gas Marketing Services	• Natural gas purchases and sales

Table of Contents

The value at risk for derivative contracts held for nontrading purposes was $36 million at September 30, 2008, and $24 million at December 31, 2007. Derivative contracts included in our assets and liabilities of discontinued operations are included in the nontrading portfolio, but these had a value at risk of zero for both periods.

Certain of the derivative contracts held for nontrading purposes are accounted for as cash flow hedges under SFAS 133. Though these contracts are included in our value-at-risk calculation, any changes in the fair value of the effective portion of these hedge contracts would generally not be reflected in earnings until the associated hedged item affects earnings.

Item 4

Controls and Procedures

Evaluation of Disclosure Controls and Procedures

An evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act) (Disclosure Controls) was performed as of the end of the period covered by this report. This evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that these Disclosure Controls are effective at a reasonable assurance level.

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our Disclosure Controls or our internal controls over financial reporting (Internal Controls) will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. We monitor our Disclosure Controls and Internal Controls and make modifications as necessary; our intent in this regard is that the Disclosure Controls and the Internal Controls will be modified as systems change and conditions warrant.

Third-Quarter 2008 Changes in Internal Controls Over Financial Reporting

There have been no changes during the third-quarter of 2008 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information called for by this item is provided in Note 12 of Notes to Consolidated Financial Statements included under Part I, Item 1. Financial Statements of this report, which information is incorporated by reference into this item.

Item 1A. Risk Factors

Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2007, includes certain risk factors that could materially affect our business, financial condition or future results. Those Risk Factors have not materially changed except as set forth below:

Our businesses are subject to complex government regulations. The operation of our businesses might be adversely affected by changes in these regulations or in their interpretation or implementation, or the introduction of new laws or regulations applicable to our businesses or our customers.

Existing regulations might be revised or reinterpreted, new laws and regulations might be adopted or become applicable to us, our facilities or our customers, and future changes in laws and regulations might have a detrimental effect on our business. Specifically, the Colorado Oil & Gas Conservation Commission has proposed rules that could increase our costs of permitting and environmental compliance, may affect our ability to meet our anticipated drilling schedule and therefore may have a material effect on our results of operations. Over the past few years, certain restructured energy markets have experienced supply problems and price volatility. In some of these markets, proposals have been made by governmental agencies and other interested parties to re-regulate areas of these markets which have previously been deregulated. Various forms of market controls and limitations including price caps and bid caps have already been implemented and new controls and market restructuring proposals are in various stages of development, consideration and implementation. We cannot assure you that changes in market structure and regulation will not adversely affect our business and results of operations. We also cannot assure you that other proposals to re-regulate will not be made or that legislative or other attention to these restructured energy markets will not cause the deregulation process to be delayed or reversed or otherwise adversely affect our business and results of operations.

Recent events in the global credit markets have created a shortage in the availability of credit.

Global credit markets have recently experienced a shortage in overall liquidity and a resulting disruption in the availability of credit. While we cannot predict the occurrence of future disruptions or how long the current circumstances may continue, we believe cash on hand and cash provided by operating activities, as well as availability under our existing financing agreements will provide us with adequate liquidity for the foreseeable future. However, our ability to borrow under our existing financing agreements, including our bank credit facilities, could be impaired if one or more of our lenders fail to honor its contractual obligation to lend to us. Continuing or additional disruptions, including the bankruptcy or restructuring of certain financial institutions, may adversely affect the availability of credit already arranged and the availability and cost of credit in the future.

We might not be able to successfully manage the risks associated with selling and marketing products in the wholesale energy markets.

Our portfolio of derivative and other energy contracts consists of wholesale contracts to buy and sell commodities, including contracts for natural gas, natural gas liquids and other commodities that are settled by the delivery of the commodity or cash throughout the United States. If the values of these contracts change in a direction or manner that we do not anticipate or cannot manage, it could negatively affect our results of operations. In the past, certain marketing and trading companies have experienced severe financial problems due to price volatility in the energy commodity markets. In certain instances this volatility has caused companies to be unable to deliver energy commodities that they had guaranteed under contract. If such a delivery failure were to occur in one of our contracts, we might incur additional losses to the extent of amounts, if any, already paid to, or received from, counterparties. In addition, in our businesses, we often extend credit to our counterparties. Despite performing credit analysis prior to extending credit, we are exposed to the risk that we might not be able to collect amounts owed to

Docket No. RP09-_____-000
Exhibit No. HIO-74
Page 2242 of 2431

Table of Contents

us. If the counterparty to such a transaction fails to perform and any collateral that secures our counterparty's obligation is inadequate, we will suffer a loss. A general downturn in the economy and tightening of global credit markets could cause more of our counterparties to fail to perform than we have expected.

Our debt agreements impose restrictions on us that may adversely affect our ability to operate our business.

Certain of our debt agreements contain covenants that restrict or limit, among other things, our ability to create liens supporting indebtedness, sell assets, make certain distributions, and incur additional debt. In addition, our debt agreements contain, and those we enter into in the future may contain, financial covenants and other limitations with which we will need to comply. Our ability to comply with these covenants may be affected by many events beyond our control, and we cannot assure you that our future operating results will be sufficient to comply with the covenants or, in the event of a default under any of our debt agreements, to remedy that default.

Our failure to comply with the covenants in our debt agreements and other related transactional documents could result in events of default. Upon the occurrence of such an event of default, the lenders could elect to declare all amounts outstanding under a particular facility to be immediately due and payable and terminate all commitments, if any, to extend further credit. An event of default or an acceleration under one debt agreement could cause a cross-default or cross-acceleration of another debt agreement. Such a cross-default or cross-acceleration could have a wider impact on our liquidity than might otherwise arise from a default or acceleration of a single debt instrument. If an event of default occurs, or if other debt agreements cross-default, and the lenders under the affected debt agreements accelerate the maturity of any loans or other debt outstanding to us, we may not have sufficient liquidity to repay amounts outstanding under such debt agreements.

Our ability to repay, extend or refinance our existing debt obligations and to obtain future credit will depend primarily on our operating performance, which will be affected by general economic, financial, competitive, legislative, regulatory, business and other factors, many of which are beyond our control. Our ability to refinance existing debt obligations will also depend upon the current conditions in the credit markets and the availability of credit generally. If we are unable to meet its debt service obligations or obtain future credit on favorable terms, if at all, we could be forced to restructure or refinance our indebtedness, seek additional equity capital or sell assets. We may be unable to obtain financing or sell assets on satisfactory terms, or at all.

Our costs and funding obligations for our defined benefit pension plans and costs for our other postretirement benefit plans are affected by factors beyond our control.

We have defined benefit pension plans covering substantially all of our U.S. employees and other postretirement benefit plans covering certain eligible participants. The timing and amount of our funding requirements under the defined benefit pension plans depend upon a number of factors, including changes to pension plan benefits as well as factors outside of our control, such as asset returns, interest rates and changes in pension laws. Changes to these and other factors that can significantly increase our funding requirements could have a significant adverse effect on our financial condition. The amount of expenses recorded for our defined benefit pension plans and other postretirement benefit plans is also dependent on changes in several factors, including market interest rates and the returns on plan assets. Significant changes in any of these factors may adversely impact our future results of operations.

Table of Contents

***The continuation of recent economic conditions, including disruptions in the global credit markets, could adversely affect our results of operations*.**

The slowdown in the economy and the significant disruptions and volatility in global credit markets have the potential to negatively impact our businesses in many ways. Included among these potential negative impacts are reduced demand and lower prices for our products and services, increased difficulty in collecting amounts owed to us by our customers and a reduction in our credit ratings (either due to tighter rating standards or the negative impacts described above), which could result in reducing our access to credit markets, raising the cost of such access or requiring us to provide additional collateral to our counterparties.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs[1]	(d) Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs[2]

1 We announced a stock repurchase program on July 20, 2007. Our board of directors authorized the repurchase of up to $1 billion of the company's common stock. The stock repurchase program had no expiration date.

2 In July 2008, we completed our stock repurchase program by reaching the $1 billion limit authorized by our Board of Directors.

Item 5. Other Information

During the third quarter of 2008, we made responsive filings as required by law with federal antitrust regulators regarding notice we received that Carl C. Icahn and three affiliated entities were seeking statutory pre-clearance to own shares of our common stock in amounts totaling between $442 million and $2.018 billion.

Item 6. Exhibits

The following documents are included as exhibits to this report. Those exhibits below incorporated by reference herein are indicated as such by the information supplied in the parenthetical thereafter. Copies of the document have been included herewith for the exhibits denoted with an asterisk.

TABLE OF CONTENTS

DEFINITIONS

We use the following oil and gas measurements in this report:

Bcfe — means one billion cubic feet of gas equivalent determined using the ratio of one barrel of oil or condensate to six thousand cubic feet of natural gas.

Bcf/d — means one billion cubic feet per day.

British Thermal Unit or BTU — means a unit of energy needed to raise the temperature of one pound of water by one degree Fahrenheit.

BBtud — means one billion BTUs per day.

Dekatherms or Dth or Dt — means a unit of energy equal to one million BTUs.

Mbbls/d — means one thousand barrels per day.

Mcfe — means one thousand cubic feet of gas equivalent using the ratio of one barrel of oil or condensate to six thousand cubic feet of natural gas.

Mdt/d — means one thousand dekatherms per day.

MMcf — means one million cubic feet.

MMcf/d — means one million cubic feet per day.

MMcfe — means one million cubic feet of gas equivalent using the ratio of one barrel of oil or condensate to six thousand cubic feet of natural gas.

MMdt — means one million dekatherms or approximately one trillion BTUs.

MMdt/d — means one million dekatherms per day.

PART I

Item 1. *Business*

In this report, Williams (which includes The Williams Companies, Inc. and, unless the context otherwise requires, all of our subsidiaries) is at times referred to in the first person as "we," "us" or "our." We also sometimes refer to Williams as the "Company."

WEBSITE ACCESS TO REPORTS AND OTHER INFORMATION

We file our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and other documents electronically with the Securities and Exchange Commission (SEC) under the Securities Exchange Act of 1934, as amended (Exchange Act). You may read and copy any materials that we file with the SEC at the SEC's Public Reference Room at 450 Fifth Street, N.W., Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. You may also obtain such reports from the SEC's Internet website at *http://www.sec.gov*.

Our Internet website is *http://www.williams.com.* We make available free of charge on or through our Internet website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Our Corporate Governance Guidelines, Code of Ethics, board committee charters and Code of Business Conduct are also available on our Internet website. We will also provide, free of charge, a copy of any of our corporate documents listed above upon written request to our Secretary at Williams, One Williams Center, Suite 4700, Tulsa, Oklahoma 74172.

GENERAL

We are a natural gas company originally incorporated under the laws of the state of Nevada in 1949 and reincorporated under the laws of the state of Delaware in 1987. We were founded in 1908 when two Williams brothers began a construction company in Fort Smith, Arkansas. Today, we primarily find, produce, gather, process and transport natural gas. Our operations are concentrated in the Pacific Northwest, Rocky Mountains, Gulf Coast, and the Eastern Seaboard.

We continue to use Economic Value Added®(EVA®)[1] as the basis for disciplined decision making around the use of capital. EVA® is a tool that considers both financial earnings and a cost of capital in measuring performance. It is based on the idea that earning profits from an economic perspective requires that a company cover not only all of its operating expenses but also all of its capital costs. The two main components of EVA® are net operating profit after taxes and a charge for the opportunity cost of capital. We derive these amounts by making various adjustments to our reported results and financial position, and by applying a cost of capital. We look for opportunities to improve EVA® because we believe there is a strong correlation between EVA® improvement and creation of shareholder value.

Our goal is to create superior sustainable growth in EVA® and shareholder value. In early 2006, we set some ambitious three-year goals referred to as our game plan for growth. Our success in achieving the game plan for growth contributed to our significant accomplishments in 2007 designed to increase shareholder value, including:

- As a result of the sale of substantially all of our power assets to Bear Energy LP, a unit of The Bear Stearns Companies Inc. (NYSE: BSC) and strong business performance, our credit ratings were raised to investment grade.
- Continuing to increase our natural gas production through organic growth — natural gas production increased by 21 percent for the year.

[1] Economic Value Added® (EVA®) is a registered trademark of Stern, Stewart & Co.

- Initiating a $1 billion stock repurchase program.
- Creating a new pipeline-focused master limited partnership, Williams Pipeline Partners L.P. (WMZ)
- Continuing growing our midstream-focused master limited partnership, Williams Partners L.P. (WPZ), with two significant drop-down transactions.
- Successfully executing rate cases on both of our major pipeline systems, driving increased earnings in Gas Pipeline.

Our principal executive offices are located at One Williams Center, Tulsa, Oklahoma 74172. Our telephone number is 918-573-2000.

2007 HIGHLIGHTS

During third-quarter 2007, we formed Williams Pipeline Partners L.P. (WMZ) to own and operate natural gas transportation and storage assets. In January 2008, WMZ completed its initial public offering of 16.25 million common units at a price of $20.00 per unit. The underwriters also exercised their option to purchase an additional 1.65 million common units at the same price.

In December 2007, Williams Partners L.P. (WPZ) acquired certain of our membership interests in Wamsutter LLC, the limited liability company that owns the Wamsutter system, from us for $750 million.

In December 2007, we repurchased $213 million of 7.125 percent notes due September 2011 and $22 million of 8.125 percent notes due March 2012.

On November 28, 2007, Transcontinental Gas Pipe Line Corporation (Transco) filed a formal stipulation and agreement with the Federal Energy Regulatory Commission (FERC) resolving all substantive issues in Transco's pending 2006 rate case. Final resolution of the rate case is subject to approval by the FERC.

On November 9, 2007, we closed on the sale of substantially all of our power business to Bear Energy, LP, a unit of The Bear Stearns Companies, Inc., for $496 million, subject to post-closing adjustments. The assets sold included tolling contracts, full requirements contracts, tolling resales, heat rate options, related hedges and other related assets including certain property and software. This sale reduces the risk and complexity of our overall business.

In November 2007, our credit ratings were raised to investment grade based on improvements in our credit outlook. As we continue to invest and grow our natural gas businesses, our improved credit rating is expected to provide greater access to capital and more favorable loan terms. See additional discussion of credit ratings in *Management's Discussion and Analysis of Financial Condition*.

In July 2007, our Board of Directors authorized the repurchase of up to $1 billion of our common stock. We intend to purchase shares of our stock from time to time in open-market transactions or through privately negotiated or structured transactions at our discretion, subject to market conditions and other factors. This stock-repurchase program does not have an expiration date. During 2007, we repurchased approximately 16 million shares for $526 million (including transaction costs) at an average cost of $33.08 per share.

In April 2007, our Board of Directors approved a regular quarterly dividend of 10 cents per share, which reflects an increase of 11 percent compared to the 9 cents per share that we paid in each of the four prior quarters and marks the fourth increase in our dividend since late 2004.

On March 30, 2007, the FERC approved the stipulation and settlement agreement with respect to the rate case for Northwest Pipeline GP (Northwest Pipeline), formerly Northwest Pipeline Corporation.

FINANCIAL INFORMATION ABOUT SEGMENTS

See Note 17 of our Notes to Consolidated Financial Statements for information with respect to each segment's revenues, profits or losses and total assets. See Note 9 for information with respect to property, plant and equipment for each segment.

BUSINESS SEGMENTS

Substantially all our operations are conducted through our subsidiaries. To achieve organizational and operating efficiencies, our activities are primarily operated through the following business segments:

- *Exploration & Production* — produces, develops and manages natural gas reserves primarily located in the Rocky Mountain and Mid-Continent regions of the United States and is comprised of several wholly owned and partially owned subsidiaries including Williams Production Company LLC and Williams Production RMT Company.
- *Gas Pipeline* — includes our interstate natural gas pipelines and pipeline joint venture investments organized under our wholly owned subsidiary, Williams Gas Pipeline Company, LLC. Gas Pipeline also includes WMZ, our master limited partnership formed in 2007.
- *Midstream Gas & Liquids* — includes our natural gas gathering, treating and processing business and is comprised of several wholly owned and partially owned subsidiaries including Williams Field Services Group LLC and Williams Natural Gas Liquids, Inc. Midstream also includes WPZ, our master limited partnership formed in 2005.
- *Gas Marketing Services*— manages our natural gas commodity risk through purchases, sales and other related transactions, under our wholly owned subsidiary Williams Gas Marketing, Inc.
- *Other* — primarily consists of corporate operations. Other also includes our interest in Longhorn Partners Pipeline, L.P. (Longhorn).

This report is organized to reflect this structure.

Detailed discussion of each of our business segments follows.

Exploration & Production

Our Exploration & Production segment, which is comprised of several wholly owned and partially owned subsidiaries, including Williams Production Company LLC and Williams Production RMT Company (RMT), produces, develops, and manages natural gas reserves primarily located in the Rocky Mountain (primarily New Mexico, Wyoming and Colorado) and Mid-Continent (Oklahoma and Texas) regions of the United States. We specialize in natural gas production from tight-sands and shale formations and coal bed methane reserves in the Piceance, San Juan, Powder River, Arkoma, Green River and Fort Worth basins. Over 99 percent of Exploration & Production's domestic reserves are natural gas. Our Exploration & Production segment also has international oil and gas interests, which include a 69 percent equity interest in Apco Argentina Inc. (Apco Argentina), an oil and gas exploration and production company with operations in Argentina, and a four percent equity interest in Petrowayu S.A., a Venezuelan corporation that is the operator of a 100 percent interest in the La Concepcion block located in Western Venezuela.

Exploration & Production's primary strategy is to utilize its expertise in the development of tight-sands, shale, and coal bed methane reserves. Exploration & Production's current proved undeveloped and probable reserves provide us with strong capital investment opportunities for several years into the future. Exploration & Production's goal is to drill its existing proved undeveloped reserves, which comprise approximately 46 percent of proved reserves and to drill in areas of probable reserves. In addition, Exploration & Production provides a significant amount of equity production that is gathered and/or processed by our Midstream facilities in the San Juan basin.

Information for our Exploration & Production segment relates only to domestic activity unless otherwise noted. We use the terms "gross" to refer to all wells or acreage in which we have at least a partial working interest and "net" to refer to our ownership represented by that working interest.

Table of Contents

Gas reserves and wells

The following table summarizes our U.S. natural gas reserves as of December 31 (using market prices on December 31 held constant) for the year indicated:

	2007	2006	2005
		(Bcfe)	
Proved developed natural gas reserves	2,252	1,945	1,643
Proved undeveloped natural gas reserves	1,891	1,756	1,739
Total proved natural gas reserves	4,143	3,701	3,382

No major discovery or other favorable or adverse event has caused a significant change in estimated gas reserves since year-end 2007. We have not filed on a recurring basis estimates of our total proved net oil and gas reserves with any U.S. regulatory authority or agency other than the Department of Energy (DOE) and the SEC. The estimates furnished to the DOE have been consistent with those furnished to the SEC, although Exploration & Production has not yet filed any information with respect to its estimated total reserves at December 31, 2007, with the DOE. Certain estimates filed with the DOE may not necessarily be directly comparable due to special DOE reporting requirements, such as the requirement to report gross operated reserves only. In 2006 and 2005 the underlying estimated reserves for the DOE did not differ by more than five percent from the underlying estimated reserves utilized in preparing the estimated reserves reported to the SEC.

Approximately 98 percent of our year-end 2007 United States proved reserves estimates were audited in each separate basin by Netherland, Sewell & Associates, Inc. (NSAI). When compared on a well-by-well basis, some of our estimates are greater and some are less than the estimates of NSAI. However, in the opinion of NSAI, the estimates of our proved reserves are in the aggregate reasonable by basin and have been prepared in accordance with generally accepted petroleum engineering and evaluation principles. These principles are set forth in the Standards Pertaining to the Estimating and Auditing of Oil and Gas Reserve Information promulgated by the Society of Petroleum Engineers. NSAI is satisfied with our methods and procedures in preparing the December 31, 2007 reserve estimates and saw nothing of an unusual nature that would cause NSAI to take exception with the estimates, in the aggregate, as prepared by us. Reserve estimates related to properties underlying the Williams Coal Seam Gas Royalty Trust, which comprise approximately two percent of our total U.S. proved reserves, were prepared by Miller and Lents, LTD.

On December 12, 2007, the SEC issued a "Concept Release" to obtain information about the extent and nature of the public's interest in revising oil and gas reserves disclosure requirements which exist in their current form in Regulation S-K and Regulation S-X under the Securities Act of 1933 and the Securities Exchange Act of 1934. The Commission adopted the current oil and gas reserves disclosure requirement between 1978 and 1982. The Concept Release is intended to address significant changes in the oil and gas industry. Some commentators have expressed concern that the Commission's rules have not adapted to current practices and may not provide investors with the most useful picture of oil and gas reserves public companies hold. Comments were due to the Commission on February 19, 2008. At this time it is not possible to determine what effect changes the SEC may make, if any, will have on our reserve estimates and disclosures.

Table of Contents

Oil and gas properties and reserves by basin

The table below summarizes 2007 activity and reserves for each of our areas, with further discussion following the table.

	Wells Drilled (Gross)	Wells Drilled (Operated)	Wells Producing (Gross)	Wells Producing (Net)	Wellhead Production (Net Bcfe)	Proved Reserves (Bcfe)	% of Total Proved Reserves
Piceance	574	544	2,467	2,295	197	2,847	69%
San Juan	146	47	3,109	821	55	576	14%
Powder River	637	457	4,831	2,200	62	413	10%
Mid-Continent	80	63	539	339	17	184	4%
Other	153	1	454	18	3	123	3%
Total	1,590	1,112	11,400	5,673	334	4,143	100%

Piceance basin

The Piceance basin is located in northwestern Colorado and is our largest area of concentrated development. During 2007 we operated an average of 25 drilling rigs in the basin. As of December 2007, 14 of these rigs were the new high efficiency rigs designed to drill up to 22 wells from one location. This area has approximately 1,760 undrilled proved locations in inventory. Within this basin we own and operate natural gas gathering facilities including some 280 miles of gathering lines and associated field compression. Approximately 88% of the gas gathered is our own equity production. The gathering system also includes six processing plants and associated treating facilities with a total capacity of 900,000 Mcfd. During 2007, these plants recovered approximately 54 million gallons of natural gas liquids (NGL's) which were marketed separately from the residue natural gas.

San Juan basin

The San Juan basin is located in northwest New Mexico and southwest Colorado.

Powder River basin

The Powder River basin is located in northeast Wyoming. The Powder River basin includes large areas with multiple coal seam potential, targeting thick coal bed methane formations at shallow depths. We have a significant inventory of undrilled locations, providing long-term drilling opportunities.

Mid-Continent properties

The Mid-Continent properties are located in the southeastern Oklahoma portion of the Arkoma basin and the Barnett Shale in the Fort Worth basin of Texas.

Other properties

Other properties are primarily comprised of interests in the Green River basin in southwestern Wyoming. Also included is exploration activity and other miscellaneous activity.

The following table summarizes our leased acreage as of December 31, 2007:

	Gross Acres	Net Acres
Developed	873,923	447,820
Undeveloped	1,211,865	627,393

Table of Contents

Operating statistics

We focus on lower-risk development drilling. Our drilling success rate was 99 percent in 2007, 2006 and 2005. The following tables summarize domestic drilling activity by number and type of well for the periods indicated:

Number of Wells	Gross Wells	Net Wells
Development:		
Drilled		
2007	1,590	904
2006	1,783	954
2005	1,627	867
Successful		
2007	1,581	899
2006	1,770	948
2005	1,615	859

Because we currently have a low-risk drilling program in proven basins, the main component of risk that we manage is price risk. In February 2007, we entered into a five-year unsecured credit agreement with certain banks in order to reduce margin requirements related to our hedging activities as well as lower transaction fees. Margin requirements, if any, under this new facility are dependent on the level of hedging with the banks and on natural gas reserves value. Exploration & Production natural gas hedges for 2008 domestic natural gas production consist of NYMEX fixed price contracts of 70 MMcf/d (whole year) and approximately 397 MMcf/d in regional collars (whole year). Our natural gas production hedges in 2007 consisted of 172 MMcf/d in NYMEX fixed price hedges and an additional 271 MMcf/d in NYMEX and basin level collars. A collar is an option contract that sets a gas price floor and ceiling for a certain volume of natural gas. Hedging decisions are made considering the overall Williams commodity risk exposure and are not executed independently by Exploration & Production; there are expected future gas purchases for other Williams entities which when taken as a net position may offset price risk related to Exploration & Production's expected future gas sales.

The following table summarizes our domestic sales and cost information for the years indicated:

	2007	2006	2005
Total net production sold (in Bcfe)	333.1	274.4	223.5
Average production costs including production taxes per thousand cubic feet of gas equivalent (Mcfe) produced	$ 0.98	$ 1.02	$ .92
Average sales price per Mcfe	$ 4.92	$ 5.24	$ 6.41
Realized impact of hedging contracts (Loss)	$ 0.16	$ (0.73)	$ (1.61)

Acquisitions & divestitures

Through transactions totaling approximately $77 million, Exploration & Production expanded its acreage position and purchased producing properties in the Fort Worth basin in north-central Texas and also expanded its acreage position in the Highlands area of the Piceance basin.

In January 2008, we sold a contractual right to a production payment on certain future international hydrocarbon production in Peru for approximately $148 million. We have received $118 million in cash and $29 million has been placed in escrow subject to certain post-closing conditions and adjustments. We will recognize a pre-tax gain of approximately $118 million in the first quarter of 2008 related to the initial cash received. As a result of the contract termination, we have no further interests associated with the crude oil concession. We had obtained these interests through our acquisition of Barrett Resources Corporation in 2001.

Other information

In 1993, Exploration & Production conveyed a net profits interest in certain of its properties to the Williams Coal Seam Gas Royalty Trust. Substantially all of the production attributable to the properties conveyed to the trust was from the Fruitland coal formation and constituted coal seam gas. We subsequently sold trust units to the public in an underwritten public offering and retained 3,568,791 trust units then representing 36.8 percent of outstanding trust units. We have previously sold trust units on the open market, with our last sales in June 2005. As of February 1, 2008, we own 789,291 trust units.

International exploration and production interests

We also have investments in international oil and gas interests. If combined with our domestic proved reserves, our international interests would make up approximately 3.6 percent of our total proved reserves.

Gas Pipeline

We own and operate, through Williams Gas Pipeline Company, LLC (WMZ) and its subsidiaries, a combined total of approximately 14,200 miles of pipelines with a total annual throughput of approximately 2,700 trillion British Thermal Units of natural gas and peak-day delivery capacity of approximately 12 MMdt of gas. Gas Pipeline consists of Transcontinental Gas Pipe Line Corporation and Northwest Pipeline GP. Gas Pipeline also holds interests in joint venture interstate and intrastate natural gas pipeline systems including a 50 percent interest in Gulfstream Natural Gas System, L.L.C. Gas Pipeline also includes our new master limited partnership, Williams Pipeline Partners, L.P.

Transcontinental Gas Pipe Line Corporation (Transco)

Transco is an interstate natural gas transportation company that owns and operates a 10,300-mile natural gas pipeline system extending from Texas, Louisiana, Mississippi and the offshore Gulf of Mexico through Alabama, Georgia, South Carolina, North Carolina, Virginia, Maryland, Pennsylvania, and New Jersey to the New York City metropolitan area. The system serves customers in Texas and 11 southeast and Atlantic seaboard states, including major metropolitan areas in Georgia, North Carolina, New York, New Jersey, and Pennsylvania.

Pipeline system and customers

At December 31, 2007, Transco's system had a mainline delivery capacity of approximately 4.7 MMdt of natural gas per day from its production areas to its primary markets. Using its Leidy Line along with market-area storage and transportation capacity, Transco can deliver an additional 3.7 MMdt of natural gas per day for a system-wide delivery capacity total of approximately 8.4 MMdt of natural gas per day. Transco's system includes 45 compressor stations, five underground storage fields, two liquefied natural gas (LNG) storage facilities. Compression facilities at a sea level-rated capacity total approximately 1.5 million horsepower.

Transco's major natural gas transportation customers are public utilities and municipalities that provide service to residential, commercial, industrial and electric generation end users. Shippers on Transco's system include public utilities, municipalities, intrastate pipelines, direct industrial users, electrical generators, gas marketers and producers. One customer accounted for approximately 12 percent of Transco's total revenues in 2007. Transco's firm transportation agreements are generally long-term agreements with various expiration dates and account for the major portion of Transco's business. Additionally, Transco offers storage services and interruptible transportation services under short-term agreements.

Transco has natural gas storage capacity in five underground storage fields located on or near its pipeline system or market areas and operates three of these storage fields. Transco also has storage capacity in an LNG storage facility and operates the facility. The total usable gas storage capacity available to Transco and its customers in such underground storage fields and LNG storage facility and through storage service contracts is approximately 216 billion cubic feet of gas. In addition, wholly owned subsidiaries of Transco operate and hold a 35 percent ownership interest in Pine Needle LNG Company, LLC, an LNG storage facility with 4 billion cubic feet of storage capacity. Storage capacity permits Transco's customers to inject gas into storage during the summer and off-peak periods for delivery during peak winter demand periods.

Transco expansion projects

The pipeline projects listed below were completed during 2007 or are future pipeline projects for which we have customer commitments.

Potomac Expansion Project

In November 2007, we placed into service the Potomac Expansion Project, an expansion of our existing natural gas transmission system from receipt points in North Carolina to delivery points in the greater Baltimore and Washington, D.C. metropolitan areas. The second phase of the project involving installation of certain appurtenant facilities will be completed in fall 2008. The capital cost of the project is estimated to be approximately $88 million.

Leidy to Long Island Expansion Project

In December 2007, we placed into service the Leidy to Long Island Expansion Project, an expansion of our existing natural gas transmission system in Zone 6 from the Leidy Hub in Pennsylvania to Long Island, New York. The capital cost of the project is estimated to be approximately $169 million.

Sentinel Expansion Project

The Sentinel Expansion Project will involve an expansion of our existing natural gas transmission system from the Leidy Hub in Clinton County, Pennsylvania and from the Pleasant Valley interconnection with Cove Point LNG in Fairfax County, Virginia to various delivery points requested by the shippers under the project. The capital cost of the project is estimated to be up to approximately $169 million. Transco plans to place the project into service in phases, in late 2008 and late 2009.

Pascagoula Expansion Project

The Pascagoula Expansion Project will involve the construction of a new pipeline to be jointly owned with Florida Gas Transmission connecting Transco's existing Mobile Bay Lateral to the outlet pipeline of a proposed liquefied natural gas import terminal in Mississippi. Transco's share of the estimated capital cost of the project is up to $37 million. Transco plans to place the project into service in mid-2011.

Operating statistics

The following table summarizes transportation data for the Transco system for the periods indicated:

	2007	2006	2005
	(In trillion British Thermal Units)		
Market-area deliveries:			
Long-haul transportation	839	795	755
Market-area transportation	875	817	853
Total market-area deliveries	1,714	1,612	1,608
Production-area transportation	190	247	278
Total system deliveries	1,904	1,859	1,886
Average Daily Transportation Volumes	5.2	5.1	5.2
Average Daily Firm Reserved Capacity	6.6	6.6	6.6

Transco's facilities are divided into eight rate zones. Five are located in the production area, and three are located in the market area. Long-haul transportation involves gas that Transco receives in one of the production-area zones and delivers to a market-area zone. Market-area transportation involves gas that Transco both receives and delivers within the market-area zones. Production-area transportation involves gas that Transco both receives and delivers within the production-area zones.

Northwest Pipeline GP (Northwest Pipeline)

Northwest Pipeline is an interstate natural gas transportation company that owns and operates a natural gas pipeline system extending from the San Juan basin in northwestern New Mexico and southwestern Colorado through Colorado, Utah, Wyoming, Idaho, Oregon and Washington to a point on the Canadian border near Sumas, Washington. Northwest Pipeline provides services for markets in California, Arizona, New Mexico, Colorado, Utah, Nevada, Wyoming, Idaho, Oregon and Washington directly or indirectly through interconnections with other pipelines.

Pipeline system and customers

At December 31, 2007, Northwest Pipeline's system, having long-term firm transportation agreements with peaking capacity of approximately 3.4 MMdt of natural gas per day, was composed of approximately 3,900 miles of mainline and lateral transmission pipelines and 41 transmission compressor stations having a combined sea level-rated capacity of approximately 473,000 horsepower.

Northwest implemented new rates effective January 1, 2007 that were approved by FERC. The rate case settlement established that general system firm transportation rates on Northwest's system increased from $0.30760 to $0.40984 per Dth.

In 2007, Northwest Pipeline served a total of 132 transportation and storage customers. Transportation customers include distribution companies, municipalities, interstate and intrastate pipelines, gas marketers and direct industrial users. The two largest customers of Northwest Pipeline in 2007 accounted for approximately 20 percent and 11.5 percent, of its total operating revenues. No other customer accounted for more than 10 percent of Northwest Pipeline's total operating revenues in 2007. Northwest Pipeline's firm transportation agreements are generally long-term agreements with various expiration dates and account for the major portion of Northwest Pipeline's business. Additionally, Northwest Pipeline offers interruptible and short-term firm transportation service.

As a part of its transportation services, Northwest Pipeline utilizes underground storage facilities in Utah and Washington enabling it to balance daily receipts and deliveries. Northwest Pipeline also owns and operates an LNG storage facility in Washington that provides service for customers during a few days of extreme demands. These storage facilities have an aggregate firm delivery capacity of approximately 600 million cubic feet of gas per day.

Northwest Pipeline expansion projects

The pipeline projects listed below were completed during 2007 or are future pipeline projects for which we have customer commitments.

Jackson Prairie Underground Expansion

The Jackson Prairie Storage Project, connected to Northwest's transmission system near Chehalis, Washington, is operated by Puget Sound Energy and is jointly owned by Northwest, Puget Sound Energy and Avista Corporation. A phased capacity expansion is currently underway and a deliverability expansion is planned for 2008. Northwest's one-third interest in the project includes 104 MMcf per day of planned 2008 deliverability expansion and approximately 1.2 Bcf of working natural gas storage capacity to be developed over approximately a four year period from 2007 through 2010. Northwest's one-third share of the cost of the deliverability expansion is estimated to be $16 million. Northwest's estimated capital cost for the capacity expansion component of the new storage service is $6.1 million, primarily for base natural gas.

Colorado Hub Connection Project

Northwest has proposed installing a new lateral to connect the White River Hub near Meeker, Colorado to Northwest's mainline near Sand Springs, Colorado. This project is referred to as the Colorado Hub

Connection, or CHC Project. It is estimated that the construction of the CHC Project would cost up to $53 million and could begin service as early as November 2009.

Parachute Lateral

Northwest placed its Parachute Lateral facilities in service on May 16, 2007, and began collecting revenues of approximately $0.87 million per month. The expansion increased capacity by 450 Mdt/d at a cost of approximately $86 million.

On August 24, 2007, Northwest filed an application with FERC to amend its certificate of public convenience and necessity issued for the Parachute Lateral to allow the transfer of the ownership of its Parachute Lateral facilities to a newly created entity, Parachute Pipeline LLC (Parachute), which is owned by Midstream through one of its wholly-owned subsidiaries Williams Field Services Company, LLC (Williams Field Services). This application was approved by FERC on November 15, 2007, and Northwest sold the Parachute on December 31, 2007. The Parachute Lateral facilities are located in Rio Blanco and Garfield counties, Colorado.

As contemplated in the application for amendment, Parachute has leased the facilities back to Northwest, and as a result of the sale has become a Midstream subsidiary. Northwest will continue to operate the facilities under the FERC certificate. When Midstream completes its Willow Creek Processing Plant, the lease (subject to further regulatory approval) will terminate, and Parachute will assume full operational control and responsibility for the Parachute Lateral.

Operating statistics

The following table summarizes volume and capacity data for the Northwest Pipeline system for the periods indicated:

	2007	2006	2005
	(In trillion British Thermal Units)		
Total Transportation Volume	757	676	673
Average Daily Transportation Volumes	2.1	1.9	1.8
Average Daily Reserved Capacity Under Long-Term Base Firm Contracts, excluding peak capacity	2.5	2.5	2.5
Average Daily Reserved Capacity Under Short-Term Firm Contracts(1)	.8	.9	.8

(1) Consists primarily of additional capacity created from time to time through the installation of new receipt or delivery points or the segmentation of existing mainline capacity. Such capacity is generally marketed on a short-term firm basis, because it does not involve the construction of additional mainline capacity.

Gulfstream Natural Gas System, L.L.C. (Gulfstream)

Gulfstream is a natural gas pipeline system extending from the Mobile Bay area in Alabama to markets in Florida. Gas Pipeline and Spectra Energy (formerly known as Duke Energy), through their respective subsidiaries, each holds a 50 percent ownership interest in Gulfstream and provides operating services for Gulfstream. At December 31, 2007, our equity investment in Gulfstream was $439 million.

Gulfstream expansion projects

Gulfstream has entered into a precedent agreement and a related firm transportation service agreement pursuant to which, subject to the receipt of all necessary regulatory approvals and other conditions precedent therein, Gulfstream intends to extend the pipeline system into South Florida and fully subscribe the remaining 345 Mdt/d of firm capacity on the existing pipeline system on a long-term basis. The estimated capital cost of this project is anticipated to be up to approximately $130 million, with Gas Pipeline's share being 50 percent of such costs. Gulfstream also has executed a precedent agreement and a related firm transportation service agreement pursuant to which, subject to the receipt of all necessary regulatory approvals and other conditions precedent therein, it intends to construct and fully subscribe on a long-term basis the first incremental expansion of

Gulfstream's mainline capacity, increasing the current mainline capacity of 1.1 MMdt/d to 1.255 MMdt/d. The estimated capital cost of this expansion is anticipated to be up to approximately $153 million, with Gas Pipeline's share being 50 percent of such costs. No significant increase in operations personnel is expected as a result of these two projects.

Williams Pipeline Partners L.P

WMZ was formed to own and operate natural gas transportation and storage assets. We currently own approximately 45.7 percent limited partnership interest and a 2 percent general partner interest in WMZ. WMZ provides us with lower cost of capital that is expected to enable growth of our Gas Pipeline business. WMZ also creates a vehicle to monetize our qualifying assets. Such transactions, which are subject to approval by the boards of directors of Williams and WMZ's general partner, allow us to retain control of the assets through our ownership interest in WMZ. A subsidiary of ours serves as the general partner of WMZ. The initial asset of WMZ is a 35 percent interest in Northwest Pipeline.

Midstream Gas & Liquids

Our Midstream segment, one of the nation's largest natural gas gatherers and processors, has primary service areas concentrated in the major producing basins in Colorado, New Mexico, Wyoming, the Gulf of Mexico, Venezuela and western Canada. Midstream's primary businesses — natural gas gathering, treating, and processing; NGL fractionation, storage and transportation; and oil transportation — fall within the middle of the process of taking natural gas and crude oil from the wellhead to the consumer. NGLs, ethylene and propylene are extracted/produced at our plants, including our Canadian and Gulf Coast olefins plants. These products are used primarily for the manufacture of plastics, home heating and refinery feedstock.

Although most of our gas services are performed for a volumetric-based fee, a portion of our gas processing contracts are commodity-based and include two distinct types of commodity exposure. The first type includes "Keep Whole" processing contracts whereby we own the rights to the value from NGLs recovered at our plants and have the obligation to replace the lost heating value with natural gas. Under these contracts, we are exposed to the spread between NGLs and natural gas prices. The second type consists of "Percent of Liquids" contracts whereby we receive a portion of the extracted liquids with no direct exposure to the price of natural gas. Under these contracts, we are only exposed to NGL price movements.

Our Canadian and Gulf Liquids olefin facilities have commodity price exposure. In Canada, we are exposed to the spread between the price for natural gas and the olefinic products we produce. In the Gulf Coast, our feedstock for the ethane cracker is ethane and propane; as a result, we are exposed to the price spread between ethane and propane and ethylene and propylene. In the Gulf Coast, we also purchase refinery grade propylene and fractionate it into polymer grade propylene and propane; as a result we are exposed to the price spread between those commodities.

Key variables for our business will continue to be:

- retaining and attracting customers by continuing to provide reliable services;
- revenue growth associated with additional infrastructure either completed or currently under construction;
- disciplined growth in our core service areas;
- prices impacting our commodity-based processing and olefin activities.

Gathering and processing

We own and/or operate domestic gas gathering and processing assets primarily within the western states of Wyoming, Colorado and New Mexico, and the onshore and offshore shelf and deepwater areas in and around the Gulf Coast states of Texas, Louisiana, Mississippi and Alabama. These assets consist of approximately 8,700 miles of gathering pipelines, nine processing plants (one partially owned) and five natural gas treating plants with a combined daily inlet capacity of nearly 6.5 billion cubic feet per day. Some of these assets are owned through our interest in WPZ (see William Partners L.P. section below).

Geographically, our Midstream natural gas assets are positioned to maximize commercial and operational synergies with our other assets. For example, most of our offshore gathering and processing assets attach and process or condition natural gas supplies delivered to the Transco pipeline. Also, our gathering and processing facilities in the San Juan Basin handle about 85 percent of our Exploration & Production group's wellhead production in this basin. Both our San Juan Basin and Southwest Wyoming systems deliver gas volumes into Northwest Pipeline's interstate system in addition to third party interstate systems.

Included in the natural gas assets listed above are the assets of Discovery Producer Services LLC and its subsidiary Discovery Gas Transmission Services LLC (Discovery). WPZ owns a partial interest in Discovery and we operate its facilities. Discovery's assets include a cryogenic natural gas processing plant near Larose, Louisiana, a natural gas liquids fractionator plant near Paradis, Louisiana and an offshore natural gas gathering and transportation system in the Gulf of Mexico.

In addition to these natural gas assets, we own and operate three crude oil pipelines totaling approximately 310 miles with a capacity of more than 300,000 barrels per day. This includes our Mountaineer, Alpine and BANJO crude oil pipeline systems in the deepwater Gulf of Mexico.

The BANJO oil pipeline and Seahawk gas pipeline run parallel and deliver production across two producer-owned spar-type floating production systems from the Anadarko Petroleum Corporation (Anadarko) operated Boomvang and Nansen field areas in the western Gulf of Mexico. These pipelines were placed in service in 2002.

Our 18 inch oil pipeline, Alpine, which became operational in 2003, is our second western gulf crude oil pipeline. The pipeline extends 96 miles from Garden Banks Block 668 in the central Gulf of Mexico to our shallow-water platform at Galveston Area Block A244. From this platform, the oil is delivered onshore through ExxonMobil's Hoover Offshore Oil Pipeline System under a joint tariff agreement. This production is coming from the Gunnison field, which is located in 3,150 feet of water and operated by Anadarko.

Our Devils Tower floating production system and associated pipelines were placed in service in 2004. Initially built to serve the Devils Tower field, the floating production system is located in Mississippi Canyon Block 773, approximately 150 miles south-southwest of Mobile, Alabama. During the fourth quarter of 2005, the platform's service expanded to include tie-backs of production from the Triton and Goldfinger fields in addition to the host Devils Tower field. Construction is currently underway to add topside capacity for the recently dedicated Bass Lite gas discovery. Full field production from Bass Lite is expected mid-year 2008. Located in 5,610 feet of water, it is the world's deepest dry tree spar. The platform, which is operated by ENI Petroleum on our behalf, is capable of producing 60 MMcf/d of natural gas and 60 Mbbls/d of oil.

The Devils Tower project includes gas and oil pipelines. The 139-mile Canyon Chief gas pipeline consists of 18-inch diameter pipe. The 155-mile Mountaineer oil pipeline is a combination of 18- and 20-inch diameter pipe. The gas is delivered into Transco's pipeline, and processed at our Mobile Bay plant to recover the NGLs. The oil is transported to ChevronTexaco's Empire Terminal in Plaquemines Parish, Louisiana. These associated pipelines are significantly oversized relative to the Devils Tower spar top-side capacity.

Gulf Coast petrochemical and olefins

We own a 10/12 interest in and are the operator for an ethane cracker at Geismar, Louisiana, with a total production capacity of 1.3 billion pounds per year of ethylene. In July 2007, we exercised our right of first refusal to acquire BASF's 5/12th ownership interest in the Geismar olefins facility bringing our ownership position up to the current 10/12 interest. We also own an ethane pipeline system and a propylene splitter and its related pipeline system in Louisiana.

Canada

Our Canadian operations include an olefin liquids extraction plant located near Ft. McMurray, Alberta and an olefin fractionation facility near Edmonton, Alberta. Our facilities extract olefinic liquids from the off-gas produced from third party oil sands bitumen upgrading and then fractionate, treat, store, terminal and sell the propane, propylene, butane and condensate recovered from this process. We continue to be the only olefins fractionator in Western Canada and the only treater-processor of oil sands upgrader off-gas. These operations extract valuable petrochemical feedstocks from upgrader off-gas streams allowing the upgraders to burn cleaner natural gas streams and reduce overall air emissions. The extraction plant has processing capacity in excess of 100 MMcf/d with the ability to recover in excess of 15 Mbbls/d of olefin and NGL products.

Venezuela

Our Venezuelan investments involve gas compression and gas processing and natural gas liquids fractionation operations. We own controlling interests and operate three gas compressor facilities which provide roughly 70 percent of the gas injections in eastern Venezuela. These facilities help stabilize the reservoir and enhance the recovery of crude oil by re-injecting natural gas at high pressures. We also own a 49.25 percent interest in two 400 MMcf/d natural gas liquids extraction plants, a 50,000 barrels per day natural gas liquids fractionation plant and associated storage and refrigeration facilities.

Other

We own interests in and/or operate NGL fractionation and storage assets. These assets include two partially owned NGL fractionation facilities near Conway, Kansas and Baton Rouge, Louisiana that have a combined capacity in excess of 167,000 barrels per day. We also own approximately 20 million barrels of NGL storage capacity in central Kansas. Some of these assets are owned through our interest in WPZ.

We also own a 14.6% interest in Aux Sable Liquid Products and its Channahon, Illinois gas processing and NGL fractionation facility near Chicago. The facility is capable of processing up to 2.1 Bcf/d of natural gas from the Alliance Pipeline system and fractionating approximately 87,000 barrels per day of extracted liquids into NGL products.

Williams Partners L.P (WPZ)

WPZ was formed to engage in the business of gathering, transporting and processing natural gas and fractionating and storing NGLs. We currently own approximately a 21.6 percent limited partnership interest and a 2 percent general partner interest in WPZ. WPZ provides us with lower cost of capital that is expected to enable growth of our Midstream business. WPZ also creates a vehicle to monetize our qualifying assets. Such transactions, which are subject to approval by the boards of directors of both Williams and WPZ’s general partner, allow us to retain control of the assets through our ownership interest in WPZ.

WPZ’s asset portfolio at its initial public offering in 2005 consisted of a 40 percent interest in Discovery, the Carbonate Trend gathering pipeline, three integrated NGL storage facilities near Conway, Kansas and a 50 percent interest in an NGL fractionator near Conway, Kansas.

During 2006, WPZ acquired Williams Four Corners, LLC which owns a 3,500-mile natural gas gathering system in the San Juan Basin in New Mexico and Colorado with capacity of nearly 2 Bcf/d; the Ignacio natural gas processing plant in Colorado and the Kutz and Lybrook natural gas processing plants in New Mexico, which have a combined processing capacity of 760 MMcf/d; and the Milagro and Esperanza natural gas treating plants in New Mexico, which are designed to remove carbon dioxide from up to 750 MMcf of natural gas per day.

In June 2007, WPZ acquired an additional 20 percent interest in Discovery. WPZ now owns a 60 percent interest in the Discovery gathering, transportation, processing and NGL fractionation system, the remainder of which is owned by third parties.

In December 2007, WPZ acquired certain ownership interests in Wamsutter LLC from us for $750 million. Wamsutter LLC owns a 1,700 mile natural gas gathering system in the Washakie Basin in south-central Wyoming and the Echo Springs natural gas processing plant in Sweetwater County, Wyoming.

Expansion projects

Gathering and processing — west

During the first quarter of 2007, we completed construction at our existing gas processing complex located near Opal, Wyoming, to add a fifth cryogenic gas processing train capable of processing up to 350 MMcf/d, bringing total Opal capacity to approximately 1.5 Bcf/d. This plant expansion increased Opal's processing capacity by more than 30 percent and became operational during the first quarter.

In the first quarter of 2007, we also announced plans to construct and operate the Willow Creek facility a 450 MMcf/d natural gas processing plant in the Piceance Basin of western Colorado, where Exploration and Production has its most significant volume of natural gas production, reserves and development activity. Exploration and Production's existing Piceance Basin processing plants are primarily designed to condition the natural gas to meet quality specifications for pipeline transmission, not to maximize the extraction of NGLs. We expect the new Willow Creek facility to recover 25,000 barrels per day of NGLs at startup, which is expected to be in the third quarter of 2009.

In December 2007, Midstream purchased the Parachute Lateral system from Gas Pipeline. The system is a 37.6-mile expansion, originally placed in service by Gas Pipelines in May 2007, and provides capacity of 450 Mdt/d through a 30-inch diameter line, transporting residue gas from the Piceance basin to the Greasewood Hub in northwest Colorado. The Willow Creek facility will straddle the Parachute Lateral pipeline and will process gas flowing through the pipeline. In an arrangement approved by the FERC, Midstream will lease the pipeline to Gas Pipeline, who will continue to operate the pipeline until completion of a planned FERC abandonment filing.

In addition, Midstream acquired an existing natural gas pipeline from Gas Pipeline, and has begun the process of converting it from natural gas to NGL service and constructing additional pipeline to create a pipeline alternative for NGLs currently being transported by truck from Exploration & Production's existing Piceance basin processing plants to a major NGL transportation pipeline system.

In 2006, we entered into an agreement to develop new pipeline capacity for transporting NGLs from production areas in southwestern Wyoming to central Kansas. The other party to the agreement reimbursed us for the development costs we had incurred for the proposed pipeline and acquired 99 percent of the pipeline, known as Overland Pass Pipeline Company, LLC. We retained a 1 percent interest and have the option to increase our ownership to 50 percent and become the operator within two years of the pipeline becoming operational. Start-up is planned for mid-2008. Additionally, we have agreed to dedicate our equity NGL volumes from our two Wyoming plants and the new Willow Creek facility for transport under a long-term shipping agreement. The terms represent significant savings compared with the existing tariff and other alternatives considered.

Gathering and processing — deepwater projects

The deepwater Gulf continues to be an attractive growth area for our Midstream business. Since 1997, we have invested almost $1.3 billion in new midstream assets in the Gulf of Mexico. These facilities provide both onshore and offshore services through pipelines, platforms and processing plants. The new facilities could also attract incremental gas volumes to Transco's pipeline system in the southeastern United States.

During 2007, we have continued construction activities on the Perdido Norte project which includes oil and gas lines that would expand the scale of our existing infrastructure in the western deepwater of the Gulf of Mexico. In addition, we completed agreements with certain producers to provide gathering, processing and transportation services over the life of the reserves. We also intend to expand our onshore Markham gas processing facility to adequately serve this new gas production. The scale of the project has increased to include additional pipeline and more efficient processing capacity and is now estimated to cost approximately $560 million and to be in service in the third quarter of 2009.

Chevron and Anadarko are dedicating to us the transport of production from their current and future ownership in a defined area surrounding the Blind Faith discovery in the deepwater Gulf of Mexico. To accommodate production from the Blind Faith acreage and the surrounding blocks, we have agreed to extend our Canyon Chief and Mountaineer pipelines to the producer-owned floating production facility. We expect to have the extensions ready for service in the second quarter of 2008. The approximately $250 million project will facilitate a 37-mile extension of each pipeline. The agreement also creates opportunities for us to move natural gas from the Blind Faith discovery through our Mobile Bay, Alabama, processing plant and our Transco and Gulfstream interstate pipeline systems. Recovered NGLs from Blind Faith also could be fractionated at our facilities in Baton Rouge or Paradis, Louisiana.

Customers and operations

Our domestic gas gathering and processing customers are generally natural gas producers who have proved and/or producing natural gas fields in the areas surrounding our infrastructure. During 2007, these operations gathered and processed gas for approximately 215 gas gathering and processing customers. Our top three gathering and processing customers accounted for about 45 percent of our domestic gathering and processing revenue. Our gathering and processing agreements are generally long-term agreements.

In addition to our gathering and processing operations, we market NGLs and petrochemical products to a wide range of users in the energy and petrochemical industries. We provide these products to third parties from the production at our domestic facilities. The majority of domestic sales are based on supply contracts of less than one year in duration. The production from our Canadian facilities is marketed in Canada and in the United States.

Our Venezuelan assets were constructed and are currently operated for the exclusive benefit of Petróleos de Venezuela S.A under long-term contracts. These significant contracts have a remaining term between 10 and 14 years and our revenues are based on a combination of fixed capital payments, throughput volumes, and, in the case of one of the gas compression facilities, a minimum throughput guarantee. The Venezuelan government has continued its public criticism of U.S. economic and political policy, has implemented unilateral changes to existing energy related contracts, and continues to publicly declare that additional energy contracts will be unilaterally amended and privately held assets will be expropriated, escalating our concern regarding political risk in Venezuela.

Operating statistics

The following table summarizes our significant operating statistics for Midstream:

	2007	2006	2005
Volumes(1):			
Domestic Gathering (trillion British Thermal Units)	1,045	1,181	1,253
Domestic Natural Gas Liquid Production (Mbbls/d)(2)	163	152	144
Crude Oil Gathering (Mbbls/d)(2)	80	86	88
Processing Volumes (trillion British Thermal Units)	937	833	721

(1) Excludes volumes associated with partially owned assets that are not consolidated for financial reporting purposes.

(2) Annual Average Mbbls/d

Gas Marketing Services

Gas Marketing Services primarily supports our natural gas businesses by providing marketing and risk management services, which include marketing and hedging the gas produced by Exploration & Production, and procuring fuel and shrink gas and hedging natural gas liquids sales for Midstream. In addition, Gas Marketing manages various natural gas-related contracts such as transportation, storage, and related hedges, and provides services to third-parties, such as producers.

Gas Marketing Services' natural gas sales volumes, including sales volumes to other segments, were 2.3 Bcf/d, 2.1 Bcf/d and 2.1 Bcf/d for the years ending December 31, 2007, 2006 and 2005, respectively. Gas Marketing Services' natural gas purchase volumes, including purchases from other segments, were 2.4 Bcf/d, 2.3 Bcf/d and 2.2 Bcf/d for the same periods.

As of December 31, 2007, Gas Marketing Services has approximately 159 customers compared with approximately 163 customers at the end of 2006.

Our Exploration and Production and Midstream segments may execute commodity hedges with Gas Marketing Services. In turn, Gas Marketing Services may execute offsetting derivative contracts with unrelated third parties.

As a result of the sale of a substantial portion of our Power business in the fourth quarter of 2007, Gas Marketing Services also is responsible for certain remaining legacy natural gas contracts and positions. We intend to liquidate a substantial portion of these legacy contracts. During 2007, we substantially reduced the overall legacy positions remaining. Until such legacy positions are liquidated, segment results may experience mark- to-market volatility from commodity-based derivatives that represent economic hedges but are not designated as hedges for accounting purposes or do not qualify for hedge accounting. However, this mark-to-market volatility is expected to be significantly reduced compared to previous levels.

Other

At December 31, 2007, we owned approximately 99.3 percent of the Class B Interests in Longhorn Partners Pipeline LP (Longhorn), which owned a refined petroleum products pipeline from Houston, Texas to El Paso, Texas. The Class B Interests are preferred interests but subordinate to other preferred interests, and the common interests are subordinate to both. It is uncertain whether we will ever receive any payments related to our Class B Interests or our common interests, however any such amounts related to these interests were fully impaired in 2005, and will only be recognized as income when received.

We continue to receive payments associated with the 2005 transfer of the First Amended and Restated Pipeline Operating Services Agreement to a third party. The management of Longhorn completed an installment sale of the pipeline during the third quarter of 2006. The sale of the pipeline did not impact these ongoing payments which are recognized as income when received.

Additional Business Segment Information

Our ongoing business segments are accounted for as continuing operations in the accompanying financial statements and notes to financial statements included in Part II.

Operations related to certain assets in "Discontinued Operations" have been reclassified from their traditional business segment to "Discontinued Operations" in the accompanying financial statements and notes to financial statements included in Part II.

Our corporate parent company performs certain management, legal, financial, tax, consultative, information technology, administrative and other services for our subsidiaries.

Our corporate parent company’s principal sources of cash are from external financings, dividends and advances from our subsidiaries, investments, payments by subsidiaries for services rendered, sales of master partnership units to the public, interest payments from subsidiaries on cash advances and net proceeds from asset sales. The amount of dividends available to us from subsidiaries largely depends upon each subsidiary’s earnings and operating capital requirements. The terms of certain of our subsidiaries’ borrowing arrangements limit the transfer of funds to our corporate parent.

We believe that we have adequate sources and availability of raw materials and commodities for existing and anticipated business needs. In support of our energy commodity activities, primarily conducted through Gas Marketing Services, our counterparties require us to provide various forms of credit support such as margin, adequate assurance amounts and pre-payments for gas supplies. Our pipeline systems are all regulated in various ways resulting in the financial return on the investments made in the systems being limited to standards permitted by the regulatory agencies. Each of the pipeline systems has ongoing capital requirements for efficiency and mandatory improvements, with expansion opportunities also necessitating periodic capital outlays.

REGULATORY MATTERS

Exploration & Production. Our Exploration & Production business is subject to various federal, state and local laws and regulations on taxation and payment of royalties, and the development, production and marketing of oil and gas, and environmental and safety matters. Many laws and regulations require drilling permits and govern the spacing of wells, rates of production, water discharge, prevention of waste and other matters. Such laws and regulations have increased the costs of planning, designing, drilling, installing, operating and abandoning our oil and gas wells and other facilities. In addition, these laws and regulations, and any others that are passed by the jurisdictions where we have production, could limit the total number of wells drilled or the allowable production from successful wells, which could limit our reserves.

Gas Pipeline. Gas Pipeline's interstate transmission and storage activities are subject to FERC regulation under the Natural Gas Act of 1938 (NGA) and under the Natural Gas Policy Act of 1978, and, as such, its rates and charges for the transportation of natural gas in interstate commerce, its accounting, and the extension, enlargement or abandonment of its jurisdictional facilities, among other things, are subject to regulation. Each gas pipeline company holds certificates of public convenience and necessity issued by the FERC authorizing ownership and operation of all pipelines, facilities and properties for which certificates are required under the NGA. Each gas pipeline company is also subject to the Natural Gas Pipeline Safety Act of 1968, as amended, which regulates safety requirements in the design, construction, operation and maintenance of interstate natural gas transmission facilities. FERC Standards of Conduct govern how our interstate pipelines communicate and do business with their marketing affiliates. Among other things, the Standards of Conduct require that interstate pipelines not operate their systems to preferentially benefit their marketing affiliates.

Each of our interstate natural gas pipeline companies establishes its rates primarily through the FERC's ratemaking process. Key determinants in the ratemaking process are:

- costs of providing service, including depreciation expense;
- allowed rate of return, including the equity component of the capital structure and related income taxes;
- volume throughput assumptions.

The allowed rate of return is determined in each rate case. Rate design and the allocation of costs between the demand and commodity rates also impact profitability. As a result of these proceedings, certain revenues previously collected may be subject to refund.

Midstream. For our Midstream segment, onshore gathering is subject to regulation by states in which we operate and offshore gathering is subject to the Outer Continental Shelf Lands Act (OCSLA). Of the states where Midstream gathers gas, currently only Texas actively regulates gathering activities. Texas regulates gathering primarily through complaint mechanisms under which the state commission may resolve disputes involving an individual gathering arrangement. Although gathering facilities located offshore are not subject to the NGA (although offshore transmission pipelines may be), some controversy exists as to how the FERC should determine whether offshore facilities function as gathering. These issues are currently before the FERC. Most gathering facilities offshore are subject to the OCSLA, which provides in part that outer continental shelf pipelines "must provide open and nondiscriminatory access to both owner and non-owner shippers."

Midstream also owns interests in and operates two offshore transmission pipelines that are regulated by the FERC because they are deemed to transport gas in interstate commerce. Black Marlin Pipeline Company provides transportation service for offshore Texas production in the High Island area and redelivers that gas to intrastate pipeline interconnects near Texas City. Discovery provides transportation service for offshore Louisiana production from the South Timbalier, Grand Isle, Ewing Bank and Green Canyon (deepwater) areas to an onshore processing facility and downstream interconnect points with major interstate pipelines. FERC regulation requires all terms and conditions of service, including the rates charged, to be filed with and approved by the FERC before any changes can go into effect. In 2007, Black Marlin filed and settled a major rate change application before the FERC resulting in increased rates for service. In November 2007, Discovery filed a settlement in lieu of a rate change filing that if approved would increase its rates for service.

Our remaining Midstream Canadian assets are regulated by the Alberta Energy & Utilities Board (AEUB) and Alberta Environment. The regulatory system for the Alberta oil and gas industry incorporates a large measure of self-regulation, providing that licensed operators are held responsible for ensuring that their operations are conducted in accordance with all provincial regulatory requirements. For situations in which non-compliance with the applicable regulations is at issue, the AEUB and Alberta Environment have implemented an enforcement process with escalating consequences.

Gas Marketing Services. Our Gas Marketing business is subject to a variety of laws and regulations at the local, state and federal levels, including the FERC and the Commodity Futures Trading Commission regulations. In addition, natural gas markets continue to be subject to numerous and wide-ranging federal and state regulatory proceedings and investigations. We are also subject to various federal and state actions and investigations regarding, among other things, market structure, behavior of market participants, market prices, and reporting to trade publications. We may be liable for refunds and other damages and penalties as a result of ongoing actions and investigations. The outcome of these matters could affect our creditworthiness and ability to perform contractual obligations as well as other market participants' creditworthiness and ability to perform contractual obligations to us.

See Note 15 of our Notes to Consolidated Financial Statements for further details on our regulatory matters.

ENVIRONMENTAL MATTERS

Our generation facilities, processing facilities, natural gas pipelines, and exploration and production operations are subject to federal environmental laws and regulations as well as the state and tribal laws and regulations adopted by the jurisdictions in which we operate. We could incur liability to governments or third parties for any unlawful discharge of oil, gas or other pollutants into the air, soil, or water, as well as liability for clean up costs. Materials could be released into the environment in several ways including, but not limited to:

- from a well or drilling equipment at a drill site;
- leakage from gathering systems, pipelines, transportation facilities and storage tanks;
- damage to oil and gas wells resulting from accidents during normal operations;
- blowouts, cratering and explosions.

Because the requirements imposed by environmental laws and regulations are frequently changed, we cannot assure you that laws and regulations enacted in the future, including changes to existing laws and regulations, will not adversely affect our business. In addition we may be liable for environmental damage caused by former operators of our properties.

We believe compliance with environmental laws and regulations will not have a material adverse effect on capital expenditures, earnings or competitive position. However, environmental laws and regulations could affect our business in various ways from time to time, including incurring capital and maintenance expenditures, fines and penalties, and creating the need to seek relief from the FERC for rate increases to recover the costs of certain capital expenditures and operation and maintenance expenses.

For a discussion of specific environmental issues, see "Environmental" under Management's Discussion and Analysis of Financial Condition and Results of Operations and "Environmental Matters" in Note 15 of our Notes to Consolidated Financial Statements.

COMPETITION

Exploration & Production. Our Exploration & Production segment competes with other oil and gas concerns, including major and independent oil and gas companies in the development, production and marketing of natural gas. We compete in areas such as acquisition of oil and gas properties and obtaining necessary equipment, supplies and services. We also compete in recruiting and retaining skilled employees.

Gas Pipeline. The natural gas industry has undergone significant change over the past two decades. A highly-liquid competitive commodity market in natural gas and increasingly competitive markets for natural gas services, including competitive secondary markets in pipeline capacity, have developed. As a result, pipeline capacity is being used more efficiently, and peaking and storage services are increasingly effective substitutes for annual pipeline capacity.

Local distribution company (LDC) and electric industry restructuring by states have affected pipeline markets. Pipeline operators are increasingly challenged to accommodate the flexibility demanded by customers and allowed under tariffs, but the changes implemented at the state level have not required renegotiation of LDC contracts. The state plans have in some cases discouraged LDCs from signing long-term contracts for new capacity.

Several states are considering re-regulation and extending price caps because many regulators and legislators believe that deregulation has not worked. States are in the process of developing new energy plans that may require utilities to encourage energy saving measures and diversify their energy supplies to include renewable sources. This could lower the growth of gas demand.

These factors have increased the risk that customers will reduce their contractual commitments for pipeline capacity. Future utilization of pipeline capacity will also depend on competition from LNG imported into markets and new pipelines from the Rockies and other new producing areas, many of which are utilizing master limited partnership structures with a lower cost of capital, and on growth of natural gas demand.

Midstream. In our Midstream segment, we face regional competition with varying competitive factors in each basin. Our gathering and processing business competes with other midstream companies, interstate and intrastate pipelines, producers and independent gatherers and processors. We primarily compete with five to ten companies across all basins in which we provide services. Numerous factors impact any given customer's choice of a gathering or processing services provider, including rate, location, term, timeliness of services to be provided, pressure obligations and contract structure. We also compete in recruiting and retaining skilled employees. In 2005 we formed WPZ to help compete against other master limited partnerships for midstream projects. By virtue of the master limited partnership structure, WPZ provides us with an alternative and low-cost source of capital. We expect the alternative, low-cost capital will allow WPZ to compete favorably from a cost of capital perspective with other MLPs when pursuing acquisition opportunities of gathering and processing assets.

Gas Marketing Services. In our Gas Marketing Services segment, we compete directly with large independent energy marketers, marketing affiliates of regulated pipelines and utilities, and natural gas producers. We also compete with brokerage houses, energy hedge funds and other energy-based companies offering similar services.

EMPLOYEES

At February 1, 2008, we had approximately 4,319 full-time employees including 898 at the corporate level, 681 at Exploration & Production, 1,732 at Gas Pipeline, 984 at Midstream, and 24 at Gas Marketing Services. None of our employees are represented by unions or covered by collective bargaining agreements.

FINANCIAL INFORMATION ABOUT GEOGRAPHIC AREAS

See Note 17 of our Notes to Consolidated Financial Statements for amounts of revenues during the last three fiscal years from external customers attributable to the United States and all foreign countries. Also see Note 17 of our Notes to Consolidated Financial Statements for information relating to long-lived assets during the last three fiscal years, located in the United States and all foreign countries.

Item 1A. *Risk Factors*

FORWARD-LOOKING STATEMENTS/RISK FACTORS AND CAUTIONARY STATEMENT FOR PURPOSES OF THE "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

Certain matters contained in this report include "forward-looking statements" within the meaning of section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements discuss our expected future results based on current and pending business operations. We make those forward-looking statements in reliance on the safe harbor protections provided under the Private Securities Litigation Reform Act of 1995.

All statements, other than statements of historical facts, included in this report which address activities, events or developments that we expect, believe or anticipate will exist or may occur in the future, are forward-looking statements. Forward-looking statements can be identified by various forms of words such as "anticipates," "believes," "could," "may," "should," "continues," "estimates," "expects," "forecasts," "might," "planned," "potential," "projects," "scheduled" or similar expressions. These forward-looking statements include, among others, statements regarding:

- amounts and nature of future capital expenditures;
- expansion and growth of our business and operations;
- business strategy;
- estimates of proved gas and oil reserves;
- reserve potential;
- development drilling potential;
- cash flow from operations or results of operations;
- seasonality of certain business segments;
- natural gas and natural gas liquids prices and demand.

Forward-looking statements are based on numerous assumptions, uncertainties and risks that could cause future events or results to be materially different from those stated or implied in this document. Many of the factors that will determine these results are beyond our ability to control or project. Specific factors which could cause actual results to differ from those in the forward-looking statements include:

- availability of supplies (including the uncertainties inherent in assessing and estimating future natural gas reserves), market demand, volatility of prices, and increased costs of capital;
- inflation, interest rates, fluctuation in foreign exchange, and general economic conditions;
- the strength and financial resources of our competitors;
- development of alternative energy sources;
- the impact of operational and development hazards;
- costs of, changes in, or the results of laws, government regulations including proposed climate change legislation, environmental liabilities, litigation, and rate proceedings;
- changes in the current geopolitical situation;
- risks related to strategy and financing, including restrictions stemming from our debt agreements and future changes in our credit ratings;
- risks associated with future weather conditions;
- acts of terrorism.

Given the uncertainties and risk factors that could cause our actual results to differ materially from those contained in any forward-looking statement, we caution investors not to unduly rely on our forward-looking statements. We disclaim any obligations to and do not intend to update the above list to announce publicly the result of any revisions to any of the forward-looking statements to reflect future events or developments.

In addition to causing our actual results to differ, the factors listed above and referred to below may cause our intentions to change from those statements of intention set forth in this report. Such changes in our intentions may also cause our results to differ. We may change our intentions, at any time and without notice, based upon changes in such factors, our assumptions, or otherwise.

Because forward-looking statements involve risks and uncertainties, we caution that there are important factors, in addition to those listed above, that may cause actual results to differ materially from those contained in the forward-looking statements. These factors include the following:

RISK FACTORS

You should carefully consider the following risk factors in addition to the other information in this report. Each of these factors could adversely affect our business, operating results, and financial condition as well as adversely affect the value of an investment in our securities.

Risks Inherent to our Industry and Business

The long-term financial condition of our natural gas transportation and midstream businesses is dependent on the continued availability of natural gas supplies in the supply basins that we access, demand for those supplies in our traditional markets, and market demand for natural gas.

The development of the additional natural gas reserves that are essential for our gas transportation and midstream businesses to thrive requires significant capital expenditures by others for exploration and development drilling and the installation of production, gathering, storage, transportation and other facilities that permit natural gas to be produced and delivered to our pipeline systems. Low prices for natural gas, regulatory limitations, or the lack of available capital for these projects could adversely affect the development and production of additional reserves, as well as gathering, storage, pipeline transportation and import and export of natural gas supplies, adversely impacting our ability to fill the capacities of our gathering, transportation and processing facilities. Additionally, in some cases, new LNG import facilities built near our markets could result in less demand for our gathering and transportation facilities.

Estimating reserves and future net revenues involves uncertainties. Negative revisions to reserve estimates and oil and gas price declines may lead to decreased earnings, losses or impairment of oil and gas assets, including related goodwill.

Reserve engineering is a subjective process of estimating underground accumulations of oil and gas that cannot be measured in an exact manner. Reserves that are "proved reserves" are those estimated quantities of crude oil, natural gas, and natural gas liquids that geological and engineering data demonstrate with reasonable certainty are recoverable in future years from known reservoirs under existing economic and operating conditions, but should not be considered as a guarantee of results for future drilling projects.

The process relies on interpretations of available geological, geophysical, engineering and production data. There are numerous uncertainties inherent in estimating quantities of proved reserves and in projecting future rates of production and timing of developmental expenditures, including many factors beyond the control of the producer. The reserve data included in this report represent estimates. In addition, the estimates of future net revenues from our proved reserves and the present value of such estimates are based upon certain assumptions about future production levels, prices and costs that may not prove to be correct over time.

Quantities of proved reserves are estimated based on economic conditions in existence during the period of assessment. Changes to oil and gas prices in the markets for such commodities may have the impact of shortening the economic lives of certain fields because it becomes uneconomic to produce all recoverable reserves on such fields, which reduces proved property reserve estimates.

If negative revisions in the estimated quantities of proved reserves were to occur, it would have the effect of increasing the rates of depreciation, depletion and amortization on the affected properties, which would decrease earnings or result in losses through higher depreciation, depletion and amortization expense. The revisions may also be sufficient to trigger impairment losses on certain properties which would result in a further non-cash charge to earnings. The revisions could also possibly affect the evaluation of Exploration & Production's goodwill for impairment purposes.

Our past success rate for drilling projects and the historic performance of our exploration and production business is no predictor of future performance.

Our past success rate for drilling projects in 2007 should not be considered a predictor of future performance.

Performance of our exploration and production business is affected in part by factors beyond our control (any of which could cause the results of this business to decrease materially), such as:

- regulations and regulatory approvals;
- availability of capital for drilling projects which may be affected by other risk factors discussed in this report;
- cost-effective availability of drilling rigs and necessary equipment;
- availability of skilled labor;
- availability of cost-effective transportation for products;
- market risks (including price risks and competition) discussed in this report.

Our drilling, production, gathering, processing and transporting activities involve numerous risks that might result in accidents, and other operating risks and hazards.

Our operations are subject to all the risks and hazards typically associated with the development and exploration for, and the production and transportation of oil and gas. These operating risks include, but are not limited to:

- blowouts, cratering and explosions;
- uncontrollable flows of oil, natural gas or well fluids;
- fires;
- formations with abnormal pressures;
- pollution and other environmental risks;
- natural disasters.

In addition, there are inherent in our gas gathering, processing and transporting properties a variety of hazards and operating risks, such as leaks, spills, explosions and mechanical problems that could cause substantial financial losses. In addition, these risks could result in loss of human life, significant damage to property, environmental pollution, impairment of our operations and substantial losses to us. In accordance with customary industry practice, we maintain insurance against some, but not all, of these risks and losses, and only at levels we believe to be appropriate. The location of certain segments of our pipelines in or near populated areas, including residential areas, commercial business centers and industrial sites, could increase the level of damages resulting from these risks. In spite of our precautions, an event could cause considerable harm to people or property, and could have a material adverse effect on our financial condition, particularly if the event is not fully covered by insurance. Accidents or other operating risks could further result in loss of service available to our customers. Such circumstances could materially impact our ability to meet contractual obligations and retain customers, with a resulting impact on our results of operations.

Costs of environmental liabilities and complying with existing and future environmental regulations could exceed our current expectations.

Our operations are subject to extensive environmental regulation pursuant to a variety of federal, provincial, state and municipal laws and regulations. Such laws and regulations impose, among other things, restrictions, liabilities and obligations in connection with the generation, handling, use, storage, extraction, transportation, treatment and disposal of hazardous substances and wastes, in connection with spills, releases and emissions of various substances into the environment, and in connection with the operation, maintenance, abandonment and reclamation of our facilities.

Compliance with environmental laws requires significant expenditures, including for clean up costs and damages arising out of contaminated properties. In addition, the possible failure to comply with environmental laws and regulations might result in the imposition of fines and penalties. We are generally responsible for all liabilities associated with the environmental condition of our facilities and assets, whether acquired or developed, regardless of when the liabilities arose and whether they are known or unknown. In connection with certain acquisitions and divestitures, we could acquire, or be required to provide indemnification against, environmental liabilities that could expose us to material losses, which may not be covered by insurance. In addition, the steps we could be required to take to bring certain facilities into compliance could be prohibitively expensive, and we might be required to shut down, divest or alter the operation of those facilities, which might cause us to incur losses. Although we do not expect that the costs of complying with current environmental laws will have a material adverse effect on our financial condition or results of operations, no assurance can be given that the costs of complying with environmental laws in the future will not have such an effect.

Changes in federal laws or regulations could reduce the availability or increase the cost of our interstate pipeline capacity or gas supply, and thereby reduce our earnings. Congress and certain states have for some time been considering various forms of legislation related to greenhouse gas emissions. There is a possibility that, when and if enacted, the final form of such legislation could increase our costs of compliance with environmental laws.

We make assumptions and develop expectations about possible expenditures related to environmental conditions based on current laws and regulations and current interpretations of those laws and regulations. If the interpretation of laws or regulations, or the laws and regulations themselves, change, our assumptions may change. Our regulatory rate structure and our contracts with customers might not necessarily allow us to recover capital costs we incur to comply with the new environmental regulations. Also, we might not be able to obtain or maintain from time to time all required environmental regulatory approvals for certain development projects. If there is a delay in obtaining any required environmental regulatory approvals or if we fail to obtain and comply with them, the operation of our facilities could be prevented or become subject to additional costs, resulting in potentially material adverse consequences to our results of operations.

Our operating results for certain segments of our business might fluctuate on a seasonal and quarterly basis.

Revenues from certain segments of our business can have seasonal characteristics. In many parts of the country, demand for natural gas and other fuels peaks during the winter. As a result, our overall operating results in the future might fluctuate substantially on a seasonal basis. Demand for natural gas and other fuels could vary significantly from our expectations depending on the nature and location of our facilities and pipeline systems and the terms of our natural gas transportation arrangements relative to demand created by unusual weather patterns. Additionally, changes in the price of natural gas could benefit one of our business units, but disadvantage another. For example, our Exploration & Production business may benefit from higher natural gas prices, and Midstream, which uses gas as a feedstock, may not.

Risks Related to the Current Geopolitical Situation

Our investments and projects located outside of the United States expose us to risks related to the laws of other countries, and the taxes, economic conditions, fluctuations in currency rates, political conditions and policies of foreign governments. These risks might delay or reduce our realization of value from our international projects.

We currently own and might acquire and/or dispose of material energy-related investments and projects outside the United States. The economic and political conditions in certain countries where we have interests or in which we might explore development, acquisition or investment opportunities present risks of delays in construction and interruption of business, as well as risks of war, expropriation, nationalization, renegotiation, trade sanctions or nullification of existing contracts and changes in law or tax policy, that are greater than in the United States. The uncertainty of the legal environment in certain foreign countries in which we develop or acquire projects or make investments could make it more difficult to obtain non-recourse project financing or other financing on suitable terms, could adversely affect the ability of certain customers to honor their obligations with respect to such projects or investments and could impair our ability to enforce our rights under agreements relating to such projects or investments. Recent events in certain South American countries, particularly the continued threat of nationalization of certain energy-related assets in Venezuela, could have a material negative impact on our results of operations. We may not receive adequate compensation, or any compensation, if our assets in Venezuela are nationalized.

Operations and investments in foreign countries also can present currency exchange rate and convertibility, inflation and repatriation risk. In certain situations under which we develop or acquire projects or make investments, economic and monetary conditions and other factors could affect our ability to convert to U.S. dollars our earnings denominated in foreign currencies. In addition, risk from fluctuations in currency exchange rates can arise when our foreign subsidiaries expend or borrow funds in one type of currency, but receive revenue in another. In such cases, an adverse change in exchange rates can reduce our ability to meet expenses, including debt service obligations. We may or may not put contracts in place designed to mitigate our foreign currency exchange risks. We have some exposures that are not hedged and which could result in losses or volatility in our results of operations.

Risks Related to Strategy and Financing

Our debt agreements impose restrictions on us that may adversely affect our ability to operate our business.

Certain of our debt agreements contain covenants that restrict or limit among other things, our ability to create liens, sell assets, make certain distributions, repurchase equity and incur additional debt. In addition, our debt agreements contain, and those we enter into in the future may contain, financial covenants and other limitations with which we will need to comply. Our ability to comply with these covenants may be affected by many events beyond our control, and we cannot assure you that our future operating results will be sufficient to comply with the covenants or, in the event of a default under any of our debt agreements, to remedy that default.

Our failure to comply with the covenants in our debt agreements and other related transactional documents could result in events of default. Upon the occurrence of such an event of default, the lenders could elect to declare all amounts outstanding under a particular facility to be immediately due and payable and terminate all commitments, if any, to extend further credit. An event of default or an acceleration under one debt agreement could cause a cross-default or cross-acceleration of another debt agreement. Such a cross-default or cross-acceleration could have a wider impact on our liquidity than might otherwise arise from a default or acceleration of a single debt instrument. If an event of default occurs, or if other debt agreements cross-default, and the lenders under the affected debt agreements accelerate the maturity of any loans or other debt outstanding to us, we may not have sufficient liquidity to repay amounts outstanding under such debt agreements.

A downgrade of our current credit ratings could impact our costs of doing business in certain ways and maintaining current credit ratings is within the control of independent third parties.

A downgrade of our credit rating might increase our cost of borrowing. Our ability to access capital markets could also be limited by a downgrade of our credit rating and other disruptions. Such disruptions could include:

- economic downturns;
- deteriorating capital market conditions generally;
- declining market prices for natural gas, natural gas liquids and other commodities;
- terrorist attacks or threatened attacks on our facilities or those of other energy companies;
- the overall health of the energy industry, including the bankruptcy or insolvency of other companies.

Credit rating agencies perform independent analysis when assigning credit ratings. Given the significant changes in capital markets and the energy industry over the last few years, credit rating agencies continue to review the criteria for attaining investment grade ratings and make changes to those criteria from time to time. Our corporate family credit rating and the credit ratings of Transco and Northwest Pipeline were raised to investment grade in 2007 by Standard & Poor's, Moody's Corporation, and Fitch Ratings, Ltd., and our senior unsecured debt ratings were raised to investment grade by Moody's and Fitch. No assurance can be given that the credit rating agencies will assign us investment grade ratings even if we meet or exceed their criteria for investment grade ratios or that our senior unsecured debt rating will be raised to investment grade by all of the credit rating agencies.

Prices for natural gas liquids, natural gas and other commodities are volatile and this volatility could adversely affect our financial results, cash flows, access to capital and ability to maintain existing businesses.

Our revenues, operating results, future rate of growth and the value of certain segments of our businesses depend primarily upon the prices we receive for natural gas liquids, natural gas, or other commodities, and the differences between prices of these commodities. Prices also affect the amount of cash flow available for capital expenditures and our ability to borrow money or raise additional capital.

The markets for natural gas liquids, natural gas and other commodities are likely to continue to be volatile. Wide fluctuations in prices might result from relatively minor changes in the supply of and demand for these commodities, market uncertainty and other factors that are beyond our control, including:

- worldwide and domestic supplies of and demand for natural gas, natural gas liquids, petroleum, and related commodities;
- turmoil in the Middle East and other producing regions;
- the activities of the Organization of Petroleum Exporting Countries;
- terrorist attacks on production or transportation assets;
- weather conditions;
- the level of consumer demand;
- the price and availability of other types of fuels;
- the availability of pipeline capacity;
- supply disruptions, including plant outages and transportation disruptions;
- the price and level of foreign imports;
- domestic and foreign governmental regulations and taxes;
- volatility in the natural gas markets;
- the overall economic environment;
- the credit of participants in the markets where products are bought and sold;
- the adoption of regulations or legislation relating to climate change.

We might not be able to successfully manage the risks associated with selling and marketing products in the wholesale energy markets.

Our portfolio of derivative and other energy contracts consists of wholesale contracts to buy and sell commodities, including contracts for natural gas, natural gas liquids and other commodities that are settled by the delivery of the commodity or cash throughout the United States. If the values of these contracts change in a direction or manner that we do not anticipate or cannot manage, it could negatively affect our results of operations. In the past, certain marketing and trading companies have experienced severe financial problems due to price volatility in the energy commodity markets. In certain instances this volatility has caused companies to be unable to deliver energy commodities that they had guaranteed under contract. If such a delivery failure were to occur in one of our contracts, we might incur additional losses to the extent of amounts, if any, already paid to, or received from, counterparties. In addition, in our businesses, we often extend credit to our counterparties. Despite performing credit analysis prior to extending credit, we are exposed to the risk that we might not be able to collect amounts

Table of Contents

owed to us. If the counterparty to such a transaction fails to perform and any collateral that secures our counterparty's obligation is inadequate, we will suffer a loss.

If we are unable to perform under our energy agreements, we could be required to pay damages. These damages generally would be based on the difference between the market price to acquire replacement energy or energy services and the relevant contract price. Depending on price volatility in the wholesale energy markets, such damages could be significant.

Risks Related to Regulations that Affect our Industry

Our natural gas sales, transmission, and storage operations are subject to government regulations and rate proceedings that could have an adverse impact on our results of operations.

Our interstate natural gas sales, transportation, and storage operations conducted through our Gas Pipelines business are subject to the FERC's rules and regulations in accordance with the Natural Gas Act of 1938 and the Natural Gas Policy Act of 1978. The FERC's regulatory authority extends to:

- transportation and sale for resale of natural gas in interstate commerce;
- rates and charges;
- construction;
- acquisition, extension or abandonment of services or facilities;
- accounts and records;
- depreciation and amortization policies;
- operating terms and conditions of service.

Regulatory actions in these areas can affect our business in many ways, including decreasing tariff rates and revenues, decreasing volumes in our pipelines, increasing our costs and otherwise altering the profitability of our business. Regulatory decisions could also affect our costs for compression, processing and dehydration of natural gas, which could have a negative effect on our results of operations.

The FERC has taken certain actions to strengthen market forces in the natural gas pipeline industry that have led to increased competition throughout the industry. In a number of key markets, interstate pipelines are now facing competitive pressure from other major pipeline systems, enabling local distribution companies and end users to choose a transportation provider based on considerations other than location.

Competition in the markets in which we operate may adversely affect our results of operations.

We have numerous competitors in all aspects of our businesses, and additional competitors may enter our markets. Other companies with which we compete may be able to respond more quickly to new laws or regulations or emerging technologies, or to devote greater resources to the construction, expansion or refurbishment of their facilities than we can. In addition, current or potential competitors may make strategic acquisitions or have greater financial resources than we do, which could affect our ability to make investments or acquisitions. There can be no assurance that we will be able to compete successfully against current and future competitors and any failure to do so could have a material adverse effect on our businesses and results of operations.

Expiration of firm transportation agreements.

A substantial portion of the operating revenues of our Gas Pipelines are generated through firm transportation agreements that expire periodically and must be renegotiated and extended or replaced. We cannot give any assurance as to whether any of these agreements will be extended or replaced or that the terms of any renegotiated agreements will be as favorable as the existing agreements. Upon the expiration of these agreements, should customers turn back or substantially reduce their commitments, we could experience a negative effect to our results of operations.

Our revenues might decrease if we are unable to gain adequate, reliable and affordable access to transportation and distribution assets.

We depend on transportation and distribution facilities owned and operated by utilities and other energy companies to deliver the commodities we buy and sell in the wholesale market. If transportation is disrupted, if capacity is inadequate, or if credit requirements or rates of such utilities or energy companies are increased, our ability to sell and deliver products might be hindered. Further, although there are laws and regulations designed to encourage competition in wholesale market transactions, some companies may fail to provide fair and equal access to their transportation systems or may not provide sufficient transportation capacity for other market participants.

Our businesses are subject to complex government regulations. The operation of our businesses might be adversely affected by changes in these regulations or in their interpretation or implementation, or the introduction of new laws or regulations applicable to our businesses or our customers.

Existing regulations might be revised or reinterpreted, new laws and regulations might be adopted or become applicable to us, our facilities or our customers, and future changes in laws and regulations might have a detrimental effect on our business. Over the past few years, certain restructured energy markets have experienced supply problems and price volatility. In some of these markets, proposals have been made by governmental agencies and other interested parties to re-regulate areas of these markets which have previously been deregulated. Various forms of market controls and limitations including price caps and bid caps have already been implemented and new controls and market restructuring proposals are in various stages of development, consideration and implementation. We cannot assure you that changes in market structure and regulation will not adversely affect our business and results of operations. We also cannot assure you that other proposals to re-regulate will not be made or that legislative or other attention to these restructured energy markets will not cause the deregulation process to be delayed or reversed or otherwise adversely affect our business and results of operations.

The outcome of a pending rate case to set the rates we can charge customers on Transco's pipeline might result in rates that do not provide an adequate return on the capital we have invested in the Transco pipeline.

We have a pending rate case with the FERC to request changes to the rates we charge on Transco. We have sought FERC approval of a settlement of the significant issues in the rate case but until FERC approves the settlement, the outcome of the rate case remains uncertain. There is a risk that rates set by the FERC will lower our return on the capital we have invested in our assets or might not be adequate to recover increases in operating costs. There is also the risk that higher rates will cause our customers to look for alternative ways to transport their natural gas.

Legal and regulatory proceedings and investigations relating to the energy industry and capital markets have adversely affected our business and may continue to do so.

Public and regulatory scrutiny of the energy industry and of the capital markets has resulted in increased regulation being either proposed or implemented. Such scrutiny has also resulted in various inquiries, investigations and court proceedings in which we are a named defendant. Both the shippers on our pipelines and regulators have rights to challenge the rates we charge under certain circumstances. Any successful challenge could materially affect our results of operations.

Certain inquiries, investigations and court proceedings are ongoing and continue to adversely affect our business as a whole. We might see these adverse effects continue as a result of the uncertainty of these ongoing inquiries and proceedings, or additional inquiries and proceedings by federal or state regulatory agencies or private plaintiffs. In addition, we cannot predict the outcome of any of these inquiries or whether these inquiries will lead to additional legal proceedings against us, civil or criminal fines or penalties, or other regulatory action, including legislation, which might be materially adverse to the operation of our business and our revenues and net income or increase our operating costs in other ways. Current legal proceedings or other matters against us arising out of our ongoing and discontinued operations including environmental matters, disputes over gas measurement, royalty payments, shareholder class action suits, regulatory appeals and similar matters might result in adverse decisions against us. The result of such adverse decisions, either individually or in the aggregate, could be material and may not be covered fully or at all by insurance.

Risks Related to Accounting Standards

Potential changes in accounting standards might cause us to revise our financial results and disclosures in the future, which might change the way analysts measure our business or financial performance.

Regulators and legislators continue to take a renewed look at accounting practices, financial disclosures, companies' relationships with their independent registered public accounting firms, and retirement plan practices. We cannot predict the ultimate impact of any future changes in accounting regulations or practices in general with respect to public companies or the energy industry or in our operations specifically.

In addition, the Financial Accounting Standards Board (FASB) or the SEC could enact new accounting standards that might impact how we are required to record revenues, expenses, assets, liabilities and equity.

Risks Related to Market Volatility and Risk Measurement and Hedging Activities

Our risk measurement and hedging activities might not be effective and could increase the volatility of our results.

Although we have systems in place that use various methodologies to quantify commodity price risk associated with our businesses, these systems might not always be followed or might not always be effective. Further, such systems do not in themselves manage risk, particularly risks outside of our control, and adverse changes in energy commodity market prices, volatility, adverse correlation of commodity prices, the liquidity of markets, changes in interest rates and other risks discussed in this report might still adversely affect our earnings, cash flows and balance sheet under applicable accounting rules, even if risks have been identified.

In an effort to manage our financial exposure related to commodity price and market fluctuations, we have entered into contracts to hedge certain risks associated with our assets and operations. In these hedging activities, we have used fixed-price, forward, physical purchase and sales contracts, futures, financial swaps and option contracts traded in the over-the-counter markets or on exchanges. Nevertheless, no single hedging arrangement can adequately address all risks present in a given contract. For example, a forward contract that would be effective in hedging commodity price volatility risks would not hedge the contract's counterparty credit or performance risk. Therefore, unhedged risks will always continue to exist. While we attempt to manage counterparty credit risk within guidelines established by our credit policy, we may not be able to successfully manage all credit risk and as such, future cash flows and results of operations could be impacted by counterparty default.

Our use of hedging arrangements through which we attempt to reduce the economic risk of our participation in commodity markets could result in increased volatility of our reported results. Changes in the fair values (gains and losses) of derivatives that qualify as hedges under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," (SFAS 133) to the extent that such hedges are not fully effective in offsetting changes to the value of the hedged commodity, as well as changes in the fair value of derivatives that do not qualify or have not been designated as hedges under SFAS 133, must be recorded in our income. This creates the risk of volatility in earnings even if no economic impact to the Company has occurred during the applicable period.

The impact of changes in market prices for natural gas on the average gas prices received by us may be reduced based on the level of our hedging strategies. These hedging arrangements may limit our potential gains if the market prices for natural gas were to rise substantially over the price established by the hedge. In addition, our hedging arrangements expose us to the risk of financial loss in certain circumstances, including instances in which:

- production is less than expected;
- the hedging instrument is not perfectly effective in mitigating the risk being hedged;
- the counterparties to our hedging arrangements fail to honor their financial commitments.

Risks Related to Employees, Outsourcing of Non-Core Support Activities, and Technology

Institutional knowledge residing with current employees nearing retirement eligibility might not be adequately preserved.

In certain segments of our business, institutional knowledge resides with employees who have many years of service. As these employees reach retirement age, we may not be able to replace them with employees of comparable knowledge and experience. In addition, we may not be able to retain or recruit other qualified individuals and our efforts at knowledge transfer could be inadequate. If knowledge transfer, recruiting and retention efforts are inadequate, access to significant amounts of internal historical knowledge and expertise could become unavailable to us.

Failure of or disruptions to our outsourcing relationships might negatively impact our ability to conduct our business.

Some studies indicate a high failure rate of outsourcing relationships. Although we have taken steps to build a cooperative and mutually beneficial relationship with our outsourcing providers and to closely monitor their performance, a deterioration in the timeliness or quality of the services performed by the outsourcing providers or a failure of all or part of these relationships could lead to loss of institutional knowledge and interruption of services necessary for us to be able to conduct our business.

Certain of our accounting, information technology, application development, and help desk services are currently provided by an outsourcing provider from service centers outside of the United States. The economic and political conditions in certain countries from which our outsourcing providers may provide services to us present similar risks of business operations located outside of the United States previously discussed, including risks of interruption of business, war, expropriation, nationalization, renegotiation, trade sanctions or nullification of existing contracts and changes in law or tax policy, that are greater than in the United States.

Risks Related to Weather, other Natural Phenomena and Business Disruption

Our assets and operations can be adversely affected by weather and other natural phenomena.

Our assets and operations, including those located offshore, can be adversely affected by hurricanes, earthquakes, tornadoes and other natural phenomena and weather conditions including extreme temperatures, making it more difficult for us to realize the historic rates of return associated with these assets and operations.

Acts of terrorism could have a material adverse effect on our financial condition, results of operations and cash flows.

Our assets and the assets of our customers and others may be targets of terrorist activities that could disrupt our business or cause significant harm to our operations, such as full or partial disruption to our ability to produce, process, transport or distribute natural gas, natural gas liquids or other commodities. Acts of terrorism as well as events occurring in response to or in connection with acts of terrorism could cause environmental repercussions that could result in a significant decrease in revenues or significant reconstruction or remediation costs, which could have a material adverse effect on our financial condition, results of operations and cash flows.

Item 1B. ***Unresolved Staff Comments***

None.

Item 2. ***Properties***

We own property in 30 states plus the District of Columbia in the United States and in Argentina, Canada and Venezuela.

Gas Marketing's primary assets are its term contracts, related systems and technological support. In our Gas Pipeline and Midstream segments, we generally own our facilities, although a substantial portion of our pipeline and gathering facilities is constructed and maintained pursuant to rights-of-way, easements, permits, licenses or consents on and across properties owned by others. In our Exploration & Production segment, the majority of our ownership interest in exploration and production properties is held as working interests in oil and gas leaseholds.

Item 3. ***Legal Proceedings***

The information called for by this item is provided in Note 15 of the Notes to Consolidated Financial Statements of this report, which information is incorporated by reference into this item.

Item 4. ***Submission of Matters to a Vote of Security Holders***

None.

Executive Officers of the Registrant

The name, age, period of service, and title of each of our executive officers as of February 21, 2008, are listed below.

Alan S. Armstrong	Senior Vice President, Midstream Age: 45 Position held since February 2002. From 1999 to February 2002, Mr. Armstrong was Vice President, Gathering and Processing for Midstream. From 1998 to 1999 he was Vice President, Commercial Development for Midstream. Mr. Armstrong serves as a director of Williams Partners GP LLC, the general partner of Williams Partners L.P.
James J. Bender	Senior Vice President and General Counsel Age 51 Position held since December 2002. Prior to joining us, Mr. Bender was Senior Vice President and General Counsel with NRG Energy, Inc., a position held since June 2000, prior to which he was Vice President, General Counsel and Secretary of NRG Energy Inc. since June 1997. NRG Energy, Inc. filed a voluntary bankruptcy petition during 2003 and its plan of reorganization was approved in December 2003.
Donald R. Chappel	Senior Vice President and Chief Financial Officer Age: 56 Position held since April 2003. Prior to joining us, Mr. Chappel during 2000 founded and served as chief executive officer of a development business in Chicago, Illinois through April 2003, when he joined us. Mr. Chappel joined Waste Management, Inc. in 1987 and held various financial, administrative and operational leadership positions, including twice serving as chief financial officer, during 1997 and 1998 and most recently during 1999 through February 2000. Mr. Chappel serves as a director of Williams Partners GP LLC, the general partner of Williams Partners L.P., and as a director of Williams Pipeline GP LLC, the general partner of Williams Pipeline Partners L.P.

Ralph A. Hill	Senior Vice President, Exploration & Production Age: 48 Position held since December 1998. Mr. Hill was vice president of the exploration and production unit from 1993 to 1998 as well as Senior Vice President Petroleum Services from 1998 to 2003. Mr. Hill serves as a director of Apco Argentina Inc.
Michael P. Johnson, Sr.	Senior Vice President and Chief Administrative Officer Age: 60 Position held since May 2004. Mr. Johnson was named our Senior Vice President of Human Resources and Administration in April 1999. Prior to joining us in December 1998, he held officer level positions, such as Vice President of Human Resources, Vice President for Corporate People Strategies, and Vice President Human Resource Services, for Amoco Corporation from 1991 to 1998. Mr. Johnson serves as a director of Buffalo Wild Wings.
Steven J. Malcolm	Chairman of the Board, Chief Executive Officer and President Age: 59 Position held since September 2001. Mr. Malcolm was elected Chief Executive Officer of Williams in January 2002 and Chairman of the Board in May 2002. He was elected President and Chief Operating Officer in September 2001. Prior to that, he was our Executive Vice President from May 2001, President and Chief Executive Officer of our subsidiary Williams Energy Services, LLC, since December 1998 and the Senior Vice President and General Manager of our subsidiary, Williams Field Services Company, since November 1994. Mr. Malcolm serves as a director of Williams Partners GP LLC, the general partner of Williams Partners L.P., as a director of Williams Pipeline GP LLC, the general partner of Williams Pipeline Partners L.P., and as a director of Bank of Oklahoma, N.A.
Phillip D. Wright	Senior Vice President, Gas Pipeline Age: 52 Position held since January 2005. From October 2002 to January 2005, Mr. Wright served as Chief Restructuring Officer. From September 2001 to October 2002, Mr. Wright served as President and Chief Executive Officer of our subsidiary Williams Energy Services. From 1996 until September 2001, he was Senior Vice President, Enterprise Development and Planning for our energy services group. Mr. Wright has held various positions with us since 1989. Mr. Wright serves as a director of Williams Pipeline GP LLC, the general partner of Williams Pipeline Partners L.P.

PART II

Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

Our common stock is listed on the New York Stock Exchange under the symbol "WMB." At the close of business on February 21, 2008, we had approximately 11,153 holders of record of our common stock. The high and low closing sales price ranges (New York Stock Exchange composite transactions) and dividends declared by quarter for each of the past two years are as follows:

	2007			2006		
Quarter	**High**	**Low**	**Dividend**	**High**	**Low**	**Dividend**
1st	$28.94	$25.32	$ .09	$25.12	$19.49	$ .075
2nd	$32.43	$28.20	$ .10	$23.36	$20.33	$ .09
3rd	$34.72	$30.08	$ .10	$25.23	$22.51	$ .09
4th	$37.16	$33.68	$ .10	$27.95	$22.95	$ .09

Some of our subsidiaries' borrowing arrangements limit the transfer of funds to us. These terms have not impeded, nor are they expected to impede, our ability to pay dividends.

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	(d) Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
October 1 — October 31, 2007	—	—	—	$ 766,140,266
November 1 — November 30, 2007	5,500,000	$ 34.54	5,500,000	$ 576,193,864
December 1 — December 31, 2007	2,946,200	$ 34.61	2,946,200	$ 474,228,219
Total	8,446,200	$ 34.56	8,446,200	$ 474,228,219

(1) We announced a stock repurchase program on July 20, 2007. Our board of directors has authorized the repurchase of up to $1 billion of the company's common stock. The stock repurchase program has no expiration date. We intend to purchase shares of our stock from time to time in open market transactions or through privately negotiated or structured transactions at our discretion, subject to market conditions and other factors.

Table of Contents

Performance Graph

Set forth below is a line graph comparing our cumulative total stockholder return on our common stock (assuming reinvestment of dividends) with the cumulative total return of the S&P 500 Stock Index and the Bloomberg U.S. Pipeline Index for the period of five fiscal years commencing January 1, 2003. The Bloomberg U.S. Pipeline Index is composed of El Paso, Equitable Resources, Questar, Oneok, TransCanada, Spectra Energy, Enbridge and Williams. The graph below assumes an investment of $100 at the beginning of the period.

Cumulative Total Shareholder Return

	2002	2003	2004	2005	2006	2007
The Williams Companies, Inc.	100.0	365.7	610.2	878.3	1,004.5	1,393.1
S&P 500 Index	100.0	128.7	142.7	149.7	173.3	182.8
Bloomberg U.S. Pipelines Index	100.0	164.1	208.8	269.7	304.9	352.7

Item 6. *Selected Financial Data*

The following financial data should be read in conjunction with Part II, Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* and Part II, Item 8, *Financial Statements and Supplementary Data*.

	2007	2006	2005	2004	2003
	(Millions, except per-share amounts)				
Revenues(1)	$10,558	$ 9,376	$ 9,781	$ 8,408	$ 8,615
Income (loss) from continuing operations(2)	847	347	473	149	(248)
Income (loss) from discontinued operations(3)	143	(38)	(157)	15	517
Cumulative effect of change in accounting principles(4)	—	—	(2)	—	(761)
Diluted earnings (loss) per common share:					
Income (loss) from continuing operations	1.40	.57	.79	.28	(.54)
Income (loss) from discontinued operations	.23	(.06)	(.26)	.03	1.00
Cumulative effect of change in accounting principles	—	—	—	—	(1.47)
Total assets at December 31	25,061	25,402	29,443	23,993	27,022
Short-term notes payable and long-term debt due within one year at December 31	143	392	123	250	939
Long-term debt at December 31	7,757	7,622	7,591	7,712	11,040
Stockholders' equity at December 31	6,375	6,073	5,427	4,956	4,102
Cash dividends per common share	.39	.345	.25	.08	.04

(1) *Revenues* in 2003 includes approximately $117 million related to the correction of the accounting treatment previously applied to certain third-party derivative contracts during 2002 and 2001.

(2) See Note 4 of Notes to Consolidated Financial Statements for discussion of asset sales and other accruals in 2007, 2006, and 2005.

(3) See Note 2 of Notes to Consolidated Financial Statements for the analysis of the 2007, 2006 and 2005 income (loss) from discontinued operations. The discontinued operations results for 2004 and 2003 include the power business, the Canadian straddle plants, and the Alaska refining, retail, and pipeline operations. The 2003 discontinued operations results also include certain gas processing and natural gas liquid operations in Canada, a soda ash mining operation, a bio-energy operation, Texas Gas Transmission Corporation, certain natural gas production properties, our interest and investment in Williams Energy Partners, refining and marketing operations in the midsouth, and retail travel centers in the midsouth.

(4) The 2005 *cumulative effect of change in accounting principles* is due to implementation of Financial Accounting Standards Board (FASB) Interpretation No. 47 (FIN 47), "Accounting for Conditional Asset Retirement Obligations — an Interpretation of FASB statement No. 143 (SFAS 143)." The 2003 cumulative effect of change in accounting principles includes a $762 million charge related to the adoption of Emerging Issues Task Force Issue No. 02-3, slightly offset by $1 million related to the adoption of SFAS 143, "Accounting for Asset Retirement Obligations." The $762 million charge primarily consisted of the then fair value of power tolling, power load serving, gas transportation and gas storage contracts. The contracts were not derivatives and, therefore, were no longer reported at fair value.

Table of Contents

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

General

We are primarily a natural gas company, engaged in finding, producing, gathering, processing, and transporting natural gas. Our operations are located principally in the United States and are organized into the following reporting segments: Exploration & Production, Gas Pipeline, Midstream Gas & Liquids (Midstream), and Gas Marketing Services. (See Note 1 of Notes to Consolidated Financial Statements for further discussion of reporting segments.)

Unless indicated otherwise, the following discussion of critical accounting estimates, discussion and analysis of results of operations and financial condition and liquidity relates to our current continuing operations and should be read in conjunction with the consolidated financial statements and notes thereto included in Part II Item 8 of this document.

Overview of 2007

Our plan for 2007 was focused on continued disciplined growth. Objectives and highlights of this plan included:

Objectives	Highlights
Continuing to improve both EVA® and segment profit.	2007 segment profit of almost $2.2 billion contributed to improving our EVA®.
Investing in our businesses in a way that improves EVA®, meets customer needs, and enhances our competitive position.	Total capital expenditures were approximately $2.8 billion, of which approximately $1.7 billion was invested in Exploration & Production.
Continuing to increase natural gas production and reserves in a responsible and efficient manner.	Exploration & Production increased its average daily domestic production by approximately 21 percent over last year while adding 776 billion cubic feet equivalent in net reserves during 2007. Total year-end 2007 proved domestic natural gas reserves are 4.14 trillion cubic feet equivalent, up 12 percent from year-end 2006 reserves. Additionally, we received 2007 industry awards, including the Bureau of Land Management's Best Management Practice Award.
Increasing the scale of our gathering and processing business in key growth basins.	We invested approximately $587 million in capital expenditures in Midstream, including Deepwater Gulf expansion projects and completion of our Opal gas processing facility expansion.
Successfully resolving rate cases to enable our Gas Pipeline segment to create additional value.	Increased rates were effective, subject to refund, on January 1, 2007, for Northwest Pipeline and on March 1, 2007, for Transco. In March, the FERC approved Northwest Pipeline's new rates. In November, Transco filed a stipulation and settlement agreement with the FERC, which is subject to final approval.

Our 2007 *income from continuing operations* increased to $847 million, as compared to $347 million in 2006. Our *net cash provided by operating activities* was $2.2 billion in 2007 compared to $1.9 billion in 2006. These comparative results reflect:

- Increased operating income at Midstream due primarily to increased natural gas liquid (NGL) margins;

- Increased operating income at Exploration & Production associated with increased production volumes and higher net realized average prices;
- Increased operating income at Gas Pipeline due primarily to new rates effective in the first quarter of 2007;
- The absence of 2006 litigation expense associated with shareholder lawsuits and Gulf Liquids litigation.

Natural gas prices in the Rocky Mountain areas (Rockies) trended lower throughout 2007 due to strong drilling activities increasing third-party supplies while constrained by limited pipeline capacity. This trend has benefited Midstream as the lower regional gas prices contributed to increased NGL margins in the West region. Exploration & Production utilizes firm transportation contracts, which allow a substantial portion of their Rockies production to be sold at more advantageous market points, and basin-level collars and fixed-price hedges to reduce exposure to this trend.

See additional discussion in Results of Operations.

Recent Events

During third-quarter 2007, we formed Williams Pipeline Partners L.P. (WMZ) to own and operate natural gas transportation and storage assets. In January 2008, WMZ completed its initial public offering of 16.25 million common units at a price of $20.00 per unit. In February 2008, the underwriters also exercised their right to purchase an additional 1.65 million common units at the same price. A subsidiary of ours serves as the general partner of WMZ. The initial asset of the partnership is a 35 percent interest in Northwest Pipeline GP, formerly Northwest Pipeline Corporation. Upon completion of the transaction, we hold approximately 47.7 percent of the interests in WMZ, including the interests of the general partner.

In December 2007, Williams Partners L.P. acquired certain of our membership interests in Wamsutter LLC, the limited liability company that owns the Wamsutter system, from us for $750 million. Williams Partners L.P. completed the transaction after successfully closing a public equity offering of 9.25 million common units that yielded net proceeds of approximately $335 million. The partnership financed the remainder of the purchase price primarily through utilizing $250 million of term loan borrowings and issuing approximately $157 million of common units to us. Since Williams Partners L.P. is consolidated within our consolidated financial statements, the debt and equity issued by Williams Partners L.P. is reported as a component of our consolidated debt balance and minority interest balance, respectively. (See Note 1 of Notes to Consolidated Financial Statements.)

In December 2007, we repurchased $213 million of 7.125 percent notes due September 2011 and $22 million of 8.125 percent notes due March 2012. In conjunction with these early retirements, we paid premiums of approximately $19 million. These premiums, as well as related fees and expenses are recorded as *early debt retirement costs* in the Consolidated Statement of Income.

On November 9, 2007, we closed on the sale of substantially all of our power business to Bear Energy, LP, a unit of The Bear Stearns Companies, Inc., for $496 million, subject to post-closing adjustments. The assets sold included tolling contracts, full requirements contracts, tolling resales, heat rate options, related hedges and other related assets including certain property and software. This sale reduces the risk and complexity of our overall business model.

In November 2007, our credit ratings were raised to investment grade based on improvements in our credit outlook. As we continue to invest and grow our natural gas businesses, our improved credit rating is expected to provide greater access to capital and more favorable loan terms. See additional discussion of credit ratings in *Management's Discussion and Analysis of Financial Condition*.

On November 28, 2007, Transco filed a formal stipulation and agreement with the FERC resolving all substantive issues in Transco's pending 2006 rate case. Final resolution of the rate case is subject to approval by the FERC.

In July 2007, our Board of Directors authorized the repurchase of up to $1 billion of our common stock. We intend to purchase shares of our stock from time to time in open-market transactions or through privately negotiated

Table of Contents

or structured transactions at our discretion, subject to market conditions and other factors. This stock-repurchase program does not have an expiration date. During 2007, we repurchased approximately 16 million shares for $526 million at an average cost of $33.08 per share. We are funding this program with cash on hand.

In April 2007, our Board of Directors approved a regular quarterly dividend of 10 cents per share, which reflected an increase of 11 percent compared to the 9 cents per share that we paid in each of the four prior quarters and marked the fourth increase in our dividend since late 2004.

On March 30, 2007, the FERC approved the stipulation and settlement agreement with respect to the rate case for Northwest Pipeline. The settlement establishes an increase in general system firm transportation rates on Northwest Pipeline's system from $0.30760 to $0.40984 per Dth (dekatherm), effective January 1, 2007.

Outlook for 2008

Our plan for 2008 is focused on continued disciplined growth. Objectives of this plan include:

- Continue to improve both EVA® and segment profit.
- Invest in our businesses in a way that improves EVA®, meets customer needs, and enhances our competitive position.
- Continue to increase natural gas production and reserves.
- Increase the scale of our gathering and processing business in key growth basins.

Potential risks and/or obstacles that could prevent us from achieving these objectives include:

- Volatility of commodity prices;
- Lower than expected levels of cash flow from operations;
- Decreased drilling success at Exploration & Production;
- Decreased drilling success by third parties served by Midstream and Gas Pipeline;
- Exposure associated with our efforts to resolve regulatory and litigation issues (see Note 15 of Notes to Consolidated Financial Statements);
- General economic and industry downturn.

We continue to address these risks through utilization of commodity hedging strategies, focused efforts to resolve regulatory issues and litigation claims, disciplined investment strategies, and maintaining our desired level of at least $1 billion in liquidity from cash and cash equivalents and unused revolving credit facilities.

New Accounting Standards and Emerging Issues

Accounting standards that have been issued and are not yet effective may have an effect on our Consolidated Financial Statements in the future. These include:

- SFAS No. 141(R) "Business Combinations" (SFAS No. 141(R)). SFAS No. 141(R) is effective for business combinations with an acquisition date in fiscal years beginning after December 15, 2008.
- SFAS No. 160 "Noncontrolling Interests in Consolidated Financial Statements — an amendment of Accounting Research Bulletin No. 51" (SFAS No. 160). SFAS No. 160 is effective for fiscal years beginning after December 15, 2008.

See *Recent Accounting Standards* in Note 1 of Notes to Consolidated Financial Statements for further information on these and other recently issued accounting standards.

Critical Accounting Estimates

The preparation of financial statements, in conformity with generally accepted accounting principles, requires management to make estimates and assumptions that affect the reported amounts therein. We have discussed the following accounting estimates and assumptions as well as related disclosures with our Audit Committee. We believe that the nature of these estimates and assumptions is material due to the subjectivity and judgment necessary, or the susceptibility of such matters to change, and the impact of these on our financial condition or results of operations.

Revenue Recognition — Derivative Instruments and Hedging Activities

We hold a portfolio of energy trading and nontrading contracts. We review these contracts to determine whether they are nonderivatives or derivatives. If they are derivatives, we further assess whether the contracts qualify for either cash flow hedge accounting or the normal purchases and normal sales exception.

The determination of whether a derivative contract qualifies as a cash flow hedge includes an analysis of historical market price information to assess whether the derivative is expected to be highly effective in achieving offsetting cash flows attributed to the hedged risk. We also assess whether the hedged forecasted transaction is probable of occurring. This assessment requires us to exercise judgment and consider a wide variety of factors in addition to our intent, including internal and external forecasts, historical experience, changing market and business conditions, our financial and operational ability to carry out the forecasted transaction, the length of time until the forecasted transaction is projected to occur, and the quantity of the forecasted transaction. In addition, we compare actual cash flows to those that were expected from the underlying risk. If a hedged forecasted transaction is not probable of occurring, or if the derivative contract is not expected to be highly effective, the derivative does not qualify for hedge accounting.

For derivatives that are designated as cash flow hedges, we do not reflect the effective portion of changes in their fair value in earnings until the associated hedged item affects earnings. For those that have not been designated as hedges or do not qualify for hedge accounting, we recognize the net change in their fair value in income currently (marked to market).

For derivatives that are designated as cash flow hedges, we prospectively discontinue hedge accounting and recognize future changes in fair value directly in earnings if we no longer expect the hedge to be highly effective, or if we believe that the hedged forecasted transaction is no longer probable of occurring. If the forecasted transaction becomes probable of not occurring, we reclass amounts previously recorded in other comprehensive income into earnings in addition to prospectively discontinuing hedge accounting. If the effectiveness of the derivative improves and is again expected to be highly effective in offsetting cash flows attributed to the hedged risk, or if the forecasted transaction again becomes probable, we may prospectively re-designate the derivative as a hedge of the underlying risk.

Derivatives for which the normal purchases and normal sales exception has been elected are accounted for on an accrual basis. In determining whether a derivative is eligible for this exception, we assess whether the contract provides for the purchase or sale of a commodity that will be physically delivered in quantities expected to be used or sold over a reasonable period in the normal course of business. In making this assessment, we consider numerous factors, including the quantities provided under the contract in relation to our business needs, delivery locations per the contract in relation to our operating locations, duration of time between entering the contract and delivery, past trends and expected future demand, and our past practices and customs with regard to such contracts. Additionally, we assess whether it is probable that the contract will result in physical delivery of the commodity and not net financial settlement.

The fair value of derivative contracts is determined based on the nature of the transaction and the market in which transactions are executed. We also incorporate assumptions and judgments about counterparty performance and credit considerations in our determination of their fair value. Contracts are executed in the following environments:

- Organized commodity exchange or over-the-counter markets with quoted prices;
- Organized commodity exchange or over-the-counter markets with quoted market prices but limited price transparency, requiring increased judgment to determine fair value;
- Markets without quoted market prices.

The number of transactions executed without quoted market prices is limited. We estimate the fair value of these contracts by using readily available price quotes in similar markets and other market analyses. The fair value of all derivative contracts is continually subject to change as the underlying commodity market changes and our assumptions and judgments change.

Additional discussion of the accounting for energy contracts at fair value is included in Energy Trading Activities within Item 7 and Note 1 of Notes to Consolidated Financial Statements.

Oil- and Gas-Producing Activities

We use the successful efforts method of accounting for our oil- and gas-producing activities. Estimated natural gas and oil reserves and forward market prices for oil and gas are a significant part of our financial calculations. Following are examples of how these estimates affect financial results:

- An increase (decrease) in estimated proved oil and gas reserves can reduce (increase) our unit-of-production depreciation, depletion and amortization rates.
- Changes in oil and gas reserves and forward market prices both impact projected future cash flows from our oil and gas properties. This, in turn, can impact our periodic impairment analyses, including that for goodwill.

The process of estimating natural gas and oil reserves is very complex, requiring significant judgment in the evaluation of all available geological, geophysical, engineering, and economic data. After being estimated internally, 99 percent of our reserve estimates are either audited or prepared by independent experts. (See Part I Item 1 for further discussion.) The data may change substantially over time as a result of numerous factors, including additional development activity, evolving production history, and a continual reassessment of the viability of production under changing economic conditions. As a result, material revisions to existing reserve estimates could occur from time to time. A revision of our reserve estimates within reasonably likely parameters is not expected to result in an impairment of our oil and gas properties or goodwill. However, reserve estimate revisions would impact our depreciation and depletion expense prospectively. For example, a change of approximately 10 percent in oil and gas reserves for each basin would change our annual *depreciation, depletion and amortization* expense between approximately $33 million and $41 million. The actual impact would depend on the specific basins impacted and whether the change resulted from proved developed, proved undeveloped or a combination of these reserve categories.

Forward market prices, which are utilized in our impairment analyses, include estimates of prices for periods that extend beyond those with quoted market prices. This forward market price information is consistent with that generally used in evaluating our drilling decisions and acquisition plans. These market prices for future periods impact the production economics underlying oil and gas reserve estimates. The prices of natural gas and oil are volatile and change from period to period, thus impacting our estimates. An unfavorable change in the forward price curve within reasonably likely parameters is not expected to result in an impairment of our oil and gas properties or goodwill.

Contingent Liabilities

We record liabilities for estimated loss contingencies, including environmental matters, when we assess that a loss is probable and the amount of the loss can be reasonably estimated. Revisions to contingent liabilities are generally reflected in income in the period in which new or different facts or information become known or circumstances change that affect the previous assumptions with respect to the likelihood or amount of loss. Liabilities for contingent losses are based upon our assumptions and estimates and upon advice of legal counsel, engineers, or other third parties regarding the probable outcomes of the matter. As new developments occur or more information becomes available, our assumptions and estimates of these liabilities may change. Changes in our assumptions and estimates or outcomes different from our current assumptions and estimates could materially affect future results of operations for any particular quarterly or annual period. See Note 15 of Notes to Consolidated Financial Statements.

Table of Contents

Valuation of Deferred Tax Assets and Tax Contingencies

We have deferred tax assets resulting from certain investments and businesses that have a tax basis in excess of the book basis and from tax carry-forwards generated in the current and prior years. We must evaluate whether we will ultimately realize these tax benefits and establish a valuation allowance for those that may not be realizable. This evaluation considers tax planning strategies, including assumptions about the availability and character of future taxable income. At December 31, 2007, we have $717 million of deferred tax assets for which a $57 million valuation allowance has been established. When assessing the need for a valuation allowance, we considered forecasts of future company performance, the estimated impact of potential asset dispositions and our ability and intent to execute tax planning strategies to utilize tax carryovers. We do not expect to be able to utilize $57 million of foreign deferred tax assets primarily related to carryovers. The ultimate amount of deferred tax assets realized could be materially different from those recorded, as influenced by potential changes in jurisdictional income tax laws and the circumstances surrounding the actual realization of related tax assets.

We regularly face challenges from domestic and foreign tax authorities regarding the amount of taxes due. These challenges include questions regarding the timing and amount of deductions and the allocation of income among various tax jurisdictions. Beginning January 1, 2007, we evaluate the liability associated with our various filing positions by applying the two step process of recognition and measurement as required by Financial Accounting Standards Board (FASB) Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109" (FIN 48). The ultimate disposition of these contingencies could have a significant impact on net cash flows. To the extent we were to prevail in matters for which accruals have been established or were required to pay amounts in excess of our accrued liability, our effective tax rate in a given financial statement period may be materially impacted.

See Note 5 of Notes to Consolidated Financial Statements for additional information regarding FIN 48 and tax carryovers.

Pension and Postretirement Obligations

We have employee benefit plans that include pension and other postretirement benefits. Net periodic benefit expense and obligations are impacted by various estimates and assumptions. These estimates and assumptions include the expected long-term rates of return on plan assets, discount rates, expected rate of compensation increase, health care cost trend rates, and employee demographics, including retirement age and mortality. These assumptions are reviewed annually and adjustments are made as needed. The assumptions utilized to compute expense and the benefit obligations are shown in Note 7 of Notes to Consolidated Financial Statements. The following table presents the estimated increase (decrease) in net periodic benefit expense and obligations resulting from a one-percentage-point change in the specified assumption.

	Benefit Expense		Benefit Obligation	
	One-Percentage-Point Increase	One-Percentage-Point Decrease	One-Percentage-Point Increase	One-Percentage-Point Decrease
	(Millions)			
Pension benefits:				
Discount rate	$ (6)	$ 11	$ (106)	$ 120
Expected long-term rate of return on plan assets	(11)	11	—	—
Rate of compensation increase	2	(2)	13	(13)
Other postretirement benefits:				
Discount rate	(4)	—	(37)	43
Expected long-term rate of return on plan assets	(2)	2	—	—
Assumed health care cost trend rate	5	(7)	55	(44)

The expected long-term rates of return on plan assets are determined by combining a review of historical returns realized within the portfolio, the investment strategy included in the plans’ Investment Policy Statement, and capital market projections for the asset classifications in which the portfolio is invested as well as the target weightings of each asset classification. These rates are impacted by changes in general market conditions, but because they are long-term in nature, short-term market swings do not significantly impact the rates. Changes to our target asset allocation would also impact these rates. Our expected long-term rate of return on plan assets used for our pension plans is 7.75 percent for 2007. This rate was 7.75 percent in 2006 and 8.5 percent from 2002-2005. Over the past ten years, our actual average return on plan assets for our pension plans has been approximately 7.7 percent.

The discount rates are used to measure the benefit obligations of our pension and other postretirement benefit plans. The objective of the discount rates is to determine the amount, if invested at the December 31 measurement date in a portfolio of high-quality debt securities, that will provide the necessary cash flows when benefit payments are due. Increases in the discount rates decrease the obligation and, generally, decrease the related expense. The discount rates for our pension and other postretirement benefit plans were determined separately based on an approach specific to our plans and their respective expected benefit cash flows as described in Note 7 of Notes to Consolidated Financial Statements. Our discount rate assumptions are impacted by changes in general economic and market conditions that affect interest rates on long-term high-quality debt securities as well as the duration of our plans' liabilities.

The expected rate of compensation increase represents average long-term salary increases. An increase in this rate causes pension obligation and expense to increase.

The assumed health care cost trend rates are based on our actual historical cost rates that are adjusted for expected changes in the health care industry. An increase in this rate causes other postretirement benefit obligation and expense to increase.

Table of Contents

Results of Operations

Consolidated Overview

The following table and discussion is a summary of our consolidated results of operations for the three years ended December 31, 2007. The results of operations by segment are discussed in further detail following this consolidated overview discussion.

	Years Ended December 31,						
	2007	$ Change from 2006(1)	% Change from 2006(1)	2006	$ Change from 2005(1)	% Change from 2005(1)	2005
	(Millions)			(Millions)			(Millions)
Revenues	$ 10,558	+1,182	+13%	$ 9,376	−405	−4%	$ 9,781
Costs and expenses:							
Costs and operating expenses	8,079	−513	−7%	7,566	+319	+4%	7,885
Selling, general and administrative expenses	471	−82	−21%	389	−112	−40%	277
Other (income) expense — net	(18)	+52	NM	34	+23	+40%	57
General corporate expenses	161	−29	−22%	132	+13	+9%	145
Securities litigation settlement and related costs	—	+167	+100%	167	−158	NM	9
Total costs and expenses	8,693			8,288			8,373
Operating income	1,865			1,088			1,408
Interest accrued — net	(653)	—	—	(653)	+7	+1%	(660)
Investing income	257	+89	+53%	168	+143	NM	25
Early debt retirement costs	(19)	+12	+39%	(31)	−31	NM	—
Minority interest in income of consolidated subsidiaries	(90)	−50	−125%	(40)	−14	−54%	(26)
Other income — net	11	−15	−58%	26	−1	−4%	27
Income from continuing operations before income taxes and cumulative effect of change in accounting principle	1,371			558			774
Provision for income taxes	524	−313	−148%	211	+90	+30%	301
Income from continuing operations	847			347			473
Income (loss) from discontinued operations	143	+181	NM	(38)	+119	+76%	(157)
Income before cumulative effect of change in accounting principle	990			309			316
Cumulative effect of change in accounting principle	—	—	—	—	+2	+100%	(2)
Net income	$ 990			$ 309			$ 314

(1) + = Favorable change to *net income*;− = Unfavorable change to *net income*; NM = A percentage calculation is not meaningful due to change in signs, a zero-value denominator or a percentage change greater than 200.

2007 vs. 2006

The increase in *revenues* is due primarily to higher Midstream revenues associated with increased natural gas liquid (NGL) and olefins marketing revenues and increased production of olefins and NGLs. Exploration & Production experienced higher revenues also due to increases in production volumes and net realized average prices. Additionally, Gas Pipeline revenues increased primarily due to increased rates in effect since the first quarter of 2007. These increases are partially offset by a mark-to-market loss recognized at Gas Marketing Services on a legacy derivative natural gas sales contract that we expect to assign to another party in 2008 under an asset transfer agreement that we executed in December 2007.

The increase in *costs and operating expenses* is due primarily to increased NGL and olefins marketing purchases and increased costs associated with our olefins production business at Midstream. Additionally, Exploration & Production experienced higher depreciation, depletion and amortization and lease operating expenses due primarily to higher production volumes.

The increase in *selling, general and administrative expenses (SG&A)* is primarily due to increased staffing in support of increased drilling and operational activity at Exploration & Production, the absence of a $25 million gain in 2006 related to the sale of certain receivables at Gas Marketing Services, and a $9 million charge related to certain international receivables at Midstream.

Other (income) expense — net within *operating income* in 2007 includes:

- Income of $18 million associated with payments received for a terminated firm transportation agreement on Northwest Pipeline's Grays Harbor lateral;
- Income of $17 million associated with a change in estimate related to a regulatory liability at Northwest Pipeline;
- Income of $12 million related to a favorable litigation outcome at Midstream;
- Income of $8 million due to the reversal of a planned major maintenance accrual at Midstream;
- Expense of $20 million related to an accrual for litigation contingencies at Gas Marketing Services;
- Expense of $10 million related to an impairment of the Carbonate Trend pipeline at Midstream.

Other (income) expense — net within *operating income* in 2006 includes:

- A $73 million accrual for a Gulf Liquids litigation contingency;
- Income of $9 million due to a settlement of an international contract dispute at Midstream.

The increase in *general corporate expenses* is attributable to various factors, including higher employee-related costs, increased levels of charitable contributions and information technology expenses. The higher employee-related costs are primarily the result of higher stock compensation expense. (See Note 1 of Notes to Consolidated Financial Statements.)

The *securities litigation settlement and related costs* is primarily the result of our 2006 settlement related to class-action securities litigation filed on behalf of purchasers of our securities between July 24, 2000 and July 22, 2002. (See Note 15 of Notes to Consolidated Financial Statements.)

The increase in *operating income* reflects record high NGL margins at Midstream, continued strong natural gas production growth at Exploration & Production, the positive effect of new rates at Gas Pipeline, and the absence of 2006 litigation expenses associated with shareholder lawsuits and Gulf Liquids litigation.

Interest accrued — net includes a decrease of $19 million in interest expense associated with our Gulf Liquids litigation contingency, offset by changes in our debt portfolio, most significantly the issuance of new debt in December 2006 by Williams Partners L.P.

The increase in *investing income* is due to:

- An approximate $27 million increase in interest income primarily associated with larger cash and cash equivalent balances combined with slightly higher rates of return in 2007 compared to 2006;
- Increased equity earnings of $38 million due largely to increased earnings of our Gulfstream Natural Gas System, L.L.C. (Gulfstream), Discovery Producer Services LLC (Discovery) and Aux Sable Liquid Products, L.P. (Aux Sable) investments;
- The absence of a $16 million impairment in 2006 of a Venezuelan cost-based investment at Exploration & Production;
- Approximately $14 million of gains from sales of cost-based investments in 2007.

These increases are partially offset by the absence of an approximately $7 million gain on the sale of an international investment in 2006.

Early debt retirement costs in 2007 includes $19 million of premiums and fees related to the December 2007 repurchase of senior unsecured notes. (See Note 11 of Notes to Consolidated Financial Statements.) *Early debt retirement costs* in 2006 includes $27 million in premiums and fees related to the January 2006 debt conversion and $4 million of accelerated amortization of debt expenses related to the retirement of the debt secured by assets of Williams Production RMT Company.

Minority interest in income of consolidated subsidiaries increased primarily due to the growth in the minority interest holdings of Williams Partners L.P.

Provision for income taxes was significantly higher in 2007 due primarily to higher pre-tax earnings. The effective income tax rate for 2007 is slightly higher than the federal statutory rate primarily due to the effect of taxes on foreign operations and an accrual for income tax contingencies, partially offset by the utilization of charitable contribution carryovers not previously benefited. The effective income tax rate for 2006 is slightly higher than the federal statutory rate primarily due to state income taxes, the effect of taxes on foreign operations, nondeductible convertible debenture expenses and an accrual for income tax contingencies, partially offset by the favorable resolution of federal income tax litigation and the utilization of charitable contribution carryovers not previously benefited. The 2006 effective income tax rate has been increased by an adjustment to increase overall deferred income tax liabilities. (See Note 5 of Notes to Consolidated Financial Statements.)

Income (loss) from discontinued operations in 2007 primarily includes the operating results of substantially all of our power business and the sale of that business, which was completed in November 2007. (See Note 2 of Notes to Consolidated Financial Statements.) These results include the following pre-tax items:

- A $429 million gain associated with the reclassification of deferred net hedge gains from *accumulated other comprehensive income,* partially offset by unrealized mark-to-market losses of approximately $23 million;
- A $111 million impairment charge related to the carrying value of certain derivative contracts for which we had previously elected the normal purchases and normal sales exception under SFAS 133 and, accordingly, were no longer recording at fair value;
- A $37 million loss on the sale of substantially all of our power business;
- A $14 million impairment charge for our Hazelton power generation facility.

Income (loss) from discontinued operations in 2006 includes:

- A $14 million net-of-tax loss related to our discontinued power business (see Note 2 of Notes to Consolidated Financial Statements);
- A $12 million net-of-tax litigation settlement related to our former chemical fertilizer business;
- A $4 million net-of-tax charge associated with the settlement of a loss contingency related to a former exploration business;
- A $9 million net-of-tax charge associated with an oil purchase contract related to our former Alaska refinery.

2006 vs. 2005

The decrease in *revenues* is primarily due to lower natural gas realized revenues at Gas Marketing Services associated with lower natural gas sales prices. Additionally, the effect of a change in forward prices on legacy natural gas derivative contracts not designated as cash flow hedges had an unfavorable impact on revenues. Partially offsetting these decreases are increased crude, olefin and NGL marketing revenues, higher NGL production revenue at Midstream and increased production revenue at Exploration & Production.

The decrease in *costs and operating expenses* is largely due to reduced natural gas purchase prices at Gas Marketing Services. Partially offsetting these decreases are increased crude, olefin and NGL marketing purchases and operating expenses at Midstream and increased depreciation, depletion and amortization and lease operating expense at Exploration & Production.

The increase in *SG&A expenses* is primarily due to increased personnel costs, insurance expense, higher information systems support costs and the absence of a $17 million reduction of pension expense at Gas Pipeline in 2005. Additionally, Exploration & Production experienced higher costs due to increased staffing in support of increased drilling and operational activity.

Other (income) expense — net within *operating income* in 2005 includes:

- An $82 million accrual for litigation contingencies at Gas Marketing Services, associated primarily with agreements reached to substantially resolve exposure related to certain natural gas price and volume reporting issues;

- Gains totaling $30 million on the sale of certain natural gas properties at Exploration & Production;

- A gain of $9 million on a sale of land in our Other segment.

General corporate expenses decreased primarily due to the absence of $14 million of insurance settlement charges in 2005 associated with certain insurance coverage allocation issues.

The decrease in *operating income* primarily reflects the negative effect of a change in forward prices on natural gas derivative contracts at Gas Marketing Services, higher operating and administrative costs at Gas Pipeline and 2006 litigation expenses associated with shareholder lawsuits and Gulf Liquids litigation. These decreases are partially offset by higher margins at Midstream and the absence a 2005 accrual for estimated litigation contingencies associated primarily with agreements reached to substantially resolve exposure related to natural gas price and volume reporting issues.

Interest accrued — net in 2006 includes $22 million in interest expense associated with our Gulf Liquids litigation contingency.

The increase in *investing income* is due to:

- The absence of an $87 million impairment in 2005 on our investment in Longhorn Partners Pipeline, L.P. (Longhorn);

- The absence of a $23 million impairment in 2005 of our Aux Sable equity investment;

- An approximate $30 million increase in interest income primarily associated with increased earnings on cash and cash equivalent balances associated with higher rates of return;

- Increased equity earnings of $33 million due largely to the absence of equity losses in 2006 on Longhorn and increased earnings of our Discovery and Aux Sable investments.

These increases are partially offset by:

- A $16 million impairment of a Venezuelan cost-based investment at Exploration & Production in 2006;

- The absence of a $9 million gain on sale of our remaining Mid-America Pipeline (MAPL) and Seminole Pipeline (Seminole) investments at Midstream in 2005.

The increase in *minority interest in income of consolidated subsidiaries* is primarily due to the growth of Williams Partners L.P.

Provision for income taxes was significantly lower in 2006 due primarily to lower pre-tax earnings. The effective income tax rate for 2006 is slightly higher than the federal statutory rate primarily due to state income taxes, the effect of taxes on foreign operations, nondeductible convertible debenture expenses and an accrual for income tax contingencies, partially offset by the favorable resolution of federal income tax litigation and the utilization of charitable contribution carryovers not previously benefited. The 2006 effective income tax rate has been increased by an adjustment to increase overall deferred income tax liabilities. The effective income tax rate for 2005 is higher than the federal statutory rate due primarily to state income taxes, nondeductible expenses and the inability to utilize charitable contribution carryovers. The 2005 effective income tax rate was reduced by an adjustment to reduce overall deferred income tax liabilities and favorable settlements on federal and state income tax matters. (See Note 5 of Notes to Consolidated Financial Statements.)

Income (loss) from discontinued operations in 2005 includes a $155 million net-of-tax loss related to our discontinued power business. (See Note 2 of Notes to Consolidated Financial Statements.)

Cumulative effect of change in accounting principle in 2005 is due to the implementation of FIN 47.

Results of Operations — Segments

We are currently organized into the following segments: Exploration & Production, Gas Pipeline, Midstream, Gas Marketing Services, and Other. Other primarily consists of corporate operations. Our management currently evaluates performance based on segment profit (loss) from operations. (See Note 17 of Notes to Consolidated Financial Statements.)

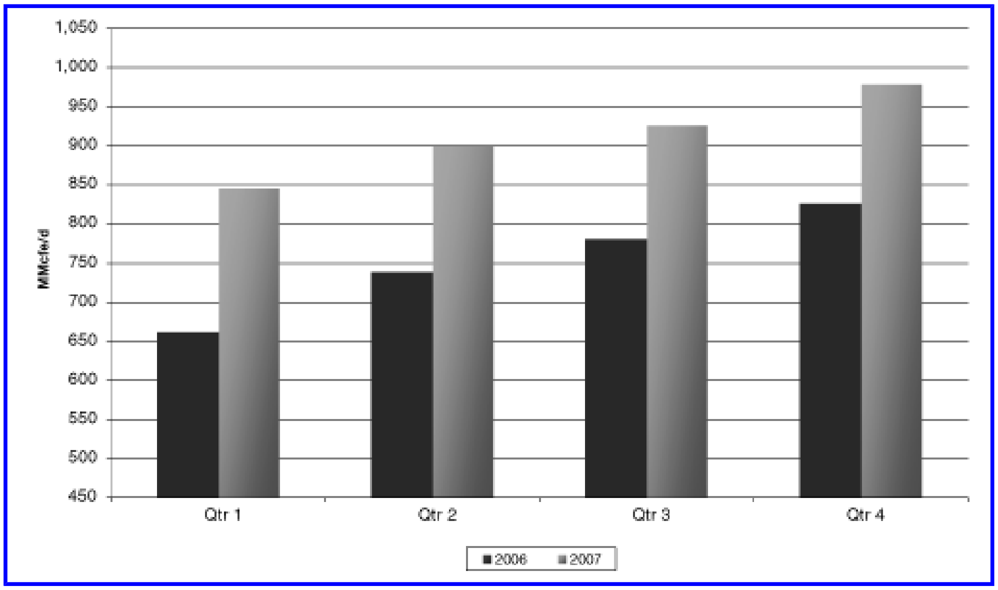
Exploration & Production

Overview of 2007

In 2007, we continued our strategy of a rapid execution of our development drilling program in our growth basins. Accordingly, we:

- Increased average daily domestic production levels by approximately 21 percent compared to last year. The average daily domestic production was approximately 913 million cubic feet of gas equivalent (MMcfe) in 2007 compared to 752 MMcfe in 2006. The increased production is primarily due to increased development within the Piceance, Powder River, and Fort Worth basins.

2007 vs 2006 Domestic Production



Average daily domestic production grew 21 percent or 161 MMcfe per day

- Benefited from increased domestic net realized average prices, which increased by approximately 15 percent compared to last year. The domestic net realized average price was $5.08 per thousand cubic feet of gas equivalent (Mcfe) in 2007 compared to $4.40 per Mcfe in 2006. Net realized average prices include market prices, net of fuel and shrink and hedge positions, less gathering and transportation expenses.
- Utilized firm transportation contracts which allowed a substantial portion of our Rockies production to be sold at more advantageous market points outside of the Rocky Mountain markets. Basin-level collars and fixed-price hedges also reduced our exposure to natural gas prices in the Rockies.
- Continued our aggressive development drilling program, drilling 1,590 gross wells in 2007 with a success rate of over 99 percent. This contributed to total net additions of 776 billion cubic feet equivalent (Bcfe) in net reserves — a replacement rate for our domestic production of 232 percent in 2007 compared to 216 percent in 2006. Capital expenditures for domestic drilling, development, and acquisition activity in 2007 were approximately $1.7 billion compared to approximately $1.4 billion in 2006.

The benefits of higher production volumes and higher net realized average prices were partially offset by increased operating costs. The increase in operating costs was primarily due to increased production volumes and higher well service and industry costs. In addition, higher production volumes increased depletion, depreciation and amortization expense.

Significant events

In February 2007, we entered into a five-year unsecured credit agreement with certain banks in order to reduce margin requirements related to our hedging activities as well as lower transaction fees. Margin requirements, if any, under this new facility are dependent on the level of hedging and on natural gas reserves value. (See Note 11 of Notes to Consolidated Financial Statements.) We may also execute hedges with the Gas Marketing Services segment, which, in turn, executes offsetting derivative contracts with unrelated third parties. In this situation, Gas Marketing Services, generally, bears the counterparty performance risks associated with unrelated third parties. Hedging decisions primarily are made considering our overall commodity risk exposure and are not executed independently by Exploration & Production.

In May and July 2007, we increased our position in the Fort Worth basin by acquiring producing properties and leasehold acreage for approximately $41 million. These acquisitions are consistent with our growth strategy of leveraging our horizontal drilling expertise by acquiring and developing low-risk properties in the Barnett Shale formation. In July 2007, we increased our position in the Piceance basin by acquiring additional undeveloped leasehold acreage for approximately $36 million.

Outlook for 2008

Our expectations and objectives for 2008 include:

- Maintaining our development drilling program in our key basins of Piceance, Powder River, San Juan, Arkoma, and Fort Worth through our planned capital expenditures projected between $1.45 billion and $1.65 billion.
- Continuing to grow our average daily domestic production level with a goal of approximately 10 to 15 percent annual growth.

Natural gas prices in the Rocky Mountain areas trended lower throughout 2007 due to strong drilling activities increasing supplies while constrained by limited pipeline capacity. However, we will continue to utilize firm transportation contracts which allow a substantial portion of our Rockies production to be sold at more advantageous market points. Our continued use of basin-level collars and fixed-price hedges should also reduce our exposure to this trend. The construction of a new third-party pipeline that began transporting gas from the Rocky Mountain areas in the beginning of 2008 should lessen pipeline transportation capacity constraints and provided an additional alternative market for the sale of production.

Approximately 70 MMcf of our forecasted 2008 daily domestic production is hedged by NYMEX and basis fixed-price contracts at prices that average $3.97 per Mcf at a basin level. In addition, we have the following collar agreements for our forecasted 2008 daily domestic production, shown at basin-level weighted-average prices and weighted-average volumes:

	Volume (MMcf/d)	Floor Price ($/Mcf)	Ceiling Price ($/Mcf)
2008 collar agreements:			
Northwest Pipeline/Rockies	170	$ 6.16	$ 9.14
El Paso/San Juan	202	$ 6.35	$ 8.96
Mid-Continent (PEPL)	25	$ 6.91	$ 9.13

Risks to achieving our expectations include unfavorable natural gas market price movements which are impacted by numerous factors including weather conditions and domestic natural gas production and consumption. Also, achievement of expectations can be affected by costs of services associated with drilling.

Table of Contents

In January 2008, we sold a contractual right to a production payment on certain future international hydrocarbon production for approximately $148 million. We have received $118 million in cash and $29 million has been placed in escrow subject to certain post-closing conditions and adjustments. We will recognize a pre-tax gain of approximately $118 million in the first quarter of 2008 related to the initial cash received. As a result of the contract termination, we have no further interests associated with the crude oil concession, which is located in Peru. We had obtained these interests through our acquisition of Barrett Resources Corporation in 2001.

Year-Over-Year Operating Results

	Years Ended December 31,		
	2007	2006	2005
		(Millions)	
Segment revenues	$2,093	$1,488	$1,269
Segment profit	$ 756	$ 552	$ 587

2007 vs. 2006

Total *segment revenues* increased $605 million, or 41 percent, primarily due to the following:

- $487 million, or 39 percent, increase in domestic production revenues reflecting $264 million associated with a 21 percent increase in production volumes sold and $223 million associated with a 15 percent increase in net realized average prices. The increase in production volumes reflects an increase in the number of producing wells primarily from the Piceance and Powder River basins. The impact of hedge positions on increased net realized average prices includes both the expiration of a portion of fixed-price hedges that are lower than the current market prices and higher than current market prices related to basin-specific collars entered into during the period. Production revenues in 2007 include approximately $53 million related to natural gas liquids. In 2006, approximately $29 million of similar revenues were classified within other revenues;
- $139 million increase in revenues for gas management activities related to gas sold on behalf of certain outside parties which is offset by a similar increase in *segment costs and expenses*;

These increases were partially offset by a $30 million decrease relating to hedge ineffectiveness. In 2006, there were $14 million in net unrealized gains from hedge ineffectiveness as compared to $16 million in net unrealized losses in 2007.

To manage the commodity price risk and volatility of owning producing gas properties, we enter into derivative forward sales contracts that fix the sales price relating to a portion of our future production. Approximately 19 percent of domestic production in 2007 was hedged by NYMEX and basis fixed-price contracts at a weighted-average price of $3.90 per Mcf at a basin level compared to 40 percent hedged at a weighted-average price of $3.82 per Mcf for 2006. Also, approximately 30 percent and 15 percent of 2007 and 2006 domestic production was

Table of Contents

hedged in the following collar agreements shown at basin-level weighted-average prices and weighted-average volumes:

	Volume (MMcf/d)	Floor Price ($/Mcf)	Ceiling Price ($/Mcf)
2007 collar agreements:			
NYMEX	15	$ 6.50	$ 8.25
Northwest Pipeline/Rockies	50	$ 5.65	$ 7.45
El Paso/San Juan	130	$ 5.98	$ 9.63
Mid-Continent (PEPL)	76	$ 6.82	$ 10.77
2006 collar agreements:			
NYMEX	49	$ 6.50	$ 8.25
NYMEX	15	$ 7.00	$ 9.00
Northwest Pipeline/Rockies	50	$ 6.05	$ 7.90

Total *segment costs and expenses* increased $404 million, primarily due to the following:

- $173 million higher depreciation, depletion and amortization expense primarily due to higher production volumes and increased capitalized drilling costs;
- $139 million increase in expenses for gas management activities related to gas purchased on behalf of certain outside parties which is offset by a similar increase in *segment revenues*;
- $46 million higher lease operating expenses from the increased number of producing wells primarily within the Piceance, Powder River, and Fort Worth basins in combination with higher well service expenses, facility expenses, equipment rentals, maintenance and repair services, and salt water disposal expenses;
- $36 million higher *SG&A expenses* primarily due to increased staffing in support of increased drilling and operational activity, including higher compensation. In addition, we incurred higher insurance and information technology support costs related to the increased activity. First quarter 2007 also includes approximately $5 million of expenses associated with a correction of costs incorrectly capitalized in prior periods.

The $204 million increase in s*egment profit* is primarily due to the 21 percent increase in domestic production volumes sold as well as the 15 percent increase in net realized average prices, partially offset by the increase in *segment costs and expenses.*

2006 vs. 2005

Total *segment revenues* increased $219 million, or 17 percent, primarily due to the following:

- $165 million, or 15 percent, increase in domestic production revenues reflecting $245 million primarily associated with a 23 percent increase in natural gas production volumes sold, offset by a decrease of $80 million associated with a 6 percent decrease in net realized average prices. The increase in production volumes is primarily from the Piceance and Powder River basins and the decrease in prices reflects the downward trending of market prices in the latter part of 2006.
- $10 million increase in production revenues from our international operations primarily due to increases in net realized average prices for crude oil production volumes sold.
- $14 million of net unrealized gains in 2006 from hedge ineffectiveness and forward mark-to-market gains on certain basis swaps not designated as hedges as compared to $10 million in net unrealized losses attributable to hedge ineffectiveness from NYMEX collars in 2005.

In 2005, approximately 47 percent of domestic production was hedged by NYMEX and basis fixed-price contracts at a weighted-average price of $3.99 per Mcf. Approximately 10 percent of domestic production was hedged by a NYMEX collar agreement for approximately 50 MMcf per day at a floor price of $7.50 per Mcf and a ceiling price of $10.49 per Mcf in the first quarter and at a floor price of $6.75 per Mcf and a ceiling price of $8.50 per Mcf in the second, third, and fourth quarters, and a Northwest Pipeline/Rockies collar agreement for approximately 50 MMcf per day in the fourth quarter at a floor price of $6.10 per Mcf and a ceiling price of $7.70 per Mcf.

Total *segment costs and expenses* increased $257 million, primarily due to the following:

- $107 million higher depreciation, depletion and amortization expense primarily due to higher production volumes and increased capitalized drilling costs;
- $54 million higher lease operating expense primarily due to the increased number of producing wells and higher well service and industry costs due to increased demand and approximately $6 million for out-of-period expenses related to 2005;
- $33 million higher selling, general and administrative expenses primarily due to higher compensation for additional staffing in support of increased drilling and operational activity. In addition, we incurred higher legal, insurance, and information technology support costs related to the increased activity;
- $19 million higher operating taxes primarily due to higher production volumes sold and increased tax rates;
- The absence in 2006 of $30 million of gains on the sales of properties in 2005.

The $35 million decrease in *segment profit* is primarily due to lower net realized average prices and higher *segment costs and expenses* as discussed previously, and the absence in 2006 of $30 million of gains on the sales of properties in 2005. Partially offsetting these decreases are a 23 percent increase in domestic production volumes sold and increase in income from ineffectiveness and forward mark-to-market gains. *Segment profit* also includes an $8 million increase in our international operations primarily due to higher revenue and equity earnings as a result of increases in net realized average prices for crude oil production volumes sold.

Gas Pipeline

Overview

Our strategy to create value for our shareholders focuses on maximizing the utilization of our pipeline capacity by providing high quality, low cost transportation of natural gas to large and growing markets.

Gas Pipeline's interstate transmission and storage activities are subject to regulation by the FERC and as such, our rates and charges for the transportation of natural gas in interstate commerce, and the extension, expansion or abandonment of jurisdictional facilities and accounting, among other things, are subject to regulation. The rates are established through the FERC's ratemaking process. Changes in commodity prices and volumes transported have little impact on revenues because the majority of cost of service is recovered through firm capacity reservation charges in transportation rates.

Significant events of 2007 include:

Gas Pipeline master limited partnership

During third-quarter 2007, we formed Williams Pipeline Partners L.P. (WMZ) to own and operate natural gas transportation and storage assets. In January 2008, WMZ completed its initial public offering of 16.25 million common units at a price of $20.00 per unit. In February 2008, the underwriters also exercised their right to purchase an additional 1.65 million common units at the same price. A subsidiary of ours serves as the general partner of WMZ. The initial asset of the partnership is a 35 percent interest in Northwest Pipeline GP, formerly Northwest Pipeline Corporation. Upon completion of the transaction, we hold approximately 47.7 percent of the interests in WMZ, including the interests of the general partner.

Status of rate cases

During 2006, Northwest Pipeline and Transco each filed general rate cases with the FERC for increases in rates. The new rates were effective, subject to refund, on January 1, 2007, for Northwest Pipeline and on March 1, 2007, for Transco.

On March 30, 2007, the FERC approved the stipulation and settlement agreement with respect to the rate case for Northwest Pipeline. The settlement establishes an increase in general system firm transportation rates on Northwest Pipeline's system from $0.30760 to $0.40984 per Dth (dekatherm), effective January 1, 2007.

On November 28, 2007, Transco filed a formal stipulation and agreement with the FERC resolving all substantive issues in Transco's pending 2006 rate case. Final resolution of the rate case is subject to approval by the FERC.

Parachute Lateral project

In May 2007, we placed into service a 37.6-mile expansion of 30-inch diameter line in northwest Colorado. The expansion increased capacity by 450 Mdt/d at a cost of approximately $86 million. In December 2007, this asset was purchased by Midstream. In an arrangement approved by the FERC, Midstream will lease the pipeline to Gas Pipeline, who will continue to operate the pipeline until completion of a planned FERC abandonment filing.

Leidy to Long Island expansion project

In December 2007, we placed into service an expansion of certain existing pipeline facilities in the northeast United States. The project increased firm transportation capacity by 100 Mdt/d at an approximate cost of $169 million.

Potomac expansion project

In November 2007, we placed into service 16.5 miles of 42-inch pipeline in the Mid-Atlantic region of the United States. The second phase of the project involving installation of certain facilities will be completed in the fall of 2008. The project provides 165 Mdt/d of incremental firm capacity at an approximate total cost of $88 million.

Outlook for 2008

Gulfstream

In June 2007, our equity method investee, Gulfstream, received FERC approval to extend its existing pipeline approximately 34 miles within Florida. The extension will fully subscribe the remaining 345 Mdt/d of firm capacity on the existing pipeline. Construction began in January 2008. The estimated cost of this project is approximately $130 million and is expected to be placed into service in July 2008.

In September 2007, Gulfstream received FERC approval to construct 17.5 miles of 20-inch pipeline and to install a new compressor facility. Construction began in December 2007. The pipeline expansion will increase capacity by 155 Mdt/d and is expected to be placed into service in September 2008. The compressor facility is expected to be placed into service in January 2009. The estimated cost of this project is approximately $153 million.

Sentinel expansion project

In December 2007, we filed an application with the FERC to construct an expansion in the northeast United States. The estimated cost of the project is approximately $169 million. The expansion will increase capacity by 142 Mdt/d and is expected to be placed into service in two phases, occurring in November 2008 and November 2009.

Jackson Prairie expansion project

We own a one-third interest in the Jackson Prairie underground storage facility located in Washington, with the remaining interests owned by two of our distribution customers. In February 2007, we received FERC approval to expand the Jackson Prairie facility. The expansion will increase our one-third share of the capacity by 104 Mdt/d and is expected to be placed into service in November 2008.

Year-Over-Year Operating Results

	Years Ended December 31,		
	2007	2006	2005
		(Millions)	
Segment revenues	$1,610	$1,348	$1,413
Segment profit	$ 673	$ 467	$ 586

2007 vs. 2006

Revenues increased $262 million, or 19 percent, due primarily to a $173 million increase in transportation revenue and a $25 million increase in storage revenue resulting primarily from new rates effective in the first quarter of 2007. In addition, revenues increased $59 million due to the sale of excess inventory gas.

Costs and operating expenses increased $86 million, or 11 percent, due primarily to:

- An increase of $59 million associated with the sale of excess inventory gas, which includes a $19 million deferred gain, half of which will be payable to customers, pending FERC approval;
- An increase in depreciation expense of $30 million due to property additions;
- An increase in personnel costs of $10 million due primarily to higher compensation as well as an increase in number of employees;
- The absence of a $3 million credit to expense recorded in 2006 related to corrections of the carrying value of certain liabilities.

Partially offsetting these increases is a decrease of $12 million in contract and outside service costs and a decrease of $7 million in materials and supplies expense.

Other (income) expense — net changed favorably by $15 million due primarily to $18 million of income associated with payments received for a terminated firm transportation agreement on Northwest Pipeline's Grays Harbor lateral. Also included in the favorable change is $17 million of income recorded in the second quarter of 2007 for a change in estimate related to a regulatory liability at Northwest Pipeline, partially offset by $18 million of expense related to higher asset retirement obligations.

Equity earnings increased $14 million due primarily to a $14 million increase in equity earnings from Gulfstream. Gulfstream's higher earnings were primarily due to a decrease in property taxes from a favorable litigation outcome as well as improved operating results.

The $206 million, or 44 percent, increase in *segment profit* is due primarily to $262 million higher revenues, $14 million higher equity earnings and $15 million favorable *other (income) expense — net* as previously discussed. Partially offsetting these increases are higher *costs and operating expenses* as previously discussed.

2006 vs. 2005

Significant 2005 adjustments

Operating results for 2005 included:

- Adjustments of $18 million reflected as a $12 million reduction of *costs and operating expenses* and a $6 million reduction of *SG&A expenses*. These cost reductions were corrections of the carrying value of certain liabilities that were recorded in prior periods. Based on a review by management, these liabilities were no longer required.
- Pension expense reduction of $17 million in the second quarter of 2005 to reflect the cumulative impact of a correction of an error attributable to 2003 and 2004. The error was associated with the actuarial

computation of annual net periodic pension expense and resulted from the identification of errors in certain Transco participant data involving annuity contract information utilized for 2003 and 2004.

- Adjustments of $37 million reflected as increases in *costs and operating expenses* related to $32 million of prior period accounting and valuation corrections for certain inventory items and an accrual of $5 million for contingent refund obligations.

Revenues decreased $65 million, or 5 percent, due primarily to $75 million lower revenues associated with exchange imbalance settlements (offset in *costs and operating expenses*). Partially offsetting this decrease is a $9 million increase in revenue due to an adjustment for the recovery of state income tax rate changes (offset in *provision for income taxes*).

Costs and operating expenses decreased $17 million, or 2 percent, due primarily to:

- A decrease in costs of $75 million associated with exchange imbalance settlements (offset in *revenues*);
- A decrease in costs of $37 million related to the absence of $32 million of 2005 prior period accounting and valuation corrections for certain inventory items and an accrual of $5 million for contingent refund obligations.

Partially offsetting these decreases are:

- An increase in contract and outside service costs of $23 million due primarily to higher pipeline assessment and repair costs;
- An increase in depreciation expense of $15 million due to property additions;
- An increase in operating and maintenance expenses of $15 million;
- An increase in operating taxes of $10 million;
- The absence of $14 million of income in 2005 associated with the resolution of litigation;
- The absence of $12 million of expense reductions during 2005 related to the carrying value of certain liabilities.

SG&A expenses increased $77 million, or 92 percent, due primarily to:

- An increase in personnel costs of $18 million;
- The absence of a 2005 $17 million reduction in pension costs to correct an error in prior periods;
- An increase in information systems support costs of $16 million;
- An increase in property insurance expenses of $14 million;
- The absence of $6 million of cost reductions in 2005 that related to correcting the carrying value of certain liabilities.

The $119 million, or 20 percent, decrease in *segment profit* is due primarily to the absence of significant 2005 adjustments as previously discussed, increases in *costs and operating expenses* and *SG&A expenses* as previously discussed, and the absence of a $5 million construction completion fee recognized in 2005 related to our investment in Gulfstream.

Midstream Gas & Liquids

Overview of 2007

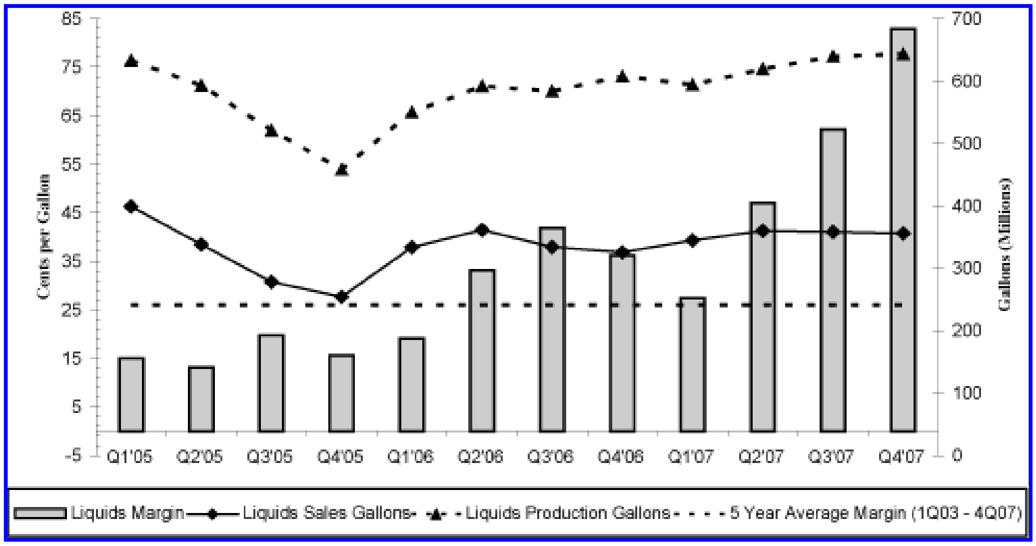
Midstream's ongoing strategy is to safely and reliably operate large-scale midstream infrastructure where our assets can be fully utilized and drive low per-unit costs. Our business is focused on consistently attracting new business by providing highly reliable service to our customers.

Significant events during 2007 include the following:

Continued favorable commodity price margins

The average realized natural gas liquid (NGL) per unit margins at our processing plants during 2007 was a record high 55 cents per gallon. NGL margins exceeded Midstream's rolling five-year average for the last seven quarters. The geographic diversification of Midstream assets contributed significantly to our realized unit margins resulting in margins generally greater than that of the industry benchmarks for gas processed in the Henry Hub area and fractionated and sold at Mont Belvieu. The largest impact was realized at our western United States gas processing plants, which benefited from lower regional market natural gas prices.

Domestic Gathering and Processing Per Unit NGL Margin with Production and Sales Volumes by Quarter (excludes partially owned plants)



Expansion efforts in growth areas

Consistent with our strategy, we continued to expand our midstream operations where we have large-scale assets in growth basins.

During the first quarter of 2007, we completed construction at our existing gas processing complex located near Opal, Wyoming, to add a fifth cryogenic gas processing train capable of processing up to 350 MMcf/d, bringing total Opal capacity to approximately 1,450 MMcf/d. This plant expansion became operational during the first quarter. We also have several expansion projects ongoing in the West region to lower field pressures and increase production volumes for our customers who continue robust drilling activities in the region.

We continue construction of 37-mile extensions of both of our oil and gas pipelines from our Devils Tower spar to the Blind Faith prospect located in Mississippi Canyon. These extensions, estimated to cost approximately $250 million, are expected to be ready for service by the second quarter of 2008.

During 2007, we have continued construction activities on the Perdido Norte project which includes oil and gas lines that would expand the scale of our existing infrastructure in the western deepwater of the Gulf of Mexico. In addition, we completed agreements with certain producers to provide gathering, processing and transportation services over the life of the reserves. We also intend to expand our Markham gas processing facility to adequately serve this new gas production. The scale of the project has increased to include additional pipeline and more efficient processing capacity. The estimated cost is now approximately $560 million, and it is expected to be in service in the third quarter of 2009.

In July 2007, we exercised our right of first refusal to acquire BASF's 5/12th ownership interest in the Geismar olefins facility for approximately $62 million. The acquisition increases our total ownership to 10/12th.

In March 2007, we announced plans to construct and operate the new Willow Creek facility, a 450 MMcf/d natural gas processing plant in western Colorado's Piceance basin, where Exploration & Production has its most significant volume of natural gas production, reserves and development activity. Exploration & Production's existing Piceance basin processing plants are primarily designed to condition the natural gas to meet quality specifications for pipeline transmission, not to maximize the extraction of NGLs. We expect the new Willow Creek facility to recover 25,000 barrels per day of NGLs at startup, which is expected to be in the third quarter of 2009.

In December 2007, we purchased the Parachute Lateral system from Gas Pipeline. The system is a 37.6-mile expansion, originally placed in service by Gas Pipeline in May 2007, and provides capacity of 450 Mdt/d through a 30-inch diameter line, transporting residue gas from the Piceance basin to the Greasewood Hub in northwest Colorado. The Willow Creek facility will straddle the Parachute Lateral pipeline and will process gas flowing through the pipeline. In an arrangement approved by the FERC, Midstream will lease the pipeline to Gas Pipeline, who will continue to operate the pipeline until completion of a planned FERC abandonment filing.

In addition, we have acquired an existing natural gas pipeline from Gas Pipeline, and begun the process of converting it from natural gas to NGL service and constructing additional pipeline to create a pipeline alternative for NGLs currently being transported by truck from Exploration & Production's existing Piceance basin processing plants to a major NGL transportation pipeline system.

We have also agreed to dedicate our equity NGL volumes from Willow Creek, along with our two Wyoming plants, for transport under a long-term shipping agreement with Overland Pass Pipeline Company, LLC. We currently have a 1 percent interest in Overland Pass Pipeline Company, LLC and have the option to increase our ownership to 50 percent and become the operator within two years of the pipeline becoming operational. Start-up is planned for mid-2008. The terms of the shipping agreement represent significant savings compared with agreements we are now utilizing.

Williams Partners L.P.

We currently own approximately 23.6 percent of Williams Partners L.P., including the interests of the general partner, which is wholly owned by us. Considering the control of the general partner in accordance with EITF Issue No. 04-5, Williams Partners L.P. is consolidated within the Midstream segment. (See Note 1 of Notes to Consolidated Financial Statements.) Midstream's segment profit includes 100 percent of Williams Partners L.P.'s segment profit, with the minority interest's share deducted below segment profit. The debt and equity issued by Williams Partners L.P. to third parties is reported as a component of our consolidated debt balance and minority interest balance, respectively.

In June 2007, Williams Partners L.P. completed its acquisition of our 20 percent interest in Discovery Producer Services, LLC (Discovery). Williams Partners L.P. now owns a 60 percent interest in Discovery.

In December 2007, Williams Partners L.P. acquired certain of our membership interests in Wamsutter LLC, the limited liability company that owns the Wamsutter system, from us for $750 million. Williams Partners L.P. completed the transaction after successfully closing a public equity offering of 9.25 million common units that yielded net proceeds of approximately $335 million. The partnership primarily financed the remainder of the purchase price through utilizing $250 million of term loan borrowings and issuing approximately $157 million of common units to us. The $250 million term loan is under Williams Partners L.P.'s new $450 million five-year senior unsecured credit facility that became effective simultaneous with the closing of the Wamsutter transaction. (See Note 11 of Notes to Consolidated Financial Statements.)

Ignacio Gas Processing Plant Fire

On November 28, 2007, there was a fire at the Ignacio gas processing plant. This fire resulted in severe damage to the facility's cooling tower, control room, adjacent warehouse buildings and control systems. The plant was shut down until January 18, 2008. There were no injuries as a result of this incident and the plant now has full cryogenic recovery capability available for operation. The impact of the fire was immaterial to our results of operations.

Outlook for 2008

The following factors could impact our business in 2008 and beyond.

- As evidenced in recent years, natural gas and crude oil markets are highly volatile. NGL margins earned at our gas processing plants in the last seven quarters were above our rolling five-year average, due to global economics maintaining high crude prices which correlate to strong NGL prices in relationship to natural gas prices. Forecasted domestic demand for ethylene and propylene, along with political instability in many of the key oil producing countries, currently support NGL margins continuing to exceed our rolling five-year average. Natural gas prices in the Rocky Mountain areas have trended lower throughout 2007 due to strong drilling activities increasing supplies while third-party production volumes have been constrained by limited pipeline capacity. The construction of a new third-party pipeline that began transporting gas from the Rocky Mountain areas in the beginning of 2008 would indicate increasing natural gas prices, moderating our future NGL margins.
- If the previously mentioned Overland Pass pipeline is not completed as scheduled, our NGL transportation costs will increase in the short-term over 2007 levels. When the pipeline is complete, the terms of our transportation agreement represent significant savings compared to 2007.
- As part of our efforts to manage commodity price risks on an enterprise basis, during December 2007 and January and February 2008, we entered into various financial contracts. Approximately 28 percent of our forecasted domestic NGL sales for 2008 are hedged with collar agreements or fixed-price swap contracts. Approximately 24 percent of our forecasted domestic NGL sales have been hedged with collar agreements at a weighted average sales price range of 9 percent to 22 percent above our average 2007 domestic NGL sales price and approximately 4 percent of our forecasted domestic NGL sales have been hedged with fixed-price swap contracts. The natural gas shrink requirements associated with the sales under the fixed-price swap contracts have also been hedged through Gas Marketing Services with physical gas purchase contracts, thus effectively hedging the margin on the volumes associated with fixed price swap contracts at a level about two times our rolling five-year average and approximating our 2007 average.
- Margins in our olefins business are highly dependent upon continued economic growth within the United States and any significant slow down in the economy would reduce the demand for the petrochemical products we produce in both Canada and the United States. Based on our increased ownership in our Geismar facility, we anticipate results from our olefins business to be above 2007 levels.
- Gathering and processing fee revenues in our West region in 2008 are expected to be at or slightly above levels of previous years due to continued strong drilling activities in our core basins.
- We expect fee revenues in our Gulf Coast region to increase in 2008 as we expand our Devil's Tower infrastructure to serve the Blind Faith and Bass Lite prospects. This increase is expected to be partially offset by lower volumes in other deepwater areas due to natural declines. Fee revenues include gathering, processing, production handling and transportation fees.
- Revenues from deepwater production areas are often subject to risks associated with the interruption and timing of product flows which can be influenced by weather and other third-party operational issues.
- The construction of deepwater pipelines is subject to the risk of pipe collapse from stresses during installation as well as from high hydrostatic pressure that could delay completion and increase costs. Our Perdido Norte project is located in the Gulf Coast region in the deepwater Gulf of Mexico and subject to these risks.

- We will continue to invest in facilities in the growth basins in which we provide services. We expect continued expansion of our gathering and processing systems in our Gulf Coast and West regions to keep pace with increased demand for our services. As we pursue these activities, our operating and general and administrative expenses are expected to increase.
- We expect continued expansion in the deepwater areas of the Gulf of Mexico to contribute to our future segment revenues and segment profit. We expect these additional fee-based revenues to lower our proportionate exposure to commodity price risks.
- The Venezuelan government continues its public criticism of U.S. economic and political policy, has implemented unilateral changes to existing energy related contracts, and has expropriated privately held assets within the energy and telecommunications sector, escalating our concern regarding political risk in Venezuela.
- Our right of way agreement with the Jicarilla Apache Nation (JAN), which covered certain gathering system assets in Rio Arriba County of northern New Mexico, expired on December 31, 2006. We currently operate our gathering assets on the JAN lands pursuant to a special business license granted by the JAN which expires February 29, 2008. We are engaged in discussions with the JAN designed to result in the sale of our gathering assets which are located on or are isolated by the JAN lands. Provided the parties are able to reach an acceptable value on the sale of the subject gathering assets, our expectation is that we will nonetheless maintain partial revenues associated with gathering and processing downstream of the JAN lands and continue to operate the gathering assets on the JAN lands for an undetermined period of time beyond February 29, 2008. Based on current estimated gathering volumes and range of annual average commodity prices over the past five years, we estimate that gas produced on or isolated by the JAN lands represents approximately $20 million to $30 million of the West region’s annual gathering and processing revenue less related product costs.

Year-Over-Year Results

	Years Ended December 31,		
	2007	2006	2005
		(Millions)	
Segment revenues	$5,180	$4,159	$3,291
Segment profit			
Domestic gathering & processing	897	631	389
Venezuela	89	98	95
Other	174	16	42
Indirect general and administrative expense	(88)	(70)	(66)
Total	$1,072	$ 675	$ 460

In order to provide additional clarity, our management’s discussion and analysis of operating results separately reflects the portion of general and administrative expense not allocated to an asset group as *indirect general and administrative expense*. These charges represent any overhead cost not directly attributable to one of the specific asset groups noted in this discussion.

2007 vs. 2006

The $1,021 million, or 25 percent, increase in *segment revenues* is largely due to:

- A $528 million increase in revenues from the marketing of NGLs and olefins;
- A $303 million increase in revenues from our olefins production business;
- A $244 million increase in revenues associated with the production of NGLs.

These increases are partially offset by a $35 million decrease in fee revenues.

Segment costs and expenses increased $645 million, or 18 percent, primarily as a result of:

- A $491 million increase in NGL and olefin marketing purchases;
- A $257 million increase in costs from our olefins production business;
- A $37 million increase in operating expenses including higher depreciation, maintenance, gathering fuel expenses and operating taxes;
- $24 million higher general and administrative expenses;
- A $10 million loss on impairment of the Carbonate Trend pipeline and an $8 million loss on impairment of certain other assets;
- The absence of $11 million of net gains on the sales of assets in 2006.

These increases are partially offset by;

- The absence of a 2006 charge of $73 million related to our Gulf Liquids litigation (see Note 15 of Notes to Consolidated Financial Statements);
- A $95 million decrease in costs associated with the production of NGLs due primarily to lower natural gas prices;
- $12 million income in 2007 from a favorable litigation outcome.

The $397 million, or 59 percent, increase in Midstream's *segment profit* reflects $339 million higher NGL margins and the absence of the previously mentioned $73 million Gulf Liquids litigation charge in 2006, as well as the other previously described changes in *segment revenues* and *segment costs and expenses.* A more detailed analysis of the segment profit of Midstream's various operations is presented as follows.

Domestic gathering & processing

The $266 million increase in *domestic gathering and processing segment profit* includes a $308 million increase in the West region, partially offset by a $42 million decrease in the Gulf Coast region.

The $308 million increase in our West region's *segment profit* primarily results from higher NGL margins, higher processing fee based revenues and income from a favorable litigation outcome, partially offset by higher operating expenses and lower gathering fee revenues. The significant components of this increase include the following:

- NGL margins increased $326 million in 2007 compared to 2006. This increase was driven by an increase in average per unit NGL prices, a decrease in costs associated with the production of NGLs reflecting lower natural gas prices and higher volumes due primarily to new capacity on the fifth cryogenic train at our Opal plant.
- Processing fee revenues increased $12 million. Processing volumes are higher due to customers electing to take liquids and pay processing fees.
- $12 million income in 2007 from a favorable litigation outcome.
- Gathering fee revenues decreased $6 million due primarily to natural volume declines and the shutdown of the Ignacio plant in the fourth quarter of 2007 as a result of the fire.
- Operating expenses increased $21 million including $9 million in higher depreciation, $9 million in higher treating plant and gathering fuel due primarily to the expiration of a favorable gas purchase contract, $5 million related to gas imbalance revaluation losses in the current year compared to gains in the prior year, $5 million higher leased compression costs and $4 million higher costs related to the Jicarilla lease arrangement. These were partially offset by the absence of a $7 million accounts payable accrual adjustment in 2006 and $5 million in lower system product losses.

The $42 million decrease in the Gulf Coast region's *segment profit* is primarily a result of lower volumes from our deepwater facilities, losses on impairments, and the absence of gains on assets in 2006, partially offset by higher NGL margins and higher other fee revenues. The significant components of this decrease include the following:

- Fee revenues from our deepwater assets decreased $40 million due primarily to declines in producers' volumes.
- A $10 million loss on impairment of the Carbonate Trend pipeline and a $6 million loss on impairment of certain other assets.
- The absence of $8 million in gains on the sales of certain gathering assets and a processing plant in 2006 and $5 million lower involuntary conversion gains resulting from insurance proceeds used to rebuild the Cameron Meadows plant.
- NGL margins increased $14 million driven by higher NGL prices, partially offset by lower NGL recoveries and an increase in costs associated with the production of NGLs.
- Other fee revenues increased $8 million driven by higher water removal fees.

Venezuela

Segment profit for our Venezuela assets decreased $9 million. The decrease is primarily due to the absence of a $9 million gain from the settlement of a contract dispute in 2006, $6 million lower fee revenues due primarily to the discontinuance in 2007 of revenue recognition related to labor escalation receivables, $7 million higher operating expenses, and $8 million higher bad debt expense related to labor escalation receivables, partially offset by $19 million of higher currency exchange gains and $1 million higher equity earnings.

Other

The significant components of the $158 million increase in *segment profit* of our other operations include the following:

- The absence of the previously mentioned $73 million Gulf Liquids litigation charge in 2006;
- $46 million in higher margins from our olefins production business due primarily to the increase in ownership of the Geismar olefins facility in July 2007 and higher prices of NGL products produced in our Canadian olefins operations;
- $18 million in higher margins related to the marketing of olefins and $21 million in higher margins related to the marketing of NGLs due to more favorable changes in pricing while product was in transit during 2007 as compared to 2006;
- An $8 million reversal of a maintenance accrual (see below);
- $9 million higher Aux Sable equity earnings primarily due to favorable processing margins;
- $11 million higher Discovery equity earnings primarily due to higher NGL margins and volumes.

These increases are partially offset by:

- $19 million in higher foreign exchange losses related to the revaluation of current assets held in U.S. dollars within our Canadian operations;
- The absence of a $4 million favorable transportation settlement in 2006.

Effective January 1, 2007, we adopted FASB Staff Position (FSP) No. AUG AIR-1, *Accounting for Planned Major Maintenance Activities.* As a result, we recognized as other income an $8 million reversal of an accrual for major maintenance on our Geismar ethane cracker. We did not apply the FSP retrospectively because the impact to our first quarter 2007 and estimated full year 2007 earnings, as well as the impact to prior periods, is not material. We have adopted the deferral method for accounting for these costs going forward.

Indirect general and administrative expense

The $18 million, or 26 percent, increase in indirect general and administrative expense is due primarily to higher technical support services and other charges for various administrative support functions and higher employee expenses.

2006 vs. 2005

The $868 million, or 26 percent, increase in *segment revenues* is largely due to:

- A $561 million increase in crude marketing revenues, which is offset by a similar change in costs, resulting from additional deepwater production coming on-line in November 2005;
- A $165 million increase in revenues associated with the production of NGLs, primarily due to higher NGL prices combined with higher volumes;
- A $137 million increase in the marketing of NGLs and olefins, which is offset by a similar change in costs;
- An $83 million increase in fee-based revenues including $52 million in higher production handling revenues;
- A $44 million increase in revenues in our olefins unit due to higher volumes.

These increases were partially offset by an $84 million reduction in NGL revenues due to a change in classification of NGL transportation and fractionation expenses from costs of goods sold to net revenues (offset in costs and operating expenses).

Segment costs and expenses increased $688 million, or 23 percent, primarily as a result of:

- A $561 million increase in crude marketing purchases, which is offset by a similar change in revenues;
- A $137 million increase in NGL and olefins marketing purchases, offset by a similar change in revenues;
- An $82 million increase in operating expenses including an $11 million accounts payable accrual adjustment, higher system losses, depreciation, insurance expense, personnel and related benefit expenses, turbine overhauls, materials and supplies, compression and post-hurricane inspection and survey costs required by a government agency;
- A $59 million increase in other expense including the $73 million charge related to the Gulf Liquids litigation, partially offset by a $9 million favorable settlement of a contract dispute;
- A $20 million increase in costs associated with production in our olefins unit.

These increases were partially offset by:

- An $84 million reduction in NGL transportation and fractionation expenses due to the above-noted change in classification (offset in revenues);
- A $77 million decrease in plant fuel and costs associated with the production of NGLs due primarily to lower gas prices.

The $215 million, or 47 percent, increase in Midstream *segment profit* is primarily due to higher NGL margins, higher deepwater production handling revenues, higher gathering and processing revenues, higher margins from our olefins unit, and a settlement of an international contract dispute, and the absence of a $23 million impairment of our equity investment in Aux Sable Liquid Products L.P. (Aux Sable) recorded in 2005. These increases were largely offset by the $73 million charge related to the Gulf Liquids litigation contingency combined with higher operating costs and lower margins related to the marketing of olefins and NGLs. A more detailed analysis of the *segment profit* of Midstream's various operations is presented as follows.

Domestic gathering & processing

The $242 million increase in *domestic gathering and processing segment profit* includes a $138 million increase in the West region and a $104 million increase in the Gulf Coast region.

The $138 million increase in our West region's *segment profit* primarily results from higher product margins and higher gathering and processing revenues, partially offset by higher operating expenses. The significant components of this increase include the following:

- NGL margins increased $166 million compared to 2005. This increase was driven by a decrease in costs associated with the production of NGLs, an increase in average per unit NGL prices and higher volumes resulting from lower NGL recoveries during the fourth quarter of 2005 caused by intermittent periods of uneconomical market commodity prices and a power outage and associated operational issues at our Opal, Wyoming facility. NGL margins are defined as NGL revenues less BTU replacement cost, plant fuel, and transportation and fractionation expense.
- Gathering and processing fee revenues increased $26 million. Gathering fees are higher as a result of higher average per-unit gathering rates. Processing volumes are higher due to customers electing to take liquids and pay processing fees.
- Operating expenses increased $51 million including $11 million in higher net system product losses as a result of system gains in 2005 compared to losses in 2006, a $7 million accounts payable accrual adjustment; $8 million in higher personnel and related benefit expenses; $6 million in higher materials and supplies; $6 million in higher gathering fuel, $4 million in higher leased compression costs; $4 million in higher turbine overhaul costs; and $4 million in higher depreciation.

The $104 million increase in the Gulf Coast region's *segment profit* is primarily a result of higher NGL margins, higher volumes from our deepwater facilities, partially offset by higher operating expenses. The significant components of this increase include the following:

- NGL margins increased $77 million compared to 2005. This increase was driven by an increase in average per unit NGL prices and a decrease in costs associated with the production of NGLs.
- Fee revenues from our deepwater assets increased $52 million as a result of $51 million in higher volumes flowing across the Devils Tower facility and $22 million in higher Devils Tower unit-of-production rates recognized as a result of a new reserve study. These increases are partially offset by a $21 million decline in other gathering and production handling revenues due to volume declines in other areas.
- Operating expenses increased $25 million primarily as a result of $12 million in higher insurance costs, $4 million in higher depreciation expense on our deepwater assets, $3 million in higher net system product losses as a result of lower gain volumes in 2006, $2 million in post-hurricane inspection and survey costs required by a government agency, and a $1 million accounts payable accrual adjustment.

Venezuela

Segment profit for our Venezuela assets increased $3 million and includes $9 million resulting from the settlement of a contract dispute and $1 million in higher revenues due to higher natural gas volumes and prices at our compression facility. These are partially offset by $4 million in higher expenses related to higher insurance, personnel and contract labor costs and a $2 million increase in the reserve for uncollectible accounts.

Other

The $26 million decrease in *segment profit* of our other operations is largely due to the $73 million of charges related to the Gulf Liquids litigation contingency combined with $13 million in lower margins related to the marketing of olefins. The decrease also reflects $12 million in lower margins related to the marketing of NGLs due to more favorable changes in pricing while product was in transit during 2005 as compared to 2006. These were partially offset by the absence of a $23 million impairment of our equity investment in Aux Sable in 2005, $24 million in higher margins in our olefins unit, $7 million in higher earnings from our equity investment in

Discovery Producer Services, L.L.C. (Discovery), $7 million in higher fractionation, storage and other fee revenues, and a $4 million favorable transportation settlement.

Gas Marketing Services

Gas Marketing Services (Gas Marketing) primarily supports our natural gas businesses by providing marketing and risk management services, which include marketing and hedging the gas produced by Exploration & Production, and procuring fuel and shrink gas and hedging natural gas liquids sales for Midstream. In addition, Gas Marketing manages various natural gas-related contracts such as transportation, storage, and related hedges, including certain legacy natural gas contracts and positions, and provides services to third parties, such as producers.

Overview of 2007

Gas Marketing's operating results for 2007 were primarily driven by a loss of approximately $166 million related to certain legacy derivative natural gas contracts that we expect to assign to another party in 2008 under an asset transfer agreement that we executed in December 2007. In addition, a decrease in forward natural gas basis prices against a net long legacy derivative position contributed to the losses as well.

Outlook for 2008

For 2008, Gas Marketing intends to focus on providing services that support our natural gas businesses. Certain legacy natural gas contracts and positions from our former Power segment remain in the Gas Marketing segment. Gas Marketing's earnings may continue to reflect mark-to-market volatility from commodity-based derivatives that represent economic hedges but are not designated as hedges for accounting purposes or do not qualify for hedge accounting. However, this mark-to-market volatility is expected to be significantly reduced compared with previous levels.

Year-Over-Year Results

	Years Ended December 31,		
	2007	2006	2005
		(Millions)	
Realized revenues	$4,948	$5,185	$6,147
Net forward unrealized mark-to-market gains (losses)	(315)	(136)	188
Segment revenues	4,633	5,049	6,335
Costs and operating expenses	4,937	5,258	6,238
Gross margin	(304)	(209)	97
Selling, general and administrative (income) expense	13	(13)	(1)
Other (income) expense — net	20	(1)	89
Segment profit (loss)	$ (337)	$ (195)	$ 9

2007 vs. 2006

Realized revenues represent (1) revenue from the sale of natural gas and (2) gains and losses from the net financial settlement of derivative contracts. *Realized revenues* decreased $237 million primarily due to a decrease in net financial settlements of derivative contracts. This is partially offset by an increase in physical natural gas revenue as a result of a 9 percent increase in natural gas sales volumes partially offset by a 6 percent decrease in average prices on physical natural gas sales.

Net forward unrealized mark-to-market gains (losses) primarily represent changes in the fair values of certain legacy derivative contracts with a future settlement or delivery date that are not designated as hedges for accounting purposes or do not qualify for hedge accounting. A $156 million loss related to a legacy derivative natural gas sales contract, that we expect to assign to another party in 2008 under an asset transfer agreement that we executed in

December 2007, primarily caused the unfavorable change in *net forward unrealized mark-to-market gains (losses)*. Prior to the execution of the asset transfer agreement, we accounted for this legacy contract on an accrual basis under the normal purchases and normal sales exception of SFAS 133. Due to the pending assignment of the legacy contract, we no longer consider the contract to be in the normal course of business. Therefore, we recognized a loss to reflect the current negative fair value of the contract. In addition, losses on gas purchase contracts caused by a decrease in forward natural gas prices were greater in 2007 than in 2006.

The $321 million decrease in Gas Marketing's *costs and operating expenses* is primarily due to a 7 percent decrease in average prices on physical natural gas purchases, partially offset by a 4 percent increase in natural gas purchase volumes.

The unfavorable change in *selling, general and administrative (income) expense* is due primarily to the absence of a $25 million gain from the sale of certain receivables to a third party in 2006.

Other (income) expense — net in 2007 includes a $20 million accrual for litigation contingencies.

The $142 million increase in *segment loss* is primarily due to the loss recognized on a legacy derivative sales contract previously treated as a normal purchase and normal sale, a $20 million accrual for litigation contingencies, and the absence of a $25 million gain from the sale of certain receivables as described above, partially offset by an improvement in accrual gross margin.

2006 vs. 2005

Realized revenues decreased $962 million primarily due to a 17 percent decrease in average prices on physical natural gas sales.

The effect of a change in forward prices on legacy natural gas derivative contracts primarily caused the $324 million unfavorable change in *net forward unrealized mark-to-market gains (losses)*. A decrease in forward natural gas prices during 2006 caused losses on legacy net forward gas fixed-price purchase contracts, while an increase in forward natural gas prices during 2005 caused gains on legacy net forward gas fixed-price purchase contracts.

The $980 million decrease in Gas Marketing's *costs and operating expenses* is primarily due to an 18 percent decrease in average prices on physical natural gas purchases.

The favorable change in *selling, general and administrative (income) expense* is due primarily to increased gains from the sale of certain receivables to a third party. Gas Marketing recognized a $25 million gain in 2006 compared to a $10 million gain in 2005.

Other (income) expense — net in 2005 includes an $82 million accrual for estimated litigation contingencies, primarily associated with agreements reached to substantially resolve exposure related to natural gas price and volume reporting issues (see Note 15 of Notes to Consolidated Financial Statements) and a $5 million accrual for a regulatory settlement.

The $204 million change from a *segment profit* to a *segment loss* is primarily due to the effect of a change in forward prices on legacy natural gas derivative contracts, partially offset by favorable changes in *other (income) expense — net* described above.

Other

Year-Over-Year Operating Results

	Years Ended December 31,		
	2007	2006	2005
		(Millions)	
Segment revenues	$ 26	$ 27	$ 27
Segment loss	$ (1)	$ (13)	$(123)

2007 vs. 2006

The improvement in *segment loss* for 2007 is primarily driven by $5 million of net gains on the sale of land.

2006 vs. 2005

Other *segment loss* for 2005 includes $87 million of impairment charges, of which $38 million was recorded during the fourth quarter, related to our investment in Longhorn. In a related matter, we wrote off $4 million of capitalized project costs associated with Longhorn. We also recorded $24 million of equity losses associated with our investment in Longhorn. Partially offsetting these charges and losses was a $9 million fourth quarter gain on the sale of land.

Energy Trading Activities

Fair Value of Trading and Nontrading Derivatives

The chart below reflects the fair value of derivatives held for trading purposes as of December 31, 2007. We have presented the fair value of assets and liabilities by the period in which they would be realized under their contractual terms and not as a result of a sale. We have reported the fair value of a portion of these derivatives in assets and liabilities of discontinued operations. (See Note 2 of Notes to Consolidated Financial Statements.)

Net Assets (Liabilities) — Trading
(Millions)

To be Realized in 1-12 Months (Year 1)	To be Realized in 13-36 Months (Years 2-3)	To be Realized in 37-60 Months (Years 4-5)	To be Realized in 61-120 Months (Years 6-10)	To be Realized in 121+ Months (Years 11+)	Net Fair Value
$(1)	$ (1)	$ (1)	$ (1)	$ —	$ (4)

As the table above illustrates, we are not materially engaged in trading activities. However, we hold a substantial portfolio of nontrading derivative contracts. Nontrading derivative contracts are those that hedge or could possibly hedge forecasted transactions on an economic basis. We have designated certain of these contracts as cash flow hedges of Exploration & Production's forecasted sales of natural gas production and Midstream's forecasted sales of natural gas liquids under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" (SFAS 133). Of the total fair value of nontrading derivatives, SFAS 133 cash flow hedges had a net liability value of $268 million as of December 31, 2007. The chart below reflects the fair value of derivatives held for nontrading purposes as of December 31, 2007, for Gas Marketing Services, Exploration & Production, Midstream, and nontrading derivatives reported in assets and liabilities of discontinued operations.

Net Assets (Liabilities) — Nontrading
(Millions)

To be Realized in 1-12 Months (Year 1)	To be Realized in 13-36 Months (Years 2-3)	To be Realized in 37-60 Months (Years 4-5)	To be Realized in 61-120 Months (Years 6-10)	To be Realized in 121+ Months (Years 11+)	Net Fair Value
$(87)	$ (268)	$ (8)	$ (1)	$ —	$ (364)

Methods of Estimating Fair Value

Most of the derivatives we hold settle in active periods and markets in which quoted market prices are available. These include futures contracts, option contracts, swap agreements and physical commodity purchases and sales in the commodity markets in which we transact. While an active market may not exist for the entire period, quoted prices can generally be obtained for natural gas through 2012.

These prices reflect current economic and regulatory conditions and may change because of market conditions. The availability of quoted market prices in active markets varies between periods and commodities based upon changes in market conditions. The ability to obtain quoted market prices also varies greatly from region to region. The time periods noted above are an estimation of aggregate availability of quoted prices. An immaterial portion of our total net derivative liability value of $368 million relates to periods in which active quotes cannot be obtained. We estimate energy commodity prices in these illiquid periods by incorporating information about commodity prices in actively quoted markets, quoted prices in less active markets, and other market fundamental analysis. Modeling and other valuation techniques, however, are not used significantly in determining the fair value of our derivatives.

Counterparty Credit Considerations

We include an assessment of the risk of counterparty nonperformance in our estimate of fair value for all contracts. Such assessment considers (1) the credit rating of each counterparty as represented by public rating agencies such as Standard & Poor's and Moody's Investors Service, (2) the inherent default probabilities within these ratings, (3) the regulatory environment that the contract is subject to and (4) the terms of each individual contract.

Risks surrounding counterparty performance and credit could ultimately impact the amount and timing of expected cash flows. We continually assess this risk. We have credit protection within various agreements to call on additional collateral support if necessary. At December 31, 2007, we held collateral support, including letters of credit, of $215 million.

We also enter into master netting agreements to mitigate counterparty performance and credit risk. During 2007 and 2006, we did not incur any significant losses due to recent counterparty bankruptcy filings.

The gross credit exposure from our derivative contracts, a portion of which is included in assets of discontinued operations (see Note 2 of Notes to Consolidated Financial Statements), as of December 31, 2007, is summarized below.

Counterparty Type	Investment Grade(a)	Total
	(Millions)	
Gas and electric utilities	$ 78	$ 79
Energy marketers and traders	224	1,328
Financial institutions	1,302	1,302
Other	—	1
	$ 1,604	2,710
Credit reserves		(1)
Gross credit exposure from derivatives		$2,709

We assess our credit exposure on a net basis to reflect master netting agreements in place with certain counterparties. We offset our credit exposure to each counterparty with amounts we owe the counterparty under derivative contracts. The net credit exposure from our derivatives as of December 31, 2007, is summarized below.

Counterparty Type	Investment Grade(a)	Total
	(Millions)	
Gas and electric utilities	$ 17	$ 17
Energy marketers and traders	18	20
Financial institutions	45	45
Other	—	—
	$ 80	82
Credit reserves		(1)
Net credit exposure from derivatives		$ 81

(a) We determine investment grade primarily using publicly available credit ratings. We include counterparties with a minimum Standard & Poor's rating of BBB— or Moody's Investors Service rating of Baa3 in investment grade. We also classify counterparties that have provided sufficient collateral, such as cash, standby letters of credit, adequate parent company guarantees, and property interests, as investment grade.

Trading Policy

We have policies and procedures that govern our trading and risk management activities. These policies cover authority and delegation thereof in addition to control requirements, authorized commodities and term and exposure limitations. Value-at-risk is limited in aggregate and calculated at a 95 percent confidence level.

Management's Discussion and Analysis of Financial Condition

Outlook

We believe we have, or have access to, the financial resources and liquidity necessary to meet future requirements for working capital, capital and investment expenditures and debt payments while maintaining a sufficient level of liquidity to reasonably protect against unforeseen circumstances requiring the use of funds. We also expect to maintain our investment grade status. In 2008, we expect to maintain liquidity from cash and cash equivalents and unused revolving credit facilities of at least $1 billion. We maintain adequate liquidity to manage margin requirements related to significant movements in commodity prices, unplanned capital spending needs, near term scheduled debt payments, and litigation and other settlements. We expect to fund capital and investment expenditures, debt payments, dividends, stock repurchases and working capital requirements through cash flow from operations, which is currently estimated to be between $2.3 billion and $2.7 billion in 2008, proceeds from debt issuances and sales of units of Williams Partners L.P. and Williams Pipeline Partners L.P., as well as cash and cash equivalents on hand as needed.

We enter 2008 positioned for continued growth through disciplined investments in our natural gas businesses. Examples of this planned growth include:

- Exploration & Production will continue to maintain its development drilling program in its key basins of Piceance, Powder River, San Juan, Arkoma, and Fort Worth.
- Gas Pipeline will continue to expand its system to meet the demand of growth markets.
- Midstream will continue to pursue significant deepwater production commitments and expand capacity in the western United States.

We estimate capital and investment expenditures will total approximately $2.6 billion to $2.9 billion in 2008. As a result of increasing our development drilling program, $1.45 billion to $1.65 billion of the total estimated 2008 capital expenditures is related to Exploration & Production. Also within the total estimated expenditures for 2008 is approximately $180 million to $260 million for compliance and maintenance-related projects at Gas Pipeline, including Clean Air Act compliance. Commitments for construction and acquisition of property, plant and equipment are approximately $484 million at December 31, 2007.

Potential risks associated with our planned levels of liquidity and the planned capital and investment expenditures discussed above include:

- Lower than expected levels of cash flow from operations due to commodity pricing volatility. To mitigate this exposure, Exploration & Production has fixed-price hedges for approximately 70 MMcfe per day of its expected 2008 production. In addition, Exploration & Production has collar agreements for 2008 which hedge approximately 397 MMcfe per day of expected 2008 production.
- Sensitivity of margin requirements associated with our marginable commodity contracts. As of December 31, 2007, we estimate our exposure to additional margin requirements through 2008 to be no more than $125 million, using a statistical analysis at a 99 percent confidence level.

- Exposure associated with our efforts to resolve regulatory and litigation issues (see Note 15 of Notes to Consolidated Financial Statements).
- The impact of a general economic downturn, including any associated volatility in the credit markets and our access to liquidity and the capital markets.

In August 2006, the Pension Protection Act of 2006 was signed into law. The Act makes significant changes to the requirements for employer-sponsored retirement plans, including revisions affecting the funding of defined benefit pension plans beginning in 2008. We have assessed the impact of the legislation on our future funding requirements and do not expect a significant increase in minimum funding requirements over current levels, assuming long-term rates of return on assets and current discount rates do not experience a significant decline.

Overview

In February 2007, Exploration & Production entered into a five-year unsecured credit agreement with certain banks in order to reduce margin requirements related to our hedging activities as well as lower transaction fees. Under the credit agreement, Exploration & Production is not required to post collateral as long as the value of its domestic natural gas reserves, as determined under the provisions of the agreement, exceeds by a specified amount certain of its obligations including any outstanding debt and the aggregate out-of-the-money positions on hedges entered into under the credit agreement. Exploration & Production is subject to additional covenants under the credit agreement including restrictions on hedge limits, the creation of liens, the incurrence of debt, the sale of assets and properties, and making certain payments, such as dividends, under certain circumstances.

On April 4, 2007, Northwest Pipeline retired $175 million of 8.125 percent senior notes due 2010. Northwest Pipeline paid premiums of approximately $7 million in conjunction with the early debt retirement.

On April 5, 2007, Northwest Pipeline issued $185 million aggregate principal amount of 5.95 percent senior unsecured notes due 2017 to certain institutional investors in a private debt placement. Northwest Pipeline initiated an exchange offer on July 26, 2007, which expired on August 23, 2007. Northwest Pipeline received full participation in the exchange offer. (See Note 11 of Notes to Consolidated Financial Statements.)

In July 2007, our Board of Directors authorized the repurchase of up to $1 billion of our common stock. We intend to purchase shares of our stock from time to time in open market transactions or through privately negotiated or structured transactions at our discretion, subject to market conditions and other factors. This stock-repurchase program does not have an expiration date. We plan to fund this program with cash on hand. In 2007, we purchased approximately 16 million shares for $526 million under the program at an average cost of $33.08 per share.

During third-quarter 2007, we formed Williams Pipeline Partners L.P. (WMZ) to own and operate natural gas transportation and storage assets. In January 2008, WMZ completed its initial public offering of 16.25 million common units at a price of $20.00 per unit. In February 2008, the underwriters also exercised their right to purchase an additional 1.65 million common units at the same price. A subsidiary of ours serves as the general partner of WMZ. The initial asset of the partnership is a 35 percent interest in Northwest Pipeline GP, formerly Northwest Pipeline Corporation. Upon completion of the transaction, we hold approximately 47.7 percent of the interests in WMZ, including the interests of the general partner.

In December 2007, Williams Partners L.P. acquired certain of our membership interests in Wamsutter LLC, the limited liability company that owns the Wamsutter system, from us for $750 million. Williams Partners L.P. completed the transaction after successfully closing a public equity offering of 9.25 million common units that yielded net proceeds of approximately $335 million. The partnership financed the remainder of the purchase price primarily through utilizing $250 million of term loan borrowings and issuing approximately $157 million of common units to us. The $250 million term loan is under Williams Partners L.P.'s new $450 million five-year senior unsecured credit facility that became effective simultaneous with the closing of the Wamsutter transaction. The remaining $200 million of capacity under the new facility is available for revolving credit borrowings.

In December 2007, we repurchased $213 million of our 7.125 percent senior unsecured notes due September 2011 and $22 million of our 8.125 percent senior unsecured notes due March 2012. In conjunction with these early retirements, we paid premiums of approximately $19 million. These premiums, as well as related fees and expenses are recorded as *early debt retirement costs* in the Consolidated Statement of Income.

Credit ratings

On March 19, 2007, Standard & Poor's raised our senior unsecured debt rating from a BB− to a BB with a stable ratings outlook. On May 21, 2007, Standard & Poor's revised its ratings outlook to positive from stable. On November 9, 2007, Standard & Poor's raised our senior unsecured debt rating from a BB to a BB+ and our corporate credit rating from a BB+ to a BBB− with a ratings outlook of stable. With respect to Standard & Poor's, a rating of "BBB" or above indicates an investment grade rating. A rating below "BBB" indicates that the security has significant speculative characteristics. A "BB" rating indicates that Standard & Poor's believes the issuer has the capacity to meet its financial commitment on the obligation, but adverse business conditions could lead to insufficient ability to meet financial commitments. Standard & Poor's may modify its ratings with a "+" or a "− " sign to show the obligor's relative standing within a major rating category.

On May 21, 2007, Moody's Investors Service placed our ratings under review for possible upgrade. On November 15, 2007, Moody's Investors Service raised our senior unsecured debt rating from a Ba2 to a Baa3 with a ratings outlook of stable. With respect to Moody's, a rating of "Baa" or above indicates an investment grade rating. A rating below "Baa" is considered to have speculative elements. A "Ba" rating indicates an obligation that is judged to have speculative elements and is subject to substantial credit risk. The "1", "2" and "3" modifiers show the relative standing within a major category. A "1" indicates that an obligation ranks in the higher end of the broad rating category, "2" indicates a mid-range ranking, and "3" ranking at the lower end of the category.

On May 21, 2007, Fitch Ratings revised its ratings outlook to positive from stable. On November 20, 2007, Fitch Ratings raised our senior unsecured debt rating from a BB+ to a BBB− with a ratings outlook of stable. With respect to Fitch, a rating of "BBB" or above indicates an investment grade rating. A rating below "BBB" is considered speculative grade. A "BB" rating from Fitch indicates that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or financial alternatives may be available to allow financial commitments to be met. Fitch may add a "+" or a "− " sign to show the obligor's relative standing within a major rating category.

Liquidity

Our internal and external sources of liquidity include cash generated from our operations, bank financings, and proceeds from the issuance of long-term debt and equity securities, and proceeds from asset sales. While most of our sources are available to us at the parent level, others are available to certain of our subsidiaries, including equity and debt issuances from Williams Partners L.P. and Williams Pipeline Partners L.P. Our ability to raise funds in the capital markets will be impacted by our financial condition, interest rates, market conditions, and industry conditions.

Available Liquidity

	Year Ended December 31, 2007 (Millions)
Cash and cash equivalents*	$ 1,699
Securities	20
Available capacity under our four unsecured revolving and letter of credit facilities totaling $1.2 billion	858
Available capacity under our $1.5 billion unsecured revolving and letter of credit facility**	1,222
Available capacity under Williams Partners L.P.'s $450 million five-year senior unsecured credit facility (see previous discussion)	200
	$ 3,999

* *Cash and cash equivalents* includes $10 million of funds received from third parties as collateral. The obligation for these amounts is reported in *accrued liabilities* on the Consolidated Balance Sheet. Also included is $475 million of cash and cash equivalents that is being utilized by certain subsidiary and international operations.

** Northwest Pipeline and Transco each have access to $400 million under this facility to the extent not utilized by us. In 2007, Northwest Pipeline borrowed $250 million under this facility to retire matured notes, and in January 2008, Transco borrowed $100 million.

In addition to the above, Northwest Pipeline and Transco have shelf registration statements available for the issuance of up to $350 million aggregate principal amount of debt securities. If the credit rating of Northwest Pipeline or Transco is below investment grade for all credit rating agencies, they can only use their shelf registration statements to issue debt if such debt is guaranteed by us.

Williams Partners L.P. has a shelf registration statement available for the issuance of approximately $1.2 billion aggregate principal amount of debt and limited partnership unit securities.

In addition, at the parent-company level, we have a shelf registration statement that allows us to issue publicly registered debt and equity securities as needed.

In February 2007, Exploration & Production entered into a five-year unsecured credit agreement with certain banks which serves to reduce our usage of cash and other credit facilities for margin requirements related to our hedging activities as well as lower transaction fees. (See Note 11 of Notes to Consolidated Financial Statements.)

On May 9, 2007, we amended our $1.5 billion unsecured credit facility extending the maturity date from May 1, 2009 to May 1, 2012. Applicable borrowing rates and commitment fees for investment grade credit ratings were also modified.

Sources (Uses) of Cash

	Years Ended December 31,		
	2007	2006	2005
		(Millions)	
Net cash provided (used) by:			
Operating activities	$ 2,237	$ 1,890	$1,450
Financing activities	(511)	1,103	36
Investing activities	(2,296)	(2,321)	(819)
Increase (decrease) in cash and cash equivalents	$ (570)	$ 672	$ 667

Operating Activities

Our *net cash provided by operating activities* in 2007 increased from 2006 due primarily to the increase in our operating results and the absence of a $145 million securities litigation settlement payment in 2006. These increases are partially offset by increased income tax payments in 2007 and other changes in working capital.

Our *net cash provided by operating activities* in 2006 increased from 2005 due largely to higher operating income at Midstream, partially offset by a $145 million securities litigation settlement payment in fourth quarter 2006.

Financing Activities

2007

See Overview, within this section, for a discussion of 2007 debt issuances, retirements, stock repurchases, and additional financing by Williams Partners L.P.

Quarterly dividends paid on common stock increased from $.09 to $.10 per common share during the second quarter of 2007 and totaled $233 million for year ended December 31, 2007.

2006

- Transco issued $200 million aggregate principal amount of 6.4 percent senior unsecured notes due 2016.
- Northwest Pipeline issued $175 million aggregate principal amount of 7 percent senior unsecured notes due 2016.
- Williams Partners L.P. acquired our interest in Williams Four Corners LLC for $1.6 billion. The acquisition was completed after Williams Partners L.P. successfully closed a $150 million private debt offering of 7.5 percent senior unsecured notes due 2011, a $600 million private debt offering of 7.25 percent senior unsecured notes due 2017, $350 million of common and Class B units, and equity offerings of $519 million in net proceeds.
- We paid $489 million to retire a secured floating-rate term loan due in 2008.
- We paid $26 million in premiums related to the conversion of $220 million of 5.5 percent junior subordinated convertible debentures into common stock.
- Quarterly dividends paid on common stock increased from $.075 to $.09 per share during the second quarter of 2006 and totaled $207 million for the year ended December 31, 2006.

2005

- We retired $200 million of 6.125 percent notes issued by Transco, which matured January 15, 2005.
- We received $273 million in *proceeds from the issuance of common stock* purchased under the FELINE PACS equity forward contracts.
- We completed an initial public offering of approximately 40 percent of our interest in Williams Partners L.P. resulting in net proceeds of $111 million.
- Quarterly dividends paid on common stock increased from $.05 to $.075 per common share during the third quarter of 2005 and totaled $143 million for the year ended December 31, 2005.

Investing Activities

2007

- Capital expenditures totaled $2.8 billion and were primarily related to Exploration & Production's drilling activity, mostly in the Piceance basin.
- We received $496 million of gross proceeds from the sale of substantially all of our power business.
- We purchased $304 million and received $353 million from the sale of auction rate securities.

2006

- Capital expenditures totaled $2.5 billion and were primarily related to Exploration & Production's drilling activity, mostly in the Piceance basin, and Northwest Pipeline's capacity replacement project.
- We purchased $386 million and received $414 million from the sale of auction rate securities.

2005

- Capital expenditures totaled $1.3 billion and were primarily related to Exploration & Production's drilling activity, mostly in the Piceance basin, and Gas Pipeline's normal maintenance and compliance.
- We received $310 million in proceeds from the Gulfstream recapitalization.

- We purchased $224 million and received $138 million from the sale of auction rate securities.
- Northwest Pipeline received an $88 million contract termination payment, representing reimbursement of the net book value of the related assets.
- We received $55 million proceeds from the sale of our note with Williams Communications Group, our previously owned subsidiary.

Off-balance sheet financing arrangements and guarantees of debt or other commitments

We have various other guarantees and commitments which are disclosed in Notes 2, 3, 10, 11, 14, and 15 of Notes to Consolidated Financial Statements. We do not believe these guarantees or the possible fulfillment of them will prevent us from meeting our liquidity needs.

Contractual Obligations

The table below summarizes the maturity dates of our contractual obligations, including obligations related to discontinued operations.

	2008	2009-2010	2011-2012	Thereafter	Total
			(Millions)		
Long-term debt, including current portion:					
Principal	$ 138	$ 92	$2,531	$ 5,160	$ 7,921
Interest	585	1,142	1,011	4,743	7,481
Capital leases	6	6	—	—	12
Operating leases	84	94	28	19	225
Purchase obligations(1)	1,351	1,347	1,297	2,859	6,854
Other long-term liabilities, including current portion:					
Physical and financial derivatives(2)(3)	478	661	269	321	1,729
Other(4)(5)	5	1	—	—	6
Total	$2,647	$3,343	$5,136	$ 13,102	$24,228

(1) Includes $4.4 billion of natural gas purchase obligations at market prices at our Exploration & Production segment. The purchased natural gas can be sold at market prices.

(2) The obligations for physical and financial derivatives are based on market information as of December 31, 2007. Because market information changes daily and has the potential to be volatile, significant changes to the values in this category may occur.

(3) Expected offsetting cash inflows of $5.6 billion at December 31, 2007, resulting from product sales or net positive settlements, are not reflected in these amounts. In addition, product sales may require additional purchase obligations to fulfill sales obligations that are not reflected in these amounts.

(4) Does not include estimated contributions to our pension and other postretirement benefit plans. We made contributions to our pension and other postretirement benefit plans of $56 million in 2007 and $57 million in 2006. In 2008, we expect to contribute approximately $56 million to these plans (see Note 7 of Notes to Consolidated Financial Statements), including $40 million to our tax-qualified pension plans. There were no minimum funding requirements to our tax-qualified pension plans in 2007 or 2006, and we do not expect any minimum funding requirements in 2008. We anticipate that future contributions will not vary significantly from recent historical contributions, assuming actual results do not differ significantly from estimated results for assumptions such as discount rates, returns on plan assets, retirement rates, mortality and other significant assumptions, and assuming no further changes in current and prospective legislation and regulations. Based on these anticipated levels of future contributions, we do not expect to trigger any minimum funding requirements in the future; however, we may elect to make contributions to increase the funded status of our plans.

(5) On January 1, 2007, we adopted FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes." As of December 31, 2007, we have accrued approximately $76 million for unrecognized tax benefits. We cannot make reasonably reliable estimates of the timing of the future payments of these liabilities. Therefore, these liabilities have been excluded from the table above. See Note 5 of Notes to Consolidated Financial Statements for information regarding our contingent tax liability reserves.

Effects of Inflation

Our operations have benefited from relatively low inflation rates. Approximately 42 percent of our gross property, plant and equipment is at Gas Pipeline and the remainder is at other operating units. Gas Pipeline is subject to regulation, which limits recovery to historical cost. While amounts in excess of historical cost are not recoverable under current FERC practices, we anticipate being allowed to recover and earn a return based on increased actual cost incurred to replace existing assets. Cost-based regulation, along with competition and other market factors, may limit our ability to recover such increased costs. For the other operating units, operating costs are influenced to a greater extent by both competition for specialized services and specific price changes in oil and natural gas and related commodities than by changes in general inflation. Crude, natural gas, and natural gas liquids prices are particularly sensitive to OPEC production levels and/or the market perceptions concerning the supply and demand balance in the near future. However, our exposure to these price changes is reduced through the use of hedging instruments.

Environmental

We are a participant in certain environmental activities in various stages including assessment studies, cleanup operations and/or remedial processes at certain sites, some of which we currently do not own. (See Note 15 of Notes to Consolidated Financial Statements.) We are monitoring these sites in a coordinated effort with other potentially responsible parties, the U.S. Environmental Protection Agency (EPA), or other governmental authorities. We are jointly and severally liable along with unrelated third parties in some of these activities and solely responsible in others. Current estimates of the most likely costs of such activities are approximately $46 million, all of which are recorded as liabilities on our balance sheet at December 31, 2007. We will seek recovery of approximately $13 million of the accrued costs through future natural gas transmission rates. The remainder of these costs will be funded from operations. During 2007, we paid approximately $14 million for cleanup and/or remediation and monitoring activities. We expect to pay approximately $15 million in 2008 for these activities. Estimates of the most likely costs of cleanup are generally based on completed assessment studies, preliminary results of studies or our experience with other similar cleanup operations. At December 31, 2007, certain assessment studies were still in process for which the ultimate outcome may yield significantly different estimates of most likely costs. Therefore, the actual costs incurred will depend on the final amount, type and extent of contamination discovered at these sites, the final cleanup standards mandated by the EPA or other governmental authorities, and other factors.

We are subject to the federal Clean Air Act and to the federal Clean Air Act Amendments of 1990, which require the EPA to issue new regulations. We are also subject to regulation at the state and local level. In September 1998, the EPA promulgated rules designed to mitigate the migration of ground-level ozone in certain states. In March 2004 and June 2004, the EPA promulgated additional regulation regarding hazardous air pollutants, which may impose additional controls. Capital expenditures necessary to install emission control devices on our Transco gas pipeline system to comply with rules were approximately $3 million in 2007 and are estimated to be between $25 million and $30 million through 2010. The actual costs incurred will depend on the final implementation plans developed by each state to comply with these regulations. We consider these costs on our Transco system associated with compliance with these environmental laws and regulations to be prudent costs incurred in the ordinary course of business and, therefore, recoverable through its rates.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk***

Interest Rate Risk

Our current interest rate risk exposure is related primarily to our debt portfolio. The majority of our debt portfolio is comprised of fixed rate debt in order to mitigate the impact of fluctuations in interest rates. The maturity of our long-term debt portfolio is partially influenced by the expected lives of our operating assets.

The tables below provide information about our interest rate risk-sensitive instruments as of December 31, 2007 and 2006. Long-term debt in the tables represents principal cash flows, net of (discount) premium, and weighted-average interest rates by expected maturity dates. The fair value of our publicly traded long-term debt is valued using indicative year-end traded bond market prices. Private debt is valued based on the prices of similar securities with similar terms and credit ratings.

	2008	2009	2010	2011	2012	Thereafter(1)	Total	Fair Value December 31, 2007
	(Dollars in millions)							
Long-term debt, including current portion(4):								
Fixed rate	$ 53	$ 41	$ 27	$948	$971	$ 5,111	$7,151	$ 7,994
Interest rate	7.7%	7.7%	7.4%	7.4%	7.3%	7.7%		
Variable rate	$ 85	$ 12	$ 12	$ 7	$605(5)	$ 18	$ 739	$ 735
Interest rate(2)								

	2007	2008	2009	2010	2011	Thereafter(1)	Total	Fair Value December 31, 2006
	(Dollars in millions)							
Long-term debt, including current portion(4):								
Fixed rate	$381	$153	$ 41	$205	$1,161	$ 5,922	$7,863	$ 8,343
Interest rate	7.7%	7.7%	7.7%	7.5%	7.6%	7.8%		
Variable rate	$ 10	$ 85	$ 12	$ 12	$ 7	$ 23	$ 149	$ 137
Interest rate(3)								

(1) Includes unamortized discount and premium.

(2) The interest rate at December 31, 2007, is LIBOR plus 1 percent.

(3) The interest rate at December 31, 2006 was LIBOR plus 1 percent.

(4) Excludes capital leases.

(5) Includes Transco's subsequent refinancing of its $100 million notes, due on January 15, 2008, under our $1.5 billion revolving credit facility. (See Note 11 of Notes to Consolidated Financial Statements.)

Commodity Price Risk

We are exposed to the impact of fluctuations in the market price of natural gas and natural gas liquids, as well as other market factors, such as market volatility and commodity price correlations. We are exposed to these risks in connection with our owned energy-related assets, our long-term energy-related contracts and our proprietary trading activities. We manage the risks associated with these market fluctuations using various derivatives and nonderivative energy-related contracts. The fair value of derivative contracts is subject to changes in energy-commodity market prices, the liquidity and volatility of the markets in which the contracts are transacted, and changes in interest rates. We measure the risk in our portfolios using a value-at-risk methodology to estimate the potential one-day loss from adverse changes in the fair value of the portfolios.

Value at risk requires a number of key assumptions and is not necessarily representative of actual losses in fair value that could be incurred from the portfolios. Our value-at-risk model uses a Monte Carlo method to simulate hypothetical movements in future market prices and assumes that, as a result of changes in commodity prices, there is a 95 percent probability that the one-day loss in fair value of the portfolios will not exceed the value at risk. The simulation method uses historical correlations and market forward prices and volatilities. In applying the value-at-risk methodology, we do not consider that the simulated hypothetical movements affect the positions or would cause any potential liquidity issues, nor do we consider that changing the portfolio in response to market conditions could affect market prices and could take longer than a one-day holding period to execute. While a one-day holding period has historically been the industry standard, a longer holding period could more accurately represent the true market risk given market liquidity and our own credit and liquidity constraints.

We segregate our derivative contracts into trading and nontrading contracts, as defined in the following paragraphs. We calculate value at risk separately for these two categories. Derivative contracts designated as normal purchases or sales under SFAS 133 and nonderivative energy contracts have been excluded from our estimation of value at risk.

Trading

Our trading portfolio consists of derivative contracts entered into for purposes other than economically hedging our commodity price-risk exposure. Our value at risk for contracts held for trading purposes was approximately $1 million at both December 31, 2007 and 2006. During the year ended December 31, 2007, our value at risk for these contracts ranged from a high of $2 million to a low of $1 million.

Nontrading

Our nontrading portfolio consists of derivative contracts that hedge or could potentially hedge the price risk exposure from the following activities:

Segment	Commodity Price Risk Exposure
Exploration & Production	• Natural gas sales
Midstream	• Natural gas purchases
	• NGL sales
Gas Marketing Services	• Natural gas purchases and sales

The value at risk for derivative contracts held for nontrading purposes was $24 million at December 31, 2007 and $12 million at December 31, 2006. During the year ended December 31, 2007, our value at risk for these contracts ranged from a high of $24 million to a low of $7 million. The increase in value at risk reflects the impact on our nontrading portfolio of the sale of substantially all of our power business in November 2007.

Certain of the derivative contracts held for nontrading purposes are accounted for as cash flow hedges under SFAS 133. Though these contracts are included in our value-at-risk calculation, any change in the fair value of these hedge contracts would generally not be reflected in earnings until the associated hedged item affects earnings.

Foreign Currency Risk

We have international investments that could affect our financial results if the investments incur a permanent decline in value as a result of changes in foreign currency exchange rates and/or the economic conditions in foreign countries.

International investments accounted for under the cost method totaled $24 million at December 31, 2007, and $42 million at December 31, 2006. These investments are primarily in nonpublicly traded companies for which it is not practicable to estimate fair value. We believe that we can realize the carrying value of these investments considering the status of the operations of the companies underlying these investments. If a 20 percent change occurred in the value of the underlying currencies of these investments against the U.S. dollar, the fair value at December 31, 2007, could change by approximately $5 million assuming a direct correlation between the currency fluctuation and the value of the investments.

Net assets of consolidated foreign operations, whose functional currency is the local currency, are located primarily in Canada and approximate 7 percent and 6 percent of our net assets at December 31, 2007 and 2006, respectively. These foreign operations do not have significant transactions or financial instruments denominated in other currencies. However, these investments do have the potential to impact our financial position, due to fluctuations in these local currencies arising from the process of re-measuring the local functional currency into the U.S. dollar. As an example, a 20 percent change in the respective functional currencies against the U.S. dollar could have changed *stockholders' equity* by approximately $88 million at December 31, 2007.

Table of Contents

Item 8. ***Financial Statements and Supplementary Data***

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Williams' management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) and for the assessment of the effectiveness of internal control over financial reporting. Our internal control system was designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of financial statements in accordance with accounting principles generally accepted in the United States. Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorization of our management and board of directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of Williams' internal control over financial reporting as of December 31, 2007. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control — Integrated Framework.* Management's assessment included an evaluation of the design of our internal control over financial reporting and testing of the operational effectiveness of our internal control over financial reporting. Based on our assessment we believe that, as of December 31, 2007, Williams' internal control over financial reporting is effective based on those criteria.

Ernst & Young LLP, our independent registered public accounting firm, has audited our internal control over financial reporting, as stated in their report which is included in this Annual Report on Form 10-K.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The Board of Directors and Stockholders of
The Williams Companies, Inc.

We have audited The Williams Companies, Inc.'s internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Williams Companies, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, The Williams Companies, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of The Williams Companies, Inc. as of December 31, 2007 and 2006, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2007 of The Williams Companies, Inc. and our report dated February 22, 2008 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of
The Williams Companies, Inc.

We have audited the accompanying consolidated balance sheet of The Williams Companies, Inc. as of December 31, 2007 and 2006, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2007. Our audits also included the financial statement schedule listed in the index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of The Williams Companies, Inc. at December 31, 2007 and 2006, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As explained in Note 5 to the consolidated financial statements, effective January 1, 2007 the Company adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109*. Also, as explained in Note 1 to the consolidated financial statements, effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards No. 123(R), *Share-Based Payment*.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), The Williams Companies, Inc.'s internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 22, 2008 expressed an unqualified opinion thereon.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Description of Business, Basis of Presentation, and Summary of Significant Accounting Policies

Description of Business

Operations of our company are located principally in the United States and are organized into the following reporting segments: Exploration & Production, Gas Pipeline, Midstream Gas & Liquids (Midstream), and Gas Marketing Services (Gas Marketing).

Exploration & Production includes natural gas development, production and gas management activities primarily in the Rocky Mountain and Mid-Continent regions of the United States and oil and natural gas interests in Argentina.

Gas Pipeline is comprised primarily of two interstate natural gas pipelines, as well as investments in natural gas pipeline-related companies. The Gas Pipeline operating segments have been aggregated for reporting purposes and include Northwest Pipeline GP (Northwest Pipeline), formerly Northwest Pipeline Corporation, which extends from the San Juan basin in northwestern New Mexico and southwestern Colorado to Oregon and Washington, and Transcontinental Gas Pipe Line Corporation (Transco), which extends from the Gulf of Mexico region to the northeastern United States. In addition, we own a 50 percent interest in Gulfstream Natural Gas System L.L.C. (Gulfstream). Gulfstream is a natural gas pipeline system extending from the Mobile Bay area in Alabama to markets in Florida.

Midstream is comprised of natural gas gathering and processing and treating facilities in the Rocky Mountain and Gulf Coast regions of the United States, oil gathering and transportation facilities in the Gulf Coast region of the United States, majority-owned natural gas compression facilities in Venezuela, and assets in Canada, consisting primarily of a natural gas liquids extraction facility and a fractionation plant.

Gas Marketing primarily supports our natural gas businesses by providing marketing and risk management services, which include marketing and hedging the gas produced by Exploration & Production, and procuring fuel and shrink gas and hedging natural gas liquids sales for Midstream. In addition, Gas Marketing manages various natural gas-related contracts such as transportation, storage, and related hedges, and provides services to third parties, such as producers.

Basis of Presentation

In accordance with the provisions related to discontinued operations within Statement of Financial Accounting Standards (SFAS) No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" (SFAS No. 144), the accompanying consolidated financial statements and notes reflect the results of operations and financial position of our power business as discontinued operations. (See Note 2.) These operations include a 7,500-megawatt portfolio of power-related contracts that were sold to Bear Energy, LP, a unit of The Bear Stearns Companies, Inc. and our natural gas-fired electric generating plant located in Hazleton, Pennsylvania (Hazleton), in addition to other power-related assets.

Unless indicated otherwise, the information in the Notes to the Consolidated Financial Statements relates to our continuing operations.

Williams Partners L.P. is a limited partnership engaged in the business of gathering, transporting and processing natural gas and fractionating and storing natural gas liquids. We currently own approximately 23.6 percent of Williams Partners L.P., including the interests of the general partner, which is wholly owned by us, and incentive distribution rights. Considering the presumption of control of the general partner in accordance with Emerging Issues Task Force (EITF) Issue No. 04-5, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights," Williams Partners L.P. is consolidated within our Midstream segment.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Summary of Significant Accounting Policies

Principles of consolidation

The consolidated financial statements include the accounts of our corporate parent and our majority-owned or controlled subsidiaries and investments. We apply the equity method of accounting for investments in unconsolidated companies in which we and our subsidiaries own 20 to 50 percent of the voting interest, or otherwise exercise significant influence over operating and financial policies of the company.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Significant estimates and assumptions include:

- Impairment assessments of investments, long-lived assets and goodwill;
- Litigation-related contingencies;
- Valuations of derivatives;
- Environmental remediation obligations;
- Hedge accounting correlations and probability;
- Realization of deferred income tax assets;
- Valuation of Exploration & Production's reserves;
- Asset retirement obligations;
- Pension and postretirement valuation variables.

These estimates are discussed further throughout these notes.

Cash and cash equivalents

Cash and cash equivalents includes demand and time deposits, money market funds, and other marketable securities with maturities of three months or less when acquired.

Restricted cash

Restricted cash within *current assets* is included in *other current assets and deferred charges* in the Consolidated Balance Sheet and consists primarily of collateral required by certain loan agreements for our Venezuelan operations, and escrow accounts established to fund payments required by our California settlement. (See Note 15). Restricted cash within noncurrent assets is included in *other assets and deferred charges* in the Consolidated Balance Sheet and relates primarily to certain borrowings by our Venezuelan operations as previously mentioned and letters of credit. We do not expect this cash to be released within the next twelve months. The current and noncurrent restricted cash is primarily invested in short-term money market accounts with financial institutions.

The classification of restricted cash is determined based on the expected term of the collateral requirement and not necessarily the maturity date of the investment.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Auction rate securities

Auction rate securities are instruments with long-term underlying maturities, but for which an auction is conducted periodically, as specified, to reset the interest rate and allow investors to buy or sell the instruments. Because auctions generally occur more often than annually, and because we hold these investments in order to meet short-term liquidity needs, we classify auction rate securities as short-term and include them in *other current assets and deferred charges* on our Consolidated Balance Sheet. Our Consolidated Statement of Cash Flows reflects the gross amount of the *purchases of auction rate securities* and the *proceeds from sales of auction rate securities.*

Accounts receivable

Accounts receivable are carried on a gross basis, with no discounting, less the allowance for doubtful accounts. We estimate the allowance for doubtful accounts based on existing economic conditions, the financial conditions of the customers and the amount and age of past due accounts. Receivables are considered past due if full payment is not received by the contractual due date. Interest income related to past due accounts receivable is generally recognized at the time full payment is received or collectibility is assured. Past due accounts are generally written off against the allowance for doubtful accounts only after all collection attempts have been exhausted.

Inventory valuation

All *inventories* are stated at the lower of cost or market. We determine the cost of certain natural gas inventories held by Transco using the last-in, first-out (LIFO) cost method. We determine the cost of the remaining inventories primarily using the average-cost method.

Property, plant and equipment

Property, plant and equipment is recorded at cost. We base the carrying value of these assets on estimates, assumptions and judgments relative to capitalized costs, useful lives and salvage values.

As regulated entities, Northwest Pipeline and Transco provide for depreciation using the straight-line method at Federal Energy Regulatory Commission (FERC)-prescribed rates. Depreciation rates used for major regulated gas plant facilities for all years presented, are as follows:

Category of Property	Depreciation Rates
Gathering facilities	.01% - 3.8%
Storage facilities	.15% - 3.3%
Onshore transmission facilities	.15% - 7.25%
Offshore transmission facilities	.01% - 1.5%
General plant	2.95% - 50%

Depreciation for nonregulated entities is provided primarily on the straight-line method over estimated useful lives, except as noted below for oil and gas exploration and production activities. The estimated useful lives are as follows:

Category of Property	Estimated Useful Lives (In years)
Natural gas gathering and processing facilities	15 to 40
Transportation equipment	3 to 10
Building and improvements	5 to 45
Right of way	4 to 40
Office furnishings, computer software and hardware and other	3 to 30

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Gains or losses from the ordinary sale or retirement of property, plant and equipment for regulated pipelines are credited or charged to accumulated depreciation; other gains or losses are recorded in *other (income) expense — net* included in *operating income*.

Ordinary maintenance and repair costs are generally expensed as incurred. Costs of major renewals and replacements are capitalized as *property, plant, and equipment — net*.

Oil and gas exploration and production activities are accounted for under the successful efforts method. Costs incurred in connection with the drilling and equipping of exploratory wells, as applicable, are capitalized as incurred. If proved reserves are not found, such costs are charged to expense. Other exploration costs, including lease rentals, are expensed as incurred. All costs related to development wells, including related production equipment and lease acquisition costs, are capitalized when incurred. *Depreciation, depletion and amortization* is provided under the units of production method on a field basis.

Unproved properties with individually significant acquisition costs are assessed annually, or as conditions warrant, and any impairment in value is recognized. Unproved properties with acquisition costs that are not individually significant are aggregated, and the portion of such costs estimated to be nonproductive, based on historical experience or other information, is amortized over the average holding period. If the unproved properties are determined to be productive, the appropriate related costs are transferred to proved oil and gas properties.

Proved properties, including developed and undeveloped, and costs associated with unproven reserves, are assessed for impairment using estimated future cash flows on a field basis. Estimating future cash flows involves the use of complex judgments such as estimation of the proved and unproven oil and gas reserve quantities, risk associated with the different categories of oil and gas reserves, timing of development and production, expected future commodity prices, capital expenditures, and production costs.

We record an asset and a liability upon incurrence equal to the present value of each expected future asset retirement obligation (ARO). The ARO asset is depreciated in a manner consistent with the depreciation of the underlying physical asset. We measure changes in the liability due to passage of time by applying an interest method of allocation. This amount is recognized as an increase in the carrying amount of the liability and as a corresponding accretion expense included in *other (income) expense — net* included in *operating income*, except for regulated entities, for which the liability is offset by a regulatory asset.

Goodwill

Goodwill represents the excess of cost over fair value of the assets of businesses acquired. It is evaluated annually for impairment by first comparing our management's estimate of the fair value of a reporting unit with its carrying value, including goodwill. If the carrying value of the reporting unit exceeds its fair value, a computation of the implied fair value of the goodwill is compared with its related carrying value. If the carrying value of the reporting unit goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in the amount of the excess. We have *goodwill* of approximately $1 billion at December 31, 2007, and 2006, at our Exploration & Production segment.

When a reporting unit is sold or classified as held for sale, any goodwill of that reporting unit is included in its carrying value for purposes of determining any impairment or gain/loss on sale. If a portion of a reporting unit with goodwill is sold or classified as held for sale and that asset group represents a business, a portion of the reporting unit's goodwill is allocated to and included in the carrying value of that asset group. None of the operations sold during 2007 or 2005 represented reporting units with goodwill or businesses within reporting units to which goodwill was required to be allocated.

Judgments and assumptions are inherent in our management's estimate of undiscounted future cash flows used to determine the estimate of the reporting unit's fair value. The use of alternate judgments and/or assumptions could result in the recognition of different levels of impairment charges in the financial statements.

Table of Contents

Treasury stock

Treasury stock purchases are accounted for under the cost method whereby the entire cost of the acquired stock is recorded as treasury stock. Gains and losses on the subsequent reissuance of shares are credited or charged to *capital in excess of par value* using the average-cost method.

Derivative instruments and hedging activities

We utilize derivatives to manage our commodity price risk. These instruments consist primarily of futures contracts, swap agreements, option contracts, and forward contracts involving short- and long-term purchases and sales of a physical energy commodity. We execute most of these transactions on an organized commodity exchange or in over-the-counter markets in which quoted prices exist for active periods. For contracts with terms that exceed the time period for which actively quoted prices are available, we determine fair value by estimating commodity prices during the illiquid periods utilizing internally developed valuations incorporating information obtained from commodity prices in actively quoted markets, quoted prices in less active markets, prices reflected in current transactions, and other market fundamental analysis.

We report the fair value of derivatives, except for those for which the normal purchases and normal sales exception has been elected, on the Consolidated Balance Sheet in *derivative assets* and *derivative liabilities* as either current or noncurrent. We determine the current and noncurrent classification based on the timing of expected future cash flows of individual contracts.

The accounting for changes in the fair value of a commodity derivative is governed by SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," (SFAS No. 133), as amended and depends on whether the derivative has been designated in a hedging relationship and whether we have elected the normal purchases and normal sales exception. The accounting for the change in fair value can be summarized as follows:

Derivative Treatment	Accounting Method
Normal purchases and normal sales exception	Accrual accounting
Designated in a qualifying hedging relationship	Hedge accounting
All other derivatives	Mark-to-market accounting

We may elect the normal purchases and normal sales exception for certain short- and long-term purchases and sales of a physical energy commodity. Under accrual accounting, any change in the fair value of these derivatives is not reflected on the balance sheet after the initial election of the exception.

We have also designated a hedging relationship for certain commodity derivatives. For a derivative to qualify for designation in a hedging relationship, it must meet specific criteria and we must maintain appropriate documentation. We establish hedging relationships pursuant to our risk management policies. We evaluate the hedging relationships at the inception of the hedge and on an ongoing basis to determine whether the hedging relationship is, and is expected to remain, highly effective in achieving offsetting changes in fair value or cash flows attributable to the underlying risk being hedged. We also regularly assess whether the hedged forecasted transaction is probable of occurring. If a derivative ceases to be or is no longer expected to be highly effective, or if we believe the likelihood of occurrence of the hedged forecasted transaction is no longer probable, hedge accounting is discontinued prospectively, and future changes in the fair value of the derivative are recognized currently in *revenues*.

For commodity derivatives designated as a cash flow hedge, the effective portion of the change in fair value of the derivative is reported in *other comprehensive income (loss)* and reclassified into earnings in the period in which the hedged item affects earnings. Any ineffective portion of the derivative's change in fair value is recognized currently in *revenues*. Gains or losses deferred in *accumulated other comprehensive loss* associated with terminated derivatives, derivatives that cease to be highly effective hedges, derivatives for which the forecasted transaction is reasonably possible but no longer probable of occurring, and cash flow hedges that have been otherwise

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

discontinued remain in *accumulated other comprehensive loss* until the hedged item affects earnings. If it becomes probable that the forecasted transaction designated as the hedged item in a cash flow hedge will not occur, any gain or loss deferred in *accumulated other comprehensive loss* is recognized in *revenues* at that time. The change in likelihood is a judgmental decision that includes qualitative assessments made by management.

For commodity derivatives that are not designated in a hedging relationship, and for which we have not elected the normal purchases and normal sales exception, we report changes in fair value currently in *revenues*.

Certain gains and losses on derivative instruments included in the Consolidated Statement of Income are netted together to a single net gain or loss, while other gains and losses are reported on a gross basis. Gains and losses recorded on a net basis include:

- Unrealized gains and losses on all derivatives that are not designated as hedges and for which we have not elected the normal purchases and normal sales exception;
- The ineffective portion of unrealized gains and losses on derivatives that are designated as cash flow hedges;
- Realized gains and losses on all derivatives that settle financially;
- Realized gains and losses on derivatives held for trading purposes;
- Realized gains and losses on derivatives entered into as a pre-contemplated buy/sell arrangement.

Realized gains and losses on derivatives that require physical delivery, and which are not held for trading purposes nor were entered into as a pre-contemplated buy/sell arrangement, are recorded on a gross basis. In reaching our conclusions on this presentation, we evaluated the indicators in EITF Issue No. 99-19 "Reporting Revenue Gross as a Principal versus as an Agent," including whether we act as principal in the transaction; whether we have the risks and rewards of ownership, including credit risk; and whether we have latitude in establishing prices.

Gas Pipeline revenues

Revenues from the transportation of gas are recognized in the period the service is provided, and revenues for sales of products are recognized in the period of delivery. Gas Pipeline is subject to FERC regulations and, accordingly, certain revenues collected may be subject to possible refunds upon final orders in pending rate cases. Gas Pipeline records estimates of rate refund liabilities considering Gas Pipeline and other third-party regulatory proceedings, advice of counsel and estimated total exposure, as discounted and risk weighted, as well as collection and other risks.

Exploration & Production revenues

Revenues from the domestic production of natural gas in properties for which Exploration & Production has an interest with other producers are recognized based on the actual volumes sold during the period. Any differences between volumes sold and entitlement volumes, based on Exploration & Production's net working interest, that are determined to be nonrecoverable through remaining production are recognized as accounts receivable or accounts payable, as appropriate. Cumulative differences between volumes sold and entitlement volumes are not significant.

All other revenues

Revenues generally are recorded when services are performed or products have been delivered.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Impairment of long-lived assets and investments

We evaluate the long-lived assets of identifiable business activities for impairment when events or changes in circumstances indicate, in our management's judgment, that the carrying value of such assets may not be recoverable. When an indicator of impairment has occurred, we compare our management's estimate of undiscounted future cash flows attributable to the assets to the carrying value of the assets to determine whether an impairment has occurred. We apply a probability-weighted approach to consider the likelihood of different cash flow assumptions and possible outcomes including selling in the near term or holding for the remaining estimated useful life. If an impairment of the carrying value has occurred, we determine the amount of the impairment recognized in the financial statements by estimating the fair value of the assets and recording a loss for the amount that the carrying value exceeds the estimated fair value.

For assets identified to be disposed of in the future and considered held for sale in accordance with SFAS No. 144, we compare the carrying value to the estimated fair value less the cost to sell to determine if recognition of an impairment is required. Until the assets are disposed of, the estimated fair value, which includes estimated cash flows from operations until the assumed date of sale, is recalculated when related events or circumstances change.

We evaluate our investments for impairment when events or changes in circumstances indicate, in our management's judgment, that the carrying value of such investments may have experienced an other-than-temporary decline in value. When evidence of loss in value has occurred, we compare our estimate of fair value of the investment to the carrying value of the investment to determine whether an impairment has occurred. If the estimated fair value is less than the carrying value and we consider the decline in value to be other-than-temporary, the excess of the carrying value over the fair value is recognized in the consolidated financial statements as an impairment.

Judgments and assumptions are inherent in our management's estimate of undiscounted future cash flows and an asset's fair value. Additionally, judgment is used to determine the probability of sale with respect to assets considered for disposal. The use of alternate judgments and/or assumptions could result in the recognition of different levels of impairment charges in the consolidated financial statements.

Capitalization of interest

We capitalize interest during construction on major projects with construction periods of at least three months and a total project cost in excess of $1 million. Interest is capitalized on borrowed funds and, where regulation by the FERC exists, on internally generated funds as a component of *other income — net*. The rates used by regulated companies are calculated in accordance with FERC rules. Rates used by unregulated companies are based on the average interest rate on debt. The benefit of interest capitalized on internally generated funds for regulated entities is reported in *other income — net* below *operating income*.

Employee stock-based awards

Prior to January 1, 2006, we accounted for stock-based awards to employees and nonmanagement directors (see Note 13) under the recognition and measurement provisions of Accounting Principles Board (APB) Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations, as permitted by SFAS No. 123, "Accounting for Stock-Based Compensation" (SFAS No. 123). Compensation cost for stock options was not recognized in the Consolidated Statement of Income for the years prior to 2006 as all options granted had an exercise price equal to the market value of the underlying common stock on the date of the grant. Prior to January 1, 2006, compensation cost was recognized for restricted stock units. Effective January 1, 2006, we adopted the fair

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

value recognition provisions of SFAS No. 123(R), "Share-Based Payment" (SFAS No. 123(R)), using the modified-prospective method. Under this method, compensation cost recognized in periods subsequent to December 31, 2005, includes: (1) compensation cost for all share-based payments granted through December 31, 2005, but for which the requisite service period had not been completed as of December 31, 2005, based on the grant date fair value estimated in accordance with the provisions of SFAS No. 123, and (2) compensation cost for most share-based payments granted subsequent to December 31, 2005, based on the grant date fair value estimated in accordance with the provisions of SFAS No. 123(R). The performance targets for certain performance-based restricted stock units have not been established and therefore expense is not currently recognized. Expense associated with these performance-based awards will be recognized in future periods when performance targets are established. Results for prior periods have not been restated.

Total stock-based compensation expense for the years ending December 31, 2007 and 2006, was $70 million and $44 million, respectively, of which $9 million and $3 million, respectively, is included in *income (loss) from discontinued operations*. The 2006 amount reflects a reduction of $.3 million of previously recognized compensation cost for restricted stock units related to the estimated number of awards expected to be forfeited. This adjustment is not considered material for reporting as a cumulative effect of a change in accounting principle. Measured but unrecognized stock-based compensation expense at December 31, 2007, was approximately $62 million, which does not include the effect of estimated forfeitures of $3 million. This amount is comprised of approximately $7 million related to stock options and approximately $55 million related to restricted stock units. These amounts are expected to be recognized over a weighted-average period of 1.9 years.

The following table illustrates the effect on *net income* and *earnings per common share* for the year ending December 31, 2005, if we had applied the fair value recognition provisions of SFAS No. 123 to options granted. For purposes of this pro forma disclosure, the value of the options was estimated using a Black-Scholes option pricing model and amortized to expense over the vesting period of the options.

	Year Ended December 31, 2005 (Dollars in millions, except per share amounts)
Net income, as reported	$ 314
Add: Stock-based employee compensation expense included in the consolidated statement of income, net of related tax effects	9
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(17)
Pro forma net income	$ 306
Earnings per common share:	
Basic — as reported	$ .55
Basic — pro forma	$ .54
Diluted — as reported	$ .53
Diluted — pro forma	$ .52

Pro forma amounts for 2005 include compensation expense from awards of our company stock made in 2005, 2004, 2003, and 2002.

Income taxes

We include the operations of our subsidiaries in our consolidated tax return. Deferred income taxes are computed using the liability method and are provided on all temporary differences between the financial basis and the tax basis of our assets and liabilities. Our management's judgment and income tax assumptions are used to determine the levels, if any, of valuation allowances associated with deferred tax assets.

Earnings (loss) per common share

Basic earnings (loss) per common share is based on the sum of the weighted-average number of common shares outstanding and issuable restricted stock units. *Diluted earnings (loss) per common share* includes any dilutive effect of stock options, nonvested restricted stock units and, for applicable periods presented, convertible debt, unless otherwise noted.

Foreign currency translation

Certain of our foreign subsidiaries and equity method investees use their local currency as their functional currency. These foreign currencies include the Canadian dollar, British pound and Euro. Assets and liabilities of certain foreign subsidiaries and equity investees are translated at the spot rate in effect at the applicable reporting date, and the combined statements of operations and our share of the results of operations of our equity affiliates are translated into the U.S. dollar at the average exchange rates in effect during the applicable period. The resulting cumulative translation adjustment is recorded as a separate component of *other comprehensive income (loss)*.

Transactions denominated in currencies other than the functional currency are recorded based on exchange rates at the time such transactions arise. Subsequent changes in exchange rates result in transaction gains and losses which are reflected in the Consolidated Statement of Income.

Issuance of equity of consolidated subsidiary

Sales of residual equity interests in a consolidated subsidiary are accounted for as capital transactions. No adjustments to capital are made for sales of preferential interests in a subsidiary. No gain or loss is recognized on these transactions.

Recent Accounting Standards

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS No. 157). This Statement establishes a framework for fair value measurements in the financial statements by providing a definition of fair value, provides guidance on the methods used to estimate fair value and expands disclosures about fair value measurements. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued FASB Staff Position (FSP) No. FAS 157-2, permitting entities to delay application of SFAS No. 157 to fiscal years beginning after November 15, 2008 for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). SFAS No. 157 requires two distinct transition approaches; (i) cumulative-effect adjustment to beginning retained earnings for certain financial instrument transactions and (ii) prospectively as of the date of adoption through earnings or other comprehensive income, as applicable. On January 1, 2008, we partially applied SFAS No. 157 through a prospective transition for our assets and liabilities that are measured at fair value on a recurring basis, primarily our commodity derivatives, with no material impact to our Consolidated Financial Statements. We did not have financial instrument transactions that required a cumulative-effect adjustment to beginning retained earnings upon the adoption of SFAS No. 157. Beginning January 1, 2009, we will apply SFAS No. 157 fair value requirements to nonfinancial assets and nonfinancial liabilities that are not recognized or disclosed on a recurring basis. SFAS No. 157 expands disclosures about assets and liabilities measured at fair value on a recurring basis effective beginning with first-quarter 2008 reporting.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities — Including an Amendment of FASB Statement No. 115" (SFAS No. 159). SFAS No. 159 establishes a fair value option permitting entities to elect to measure eligible financial instruments and certain other items at fair value. Unrealized gains and losses on items for which the fair value option has been elected will be reported in earnings. The fair value option may be applied on an instrument-by-instrument basis, is irrevocable and is applied to the entire instrument. SFAS No. 159 is effective as of the beginning of the first fiscal year beginning after November 15, 2007, and should not be applied retrospectively to fiscal years beginning prior to the effective date. On the adoption date, an entity may elect the fair value option for eligible items existing at that date and the adjustment for the initial remeasurement of those items to fair value should be reported as a cumulative effect adjustment to the opening balance of retained earnings. Subsequent to January 1, 2008, the fair value option can only be elected when a financial instrument or certain other item is entered into. On January 1, 2008, we did not elect the fair value option for any existing eligible financial instruments or certain other items.

In April 2007, the FASB issued an FSP on a previously issued FASB Interpretation (FIN), FSP FIN 39-1, "Amendment of FASB Interpretation No. 39." FSP FIN 39-1 amends FIN 39, "Offsetting of Amounts Related to Certain Contracts (as amended)" by requiring the offsetting of fair value amounts recognized for the right to reclaim or obligation to return cash collateral if the related derivative instruments have been offset pursuant to a master netting arrangement. The FSP requires disclosure of the accounting policy related to offsetting fair value amounts pursuant to master netting arrangements as well as disclosure of amounts recognized for the right to reclaim or obligation to return cash collateral. This FSP is effective for fiscal years beginning after November 15, 2007, with early application permitted, and is applied retrospectively as a change in accounting principle for all financial statements presented. We do not offset derivative instruments subject to master netting arrangements for financial statement presentation purposes; therefore, there is no change to our accounting policy and no financial impact on our Consolidated Financial Statements.

In June 2007, the FASB ratified EITF Issue No. 06-11 "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards" (EITF 06-11). EITF 06-11 requires that the income tax benefits received on dividends or dividend equivalents paid to employees holding equity-classified nonvested shares be recorded as additional paid-in capital when the dividends or dividend equivalents are charged to retained earnings pursuant to SFAS No. 123(R). This EITF is applied prospectively and is effective for fiscal years beginning after December 15, 2007, and interim periods within those years. EITF 06-11 requires the disclosure of any change in accounting policy for income tax benefits of dividends or dividend equivalents on share-based payment awards as a result of adoption. We began applying the provisions of EITF 06-11 on January 1, 2008 with no material impact on our Consolidated Financial Statements.

In December 2007, the FASB issued SFAS No. 141(R) "Business Combinations" (SFAS No. 141(R)). SFAS No. 141 (R) applies to all business combinations and establishes guidance for recognizing and measuring identifiable assets acquired, liabilities assumed, noncontrolling interests in the acquiree and goodwill. Most of these items are recognized at their full fair value on the acquisition date, including acquisitions where the acquirer obtains control but less than 100 percent ownership in the acquiree. SFAS No. 141(R) also requires expensing of transaction costs as incurred and establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS No. 141(R) is effective for business combinations with an acquisition date in fiscal years beginning after December 15, 2008.

In December 2007, the FASB issued SFAS No. 160 "Noncontrolling Interests in Consolidated Financial Statements — an amendment of Accounting Research Bulletin No. 51" (SFAS No. 160). SFAS No. 160 establishes accounting and reporting standards for noncontrolling ownership interests in subsidiaries (previously referred to as minority interests). Noncontrolling ownership interests in consolidated subsidiaries will be presented in the consolidated balance sheet within stockholders' equity as a separate component from the parent's equity. Earnings attributable to the noncontrolling interests will be reported as a part of consolidated net income and not as a separate income or expense item. Earnings per share will continue to be based on earnings attributable to only the parent company and does not change upon adoption of SFAS No. 160. SFAS No. 160 provides guidance on accounting for changes in the parent's ownership interest in a subsidiary, including transactions where control is retained and where control is relinquished. SFAS No. 160 also requires additional disclosure of information related to noncontrolling interests. SFAS No. 160 is effective for fiscal years beginning after December 15, 2008, and early adoption is prohibited. The Statement will be applied prospectively to transactions involving noncontrolling interests, including noncontrolling interests that arose prior to the effective date, as of the beginning of the fiscal year it is initially adopted. However, the presentation of noncontrolling interests within stockholders' equity and the inclusion of earnings attributable to the noncontrolling interests in consolidated net income requires retrospective application to all periods presented. We will assess the impact on our Consolidated Financial Statements.

Note 2. Discontinued Operations

The businesses discussed below represent components that have been sold or approved for sale by our Board of Directors and are classified as discontinued operations. Therefore, their results of operations (including any impairments, gains or losses) and financial position have been reflected in the consolidated financial statements and notes as discontinued operations.

In November, 2007, we completed the sale of substantially all of our power business to Bear Energy, LP, a unit of The Bear Stearns Companies, Inc., for approximately $496 million in cash, subject to the final purchase price adjustments. Included in the sale was our portfolio of power-related contracts, which consisted of tolling contracts, full requirement contracts, tolling resales, heat rate options, related hedges and other related assets.

Summarized Results of Discontinued Operations

The following table presents the summarized results of discontinued operations for the years ended December 31, 2007, 2006, and 2005.

	2007	2006	2005
		(Millions)	
Revenues	$2,436	$2,437	$2,802
Income (loss) from discontinued operations before income taxes	$ 392	$ (58)	$ (247)
(Impairments) and gain (loss) on sales	(162)	—	1
Benefit (provision) for income taxes	(87)	20	89
Income (loss) from discontinued operations	$ 143	$ (38)	$ (157)

Income (loss) from discontinued operations before income taxes for the year ended December 31, 2007, includes a gain of $429 million (reported in *revenues* of discontinued operations) associated with the reclassification of deferred net hedge gains from *accumulated other comprehensive income* to earnings in second-quarter 2007. This reclassification was based on the determination that the forecasted transactions related to the derivative cash flow hedges being sold to Bear Energy, LP, were probable of not occurring. This gain is partially offset by current year unrealized mark-to-market losses of approximately $23 million. *Income (loss) from discontinued operations before income taxes* for the year ended December 31, 2006, includes charges of $19 million for an adverse arbitration award related to our former chemical fertilizer business, $6 million for a loss contingency in connection with a former exploration business, and $15 million associated with an oil purchase contract related to our former Alaska refinery. In addition, we recorded income of $13 million related to the reduction of contingent obligations associated with our former distributive power business. *Income (loss) from discontinued operations before income taxes* includes the results of our former power business operations in each year.

(Impairments) and gain (loss) on sales for the year ended December 31, 2007, includes a pre-tax loss on the sale of substantially all of our power business of approximately $37 million. We have also recognized impairments of approximately $111 million related to the carrying value of certain derivative contracts for which we had previously elected the normal purchases and normal sales exception under SFAS No. 133, and, accordingly, were no longer recording at fair value, and approximately $14 million related to our natural gas-fired electric generating

Table of Contents

plant near Hazelton, Pennsylvania (Hazleton). These impairments were based on our comparison of the carrying value to the estimate of fair value less cost to sell.

Summarized Assets and Liabilities of Discontinued Operations

The following table presents the summarized assets and liabilities of discontinued operations as of December 31, 2007 and 2006.

The December 31, 2007, balances for *derivative assets* and *derivative liabilities* represent contracts remaining to be assigned to Bear Energy, LP, entirely offset by reciprocal positions with Bear Energy, LP. We expect to complete the assignment of all such contracts in 2008. The December 31, 2007, balance of *property, plant and equipment — net* includes Hazelton, which is under contract to be sold.

Note 3. Investing Activities

Investing Income

Investing income for the years ended December 31, 2007, 2006 and 2005, is as follows:

	2007	2006 (Millions)	2005
Equity earnings*	$137	$ 99	$ 66
Loss from investments*	—	—	(109)
Impairments of cost-based investments	(1)	(20)	(2)
Interest income and other	121	89	70
Total	$257	$168	$ 25

* Items also included in *segment profit*. (See Note 17.)

Loss from investments for the year ended December 31, 2005, includes:

- An $87 million impairment of our investment in Longhorn Partners Pipeline L.P. (Longhorn), which is included in our Other segment;
- A $23 million impairment of our investment in Aux Sable Liquid Products, L.P. (Aux Sable), which is included in our Midstream segment.

Impairments of cost-based investments for the year ended December 31, 2006, includes a $16 million impairment of a Venezuelan investment primarily due to a decline in reserve estimates. In 2006, our 10 percent direct working interest in an operating contract was converted to a 4 percent equity interest in a Venezuelan corporation which owns and operates oil and gas activities. Our 4 percent equity interest is reported as a cost method investment; previously, we accounted for our working interest using the proportionate consolidation method.

Interest income and other for the year ended December 31, 2007, includes $14 million of gains from sales of cost-based investments.

Investments

Investments at December 31, 2007 and 2006, are as follows:

	2007 (Millions)	2006
Equity method:		
Gulfstream Natural Gas System, L.L.C. — 50%	$439	$387
Discovery Producer Services, L.L.C. — 60%*	215	221
Petrolera Entre Lomas S.A. — 40.8%	65	59
ACCROVEN — 49.3%	62	57
Other	95	90
	876	814
Cost method	25	52
	$901	$866

* We own 60 percent indirectly through Williams Partners L.P., of which we own approximately 23.6 percent. We continue to account for this investment under the equity method due to the voting provisions of Discovery's limited liability company which provide the other member of Discovery significant participatory rights such that we do not control the investment.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Differences between the carrying value of our equity investments and the underlying equity in the net assets of the investees is primarily related to impairments previously recognized.

Dividends and distributions, including those presented below, received from companies accounted for by the equity method were $118 million in 2007 and $116 million in 2006. These transactions reduced the carrying value of our investments. These dividends and distributions primarily included:

	2007	2006
	(Millions)	
Discovery Producer Services, L.L.C.	$ 36	$ 27
Gulfstream Natural Gas System L.L.C.	34	42
Aux Sable Liquid Products L.P.	22	13
Petrolera Entre Lomas S.A.	12	14

In addition in 2007, we contributed $38 million to Gulfstream Natural Gas System L.L.C. (Gulfstream).

Summarized Financial Position and Results of Operations of Equity Method Investments

Financial position at December 31:

	2007	2006
	(Millions)	
Current assets	$ 395	$ 296
Noncurrent assets	3,482	3,302
Current liabilities	232	198
Noncurrent liabilities	1,483	1,311

Results of operations for the years ended December 31:

	2007	2006	2005
		(Millions)	
Gross revenue	$1,183	$970	$1,338
Operating income	533	401	236
Net income (loss)	392	(15)	105

Summarized results of operations of equity method investments in 2006 reflect the impact of a loss incurred by Longhorn on the sale of its pipeline.

Guarantees on Behalf of Investees

We have guaranteed commercial letters of credit totaling $20 million on behalf of ACCROVEN. These expire in January 2009 and have no carrying value.

We have provided guarantees on behalf of certain entities in which we have an equity ownership interest. These generally guarantee operating performance measures and the maximum potential future exposure cannot be determined. There are no expiration dates associated with these guarantees. No amounts have been accrued at December 31, 2007 and 2006.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Note 4. Asset Sales and Other Accruals

The following table presents significant gains or losses from asset sales and other accruals or adjustments reflected in *other (income) expense — net* within *segment costs and expenses.*

	Years Ended December 31,		
	2007	2006	2005
		(Millions)	
Exploration & Production			
Gains on sales of certain natural gas properties	$ —	$ —	$ (30)
Gas Pipeline			
Change in estimate related to a regulatory liability	(17)	—	—
Income associated with payments received for a terminated firm transportation agreement on Grays Harbor lateral. Associated with this gain is interest income of $2 million, which is included in *investing income*	(18)	—	—
Midstream			
Income from favorable litigation outcome	(12)	—	—
Loss on impairment of Carbonate Trend pipeline	10	—	—
Accrual for Gulf Liquids litigation contingency. Associated with this contingency is an interest expense accrual of $25 million, which is included in *interest accrued* (see Note 15)	—	73	—
Gas Marketing Services			
Accrual for litigation contingencies	20	—	82

Additional Items

Costs and operating expenses within our Gas Pipeline segment reported in 2005 includes:

- An adjustment to reduce costs by $12 million to correct the carrying value of certain liabilities recorded in prior periods;
- Adjustments of $37 million reflected as increases in costs and operating expenses related to $32 million of prior period accounting and valuation corrections for certain inventory items and an accrual of $5 million for contingent refund obligations.

Selling, general and administrative expenses within our Gas Pipeline segment in 2005 includes:

- An adjustment to reduce costs by $6 million to correct the carrying value of certain liabilities recorded in prior periods;
- A $17 million reduction in pension expense for the cumulative impact of a correction of an error attributable to 2003 and 2004. (See Note 7.)

Note 5. Provision for Income Taxes

The *provision for income taxes* from continuing operations includes:

	2007	2006	2005
		(Millions)	
Current:			
Federal	$ 29	$ (9)	$225
State	9	3	3
Foreign	46	43	31
	84	37	259
Deferred:			
Federal	422	146	23
State	(4)	4	27
Foreign	22	24	(8)
	440	174	42
Total provision	$524	$211	$301

Reconciliations from the *provision for income taxes* from continuing operations at the federal statutory rate to the realized *provision for income taxes* are as follows:

	2007	2006	2005
		(Millions)	
Provision at statutory rate	$480	$195	$271
Increases (decreases) in taxes resulting from:			
State income taxes (net of federal benefit)	4	7	29
Foreign operations — net	18	23	2
Utilization/valuation/expiration of charitable contributions	(6)	(9)	8
Federal income tax litigation	—	(40)	4
Non-deductible convertible debenture expenses	—	10	—
Adjustment of excess deferred taxes	2	7	(20)
Non-deductible penalties	—	—	18
Other — net	26	18	(11)
Provision for income taxes	$524	$211	$301

Utilization of foreign operating loss carryovers reduced the provision for income taxes by $5 million, $3 million and $13 million in 2007, 2006 and 2005, respectively.

Income from continuing operations before income taxes and cumulative effect of change in accounting principle includes $169 million, $144 million, and $72 million of international income in 2007, 2006, and 2005, respectively.

We provide for income taxes using the asset and liability method as required by SFAS No. 109, "Accounting for Income Taxes." As a result of additional analysis of our tax basis and book basis assets and liabilities, we recorded a tax provision of $2 million and $7 million for 2007 and 2006, respectively, and a tax benefit of $20 million in 2005, to adjust the overall deferred income tax liabilities on the Consolidated Balance Sheet.

During the course of audits of our business by domestic and foreign tax authorities, we frequently face challenges regarding the amount of taxes due. These challenges include questions regarding the timing and amount

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

of deductions and the allocation of income among various tax jurisdictions. In evaluating the liability associated with our various tax filing positions, we apply the two-step process of recognition and measurement as required by FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109" (FIN 48). In association with this liability, we record an estimate of related interest and tax exposure as a component of our tax provision. The impact of this accrual is included within *other — net* in our reconciliation of the tax provision to the federal statutory rate.

Significant components of *deferred tax liabilities* and *deferred tax assets* as of December 31, 2007, and 2006, are as follows:

	2007	2006
	(Millions)	
Deferred tax liabilities:		
Property, plant and equipment	$3,192	$2,899
Derivatives — net	—	223
Investments	176	210
Other	89	101
Total deferred tax liabilities	3,457	3,433
Deferred tax assets:		
Minimum tax credits	8	146
Accrued liabilities	433	510
Derivatives — net	173	—
Federal carryovers	—	183
Foreign carryovers	50	36
Other	53	51
Total deferred tax assets	717	926
Less valuation allowance	57	36
Net deferred tax assets	660	890
Overall net deferred tax liabilities	$2,797	$2,543

The *valuation allowance* at December 31, 2007 and December 31, 2006, serves to reduce the recognized tax benefit associated with foreign carryovers to an amount that will, more likely than not, be realized. We do not expect to be able to utilize our $57 million foreign deferred tax assets primarily related to carryovers.

Undistributed earnings of certain consolidated foreign subsidiaries at December 31, 2007, totaled approximately $262 million. No provision for deferred U.S. income taxes has been made for these subsidiaries because we intend to permanently reinvest such earnings in foreign operations.

Cash payments for income taxes (net of refunds) were $384 million, $79 million, and $230 million in 2007, 2006, and 2005, respectively. Cash tax payments include settlements with taxing authorities associated with prior period audits of $94 million, $42 million, and $204 million in 2007, 2006 and 2005, respectively.

Effective January 1, 2007, we adopted FIN 48 and, as required by the Interpretation, recognized the net impact of the cumulative effect of adoption as a $17 million increase to *accumulated deficit*. The Interpretation prescribes guidance for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. To recognize a tax position, the enterprise determines whether it is more likely than not that the tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. A tax position that meets the more likely than not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured as the largest amount of benefit, determined on a cumulative probability basis, that is greater than 50 percent likely of being realized upon ultimate settlement.

As of December 31, 2007, we had approximately $76 million of unrecognized tax benefits. If recognized, approximately $64 million, net of federal tax expense, would be recorded as a reduction of income tax expense. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	(Millions)
Balance at January 1, 2007	$ 93
Additions based on tax positions related to the current year	—
Additions for tax positions for prior years	5
Reductions for tax positions of prior years	(19)
Settlement with taxing authorities	(3)
Lapse of applicable statute of limitations	—
Balance at December 31, 2007	$ 76

We recognize related interest and penalties as a component of income tax expense. During 2007, approximately $60 million of interest and penalties were included in the provision for income taxes. As of December 31, 2007, approximately $86 million of interest and penalties primarily relating to uncertain tax positions have been accrued.

As of December 31, 2007, the Internal Revenue Service (IRS) examination of our consolidated U.S. income tax return for 2002 through 2005 was in process. IRS examinations for 1996 through 2001 have been completed but the years remain open while certain issues are under review with the Appeals Division of the IRS. The statute of limitations for most states expires one year after IRS audit settlement.

Generally, tax returns for our Venezuela and Canadian entities are open to audit from 2003 through 2007. Tax returns for our Argentine entities are open to audit from 2001 through 2007. Certain Canadian entities are currently under examination.

During the next twelve months, we do not expect settlement of any unrecognized tax benefit associated with domestic or international matters under audit to have a material impact on our financial position.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Note 6. Earnings Per Common Share from Continuing Operations

Basic and diluted earnings per common share for the years ended December 31, 2007, 2006 and 2005, are:

	2007	2006	2005
	(Dollars in millions, except per-share amounts; shares in thousands)		
Income from continuing operations available to common stockholders for basic and diluted earnings per share(1)	$ 847	$ 347	$ 473
Basic weighted-average shares(2)	596,174	595,053	570,420
Effect of dilutive securities:			
Nonvested restricted stock units(3)	1,627	1,029	2,890
Stock options	4,743	4,440	4,989
Convertible debentures	7,322	8,105	27,548
Diluted weighted-average shares	609,866	608,627	605,847
Earnings per common share from continuing operations:			
Basic	$ 1.42	$ .58	$ .82
Diluted	$ 1.40	$ .57	$ .79

(1) The years ended December 31, 2007, 2006 and 2005, include $3 million, $3 million and $10 million of interest expense, net of tax, associated with our convertible debentures. (See Note 12.) These amounts have been added back to *income from continuing operations available to common stockholders* to calculate diluted earnings per common share.

(2) During January 2006, we issued 20 million shares of common stock related to a conversion offer for our 5.5 percent convertible debentures. In February 2005, we issued 11 million common shares associated with our FELINE PACS units.

(3) The nonvested restricted stock units outstanding at December 31, 2007, will vest over the period from January 2008 to January 2012.

The table below includes information related to stock options that were outstanding at the end of each respective year but have been excluded from the computation of weighted-average stock options due to the option exercise price exceeding the fourth quarter weighted-average market price of our common shares.

	2007	2006	2005
Options excluded (millions)	.8	3.6	4.7
Weighted-average exercise prices of options excluded	$40.07	$36.14	$35.22
Exercise price ranges of options excluded	$36.66 - $42.29	$26.79 - $42.29	$22.68 - $42.29
Fourth quarter weighted-average market price	$35.14	$25.77	$22.41

Note 7. Employee Benefit Plans

We have noncontributory defined benefit pension plans in which all eligible employees participate. Currently, eligible employees earn benefits primarily based on a cash balance formula. Various other formulas, as defined in the plan documents, are utilized to calculate the retirement benefits for plan participants not covered by the cash balance formula. At the time of retirement, participants may receive annuity payments, a lump sum payment or a combination of lump sum and annuity payments. In addition to our pension plans, we currently provide subsidized

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

medical and life insurance benefits (other postretirement benefits) to certain eligible participants. Generally, employees hired after December 31, 1991, are not eligible for the subsidized medical benefits, except for participants that were employees of Transco Energy Company on December 31, 1995, and other miscellaneous defined participant groups. Certain of these other postretirement benefit plans, particularly the subsidized medical benefit plans, provide for retiree contributions and contain other cost-sharing features such as deductibles, co-payments, and co-insurance. The accounting for these plans anticipates future cost-sharing that is consistent with our expressed intent to increase the retiree contribution level generally in line with health care cost increases.

Benefit Obligations

The following table presents the changes in benefit obligations and plan assets for pension benefits and other postretirement benefits for the years indicated. The annual measurement date for our plans is December 31. The sale of our power business did not have a significant impact on our employee benefit plans. (See Note 2.)

	Pension Benefits		Other Postretirement Benefits	
	2007	2006	2007	2006
	(Millions)			
Change in benefit obligation:				
Benefit obligation at beginning of year	$ 931	$ 897	$312	$ 375
Service cost	23	22	3	3
Interest cost	54	51	17	17
Plan participants' contributions	—	—	5	5
Benefits paid	(64)	(52)	(23)	(24)
Actuarial (gain) loss	(48)	13	(30)	(64)
Benefit obligation at end of year	896	931	284	312
Change in plan assets:				
Fair value of plan assets at beginning of year	1,005	888	180	164
Actual return on plan assets	92	126	15	21
Employer contributions	41	43	15	14
Plan participants' contributions	—	—	5	5
Benefits paid	(64)	(52)	(23)	(24)
Fair value of plan assets at end of year	1,074	1,005	192	180
Funded status — overfunded (underfunded)	$ 178	$ 74	$ (92)	$(132)
Accumulated benefit obligation	$ 838	$ 872		

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The net underfunded/overfunded status of our pension plans and other postretirement benefit plans presented in the previous table are recognized in the Consolidated Balance Sheet within the following accounts:

	December 31,	
	2007	2006
	(Millions)	
Overfunded pension plans:		
Noncurrent assets	$203	$114
Underfunded pension plans:		
Current liabilities	1	1
Noncurrent liabilities	24	39
Underfunded other postretirement benefit plans:		
Current liabilities	9	9
Noncurrent liabilities	83	123

The plan assets within our other postretirement benefit plans are intended to be used for the payment of benefits for certain groups of participants. The *current liabilities* for the other postretirement benefit plans represent the actuarial present value of benefits included in the benefit obligation payable in the subsequent year for the groups of participants whose benefits are not expected to be paid from plan assets.

The 2007 *actuarial gain* of $48 million for our pension plans included in the table of changes in benefit obligation is due primarily to the impact of changes in the discount rate assumptions utilized to calculate the benefit obligation. The 2006 *actuarial loss* of $13 million for our pension plans included in the table of changes in benefit obligation is due primarily to the impact of actual results differing from assumed results such as compensation and participant deaths, offset by the net impact of changes in assumptions utilized to calculate the benefit obligation including the discount rate, mortality and expected form of benefit payments. The 2007 *actuarial gain* of $30 million for our other postretirement benefit plans included in the table of changes in benefit obligation is due primarily to the impact of the increase in the discount rate used to calculate the benefit obligation and a decrease in the number of eligible participants in the plan. The 2006 *actuarial gain* of $64 million for our other postretirement benefit plans included in the table of changes in benefit obligation is due primarily to the impact of changes in assumptions utilized to calculate the benefit obligation including claims costs, health care cost trend rates and the discount rate, as well as actual results differing from assumed results such as participant deaths and terminations prior to retirement.

The current accounting rules for the determination of *net periodic benefit expense* allow for the delayed recognition of gains and losses caused by differences between actual and assumed outcomes for items such as estimated return on plan assets, or caused by changes in assumptions for items such as discount rates or estimated future compensation levels. The *net actuarial gains (losses)* presented in the following table and recorded in *accumulated other comprehensive loss* and *net regulatory liabilities* represents the cumulative net deferred gains (losses) from these types of differences or changes which have not yet been recognized in the Consolidated Statement of Income. A portion of the *net actuarial gains (losses)* are amortized over the participants' average

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

remaining future years of service, which is approximately 12 years for both our pension plans and our other postretirement benefit plans.

Accumulated other comprehensive loss at December 31 includes the following:

	Pension Benefits		Other Postretirement Benefits	
	2007	2006	2007	2006
	(Millions)			
Amounts not yet recognized in net periodic benefit expense:				
Prior service cost	$ (6)	$ (6)	$ (5)	$ (7)
Net actuarial gains (losses)	(156)	(242)	7	(8)

At December 31, 2007, *net regulatory liabilities* includes prior service credits of $3 million and net actuarial gains of $26 million for our other postretirement benefit plans associated with our FERC-regulated gas pipelines. These amounts have not yet been recognized in *net periodic benefit expense.* At December 31, 2006, prior service credits of $5 million and net actuarial gains of $8 million were included in *net regulatory liabilities*.

We have multiple pension plans that are aggregated as prescribed for reporting purposes including both overfunded and underfunded pension plans.

Information for pension plans with a projected benefit obligation in excess of plan assets:

	December 31,	
	2007	2006
	(Millions)	
Projected benefit obligation	$ 25	$ 480
Fair value of plan assets	—	440

At December 31, 2007, the pension plans with a projected benefit obligation in excess of plan assets includes only our unfunded nonqualified pension plans. At December 31, 2006, the pension plans with a projected benefit obligation in excess of plan assets included one of our funded tax-qualified pension plans and our unfunded nonqualified pension plans.

Information for pension plans with an accumulated benefit obligation in excess of plan assets:

	December 31,	
	2007	2006
	(Millions)	
Accumulated benefit obligation	$ 22	$ 19
Fair value of plan assets	—	—

Table of Contents

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Net Periodic Benefit Expense (Income) and Items Recognized in Other Comprehensive Income (Loss)

Net periodic benefit expense (income) and other changes in plan assets and benefit obligations recognized in *other comprehensive income (loss)* for the years ended December 31, 2007, 2006, and 2005, consist of the following:

	Pension Benefits			Other Postretirement Benefits		
	2007	2006	2005	2007	2006	2005
	(Millions)					
Components of net periodic benefit expense (income):						
Service cost	$ 23	$ 22	$ 21	$ 3	$ 3	$ 3
Interest cost	54	51	47	17	17	20
Expected return on plan assets	(73)	(67)	(71)	(12)	(11)	(11)
Amortization of prior service credit	—	(1)	—	—	—	(4)
Amortization of net actuarial (gain) loss	19	21	(5)	—	—	3
Regulatory asset amortization	1	—	1	5	7	7
Settlement/curtailment expense	—	—	3	—	—	—
Net periodic benefit expense (income)	$ 24	$ 26	$ (4)	$ 13	$ 16	$ 18
Other changes in plan assets and benefit obligations recognized in *other comprehensive income (loss):*						
Net actuarial gain	$ (68)			$ (15)		
Amortization of net actuarial losses	(19)			—		
Amortization of prior service costs	—			(2)		
Other changes in plan assets and benefit obligations recognized in *other comprehensive income (loss)*	(87)			(17)		
Total recognized in *net periodic benefit expense* and *other comprehensive income (loss)*	$ (63)			$ (4)		

Other changes in plan assets and benefit obligations for our other postretirement benefit plans associated with our FERC-regulated gas pipelines are recognized in *net regulatory liabilities* at December 31, 2007, and include *net actuarial gains* of $18 million and *amortization of prior service credits* of $2 million.

Net actuarial losses of $8 million and prior service costs of $1 million related to our pension plans that are included in *accumulated other comprehensive loss* at December 31, 2007, are expected to be amortized in *net periodic benefit expense* in 2008. Prior service costs of $1 million related to our other postretirement benefit plans that are included in *accumulated other comprehensive loss* at December 31, 2007, are expected to be amortized in *net periodic benefit expense* in 2008. No net actuarial losses related to our other postretirement benefit plans that are included in *accumulated other comprehensive loss* at December 31, 2007, are expected to be amortized in *net periodic benefit expense* in 2008.

The prior service credit related to our other postretirement benefit plans that is included in *net regulatory liabilities* at December 31, 2007, and expected to be recognized in *net periodic benefit expense (income)* in 2008 is $1 million. No net actuarial gains related to our other postretirement benefit plans and included in *net regulatory liabilities* are expected to be recognized in *net periodic benefit expense* in 2008.

Net periodic benefit expense (income) for our pension plans for 2005 includes a $17 million reduction to expense to record the cumulative impact of a correction of an error determined to have occurred in 2003 and 2004.

Table of Contents

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The error was associated with the actuarial computation of annual *net periodic benefit expense (income)* which resulted from the identification of errors in certain Transco participant data involving annuity contract information utilized for 2003 and 2004. The adjustment is reflected as $16 million within *amortization of net actuarial (gain) loss* and $1 million within *regulatory asset amortization*.

The differences in the amount of actuarially determined *net periodic benefit expense* for our other postretirement benefit plans and the other postretirement benefit costs recovered in rates for our FERC-regulated gas pipelines are deferred as a regulatory asset or liability. At December 31, 2007, we have regulatory liabilities of $10 million for Transco and $18 million for Northwest Pipeline related to these deferrals. At December 31, 2006, we had a regulatory asset of $9 million for Transco and a regulatory liability of $13 million at Northwest Pipeline related to these deferrals. These amounts will be reflected in future rates based on Transco and Northwest Pipeline's rate structures.

Key Assumptions

The weighted-average assumptions utilized to determine benefit obligations as of December 31, 2007, and 2006, are as follows:

	Pension Benefits		Other Postretirement Benefits	
	2007	2006	2007	2006
Discount rate	6.41%	5.80%	6.40%	5.80%
Rate of compensation increase	5.00	5.00	N/A	N/A

The weighted-average assumptions utilized to determine *net periodic benefit expense* for the years ended December 31, 2007, 2006, and 2005, are as follows:

	Pension Benefits			Other Postretirement Benefits		
	2007	2006	2005	2007	2006	2005
Discount rate	5.80%	5.65%	5.86%	5.80%	5.60%	5.63%
Expected long-term rate of return on plan assets	7.75	7.75	8.50	6.97	6.95	7.45
Rate of compensation increase	5.00	5.00	5.00	N/A	N/A	N/A

The discount rates for our pension and other postretirement benefit plans were determined separately based on an approach specific to our plans and their respective expected benefit cash flows. The plans were analyzed and the year-end discount rates were determined based on a yield curve comprised of high-quality corporate bonds published by a large securities firm.

The expected long-term rates of return on plan assets were determined by combining a review of the historical returns realized within the portfolio, the investment strategy included in the plans' Investment Policy Statement, and capital market projections for the asset classifications in which the portfolio is invested and the target weightings of each asset classification.

The mortality assumptions used to determine the obligations for our pension and other postretirement benefit plans are related to the experience of the plans and the best estimate of expected plan mortality. The selected mortality tables are among the most recent tables available.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The assumed health care cost trend rate for 2008 is 9.6 percent, and systematically decreases to 5.4 percent by 2015. The health care cost trend rate assumption has a significant effect on the amounts reported. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	Point increase	Point decrease
	(Millions)	
Effect on total of service and interest cost components	$ 3	$ (4)
Effect on other postretirement benefit obligation	55	(44)

Plan Assets

The investment policy for our pension and other postretirement benefit plans articulates an investment philosophy in accordance with ERISA which governs the investment of the assets in a diversified portfolio. The investment strategy for the assets of the pension plans and approximately one half of the assets of the other postretirement benefit plans include maximizing returns with reasonable and prudent levels of risk. The investment returns on the approximate one half of remaining assets of the other postretirement benefit plans is subject to federal income tax, therefore the investment strategy also includes investing in a tax efficient manner.

The following table presents the weighted-average asset allocations at December 31, 2007, and 2006 and target asset allocation at December 31, 2007, by asset category.

	Pension Benefits			Other Postretirement Benefits		
	2007	2006	Target	2007	2006	Target
Equity securities	84%	82%	84%	79%	77%	80%
Debt securities	12	12	16	12	12	20
Other	4	6	—	9	11	—
	100%	100%	100%	100%	100%	100%

Included in equity securities are investments in commingled funds that invest entirely in equity securities and comprise 40 percent at December 31, 2007, and 38 percent at December 31, 2006, of the pension plans' weighted-average assets, and 29 percent at December 31, 2007, and 27 percent at December 31, 2006, of the other postretirement benefit plans' weighted-average assets. Other assets are comprised primarily of cash and cash equivalents.

The assets are invested in accordance with the target allocations identified in the previous table. The investment policy provides for minimum and maximum ranges for the broad asset classes in the previous table. Additional target allocations are identified for specific classes of equity securities. The asset allocation ranges established by the investment policy are based upon a long-term investment perspective. The ranges are more heavily weighted toward equity securities since the liabilities of the pension and other postretirement benefit plans are long-term in nature and historically equity securities have significantly outperformed other asset classes over long periods of time.

Equity security investments are restricted to high-quality, readily marketable securities that are actively traded on the major U.S. and foreign national exchanges. Investment in Williams' securities or an entity in which Williams has a majority ownership is prohibited except where these securities may be owned in a commingled investment vehicle in which the pension plans' trust invests. No more than five percent of the total stock portfolio valued at market may be invested in the common stock of any one corporation. The following securities and transactions are not authorized: unregistered securities, commodities or commodity contracts, short sales or margin transactions or other leveraging strategies. Investment strategies using options or futures are not authorized.

Debt security investments are restricted to high-quality, marketable securities that include U.S. Treasury, federal agencies and U.S. Government guaranteed obligations, and investment grade corporate issues. The overall

Table of Contents

rating of the debt security assets is required to be at least "A", according to the Moody's or Standard & Poor's rating system. No more than five percent of the total portfolio at the time of purchase may be invested in the debt securities of any one issuer. U.S. Government guaranteed and agency securities are exempt from this provision.

During 2007, 11 active investment managers and one passive investment manager managed substantially all of the pension and other postretirement benefit plans' funds, each of whom had responsibility for managing a specific portion of these assets.

Plan Benefit Payments and Employer Contributions

The following are the expected benefits to be paid by the plan and the expected federal prescription drug subsidy to be received in the next ten years. These estimates are based on the same assumptions previously discussed and reflect future service as appropriate. The actuarial assumptions are based on long-term expectations and include, but are not limited to, assumptions as to average expected retirement age and form of benefit payment. Actual benefit payments could differ significantly from expected benefit payments if near-term participant behaviors differ significantly from the actuarial assumptions.

	Pension Benefits	Other Postretirement Benefits	Federal Prescription Drug Subsidy
		(Millions)	
2008	$ 46	$ 20	$ (2)
2009	40	21	(2)
2010	36	21	(2)
2011	37	22	(2)
2012	43	21	(2)
2013 - 2017	265	110	(15)

We expect to contribute approximately $41 million to our pension plans and approximately $15 million to our other postretirement benefit plans in 2008.

Defined Contribution Plans

We also maintain defined contribution plans for the benefit of substantially all of our employees. Generally, plan participants may contribute a portion of their compensation on a pre-tax and after-tax basis in accordance with the plan's guidelines. We match employees' contributions up to certain limits. Costs recognized for these plans were $22 million in 2007, $19 million in 2006, and $17 million in 2005. One of our defined contribution plans was amended as of July 1, 2005, to convert one of the funds within the plan to a nonleveraged employee stock ownership plan (ESOP). The 2005 compensation cost related to the ESOP of $1 million is included in the $17 million of contributions, previously mentioned above, and represents the contribution made in consideration for employee services rendered in 2005. It is measured by the amount of cash contributed to the ESOP. The shares held by the ESOP are treated as outstanding when computing earnings per share and the dividends on the shares held by the ESOP are recorded as a component of retained earnings. For 2006 and future years, there were and will be no contributions to this ESOP, other than dividend reinvestment, as contributions for purchase of our stock is now restricted within this defined contribution plan.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Note 8. Inventories

Inventories at December 31, 2007, and 2006, are as follows:

	2007	2006
	(Millions)	
Natural gas liquids	$ 66	$ 78
Natural gas in underground storage	45	78
Materials, supplies and other	98	82
	$209	$238

Inventories determined using the LIFO cost method were less than 1 percent and 11 percent of *inventories* at December 31, 2007 and 2006, respectively. The remaining *inventories* were primarily determined using the average-cost method.

If *inventories* valued using the LIFO cost method at December 31, 2007 and 2006, were valued at current replacement cost, the amounts would increase by less than $1 million and $22 million, respectively.

Note 9. Property, Plant and Equipment

Property, plant and equipment — net at December 31, 2007, and 2006, is as follows:

	2007	2006
	(Millions)	
Cost:		
Exploration & Production	$ 7,660	$ 5,918
Gas Pipeline	9,525	9,127
Midstream Gas & Liquids(1)	5,285	4,590
Gas Marketing Services	63	69
Other	254	245
	22,787	19,949
Accumulated depreciation, depletion and amortization	(6,806)	(5,791)
	$15,981	$14,158

(1) Certain assets above are currently pledged as collateral to secure debt. (See Note 11.)

Depreciation, depletion and amortization expense for *property, plant and equipment — net* was $1.1 billion in 2007, $863 million in 2006, and $736 million in 2005.

Property, plant and equipment — net includes approximately $980 million at December 31, 2007, and $685 million at December 31, 2006, of construction in progress which is not yet subject to depreciation. In addition, property of Exploration & Production includes approximately $378 million at December 31, 2007, and $414 million at December 31, 2006, of capitalized costs related to properties with unproven reserves not yet subject to depletion.

Property, plant and equipment — net includes approximately $1.1 billion at December 31, 2007 and 2006 related to amounts in excess of the original cost of the regulated facilities within Gas Pipeline as a result of our prior acquisitions. This amount is being amortized over 40 years using the straight-line amortization method. Current FERC policy does not permit recovery through rates for amounts in excess of original cost of construction.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Asset Retirement Obligations

The asset retirement obligation at December 31, 2007 and 2006 is $399 million and $333 million, respectively. The increases in the obligation in 2007 are due to revisions in our estimation of our asset retirement obligation in our Midstream segment, increased asset additions in our Exploration and Production segment and increased accretion in our Gas Pipeline segment. The increases in the obligation in 2006 were due primarily to obtaining additional information that revised our estimation of our asset retirement obligation for certain assets in our Exploration & Production, Gas Pipeline, and Midstream segments. Factors affected by the additional information included estimated settlement dates, estimated settlement costs, and inflation rates.

The accrued obligations relate to producing wells, underground storage caverns, offshore platforms, fractionation facilities, gas gathering well connections and pipelines, and gas transmission facilities. At the end of the useful life of each respective asset, we are legally obligated to plug both producing wells and storage caverns and remove any related surface equipment, remove surface equipment and restore land at fractionation facilities, to dismantle offshore platforms, to cap certain gathering pipelines at the wellhead connection and remove any related surface equipment, and to remove certain components of gas transmission facilities from the ground.

Note 10. Accounts Payable and Accrued Liabilities

Under our cash-management system, certain cash accounts reflected negative balances to the extent checks written have not been presented for payment. These negative balances represent obligations and have been reclassified to *accounts payable. Accounts payable* includes approximately $96 million of these negative balances at December 31, 2007, and $44 million at December 31, 2006.

Accrued liabilities at December 31, 2007, and 2006, are as follows:

	2007	2006
	(Millions)	
Interest	$ 208	$ 243
Employee costs	174	155
Taxes other than income taxes	169	152
Estimated rate refund liability	96	2
Accrual for Gulf Liquids litigation contingency	94**	95*
Income taxes	75	81
Guarantees and payment obligations related to WilTel	39	41
Customer margin deposits payable	10	129
Structured indemnity settlement	—	34
Other, including other loss contingencies	293	421
	$1,158	$1,353

* Includes $22 million of interest.

** Includes $25 million of interest.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Note 11. Debt, Leases and Banking Arrangements

Long-Term Debt

Long-term debt at December 31, 2007 and 2006, is:

	Weighted-Average Interest Rate(1)	December 31, 2007(2)	December 31, 2006
		(Millions)	
Secured(3)			
6.62%-9.45%, payable through 2016	8.0%	$ 148	$ 172
Adjustable rate, payable through 2016	6.3%	64	74
Capital lease obligations	6.7%	10	2
Unsecured			
5.5%-10.25%, payable through 2033(4)	7.6%	7,103	7,691
Revolving credit loans	5.7%	250	—
Adjustable rate, payable through 2012	6.2%	325	75
Total long-term debt, including current portion		7,900	8,014
Long-term debt due within one year		(143)	(392)
Long-term debt		$ 7,757	$7,622

(1) At December 31, 2007.

(2) Certain of our debt agreements contain covenants that restrict or limit, among other things, our ability to create liens, sell assets, make certain distributions, repurchase equity and incur additional debt.

(3) Includes $212 million and $246 million at December 31, 2007 and 2006, respectively, collateralized by certain fixed assets of two of our Venezuelan subsidiaries with a net book value of $351 million and $380 million at December 31, 2007 and 2006, respectively.

(4) 2007 includes Transco's $100 million 6.25 percent notes, due on January 15, 2008, that were reclassified as long-term debt as a result of a subsequent refinancing under the $1.5 billion revolving credit facility.

Revolving credit and letter of credit facilities (credit facilities)

We have an unsecured, $1.5 billion revolving credit facility with a maturity date of May 1, 2012. Northwest Pipeline and Transco each have access to $400 million under the facility to the extent not otherwise utilized by us. Interest is calculated based on a choice of two methods: a fluctuating rate equal to the lender's base rate plus an applicable margin or a periodic fixed rate equal to LIBOR plus an applicable margin. We are required to pay a commitment fee (currently 0.125 percent) based on the unused portion of the facility. The margins and commitment fee are generally based on the specific borrower's senior unsecured long-term debt ratings. Significant financial covenants under the credit agreement include the following:

- Our ratio of debt to capitalization must be no greater than 65 percent. At December 31, 2007, we are in compliance with this covenant as our ratio of debt to capitalization, as calculated under this covenant, is approximately 51 percent.
- Ratio of debt to capitalization must be no greater than 55 percent for Northwest Pipeline and Transco. At December 31, 2007, we are in compliance with this covenant as our ratio of debt to capitalization, as calculated under this covenant, is approximately 36 percent for Northwest Pipeline and 31 percent for Transco.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Our $500 million and $700 million facilities provide for both borrowings and issuing letters of credit but are expected to be used primarily for issuing letters of credit. These facilities mature in 2009 and 2010, respectively. We are required to pay the funding bank fixed fees at a weighted-average interest rate of 3.64 percent and 2.29 percent for the $500 million and $700 million facilities, respectively, on the total committed amount of the facilities. In addition, we pay interest on any borrowings at a fluctuating rate comprised of either a base rate or LIBOR.

The funding bank syndicated its associated credit risk through a private offering that allows for the resale of certain restricted securities to qualified institutional buyers. To facilitate the syndication of these facilities, the bank established trusts funded by the institutional investors. The assets of the trusts serve as collateral to reimburse the bank for our borrowings in the event that the facilities are delivered to the investors as described below. Thus, we have no asset securitization or collateral requirements under the facilities. Upon the occurrence of certain credit events, letters of credit under the agreement become cash collateralized creating a borrowing under the facilities. Concurrently, the funding bank can deliver the facilities to the institutional investors, whereby the investors replace the funding bank as lender under the facilities. Upon such occurrence, we will pay:

	$500 Million Facility		$700 Million Facility	
	$400 million	$100 million	$500 million	$200 million
Interest Rate	3.57 percent	LIBOR	4.35 percent	LIBOR
Facility Fixed Fee	3.19 percent		2.29 percent	

In December 2007, Williams Partners L.P. acquired certain of our membership interests in Wamsutter LLC, the limited liability company that owns the Wamsutter system, from us for $750 million. Williams Partners L.P completed the transaction after successfully closing a public equity offering of 9.25 million common units that yielded net proceeds of approximately $335 million. The partnership financed the remainder of the purchase price primarily through utilizing $250 million of term loan borrowings and issuing approximately $157 million of common units to us. The $250 million term loan is under Williams Partners L.P.'s new $450 million five-year senior unsecured credit facility that became effective simultaneous with the closing of the Wamsutter transaction. This $450 million credit facility is comprised initially of a $200 million revolving credit facility available for borrowings and letters of credit and a $250 million term loan. Under certain conditions, the revolving credit facility may be increased up to an additional $100 million. Interest on borrowings under this agreement will be payable at rates per annum equal to either (1) a fluctuating base rate equal to the lender's prime rate plus the applicable margin, or (2) a periodic fixed rate equal to LIBOR plus the applicable margin. At December 31, 2007, there were no amounts outstanding under the $200 million revolving credit facility.

In December 2007, Northwest Pipeline borrowed $250 million under the $1.5 billion revolving credit facility to retire its $250 million 6.625 percent notes that matured on December 1, 2007.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Letters of credit issued under our credit facilities are:

	Letters of Credit at December 31, 2007 (Millions)
$500 million unsecured credit facilities	$ 243
$700 million unsecured credit facilities	$ 99
$1.5 billion unsecured credit facility	$ 28

Exploration & Production's credit agreement

In February 2007, Exploration & Production entered into a five-year unsecured credit agreement with certain banks in order to reduce margin requirements related to our hedging activities as well as lower transaction fees. Under the credit agreement, Exploration & Production is not required to post collateral as long as the value of its domestic natural gas reserves, as determined under the provisions of the agreement, exceeds by a specified amount certain of its obligations including any outstanding debt and the aggregate out-of-the-money positions on hedges entered into under the credit agreement. Exploration & Production is subject to additional covenants under the credit agreement including restrictions on hedge limits, the creation of liens, the incurrence of debt, the sale of assets and properties, and making certain payments, such as dividends, under certain circumstances.

Issuances and retirements

On May 28, 2003, we issued $300 million of 5.5 percent junior subordinated convertible debentures due 2033. These notes, which are callable after seven years, are convertible at the option of the holder into our common stock at a conversion price of approximately $10.89 per share. In November 2005, we initiated an offer to convert these debentures to shares of our common stock. In January 2006, we converted approximately $220 million of the debentures. (See Note 12.)

In June 2006, Williams Partners L.P. acquired 25.1 percent of our interest in Williams Four Corners LLC for $360 million. The acquisition was completed after Williams Partners L.P. successfully closed a $150 million private debt offering of 7.5 percent senior unsecured notes due 2011 and a public equity offering of approximately $225 million in net proceeds.

In December 2006, Williams Partners L.P. acquired the remaining 74.9 percent interest in Williams Four Corners LLC for $1.223 billion. The acquisition was completed after Williams Partners L.P. successfully closed a $600 million private debt offering of 7.25 percent senior unsecured notes due 2017, a private equity offering of approximately $350 million of common and Class B units, and a public equity offering of approximately $294 million in net proceeds.

In connection with the issuance of the $150 million 7.5 percent notes and the $600 million 7.25 percent notes discussed above, Williams Partners L.P. entered into registration rights agreements with the initial purchasers of the senior unsecured notes. In these agreements they agreed to conduct a registered exchange offer for the senior unsecured notes or cause to become effective a shelf registration statement providing for resale of the senior unsecured notes. Williams Partners L.P. initiated exchange offers for both series on April 10, 2007. The exchange offers were completed and closed on May 11, 2007.

In connection with the issuance of approximately $350 million of common and Class B units in a private equity offering discussed above, Williams Partners L.P. entered into a registration rights agreement with the initial purchasers whereby Williams Partners L.P. agreed to file a shelf registration statement providing for the resale of the common units purchased. Additionally, the registration rights agreement provides for the registration of common units that would be issued upon conversion of the Class B units. Williams Partners L.P. filed the shelf registration statement on January 12, 2007, and it became effective on March 13, 2007. On May 21, 2007, Williams Partners L.P.'s outstanding Class B units were converted into common units on a one-for-one basis. If the shelf registration

Table of Contents

statement is unavailable for a period that exceeds an aggregate of 30 days in any 90-day period or 105 days in any 365-day period, the purchasers are entitled to receive liquidated damages. Liquidated damages are calculated as 0.25 percent of the Liquidated Damages Multiplier per 30-day period for the first 60 days following the 90th day, increasing by an additional 0.25 percent of the Liquidated Damages Multiplier per 30-day period for each subsequent 60 days, up to a maximum of 1.00 percent of the Liquidated Damages Multiplier per 30-day period, provided the aggregate amount of liquidated damages payable to any purchaser is capped at 10 percent of the Liquidated Damages Multiplier. The Liquidated Damages Multiplier is (i) the product of $36.59 times the number of common units purchased plus (ii) the product of $35.81 times the number of Class B units purchased. Due to amendments made to Rule 144 of the Securities Act in February 2008, related to securities acquired by non-affiliates from an issuer subject to public reporting requirements, Williams Partners L.P. no longer has an obligation to keep their shelf registration statement effective and would have no liability for a failure to do so.

The debt and equity issued to third parties by Williams Partners L.P. is reported as a component of our consolidated debt balance and minority interest balance, respectively.

On April 4, 2007, Northwest Pipeline retired $175 million of 8.125 percent senior unsecured notes due 2010. Northwest Pipeline paid premiums of approximately $7 million in conjunction with the early debt retirement. These premiums are considered recoverable through rates and are therefore deferred as a component of *other assets and deferred charges* on our consolidated balance sheet, amortizing over the life of the original debt.

On April 5, 2007, Northwest Pipeline issued $185 million aggregate principal amount of 5.95 percent senior unsecured notes due 2017 to certain institutional investors in a private debt placement. In August 2007, Northwest Pipeline completed an exchange of these notes for substantially identical new notes that are registered under the Securities Act of 1933, as amended.

Under the terms of the Northwest Pipeline $185 million 5.95 percent senior unsecured notes mentioned above, Northwest Pipeline was obligated to file a registration statement for an offer to exchange the notes for a new issue of substantially identical notes registered under the Securities Act of 1933, as amended, within 180 days from closing and use its commercially reasonable efforts to cause the registration statement to be declared effective within 270 days after closing. Northwest Pipeline initiated an exchange offer on July 26, 2007, which expired on August 23, 2007. Northwest Pipeline received full participation in the exchange offer.

During December 2007, we repurchased $22 million of our 8.125 percent senior unsecured notes due March 2012 and $213 million of our 7.125 percent senior unsecured notes due September 2011. In conjunction with these early retirements, we paid premiums of approximately $19 million. These premiums, as well as related fees and expenses are recorded as *early debt retirement costs* in the Consolidated Statement of Income.

Aggregate minimum maturities of *long-term debt* (excluding capital leases and unamortized discount and premium) for each of the next five years are as follows:

	(Millions)
2008	$ 138
2009	53
2010	39
2011	955
2012	1,576

Cash payments for interest (net of amounts capitalized) were as follows: 2007 — $634 million; 2006 — $611 million; and 2005 — $625 million.

Table of Contents

Leases-Lessee

Future minimum annual rentals under noncancelable operating leases as of December 31, 2007, are payable as follows:

	(Millions)
2008	$ 83
2009	63
2010	30
2011	15
2012	13
Thereafter	19
Total	$ 223

Total rent expense was $68 million in 2007, $68 million in 2006, and $65 million in 2005. Rent expense reported as discontinued operations, primarily related to a tolling agreement, was $148 million in 2007, $175 million in 2006, and $161 million in 2005. Rent expense in discontinued operations was offset by approximately $276 million in 2007, $264 million in 2006, and $172 million in 2005 resulting from sales and other transactions made possible by the tolling agreement. This tolling agreement was included in the sale of our power business to Bear Energy, LP. (See Note 2.)

Note 12. Stockholders' Equity

In July 2007, our Board of Directors authorized the repurchase of up to $1 billion of our common stock. We intend to purchase shares of our stock from time to time in open-market transactions or through privately negotiated or structured transactions at our discretion, subject to market conditions and other factors. This stock-repurchase program does not have an expiration date. During 2007, we purchased approximately 16 million shares for $526 million (including transaction costs) under the program at an average cost of $33.08 per share. This stock repurchase is recorded in *treasury stock* on the Consolidated Balance Sheet.

In November 2005, we initiated an offer to convert our 5.5 percent junior subordinated convertible debentures into our common stock. In January 2006, we converted approximately $220 million of the debentures in exchange for 20 million shares of common stock, a $26 million cash premium, and $2 million of accrued interest.

We maintain a Stockholder Rights Plan, as amended and restated on September 21, 2004, and further amended May 18, 2007, and October 12, 2007, under which each outstanding share of our common stock has a right (as defined in the plan) attached. Under certain conditions, each right may be exercised to purchase, at an exercise price of $50 (subject to adjustment), one two-hundredth of a share of Series A Junior Participating Preferred Stock. The rights may be exercised only if an Acquiring Person acquires (or obtains the right to acquire) 15 percent or more of our common stock or commences an offer for 15 percent or more of our common stock. The plan contains a mechanism to divest of shares of common stock if such stock in excess of 14.9 percent was acquired inadvertently or without knowledge of the terms of the rights. The rights, which until exercised do not have voting rights, expire in 2014 and may be redeemed at a price of $.01 per right prior to their expiration, or within a specified period of time after the occurrence of certain events. In the event a person becomes the owner of more than 15 percent of our common stock, each holder of a right (except an Acquiring Person) shall have the right to receive, upon exercise, our common stock having a value equal to two times the exercise price of the right. In the event we are engaged in a merger, business combination, or 50 percent or more of our assets, cash flow or earnings power is sold or transferred, each holder of a right (except an Acquiring Person) shall have the right to receive, upon exercise, common stock of the acquiring company having a value equal to two times the exercise price of the right.

Note 13. Stock-Based Compensation

Plan Information

Effective May 17, 2007, our stockholders approved a new plan that provides common-stock-based awards to both employees and nonmanagement directors. The new plan generally contains terms and provisions consistent with the previous plans. The new plan reserves 19 million shares for issuance. Awards outstanding in all prior plans remain in those plans with their respective terms and provisions. No new grants will be made from the prior plans. The new plan permits the granting of various types of awards including, but not limited to, restricted stock units and stock options. Restricted stock units are generally valued at market value on the grant date of the award and generally vest over three years. The purchase price per share for stock options generally may not be less than the market price of the underlying stock on the date of grant. Stock options generally become exercisable over a three-year period from the date of the grant and can be subject to accelerated vesting if certain future stock prices or if specific financial performance targets are achieved. Stock options generally expire 10 years after grant. At December 31, 2007, 37 million shares of our common stock were reserved for issuance pursuant to existing and future stock awards, of which 19 million shares were available for future grants.

Additionally, on May 17, 2007, our stockholders approved an Employee Stock Purchase Plan (ESPP) which authorizes up to 2 million shares of our common stock to be available for sale under the plan. The ESPP enables eligible participants to purchase our common stock through payroll deductions not exceeding an annual amount of $15,000 per participant. The ESPP provides for offering periods during which shares may be purchased and continues until the earliest of: (1) the Board of Directors terminates the ESPP, (2) the sale of all shares available under the ESPP, or (3) the tenth anniversary of the date the Plan was approved by the stockholders. The first offering under the ESPP commenced on October 1, 2007 and ended on December 31, 2007. Subsequent offering periods will be from January through June and from July through December. Generally, all employees are eligible to participate in the ESPP, with the exception of executives and international employees. The number of shares eligible for an employee to purchase during each offering period is limited to 750 shares. The purchase price of the stock is 85 percent of the lower closing price of either the first or the last day of the offering period. The ESPP requires a one-year holding period before the stock can be sold. Approximately 2 million shares were available for purchase under the ESPP at December 31, 2007.

Stock Options

Stock options are valued at the date of award, which does not precede the approval date, and compensation cost is recognized on a straight-line basis, net of estimated forfeitures, over the requisite service period. Stock options generally become exercisable over a three-year period from the date of grant and generally expire ten years after the grant.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The following summary reflects stock option activity and related information for the year ending December 31, 2007.

Stock Options	Options	Weighted-Average Exercise Price	Aggregate Intrinsic Value
	(Millions)		(Millions)
Outstanding at December 31, 2006	17.7	$ 16.96	
Granted	1.2	$ 28.32	
Exercised	(4.1)	$ 13.78	$ 74
Cancelled	(1.6)	$ 36.04	
Outstanding at December 31, 2007	13.2	$ 16.62	$ 256
Exercisable at December 31, 2007	10.4	$ 14.79	$ 222

The total intrinsic value of options exercised during the years ended December 31, 2007, 2006, and 2005 was $74 million, $36 million, and $42 million, respectively.

The following summary provides additional information about stock options that are outstanding and exercisable at December 31, 2007.

	Stock Options Outstanding			Stock Options Exercisable		
Range of Exercise Prices	Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life	Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life
	(Millions)		(Years)	(Millions)		(Years)
$2.27 to $12.92	6.0	$ 6.98	4.9	6.0	$ 6.98	4.9
$12.93 to $23.72	4.4	$ 19.41	6.9	2.8	$ 18.87	6.5
$23.73 to $34.52	1.4	$ 28.25	7.7	.3	$ 28.00	2.2
$34.53 to $45.32	1.4	$ 37.68	1.9	1.3	$ 37.68	1.9
Total	13.2	$ 16.62	5.6	10.4	$ 14.79	4.9

The estimated fair value at date of grant of options for our common stock granted in 2007, 2006, and 2005, using the Black-Scholes option pricing model, is as follows:

	2007	2006	2005
Weighted-average grant date fair value of options for our common stock granted during the year	$9.09	$8.36	$6.70
Weighted-average assumptions:			
Dividend yield	1.5%	1.4%	1.6%
Volatility	28.7%	36.3%	33.3%
Risk-free interest rate	4.6%	4.7%	4.1%
Expected life (years)	6.3	6.5	6.5

The expected dividend yield is based on the average annual dividend yield as of the grant date. Expected volatility is based on the historical volatility of our stock and the implied volatility of our stock based on traded options. In calculating historical volatility, returns during calendar year 2002 were excluded as the extreme volatility during that time is not reasonably expected to be repeated in the future. The risk-free interest rate is based on the U.S. Treasury Constant Maturity rates as of the grant date. The expected life of the option is based on historical exercise behavior and expected future experience.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Cash received from stock option exercises was $56 million, $34 million and $39 million during 2007, 2006 and 2005, respectively. The tax benefit realized from stock options exercised during 2007 was $27 million and $14 million for both 2006 and 2005.

Nonvested Restricted Stock Units

Restricted stock units are generally valued at market value on the grant date and generally vest over three years. Restricted stock unit expense, net of estimated forfeitures, is generally recognized over the vesting period on a straight-line basis.

The following summary reflects nonvested restricted stock unit activity and related information for the year ended December 31, 2007.

Restricted Stock Units	Shares (Millions)	Weighted-Average Fair Value*
Nonvested at December 31, 2006	3.7	$ 20.57
Granted	1.8	$ 30.79
Forfeited	(0.1)	$ 23.53
Vested	(1.0)	$ 15.39
Nonvested at December 31, 2007	4.4	$ 27.78

* Performance-based shares are valued at the end-of-period market price until certification that the performance objectives have been completed. Upon certification, these shares are valued at that day's end-of-period market price. All other shares are valued at the grant-date market price.

Other restricted stock unit information

	2007	2006	2005
Weighted-average grant date fair value of restricted stock units granted during the year, per share	$30.79	$23.39	$19.35
Total fair value of restricted stock units vested during the year ($'s in millions)	$ 33	$ 15	$ 14

Performance-based shares granted under the Plan represent 38 percent of nonvested restricted stock units outstanding at December 31, 2007. These grants are generally earned at the end of a three-year period based on actual performance against a performance target. Expense associated with these performance-based grants is recognized in periods after performance targets are established. Based on the extent to which certain financial targets are achieved, vested shares may range from zero percent to 200 percent of the original grant amount.

Note 14. Financial Instruments, Derivatives, Guarantees and Concentration of Credit Risk

Financial Instruments

Fair-value methods

We use the following methods and assumptions in estimating our fair-value disclosures for financial instruments:

Cash and cash equivalents and restricted cash: The carrying amounts reported in the balance sheet approximate fair value due to the short-term maturity of these instruments.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Other securities, notes and other noncurrent receivables, structured indemnity settlement obligation, margin deposits, and customer margin deposits payable: The carrying amounts reported in the balance sheet approximate fair value as these instruments have interest rates approximating market. *Other securities* in the table below consists of auction rate securities and held-to-maturity securities and are reported, along with margin deposits, in *other current assets and deferred charges* in the Consolidated Balance Sheet.

Long-term debt: The fair value of our publicly traded long-term debt is valued using indicative year-end traded bond market prices. Private debt is valued based on the prices of similar securities with similar terms and credit ratings. At December 31, 2007 and 2006, approximately 90 percent and 87 percent, respectively, of our long-term debt was publicly traded.

Guarantees: The *guarantees* represented in the table below consist primarily of guarantees we have provided in the event of nonpayment by our previously owned communications subsidiary, Williams Communications Group (WilTel), on certain lease performance obligations. To estimate the fair value of the guarantees, the estimated default rate is determined by obtaining the average cumulative issuer-weighted corporate default rate for each guarantee based on the credit rating of WilTel's current owner and the term of the underlying obligation. The default rates are published by Moody's Investors Service.

Energy derivatives: Energy derivatives include:

- Futures contracts;
- Forward contracts;
- Swap agreements;
- Option contracts.

The fair value of energy derivatives is determined based on the nature of the underlying transaction and the market in which the transaction is executed. We execute most of these transactions on an organized commodity exchange or in over-the-counter markets in which quoted prices exist for active periods. For contracts with terms that exceed the time period for which actively quoted prices are available, we determine fair value by estimating commodity prices during the illiquid periods utilizing internally developed valuations incorporating information obtained from commodity prices in actively quoted markets, quoted prices in less active markets, prices reflected in current transactions, and other market fundamental analysis.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Carrying amounts and fair values of our financial instruments

Asset (Liability)	2007 Carrying Amount	2007 Fair Value	2006 Carrying Amount	2006 Fair Value
	(Millions)			
Cash and cash equivalents	$ 1,699	$ 1,699	$ 2,269	$ 2,269
Restricted cash (current and noncurrent)	127	127	126	126
Other securities	20	20	103	103
Notes and other noncurrent receivables	4	4	4	4
Cost based investments (see Note 3)	25	(a)	52	(a)
Long-term debt, including current portion (see Note 11)(b)	(7,890)	(8,729)	(8,012)	(8,480)
Structured indemnity settlement obligation	—	—	(34)	(34)
Margin deposits	76	76	59	59
Customer margin deposits payable	(10)	(10)	(129)	(129)
Guarantees	(40)	(34)	(42)	(35)
Net energy derivatives:				
Energy commodity cash flow hedges(d)	(268)	(268)	365	365
Other energy derivatives(d)	(100)	(100)	70	70
Other derivatives(c)	—	—	2	2

(a) These investments are primarily in nonpublicly traded companies for which it is not practicable to estimate fair value.

(b) Excludes capital leases.

(c) Consists of nonenergy cash flow hedges.

(d) A portion of these derivatives is included in assets and liabilities of discontinued operations. (See Note 2.)

Energy Derivatives

Our energy derivative contracts include the following:

Futures contracts: Futures contracts are standardized commitments through an organized commodity exchange to either purchase or sell a commodity at a future date for a specified price. Futures are generally settled in cash, but may be settled through delivery of the underlying commodity. The fair value of these contacts is generally determined using quoted prices.

Forward contracts: Forward contracts are over-the-counter commitments to either purchase or sell a commodity at a future date for a specified price, which involve physical delivery of energy commodities, and may contain either fixed or variable pricing terms. Forward contracts are valued based on prices of the underlying energy commodities over the contract life and contractual or notional volumes with the resulting expected future cash flows discounted to a present value using a risk-free market interest rate.

Swap agreements: Swap agreements require us to make payments to (or receive payments from) counterparties based upon the differential between a fixed and variable price or between variable prices of energy commodities at different locations. Swap agreements are valued based on prices of the underlying energy commodities over the contract life and contractual or notional volumes with the resulting expected future cash flows discounted to a present value using a risk-free market interest rate.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Option contracts: Physical and financial option contracts give the buyer the right to exercise the option and receive the difference between a predetermined strike price and a market price at the date of exercise. An option to purchase and an option to sell can be combined in an instrument called a collar to set a minimum and maximum transaction price. These contracts are valued based on option pricing models considering prices of the underlying energy commodities over the contract life, volatility of the commodity prices, contractual volumes, estimated volumes under option and other arrangements, and a risk-free market interest rate.

Energy commodity cash flow hedges

We are exposed to market risk from changes in energy commodity prices within our operations. We utilize derivatives to manage our exposure to the variability in expected future cash flows from forecasted purchases and sales of natural gas and forecasted sales of natural gas liquids (NGLs) attributable to commodity price risk. Certain of these derivatives have been designated as cash flow hedges under SFAS No. 133.

Our Exploration & Production segment produces, buys and sells natural gas at different locations throughout the United States. To reduce exposure to a decrease in revenues from fluctuations in natural gas market prices, we enter into natural gas futures contracts, swap agreements, and financial option contracts to mitigate the price risk on forecasted sales of natural gas. We have also entered into basis swap agreements to reduce the locational price risk associated with our producing basins. Exploration & Production's cash flow hedges are expected to be highly effective in offsetting cash flows attributable to the hedged risk during the term of the hedge. However, ineffectiveness may be recognized primarily as a result of locational differences between the hedging derivative and the hedged item.

Our Midstream segment produces and sells NGLs at different locations throughout the United States. To reduce exposure to a decrease in revenues from fluctuations in NGL market prices, we hedge price risk by entering into NGL swap agreements, financial forward contracts, and financial option contracts to mitigate the price risk on forecasted sales of NGLs. Midstream's cash flow hedges are expected to be highly effective in offsetting cash flows attributable to the hedged risk during the term of the hedge. However, ineffectiveness may be recognized primarily as a result of locational differences between the hedging derivative and the hedged item.

Changes in the fair value of our cash flow hedges are deferred in other comprehensive income and are reclassified into *revenues* in the same period or periods in which the hedged forecasted purchases or sales affect earnings, or when it is probable that the hedged forecasted transaction will not occur by the end of the originally specified time period. During 2006, we reclassified approximately $1 million of net gains from other comprehensive income to earnings as a result of the discontinuance of cash flow hedges because the forecasted transaction did not occur by the end of the originally specified time period. In second-quarter 2007, we recognized a net gain of $429 million (reported in *revenues* of discontinued operations) associated with the reclassification of deferred net hedge gains of our former power business from *accumulated other comprehensive income/loss* to earnings. This reclassification was based on the determination that the forecasted transactions related to the derivative cash flow hedges being sold to Bear Energy, LP were probable of not occurring. See Note 2 for further discussion. Approximately $14 million of net losses and $17 million of net gains from hedge ineffectiveness are included in *revenues* during 2007 and 2006, respectively. For 2007 and 2006, there are no derivative gains or losses excluded from the assessment of hedge effectiveness. As of December 31, 2007, we have hedged portions of future cash flows associated with anticipated energy commodity purchases and sales for up to three years. Based on recorded values at December 31, 2007, approximately $35 million of net losses (net of income tax benefit of $22 million) will be reclassified into earnings within the next year. These recorded values are based on market prices of the commodities as of December 31, 2007. Due to the volatile nature of commodity prices and changes in the creditworthiness of counterparties, actual gains or losses realized in 2008 will likely differ from these values. These gains or losses will offset net losses or gains that will be realized in earnings from previous unfavorable or favorable market movements associated with underlying hedged transactions.

Table of Contents

Other energy derivatives

Our Gas Marketing Services and Exploration & Production segments have other energy derivatives that have not been designated or do not qualify as SFAS No. 133 hedges. As such, the net change in their fair value is recognized in *revenues* in the Consolidated Statement of Income. Even though they do not qualify for hedge accounting (see *derivative instruments and hedging activities* in Note 1 for a description of hedge accounting), certain of these derivatives hedge our future cash flows on an economic basis.

Other energy-related contracts

We also hold significant nonderivative energy-related contracts, such as storage and transportation agreements, in our Gas Marketing Services portfolio. These have not been included in the financial instruments table above or in our Consolidated Balance Sheet because they are not derivatives as defined by SFAS No. 133.

Guarantees

In addition to the guarantees and payment obligations discussed elsewhere in these footnotes (see Notes 3 and 15), we have issued guarantees and other similar arrangements with off-balance sheet risk as discussed below.

In connection with agreements executed prior to our acquisition of Transco to resolve take-or-pay and other contract claims and to amend gas purchase contracts, Transco entered into certain settlements with producers which may require the indemnification of certain claims for additional royalties that the producers may be required to pay as a result of such settlements. Transco, through its agent, Gas Marketing Services, continues to purchase gas under contracts which extend, in some cases, through the life of the associated gas reserves. Certain of these contracts contain royalty indemnification provisions that have no carrying value. Producers have received certain demands and may receive other demands, which could result in claims pursuant to royalty indemnification provisions. Indemnification for royalties will depend on, among other things, the specific lease provisions between the producer and the lessor and the terms of the agreement between the producer and Transco. Consequently, the potential maximum future payments under such indemnification provisions cannot be determined. However, management believes that the probability of material payments is remote.

In connection with the 1993 public offering of units in the Williams Coal Seam Gas Royalty Trust (Royalty Trust), our Exploration & Production segment entered into a gas purchase contract for the purchase of natural gas in which the Royalty Trust holds a net profits interest. Under this agreement, we guarantee a minimum purchase price that the Royalty Trust will realize in the calculation of its net profits interest. We have an annual option to discontinue this minimum purchase price guarantee and pay solely based on an index price. The maximum potential future exposure associated with this guarantee is not determinable because it is dependent upon natural gas prices and production volumes. No amounts have been accrued for this contingent obligation as the index price continues to substantially exceed the minimum purchase price.

We are required by certain foreign lenders to ensure that the interest rates received by them under various loan agreements are not reduced by taxes by providing for the reimbursement of any domestic taxes required to be paid by the foreign lender. The maximum potential amount of future payments under these indemnifications is based on the related borrowings. These indemnifications generally continue indefinitely unless limited by the underlying tax regulations and have no carrying value. We have never been called upon to perform under these indemnifications.

We have provided guarantees in the event of nonpayment by our previously owned communications subsidiary, WilTel, on certain lease performance obligations that extend through 2042. The maximum potential exposure is approximately $44 million at December 31, 2007, and $46 million at December 31, 2006. Our exposure declines systematically throughout the remaining term of WilTel's obligations. The carrying value of these guarantees is approximately $39 million at December 31, 2007.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Former managing directors of Gulf Liquids are involved in litigation related to the construction of gas processing plants. Gulf Liquids has indemnity obligations to the former managing directors for legal fees and potential losses that may result from this litigation. Claims against these former managing directors have been settled and dismissed after payments on their behalf by directors and officers insurers. Some unresolved issues remain between us and these insurers, but no amounts have been accrued for any potential liability.

We have guaranteed the performance of a former subsidiary of our wholly owned subsidiary MAPCO Inc., under a coal supply contract. This guarantee was granted by MAPCO Inc. upon the sale of its former subsidiary to a third-party in 1996. The guaranteed contract provides for an annual supply of a minimum of 2.25 million tons of coal. Our potential exposure is dependent on the difference between current market prices of coal and the pricing terms of the contract, both of which are variable, and the remaining term of the contract. Given the variability of the terms, the maximum future potential payments cannot be determined. We believe that our likelihood of performance under this guarantee is remote. In the event we are required to perform, we are fully indemnified by the purchaser of MAPCO Inc.'s former subsidiary. This guarantee expires in December 2010 and has no carrying value.

Concentration of Credit Risk

Cash equivalents

Our cash equivalents consist of high-quality securities placed with various major financial institutions with credit ratings at or above BBB by Standard & Poor's or Baa1 by Moody's Investors Service.

Accounts and notes receivable

The following table summarizes concentration of receivables including those related to discontinued operations (see Note 2), net of allowances, by product or service at December 31, 2007 and 2006:

	2007	2006
	(Millions)	
Receivables by product or service:		
Sale or transportation of natural gas and related products	$1,139	$ 895
Sales of power and related services	55	270
Interest	5	39
Other	48	9
Total	$1,247	$1,213

Natural gas customers include pipelines, distribution companies, producers, gas marketers and industrial users primarily located in the eastern and northwestern United States, Rocky Mountains, Gulf Coast, Venezuela and Canada. Prior to the sale of substantially all of our power business, which was completed in November 2007, customers for power included the California Independent System Operator (ISO), the California Department of Water Resources, and other power marketers and utilities located throughout the United States. As a general policy, collateral is not required for receivables, but customers' financial condition and credit worthiness are evaluated regularly.

Derivative assets and liabilities

We have a risk of loss as a result of counterparties not performing pursuant to the terms of their contractual obligations. Counterparty performance can be influenced by changes in the economy and regulatory issues, among other factors. Risk of loss results from items including credit considerations and the regulatory environment for which a counterparty transacts. We attempt to minimize credit-risk exposure to derivative counterparties and brokers through formal credit policies, consideration of credit ratings from public ratings agencies, monitoring

Table of Contents

procedures, master netting agreements and collateral support under certain circumstances. Additional collateral support could include the following:

- Letters of credit;
- Payment under margin agreements;
- Guarantees of payment by credit worthy parties.

We also enter into master netting agreements to mitigate counterparty performance and credit risk.

The gross credit exposure from our derivative contracts, a portion of which is included in assets of discontinued operations (see Note 2), as of December 31, 2007, is summarized below.

Counterparty Type	Investment Grade(a)	Total
	(Millions)	
Gas and electric utilities	$ 78	$ 79
Energy marketers and traders	224	1,328
Financial institutions	1,302	1,302
Other	—	1
	$ 1,604	2,710
Credit reserves		(1)
Gross credit exposure from derivatives		$2,709

We assess our credit exposure on a net basis to reflect master netting agreements in place with certain counterparties. We offset our credit exposure to each counterparty with amounts we owe the counterparty under derivative contracts. The net credit exposure from our derivatives as of December 31, 2007, is summarized below.

Counterparty Type	Investment Grade(a)	Total
	(Millions)	
Gas and electric utilities	$ 17	$ 17
Energy marketers and traders	18	20
Financial institutions	45	45
Other	—	—
	$ 80	82
Credit reserves		(1)
Net credit exposure from derivatives		$ 81

(a) We determine investment grade primarily using publicly available credit ratings. We include counterparties with a minimum Standard & Poor's of BBB− or Moody's Investors Service rating of Baa3 in investment grade. We also classify counterparties that have provided sufficient collateral, such as cash, standby letters of credit, parent company guarantees, and property interests, as investment grade.

Revenues

In 2007, 2006 and 2005, there were no customers for which our sales exceeded 10 percent of our consolidated revenues.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Note 15. Contingent Liabilities and Commitments

Rate and Regulatory Matters and Related Litigation

Our interstate pipeline subsidiaries have various regulatory proceedings pending. As a result, a portion of the revenues of these subsidiaries has been collected subject to refund. We have accrued a liability for these potential refunds as of December 31, 2007, which we believe is adequate for any refunds that may be required.

We are party to pending matters involving pipeline transportation rates charged to our former Alaska refinery in prior periods. While we have no loss exposure in these matters, favorable resolution could result in refunds. In February 2008, the Alaska Supreme Court ruled in our favor in one of these cases. This ruling may be subject to further appeal.

Issues Resulting from California Energy Crisis

Our former power business was engaged in power marketing in various geographic areas, including California. Prices charged for power by us and other traders and generators in California and other western states in 2000 and 2001 were challenged in various proceedings, including those before the Federal Energy Regulatory Commission (FERC). These challenges included refund proceedings, summer 2002 90-day contracts, investigations of alleged market manipulation including withholding, gas indices and other gaming of the market, new long-term power sales to the State of California that were subsequently challenged and civil litigation relating to certain of these issues. We have entered into settlements with the State of California (State Settlement), major California utilities (Utilities Settlement), and others that substantially resolved each of these issues with these parties.

As a result of a 2006 Ninth Circuit Court of Appeals decision, which the U.S. Supreme Court has agreed to review, certain contracts that we entered into during 2000 and 2001 may be subject to partial refunds. These contracts, under which we sold electricity, totaled approximately $89 million in revenue. We expect the U.S. Supreme Court's decision in the second quarter 2008. While we are not a party to the cases involved in the appellate court decision under review, the buyer of electricity from us is a party to the cases and claims that we must refund to the buyer any loss it suffers due to the decision and the FERC's reconsideration of the contract terms at issue in the decision.

Certain other issues also remain open at the FERC and for other nonsettling parties.

Refund proceedings

Although we entered into the State Settlement and Utilities Settlement, which resolved the refund issues among the settling parties, we continue to have potential refund exposure to nonsettling parties, such as various California end users that did not participate in the Utilities Settlement. As a part of the Utilities Settlement, we funded escrow accounts that we anticipate will satisfy any ultimate refund determinations in favor of the nonsettling parties including interest on refund amounts that we might owe to settling and nonsettling parties. As part of the State Settlement, we were to pay an additional $45 million to the California Attorney General over three years. Upon the sale of our power business in November 2007 (see Note 2), we paid the entire remaining balance on a discounted basis.

We are also owed interest from counterparties in the California market during the refund period for which we have recorded a receivable totaling approximately $24 million at December 31, 2007. Collection of the interest and the payment of interest on refund amounts from the escrow accounts is subject to the conclusion of this proceeding. Therefore, we continue to participate in the FERC refund case and related proceedings.

Challenges to virtually every aspect of the refund proceedings, including the refund period, were and continue to be made to the Ninth Circuit Court of Appeals and the U.S. Supreme Court. In August 2006, the Ninth Circuit issued its order that largely upheld the FERC's prior rulings, but it expanded the types of transactions that were made subject to refund. This order is subject to further appeal. Because of our settlements, we do not expect that the

August 2006 decision will have a material impact on us. However, the final refund calculation has not been made because of the appeals and certain unclear aspects of the refund calculation process.

Reporting of Natural Gas-Related Information to Trade Publications

Civil suits based on allegations of manipulating published gas price indices have been brought against us and others, in each case seeking an unspecified amount of damages. We are currently a defendant in:

- State court litigation in California brought on behalf of certain business and governmental entities that purchased gas for their use.
- Class action litigation and other litigation originally filed in state court in Colorado, Kansas, Missouri, Tennessee and Wisconsin brought on behalf of direct and indirect purchasers of gas in those states. The Tennessee purchasers have appealed the Tennessee state court's February 2007 dismissal of their case. The Missouri case has been remanded to Missouri state court. The cases in the other jurisdictions have been removed and transferred to the federal court in Nevada. On February 19, 2008, the federal court granted summary judgment in the Colorado case in favor of us and most of the other defendants. We expect that the Colorado plaintiffs will appeal.

Mobile Bay Expansion

In December 2002, an administrative law judge at the FERC issued an initial decision in Transcontinental Gas Pipe Line Corporation's (Transco) 2001 general rate case which, among other things, rejected the recovery of the costs of Transco's Mobile Bay expansion project from its shippers on a "rolled-in" basis and found that incremental pricing for the Mobile Bay expansion project is just and reasonable. In March 2004, the FERC issued an Order on Initial Decision in which it reversed certain parts of the administrative law judge's decision and accepted Transco's proposal for rolled-in rates. Gas Marketing Services holds long-term transportation capacity on the Mobile Bay expansion project. If the FERC had adopted the decision of the administrative law judge on the pricing of the Mobile Bay expansion project and also required that the decision be implemented effective September 1, 2001, Gas Marketing Services could have been subject to surcharges of approximately $139 million, including interest, through December 31, 2007, in addition to increased costs going forward. Certain parties filed appeals in federal court seeking to overturn the FERC's ruling on the rolled-in rates. Gas Marketing Services has reached an agreement in principle to settle this matter for $10 million.

Environmental Matters

Continuing operations

Since 1989, our Transco subsidiary has had studies underway to test certain of its facilities for the presence of toxic and hazardous substances to determine to what extent, if any, remediation may be necessary. Transco has responded to data requests from the U.S. Environmental Protection Agency (EPA) and state agencies regarding such potential contamination of certain of its sites. Transco has identified polychlorinated biphenyl (PCB) contamination in compressor systems, soils and related properties at certain compressor station sites. Transco has also been involved in negotiations with the EPA and state agencies to develop screening, sampling and cleanup programs. In addition, Transco commenced negotiations with certain environmental authorities and other parties concerning investigative and remedial actions relative to potential mercury contamination at certain gas metering sites. The costs of any such remediation will depend upon the scope of the remediation. At December 31, 2007, we had accrued liabilities of $6 million related to PCB contamination, potential mercury contamination, and other toxic and hazardous substances. Transco has been identified as a potentially responsible party at various Superfund and state waste disposal sites. Based on present volumetric estimates and other factors, we have estimated our aggregate exposure for remediation of these sites to be less than $500,000, which is included in the environmental accrual discussed above.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Beginning in the mid-1980s, our Northwest Pipeline subsidiary evaluated many of its facilities for the presence of toxic and hazardous substances to determine to what extent, if any, remediation might be necessary. Consistent with other natural gas transmission companies, Northwest Pipeline identified PCB contamination in air compressor systems, soils and related properties at certain compressor station sites. Similarly, Northwest Pipeline identified hydrocarbon impacts at these facilities due to the former use of earthen pits and mercury contamination at certain gas metering sites. The PCBs were remediated pursuant to a Consent Decree with the EPA in the late 1980s and Northwest Pipeline conducted a voluntary clean-up of the hydrocarbon and mercury impacts in the early 1990s. In 2005, the Washington Department of Ecology required Northwest Pipeline to reevaluate its previous mercury clean-ups in Washington. Consequently, Northwest Pipeline is conducting additional remediation activities at certain sites to comply with Washington's current environmental standards. At December 31, 2007, we have accrued liabilities totaling approximately $7 million for these costs. We expect that these costs will be recoverable through Northwest Pipeline's rates.

We also accrue environmental remediation costs for natural gas underground storage facilities, primarily related to soil and groundwater contamination. At December 31, 2007, we have accrued liabilities totaling approximately $4 million for these costs.

In July 2006, the Colorado Department of Public Health and Environment (CDPHE) issued a Notice of Violation (NOV) to Williams Production RMT Company related to operating permits for our Roan Cliffs and Hayburn gas plants in Garfield County, Colorado. We have met with the CDPHE to discuss the allegations contained in the NOV and have provided additional requested information to the agency.

On April 11, 2007, the New Mexico Environment Department's Air Quality Bureau (NMED) issued an NOV to Williams Four Corners, LLC that alleged various emission and reporting violations in connection with our Lybrook gas processing plant's flare and leak detection and repair program. The NMED proposed a penalty of approximately $3 million. We are discussing the basis for and the scope of the proposed penalty with the NMED.

On April 16, 2007, the CDPHE issued an NOV to Williams Production RMT Company related to alleged air permit violations at the Rifle Station natural gas dehydration facility located in Garfield County, Colorado. The Rifle Station facility had been shut down prior to our receipt of the NOV and, except for some minor operations, remains closed. We responded to the CDPHE's notice on May 15, 2007.

On April 27, 2007, the Wyoming Department of Environmental Quality (WDEQ) issued an NOV to Williams Production RMT Company that alleged violations of various Wyoming Pollution Discharge Elimination System permits for our coal bed methane gas production facilities in the state. We are discussing the matter with the WDEQ and expect the penalty to be approximately $48,000.

Williams Production RMT Company performed voluntary audits of its 2006 and 2007 compliance with state and federal air regulations. In June 2007, we disclosed to the CDPHE, pursuant to its audit immunity privilege, our facilities that were not in compliance. We also described corrective actions that had or would be taken to remedy the issues. In January 2008, the Colorado Attorney General's office informed us of its opinion that our disclosures do not qualify for the audit privilege immunity. We are currently negotiating with the CDPHE and the Attorney General's office about this matter.

By letter dated September 20, 2007, the EPA required our Transco subsidiary to provide information regarding natural gas compressor stations in the states of Mississippi and Alabama as part of the EPA's investigation of our compliance with the Clean Air Act. We have responded with the requested information.

Former operations, including operations classified as discontinued

In connection with the sale of certain assets and businesses, we have retained responsibility, through indemnification of the purchasers, for environmental and other liabilities existing at the time the sale was consummated, as described below.

Agrico

In connection with the 1987 sale of the assets of Agrico Chemical Company, we agreed to indemnify the purchaser for environmental cleanup costs resulting from certain conditions at specified locations to the extent such costs exceed a specified amount. At December 31, 2007, we have accrued liabilities of approximately $8 million for such excess costs.

Other

At December 31, 2007, we have accrued environmental liabilities totaling approximately $21 million related primarily to our:

- Potential indemnification obligations to purchasers of our former retail petroleum and refining operations;
- Former propane marketing operations, bio-energy facilities, petroleum products and natural gas pipelines;
- Discontinued petroleum refining facilities;
- Former exploration and production and mining operations.

In 2004, our Gulf Liquids subsidiary initiated a self-audit of all environmental conditions (air, water, and waste) at three facilities in Geismar, Sorrento, and Chalmette, Louisiana. The audit revealed numerous infractions of Louisiana environmental regulations and resulted in a Consolidated Compliance Order and Notice of Potential Penalty from the Louisiana Department of Environmental Quality (LDEQ). In October 2007, we paid the agreed $109,000 penalty to the LDEQ as a comprehensive multi-media settlement.

Certain of our subsidiaries have been identified as potentially responsible parties at various Superfund and state waste disposal sites. In addition, these subsidiaries have incurred, or are alleged to have incurred, various other hazardous materials removal or remediation obligations under environmental laws.

Summary of environmental matters

Actual costs incurred for these matters could be substantially greater than amounts accrued depending on the actual number of contaminated sites identified, the actual amount and extent of contamination discovered, the final cleanup standards mandated by the EPA and other governmental authorities and other factors, but the amount cannot be reasonably estimated at this time.

Other Legal Matters

Will Price (formerly Quinque)

In 2001, fourteen of our entities were named as defendants in a nationwide class action lawsuit in Kansas state court that had been pending against other defendants, generally pipeline and gathering companies, since 2000. The plaintiffs alleged that the defendants have engaged in mismeasurement techniques that distort the heating content of natural gas, resulting in an alleged underpayment of royalties to the class of producer plaintiffs and sought an unspecified amount of damages. The fourth amended petition, which was filed in 2003, deleted all of our defendant entities except two Midstream subsidiaries. All remaining defendants have opposed class certification and a hearing on plaintiffs' second motion to certify the class was held in April 2005. We are awaiting a decision from the court. The amount of any possible liability cannot be reasonably estimated at this time.

Grynberg

In 1998, the DOJ informed us that Jack Grynberg, an individual, had filed claims on behalf of himself and the federal government, in the United States District Court for the District of Colorado under the False Claims Act against us and certain of our wholly owned subsidiaries. The claims sought an unspecified amount of royalties allegedly not paid to the federal government, treble damages, a civil penalty, attorneys' fees, and costs. In

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

connection with our sales of Kern River Gas Transmission in 2002 and Texas Gas Transmission Corporation in 2003, we agreed to indemnify the purchasers for any liability relating to this claim, including legal fees. The maximum amount of future payments that we could potentially be required to pay under these indemnifications depends upon the ultimate resolution of the claim and cannot currently be determined. Grynberg had also filed claims against approximately 300 other energy companies alleging that the defendants violated the False Claims Act in connection with the measurement, royalty valuation and purchase of hydrocarbons. In 1999, the DOJ announced that it would not intervene in any of the Grynberg cases. Also in 1999, the Panel on Multi-District Litigation transferred all of these cases, including those filed against us, to the federal court in Wyoming for pre-trial purposes. Grynberg's measurement claims remained pending against us and the other defendants; the court previously dismissed Grynberg's royalty valuation claims. In May 2005, the court-appointed special master entered a report which recommended that the claims against our Gas Pipeline and Midstream subsidiaries be dismissed but upheld the claims against our Exploration & Production subsidiaries against our jurisdictional challenge. In October 2006, the District Court dismissed all claims against us and our wholly owned subsidiaries, and in November 2006, Grynberg filed his notice of appeal with the Tenth Circuit Court of Appeals.

In August 2002, Jack J. Grynberg, and Celeste C. Grynberg, Trustee on Behalf of the Rachel Susan Grynberg Trust, and the Stephen Mark Grynberg Trust, served us and one of our Exploration & Production subsidiaries with a complaint in the state court in Denver, Colorado. The complaint alleges that we have used mismeasurement techniques that distort the British Thermal Unit heating content of natural gas, resulting in the alleged underpayment of royalties to Grynberg and other independent natural gas producers. The complaint also alleges that we inappropriately took deductions from the gross value of their natural gas and made other royalty valuation errors. Under various theories of relief, the plaintiff is seeking actual damages of between $2 million and $20 million based on interest rate variations and punitive damages in the amount of approximately $1 million. In 2004, Grynberg filed an amended complaint against one of our Exploration & Production subsidiaries. This subsidiary filed an answer in January 2005, denying liability for the damages claimed. Trial in this case was originally set for May 2006, but the parties have negotiated an agreement dismissing the measurement claims and deferring further proceedings on the royalty claims until resolution of an appeal in another case. The amount of any possible liability cannot be reasonably estimated at this time.

Securities class actions

Numerous shareholder class action suits were filed against us in 2002 in the United States District Court for the Northern District of Oklahoma. The majority of the suits alleged that we and co-defendants, WilTel, previously an owned subsidiary known as Williams Communications, and certain corporate officers, acted jointly and separately to inflate the stock price of both companies. WilTel was dismissed as a defendant as a result of its bankruptcy. These cases were consolidated and an order was issued requiring separate amended consolidated complaints by our equity holders and WilTel equity holders. The underwriter defendants have requested indemnification and defense from these cases. If we grant the requested indemnifications to the underwriters, any related settlement costs will not be covered by our insurance policies. We covered the cost of defending the underwriters. In 2002, the amended complaints of the WilTel securities holders and of our securities holders added numerous claims. On February 9, 2007, the court gave its final approval to our settlement with our securities holders. We entered into indemnity agreements with certain of our insurers to ensure their timely payment related to this settlement. The carrying value of our estimated liability related to these agreements is immaterial because we believe the likelihood of any future performance is remote.

On July 6, 2007, the court granted various defendants' motions for summary judgment and entered judgment for us and the other defendants in the WilTel matter. The plaintiffs appealed the court's judgment. Any obligation of ours to the WilTel equity holders as a result of a settlement, or as a result of trial in the event of a successful appeal of the court's judgment, will not likely be covered by insurance because our insurance coverage has been fully utilized by the settlement described above. The extent of any such obligation is presently unknown and cannot be estimated, but it is reasonably possible that our exposure could materially exceed amounts accrued for this matter.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

TAPS Quality Bank

One of our subsidiaries, Williams Alaska Petroleum, Inc. (WAPI), is actively engaged in administrative litigation being conducted jointly by the FERC and the Regulatory Commission of Alaska (RCA) concerning the Trans-Alaska Pipeline System (TAPS) Quality Bank. In 2004, the FERC and RCA presiding administrative law judges rendered their joint and individual initial decisions, and we accrued approximately $134 million based on our computation and assessment of ultimate ruling terms that were considered probable. Our additional potential refund liability terminated on March 31, 2004, when we sold WAPI's interests in the TAPS pipeline. We subsequently accrued additional amounts for interest.

In 2006, the FERC entered its final order (FERC Final Order), which the RCA adopted, and most of the parties appealed to the D.C. Circuit Court of Appeals. ExxonMobil also filed a similar appeal in the Alaska Superior Court. A key issue pending on appeal is the limited retroactive impact of the FERC Final Order that restricts our exposure for Quality Bank adjustment refunds to periods after February 1, 2000. ExxonMobil asserts that the FERC's reliance on the Highway Reauthorization Act as the basis for limiting the retroactive effect violates, among other things, the separation of powers under the U.S. Constitution by interfering with the FERC's independent decision-making role. We expect a decision from the U.S. Supreme Court on the constitutional issues in 2008.

On June 7, 2007, the FERC stated the Quality Bank Administrator was free to issue invoices without any further action by the FERC. The Quality Bank Administrator issued invoices on July 31, 2007. We estimate that our net obligation for these invoices could be as much as $124 million. This amount remains an estimate because WAPI has not received all invoices to be issued to WAPI that arise out of the Administrator's original invoices to third parties. Amounts accrued in excess of this estimated obligation will be retained pending resolution of all appeals.

Redondo Beach taxes

In February 2005, we and AES Redondo Beach, L.L.C. received a tax assessment letter from the city of Redondo Beach, California, in which the city asserted that approximately $33 million in back taxes and approximately $39 million in interest and penalties are owed related to natural gas used at the generating facility operated by AES Redondo Beach. Hearings were held in July 2005 and in September 2005 the tax administrator for the city issued a decision in which he found us jointly and severally liable with AES Redondo Beach for back taxes of approximately $36 million and interest and penalties of approximately $21 million. Both we and AES Redondo Beach filed notices of appeal that were heard at the city level. In December 2006, the city hearing officer for the appeal of the pre-2005 amounts issued a final decision affirming our utility user tax liability and reversing AES Redondo Beach's liability because the officer ruled that AES Redondo Beach is an exempt public utility. We appealed this decision to the Los Angeles Superior Court, and the city also appealed with respect to AES Redondo Beach. Those appeals were heard on January 25 and February 14, 2008. On April 30, 2007, we paid the city the protested amount of approximately $57 million in order to pursue its appeal. Despite the city hearing officer's unfavorable decision and the payment to preserve our appeal rights, we do not believe a contingent loss is probable.

The city's assessment of our liability for the periods from 1998 through September 2007 is approximately $72 million (inclusive of interest and penalties). We protested all these assessments and requested hearings on them. We and AES Redondo Beach also filed separate refund actions in Los Angeles Superior Court related to certain taxes paid since the initial 2005 notice of assessment. The refund actions are stayed pending the resolution of the appeals. In connection with the sale of our power business (see Note 2), we settled our dispute with AES Redondo Beach by equally sharing, for periods prior to the closing of the sale, any ultimate tax liability as well as the funding of amounts previously paid under protest.

Gulf Liquids litigation

Gulf Liquids contracted with Gulsby Engineering Inc. (Gulsby) and Gulsby-Bay for the construction of certain gas processing plants in Louisiana. National American Insurance Company (NAICO) and American Home

Assurance Company provided payment and performance bonds for the projects. In 2001, the contractors, and sureties filed multiple cases in Louisiana and Texas against Gulf Liquids and us.

In 2006, at the conclusion of the consolidated trial of the asserted contract and tort claims, the jury returned its actual and punitive damages verdict against us and Gulf Liquids. Based on our interpretation of the jury verdicts, we estimated exposure for actual damages of approximately $68 million plus potential interest of approximately $25 million, all of which have been accrued as of December 31, 2007. In addition, we concluded that it was reasonably possible that any ultimate judgment might have included additional amounts of approximately $199 million in excess of our accrual, which primarily represented our estimate of potential punitive damage exposure under Texas law.

From May through October 2007, the court entered seven post-trial orders in the case (interlocutory orders) which, among other things, overruled the verdict award of tort and punitive damages as well as any damages against us. The court also denied the plaintiffs' claims for attorneys' fees. On January 28, 2008, the court issued its judgment awarding damages against Gulf Liquids of approximately $11 million in favor of Gulsby and approximately $4 million in favor of Gulsby-Bay. If the judgment is upheld on appeal, our liability will be substantially less than the amount of our accrual for these matters.

Wyoming severance taxes

In August 2006, the Wyoming Department of Audit (DOA) assessed our subsidiary Williams Production RMT Company for additional severance tax and interest for the production years 2000 through 2002. In addition, the DOA notified us of an increase in the taxable value of our interests for ad valorem tax purposes. We disputed the DOA's interpretation of the statutory obligation and appealed this assessment to the Wyoming State Board of Equalization (SBOE). The SBOE upheld the assessment and remanded it to the DOA to address the disallowance of a credit. Apparently agreeing that we could not have known the DOA's position before January 2007, the SBOE did not award interest on the assessment. We estimate that the amount of the additional severance and ad valorem taxes to be approximately $4 million. The Wyoming Supreme Court has agreed to hear our appeal of the SBOE's determination. If the DOA prevails in its interpretation of our obligation and applies the same basis of assessment to subsequent periods, it is reasonably possible that we could owe a total of approximately $18 million to $20 million in additional taxes and interest from January 1, 2003, through December 31, 2007.

Royalty litigation

In September 2006, royalty interest owners in Garfield County, Colorado, filed a class action suit in Colorado state court alleging that we improperly calculated oil and gas royalty payments, failed to account for the proceeds that we received from the sale of gas and extracted products, improperly charged certain expenses, and failed to refund amounts withheld in excess of ad valorem tax obligations. The plaintiffs claim that the class might be in excess of 500 individuals and seek an accounting and damages. The parties have agreed to stay this action in order to participate in ongoing mediation.

Certain other royalty matters are currently being litigated by a federal regulatory agency and another Colorado producer. Although we are not a party to the litigation, the final outcome of that case might lead to a future unfavorable impact on our results of operations.

Other Divestiture Indemnifications

Pursuant to various purchase and sale agreements relating to divested businesses and assets, we have indemnified certain purchasers against liabilities that they may incur with respect to the businesses and assets acquired from us. The indemnities provided to the purchasers are customary in sale transactions and are contingent upon the purchasers incurring liabilities that are not otherwise recoverable from third parties. The indemnities

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

generally relate to breach of warranties, tax, historic litigation, personal injury, environmental matters, right of way and other representations that we have provided.

We sold a natural gas liquids pipeline system in 2002, and in July 2006, the purchaser of that system filed its complaint against us and our subsidiaries in state court in Houston, Texas. The purchaser alleges that we breached certain warranties under the purchase and sale agreement and seeks approximately $18 million in damages and our specific performance under certain guarantees. In 2006, we filed our answer to the purchaser's complaint denying all liability. The trial is scheduled to begin on September 15, 2008, and our prior suit filed against the purchaser in Delaware state court is stayed pending resolution of the Texas case.

At December 31, 2007, we do not expect any of the indemnities provided pursuant to the sales agreements to have a material impact on our future financial position. However, if a claim for indemnity is brought against us in the future, it may have a material adverse effect on results of operations in the period in which the claim is made.

In addition to the foregoing, various other proceedings are pending against us which are incidental to our operations.

Summary

Litigation, arbitration, regulatory matters, and environmental matters are subject to inherent uncertainties. Were an unfavorable ruling to occur, there exists the possibility of a material adverse impact on the results of operations in the period in which the ruling occurs. Management, including internal counsel, currently believes that the ultimate resolution of the foregoing matters, taken as a whole and after consideration of amounts accrued, insurance coverage, recovery from customers or other indemnification arrangements, will not have a materially adverse effect upon our future financial position.

Commitments

Commitments for construction and acquisition of property, plant and equipment are approximately $484 million at December 31, 2007.

* Includes $1 million for the Net Actuarial Loss of an equity method investee.

** Includes a $429 million reclassification into earnings of deferred net hedge gains related to the sale of our power business. (See Note 2.)

Table of Contents

Note 17. Segment Disclosures

Our reportable segments are strategic business units that offer different products and services. The segments are managed separately because each segment requires different technology, marketing strategies and industry knowledge. Our master limited partnership, Williams Partners L.P., is consolidated within our Midstream segment. (See Note 1.) Other primarily consists of corporate operations.

Performance Measurement

We currently evaluate performance based on *segment profit (loss)* from operations, which includes *segment revenues* from external and internal customers, *segment costs and expenses, depreciation, depletion and amortization, equity earnings (losses)* and *loss from investments* including impairments related to investments accounted for under the equity method. The accounting policies of the segments are the same as those described in Note 1. Intersegment sales are generally accounted for at current market prices as if the sales were to unaffiliated third parties.

Energy commodity hedging by our business units may be done through intercompany derivatives with our Gas Marketing Services segment which, in turn, enters into offsetting derivative contracts with unrelated third parties. Gas Marketing Services bears the counterparty performance risks associated with the unrelated third parties in these transactions. Additionally, beginning in the first quarter of 2007, hedges related to Exploration & Production may be entered into directly between Exploration & Production and third parties under its new credit agreement. (See Note 11.) Exploration & Production bears the counterparty performance risks associated with the unrelated third parties in these transactions.

Gas Marketing Services primarily supports our natural gas businesses by providing marketing and risk management services, which include marketing and hedging the gas produced by Exploration & Production, and procuring fuel and shrink gas and hedging natural gas liquids sales for Midstream. In addition, Gas Marketing manages various natural gas-related contracts such as transportation, storage, and related hedges, and provides services to third parties, such as producers.

External revenues of our Exploration & Production segment includes third-party oil and gas sales, which are more than offset by transportation expenses and royalties due third parties on intersegment sales.

The following geographic area data includes *revenues from external customers* based on product shipment origin and *long-lived assets* based upon physical location.

	United States	Other	Total
	(Millions)		
Revenues from external customers:			
2007	$ 10,137	$ 421	$10,558
2006	8,982	394	9,376
2005	9,466	315	9,781
Long-lived assets:			
2007	$ 16,279	$ 713	$16,992
2006	14,487	682	15,169
2005	12,667	740	13,407

Our foreign operations are primarily located in Venezuela, Canada, and Argentina. *Long-lived assets* are comprised of property, plant and equipment, goodwill and other intangible assets.

THE WILLIAMS COMPANIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Total	$ 25,061	$ 25,402	$ 29,443	$ 876	$ 814	$ 831

(1) The 2006 decrease in Exploration & Production's total assets is due primarily to the fluctuations in derivative assets as a result of the impact of changes in commodity prices on existing derivative contracts. Exploration & Production's derivatives are primarily comprised of intercompany transactions with the Gas Marketing Services segment.

(2) The decrease in Gas Marketing Services' total assets for both 2007 and 2006 is due primarily to the fluctuations in derivative assets as a result of the impact of changes in commodity prices on existing forward derivative contracts. Gas Marketing Services' derivative assets are substantially offset by their derivative liabilities.

(3) The 2006 decrease in Eliminations is due primarily to the fluctuations in the intercompany derivative balances.

Note 18. Subsequent Events

In January 2008, we sold a contractual right to a production payment on certain future international hydrocarbon production for approximately $148 million. We have received $118 million in cash and $29 million has been placed in escrow subject to certain post-closing conditions and adjustments. We will recognize a pre-tax gain of approximately $118 million in the first quarter of 2008 related to the initial cash received. As a result of the contract termination, we have no further interests associated with the crude oil concession, which is located in Peru. We had obtained these interests through our acquisition of Barrett Resources Corporation in 2001.

During third-quarter 2007, we formed Williams Pipeline Partners L.P. (WMZ) to own and operate natural gas transportation and storage assets. In January 2008, WMZ completed its initial public offering of 16.25 million common units at a price of $20.00 per unit. In February 2008, the underwriters also exercised their right to purchase an additional 1.65 million common units at the same price. A subsidiary of ours serves as the general partner of WMZ. The initial asset of the partnership is a 35 percent interest in Northwest Pipeline GP, formerly Northwest Pipeline Corporation. Upon completion of the transaction, we hold approximately 47.7 percent of the interests in WMZ including the interests of the general partner. In accordance with EITF Issue No. 04-5 (see Note 1), WMZ will continue to be consolidated within our Gas Pipeline segment due to our control through the general partner, which is wholly owned by us.

At December 31, 2007, we held all of Williams Partners L.P.'s seven million subordinated units outstanding. In February 2008, all of these subordinated units were converted into common units due to factors which resulted in the termination of the subordination period. As a result, we will recognize a decrease to minority interest and a corresponding increase to stockholders' equity of approximately $1.2 billion in the first quarter of 2008.

THE WILLIAMS COMPANIES, INC.

QUARTERLY FINANCIAL DATA
(Unaudited)

Summarized quarterly financial data are as follows (millions, except per-share amounts).

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2007				
Revenues	$ 2,368	$ 2,824	$ 2,860	$ 2,506

Net income (loss)	132	(76)	106	147
Basic earnings (loss) per common share:				
Income (loss) from continuing operations	.22	(.10)	.19	.27
Diluted earnings (loss) per common share:				
Income (loss) from continuing operations	.22	(.10)	.19	.26

The sum of earnings per share for the four quarters may not equal the total earnings per share for the year due to changes in the average number of common shares outstanding and rounding.

Net income for fourth-quarter 2007 includes a $23 million adjustment to increase the tax provision relating to an income tax contingency and the following pre-tax items:

- $156 million mark-to-market loss recognized at Gas Marketing Services on a legacy derivative natural gas sales contract that we expect to assign to another party in 2008 under an asset transfer agreement that we executed in December 2007;
- $20 million accrual for litigation contingencies at Gas Marketing Services (see Note 4);
- $19 million in premiums, fees and expenses related to early debt retirement (see Note 11);
- $12 million of income related to a favorable litigation outcome at Midstream (see Note 4);
- $10 million charge related to an impairment of the Carbonate Trend pipeline at Midstream (see Note 4);
- $9 million charge related to the reserve for certain international receivables at Midstream;
- $6 million net loss, including transaction expenses, related to the sale of our discontinued power business (see summarized results of discontinued operations at Note 2).

Net income for third-quarter 2007 includes the following pre-tax items:

- $17 million of expenses related to the sale of our discontinued power business (see summarized results of discontinued operations at Note 2);
- $12 million of income associated with the payments received for a terminated firm transportation agreement on Northwest Pipeline’s Grays Harbor lateral (see Note 4).

THE WILLIAMS COMPANIES, INC.

QUARTERLY FINANCIAL DATA — (Continued)
(Unaudited)

Net income for second-quarter 2007 includes the following pre-tax items:

- $429 million gain associated with the reclassification of deferred net hedge gains to earnings related to the sale of our discontinued power business (see summarized results of discontinued operations at Note 2);
- $111 million impairment of the carrying value of certain derivative contracts related to the sale of our discontinued power business (see summarized results of discontinued operations at Note 2);
- $17 million of income associated with a change in estimate related to a regulatory liability at Northwest Pipeline (see Note 4);
- $15 million impairment of our Hazelton facility included in discontinued operations (see summarized results of discontinued operations at Note 2);
- $14 million of gains from the sales of cost-based investments (see Note 3);
- $14 million of expenses related to the sale of our discontinued power business (see summarized results of discontinued operations at Note 2);
- $6 million of income associated with the payments received for a terminated firm transportation agreement on Northwest Pipeline's Grays Harbor lateral (see Note 4).

Net income for the first-quarter 2007 includes the following pre-tax items:

- $8 million of income due to the reversal of a planned major maintenance accrual at Midstream.

Net income (loss) for fourth-quarter 2006 includes a $40 million reduction to the tax provision associated with a favorable U.S. Tax Court ruling, a $7 million increase to the tax provision associated with an adjustment to deferred income taxes (see Note 5) and the following pre-tax items:

- A $16 million impairment of a Venezuelan cost-based investment at Exploration & Production (see Note 3);
- A $15 million charge associated with an oil purchase contract related to our former Alaska refinery (see summarized results of discontinued operations at Note 2).

Net income (loss) for third-quarter 2006 includes the following pre-tax items:

- $13 million of income due to a reduction of contingent obligations at our former distributive power generation business (see summarized results of discontinued operations at Note 2);
- $11 million of expense related to an adjustment of an accounts payable accrual at Midstream;
- $6 million accrual for a loss contingency related to a former exploration business (see summarized results of discontinued operations at Note 2).

Net income (loss) for second-quarter 2006 includes the following pre-tax items:

- $161 million accrual related to our securities litigation settlement (see Note 15);
- $88 million accrual for Gulf Liquids litigation contingency and associated interest expense at Midstream (see Note 4);
- $19 million accrual for an adverse arbitration award related to our former chemical fertilizer business (see summarized results of discontinued operations at Note 2).

THE WILLIAMS COMPANIES, INC.

QUARTERLY FINANCIAL DATA — (Continued)
(Unaudited)

Net income (loss) for the first-quarter 2006 includes the following pre-tax items:

- $27 million premium and conversion expenses related to the convertible debenture conversion (see Note 12);
- $24 million gain on sale of certain receivables at Gas Marketing Services;
- $9 million of income related to the settlement of an international contract dispute at Midstream;
- $7 million associated with the reversal of an accrued litigation contingency due to a favorable court ruling and the related accrued interest income at our Gas Pipeline segment.

THE WILLIAMS COMPANIES, INC.

SUPPLEMENTAL OIL AND GAS DISCLOSURES
(Unaudited)

The following information pertains to our oil and gas producing activities and is presented in accordance with SFAS No. 69, "Disclosures About Oil and Gas Producing Activities." The information is required to be disclosed by geographic region. We have significant oil and gas producing activities primarily in the Rocky Mountain and Mid-continent areas of the United States. Additionally, we have international oil- and gas-producing activities, primarily in Argentina. However, proved reserves and revenues related to international activities are approximately 3.6 percent and 3.1 percent, respectively, of our total international and domestic proved reserves and revenues. The following information relates only to the oil and gas activities in the United States.

Capitalized Costs

	As of December 31,	
	2007	2006
	(Millions)	
Proved properties	$ 6,409	$ 5,027
Unproved properties	542	500
	6,951	5,527
Accumulated depreciation, depletion and amortization and valuation provisions	(1,754)	(1,260)
Net capitalized costs	$ 5,197	$ 4,267

- Excluded from capitalized costs are equipment and facilities in support of oil and gas production of $505 million and $338 million, net, for 2007 and 2006, respectively. The capitalized cost amounts for 2007 and 2006 do not include approximately $1 billion of goodwill related to the purchase of Barrett Resources Corporation (Barrett) in 2001.
- Proved properties include capitalized costs for oil and gas leaseholds holding proved reserves; development wells including uncompleted development well costs; and successful exploratory wells.
- Unproved properties consist primarily of acreage related to probable/possible reserves acquired through the Barrett acquisition in 2001. The balance is unproved exploratory acreage.

Costs Incurred

	For the Year Ended December 31,		
	2007	2006	2005
		(Millions)	
Acquisition	$ 82	$ 84	$ 45
Exploration	38	20	8
Development	1,374	1,173	724
	$1,494	$1,277	$777

- Costs incurred include capitalized and expensed items.
- Acquisition costs are as follows: The 2007 cost is primarily for additional land and reserve acquisitions in the Piceance and Fort Worth basins. The 2006 cost is primarily for additional land and reserve acquisitions in the Fort Worth basin. The 2005 costs primarily consist of a land and reserve acquisition in the Fort Worth basin and an additional land acquisition in the Arkoma basin.

Table of Contents

THE WILLIAMS COMPANIES, INC.

SUPPLEMENTAL OIL AND GAS DISCLOSURES — (Continued)
(Unaudited)

- Exploration costs include the costs of geological and geophysical activity, drilling and equipping exploratory wells determined to be dry holes, and the cost of retaining undeveloped leaseholds including lease amortization and impairments.
- Development costs include costs incurred to gain access to and prepare development well locations for drilling and to drill and equip development wells.

Results of Operations

	For the Year Ended December 31,		
	2007	2006	2005
	(Millions)		
Revenues:			
Oil and gas revenues	$1,725	$1,238	$1,072
Other revenues	304	186	144
Total revenues	2,029	1,424	1,216
Costs:			
Production costs	360	309	230
General & administrative	144	111	80
Exploration expenses	21	18	8
Depreciation, depletion & amortization	523	351	245
(Gains)/Losses on sales of interests in oil and gas properties	(1)	—	(31)
Other expenses	270	136	141
Total costs	1,317	925	673
Results of operations	712	499	543
Provision for income taxes	(273)	(174)	(217)
Exploration and production net income	$ 439	$ 325	$ 326

- Results of operations for producing activities consist of all related domestic activities within the Exploration & Production reporting unit. Other expenses in 2005 include a $6 million gain on sales of securities associated with a coal seam royalty trust.
- Oil and gas revenues consist primarily of natural gas production sold to the Gas Marketing Services subsidiary and includes the impact of hedges, including intercompany hedges.
- Other revenues and other expenses consist of activities within the Exploration & Production segment that are not a direct part of the producing activities. These nonproducing activities include acquisition and disposition of other working interest and royalty interest gas and the movement of gas from the wellhead to the tailgate of the respective plants for sale to the Gas Marketing Services subsidiary or third-party purchasers. In addition, other revenues include recognition of income from transactions which transferred certain nonoperating benefits to a third party.
- Production costs consist of costs incurred to operate and maintain wells and related equipment and facilities used in the production of petroleum liquids and natural gas. These costs also include production taxes other than income taxes and administrative expenses in support of production activity. Excluded are depreciation, depletion and amortization of capitalized acquisition, exploration and development costs.

Table of Contents

THE WILLIAMS COMPANIES, INC.

SUPPLEMENTAL OIL AND GAS DISCLOSURES — (Continued)
(Unaudited)

- Exploration expenses include the costs of geological and geophysical activity, drilling and equipping exploratory wells determined to be dry holes, and the cost of retaining undeveloped leaseholds including lease amortization and impairments.
- Depreciation, depletion and amortization includes depreciation of support equipment.

Proved Reserves

	2007	2006	2005
		(Bcfe)	
Proved reserves at beginning of period	3,701	3,382	2,986
Revisions	(106)	(113)	(12)
Purchases	19	41	28
Extensions and discoveries	863	669	615
Production	(334)	(277)	(224)
Sale of minerals in place	—	(1)	(11)
Proved reserves at end of period	4,143	3,701	3,382
Proved developed reserves at end of period	2,252	1,945	1,643

- The SEC defines proved oil and gas reserves (Rule 4-10(a) of Regulation S-X) as the estimated quantities of crude oil, natural gas, and natural gas liquids which geological and engineering data demonstrate with reasonable certainty are recoverable in future years from known reservoirs under existing economic and operating conditions. Our proved reserves consist of two categories, proved developed reserves and proved undeveloped reserves. Proved developed reserves are currently producing wells and wells awaiting minor sales connection expenditure, recompletion, additional perforations or borehole stimulation treatments. Proved undeveloped reserves are those reserves which are expected to be recovered from new wells on undrilled acreage or from existing wells where a relatively major expenditure is required for recompletion. Proved reserves on undrilled acreage are limited to those drilling units offsetting productive units that are reasonably certain of production when drilled or where it can be demonstrated with certainty that there is continuity of production from the existing productive formation.
- Natural gas reserves are computed at 14.73 pounds per square inch absolute and 60 degrees Fahrenheit. Crude oil reserves are insignificant and have been included in the proved reserves on a basis of billion cubic feet equivalents (Bcfe).

Standardized Measure of Discounted Future Net Cash Flows Relating to Proved Oil and Gas Reserves

The following is based on the estimated quantities of proved reserves and the year-end prices and costs. The average year-end natural gas prices used in the following estimates were $5.78, $4.81, and $6.95 per MMcfe at December 31, 2007, 2006, and 2005, respectively. Future income tax expenses have been computed considering available carry forwards and credits and the appropriate statutory tax rates. The discount rate of 10 percent is as prescribed by SFAS No. 69. Continuation of year-end economic conditions also is assumed. The calculation is based on estimates of proved reserves, which are revised over time as new data becomes available. Probable or possible reserves, which may become proved in the future, are not considered. The calculation also requires assumptions as to the timing of future production of proved reserves, and the timing and amount of future development and production costs. Of the $3,497 million of future development costs, $1,135 million, $1,126 million and $468 million are estimated to be spent in 2008, 2009 and 2010, respectively.

THE WILLIAMS COMPANIES, INC.

SUPPLEMENTAL OIL AND GAS DISCLOSURES — (Continued)
(Unaudited)

Numerous uncertainties are inherent in estimating volumes and the value of proved reserves and in projecting future production rates and timing of development expenditures. Such reserve estimates are subject to change as additional information becomes available. The reserves actually recovered and the timing of production may be substantially different from the reserve estimates.

Standardized Measure of Discounted Future Net Cash Flows

	At December 31, 2007	2006
	(Millions)	
Future cash inflows	$23,937	$17,821
Less:		
Future production costs	5,345	5,207
Future development costs	3,497	3,070
Future income tax provisions	5,416	3,350
Future net cash flows	9,679	6,194
Less 10 percent annual discount for estimated timing of cash flows	4,876	3,338
Standardized measure of discounted future net cash flows	$ 4,803	$ 2,856

Sources of Change in Standardized Measure of Discounted Future Net Cash Flows

	2007	2006	2005
		(Millions)	
Standardized measure of discounted future net cash flows beginning of period	$ 2,856	$ 5,281	$ 3,147
Changes during the year:			
Sales of oil and gas produced, net of operating costs	(1,426)	(1,179)	(1,222)
Net change in prices and production costs	2,019	(4,052)	2,358
Extensions, discoveries and improved recovery, less estimated future costs	2,163	647	1,310
Development costs incurred during year	738	881	723
Changes in estimated future development costs	(931)	(1,022)	(300)
Purchase of reserves in place, less estimated future costs	48	63	78
Sales of reserves in place, less estimated future costs	—	(2)	(31)
Revisions of previous quantity estimates	(266)	(140)	(28)
Accretion of discount	434	790	488
Net change in income taxes	(1,108)	1,468	(1,272)
Other	276	121	30
Net changes	1,947	(2,425)	2,134
Standardized measure of discounted future net cash flows end of period	$ 4,803	$ 2,856	$ 5,281

THE WILLIAMS COMPANIES, INC.

SCHEDULE II — VALUATION AND QUALIFYING ACCOUNTS

	Beginning Balance	ADDITIONS Charged to Cost and Expenses	ADDITIONS Other	Deductions	Ending Balance
			(Millions)		
Year ended December 31, 2007:					
Allowance for doubtful accounts — accounts and notes receivable(a)	$ 15	$ 12	$ —	$ —	$ 27
Deferred tax asset valuation allowance(a)	36	21	—	—	57
Price-risk management credit reserves(a)	7	(6)(e)	—	—	1
Processing plant major maintenance accrual(b)	8	—	—	8(c)	—
Year ended December 31, 2006:					
Allowance for doubtful accounts — accounts and notes receivable(a)	86	4	(66)(f)	9(d)	15
Deferred tax asset valuation allowance(a)	37	(1)	—	—	36
Price-risk management credit reserves(a)	15	(8)(e)	—	—	7
Processing plant major maintenance accrual(b)	7	2	—	1	8
Year ended December 31, 2005:					
Allowance for doubtful accounts — accounts and notes receivable(a)	98	3	—	15(d)	86
Deferred tax asset valuation allowance(a)	62	(25)	—	—	37
Price-risk management credit reserves(a)	3	12(e)	—	—	15
Processing plant major maintenance accrual(b)	6	1	—	—	7

(a) Deducted from related assets.

(b) Included in *accrued liabilities* in 2006 and *other liabilities and deferred income* in 2005.

(c) Effective January 1, 2007, we adopted FASB Staff Position (FSP) No. AUG AIR-1, *Accounting for Planned Major Maintenance Activities*. As a result, we recognized as other income an $8 million reversal of an accrual for major maintenance on our Geismar ethane cracker. We did not apply the FSP retrospectively because the impact to our 2007 earnings, as well as the impact to prior periods, is not material. We have adopted the deferral method of accounting for these costs going forward.

(d) Represents balances written off, reclassifications, and recoveries.

(e) Included in *revenues*.

(f) During 2006, $66 million in previously reserved Enron receivables were sold.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure***

None.

Item 9A. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures

An evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d – 15(e) of the Securities Exchange Act) (Disclosure Controls) was performed as of the end of the period covered by this report. This evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that these Disclosure Controls are effective at a reasonable assurance level.

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our Disclosure Controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. We monitor our Disclosure Controls and make modifications as necessary; our intent in this regard is that the Disclosure Controls will be modified as systems change and conditions warrant.

Management's Report on Internal Control over Financial Reporting

See "Management's Report on Internal Control over Financial Reporting" set forth in Item 8, "Financial Statements and Supplementary Data."

Changes in Internal Controls Over Financial Reporting

There have been no changes during the fourth quarter of 2007 that have materially affected, or are reasonably likely to materially affect, our Internal Control over financial reporting.

Item 9B. ***Other Information***

None.

PART III

Item 10. ***Directors, Executive Officers and Corporate Governance***

The information regarding our directors and nominees for director required by Item 401 of Regulation S-K will be presented under the headings "Board of Directors — Board Committees," and "Election of Directors" in our Proxy Statement prepared for the solicitation of proxies in connection with our Annual Meeting of Stockholders to be held May 15, 2008 (Proxy Statement), which information is incorporated by reference herein.

Information regarding our executive officers required by Item 401(b) of Regulation S-K is presented at the end of Part I herein and captioned "Executive Officers of the Registrant" as permitted by General Instruction G(3) to Form 10-K and Instruction 3 to Item 401(b) of Regulation S-K.

Information required by Item 405 of Regulation S-K will be included under the heading "Compliance with Section 16 (a) of the Securities Exchange Act of 1934" in our Proxy Statement, which information is incorporated by reference herein.

Information required by paragraphs (c)(3), (d)(4) and (d)(5) of Item 407 of Regulation S-K will be included under the heading "Corporate Governance" in our Proxy Statement, which information in incorporated by reference herein.

We have adopted a Code of Ethics that applies to our Chief Executive Officer, Chief Financial Officer, and Controller, or persons performing similar functions. The Code of Ethics, together with our Corporate Governance Guidelines, the charters for each of our board committees, and our Code of Business Conduct applicable to all employees are available on our Internet website at *http://www.williams.com.* We will provide, free of charge, a copy of our Code of Ethics or any of our other corporate documents listed above upon written request to our Secretary at Williams, One Williams Center, Suite 4700, Tulsa, Oklahoma 74172. We intend to disclose any amendments to or waivers of the Code of Ethics on behalf of our Chief Executive Officer, Chief Financial Officer, Controller, and persons performing similar functions on our Internet website at *http://www.williams.com* under the Investor Relations caption, promptly following the date of any such amendment or waiver.

Item 11. *Executive Compensation*

The information required by Item 402 and paragraphs (e)(4) and (e)(5) of Item 407 of Regulation S-K regarding executive compensation will be presented under the headings "Board of Directors," "Executive Compensation," "Compensation committee interlocks and insider participation," and "Compensation committee report" in our Proxy Statement, which information is incorporated by reference herein. Notwithstanding the foregoing, the information provided under the heading "Compensation Committee Report" in our Proxy Statement is furnished and shall not be deemed to be filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, is not subject to the liabilities of that section and is not deemed incorporated by reference in any filing under the Securities Act of 1933, as amended.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

The information regarding securities authorized for issuance under equity compensation plans required by Item 201 (d) of Regulation S-K and the security ownership of certain beneficial owners and management required by Item 403 of Regulation S-K will be presented under the headings "Equity Compensation Stock Plans" and "Security Ownership of Certain Beneficial Owners and Management" in our Proxy Statement, which information is incorporated by reference herein.

Item 13. *Certain Relationships and Related Transactions, and Director Independence*

The information regarding certain relationships and related transactions required by Item 404 and Item 407(a) of Regulation S-K will be presented under the heading "Certain Relationships and Related Transactions" and "Corporate Governance" in our Proxy Statement, which information is incorporated by reference herein.

Item 14. *Principal Accounting Fees and Services*

The information regarding our principal accountant fees and services required by Item 9(e) of Schedule 14A will be presented under the heading "Principal Accountant Fees and Services" in our Proxy Statement, which information is incorporated by reference herein.

PART IV

Item 15. ***Exhibits, Financial Statement Schedules***

(a) 1 and 2.

All other schedules have been omitted since the required information is not present or is not present in amounts sufficient to require submission of the schedule, or because the information required is included in the financial statements and notes thereto.

(a) 3 and (b). The exhibits listed below are filed as part of this annual report.

INDEX TO EXHIBITS

Exhibit No.		Description
3.1*	—	Restated Certificate of Incorporation, as supplemented (filed as Exhibit 3.1 to our Form 10-K filed March 11, 2005).
3.2*	—	Restated By-Laws (filed as Exhibit 3.2 to our current report on Form 8-K filed May 22, 2007).
4.1*	—	Form of Senior Debt Indenture between Williams and Bank One Trust company, N.A. (formerly The First National Bank of Chicago), as Trustee (filed as Exhibit 4.1 to our Form S-3 filed September 8, 1997).
4.2*	—	Form of Floating Rate Senior Note (filed as Exhibit 4.3 to our Form S-3 filed September 8, 1997).
4.3*	—	Form of Fixed Rate Senior Note (filed as Exhibit 4.4 to our Form S-3 filed September 8, 1997).
4.4*	—	Trust Company, N.A., as Trustee, dated as of January 17, 2001 (filed as Exhibit 4(j) to Form 10-K for the fiscal year ended December 31, 2000).
4.5*	—	Fifth Supplemental Indenture between Williams and Bank One Trust Company, N.A., as Trustee, dated as of January 17, 2001 (filed as Exhibit 4(k) to our Form 10-K for the fiscal year ended December 31, 2000).
4.6*	—	Seventh Supplemental Indenture dated March 19, 2002, between The Williams Companies, Inc. as Issuer and Bank One Trust Company, National Association, as Trustee (filed as Exhibit 4.1 to our Form 10-Q filed May 9, 2002).
4.7*	—	Form of Senior Debt Indenture between Williams Holdings of Delaware, Inc. and Citibank, N.A., as Trustee (filed as Exhibit 4.1 to Williams Holdings of Delaware, Inc.'s our Form 10-Q filed October 18, 1995).

Exhibit No.		Description
4.8*	—	First Supplemental Indenture dated as of July 31, 1999, among Williams Holdings of Delaware, Inc., Citibank, N.A., as Trustee (filed as Exhibit 4(o) to Form 10-K for the fiscal year ended December 31, 1999).
4.9*	—	Senior Indenture dated February 25, 1997, between MAPCO Inc. and Bank One Trust Company, N.A. (formerly The First National Bank of Chicago), as Trustee (filed as Exhibit 4.4.1 to MAPCO Inc.'s Amendment No. 1 to Form S-3 dated February 25, 1997).
4.10*	—	Supplemental Indenture No. 1 dated March 5, 1997, between MAPCO Inc. and Bank One Trust Company, N.A. (formerly The First National Bank of Chicago), as Trustee (filed as Exhibit 4(o) to MAPCO Inc.'s Form 10-K for the fiscal year ended December 31, 1997).
4.11*	—	Supplemental Indenture No. 2 dated March 5, 1997, between MAPCO Inc. and Bank One Trust Company, N.A. (formerly The First National Bank of Chicago), as Trustee (filed as Exhibit 4(p) to MAPCO Inc.'s Form 10-K for the fiscal year ended December 31, 1997).
4.12*	—	Supplemental Indenture No. 3 dated March 31, 1998, among MAPCO Inc., Williams Holdings of Delaware, Inc. and Bank One Trust Company, N.A. (formerly The First National Bank of Chicago), as Trustee (filed as Exhibit 4(j) to Williams Holdings of Delaware, Inc.'s Form 10-K for the fiscal year ended December 31, 1998).
4.13*	—	Supplemental Indenture No. 4 dated as of July 31, 1999, among Williams Holdings of Delaware, Inc., Williams and Bank One Trust Company, N.A. (formerly The First National Bank of Chicago), as Trustee (filed as Exhibit 4(q) to our Form 10-K for the fiscal year ended December 31, 1999).
4.14*	—	Indenture dated as of May 28, 2003, by and between The Williams Companies, Inc. and JPMorgan Chase Bank, as Trustee for the issuance of the 5.50% Junior Subordinated Convertible Debentures due 2033 (filed as Exhibit 4.2 to our Form 10-Q filed August 12, 2003).
4.15*	—	Amended and Restated Rights Agreement dated September 21, 2004 by and between The Williams Companies, Inc. and EquiServe Trust Company, N.A., as Rights Agent (filed as Exhibit 4.1 to our Form 8-K filed September 21, 2004).
4.16*	—	Amendment No. 1 dated May 18, 2007 to the Amended and Restated Rights Agreement dated September 21, 2004 (filed as Exhibit 4.1 to our current report on Form 8-K filed May 22, 2007).
4.17*	—	Amendment No. 2 dated October 12, 2007 to the Amended and Restated Rights Agreement dated September 21, 2004 (filed as Exhibit 4.1 to our current report on Form 8-K filed October 15, 2007).
4.18*	—	Senior Indenture, dated as of November 30, 1995, between Northwest Pipeline Corporation and Chemical Bank, Trustee with regard to Northwest Pipeline's 7.125% Debentures, due 2025 (filed as Exhibit 4.1 to Northwest Pipeline's Form S-3 filed September 14, 1995).
4.19*	—	Indenture dated as of June 22, 2006, between Northwest Pipeline Corporation and JPMorgan Chase Bank, N.A., as Trustee, with regard to Northwest Pipeline's $175 million aggregate principal amount of 7.00% Senior Notes due 2016 (filed as Exhibit 4.1 to Northwest Pipeline's Form 8-K dated June 23, 2006).
4.20*	—	Indenture, dated as of April 5, 2007, between Northwest Pipeline Corporation and The Bank of New York (filed as Exhibit 4.1 to Northwest Pipeline Corporation's (Commission File number 001-07414) current report on Form 8-K filed April 5, 2007).

KNOW ALL MEN BY THESE PRESENTS that each of the undersigned individuals, in their capacity as a director or officer, or both, as hereinafter set forth below their signature, of THE WILLIAMS COMPANIES, INC., a Delaware corporation ("Williams"), does hereby constitute and appoint JAMES J. BENDER and BRIAN K. SHORE their true and lawful attorneys and each of them (with full power to act without the others) their true and lawful attorneys for them and in their name and in their capacity as a director or officer, or both, of Williams, as hereinafter set forth below their signature, to sign Williams' Annual Report to the Securities and Exchange Commission on Form 10-K for the fiscal year ended December 31, 2007, and any and all amendments thereto or all instruments necessary or incidental in connection therewith; and

THAT the undersigned Williams does hereby constitute and appoint JAMES J. BENDER and BRIAN K. SHORE its true and lawful attorneys and each of them (with full power to act without the others) its true and lawful attorney for it and in its name and on its behalf to sign said Form 10-K and any and all amendments thereto and any and all instruments necessary or incidental in connection therewith.

Each of said attorneys shall have full power of substitution and resubstitution, and said attorneys or any of them or any substitute appointed by any of them hereunder shall have full power and authority to do and perform in the name and on behalf of each of the undersigned, in any and all capacities, every act whatsoever requisite or necessary to be done in the premises, as fully to all intents and purposes as each of the undersigned might or could do in person, the undersigned hereby ratifying and approving the acts of said attorneys or any of them or of any such substitute pursuant hereto.

IN WITNESS WHEREOF, the undersigned have executed this instrument, all as of the 25th day of January, 2008.

THE WILLIAMS COMPANIES, INC.

Secretary’s Certificate

I, the undersigned, BRIAN K. SHORE, Secretary of THE WILLIAMS COMPANIES, INC., a Delaware corporation (hereinafter called the "Company"), do hereby certify that at a regular meeting of the Board of Directors of the Company, duly convened and held on January 24, 2008 at which a quorum of said Board was present and acting throughout, the following resolutions were duly adopted:

> RESOLVED that the Chairman of the Board, the President, any Senior Vice President and the Controller of the Company be, and each of them hereby is, authorized and empowered to execute a Power of Attorney for use in connection with the execution and filing for and on behalf of the Company, under the Securities Exchange Act of 1934, of the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2007.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the corporate seal of The Williams Companies, Inc. this 24th day of January, 2008.

/s/ Brian K. Shore

Section 8: EX-31.1 (CERTIFICATION OF CEO PURSUANT TO SECTION 302)

Exhibit 31.1

SECTION 302 CERTIFICATION

I, Steven J. Malcolm, certify that:

1. I have reviewed this annual report on Form 10-K of The Williams Companies, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Section 9: EX-31.2 (CERTIFICATION OF CFO PURSUANT TO SECTION 302)

Exhibit 31.2

SECTION 302 CERTIFICATION

I, Donald R. Chappel, certify that:

1. I have reviewed this annual report on Form 10-K of The Williams Companies, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Section 10: EX-32 (CERTIFICATION OF CEO AND CFO PURSUANT TO SECTION 906)

Exhibit 32

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report of The Williams Companies, Inc. (the "Company") on Form 10-K for the period ending December 31, 2007 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), each of the undersigned hereby certifies, in his capacity as an officer of the Company, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that to his knowledge:

(1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
