Notes:

The wetland impact data in this table was provided by AGDC and reviewed for consistency with other information provided by AGDC.

E = estuarine wetland; HGM = hydrogeomorphic; N/A = not applicable; PEM = palustrine emergent wetland; PSS = palustrine scrub-shrub wetland

^a N/A: no milepost associated with the Gas Treatment Facility.

^b PTMP = Point Thomson Unit Transmission Line (PTTL) milepost.

^c In order to normalize AGDC's data for our analysis, Cowardin classifications of palustrine ponds (e.g., palustrine aquatic bed and palustrine unconsolidated bottom classes) have been reassigned to PEM based on vegetation type shown on aerial imagery. Wetland classification according to Cowardin et al., 1979.

^d Wetland classification according to Brinson, 1993.

^e Temporary wetland impacts include temporary impacts as defined in section 4.0. There are no short-term or long-term impacts associated with the Gas Treatment Facilities.

^f Permanent wetland impacts are defined in section 4.0 of the environmental impact statement.

^g Gas Treatment Plant (GTP) includes the GTP, gravel mine, water reservoir, access roads, associated transfer pipelines, additional work areas, and West Dock Causeway.

^h PTTL includes the PTTL, aboveground facilities, construction camps, ice roads and ice pads, pipe storage yards, and a helipad.

Notes:

The wetland impact data in this table was provided by AGDC and reviewed for consistency with other information provided by AGDC.

E = estuarine wetland; HGM = hydrogeomorphic; N/A = not applicable; PEM = palustrine emergent wetland; PFO = palustrine forested wetland; PSS = palustrine scrub-shrub wetland

^a In order to normalize AGDC's data for our analysis, Cowardin classifications of palustrine ponds (e.g., palustrine aquatic bed and palustrine unconsolidated bottom classes) have been reassigned to PEM based on vegetation type shown on aerial imagery. Wetland classification according to Cowardin et al., 1979.

^b Wetland classification according to Brinson, 1993.

^c The crossing length is the measure of the distance of the centerline of the Mainline Pipeline through the wetland. Length crossed is noted as N/A where the feature does not cross the Mainline Pipeline centerline.

^d Temporary wetland impacts include temporary, short-term, and long-term impacts as defined in section 4.0 of the environmental impact statement.

^e Permanent wetland impacts are defined in section 4.0.

^f Pipeline right-of-way permanent impacts include granular fill work pads in the construction right-of-way and cut and fill construction areas where fill would not be removed after construction, as well as where wetlands would be converted from PFO to PSS or PEM. Does not include operational impacts for vegetative maintenance in PSS wetlands (see wetland vegetation conversion discussion in section 4.4.3.2).

^g N/A: wetland is not crossed by a Mainline Pipeline construction mode (e.g., Mode 1, 2, 3, 4, 5A). In order to align AGDC's data for our analysis with previous data provided in AGDC's application, construction modes have been reassigned based on AGDC's application.

^h Mainline aboveground facilities include compressor stations, meter stations, launchers/receivers, cathodic protection system, MLVs, the Mainline MOF, and a heater station.

ⁱ Mainline additional work areas includes ATWS, access roads, helipads and airstrips, construction camps, contractor, pipe, double joining yards, railroad spurs and work pads, disposal sites, and material sites.

Notes: The wetland impact data in this table was provided by AGDC and reviewed for consistency with other information provided by AGDC.

E = estuarine wetland; HGM = hydrogeomorphic; N/A = not applicable; PEM = palustrine emergent wetland;

PSS = Palustrine scrub-shrub wetland

^a N/A; no milepost associated with the Liquefaction Facilities.

^b In order to normalize AGDC's data for our analysis, Cowardin classifications of palustrine ponds (e.g., palustrine aquatic bed and palustrine unconsolidated bottom classes) have been reassigned to PEM based on vegetation type shown on aerial imagery. Wetland classification according to Cowardin et al., 1979.

^c Wetland classification according to Brinson, 1993.

^d Temporary wetland impacts include temporary, short-term, and long-term impacts as defined in section 4.0.

^e Permanent wetland impacts are defined in section 4.0 of the environmental impact statement.

^f The Marine Terminal includes the material offloading facility (MOF) with shoreline protection, MOF dredging, and the product loading facility.

802.6	802.6	<0.1	Summer 1.5

^a Length is based on the Mainline Pipeline centerline and may not exactly match estimated milepost numbers; the straight-line distance between consecutive mileposts may be greater than or less than 5,280 feet due to changes in elevation and adoption of route alternatives and variations. The mileposts should be considered reference points only.

^b Winter (October through April) and summer (May through September) construction seasons do not correspond with construction years 1 through 9, which are based on the January to December calendar year: winter 0 begins January of construction Year 1.
