FEDERAL ENERGY REGULATORY COMMISSION  
WASHINGTON, DC 20426

September 18, 2017

In Reply Refer To:  
Midcontinent Independent  
System Operator, Inc.  
Docket No. ER17-1304-000

Midcontinent Independent  
System Operator, Inc.  
2985 Ames Crossing Road  
Eagan, MN 55121

Attn: Kari Valley, Esq.  
Senior Corporate Counsel

Dear Ms. Valley:

1. On March 24, 2017, pursuant to section 205 of the Federal Power Act (FPA)<sup>1</sup> and Part 35 of the Commission's regulations,<sup>2</sup> Midcontinent Independent System Operator, Inc. (MISO) filed proposed revisions to Rate Schedule 46 (Coordination and Operating Agreement Between the Midcontinent Independent System Operator, Inc. And Minnkota Power Cooperative, Inc.) of its Open Access Transmission, Energy and Operating Reserve Markets Tariff (Tariff). On May 26, 2017, pursuant to the authority delegated by the Commission's February 3, 2017 Order Delegating Further Authority to Staff in Absence of Quorum,<sup>3</sup> MISO's proposed Tariff revisions were accepted for filing, suspended for a nominal period, to become effective June 1, 2017, as requested, subject to refund and further Commission order.<sup>4</sup>

---

<sup>1</sup> 16 U.S.C. § 824d (2012).

<sup>2</sup> 18 C.F.R. pt. 35 (2017).

<sup>3</sup> *Agency Operations in the Absence of a Quorum*, 158 FERC ¶ 61,135 (2017).

<sup>4</sup> *Midcontinent Indep. Sys. Operator, Inc.*, Docket No. ER17-1304-000 (May 26, 2017) (delegated letter order).

2. As discussed below, in this further order, we accept MISO's proposed Tariff revisions, effective June 1, 2017.

3. MISO states that it filed the proposed revisions to modify its existing processes with its seams and coordinating partners to include flows resulting from bi-directional External Asynchronous Resources<sup>5</sup> in the MISO market flow calculation under the baseline Congestion Management Process. According to MISO, the proposed revisions to the baseline Congestion Management Process align the treatment of export External Asynchronous Resources with the treatment of import External Asynchronous Resources in MISO market flow.

4. MISO explains that currently, only large-scale hydro generation owned by Manitoba Hydro meets the definition of External Asynchronous Resource in the MISO footprint. MISO states that until 2015, this resource was a dispatchable import into the MISO footprint and included in MISO market flows. However, MISO explains that in March 2015, bi-directional External Asynchronous Resources (both import and export) service was added for the MISO Balancing Authority, allowing exports to be dispatched to Manitoba Hydro. MISO states that changes to the Congestion Management Process to address the bi-directional External Asynchronous Resources have been ongoing since that time.

5. Notice of the filing was published in the *Federal Register*, 82 Fed. Reg. 16,180 (2017), with interventions and protests due on or before April 14, 2017. Minnkota Power Cooperative, Inc. (Minnkota) filed a timely motion to intervene.

6. Pursuant to Rule 214 of the Commission's Rules of Practice and Procedure, 18 C.F.R. § 385.214 (2017), the timely, unopposed motion to intervene serves to make Minnkota a party to this proceeding.

---

<sup>5</sup> External Asynchronous Resource is specific to the MISO Tariff. MISO, FERC Electric Tariff, Module A, § 1.E "External Asynchronous Resource" (55.0.0).

7. We find that MISO's proposal is just and reasonable and therefore accept MISO's proposed Tariff revisions, effective June 1, 2017, as requested.

By direction of the Commission.

Nathaniel J. Davis, Sr.,  
Deputy Secretary.
