

# Reliability

## FERC's Job No. 1

“FERC is vigilant on the reliability and resilience of our nation’s electric grid. I invite you to review our accomplishments and learn more about what we are doing on grid security, extreme weather preparedness, ensuring the evolving generation resource mix is as reliable as possible, and the importance of transmission reform to reliability.”

---

FERC Chairman **Willie Phillips**

FEDERAL ENERGY REGULATORY COMMISSION  
**Chairman Willie Phillips**

## RELIABILITY: GRID SECURITY

- **Issued final rule on cyberattacks & internal network security monitoring**  
*Order No. 887, Docket No. RM22-3-000*
- **Approved supply chain revisions for cybersecurity management controls**  
*CIP-003-9, Docket No. RD23-3-000*
- **Issued final rule on cybersecurity investments, incentives-based rate treatments** -- *Order No. 893, Docket No. RM22-19*
- **Held joint FERC-NERC Technical Conference on Physical Security of the Bulk Power Systems**
- **Recommended solutions beyond mandatory physical security standard CIP-014-3**
- **Coordinating with federal, state, and local law enforcement partners**

“The nature of security threats to our nation’s grid requires constant monitoring and vigilance. There is no greater priority for me and this Commission than making sure we protect the security of our electric grid.”

FERC Chairman **Willie Phillips**

## RELIABILITY: EXTREME WEATHER PREPAREDNESS AND RESILIENCE

- Issued order approving emergency operations and extreme cold weather preparedness and operations -- *EOP-011-3, EOP-012-1*
- Issued key findings & recommendations from Joint FERC-NERC Inquiry into Winter Storm Elliott
- Issued final rule on transmission system planning performance  
*Order No. 896, Docket No. RM22-10*
- Issued final rule directing vulnerability assessments  
*Order No. 897, Docket RM22-16, AD21-13*
- Renewed call for an authority to establish and enforce reliability standards for the natural gas system.

## RELIABILITY: RESOURCE MIX EVOLVES

The Commission approved new **reliability standards for inverter-based resources** to make sure promising new clean energy technologies can enhance, not weaken, reliability of the grid as the nation makes the transition to clean energy resources.

## RELIABILITY: HISTORIC TRANSMISSION REFORM

The Commission approved a new rule to enable America's vast power generation resources to connect to the grid in a reliable, efficient, transparent and timely manner and help provide more reliable, resilient and affordable electricity for all consumers. We are just getting started.

“ I am pleased we could move decisively to ensure the reliability and resilience of the bulk power system.”

FERC Chairman **Willie Phillips**
