UNITED STATES OF AMERICA
FEDERAL ENERGY REGULATORY COMMISSION

18 CFR Part 35

Docket No. RM17-3-000

Fast-Start Pricing in Markets Operated by Regional Transmission Organizations and Independent System Operators

(December 21, 2017)

AGENCY: Federal Energy Regulatory Commission.

ACTION: Withdrawal of Notice of Proposed Rulemaking and Termination of Rulemaking Proceeding.

SUMMARY: The Federal Energy Regulatory Commission is withdrawing its proposal to amend its regulations to require that each regional transmission organization and independent system operator incorporate market rules that meet certain requirements when pricing fast-start resources.

DATES: The notice of proposed rulemaking published on December 30, 2016, at 81 FR 96,391, is withdrawn as of [insert date of publication in the FEDERAL REGISTER].

SUPPLEMENTARY INFORMATION:
1. On December 15, 2016, the Commission issued a Notice of Proposed Rulemaking (NOPR) in this proceeding. For the reasons set forth below, we are exercising our discretion to withdraw the NOPR and terminate this rulemaking proceeding.

2. In the NOPR, the Commission preliminarily found that some existing regional transmission organization/independent system operator (RTO/ISO) fast-start pricing practices, or lack of fast-start pricing practices, may not result in rates that are just and reasonable. As a result, the Commission proposed to require that each RTO/ISO establish the following set of requirements for its fast-start pricing: (1) apply fast-start pricing to any resource committed by the RTO/ISO that is able to start up within ten minutes, has a minimum run time of one hour or less, and that submits economic energy

2 NOPR, FERC Stats. & Regs. ¶ 32,720 at PP 36-37.
offers to the market; (2) incorporate commitment costs, i.e., start-up and no-load costs, of
fast-start resources in energy and operating reserve prices; (3) modify fast-start pricing to
relax the economic minimum operating limit of fast-start resources and treat them as
dispatchable from zero to the economic maximum operating limit for the purpose of
calculating prices; (4) if the RTO/ISO allows offline fast-start resources to set prices
for addressing certain system needs, the resource must be feasible and economic; and
(5) incorporate fast-start pricing in both the day-ahead and real-time markets. The
Commission sought comment on the proposed reforms.3

3. The Commission received a number of comments in response to the proposed
reforms in the NOPR. Some commenters expressed support for the proposed reforms.
Other commenters raised concerns about the need for the proposed reforms relative to the
burden of implementing changes. Additionally, some commenters discussed the need for
regional flexibility to allow RTOs/ISOs to implement fast-start pricing practices that are
appropriate for their regions.

4. Upon further consideration and after review of the comments received in response
to the NOPR, we will withdraw the NOPR and terminate this proceeding. We appreciate
the feedback received in response to the NOPR. We continue to believe that improved
fast-start pricing practices have the potential to achieve the goals outlined in the NOPR;
however, we are persuaded by comments that question whether the proposed reforms
would bring sufficient value in all RTOs/ISOs and argued for regional flexibility. Having

3 NOPR, FERC Stats. & Regs. ¶ 32,720 at P 44.
considered these comments, we are persuaded to not require a uniform set of fast-start pricing requirements that would apply to all RTOs/ISOs. Instead, we will pursue the goals of the NOPR through section 206 actions involving NYISO, PJM, and SPP focusing on specific concerns with each RTO’s/ISO’s implementation of fast-start pricing consistent with the concerns outlined in the NOPR.

5. The Commission therefore withdraws the NOPR and terminates this rulemaking proceeding.

By direction of the Commission.

(SEAL)

Deputy Secretary.
